PRICE LIST

OF

THE KANSAS HOME
... NURSERY ...

A. H. GRIESA, Proprietor.

CUTLER & SON PRESS, LAWRENCE.

THE EARLY MELON APPLE.

REDUCED SIZE.

This is named Early to distinguish it from another Apple called Norton's Melon. It is not an early Apple, but is good in August, and keeps till November. It is large, red, free from blemish; sticks to the tree when others drop; it is very uniformly productive, and the best Apple for its season, no matter how many others are ripe at the same time. Surely try it.

PRICE LIST
OF
THE
KANSAS HOME NURSERY
AND
EXPERIMENTAL GROUNDS.

**Fruit and Ornamental Trees, Vines, Shrub-
bery, Small Fruits, and Evergreens.**

A. H. GRIESA,
PROPRIETOR.

Box J, Lawrence, Kansas.

6 at 12, 50 at 100, and 300 at 1,000 rates.
No variation in prices without permission.

NOTICE.

IT is the object of The Kansas Home Nursery to produce the best trees and plants obtainable.

In the Experimental Grounds we have on trial all kinds of orchard and small fruits, ornamentals and shrubs, for testing, and we discard all inferior kinds and add those that have proved valuable, a thing not adopted by other nurseries.

The trees and plants on our Experimental Grounds get good clean care, no pet care bestowed on any, and the results that we obtain are reliable.

Our varieties include all the staple kinds recommended by the State Horticultural Societies west of the Mississippi, and I desire the salesmen to confine themselves to the kinds mentioned in this list. We ask and expect this for the best results to our customers.

The trees will be clean and thrifty, of proper age and size, properly labelled and tied, each kind to itself, and we guarantee the delivery in good condition, at the place designated.

In our Experimental Grounds we have originated the Kansas Raspberry, the Mele Strawberry, the Superb Apricot and the Cardinal Red Raspberry, each recognized to be without a peer by the fruit-growing fraternity.

No extra charge for boxing, baling or packing. Trees delivered F. O. B. here.

Standard Apples.

The following list of Apples is the best of the many varieties. They are very hardy, great bearers and fine quality, and I can recommend them as the most profitable variety to plant. The trees are two years old and strictly first class.

s for summer; *a* for autumn; *w* for winter.

CLASS A.

Well branched. 4 to 6 feet.

50 cents each; \$5 per dozen.

✓ Early Melon (a). ✓ Banana (w)

✓ Mason's Orange (a). ✓ Akin (w).

Conovers' Colossal	Palmetto
--------------------	----------

Rhubarb.

2 years old roots. 10 cents each; 75 cents per doz.

Linnaeus	Victoria
----------	----------

Small Fruit Department.

We make an especial feature of growing currants, raspberries, gooseberries and blackberries, and have for sale many varieties that we have originated and know to be first class. In fact we do not offer for sale any varieties that have not fruited on our large experimental grounds. By fruiting them before offering to the public, we cast aside many varieties which prove undesirable, yet are offered for sale by other would-be nursery-men, who look forward to nothing but cash returns.

For suggestions, see report of my experiments, free by mail.

Blackberries.

CLASS A.

Special—Rathbun, 25 cents each; \$2.50 per doz.
Large, fine, healthy plants.

CLASS B.

\$1.00 per doz.; \$5 per 100.

How Agents Report Delivering Kansas Home
Nursery Trees.

WARSAW, MO., Nov. 6, 1899.

MR. A. H. GREISA, LAWRENCE, KANSAS:

DEAR SIR:—The trees came in good condition and were better quality than I expected. There were trees here from five other Nurseries but yours were the best of any, and gave good satisfaction, which insures us a good trade for the future.

Yours,

M. H. REED.

PEABODY, KANS., Sept. 27, 1897.

MR. A. H. GRIESA, LAWRENCE, KANSAS:

DEAR SIR—In reply to yours of recent date, would say it is too hot and dry here for anything to grow; we have not even raised a respectable sunflower here this season.

The Kansas Raspberry is about the only thing that has stood the dry weather without injury.

I sold about \$40 worth of berries from one-third of an acre, and if it had been a favorable season I would have doubled that.

Respectfully yours,

H. J. HANSON.

“ I have succeeded much better than I expected, or dared to hope, in my delivery; could have sold extra trees if I had them; I now am confident to do better next time.”

A. J. BARDELL,

———, Colorado.

McPIKE GRAPE.

REDUCED SIZE $\frac{1}{3}$.

This new, large Grape, has received first premium at many State Fairs and Horticultural Societies, and is worthy of trial by all who want to grow the best. Every vine will be sold with a seal.

BEAUTIFUL HARDY LILY.

Grown at the Kansas Home Nursery. Will thrive in any good soil, and yield their fragrant beauties for years, Try them, and *Yucca Recurva*.
