HARDWARE IMPLEMENTS,
DRAIN TILE, TIN SHOP, ETC.

WE are pleased to announce to our many friends and patrons that a Gold Medal was awarded this house at the Buffalo Exposition for its display of Garden Seeds, Grass and Field Seeds. A fac-simile of the Medal is shown on this page.

Awarded a Gold Medal at the Pan American Exposition for Fine Garden and Grass Seeds.

HARDWARE DEPARTMENT.

We have recently enlarged our business by adding an increased line of fine Hardware. This was done in response to the constant and increasing demand, and you will now be able to secure everything in Farmers', Mechanics' and Builders' Hardware from a clean, fresh stock at prices that will be reasonable. We ask your patronage.

ASBESTOS SAD IRONS THE BEST AND REASONS WHY.

They are hottest where they should be hot and coolest where they should be cool. They retain their heat, and with two irons will do the work of twice as many irons of any other kind meaning a saving of steps, fuel and space at the stove. They are easily manipulated, UNBREAKABLE, always ready for use.

ASBESTOS Irons have all the advantages and none of the disadvantages found in other irons.

PRICE \$1.50 PER SET OF THREE.

ALL METAL SEED SOWER.

This is the best of all the many Seed Sowers, very light and durable.

PRICE, \$2.00.

CASH PAID

for Buckwheat, Early Potatoes and Old Pop Corn of good quality.

FANCY BASKET WORK MATERIAL.

BARGAINS IN KNIVES, SHEARS, SCISSORS, RAZOR STROPS, ETC.

I bought a stock at a big bargain and will give you the benefit of it.

Show Cases Counters, Work Bench, Tables, Circular Saw, Lathe, Stoves, Etc., to be sold at a Bargain.

NON-WARRANTY.—F. H. Ebeling gives no Warranty, express or implied, as to description, quality, productiveness, or any other matter of any seeds, bulbs or plants he sends out, and he will not be in any way responsible for the crop. If the purchaser does not accept the goods on these terms, they are at once to be returned.

1868—THIRTY-FOURTH YEAR.—1902.

For thirty-four years this house has been located in the same block, having been established in 1868 by Mr. A. D. Perry. We are pleased to announce that never before have we been better able to meet the requirements of our trade than at the present time. This firm is the only strictly seed-house in Central New York. Importing the finest and choicest varieties of Flower and Garden Seeds—as well as dealing in all the more common sorts of field and garden seeds, implements, drain tile, hardware, etc., and which this catalogue will more fully explain.

SEEDS.—Our stock of seeds for 1902 have been most carefully selected—the best only being used for our trade. Our best possible care, skill and attention is devoted to this our special line of business.

HARDWARE.—In response to the constant and increasing demand we have added to our stock a large line of Farmers', Mechanics' and Builders' HARDWARE, Glass and Putty, Nails, &c.

Your patronage is earnestly solicited.

We herewith present our Thirty-second Annual Illustrated Catalogue containing a list of Seeds and things necessary for the Farm, Garden, Lawn, Greenhouse, Dairy, Poultry Yard, etc., also call especial attention to our Hardware Stock and Tin Shop. Everything in the line of Tin and Galvanized Iron Work is promptly done. We are better prepared to meet the full requirements of our trade, and thank our many friends for past favors and generous patronage.

Stabliert 34 Jahre.

Wir übergeben dem geehrten Publikum hiermit unseren 32sten jährlichen Catalog für das Jahr 1902. Derselbe enthält eine vollkommene Liste ausserlesenen Sorten frischer Garten-, Feld- und Blumen-Samen, sowie von allen Artikeln, welche für den Landbau, Garten, Allee, Treibhaus, Hühnerhof u. s. w. nöthig sind. In Verbindung mit unserem Laden haben wir auch für die Bequemlichkeit unserer Kunden eine Blechner- und Klempner-Werkstätte eingerichtet, auch besorgen wir galvanisirte Eisenarbeit. Dreiunddreißig Jahre war unser Geschäftshaus in ein und demselben Häusergebiert lokalisiert; gegründet wurde dasselbe im Jahre 1868. Dies ist das einzige wirkliche Samen-Geschäft in Central New York. Wir importiren die besten und seltensten Samenarten vom Auslande, besonders für unser Geschäft ausserlesen. Wir halten auch Ackerbau-Geräthschaften, Eisenwaren (Hardware), Handwerkszeug, Drainir-Ziegeln, u. s. w. stets auf Lager. Alles Nähere besorgt dieser Catalog. Herr Ebeling, der Eigenthümer, macht es sich zur besonderen Aufgabe, alle seine werthen deutschen Kunden in ihrer Muttersprache zu bedienen, und ist es sein stetes Bestreben, durch freundliche und zuvorkommende Bedienung ihre Kundenschaft und Wohlwollen zu erwerben und zu erhalten.

Achtungsvoll zeichnet,

F. H. Ebeling.

217 Warrenstraße, Syracuse, N. Y. (dem neuen Postamt gegenüber.)

Cauliflower Seed

This we have imported annually from the same growers for many years. It will produce a greater number of perfect heads than any other strain of cauliflower we ever saw. Of all the varieties that have been tried in this market OUR STRAIN OF ERFURT AND SNOWBALL HAVE GIVEN THE BEST SATISFACTION. We have our usual stock of Erfurt and Snowball and we assure you the quality is always the same and no cheap seed offered you in its place. There is no better cauliflower seed in the market, even if you pay fancy prices. Our price is \$3.00 per ounce.

John Cathers, Nathan Rose, Henry Wright, and other leading cauliflower growers in this section, have used our strain of Cauliflower for years and say it is without equal. A sure header, a fine yielder and a money maker.

A Field of our White Plume and Paris Golden Celery.

PARIS GOLDEN SELF-BLANCHING CELERY.

Our Golden Self-Blanching Celery is pronounced the very best and most profitable celery in cultivation. It is very early, entirely self-blanching, and can be grown without any banking up or covering whatever, even the outer ribs assuming a yellowish white color. The heart is of a beautiful golden yellow color, very large, crisp and solid. It is unequalled in striking appearance on the table or market stall, and decidedly the best keeper of all the self-blanching varieties. The largest celery growers are now planting their entire early crops in this variety, and those who purchase from us are unanimous in pronouncing our strain the best and purest obtainable. Oz., 80 c.; lb. \$1.00.

