SOUTH ORANGE, N. J.**

INTRODUCTION.

Please send in your orders early, writing your name and address plainly; also giving mode of shipment. I would recommend *express*; if by mail, add enough money to cover postage. Kindly induce your friends to send their orders with yours, and give me ample time to fill same carefully.

On my part, I will do everything in my power to please you, giving you the best quality of goods at the lowest living prices. I do not offer premiums or other nostrums, nor do I offer anything I have no faith in.

I guarantee the safe arrival of all goods sent by express, but cannot be held responsible for anything sent by mail or freight; nor can I be held responsible for money sent in unregistered letters, or for failure or shortage of crops, stock being exhausted when order is filled, or any accidents or delays in delivery beyond my control.

While I exercise the greatest care to supply new, genuine, and unadulterated seeds, I still give no warranty, express or implied, as to description, quality, productiveness, or any other matter, of any Seeds, Plants, or Bulbs that I send out, and will not be in any way responsible for the crop. Every order received for articles named in this catalogue will be executed on these conditions only.

Correspondence is solicited from collectors or raisers of new varieties of plants, seeds, or bulbs, with the view of purchasing or exchanging same.

If at any time you are in need of a good gardener or assistant, write me, as I can recommend you reliable men whom I know personally.

I am pleased at any time to receive visitors who are interested in plants of any description, and, as I have the largest and most varied collection of choice and rare subjects, it will repay any one, even should he come a long distance, to inspect the plant. Here you will see plants from all parts of the globe, and among others the unique and celebrated **George Washington Palm**, which was owned by the first **President of the United States**, and is the admiration of every visitor.

The Nurseries are situated on the Delaware, Lackawanna & Western Railroad, adjoining the depot of South Orange. There are eighty-three trains daily, so visitors will have only a few minutes to wait, trains being so frequent. There are also electric cars from Newark to South Orange, connecting with the Pennsylvania Railroad and Jersey Central Railroad every ten minutes. Taking it all in all, it is the most accessible Nursery in the country.

Trusting to hear from you and your friends who are interested in gardening, and assuring you of my best efforts to give satisfaction,

Yours respectfully,

W. A. MANDA.

*Become a Customer, and you will
receive The Century Edition of Pocket
Garden Dictionary for 1901.*

Seed List.

I am preparing an entirely new Catalogue for the coming season—the beginning of a new century—and therefore will only publish, this year, a list of the stock which I carry. This is the Seed portion ; same will be followed by a list of the Plants which I have. In looking over this, you will readily see that no other house in the country carries such a great variety as you will find here.

I am also sending a Novelty Catalogue as usual, which contains a great many things of sterling merit.

Thanking you for past patronage, and awaiting your future commands,

Respectfully yours,

W. A. MANDA.

CHOICE VEGETABLE SEEDS.

ASPARAGUS.

	Per pkt.	Oz.	¼ lb.	1b.
✓ Colossal.....	\$0 05	\$0 10	\$0 15	\$0 60

Climbing Roses. See Roses.

FRUITS.

I have taken great care in selecting the varieties in this list, offering only such varieties as I know to be the very best, fine in quality, and prolific. Also, plants that will stand the extreme changes in temperature which we have in this climate.

APPLES.

The list below contains only such varieties as have been thoroughly tested, and which possess real merit. They do well planted on any good ground, and with little care give very satisfactory results.

	Each.	Doz.
Baldwin. Winter variety, large red.....	\$0 50	\$4 00
Fall Pippin. Very large, rich yellow.....	25	2 50
Fallawater. Large and juicy.....	25	2 50
Gravenstein. Pale yellow, striped with red.	25	2 50
Golden Russet. Fine flavored, late.....	25	2 50
Maiden's Blush. Large yellow, blush cheek.	25	2 50

LANDSCAPE GARDENING.

This is a very important subject, and one that should not be neglected or overlooked, especially when building up a new place.

It means that, with a good plan, you can lay out your place to all the advantages it commands naturally, besides making and developing features where the location is disadvantageous. The roads and walks should be laid out, not only to be practical, but also to be in harmony with everything adjacent.

The proper location of trees and shrubs, and the selection of the best and most desirable kinds, are very important, for you are planting for the future, and as it takes years for a shrub or tree to grow, you should plant only such as would be desirable and valuable when grown up. The same applies to the location of vegetable, flower, fruit, rock or wild garden borders or flower beds.

The grouping or massing of either trees, shrubs, plants or bulbs, to produce certain effects at special seasons, either in foliage, flower or fruit, can only be successfully accomplished by having full knowledge of the habits and character of such plants.

Many unsightly corners and spaces could be not only hidden, but actually made beautiful. Thus, outside the general flower garden, barren rocks and stumps of trees can be covered with luxuriant growth.

Dry and sandy hills, where even grass refuses to grow, with proper selection can be made as beautiful as where the soil is rich, while marshes can be turned into handsome objects, and ponds covered with showy water plants. In one word, it is the knowledge of the habits of plants and their adaptability to certain locations that brings the desired success.

Locating and designing greenhouses, graperies, pits or frames on a place are also very important; so are the proper details in the construction of greenhouses, which are generally left to architects, who do not take into consideration the practical points of the greenhouse or conservatory.

Do not lay out your place without a landscape gardener any more than you would build a house without an architect; and you cannot do better than consult

Yours truly,

W. A. MANDA.
