A Rare and Beautiful Hardy Carolina Mountain Shrub

Stuartia pentagyna

THIS, the so-called American Camellia, is one of the most beautiful of all North American shrubs as well as one of the most rare, and has been much sought after for many years, being sparingly offered at times by a very few nurserymen in America and Europe.

Highlands Nursery has disseminated it quite largely, and we beg to announce that we now have a splendid stock on hand for the first time in years, which is offered below.

Stuartia pentagyna is the only American representative of the Tea and Camellia family which can be grown in the latitude of New England, and a few very fine clumps are now growing in the vicinity of Boston. It is an erect shrub, ten or twelve feet high, well foliaged and with large axillary flowers three or four inches across, with white creamy petals, deeply crenulated on the margins and resembling those of some of the single Camellias. Altogether it is one of the finest of all shrubs for single or mass planting and thrives in damp situations as well as in drier garden soil.

Orders should be placed at once for fall shipments, and stock will be reserved.

Prices:		Per 10	100	1,000
		\$1 00	\$8 00	\$70 00
	6 to 12 in.....	1 75	15 00	130 00

	3 to 4 ft.....			

This is an exceptional opportunity for nurserymen to stock up and for Park and Cemetery officials to secure a supply of this rare and beautiful shrub

Rhododendron maximum The Great American Rose Bay

A N D

Kalmia latifolia The Mountain Laurel

Showing *Rhododendron maximum* supplied by me growing at "Greystone," Yonkers, N. Y., the estate of Samuel Untermyer, Esq. Out of thirty carloads collected and shipped by us to this estate last spring, there was practically no loss. Photograph taken September, 1901, about four months after planting.

The use of collected *Rhododendrons* and *Kalmias* for quickly and permanently producing fine landscape effects is now well established, and with any reasonable expenditure there is no other possible way to obtain the results to be had by the use of these magnificent hardy broad-leaved evergreens. We have been in the business of collecting and growing *Rhododendrons*, *Kalmias*, *Azaleas* and other hardy American plants for sixteen years, and our sources of supply are not only unexcelled, but the long experience of our employees renders a commission placed in our hands peculiarly safe.

Our supply and advantages being unlimited, we are prepared to accept orders for fall or spring delivery, with an assurance of prompt service and satisfactory material that must give good results.

In carload lots we collect sizes from 2 feet to 10 feet in height with corresponding diameter; the number to the car, say forty or fifty to three or four hundred, depends entirely on the size. We are glad to give prices and all information possible to prospective purchasers, and specially invite correspondence on the subject from Landscape Architects, Park Superintendents and Boards and Estates.

Leucothoe catesbæi, *Galax aphylla*, and the rare *Rhododendron catawbiense* from the Carolina mountains we also collect by the carload, but the peculiar conditions of distance from railroads to plant stations, and rather heavy freight rates, make their use more limited to the producing of finer finished effects in connection with *Rhododendron maximum* and *Kalmia latifolia*, or with other planting. The foliage effects of these broad-leaved evergreens is beyond comparison, the leaves being rich in color, and excepting *Rhododendron catawbiense* turning brilliant bronze tints in fall and winter. Full information for the asking.

AZALEAS

The American Azaleas are among the choicest of all ornamentals, whether exotic or native, and were but rarely seen in cultivation before being disseminated by HIGHLANDS NURSERY. Large masses of "Great Flame-Colored Azalea," *calendulacea*, when seen in flower, present the most gorgeous effects, the shadings varying from deep crimson to a bright sulphur-yellow, and its complete hardiness is unquestionable. The foliage of *A. arborescens* is the finest of all the Azaleas, remaining a clear, shiny green throughout the summer, a characteristic not usual with this family. The large, white, sweet-scented flowers appear the last of all the Azaleas, and the numerous pink-tipped stamens protruding give a most beautiful effect. *Azalea vaseyi* is one of the finest introductions of late years, the flowers appearing before the foliage in April in the greatest profusion, white to deep pink; attains a height of 12 to 15 feet. *A. nudiflora* (deep pink) and *A. viscosa* (white) are pretty, dwarfier varieties, very useful in the under shrubbery.

The only large and fine stock in the world of American Azaleas is now growing in the HIGHLANDS NURSERY, all heavy plants with balls and full of flower buds, excepting perhaps some of the smallest sizes.

We Offer 50,000 *Rhododendron maximum*, Transplanted

— 10 —

Kawana, North Carolina, and Boston, Massachusetts

Conifers and Evergreens, continued

	Size	Per 10	100	1,000
TSUGA caroliniana , Carolina Hemlock	1 to 2 ft. . .	\$3 00	\$25 00	
" " " "	2 to 3 ft. . .	9 00		
" " " "	3 to 4 ft. . .	20 00		
" " " " \$3.50 to \$5 each	4 to 6 ft.			
" " " " \$6 to \$10 each	6 to 8 ft.			

