"SUCCESS WITH FLOWERS"

An Illustrated Monthly Devoted to Floriculture and the Home

The above title is the name of the brightest and cheeriest home magazine published. For fourteen years it has had an army of readers in all parts of the world, and has carried sunshine into thousands upon thousands of flower-loving homes. It is primarily devoted to amateur flower growing and this is treated thoroughly. It is edited by practical men and women, the most successful amateurs in the country. **The Question Box** alone is worth the subscription price. Any trouble that you may have in flower growing will be answered in this department in a way that you can understand. Besides this feature, there are ably edited departments devoted to every phase of the home-life—cooking, needlework, dress and fashions, care of children, aids to health, as well as departments covering vegetable growing and poultry raising. In short, this is a publication which should find a warm welcome in every home in the country. It is superbly illustrated and printed on the finest paper, and in its field it is the best as well as the cheapest publication in America. Bright, clean, original and entirely different from any other periodical, we guarantee that a subscription to **SUCCESS WITH FLOWERS** will be the most satisfactory investment you have ever made. To further its popularity we are making this superb offer:

Seven Superb Pot and Bedding Plants Free

(See Color-plate Illustration on Preceding Page)

Every one sending us 50 cents (foreign subscribers add 12 cents extra for postage) for a year's subscription to **SUCCESS WITH FLOWERS**, before July 1, 1904, will receive postpaid and free of all additional cost, the seven superb plants described below and truthfully illustrated on the preceding page. Some of these varieties are already well known and very popular, others are new and rare in their particular class. Remember that these are not weak and sickly slips, but strong rooted plants, thoroughly first-class, sure to grow and bloom profusely this year. They are the best varieties obtainable. They will come to you carefully packed, correctly labeled, postage prepaid; we guarantee their delivery in first-class growing condition.

GENUINE AMERICAN WONDER LEMON.—Will begin to bloom and fruit at once. Has large, dark green foliage and pure waxy-white flowers as large as a Tuberosa and as fragrant as an orange blossom. The largest edible lemon in the world, ripe fruit weighing from two to three pounds each. Will grow, bloom and fruit in pot or tub, in ordinary good soil; no budding or grafting necessary. Our plants are guaranteed to be genuine. (1)

BEGONIA TRIUMPH DE LORRAINE.—The double red semperflorens Begonia. In bloom all the time, bearing continuously a mass of double, bright scarlet buds, changing to cherry-carmine when fully open. The petals are nicely imbricated. Without doubt one of the finest and freest flowering Begonias ever introduced. (2)

CARNATION DOROTHY.—This has proved the freest blooming Carnation ever introduced, and considering the size of its flowers it is simply wonderful. It is claimed to be the best market sort of the year, and is now selling at a high price in all the leading markets. Color is a deep pink; well fringed. (3)

CHRYSANTHEMUM COL. APPLETON.—"The King of Yellows."—With flowers of immense size, almost as large as Timothy Eaton, with a depth as great as the breadth, large, heavy, reflexing petals, of grand substance, perfect form and magnificent color—bright yellow, we have the greatest of all yellow Chrysanthemums. The stem is strong, carrying the flower erect, while the foliage is of the best texture, not too large, and growing fully up to the flower. Blooms at mid-season, and in the open ground is especially fine. It is indeed the champion of champions, and the greatest of all yellows. (4)

GERANIUM ROSEBUD.—Florets like perfect rosebud. The habit of growth is dwarf and compact, making variety one of the most desirable for pot culture novelty and merit, however, are principally in the perfect trusses of miniature rosebud florets, wondrously attractive and pleasing. The color is bright scarlet, flamed with purple shadings, and the substance is most lasting. No Geranium in cultivation to-day is as distinct. (5)

ASPARAGUS SPRENGERI, OR EMERALD FEATHER.—This most magnificent decorative plant has fairly bounded into popularity. For planting in pots, vases or hanging baskets it is positively unequalled. It droops most naturally, sending out numerous feathery fronds which in a very short time make a growth of 4 to 8 feet, forming an exquisitely handsome and striking picture. It resists all diseases that attack house plants, and will withstand a dry atmosphere as no other plant will. It produces small white flowers which are succeeded by red berries. A well-established plant is literally a mass of emerald green. (6)

FUCHSIA GLOIRE DES MARCHES.—It is nearly perfection as to free growth and habit, being strong and bushy. The tube and sepals are deep scarlet, the corolla is very large and double, and pure white. It is a free bloomer, easily managed. (7)

ORDER AS COLLECTION NO 31. NO CHANGE CAN BE MADE IN THIS SET.

If, after subscribing, you think **SUCCESS WITH FLOWERS** and the seven plants are not worth 50 cents, we will cheerfully refund the money sent us

TWO ACRES UNDER GLASS

We again present you our annual Catalogue, filled as usual with offers of the best varieties of Plants, Seeds and Fruits.

We wish to thank our patrons for their favors during the past year and trust every one has enjoyed the full satisfaction expected from plants, etc. purchased from us. We hope to have merited your orders for the coming season and expect to be able to give prompt attention to all, but ask that you make some allowance during the rush of a busy season.

We have just added a new range of Greenhouses to our already large establishment, so that we now have more than two acres covered with glass. With this addition to our facilities, and with increased help, we hope to care for all orders more promptly than ever before.

If by chance you should receive more than one copy of this Catalogue, kindly hand the extra one to a friend.

A Word About Express Charges

Some Florists are offering to prepay express charges on certain orders, but when so sent the soil is removed from the roots of the plants, and they are packed the same as for mail, the cost for sending being no more than it would be if the plants were sent by United States Mail.

We are willing to send any plant order by prepaid express, provided you are willing to have the plants come to you without soil, and that your selection is made strictly in accordance with our Mail Club Rates.

All plants that we send by express, charges to be paid by purchaser, are packed with ball of soil on the roots, thus insuring their uninterrupted growth when received.

We pack as light as possible consistent with safety, and our customers have the benefit of a 20 per cent. reduction from regular merchandise express rates.