MUSHROOM SPAWN.

CAMPGNION, FRENCH. Culture—Mushrooms may be grown in cellars, under benches of green-houses or in sheds, wherever the temperature of 50 degrees can be kept up throughout the winter. The beds should be made from November to February, according to the time the Mushrooms are wanted, and it requires about two months for them to begin bearing. Secure fresh horse dung, free from straw and litter, and mix in it an equal bulk of loam from an old pasture with it. Keep

this under cover, taking care to turn it every day to prevent heating, until the pile is large enough to make a bed of the required size. Three or four feet wide, eight inches deep, and any length desired, are the proper proportions for a bed; but these may be varied. Prepare the mixture of loam and manure making the bed in layers and pounding down each with the back of a spade. Leave this to heat through for a few days and as soon as the heat subsides to 90 degrees, make holes in the bed about a foot apart each way, into which put pieces of the spawn two or three inches in diameter; fill up the holes with the compost, and at the expiration of a week or ten days the spawn will have thoroughly diffused itself through the bed.

Spread a layer of fresh soil over the heap to the depth of two inches, and cover with three or four inches of hay, straw or litter. Examine the bed often to see that it does not get dry. Take special care, however, when water is given, that it be at a temperature of about 100 degrees. Price, 25c. per lb.

DAY & BEARD TESTIMONIAL.

WATERLOO, N. Y., January 7, 1902.

MR. F. H. EBELING:

Sir:—The past two years have been severe, in many cases, on the vitality of seeds. We, like many others, have purchased some in many places, but our great majority of you, and we can truthfully say that we would have been just as well off had we placed our entire order with you. The coming season we shall endeavor to do a larger business with you than ever. Your promptness and carefulness for our interest, for such a long term of years, are justly entitled to the best trade we can give you.

Yours very respectfully,

DAY & BEARD.

GREAT BARGAINS IN WHIPS.

Bei uns wird Deutsch gesprochen.

Hill's Forcing Early white Spine CUCUMBER—(NEW). Very prolific, fine quality, very early. One of the best forcing sorts known. Ounce, 10c ; lb., \$1.00.

Allen's Early Flat Dutch—A remarkably fine strain; a sure header, the heads weighing from 10 to 12 pounds. Most valuable for forcing, or for general crop.

Allen's Market-Gardener's Private Stock Flat Dutch—Fine strain of the immense WINTER CABBAGE grown on Long Island for market. \$2.50 per pound.

KOCHIA SCOPARIA, or World's Fair Wonder,

2½ Feet High, Conical in Shape; Very Handsome for Borders, &c.

This very distinct and highly ornamental annual plant is not of recent introduction, but is so meritorious and so little known that we are justified in placing it among our choice novelties for 1902. The plants grow freely from seed sown in the open ground, when the trees are coming out in leaf, and from the earliest stage of growth in the spring until they reach maturity in the fall the plants are always of the rounded or globe-like form. The plants branch freely, and the stems are clothed with slender light-green leaves. Early in the fall the ends of the shoots are thickly set with small bright-scarlet flowers,—the bushy plants resembling balls of fire. The plants are equally showy planted singly to show the round ball-like form on all sides or grown in continuous rows or hedges. Highly recommended. Per pkt., 10 cents. 3 packets for 25 cents.

THE ROSE MAMMOTH PEPPER

Is a very large early variety of recent introduction by us, being a strong, vigorous grower, reaching a height of nearly two feet; very prolific yielder. The pods are very large, handsome, flesh thick, and mild. A great favorite with the market gardener. The earliest and best of all the large red sorts known. Price, 40c per oz.; per lb., \$3.00.

Spaller Yellow Globe Onion.

* This magnificent type of OVAL GLOBE has been secured by careful and systematic selection, and for shape, size, color and market value is unequalled. We have a limited quantity. Price, per oz., 10c; lb., \$1.50.

JAPANESE FERN BALL.

18 to 24 Inches Across.

This little beauty from Japan is the finest addition to the Fernery yet introduced, and the most satisfactory house fern ever offered.

Directions :—Place ball in water for several hours and then suspend in any desired position; repeat every two days until growth has started, after which water occasionally as required, being careful that it does not become dry. The greater the growth the more water will be required to keep the ferns in a flourishing condition. To use in fern dish cut ball in halves, placing flat side down, thus getting two dishes of beautiful ferns. The Fern Ball may be allowed to dry up at any time and be set away, and started again by watering as before.

The FERN BALL will be from one to four weeks in starting, according to degree of heat and moisture. Do not expose to direct rays of sun.

to 50 years.

EBELING'S DANISH CABBAGE.

The greatest shipper and keeper on the market. We have a very fine stock of this celebrated seed which is imported direct from the grower in Denmark for our trade. I have had this same strain for years. There is none equal to it.

Price \$3.00 per lb.

DANISH BALL HEAD CABBAGE.

AWNLESS BROME GRASS.

(*Bromus Inermis*)

Will stand long droughts and produce heavy crops in dry sections where other grasses would perish. It has also proved one of the hardiest grasses. Will succeed in a wider range of temperature than any other grass. Will also grow and produce satisfactory crops on soil too poor to support Timothy and many other grasses.

Price \$2.75 per bu. of 14 lbs.

**DWARF ESSEX
RAPE.**

The true Dwarf Essex Rape is valuable as a fattening food for pasturing sheep in autumn. It is particularly adapted as a "catch crop," for it grows best late in autumn. In the Northern States it can be sown at any time from May until the end of August, but in the Southern States it should not be sown until September or October for winter pasture. Its fattening properties are said to be twice as good as clover. Sow ten or twelve pounds per acre in drills fifteen inches apart. When sheep are feeding on Rape they should at all times have access to salt. Per lb., 8c; 100 lbs., \$6.50.

...SPELTZ...

The Wonderful Grain From Russia.

