CELERY PLANTS

Extra Strong Transplanted, can be relied upon to give the very best of satisfaction.

Michell's Far Superior Many Heart—We can especially recommend this variety to every grower of celery; its quality is superior to most other varieties, an excellent keeper.

White Plume—The best variety for early use.

Boston Market—A reliable nutty, winter variety.

Giant Pascal—The largest late variety, excellent flavor.

Golden Self Blanching—One of the best for early use.

Dwarf Golden Heart—A standard favorite sort.

Perfection Half Dwarf—An excellent winter sort.

Pink Plume.

Price, per 100 - 40c. ; \$3.00 per 1000

POT GROWN STRAWBERRY PLANTS

These are grown for us by a specialist, and are the very best that can be procured. Persons planting pot grown strawberry plants may secure a full crop of berries the following season. Varieties marked (P) have pistillate or imperfect flowers, and must be planted near perfect flowering kinds, in order that the flowers may be fertilized. Plant one row of a staminate variety to every three rows of a pistillate variety.

Brandywine—The plant is remarkably vigorous. It has a perfect blossom, and its fruit colors all over. Its season is rather late, and every berry comes to maturity. The berries are very large, nearly always of regular, conical form; color bright, glossy red.

Bismarck—One of the finest early sorts.

Bubach—(P) One of the best varieties we have. In productiveness unsurpassed. Noted for its uniform and large size. Produces berries of first quality without much care. The berry is meaty, bright red in color.

Clyde—A good mid-season variety; large, roundish, conical in shape; bright scarlet, good quality.

Cumberland Triumph—One of the very best for home garden. The berries are very large, almost round, regular and uniform in size and shape, pale scarlet in color, and of fine quality. Early to mid-summer.

Gandy—One of the best late berries. Plant a good strong, healthy grower; berry large, firm, regular in size and shape, bright in color.

Glen Mary—A superb variety of large size and good quality. In color a bright glossy crimson. The plant is strong and healthy, very prolific. Twelve specimen berries fill a quart box. It is especially adapted to the private garden.

Marshall—Plant is large and strong; very prolific; 110 berries have been counted on a single plant. The fruit is handsome, attractive and large; 14 berries have been known to fill a quart box. Perfect form, dark crimson when fully ripe; quality and flavor excellent.

Michel's Early—This is an unusually early berry. The berries are bright scarlet, conical in shape, of excellent quality. It resists frost and drought on account of its strong constitution; is also free from rust. This plant has so much pollen that it is one of the best berries to fertilize all pistillate sorts.

Nick Ohmer—A berry of vigorous and robust habit, bright red smooth berries borne on strong stems, mid-season, lasting until quite late in season.

Pride of the Market—A variety of last season's introductions; one of the best 2nd early varieties in existence. Produces immense size berries, 75c. per doz.; per 100, \$4.00. \$30.00 per 1000.

Sharpless—For the best results Sharpless requires heavy, rich soil; the plant is exceedingly large and vigorous, quite free from rust and blight. Fruit of good quality; irregular, oblong, flattened at the top.

William Belt—Berries large, conical, rather long, regular in outline, bright red, glossy; quality good, moderately firm; plants vigorous, healthy and quite prolific. It is of good quality, and will sell well.

PRICES, (except where noted,) 50c. per dozen ; per 100, \$3.00 ; \$25.00 per 1000

Fairmount Weed Killer

SOLD IN ORIGINAL CONTAINERS

One gallon of our Weed Killer mixed with 49 gallons of water and spread over 100 to 150 square yards of surface with a rose sprinkler, will save the labor and expense of several men. It destroys all organic growth, therefore is only intended for use in places where grass is not wanted.

By using our Weed Killer you avoid digging up your paths and roads; they then become firm and free from dust.

The best time to use it is about 24 hours after rain, so that it will penetrate to the roots. Our Weed Killer acts by destroying the seed germs and roots of plants. Park and cemetery superintendents and caretakers of estates should test its valuable merits without delay.

A detailed black and white illustration of a rustic wooden bed frame. The frame is constructed from thick, textured logs, likely birch or similar, showing bark details. It features a headboard and footboard made of vertical logs, connected by horizontal logs. The side rails are also made of logs, with diagonal bracing for stability. The bed is set on four short, thick legs. On top of the headboard, there is a pile of logs or brush. The entire structure is set against a plain background, with a shadow cast on the ground beneath it.

\$4.00 and \$4.50 each

A detailed black and white illustration of a dense, tangled network of roots or branches, possibly representing a complex system or a natural structure. The drawing shows numerous thick, gnarled roots or stems that branch out and intertwine in a complex, three-dimensional pattern. The texture of the roots is highly detailed, with many small, rounded protrusions and deep grooves, giving them a bumpy, almost crystalline appearance. The overall structure is vertical, with roots extending from the top and bottom edges, creating a sense of depth and complexity. The style is reminiscent of a woodcut or a detailed engraving.

A detailed black and white illustration of a small, rustic wooden hut. The hut has a steep, conical roof made of wooden planks. At the very top of the roof is a small ring or finial. The walls of the hut are made of vertical wooden planks. A small, arched entrance is located at the base of the hut. The hut is decorated with several thick, gnarled branches or vines that wrap around its sides and form a sort of fence or enclosure in front of it. The entire illustration is set against a plain background.

A black and white illustration of three ornate boxes stacked vertically. The top box is octagonal with a geometric design on its sides. The middle box is rectangular with a relief of a reclining animal. The bottom box is rectangular with a relief of a reclining animal.

FERTILIZERS

Ashes. (Canada Unbleached Hard Wood.) These contain
all of the fertilizing elements except nitrogen. They
drive away insects, and are indispensable for all crops requiring
potash. Apply about 1000 lbs. to the acre. Per 100 lbs., \$1.50;
bbl. of 250 lbs., \$2.50; ton of 2000 lbs., \$18.00.

THE COST OF WOOD ASHES can be reduced \$3.00 per ton by
customers giving us their orders two weeks ahead, to enable us to ship it
direct from Canada. Special rate on application.

Bone Meal. Michell's Strictly Pure and Fresh. In fertili-
zation nothing takes precedence in importance
over animal bones, because they furnish the soil with the essen-
tial requisite of nitrogen as well as phosphoric acid. The most
substantial fertilizer for lawns and plants. It keeps on feeding
the soil for fully ten months. 3 lb., box., 15 cts.; 5 lb., bag,
25 cts.; 10 lbs., 40 cts.; 25 lbs., 75 cts.; 50 lbs., \$1.25; 100 lbs.,

Land Plaster. For mixing with Paris Green, also for top
dressing to sweeten the soil. 25 lbs., 50
cts.; 100 lbs., \$1.00; bbl., \$1.50; ton, \$9.50.

Nitrate of Soda. For all crops. Contains the largest
percentage of nitrogen; equal to 19
per cent. of ammonia. It is very quick in action, and hastens
maturity of crops fully two weeks. *Should not be applied until the
plants are above the ground, when 100 to 150 lbs. per acre should
be sown with other fertilizers, or mixed with phosphates.*
Shipped in double bags. 50 lbs., \$2.00; 100 lbs., \$3.50; 200 lbs.,