Schedule of Club Rates

LIBERAL TERMS FOR CLUB ORDERS

Although our prices will be found as low as offered in other catalogues, we make the following additional inducements for the sending of **Larger Orders**--get your friends to order with you, for the larger the order, the more you get for your money.

Nor can we allow any of these to be selected as premiums.

Please remember this when ordering, and, if possible, keep the above named exceptions separate from that part of your order entitled to Club Rates.

Suggestions and Information of Importance and Interest to All

SUGGESTIONS TO CUSTOMERS

When Best to Order

ORDER EARLY—We strive to fill orders within a day or two after they reach us, but this is frequently made impossible by the great rush of business about planting time. Do not wait until you need your seeds and bulbs before ordering. Anticipate planting time by getting your orders in early. If you do not wish your seeds or plants until some later date, we will get them ready and ship whenever desired.

How Best to Order

By writing out your order on the Order Sheets which accompany this Catalogue, you will greatly facilitate our work. Please write only one variety on a line. Additional Order Sheets will be sent free on application.

Be Sure to Sign Name and Give Address

Many orders reach us lacking either or both. Customers when writing about unsigned orders will aid us in identification by mentioning some of the articles ordered. We have a number of unidentified orders on hand now.

Remittances

Should be made either in the form of P. O. Money Order, Bank Draft, Express Money Order, or Registered Letter. Remittances in any other way are entirely at the sender's risk. When money is sent as above indicated we will send a plant or seeds of your selection, to amount of cost of money order, etc., if amount sent us is \$1.00 or more. **UNITED STATES POSTAGE STAMPS** will be received if currency cannot be obtained.

Our Plant, Seed and Fruit Departments

Are entirely separate. Often the seeds or plants on a combined order may be sent before balance of order is filled. If only one part of order is received, please wait two or three days for the balance before writing us.

We Pack All Plants Carefully

In strong boxes, which insure their safe transit through the mails to the remotest part of the country.

We Guarantee

That every package we send out shall reach its destination in good condition. If a package is lost, or any of its contents injured on the way, we will send again. Examine carefully on receipt and report within ten days should there be any cause for complaint.

ITEMS OF INTEREST

Distance Plants Will Carry Safely

Judging from past experience, we really think some species would carry around the world. We forward live plants without any trouble, to the different States of the Union. We have shipped plants even to China, by mail, that were five weeks on the way, and still opened up fresh.

All Plants Plainly Labeled

All plants are plainly labeled with a printed label.

Our Plants Are All on Their Own Roots

And as long as any part of the plant remains it will produce uniformly the same beautiful flower. We grow them slowly to avoid forcing, our particular aim being to have a plant small enough to transport through the mail readily without injury, but with the vigor and thrift of much older plants. Consequently on being planted out a thousand miles away, the purchaser is surprised to see plants suddenly spring forth in luxuriant growth and blossom.

Index

On page 80 will be found an alphabetically arranged table of contents. This will greatly assist you in finding any particular plant that you may wish.

Free by Mail

We send Seeds, Bulbs and Plants **FREE BY MAIL**, at the prices named in this Catalogue. This brings them to the very doors of our customers without trouble or expense.

Plants by Express

We always recommend having plants sent by express, where there are many ordered, and where there is an express office near, as we can usually send much larger plants, and do not have to wash the soil off the roots, as is the case when sent by mail. When the weather is sufficiently warm we pack all express orders in light, strong baskets (which we furnish free), having the tops exposed. Plants packed in this manner will carry nicely for a great distance and keep for a week or ten days in a fresh condition. Purchaser pays express charges, but our **LIBERAL EXPRESS CLUB RATES** far more than compensate for express charges.

Lost Orders

It occasionally happens that an order is lost in coming to us, or the goods in going to the customer; therefore, if any who order do not hear from us within a reasonable length of time, they should send a duplicate order, naming the date on which the former one was sent, and the amount of money enclosed and in what form. This will enable us to investigate the matter and fill the duplicate order with dispatch.

All Orders

Whether large or small, receive from us the same uniform, prompt and careful attention. We fill all in the order of their reception, and unless greatly rushed, send off the plants the day after we receive the order. We wish our customers to remember that it is our determination to please all who deal with us, and we should like to hear from every package we send out. If the purchaser is satisfied, it is pleasant to know it; if not, we intend that he or she become so.

Our Terms Are Cash With Order

No order sent C. O. D. unless a remittance of one-fourth of the amount of the order be made to guarantee the acceptance.

Canada Postage

As postage to Canada is double the United States domestic rate, we must ask our Canadian friends to send 10 cents extra for each \$1.00 worth ordered. Do not send Canada postage stamps or silver, as we cannot use or dispose of them.

Outdoor Planting

We are often asked the best time to plant. Always choose the most favorable time in your locality, and order accordingly. We can send most plants safely when desired. As there are so many degrees of latitude, and such varieties of temperature from various causes, it is impossible to dictate as to the precise time to plant out of doors. Customers must judge of this for themselves, always remembering that it is not safe to plant out until all danger of freezing is passed, and the ground is in warm, mellow condition.

You Can Have the Choicest Roses

Geraniums and other plants in our collection as easily and cheaply as though they were grown at your own door, if you remit as above directed. We will take all the risk, and promise to deliver any plants you may select from our Catalogue in good growing condition.

We Employ

A large force of careful and experienced men, who have been thoroughly educated in the business, and take fully as much pride as we do in growing the plants to their greatest possible perfection, and having as near as possible no mistake occur in getting out and packing.

OUR FALL CATALOGUE

ON THE FIRST OF SEPTEMBER we issue a Catalogue of Bulbs and Plants for Fall planting and Winter blooming, such as Hyacinths, Tulips, Narcissus, Crocus, Ixias, Freesias, etc. We mail this Catalogue to all of our customers of this and last year, and we also send it free to others who wish to order.

OUR COLOR ILLUSTRATIONS

ON PAGES OF COVER

"Three of the Best" Roses

(Shown on First Page.)

Set of three for 60c; same in large two-year-old plants, \$1.25.
AMERICAN BEAUTY ROSE.