Russia has given us *Bromus Inermis*, the most notable addition to our list of grasses in many years. She has come to the front with a grain which is fully demonstrated to be of value for growth on poor soils and in droughty sections. It is neither wheat, rye nor barley, and yet it appears to be a combination of these. It is more like wheat than any others mentioned. For fattening cattle, poultry, horses, sheep, pigs, etc., it is claimed to be ahead of other grains. In fact, all kinds of animals seem to thrive on it. Yields 80 bushels or richer food than corn, besides giving as much as four tons of good fodder per acre. Excellent for pasture and can also be fed in the green state. As a green grass hay food it often gives 100 leafy stalks from one seed, which shows its heavy stooling properties. The heads are somewhat similar to two-rowed barley, the spikelets being separated from each other in such a manner that the crop is not easily injured by the weather. Will grow well and produce good crops on poor soil. Dry weather appears to have no effect on it. Every farmer should grow it.

The culture of Speltz is very simple. Prepare your land as you would for wheat or oats, and sow at the rate of 50 to 60 pounds to the acre. In the green state it makes an excellent pasture. Cut when the grain is past the middle stages of milk, when it will make splendid grain and lots of straw hay of excellent quality. Thresh like wheat, but not so closely. The hull and kernel can then be fed or first ground. Pkt. 10c; lb., 20c; 25 lbs. \$1.00; 100 lbs \$3.50.

Barley, Spring Rye, Spring Wheat and Seed Oats.

We offer choice well cleaned, true to name, varieties of SEED at reasonable prices.

BEARDLESS BARLEY—A fine yielder. Strong growth of straw. A barley without the objectionable beards, giving it a superior feeding value. These features combine to make it the best and most profitable Barley known. Beardless Barley was introduced by us several years ago, and has proved to be very popular. Price \$1.00.

BUCK WHEAT—\$1.00 per bushel.

SPRING RYE—We offer a fine crop of Spring Rye at \$1.40 per bushel.

SPRING WHEAT—We can supply SPRING WHEAT at market prices.

WHITE SEED OATS—We offer choice well cleaned, true to name, varieties of Seed Oats at reasonable prices.

COW PEAS—\$2.75 per bushel.

True Type of Common MILLET.

Note the contrast between this and the Southern Golden Millet.

The True Southern Golden is the only Millet worth sowing—it yields immensely and grows quickly into a big fod-

der. We have a fine stock of the True Golden Millet, which is worth ten times as much as the "Common."

This will grow a crop six feet high on good soil.

Golden Millet, \$2.00 per bu.
Common Millet, 1 20 "

SUPPLEMENT TO FLOWER SEED LIST.

Flowers of Easy Cultivation that all Lovers of Flowers can and ought to Grow
ASTERS.

For early flowering sow inside in April or March in shallow pans or boxes, using a light soil. Cover seeds very lightly; transplant seedlings when large enough to handle; plant in permanent beds about June 1st; for late flowering sow in open ground as soon as weather permits.

Our Asters are grown for us by specialists from the finest strains in the world, and are unrivaled.

AMERICAN BRANCHING. (Semple's or Vick's Branching.) A free growing Aster of robust, erect habit producing large, feathery blossoms, resembling Japanese Chrysanthemums; one of the finest for cutting. Height, three feet.

Harlequin—Spotted and striped double mixed. 10 cts. per pkt.

Mignon—Pure White, small pompon flowers. 10 cts. per pkt.

Victoria—Mixed color, tall, full flower, pyramidal shape. 10 cts.

Ball or Jewel—Symmetrically incurved, the bloom a perfect ball. 25 cts. per pkt.

Branching—Vick's white, very fine. 10 cts. per pkt.

For all other varieties see General Flower List.

BALSAM.

Beautiful and easily grown Half Hardy Annuals. Sow in open ground in May; the soil should be light and open; height 1 to 2 feet.

Double White.....oz.	\$2.00, Pkt. 10c	Double Rose.....oz.	\$1.50, Pkt. 10c
" Pink.....	" 1.50, " 10c	" Red.....	" 1.50, " 10c

CALENDULA (MARIGOLD.)

Hardy free flowering Annuals with large double flowers in splendid variety of colors; grows well in dry situation; height, 1 foot. Sow outside in May.

Mixed, all colors.....oz. 50 cts. Pkt. 5 cts

CALLIOPSIS OR COREOPSIS ANNUAL VARIETIES.

Charming hardy Annuals, blooming early and lasting in flower till frost. Very useful for cutting.

Mixed Varieties in Rich and Brilliant Colors.....Pkt. 10 cts

CANDYTUFT (IBERIS.)

Very showy, hardy Annuals, growing about 1 foot in height; grows in any soil. Sow outside in May.

Mixed colors in great variety.....oz. 30 cts. Pkt. 5 cts

CARNATION MARGUERITE.

Half hardy perennials if sown inside in spring and transplanted to the open garden in May, will flower in July and continue till frost, when with a light covering of rough straw or leaves they can be carried over winter and be much better the following year; or they may be potted up in the fall and flowered in the house during winter. The flowers in size, fragrance and variety of colors are equal to the best greenhouse varieties. Sow inside in March or April in shallow pans or boxes; transplant in open ground in May, or sow seed outside as soon as danger of frost is over.

Mixed Varieties, or separate colors (white, pink, red, rose yellow, striped.).....oz. \$2.00, Pkt. 10 cts

CASTOR BEAN (RICINUS.)

Tender Annuals of rapid and gigantic growth, producing enormous dark green or bronze colored palmate leaves, excellent for massive foliage effect on lawns or backgrounds; can be started in April in the house and transplanted to the open garden about the first of June where they will attain a height of from 6 to 10 feet in a few weeks. 25 cts. oz. 5 cts. pkt.

CHRYSANTHEMUMS' ANNUAL VARIETIES.

Hardy Annuals of easy cultivation and blooming early in the summer; grows about 2 feet high; splendid variety of colors.

Single, Mixed.....oz. 40 cts. Pkt. 5 cts. Double, Mixed.....oz. 40 cts. Pkt. 5 cts.

SUPPLEMENT TO FLOWER SEED LIST.

COSMOS EARLY FLOWERING.

One of the most beautiful flowers in cultivation; if sown in May in the open ground will bloom about the middle of July; the colors include pure white shades of lilac, rose and crimson. Mixed Shades-----Pkt., 10 cts

DAHLIA, SINGLE.