This grand new Hemlock, introduced by us, possesses a distinct pyramidal growth, and attains a height of 40 to 50 feet. Its dense, dark foliage and graceful habit are only approached by some of the finer Japanese Hemlocks, which it somewhat resembles. Some fine specimens, 12 to 15 feet high, are now to be seen in the Arnold Arboretum, and are the first plants of this Hemlock ever sent out, being supplied by us to Prof. C. S. Sargent, Director, in 1884.

Evergreen Shrubs

The following (mostly broad-leaved) Shrub Evergreens are of greatest value for massing and for ground covering. All are perfectly hardy, and most of them produce a grand show of flowers. It is needless here to more than call attention to the large stock of *Rhododendrons* and *Kalmia latifolia* offered below. All are carefully transplanted and cultivated, and are clean and stocky. I have special methods of growing, gained by long experience, which insures healthy, well-ripened wood and good balls on roots, and the large quantities grown enable me to produce and sell at extraordinarily low prices. They will also be collected to order cheaply in any quantities.

A specialty is made of collecting to order by the carload clumps and large plants of *Rhododendron maximum*, *Kalmia latifolia*, *Leucothoe catesbaei*, and others, which are sure to grow and produce a fine immediate effect. Cost for this service gladly estimated, and correspondence invited, particularly from Landscape Gardeners and Park and Cemetery Superintendents. Special advertisement elsewhere.

Vines, Climbers and Creepers

Many plants here offered re of special merit for ground covering, and where needed in large quantities, will be supplied at very low prices. *Ambelopsis quinquefolia* var. *engelmanni*, *Lonicera sempervirens*, *L. halleana*, *L. japonica*, *Polygonum cilinode*, *Celastrus scandens*, *Rubus hispidus* and *Vitus species* are particularly recommended. In soils adapted to its growth (peaty or loamy, and preferably moist), *Galax aphylla* makes a hardy evergreen undershrub covering of lasting beauty, being a rich green in summer and coloring vivid bronze tints in autumn and winter, an effect which must be seen to be appreciated.

AMPELOPSIS engelmanni. This is the clinging form of the well-known Virginia Creeper, and was introduced by us several seasons ago. The leaves are much thinner and smaller than in the ordinary variety, and the whole plant lacks the coarseness that characterizes *A. quinquefolia* and it clings to walls like the ivy. The fall coloring is exceedingly brilliant, and in every way it is vastly superior to the common form, which is not used where the new variety is known and can be had. A fine stock ready for fall delivery. (See prices under this).

We Have 150,000 Rhododendrons and Kalmias Growing in Nursery

Native Ferns

A good collection of hardy native Ferns for park and cemetery planting, including the following varieties:

Adiantum pedatum,	Aspidium spinulosum,	Osmunda, in 3 vars.,
Aspidium acrostichoides,	Dicksonia punctilobula,	Polypodium vulgare,
Aspidium marginale,	Onoclea sensibilis,	Pteris aquilina.

Most of the above ferns will be collected to order at \$10 per 1,000, excepting the **Osmundas**, which are very heavy, at \$15 per 1,000. Only strong clumps will be sent. All nursery grown except where marked Col.

LILIUM GRAYI (Gray's Lily). (Introduced by Harlan P. Kelsey.) Since introducing this beautiful and rare Lily in 1888, many thousands have been sent out to all parts of the world, and it is considered one of the best, most distinct and showy of the family. First size, \$2 for 10, \$12.50 per 100, \$80 per 1,000; Second size \$1 for 10, \$7 per 100, \$50 per 1,000.

“ <i>philadelphicum</i> . Small	1 00	7 00	

LILIUM SUPERBUM (Turk's-Cap Lily). No description will do justice to this magnificent American Lily. A clump of them is literally a “blaze of scarlet and gold.” For years we have made the growing of this Lily a specialty and have sent out over a hundred thousand bulbs. Our stock this season is very fine, and we are offering it at a low price, for the benefit of large planters and those wishing to catalogue it. Of special use for planting in Rhododendron beds. Special prices: First size, 75 cts. for 10, \$4 per 100, \$30 per 1,000; Second size, 50 cts. for 10, \$2.50 per 100, \$20 per 1,000; Third size, 25 cts. for 10, \$1.50 per 100, \$10 per 1,000.

	Per 10	100	1,000
<i>Lilium washingtonianum</i>	\$3 00		
<i>Oxalis acetosella</i> , Col.	25	\$1 00	\$7 00

TRILLIUMS (Wood Lilies). The Trilliums, especially *T. grandiflorum*, are of especial value for massing in plantation borders and under trees. They are cheap and give quick effect. Can be shipped in August.

Cypripedium spectabile. (See page 15.)

Xanthorrhiza apiifolia (Yellow Root) growing at Highlands Nursery.

Undoubtedly the finest American undershrub for planting under trees or along roadways, walks and borders, and particularly where conditions of extreme moisture prevail. Foliage remains good till autumn, when it turns to shades of orange and yellow. Now used by thousands in parks and private grounds. A fine stock, ready for fall and spring sales. See prices, page 10.
