GOLDEN ROD.....	05	.40	2.50	
CRANBERRY VINE CUTTINGS.....	..	.10	.50	

A Few Descriptions.

Arbor Vitæ--American—A favorite everywhere for hedges, wind-breaks, ornamental planting on lawns and in cemeteries. The best evergreen conifer (cone bearing tree) in America for hedges, and almost invariably used for that purpose in hedging around cemetery lots. Can be trimmed in a great variety of shapes; in fact, can be shaped by use of the pruning shears into any form desired. Will stand any amount of pruning and grow all the more thrifty thereafter. Grown singly on the lawn needs no pruning at all, but will form naturally a beautiful conical shape, regular and symmetrical.

Fir--Balsam—Hardy everywhere, and a very beautiful tree. Fine for lawn planting. In very old age lower limbs should be trimmed.

Pine—White—A large native tree, of great value both for timber and ornament. Foliage finer and softer than that of most other Pines, and of a pleasant, light bluish green. This is the Pine of the lumbering regions of New England, Wisconsin and Michigan. No grounds can be considered complete without a number of specimens of this most noble of our native evergreens.

Spruce—White—A medium-sized, hardy tree, of pyramidal form and dense growth. Foliage light silvery green. A beautiful tree.

Hemlock—One of the hardiest and fastest growers; loose, open growth, but when pruned makes a very dense growth; very graceful and beautiful. Useful as single specimens or for hedges.

Ash—Black—A small tree of good form, with tough wood, separable in layers, used for hoops and coarse baskets. Grows on any soil.

Beech—American—Indispensible to the landscape gardener; fine foliage, very handsome magnificent tree, round spreading growth, branches close to the ground when planted singly, or can be pruned for street tree.

Birch—American and Yellow—The quick growth, light branches and airy appearance of the birches and the beautiful bark make them indispensable to all planters. Thrive on high, dry, or stony soils, as well as in ordinary places.

Maple—Sugar—Grows to a very large size. Strong, valuable wood. Very easily handled and will do well in any good soil.

Larch—American—A much valued tree, both for its rapid growth and bright green foliage early in the spring. Puts forth leaves earliest of any. Easily grown in any situation, high or low. Grows faster in moist soil.

PLEASE READ CAREFULLY

Shipping Season.

In Spring our shipping season varies some, but generally begins about April 1st and continues to June 1st. All stock is dug fresh just before shipments.

Terms.

Cash before shipment unless special agreement has been made for other terms of payment. C. O. D. orders must be accompanied by a sufficient sum to prepay charges both ways, or an express or freight agent's certificate must accompany order, guaranteeing that all charges will be paid by purchaser and that if goods are refused they will be returned to us free of all transportation charges. No C. O. D. orders accepted on any terms. It is not advisable for parties living in far away states to order large trees or any considerable quantity of small trees to be sent by express without having first ascertained how much the express charges will amount to. The return charges on C. O. D. freight or express shipments must be paid by the customer. Shipments to points on railroads where there is no station agent must be prepaid by us, and in such cases the amount of freight should be included in the remittance for order.

Remittances

may be made by Express Money Order, Postal Money Order or by Registered Letter. One and two-cent Stamps acceptable for all amounts under \$5 when it is more convenient for the remitter to send in that way. Customers must take upon themselves all risk of loss of currency or stamps sent in ordinary letters.

Order Early

to be sure of having your stock at the time wanted.

Guarantee.

Our responsibility ceases when delivery is made by us at postoffice, express office or freight office. We do not guarantee stock to live—no firm doing business on sound principles can give such guarantee—we DO guarantee stock to be full count and true to name and in healthy growing condition when delivered to the transportation company, and to be thoroughly packed in the best possible manner.

Shipping

Directions. State distinctly whether you want the goods sent by freight or express and tell us what R. R. to ship by if you have a preference. Write your name plainly and give name of freight or express office if different from postoffice. No order accepted for less than one dollar. You may be told that the reason our prices are so low is that our stock is not worth much. Send for some specimens of our list and you can see the quality of our stock.