These popular flowers can be raised from seed and flowered the same season, and nothing gives more satisfaction than a good bed of Single Dahlias, being far superior to the double varieties for cutting purposes; sow seed inside in April; plant in the open ground about the first of June. A cool, rich soil suits Dahlias. Mixed Varieties-----Pkt., 10 cts

MIGNONETTE.

This delightfully fragrant plant should be grown by every one who has room for a window box. Its cultivation is the easiest possible. The seeds should be sown early outside, and the young plants thinned sufficiently to allow them to branch. Water freely in dry weather. Machet, one of the best-----oz., 60 cts. Pkt., 10 cts

NASTURTIUMS.

No collection of flowers should be without Nasturtiums, they grow so forcibly and afford such a variety of rich bright colors. As a cut flower there is nothing more effective, sweet scented and pleasing in every way.

Tall Varieties Mixed-----oz., 10 cts. Pkt, 5 cts | Dwarf Varieties Mixed-----oz., 15 cts. Pkt. 5 cts

Our Mixture of Nasturtiums is the Finest in the Country.

Nasturtium Dwarf.			Nasturtium Dwarf.

"	"	Crystal Palace--Dwarf	"	"	Flammulum Grandiflorum--Tall, scarlet and yellow extra fine
Each 5c pkg.			Each 5c pkg.		

PETUNIA.

The Petunia, owing to its good growing qualities and its dazzling colors, is a favorite with all growers of flowers who appreciate brilliant effects; for window boxes and mass beds nothing is more effective. Annuals growing from 12 to 15 inches high.

Double Varieties Mixed-----Pkt., 50 cts. | Single-----Pkt., 10 cts

SALVIA (FLOWERING SAGE.)

Splendens, one of our most useful and gorgeous bedding plants, with long spikes of brilliant scarlet flowers, blooming continuously from mid-summer till frost; about 3 feet high. Sow inside in April and transplant outside when danger of frost is over, or sow outside in May. \$3.00 oz. 10 cts. Pkt.

SWEET PEAS.

The improvement in this flower during the last few years is truly wonderful. The beauty and variety obtained through the work of the hybridizers is a revelation as to what can be done for the improvement of flowers by hybridizing. The delicate shades to be had in the new Sweet Peas cannot be surpassed by even the rose. To get the sweet Pea in perfection it should be sown early in rich rather moist soil. Dig a trench about eight inches deep, fill in two inches of well rotted manure, then two inches of rich soil in which the sweet peas should be sown; cover with one inch of soil and as the plants grow keep filling till the trench is level. In dry weather cover roots with litter of any kind to keep moist and cool and you will be well repaid.

		" " Apple Blossom-----	
		" " Cap't of Blues--Bright purple	

For additional Flower Seed List see Pages 20, 21 22.

FLOWER SEEDS.

KEY TO CULTURE.

A Sow for succession from April to June for summer and autumn blooming. Prepare the ground thoroughly by digging, adding a good supply of leaf mould or well rotted manure, making the surface fine and smooth.

B Sow in gentle heat, in a well drained pot or pan of light soil. Sow thinly and cover lightly with a fine sandy soil. Shade from bright sunshine, and water when necessary through a fine rose watering pot. Transplant to open ground when all danger from frost is over. The seed may also be sown in a cold frame in April, or open border in the latter part of May, but will not flower so early. Transplant or thin out before the plant gets too large.

C Sow from April to June, or in August, in a well prepared bed of light soil, covering the seed lightly. Keep clear of weed, and thin out the plants, if too thick, sufficiently early to allow them to develop their growth.

D Sow in spring in a well drained pot or well prepared hotbed of light, peaty or sandy soil. Place in a moderately warm temperature. Shade from bright sunshine and keep moist, transplant when ground is in proper condition, or in open ground after May 10th for late flowers.

E Sow in open border in April or May, and thin out or transplant, giving each plant plenty of room.

F Sow at any time in a pot prepared as follows : Let the pot be one-third full of drainage or broken charcoal ; cover the rough siftings of mould, and the surface with very fine soil, half of which should be composed of fine, sharp sand ; water with fine sprinkler ; scatter the seeds thickly over the surface, cover very lightly ; keep from direct rays of the sun. As soon as the plant shows the third leaf, transplant into seed pans, three-fourths of an inch apart, giving a little air to strengthen them. When the plants begin to touch each other they should be transplanted singly into small pots and keep them in a cool, airy part of the green house near the glass. Re-pot them when necessary.

The following portion of our catalogue, devoted to Flower Seeds, we have arranged both alphabetically and in columns, to enable any one to easily refer to the price and description of any variety desired.

KEY TO COLUMNS.

The 1st column contains the name of the flower.	The 5th column contains culture.

NAME.	Hardiness and Duration.	Height. Feet.	Color of Flower.	Culture.	Per Pkt.	GENERAL OBSERVATIONS.
Aster, Truffaut's La Superbe.....	hA	2	pure wht.	D	10	Aster. No lover of these flowers can find anything so easily cultivated that would afford such genuine pleasure and satisfaction. The New Washington varieties are extremely beautiful, attaining a very large size averaging 4½ inches in diameter, and in delicacy of tints are unequalled. Aster seed should be sown early in the Spring in a hot-bed or window box and transplanted out-doors when the weather is warm, about 12 inches apart—the taller varieties a little farther apart and the dwarf varieties a little nearer together.

WHEELBARROW SEEDERS.

WITH RUBBER, WIRE OR TWINE DISTRIBUTORS.
WITH WOODEN OR IRON FRAME.

THEY CAN BE WORKED BY ANYONE WHO CAN RUN A WHEELBARROW.
PRICE, \$6.50 TO \$8.00 EACH.

THE LITTLE GIANT SEED SOWER.

This is the cheapest Crank Seeder on the market, and equal to the best for quality of work it does and durability. Don't pay \$5 00 for a seeder when you can get its equal for less money.

Will sow Wheat, Rye, Oats, Rice, Flax, Millet, Turnip Seed, Clover Seed, Grass Seed, including Light Grasses; in fact any kind of Seed broadcast. Also Plaster, Fertilizer, Salt, Ashes, etc.

They save one-third seed and two-thirds labor.

CRANK SEEDERS, - - - -	\$2.00
FIDDLE SEEDERS, - - - -	1.50

Empire Combined Corn Drill,

\$16.00

Only Corn Drill made that has a *positive force feed fertilizer attachment*. The discharge of corn and fertilizer can be seen at all times by the operator.