Flowers very large, of beautiful form, and very double; color, a deep, rich rose. The fragrance is delightful, resembling La France or the old-fashioned Damask Rose; a true ever-bloomer, each shoot producing a bud. This popular Rose is too well known to need further description. Price, small plants, 20c each; strong two-year-old plants, 50c.

GRAND NEW YELLOW ROSE.

"The Yellow Cochet" (Mme. Derapas Matrat).

A pure Tea Rose, very free-growing and hardy in character, withstanding ten degrees below zero. It throws up fine, strong stems, crowned by solitary buds of grand size; the color is a good sulphur-yellow, blooms very large, perfectly double, splendid form and freely produced. It has every quality necessary to make the ideal yellow bedder, ranking with the White and Pink Cochet in value as a Summer Rose. Price, 40c each; large, two-year-old plants, 75c each.

PINK LA FRANCE.

No variety can surpass it in delicate coloring—silvery-rose shades, with pink. It has a satin sheen over all its petals; hardy beyond question. It blooms continuously. The flower is large, finely built, endures for a great length of time. Price, 15c each; large, two-year-old plants, 35c each.

Tuberous Rooted Begonias

(Shown on Second Page of Cover.)

The Tuberous-Rooted Begonia is the fashionable plant of the day, and richly does it deserve its honors, for in addition to very handsome foliage, it bears a never-ending profusion of the most ravishingly beautiful flowers the whole Summer, and then with the coming of cold weather, very obligingly takes a nap until Spring, asking no further care through the Winter than to be packed in soil away from frost. This trait will be appreciated by the many people who have no spare window sto carry over tender bedding plants, yet dislike to be at the expense of buying a new lot each Spring. This grand plant is a rival of the Gloxinia as a Summer window or conservatory plant, and as strong a rival of the Geranium and Verbena as an outdoor bedding plant. The enormous size and intense brilliancy of the flowers astonish those who have never seen any but the ordinary house Begonia. The bulbs can be started from March to June, and will soon be in full bloom. Must be kept from direct sunshine. A good place for them is on the north side of a house or grape arbor. Our strain of both double and single is a very superior one, many of the flowers measuring three to five inches across.

Single, Separate Colors, white, scarlet, pink and yellow, 10c each; six for 50c.

Double, Separate Colors, white, scarlet, pink and yellow, 20c each; three for 50c.

OUR SUPERFINE MIXTURE OF TALL NASTURTIUMS

(Shown on Third Page of Cover.)

The Nasturtium is one of the most popular flowers of the present time, and is continually growing in favor. This mixture is composed of seeds from flowers of distinct colors in proportions that will produce the best results: It is as complete as can be made, and it is not possible to over-praise it, for the mixture cannot be surpassed. A most beautiful strain, flowering profusely, and having a wide range of bright and distinct colorings, embracing rose, pink, salmon, purple, velvety dark maroon, light yellow, and deep orange in self-colors, as well as most showy striped and blotched varieties. These are all of strong, vigorous growth, throwing out running shoots that can be trained upon strings or wires, or can be readily made to climb the ordinary paling fences or wire netting. They are also very showy planted at the top of a steep slope and allowed to run down the bank. They are equally beautiful simply trailing on level ground. Price for large packet, 10c; ounce, 20c; 1/4-pound, 50c.

others were dry and seedy, Munger ripened up sweet and juicy, and readily brought an advance of 50 cents per bushel over other kinds. The canes are free from disease, upright in growth. Price, 10c each; \$1.00 per dozen by mail, or \$3.00 per 100 by express.

KING RASPBERRY—The earliest Red Raspberry on record. It is the early Red Raspberry that makes the big money—often selling for 25c per quart. You want to add this one to your collection. Round, medium size; light crimson color; moderately firm and of excellent quality. The King Raspberry is fine, indeed—large, firm, beautiful color, prolific, and all that can be desired in the way of an early Red Raspberry. Price, 10c each; \$1.00 per dozen by mail, or \$3.00 per 100 by express.

NEW BLACKBERRY, MERSEAU—This early, mammoth, ironclad Blackberry is by far the most valuable variety that has appeared since the advent of the Wilson, over 30 years ago. In hardness, it is doubtless without an equal among Blackberries, having endured a temperature of 20 degrees below zero. The berries are brilliant, sparkling black throughout, and remain black under all conditions and circumstances, never turning red when gathered in hot, muggy weather, after the manner of many other varieties. In quality, it is exceptionally sweet, rich, melting and luscious, being without core. As a shipper and keeper it is unsurpassed, remaining firm without "bleeding" in handling. Price, 10c each; \$1.00 per dozen by mail, or \$5.00 per 100 by express.

WILDER CURRANT—A remarkable variety both for table and market. One of the strongest growers and most productive. Bunch and berries very large, bright, attractive red color, even when dead ripe; hangs on bushes in fine condition for handling as late as any known variety. Price, 15c each; \$1.50 per dozen.

SPECIAL OFFER

We will send two plants of each of above valuable collection of new fruits postpaid for only 50 cents; 5 plants of each postpaid for \$1.00; 12 plants of each postpaid, only \$2.00. We want every customer to try this collection. It is an introduction bargain.

CLUB RATES ARE NOT ALLOWED ON FRUITS.

ROSES

"THE QUEEN
OF FLOWERS."

THE Rose is the "Queen of Flowers." No garden, however small, is complete without Roses. There are no flowers grown that are more universally admired than the Rose, and their cultivation is yearly extending, as it becomes more generally known that they are so easily grown, and that they can be procured at so trifling an expense. All that is necessary to have them grow and bloom freely is to plant them in a bed of deep, fresh, loamy soil, well enriched with thoroughly rotted manure, and they are certain to do as well as a bed of Geraniums.

OUR "1904" ROSE SET.

SIX MAGNIFICENT EVER-BLOOMING ROSES FOR 50 CENTS.

We present this magnificent Collection of Roses with much pride, as they are the best six Roses ever offered for the small sum of 50 cents. They include a wide range in color, and will live out anywhere with slight protection. We would commend this set to those of our customers who would prefer to have us make a selection of varieties for them. Price for entire set of six, 50c; same in large two-year-old p'ants, \$1.25.

