NEW CARNATIONS FOR 1900. ROOTED CUTTINGS.

The description are those of introducers.

Ethel Crocker. The storeman's ideal; of a perfect pink shade, equally good under natural or artificial light; brighter and deeper than Scott. Stems strong enough to hold its heavy flower erect, but without stiffness. Its freedom of bloom is perhaps its strongest point, as it will produce more long-stemmed flowers than any other variety grown. Calyx good and strong; petals rise vertically three-eighths of an inch beyond mouth of calyx before making their spread, which insures its non-breakable character. Petals extra heavy, flowers three to three and one-half inches across with ordinary culture. \$10.00 per 100. 250 for \$18.75.

The Marquis. Has received five first-class certificates and silver cup at Philadelphia for best pink. Color is true pink, soft and rich, possessing a peculiar glow which makes it very attractive. Its form is perfect; full and double and unusually well rounded and built up at center. Petals serrated and quilled giving it a graceful appearance. Its size is phenomenal, $3\frac{1}{2}$ to 4 inches in diameter under ordinary cultivation; stems strong and average two to three feet in length. Keeping qualities are excellent. Ready to send out in March. \$10.00 per 100.

Mrs. Thomas W. Lawson. (Peter Fisher.) The \$30,000 carnation. Pronounced the largest carnation of its color, and is already better advertised than any novelty introduced. It has been shown all over the country and received awards wherever displayed. Color, beautiful clear pink. Ready February 1st. \$14.00 per 100.

Olympia. (John N. May.) A beautiful clear glossy white with delicate pencillings of clear scarlet running through the petals, but much less red than in Mrs. Bradt. The largest flowered variety yet introduced. Deliciously fragrant. Stem under ordinary circumstances 2 to $2\frac{1}{2}$ feet, strong enough to carry its heavy flower. Entirely free from disease of any kind. Has received seven certificates and the highest commendations wherever exhibited. Ready February 15 to March 1st. \$12.00 per 100.

CARNATIONS. From 2-inch Pots.

America. Pure light scarlet, of even shade. Flower is of large size, nicely filled but not crowded with petals; it has a very strong calyx, a perfectly upright stem, 20 to 24 inches high. Comes into bloom early and its strongest points are its freedom of

bloom, large size and easy culture. \$5.00 per 100.

General Maceo. Very full, deeply fringed flower, $2\frac{1}{2}$ to $3\frac{1}{4}$ inches in diameter on stiff wiry stems. Ground color, deep, brilliant scarlet heavily overlaid with maroon, fully as rich and striking as the Meteor Rose. Habit erect, stiff, wiry, of the McGowan type, but with stiffer, stronger stems. \$5.00 per 100.

General Gomez. Brilliant cardinal maroon $2\frac{1}{2}$ to $3\frac{1}{4}$ inches in diameter. Fine stems 16 to 24 inches long. Strong, vigorous, very healthy habit. Blooms fully as freely as Portia; resembles Scott in habit and seems to have fully as good a constitution as that variety. \$5.00 per 100.

Daybreak. Delicate salmon flesh.

Portia. Bright scarlet, medium sized flowers, produced very freely.

Puritan. Large, pure white.

Peachblow. Deep satiny pink.

Rose Queen. Soft pure rose.

Triumph. Pure bright pink, extra large. A fine grower with long stiff stems. Calyx does not burst.

Victor. Bright salmon-pink, sport of Daybreak; a popular variety in many sections.

White Cloud. A cross between Daybreak and E. A. Wood. Strong growth, free blooming, from early to late; long, strong stems. Has proven itself one of the best whites. \$4.00 per 100.

Wm. Scott. Light pink.

Unless noted, \$3.00 per 100.

CANNAS.

Alsace. In this variety we have the nearest approach to a pure white Canna. A grand variety for contrasting with darker colored sorts. \$4.00 per 100.

Col. Dodds. Rich velvety red. \$4.00 for 100.