The weight is adjusted so as equalize it and place a large share on the front wheel, relieving the blades and making the weight on the blades nearly the same when the box is full as when empty.

It has independent levers to throw both corn and fertilizer attachments in and out of gear, and will drill from 23 to 120 quarts of fertilizer per acre, and drop corn from 8 to 30 inches apart.

Furnished with or without fertilizer attachment, and with wheel or blade covers, as desired.

It has a brush cut-off which guarantees no breaking of grain.
Two plates are furnished with this corn drill, one for large and one for small corn.

We Sell Hardware of All Kinds.

PURE GROUND BONE,

Per 100, \$2.00

These fertilizers are free from foul seeds and are natural grass producers.

SHEEP FERTILIZER, \$2.50 PER 100 LBS.

LAWN SEEDS.

We refer to the *best Lawns of Syracuse* to show what we are doing to promote this good work in our midst. For years we have studied the nature of grasses, their adaptation to soils, the time of maturing, height, color, etc., with this object in view. We use in our mixture only grasses that harmonize in color and size, using both early and late varieties, that our lawns may remain green and beautiful all through the season. We have reached the goal in this line, and we are sure there is no better mixture for lawns than ours. In the first place we intend to have our *Lawn Seed strictly pure*. We examine every variety under a glass before we mix them, that our lawn seed may be free from foul weeds. We use all fibrous rooted perennial grasses so that they will stand the drouth and close cutting with the lawn mower without killing. We select grasses that harmonize in size in order to produce a fine velvety appearance and form a thick covering on the ground.

Per lb., 25c.; per 100 lbs., \$18.00.

THE IRON AGE.

FARM AND GARDEN IMPLEMENTS.

The "Iron Age" Catalogue for 1902
will be sent Free upon Application.

No. 6. Iron Age Combination Double Wheel Hoe, Hill and Drill Seeder.

Price, - - - \$10.00.

This tool is without question the most practical and complete combined garden implement ever offered the public. the ease and simplicity of adjustment, the lightness combined with great strength, the accuracy by which it drills or hills the seed, and the small amount of power required to operate it, are the most important features.

The Wheel is made of steel, 16 inches high; the frame of pipe, coupled to malleable castings. In each form, whether a Seed Drill, a Double Wheel Hoe or a Single Wheel Hoe, it is equal to any tool or tools made especially for the one purpose.

It places the seed in hills or drills, it plows, it rakes, it opens furrows, it covers, it hills, it hoes, it cultivates.

No. 1. Iron Age Double Wheel Hoe. Price, \$6.00

(The Drill Form of the Tool Shown Above.)

At a glance one can see the great usefulness of this tool. The garden or farm is incomplete without at least one of them.

In cultivating onions, beets, turnips, radishes, etc., it is invaluable, saves hours of hard labor and does the work better than several men could do it in the same time. One great advantage which this Double Wheel Hoe possesses is that it can be made into a practical Single Wheel Hoe in a moment's time.

An axle is sent with every Double Wheel Hoe for this purpose. The wheels are 16 inches high, enabling the Wheel Hoe to run easy and without yielding to the inequalities of the soil, as a low wheel will do. The frame being made of tubing coupled to malleable castings gives great strength, together with lightness. All the tools shown in the cut go with the machine for the price, \$6.00.

Showing the Double Wheel Hoe Set up
as a Single Wheel.

A Seed Drill attachment for sowing in rows only (No. 4) or for sowing both in rows and hills (No. 6), \$3.00 and \$4.00 respectively. When applied the tool is identical with that of the Iron Age No. 4 or No. 6. Combined tools, depending upon which seed attachment is applied

The Weeder Attachment. Price,
per pair, \$1.00.

No. 15 Iron Age Combined Single Wheel Hoe, Hill and Drill Seeder, Price \$9.00.

Combined in this tool is the best Hill and Drill Seeder and Single Wheel Hoe ever offered to the public. In combining these tools, not a single advantage of a separate Single Wheel Hoe or Seed Drill is lost. As each they are, in themselves, complete. Changed from one form to another almost instantly, completely filling every desire both as to method of handling seed and soil.

It places the seed in hills or drills, it plows, it rakes, it opens furrows, it covers, it hills, it hoes, it cultivates.

The wheel is made of steel, 16 in. high; the frame of pipe, coupled to malleable castings; therefore light, (runs easy) strong and durable.

No. 12, Iron Age Wheel Plow and Cultivator, price, \$3.00.

In the accompanying cut we show a tool of exceeding lightness but of great strength, which is designed to do a greater variety of work than any other tool of the same price. It will accomplish all the work necessary in a small garden,—plowing, furrowing, covering, hoeing, raking and cultivating. This tool is emphatically a friend of the laborer or mechanic who can afford only a small amount of money in a garden tool, and whose few moments in a garden must be devoted to "straight-ahead" work.

THE NEW MODEL SEED DRILL, Price \$6.50.

The New Model Seed Drill contains all the good points of every old drill in the market, with this point in addition; the slide or hole through the slide where all the seeds have to pass, is adjustable, and the slide can be changed to a fraction by the operator, thus admitting exactly the quantity of seed required. The hole is diamond shaped, which is another advantage for rough or irregular shaped seed. CUT-OFF—The flow of seed can be instantly stopped by a swinging cut-off, conveniently operated by a cord and ring on handle. This cut-off prevents all loss of seed at an end of rows, and its swinging or gravity form will be found far preferable to one that slides under, as it cannot injure the falling seeds.

No. 22. "Iron Age" Combined Fertilizer Distributor, Hill and Drill Seeder, Price \$16.00

In these days of strong competition in the growing of crops, it becomes necessary for the market gardener to make a study of the most economical use of fertilizers, and to obtain this economy requires such a tool as in accompanying cut, which applies the fertilizer in connection with the seed, just where it will do its greatest good; or, by the use of the same tool in its other form, as shown below by applying quick acting fertilizers to growing plants.

Although a tool designed to do so much, it is perfectly simple, light of draught, strong and perfect in the quality of the work done by it. These plows are adjustable in depth and width, which allows the adjustment at the depth at which the fertilizer is sown and allows its distribution in narrow streams at different distances. The Plows are immediately followed by the covers which draw the soil over the fertilizer just deposited.