Antoine Rivoire—A handsome new Rose of vigorous habit of growth, with large, full, Camellia-shaped flowers. Color rosy flesh, on a yellow ground, shaded with a border of carmine; flowers five inches in diameter. A remarkable variety of great worth. Price, 15c. each; 2-year-old, 30c.

Helen Gould—Never before have we seen such superb flowers, not only in size, but in form and color. In it we have a better Rose for general purposes, especially winter-blooming, than American Beauty, the dream and hope of every Rose grower. The flowers are full and perfectly double; the buds beautifully made—long and pointed. The color is a warm rosy-crimson. Do not fail to include Helen Gould in your order. It will please you from the day you receive it. As a Rose for winter-blooming indoors in pots or boxes it is far and away the superior of any variety now known. It will grow to perfection in the ordinary living room and will produce its lovely flowers continuously throughout the entire Fall and Winter. Price, 15c. each; 2 year-old, 30c.

Maman Cochet—This is one of the most beautiful Tea Roses that has been introduced in years. The growth is vigorous, with rich, healthy foliage and extra large flowers on long, stout stems, very double and simply exquisite when in bud or half blown. The color is a deep rosy-pink, the inner side of petals silvery-rose; makes charming bunches of long-stemmed flowers when cut. Fine for either pot culture or outdoor planting. Price, 10c. each; 2 year-old, 25c.

White Maman Cochet—Identical with its parent, Maman Cochet, the queen of all pink garden Roses, except in color of flower, which is snowy-white, sometimes faintly tinged with the faintest suggestion of pale blush. It has the same freedom of bloom, magnificent form of buds and flowers, which is marvelously beautiful in its perfection. The flowers are large and very double, with petals of unusually heavy texture, making it of more than ordinary value in open ground. It has the vigor of an oak, with large heavy foliage, which is impervious to disease. Hardy with protection; of extraordinary merit. Price, 10c. each; 2-year-old, 25c.

New, Hardy, Ever-Blooming Rose, Climbing Clotilde Soupert—In a single season small plants will grow 15 to 25 feet, producing cluster after cluster of the finest formed flowers. They are distinct, large, round, full and double, with beautifully imbricated petals, and deliciously sweet. The color effect is magnificent—ivory white shading toward the center to a silvery-rose. Cluster after cluster of flowers are produced throughout the entire season, and the bush at all times is literally loaded down with them. It needs no protection, having withstood with us a temperature of 20 degrees below zero in the open ground without protection. This is unquestionably one of the most important introductions of recent years. Price, 10c. each; two-year-old plants, 30c. each.

Marie Van Houtte.

Of a fine, faultless, straw-yellow color, with the outer petals washed and outlined with a bright rosy-crimson. Occasionally the whole flower will be suffused with light pink. It grows vigorously, blooms freely and is most deliciously scented. In cool weather it almost changes color, taking on gorgeous crimson tints. A beautiful and superb Rose. Price, 10c. each; 2-year-old, 25c.

Marie Van Houtte.

THREE ROSES OF SPECIAL MERIT

New Climbing Rose, PHILADELPHIA RAMBLER

It differs from the Crimson Rambler in three important points. The color is deeper and more intense; the flowers are perfectly double to the center, very durable and of fine substance. The blooms are larger than those of the Crimson Rambler. It is very free in both growth and bloom, and is a splendid addition to the Crimson Rambler section. Price, 25c. each; large two-year-old plants, \$1.00 each.

A Most Beautiful Rose, SUNRISE

This has made a sensation in England and taken first honors wherever shown. In close bud form it shows the high, brilliant colors seen only in the Austrian copper, scarlet and yellow. As it opens the color deepens, the scarlet turning darker red, the yellow to orange and copper, inside of petals golden yellow. The open Rose is large, perfectly double and of grand form. Foliage glossy and thick, new growths being darkest and most beautiful found among Roses. Price, 20c. each; large two-year-old plants, 40c. each.

An Elegant Rose, SUNSET

A grand variety. The flowers are of large size, fine, full form, very double and deliciously perfumed; the color is a remarkable shade of rich golden-amber, elegantly tinged and shaded with dark ruddy-copper. Empress Augusta Victoria.

BESSIE BROWN (Hybrid Tea).

We know no better way to impress upon our customers the great value of this variety than to say that it is as strong growing, as free blooming, as attractive, and as hardy as President Carnot, a Rose whose beauty has taken the country by storm. We regard it as one of the finest Roses in cultivation. The flowers are very large and highly built and double; color is a creamy-white with a beautiful shade of pale tender flesh, resembling gloss silk. It is highly scented and a most magnificent Rose in the open ground.

CLARA WATSON.

A free-blooming Tea Rose of English origin, with many distinct features. The flowers are very graceful, resembling Bridesmaid in form, and are produced in remarkable profusion. For freedom of bloom this variety is specially valuable. The buds are very beautiful and are supported on long stems, making it desirable for cutting. The color is salmon-pink, very difficult to describe. Will take a place among the best

GRUSS AN TEPLITZ.

As a bedding Rose this is one of the finest and most useful varieties ever sent out. The color is brightest scarlet, shading to deep, rich, velvety-crimson. It is very fragrant. The freest grower and the most profuse of any ever-bloomer. The mass of color produced is wonderful, and the foliage is extremely beautiful, all the younger growth being a bronzy plum color. A queen among scarlet bedders. It is a perfect sheet of richest crimson scarlet all Summer.

LADY BATTERSEA.

This variety has long, oval buds, sharply pointed, very striking in form; the color is bright, cherry crimson, the stems are stiff and extremely long for a red rose; a vigorous grower; not very full, but an unusually showy variety; the only red rose approaching Niphetos in form; color, brilliant and unusual. Price, 25c each; large 2-year-old plants, 50c.

MAD. JOSEPH SCHWALLER.

Strong, upright grower, with same style and finish of flower as the Hybrid Perpetual class; very free in bloom, with fragrance of La France. The color is a deep, rosy flesh, deepening on edge of petals.

PERNET'S TRIUMPH.