Chicago. Grand vermilion scarlet; flowers very large and flat, petals broad and five in number, composing a magnificent flower in a very large truss; erect in growth; foliage bright green. \$4.00 per 100.

Duke of Marlborough. A superb variety with dark velvety crimson maroon flowers, the darkest of all Cannas. A sturdy erect grower, with bluish metallic green foliage. \$5.00 per 100.

Francois Crozy. Bright orange, bordered with a narrow edge of gold. \$2.50 per 100.

Florence Vaughan. The finest variety of its color; flowers very large, of the most perfect form, with broad overlapping petals, nicely rounded at the ends. Color brilliant yellow, spotted with bright red. 100 for \$4.00.

Geoffrey St. Hilaire. Rich bronzy purple foliage, flowers rich glowing scarlet overlaid with orange. \$3.00 per 100.

J. D. Cabos. Dark greenish maroon foliage, with a bronze, metallic luster; flowers bright orange or apricot, sometimes brightened with a pinkish tinge. \$5.00 per 100.

L. E. Bally. Light canary yellow, spotted with orange. \$3.00 per 100.

Mad. Crozy. Flowers of a dazzling crimson scarlet, bordered with golden yellow. Remarkably free flowering. \$3.00 per 100.

President Cleveland. A strong, healthy grower, four feet high with an abundance of glossy deep green foliage and a most prolific and constant bloomer, being a mass of bright rich scarlet from early to late. The flowers are of immense size, often 4½ to 5 inches across, with heavy, broad overlapping petals, borne in monstrous trusses. The color is an intense bright orange scarlet. For producing a mass of deep glowing color no other Canna will compare with it. \$5.00 for 100.

Papa Canna. Very free flowering, producing a mass of bloom in immense sized spikes. Color pure red; a sturdy dwarf grower, 3 to 3½ feet. \$3.00 per 100.

Progression. Deep golden yellow, heavily spotted and splashed crimson. A continuous bloomer \$3.00 per 100.

Robt. Christie. Brilliant orange scarlet. This is a particularly strong grower, throwing up tremendous heads of bloom, and an exceptionally free bloomer. Grown alongside of some of the freest bloomers of the older varieties it showed nearly twice as much flower. \$6.00 per 100.

Sophie Buchner. Flowers very large, in close compact trusses. Deep crimson with vermilion shadings. \$3.00 per 100.

CHRYSANTHEMUMS.

New Varieties for 1900.

Nathan Smith & Son's introductions. Descriptions are those of the introducer.

Monrovia. (Mme. F. Bergman and J. E. Lager). Those intending to be first on the market with Chrysanthemums will welcome this early, bright yellow. It has the excellent stem and foliage of its parents, and in form is intermediate. The

flowers are deeper than those of Marion Henderson and come at the same date. Height, 3 ft. Take first or second bud. Certificated by the C. S. A.

Intensity. (Oakland and Geo. W. Childs.) Form reflexed, showing only the bright crimson upper surface of petals. Stem slender, but sufficiently wiry to carry the flower erect. Height, 4½ feet. Buds taken Oct. 1st give best results. Those desiring succession of flowers can readily conceive the value of a bright crimson in perfection Nov. 20th to 30th, a date when other good reds are scarce. Certificated by the C. S. A.

Pluma. (Francis B. Hayes and White Swan.) We have the pleasure of offering another hairy variety, which is undoubtedly the most perfect of this type yet introduced. Color very delicate pink. Three out of the four committees judging Pluma scored it perfect in fullness. Closely incurved, with the hair-like filaments very pronounced. Height 4½ feet. Take bud about Sept. 25th. Certificated by the C. S. A.

White Bonnaffon. (Mrs. H. Robinson and Mrs. H. McK. Twombly.) A commercial variety of great promise which we predict will become as popular as the typical Maj. Bonnaffon. Color, pure white, form identical with Bonnaffon, growth very short-jointed, not exceeding 3 feet in height. Foliage large and very dark green. Its lateness (Nov. 20th to 30th) greatly enhances its value. Take terminal bud about Oct. 10th. Certificated by four committees of the C. S. A.