The Fertilizer Distributor is thoroughly reliable in its distribution of fertilizer. It contains a force feed device which prevents stoppage by small lumps.

The Seed Sower Device is practically the same as used on Nos. 6 and 15 Combined Seed Drills. The seed may be sown in rows or dropped in hills at 4, 6, 8, 12 or 24 inches apart. For soft ground we can furnish a wide tire attachment.

No. 23. "Iron Age" Fertilizer Distributor, (As a Side Dresser). Price \$12.00.

Hill and Drill Seeder Attachment, \$4.00.

The side or top dressing of growing plants has become a practice of great importance. It is not merely a matter of the economical distribution of high priced fertilizers, but what is of more consequence, the placing of it just where the rootlets will quickly seize and absorb its chemical constituents.

With the addition of the Hill and Drill Seeder attachment, this tool is identical with the No. 22 Combined Fertilizer Distributor Hill and Drill Seeder shown above.

This tool is operated by working astride the rows of growing plants, and the result accomplished will be most gratifying.

Gem Single Wheel Hoe, \$4.00.

The popular GEM has been so largely used by the market gardeners that it needs no introduction. Being made mostly of steel and malleable iron it is strong yet light in weight. Sure to please.

No. 60 "IRON AGE" PIVOT WHEEL RIDING CULTIVATOR.

Price, \$32.00.

Add for Plows 65 cts. Fallow Tooth \$1.00.

Ball Bearings.—It has wonderful ease of guidance, the pivots being vertical near the wheels, and the ends resting upon hardened steel balls.

Spring Pressure Lock-Down.—To prevent the gangs from rising and slipping over hard places, we furnish this Cultivator with a spring pressure lock-down, strong enough to hold it to its work in stiff ground, but weak enough to allow the gangs to rise before amage could occur to them or the standards.

The Lever Gauge Adjuster gives the operator immediate control of the width of his gangs. With this adjuster the gangs are always at equal distance from the center. One important feature of our Adjuster

is that the gangs, and necessarily the teeth, are always kept parallel with each other, each tooth presenting its face squarely to the front at all times, and therefore will not throw soil toward the row when expanded, and from the row narrowed up, as is the case when the gangs are pivoted at the front. Especially is this Adjuster valuable where the distance must be changed frequently.

The **Gangs** are of such design as to give great strength—very rigid, so as to instantly follow the directions given by the wheels. For cultivating potatoes and all close-grown crops the outside part of gang is removed, together with the standard and tooth.

The **Standards** are made of good steel and can be instantly adjusted in depth of angle of cut, or removed altogether by simply loosening one nut.

Points.—The steel points sent out on the Cultivator are $2\frac{1}{2}$ inches in width and 10 inches long, while we have, also, of the same length, points $1\frac{1}{2}$ and $3\frac{1}{2}$ inches in width, meeting a call for those extremes.

The **Wheels**, as shown in cut, have flanged tires to prevent slipping on hill sides. They are made of steel, and while they may appear light, yet they are very strong and durable.

No. 70 "IRON AGE" Combined Pivot and Wheel Riding Cultivator, Price \$34.00.

Although a combined tool when used in either form, a Pivot or Fixed Wheel Cultivator, it is a thorough success, containing advantages over many tools made expressly as a Fixed or Pivot Wheel tool. The wheels are made of steel, 30 inches high with a broad face tire, $2\frac{1}{2}$ inches wide. They are adjustable in width at any point between 42 inches as the widest and 32 inches as the narrowest. This adjustment allows for the entire cultivation of rows 54 inches apart, and as close as 28 inches or even narrower.

Pivoted Gang Bars.—The gang bars are hinged or pivoted, and the cultivating width can thus be quickly changed by the simple loosening and tightening of two bolts. They are of round bars of steel, with a groove that engages a rib on the tooth holder, thus preventing all danger of turning on the bar, while the eye-bolt firmly clamps the tooth holder to the bar, with no danger of sliding. This combination also gives the facility of changing the position of the teeth on the bar or of increasing or reducing the number.

We call attention to our method of connecting the gangs in front—a connection of parallel links, giving an easy, swinging motion to the gangs, at the same time keeping them square to the front, instead of constantly changing the face of the teeth as occurs by the use of the ordinary single coupling. A **Spring Tooth Attachment** may be quickly and easily applied.

Price per set of 8 (including points) \$6.00.

The Improved-Robbins Potato Planter.

PRICE.

With Fertilizer Distributor.....	\$65.00
Without " ".....	55.00
Pea and Corn Sower Attachment.....	5.00
Leveler Attachment	.85

A machine that is completely and thoroughly successful. Has none of the faults of other planters, and does better work than planting by hand.

The opening plow is a double mold plow which throws out on each side a free furrow

of loose soil with no packing or wedging to crowd the future growth of the crop.

The fertilizer distributor sows the fertilizer in a broad stream 6 to 8 inches wide, in any quantity desired and same is mixed thoroughly with the soil by the shoe preceding the potato tube.

The seed is dropped at 12, 14, 15½, 17, 18½ or 20 inches apart. The change from one distance to another can easily be made by changing sprocket wheels. The covering is accomplished by means of a pair of discs which cover the seed with a full free covering.

The seed is neither punctured nor injured in any manner while being deposited in the furrow below, so one may rest assured the seed, after it is planted, is in as good condition as when first placed in the machine.

We refer you to these gentlemen who are using them: C. C. Wilcox, Oswego Falls, N. Y.; D. R. Overacre, Salina; Frank Horley, East Onondaga; T. A. Mitchell, Weedsport, N. Y.; Mr. Pendergast, Phoenix, N. Y.

No. 1 "Iron Age" Combined Harrow and Cultivator.

PRICE 5.00

An excellent tool for the cultivation of all small crops. Thoroughly pulverizes the soil without throwing but little dirt.

All believing in level culture should own one of these harrows.

The No. 6 "Iron Age" Horse Hoe and Cultivator.

Is truly a 20th Century Tool.

Its great adjustability adapts it for numberless uses and conditions.

In each form it is simple, strong and effective.