One of the very finest of the Hybrid Tea class. The flowers are extra large, having broad, thick petals and long, tapering buds, with delicious Tea fragrance. Color a fine, clear magenta-red, sometimes passing to a bright crimson.

RED LA FRANCE.

Color a rich, deep, even pink throughout. The growth of the plant is vigorous, the habit good, and the flowers, which are thrown up well above the foliage, are produced very freely.

STRIPED LA FRANCE.

This beautiful new Rose is free in bloom; nicely striped. A beautiful bright rose on a satin pink ground. Very distinct and showy.

DINSMORE.

It is a vigorous, healthy Rose of dwarf, branching habit, and is simply loaded with flowers all Summer long, being even more profuse than most of the tender ever-blooming Roses. The flowers are large, perfectly double, and of a dazzling scarlet-crimson color, and have the rich, spicy fragrance peculiar to the best Hybrid Roses. We recommend it as being the finest garden Rose ever offered.

SOUVENIR DE PRESIDENT CARNOT.

A charming new French Rose. A strong, clean, healthy grower, with handsome bronzy-green foliage and large, elegant shaped buds. The flower is of large size, of exquisite shape, with heavy, thick, shell-like petals; buds long and pointed, similar to Niphetos, but very much larger, and all borne on long, stiff, erect stems. Color a delicate, rosy-flesh, shaded a trifle deeper at center. Very profuse bloomer.

WHITE LA FRANCE.

Beauty of Stapleford—A grand Rose. The flowers are very large and perfect in form, deliciously scented. Tea fragrance. The color is a clear, bright red, shading to bright, rosy-crimson. Makes large and beautiful buds, and is a constant and profuse bloomer.

Burbank—A perfectly hardy, free flowering, ever-blooming Rose. The flowers are double, of fine form, nearly three inches across. The color is a deep rose pink, shading to a beautiful soft rose at the center. The petals are well incurved, so that the center is hidden. In September and October the outer petals change to a deep, rich carmine. Delightfully fragrant.

Champion of the World—Every one wants a hardy ever-blooming Rose. From early Summer until frost it can be depended upon to produce flowers in abundance; color rich glossy pink, delightfully fragrant, and such a strong, vigorous grower that it is almost invulnerable against attacks of insects; thus it is certain to be unequaled for the garden or cemetery.

Crown Princess Victoria, or White Malmaison—This Rose is one of the loveliest of all Roses. The color is a pure, waxy, snow-white; the center of the flower has a lemon tint, just enough to lighten up and brighten it. We doubt very much if there is a finer Rose grown than this one.

Clothilde Soupert—It is a strong, vigorous grower. The flowers are large, double and beautiful in form, borne in sprays, and the color blends from a soft shell pink to a pure satiny-white.

Duchess de Brabant—This Rose combines exquisite perfume, beautiful coloring and matchless profusion of flowers and foliage. Soft, light rose, with heavy shading of amber and salmon. Quite hardy.

Helen Cambier—Great Yellow Garden Rose. The growth is free and vigorous, very free-blooming, flowers of splendid substance and a delightful shade of deep rich, golden yellow. In extreme heat comes a deep amber color. The buds are full and firm, lasting a long time when cut. As the flowers expand the center of the Rose discloses depths of golden-yellow, with light orange tints, while the older petals lessen to lemon yellow, giving a combination of tints and tones unequalled in their beauty.

Mosella—Mosella is a stronger grower, flowers are a little larger than the Clothilde Soupert, but appear the same way in clusters and on single stems. The color is chrome-yellow in the center, getting creamy-white on the edges of the petals. It will make a great bedder and is perfectly hardy.

Mme. E. Duranthon—This is one of the most unique colored Roses in existence. Large flowers, surmounting a long, stiff stem; creamy-white outside, center pink and coppery-yellow. Extremely free. This is indeed a beauty. Received first-class certificate at Lyons, France.

Madame Margottin—A famous Rose the most distinct and beautiful type. Flowers very large, full and double, borne profusely. Color dark citron-yellow, bright red center. A strong grower and a remarkably fine Rose in every way.

White Bougere—A beautiful, large, pure white flower, with thick, shell-shaped petals; fine both in bud and, fully open flower. Plant is a strong, healthy grower, equally valuable for pot or garden culture.

Meteor.

METEOR

A rich, dark, velvety-crimson, ever-blooming Rose, as fine in color as the best Perpetuals. The flowers are of good size, very double and perfect in shape, either as buds or when fully opened.

Four Sets of Roses in Solid Colors.

On this and the following pages we present Four Lists, or Sets, of Ever-Blooming Roses, each list composed of varieties of same color, but of different shades; in this way the best Roses of each color are given together, so that selections can be more readily made. *** SIX LOVELY RED ROSES ***

MAD. SADI CARNOT

This ought to be one of the finest Roses in the whole collection, as it is named after the wife of the late President of France. It blooms in large clusters, fine, full flowers, clear, bright cherry-red, passing to magenta. Makes pretty buds; delightfully perfumed.

PERNET'S TRIUMPH

A grand Hybrid Tea Rose that has received the endorsement and commendation of the highest European authorities. The flowers, produced on long stems, are extra large, having broad, thin petals, and long, tapering buds, with delicate tea fragrance. Color a fine, clear magenta red, sometimes passing to bright crimson. Very striking and beautiful, and of such good substance that the flowers retain their beauty for a long time. A splendid Rose, either for cut flowers or bedding.

QUEEN'S SCARLET

This is, without any doubt, the very best of the red Roses for bedding. It can be planted anywhere, being entirely hardy. The flowers are of large size and of a fiery scarlet, a color seldom seen in Roses. Indeed, a bed of this Rose produces a mass of red equal to a bed of Geraniums.

PAPA GONTIER

A grand red Tea, of fine crimson shade and silken texture (as distinct from velvety texture). The bud is of fine size and graceful form. Extremely free, both in growth and bloom. Very long and beautifully leaved stems can be cut, the foliage being very dark and heavy. One of the best, and a perfect bedder. If you desire a good Rose, one that will give entire satisfaction, you should procure this one, as it is a plant of great value.