Lavender Queen. (Mrs. Jas. Eadie and Thanksgiving.) A large Japanese, outer petals reflexed and center erect, making a flower of great depth. In general habit resembles Thanksgiving. Height 3 feet. A new color, decidedly distinct from any in commerce, being a soft shade of lavender pink. Under artificial light is identical with the light-colored Cattleyas so much admired by all. The finest pink for Thanksgiving trade. Take bud about Sept. 25th. Certificated by the C. S. A.

Goldmine. (Exhibited as Stelleta.) (H. L. Sunderbruch and Modesto.) Unsurpassed in size, having been grown 11 inches in diameter. Foliage and general habit resembles Sunderbruch. Planted June 20th it attained 3 feet in height. Rich golden yellow; outer petals reflexed and center incurving in a whorl. In perfection Nov. 20th to 30th. Best flowers were from buds taken Oct. 10th. We predict it will depose Modesto and Golden Wedding, being more dwarf, surpassing both in size, a rival in color, and having better stem than the former. Certificated by the C. S. A. at Chicago in 1898, scoring 93 points, and averaging 93 points before four committees in 1899. Also winner of the C. S. A. Silver Cup offered for the seedling scoring the highest average before three or more committees.

Superba. (Mme. F. Perrin and Maud Dean.) The latest Jap. Inc. pink that has come to our notice, being in perfection Dec. 10th to 20th. A very double flower, 5½ inches to 6 inches in diameter, with high, rounded center. Color, bright pink, intermediate between that of its parents. This we believe to be one of the best commercial varieties we have produced. Buds that were taken Nov. 1st will be developed for Christmas Height 4 feet. Take only terminal bud. Certificated by the C. S. A. in 1898 and passing all of the committees in 1899.

50c. each, \$5.00 per dozen.

YELLOW FITZWYGRAM.

The earliest yellow Chrysanthemum. Ready to cut September 25th to October 10th.

Just what every grower has wanted: a yellow 'Mum to cut along with his early whites.

It is dwarf and stiff stemmed, requiring no staking. Precedes all other yellows by two to three weeks. The color is rich and has developed stronger habit of growth and freer foliage than its parent, Lady Fitzwygram. \$7.00 per 100.

CHRYSANTHEMUMS—5 Recent Introductions.

Kuno. (Mme. F. Bergman and J. E. Lager). In form and habit intermediate between the two parents; strap petal, more loosely arranged than those of Bergman. Good stem and foliage. White; five inches in diameter; fully developed Oct. 11; 3 feet. Certificated by C. S. A. \$8.00 per 100.

Nagoya. (Modesto and Western King). A Japanese of reflexed form; clear bright yellow as pure as that of Modesto. Fine stem and foliage. Cut Nov. 24, a date when good yellows are very scarce. 4½ feet. Certificated by C. S. A. \$8.00 per 100.

Xeno. (Nerula and Mme. F. Perrin). A very late bright pink of the Japanese incurved type; possessing the fine foliage and habits of its parents. In color similar to Perrin, but larger and perfectly double. Cut Nov. 24; 3 feet. Certificated by C. S. A. \$8.00 per 100.

Mrs. Baer. A golden yellow sport from Mrs. Jerome Jones; this variety ought to need nothing more to describe or recommend it than the above. For a late midseason yellow it will have no rival. \$8.00 per 100.

Phenomenal. (Hill). Received certificate from N. C. S., Nov., 1898. Height 4½ feet, a free, easy grower with beautiful foliage; quite up to the flower, which is of the largest size, quite globular, petals broad, long and incurving, the color is buff, shaded darker. A fine variety in general make up, and of most pleasing color; quite up to exhibition standard. \$5.00 per 100.