BUY YOUR HARDWARE AND WHIPS OF US.
WE SELL THE CELEBRATED BOWKER FERTILIZERS.

MASTICA, FOR GLAZING

Greenhouses, Sashes, etc., new and old. It is elastic, adhesive and easily applied. It is not affected by dampness, heat or cold.

Every florist has experienced difficulty in obtaining putty (whether ordinary or white lead) for glazing, that is satisfactory for any length of time. The fact is putty is not adapted for greenhouse work. "Mastica," when applied, in a few hours forms a skin or film on the entire mass, hermetically sealing the substance, and preventing the evaporation of the liquids, and remains in a soft, pliable and elastic condition for years. "Mastica" is of great value in going over old houses with a putty bulb or machine on the outside of sash, as it makes it perfectly tight and saves the expense of re-laying the glass.

Prices of Mastica, soft for machine application, $\frac{1}{2}$ gal., 65c.; gal., \$1.15. We are Sole Agents for Central New York.

PATENTED.

Diamond Edge Tree Pruner.

The above Pruner is the most powerful Tree Pruner on the market. The strength and power of this tool is wonderful, and the secret of it is that the nut remains where it is turned, for this reason the blades work inside the LINK NUT TIE, thus there is no friction on the head, or nut of the bolt, and the blade always cuts tight to the edge of curved blade and never becomes loose, as on other similar tools.

HIGH WHEEL IMPERIAL.

Absolutely Warranted for two years.
Positive Adjustment. Has no Equal.

In Public Parks, Private
Lawns and Cemeteries

AGENTS WANTED—Apply Promptly.

MARCELLUS, N. Y., Aug. 15, 1900.

F. H. EBELING:

Dear Sir—The Plant Setter I used on 35,000 cabbage and tobacco plants and set the plants in the hottest, dryest weather in June, and every plant lived.

This is wonderful, considering the heat and drought, and compared with the work of the horse planter.

It is simply and absolutely perfect.

I would not be without it for \$50.00.

This Planter enables me to set the best plants from the beds, and not sacrifice the smaller, and the method of watering ensures perfect planting.

E. A. CORNWALL.

Send for special catalogues with abundant testimonials and references.

We are sole agents for Oswego, Madison and Onondaga Counties.

HASTINGS, N. Y., Jan. 5, 1900.

F. H. EBELING:

Dear Sir—We, the undersigned have used your Little Giant Setter on tobacco plants the past season, and found it to work perfectly in every respect. We would not do without them for many times the cost. We can fully and honestly recommend it to any wishing to transplant all small plants in all kinds of soil in the dryest weather. It waters and sets at the same time. We would recommend liquid manure when possible in setting.

C. E. Bush, A. Palmer.
R. J. Dimon, L. Waterman,
L. W. Morford, A. P. Gardner,
S. W. Kent, Cazenovia, N. Y.

And a host of others. Absolutely guaranteed.

WIARD, STEEL AND IRON BEAM PLOWS.

No. 9. THE BEST OF THE WIARD PLOWS.

Landside view of Wiard Forged Steel Beam Plow. All our steel beam flat-land plows now have landside and shoe as shown above.

The Wiard Swivel Plow, with Automatic Jointer or Coulter.

One of the best plows for hillside or flat land and for cutting roots, or use in rough or stony ground. Price, \$13.50.

No. 10-B. Price, \$8.00 to \$10.00.

For one-horse, plows 4 to 7 inches deep, 6 to 10 inches wide; weight, 77 pounds.

WIARD SULKY PLOWS.

Price, \$30.00.

This sulky plow is made in the simplest and strongest manner possible, and by the use of levers the plow is guided precisely like a hand plow; and the greatest advantage derived from its use is in plowing lands so hard and stony as to make hand plowing very difficult. Our method of lifting the plow carries the point backward as the plow is raised, freeing it from obstructions under which it may caught. The patent flanged wheel gives it a perfectly uniform furrow, and enables the operator to "finish a land" with utmost precision. The adjustable plates give the exact width of furrow desired, and the sulky is perfectly balanced for either level or inclined fields.

CONTRACTORS AND ROAD PLOW.

For heavy excavating and all kinds of contractor's work. Of interest to all engaged in moving earth, builders and users of Road Machines; to farmers for deep ditching and leveling, and all cases where great strength and capacity for excavating are required.

This is a very substantial and heavy Plow of sufficient strength for the heaviest work.

The Point and Mouldboard are specially designed for digging and loosening the hardest clay, gravel and rocky ground.

The Handles are securely braced and strengthened with steel plates, having loops to protect them when tipped over.

The strong shoe with sloping front is far better and more durable than the wheel commonly used on this class of plows.

PRICES:

Road Plow with Shoe and Cast Point, \$14.00. Road Plow with Shoe and Acme Steel Point, \$15.00. Without Shoe, \$1.00 less.

MUNNSVILLE PLOWS.

WOOD, STEEL, AND IRON BEAMS.

No. 95. This New Reversible Plow is one of the best on the market and will be sold on its merits. Price, \$13.50. Call and See It.

STEEL BEAM PLOW, No. 10.

This Plow is long on the run with a high mouldboard, of a shape that insures easy draft, good cleaning qualities, and pleasing general appearance. Although its imitators are many, for general purposes it has never been equaled. Price, \$13.50.

No. 7 GARDEN OR VINEYARD PLOW.

Shifting beam and handles with trailing wheel always in line with the Plow. Price, Chilled or Steel, \$6.00 to \$8.00. Weight 75 to 85 lbs.

ONEIDA VALLEY CLIPPER No. 2½.

This is a light one horse cast steel plow, adapted to plowing out corn, hops and nurseries. Can be guaged so as to plow to and from the rows. Price, \$9.00 plain. This cut also represents our new 2½ chilled Plow. Price, \$7.50 Plain Chilled. \$9.00 Steel.

DUTTON IRON BEAM No. 2. PRICE, \$9.00.

HALLOCK'S POTATO DIGGER. PRICE, \$15.00.

Refer to Edgar Bowen. Onondaga Valley, Asylum for Feeble-Minded Children, E. A. Coville Split Rock, S. B. Rowe, Camillus, John Oley, Pompey, Ed. Benscotten, Onondaga Valley, and others who have used these diggers.

PLOWS AND PLOW CASTINGS.