The Grandest of All,

*** THE METEOR ***

A velvety-red ever-bloomer of the deepest glowing crimson; as fine as a Hybrid. Flowers of medium size, very double and slightly recurving. A beautiful open Rose, a free bloomer and a very excellent pot Rose. It has no tinge of violet or purple to mar its beauty. It is a vigorous, bushy grower, with healthy, bright foliage of the deepest green. This is unquestionably the best dark velvety-red Rose yet produced. Grand, both in bud and flower.

Princess
De Sagan.

A RICH CRIMSON TEA ROSE PRINCESS DE SAGAN

Crimson is a scarce color among Tea Roses, and for that reason, as well as for its vigorous growth, this is a Rose of great value and beauty. The color is rich, velvety crimson, brilliantly beautiful. It blooms quickly and abundantly; in fact is one of the freest blooming of Tea Roses. The flowers are very prettily made, while the buds are exceedingly handsome. In its color it is unexcelled for outdoor culture.

White Maman Cochet.

WHITE MAMAN COCHET

A Magnificent, Ever-Blooming Tea Rose

A grand Rose of 1898. Identical with its parent Maman Cochet, the queen of all pink garden roses, except in color of flower, which is snowy white, sometimes faintly tinged with the faintest suggestion of pale blush. It has the same freedom of bloom, magnificent form of buds and flowers, which is marvelously beautiful in its perfection. The flowers are large and very double, with petals of unusually heavy texture, making it of more than ordinary value in open ground. It has the vigor of an oak, with large, heavy foliage, which is impervious to disease. Hardy with protection; of extraordinary merit.

A Lovely Pure White Rose, Snow Flake

* This is a lovely White Rose, a pure Tea, but a foreign seedling, the freest-flowering White Rose we have ever seen. It will be especially useful in set designs. For a pot plant it cannot be excelled, as it possesses every good quality of a pot rose. It can be used in place of White Carnations for set pieces at an immense saving, because it can be bloomed profitably at one dollar per hundred buds. Not only will it cover twice and three times the space in a funeral design, for instance, than a Carnation covers, but it will give greatly superior results.

IVORY, or WHITE GOLDEN GATE

Golden Gate has become so well known to all Rose growers as an extremely free forcing variety of the largest size, that all will understand what the new rose, Ivory, is like when it is described as a pure white Golden Gate, a sport from that variety. Its extraordinary freedom, large size, heavy canes and pure color, all tend to make it a valuable forcing variety.

A Graceful Rose, The Queen

This elegant new Tea Rose originated in this country. It is a very large, pure snow white, ever-blooming Rose; the flowers are extremely large, very full and double, and delightfully perfumed; a vigorous and healthy grower; it is considered by all who have tried it, one of the most valuable pure white roses for all purposes.

One of Our Finest, Marie Guillot

This beautiful Tea Rose continues in popular favor, and still maintains its position as one of the best white Roses of its class. Flowers of an unusual style, entirely double to the center, and very sweet-scented. Habit of growth the best.

The Largest White Rose,

The Bride

This is undoubtedly the finest white ever-blooming Rose ever offered to the public, and we take pleasure in recommending it to all our customers. The buds are very large and of exquisite form; the petals are of fine texture and substance, and the full flower is very double, measuring from $3\frac{1}{2}$ to 4 inches in diameter. The color is a delicate creamy white. The blooms can be cut with long stems, and will last in a fresh state after being cut longer than any other known variety. This new Rose is a sport from Catherine Mermet, and is equally valuable either for Summer or Winter flowering.

Christine De Neve—(The Double Papa Gontier.) This beautiful new red Tea is a very charming Rose, and promises to be one of the best of recent introductions. It is particularly valuable because red has been a very scarce color among Tea Roses, and this one seems exceptionally fine. It is a splendid grower, making a large-sized, graceful bush, with bright, deep green foliage. A constant and very free bloomer.

Devoniensis—On account of its whiteness and sweetness, often called the "Magnolia Rose." Creamy-white, delicately flushed in the center with pink. One of the most fragrant Roses and a favorite of long standing.

Stanley—The color is a rare and remarkably beautiful shade of clear amber rose, delicately tinged toward the center with fine apricot-yellow; the petals are beautifully edged and bordered with rich carmine, and on the outer reverse side pass to a lovely shade of salmon or buff-rose; the flowers are large, fine, full form, excellent substance and deliciously fragrant, having a rich Tea scent.

Jules Finger—A magnificent Rose; elegant and valuable. The color is bright rosy-scarlet, beautifully shaded with intense crimson.

Joseph Metral—Extra large flowers, very full, handsome and sweet; deep carnation-red, passing to cherry-carmine or magenta. A good, healthy grower, and abundant bloomer.

Little Red Pet—A new Rose of great beauty; dark crimson flowers, equaling the Polyantha Roses in freedom of bloom. Fine for massing or pot culture. Blooms through the entire season.

Louis Richard—A superb Rose imported from France; extra large size; splendid full form, very double, delicious Tea scent; color rich coppery-rose, changing to buff, shaded with carmine; center sometimes brilliant rosy-crimson.

La Grandeur—Beautiful lilac-rose, tinted with pale, violet-purple; large, full flowers; finely scented.

Lettie Coles—One of the loveliest Roses grown, without exception. It is very double and cupped, forming a magnificent, full, open Rose, of soft, creamy-white, with very bright carmine center.

BOUQUET LIST--Continued.

MADAME DE WATTEVILLE—The color is a remarkable shade of creamy-yellow, richly colored with rosy-blush. The petals are large, and each one widely bordered with bright crimson, which gives it a very striking and beautiful appearance. The flowers are large, very full and highly perfumed. For planting in the open ground Madame de Watteville takes front rank, being a hardy, vigorous grower, a profuse bloomer and unsurpassed for cutting.

MME. WELCHE—The flowers have great depth and substance, and are of fine globular form, with broad, thick petals and large, finely-shaped buds. The color is a beautiful shade of soft amber-yellow, deepening toward the center to fine orange or coppery-yellow, delicately tinged and clouded with pale ruddy crimson. Both flowers and buds are remarkably sweet, and the plant is a good, healthy grower, of a compact, bush habit, producing its exquisite buds and flowers in great abundance during the whole growing season. It is fine for the conservatory, and none better for open ground.

