OUR NEW
CORN

FOR 1904

BACON'S PROLIFIC CORN

This very distinct and most promising new variety of corn, is the latest addition to the prolific corn family. It is more solid than any. It is unsurpassed in quality. Perfectly adapted to main crop planting. It is a robust grower, and is therefore a heavy cropper. We offer it in the expectation that it will please all.

NOTE.—While we believe our seeds to be true to name and of the best quality, yet of course we cannot warrant them, nor be responsible for any loss or damage arising from failure thereof, as we cannot control seasons, soil or work. If purchaser does not accept them on these terms they must be returned at once. The fact that we have customers trading with us now who have been doing so for 25 years, shows that we send out the *Best of Seeds* and only the *Cream of Seeds*.

Without any bluster or exaggerated talk embellished with big I's and flaring red pictures, we come to you again with our seed Annual, thanking you for 25 or 30 years patronage, soliciting a continuance of the same.

As true and experienced *practical Seedsmen*, for over a quarter century, we have gathered together from our long established growers, a line of seeds that cannot be excelled in quality and adaptability to the Southern States. and send them out under their proper name. New names given to well known varieties, is a mistake and a deception perpetrated upon the buyer and too small a business for an honorable seedsman to engage in. Plant our seeds with the same confidence you eat a meal prepared by your mother and you are not apt to be deceived. The true types under their proper names, improved every year, is our motto.

CORN—Mexican June, a very tall growing variety of white corn; considered good for ensilage crop after small grain 2 00 75 20 10

✓ CORN—Champion White Pearl, possessing all the good qualities of White Dent, a few days later; larger ears, very fine 2 25 60 15 10
Bu. Pk. Qt. Pt.

✓ CORN—Early White Dent. This is the most popular variety with our truck farmers for early green corn, as it comes in nearly as early as the Adams Early, and makes a much larger ear, usually two ears to the stalk, of pure white, deep grain; matures in about 90 days; also fine for planting after wheat or oats; makes fine meal 2 25 60 15 10

✓ TENN. GOLDEN DENT, also TENN. WHITE DENT, \$1.50.

These having been grown in Tennessee, have larger ears and grain, but have lost their earliness so be on your watch if you want Early Corn or quick growing varieties.