We are carrying the largest line of Plows and Plow Castings to be found in Syracuse. We can supply parts for nearly every plow in use in this country.

Farmers' Combination Clamp and Drill.

\$2.25 with Diamond Point Drills.

Extra Drills, 10 cents each.

\$3 with Syracuse Twist Drills.

Extra Drills 25 cents each.

The lowest priced first class article of its kind on the market. Can be used as a wood clamp, also a bench vice or hand drill. Thoroughly practical.

This cut represents our Sickle Grinder with the knife head clamped in the machine. This is the only grinder made that is adjustable for every requirement of work, long or short, wide or narrow, new or old knives, and can be adjusted to grind sections above the knife head. Guard the points by screwing down the thumb screw that the arrow is pointing to. You can grind the knife as perfectly as when it was new.

Stones fit the bevel of knives, preserving their original shape and bevel till worn out. As the stone oscillates or passes up and from heel to point of blade every fifth turn of handle or large gear, it positively cannot heat nor draw the temper.

The best and only grinder on the market. Price, \$4.50.

STAR SICKLE GRINDER.

We Sell the Famous

COOPER'S SHEEP DIPPING POWDERS.

The finest in America, used by all ranchmen in the West, sure cure for scabs and ticks. We could show you a list of testimonials a yard long if necessary, but those we have from firms so well known among sheepmen will be all that is required to convince you we have the best. Sold at factory price. Small packages will make 25 gallons, large packages 100 gallons, ready for use. An unprecedented demand has set in all over the United States for our celebrated Sheep Dip, consequent upon the favorable verdict of sheepmen who have used it. Other preparations are being relinquished, as "Cooper" is found far superior in every way.

Cyphers' Incubators and Brooders.

The Cyphers Patent-Diaphragm, Non-Moisture, Self-Ventilating Incubators,

For which we are authorized agents, are guaranteed by the manufacturers as follows:

First—To require no supplied moisture.

Second—To be self-ventilating.

Third—To be self-regulating.

Fourth—To operate with less oil and at less expense than any other make of incubator.

Fifth—To be fire-proof, having the best, the safest, and the most costly built heater attached to any incubator.

Sixth—To be in all essentials the simplest and easiest to operate and control, requiring less labor and attention than any other incubator.

Seventh—To produce larger and stronger chicks than any other make of incubator on the market.

The result is an Incubator that is **Positively Self-Regulating, Self-Ventilating and Requires no Supplied Moisture.**

If you are in search of the best practical Incubator manufactured to date, the one that will hatch "the largest number of the strongest chicks or ducklings," **The Cyphers is that Machine.**

The Cyphers Incubators are used to-day on **Twenty-six Government Experiment Stations** in the United States, Canada, Australia and New Zealand. At these stations, which are operated at public expense, the Cyphers Incubators are used by the Professors of Agriculture and Poultry Managers for the purpose of demonstrating to students and poultry classes the scientific principles of artificial incubation.

The Cyphers Patent-Diaphragm, Non-Moisture, Self-Ventilating Incubators are rapidly supplanting the old-style incubators on the largest broiler plants, duck ranches and egg farms throughout the country, and to-day are used by a majority of America's most successful poultrymen, including prominent fanciers; also by thousands of persons in all walks of life.

It now is no idle boast that the sun never sets on the good work being done by the Cyphers Incubators "the world around." They are used in every country on the globe where poultry is produced for market, and are giving uniform satisfaction. **Five minutes' attention morning and evening** positively is all the time required to take proper care of this unequalled hatching machine.

The Standard Hatcher of the World.

Cyphers' Incubators cost a little more than cheaply-built, wrongly-constructed, inferior-hatching machines, but they are worth **a great deal more.** As a matter of fact they are what every earnest poultry raiser wants—a trustworthy, automatic incubator that with the least practicable attention will hatch the largest possible number of the strongest, largest and most vigorous chicks from a given number of fertile eggs.

The whole story is summed up in the Company's final guarantee, which we, as their agents, are authorized to stand back of in every particular, namely, that the Cyphers Incubator will do satisfactory work in the hands of every purchaser who will give it a fair trial, or it can be returned and the price paid for it will be refunded. Could any proposition be fairer than this? It is equivalent to buying a certainty in an incubator. Our advice to every reader of this catalogue is: Buy the best, then you will know you are right.

CYPHER'S INCUBATORS AND BROODERS.

CYPHER'S INDOOR, OUTDOOR SECTIONAL BROODERS.

The Cut Here Represents the Style A Outdoor Brooder—Front View.

Style B Indoor Brooder—The Cypher's Style B Brooder, standard size (36 x 36 inches), is for indoor use exclusively. It is heated by a Cypher's Safety Brooder Stove, has two apartments for the chicks, one under the hover, the other outside and around the hover; this outside apartment being ten to fifteen degrees cooler than under the hover.

Style A Outdoor Brooder—Next to its incubator, the Cypher's Company especially prides itself on the three-apartment, Style A Outdoor Brooder it manufactures. They un-

hesitatingly guarantee this to be the best brooding device on the market for either indoor or outdoor use, regardless of price, and all Cypher's Brooders, size and quality of material considered, are sold at reasonable prices. In the Cypher's Outdoor Brooder, style A, with a total floor space of 36 x 60 inches, we have not only the double apartment arrangement, consisting of the hover and well-lighted apartment surrounding the same, but for daytime use what amounts to a separate cooler brooder, or two brooders in one.

Cypher's Sectional Brooders—These Sectional Brooders are made in three sizes, two, three and four sections. They are 38 inches wide and 11 inches high. Each section is three feet long. The materials used are the best. There are six heating pipes, substantial and lasting boilers and lamps, a safety expansion tank, adjustable floors and heavy felt hover curtains. They are the most practical and inexpensive hot water brooders ever designed for indoor use in moderate temperatures.

A large, sixteen-page catalogue, illustrated, descriptive circular free on request.

A Complete Catalogue for 1902, consisting of 180 pages, 8 x 11 inches in size, containing a detailed description of the Cypher's incubators, brooders poultry appliances and poultry specialties; also over five hundred photographic illustrations of America's largest broiler plants, duck ranches, eggs and specialty farms, mailed to any address for ten cents in stamps, or silver, to pay postage.