MAD. JOSEPH SCHWARTZ—A lovely Tea Rose; extra large, globular flowers, very full and sweet, color pure white, tinged and shaded with pale yellow and rosy-blush; very beautiful Rose; constant and profuse bloomer.

MARIE DUCHER—Vigorous and free. Flowers large and double; salmon, shaded with rose, and deeper in the center; peculiar in color.

RAINBOW—Makes fine buds and flowers of a beautiful shade of pink, striped and mottled with bright crimson, shaded and toned rich amber-yellow.

SOUV. D'UN AMI—The color is a deep rosy-flesh, beautifully shaded with rich carmine; edges and reverse of petals silver-rose; clear and bright. A Rose that will please.

SOMBREUIL—Beautiful white, tinged with delicate rose; buds are large and full, blooming in clusters.

SAFRANO—Bright apricot-yellow, changing to orange and fawn, sometimes tinted with rose; valued highly for its beautiful buds; fragrant and a rampant grower.

SOUV. DE FRANCOIS GAULAIN—Bright velvety-crimson Rose. This is an unusual and highly remarkable color for a Tea Rose; bright, rich, velvety-crimson, very dark and exceedingly handsome; large, full flowers, very fragrant; an early and constant bloomer.

SOUV. DE LA MALMAISON—This grand old variety, when used as a bedding Rose in Summer, has no equal, as it produces the most perfect flowers in the hottest weather. Its rich, flesh-colored flowers are of immense size, double to the center, are produced in abundance, and have the requisite form and substance to withstand our hot, dry Summers; exquisitely fragrant; a noble Rose.

VIRGINIA—We consider it one of the most promising Tea Roses of modern introduction. It is a vigorous grower, of bushy habit, the blooms are large and double, finely formed, lasting and of excellent substance, often remaining on the bush until dried up. Color light yellow, with a tinge of saffron at the center, and reverse of petals of pinkish cast. Perfume a delicate and delightful Tea scent.

WHITE BON SILENE—A companion to Bon Silene. This elegant variety is valued for its buds, which are identical with Bon Silene except in color, which is pure white. It is a sport from Bon Silene, and has the same vigorous habit of growth; it is exceedingly fine for open ground planting.

BEAUTIFUL HARDY CREEPING ROSES.

Price 10c Each; set of 6 for 50c, 2-year-old Plants 25c, set of 6 for \$1.25.

THESE charming Roses are of the same creeping habit as Rosa Wichuriana, trailing over the ground or creeping about the trunks of trees and pillars with delightful effect. These Roses are of intense hardness, and succeed in all soils, even on the poorest and driest conceivable.

Rosa Wichuriana.

Evergreen Gem—The most wonderful grower of the set. Not only evergreen, but growing during mild weather in Winter. Stems long-branched, rich bronze color, covering the ground closely. Foliage fine, rich bronze color, closely matted. Flowers produced singly on stems, yellow, buff in bud, opening to almost white, two or three inches in diameter, perfectly double, and of a delightful Sweetbriar fragrance. This will be found most valuable for landscape work, as well as for cut-flower purposes. We consider this the best plant of the set.

Manda's Triumph—The gem of the collection, and may well be called the Double Memorial Rose. Very large, double flowers, fully two inches across, pure white, finely formed and sweetly fragrant, borne in large clusters.

Pink Roamer—This, in its flower, possesses the characteristics of the Sweetbriar, whilst its vigorous growth and handsome, luxuriant foliage are those of the Wichuriana type. Its beautiful flowers are single, very large, brilliant rich pink, with prominent orange-red stamens and delightfully sweet scented.

Mrs. Lovett—New Double Sweet-Scented Memorial Rose. Roses are very double, 2 to 2½ inches in diameter, of the liveliest, most cheerful bright rosy-pink. Best of all, it is as fragrant as the American Beauty, although its fragrance is distinct from that of any other Rose.

Rosa Wichuriana—Hardy, lasting; creeps over ground like ivy. Leaves glossy, dark green, handsomely notched. Flowers are borne very profusely during July, are large, pure white, single yellow center, and have Wild Rose fragrance. This has been widely advertised as the "Memorial Rose," and is especially adapted for cemetery use.

Universal Favorite—The strongest grower of them all, producing long, branching shoots and dense green foliage. The blooms, too, are very abundant, of large size, double, of a beautiful rosy-pink, like that of Bridesmaid, and delightfully fragrant.

Its flowers are of medium size, pure white, perfectly double to the center, sweet, and borne in endless number all Summer. It is a vigorous and rapid grower and at once becomes a general favorite. It makes a great profusion of fine buds, which are borne on long stems and usually in large clusters. Its fragrance is tinged with old-fashioned musk flavor, so much admired in olden times.

New Ever-Blooming Rose, CLIMBING MALMAISON.

There is no finer pink Rose than the old, well-known Malmaison, or "Souvenir" of the South, and we are sure that our patrons, one and all, will be glad to hear that we have a climbing variety that is identical with the parent. This variety will prove of inestimable value to all lovers of fine climbing Roses. It will prove perfectly hardy south of Washington, D. C.

A Remarkable New Rose,

MRS. ROBERT PEARY, or CLIMBING KAISERIN.

This is by all odds the most remarkable new Rose of recent introduction. It is an offspring of that grand variety, Kaiserin Augusta Victoria. The flowers are extra large, full, deep and double. They are of excellent substance, and produced on long stiff stems, like a forcing Rose. The buds are long and pointed, a remarkable feature not found in any other climbing Rose. Pure ivory-white. The fragrance is delicious. It grows to perfection outdoors, throwing up numerous shoots, 10 to 15 feet high in a single season.

PRESIDENT CLEVELAND.

Known also as Climbing Marie Guillot.

It is one of the most rapid growing and vigorous Climbing Roses we have ever seen. It blooms continuously throughout the season, the first and every year. The flowers are magnificently made, extra large, deep and double. The buds are particularly beautiful and the fragrance is delightful.

**New, Hardy, Ever-Blooming Rose,
CLIMBING CLOTHILDE SOUPERT.**

In a single season small plants will grow 15 to 25 feet, producing cluster after cluster of the finest formed flowers. They are distinct, large, round, full and double, with beautifully imbricated petals, and deliciously sweet. The color effect is magnificent—ivory white shading toward the center to a silvery rose. Cluster after cluster of flowers is produced throughout the entire season, and the bush at all times is literally loaded down with them. It needs no protection, having withstood with us a temperature of 20 degrees below zero in the open ground without protection. (For illustration, see next page.)

CLIMBING TEAS AND NOISETTE ROSES

Here we have a class that combines the Noisette and climbing Tea Roses. In the South and California these are the Roses of all Roses, growing as no others grow, and enriching the entire Summer with their unstinted bloom. This class is also quite useful in the North for growing in conservatories, pits and greenhouses, where they reward the extra care and protection by producing thousands of magnificent blooms.

The Superb Yellow Rose Marechal Neil The Most Popular of All

A Rose so famous as to really require no description. Its magnificent golden-yellow buds are worn the world over; they illustrate the globular form in its perfection, and are almost massive in dimensions. It is almost universally held to be the finest climber indoors or out, where the climate admits of its cultivation. This is one of the Roses that starts rather slowly, and for that reason the best success will be had with the larger plants. This superb Rose is especially recommended for the Southern States, where it requires but little outdoor protection. Price, well established plants 10c; large two-year-old, 35c.

White Marechal Neil

The fame of Marechal Neil, with its large, deep golden-yellow flowers, is so world-wide that nothing further need be said of this new variety to make it instantly popular, than that it is the counterpart in every respect of Marechal Neil, its parent, save the color of the flower, which is a pale creamy-white, totally distinct. It is a rapid climber, and quickly makes a bush of considerable proportions. For Southern cultivation it will be of great value. Price, 10c each; two-year-old plants, 35c each.

Climbing Devoniensis—Identical in all respects with the Tea Rose "Devoniensis," except it has the climbing habit; flowers of great size, very double; a magnificent variety. Price, 10c each; large two-year-old plants, 25c each.

James Sprunt—A grand Rose. Deep cherry-red; medium size, full, double and sweet; a strong grower and a profuse bloomer. Price, 10c each; large two-year-old plants, 25c each.

W. A. Richardson—Branches strong and spreading; flowers of good size, full, of fine form; color, orange-yellow; a new shade of Noisettes. Price, 10c each; large two-year-old plants, 25c each.

HARDY HYBRID PERPETUAL ROSES

The Hybrid Perpetuals, or "June Roses," as they are commonly called, are the hardiest of all Roses, standing the cold Winters of the North. After once planted they require but little care, increasing in size and beauty each year. They are covered with bloom in June, although they bloom considerably through the Summer and Fall; but the greatest profusion of bloom is to be seen in June. Our collection of this class of Roses comprises such varieties as are most valuable. They are strong plants, grown on their own roots, will grow and give a profusion of fragrant bloom.

Price, 15c each; any 5 for 50c; two-year-old plants, 30c each; any 4 for \$1.00

Our "Giant" Collection of Two-Year-Old Roses

FOR IMMEDIATE EFFECT.

There is unquestionably a growing demand for large Rose plants. The reason for this is that one does not have to wait so long for an abundant supply of flowers. While our young plants will flower profusely the first year, still it could not be expected of them to produce nearly so many blooms the first season as our large two-year-old Roses. They are strong, thrifty bushes, with healthy, well-developed roots, and are ready to start as soon as planted, and give plenty of lovely flowers.

We advise all our friends to order at least part of their Roses in this large two-year-old size, and they will be pleased with their venture.

We recommend the express collection in preference to the Mail Offers, as the plants sent can be larger. Our two-year-olds this year are extra fine. Try one more collection and be pleased.

CHRYSANTHEMUMS

THE PEOPLES' FLOWER Magnificent, Large Flowering Japanese Varieties

CULTURAL DIRECTIONS

If the following directions are carefully followed the blooms can be brought to perfection out of doors as late as Nov. 15th

FOR LARGE CUT FLOWERS

Plant in a bed enriched with a good amount of well rotted cow manure. As the side shoots or suckers appear at the base of the leaves, carefully pinch them out, thereby throwing the strength into the main stem, which keep carefully tied to a stake. When the buds appear, pinch out all the buds save the strongest one, and water with liquid cow manure about once a week until the bud begins to show color, then water only with clear water, being careful to keep the water off of the flower. By the above culture any person should be able to produce flowers of mammoth size, which should mature before the early frosts appear. If there is danger of frosts,

drive stakes in the bed and cover with muslin. If desired, four or five branches may be left but only one flower should be allowed to each branch.

POT PLANTS

When the main stem has attained a growth of about six inches, pinch the top out of it, leaving four or five eyes, which will start out side branches; when these side branches have attained a growth of about four inches, pinch them, same as the main stem. When the buds appear you can disbud each branch, leaving only the strongest bud, or allow all of the buds to mature in a cluster on each branch.

For Further Directions See Circular Sent With Plants

NOTE—For convenience in making selection, we name on this and following pages five lists or sets of Chrysanthemums, each composed of varieties of same color or same character, in this way the best of each color or kind are given together and selection can be more easily made. If you do not want a whole set as offered, you may choose eight Chrysanthemums from any or all of the different lists for the price of one set—50 cents.

Major Bonaffon.

Major Bonaffon—Color, soft, clear yellow very full globular shaped flower, six to seven inches across, crowded with fine incurved petals. In perfect form and finish like Ivory at its best. Habit dwarf; keeping qualities excellent. Foliage well up to the flower, stiff stem. This is an ideal Chrysanthemum in every respect, one that is sure to please, and a prize-winner wherever exhibited. Awarded Columbian medal.

Mrs. Maria Simpson—Color soft chrome-yellow. A fine example of the broad petal, incurving Japanese type, showing no center; very large, fine grower; stiff stems. Silver medal at Philadelphia; certificate at Indianapolis.

Mrs. John J. Glessner—A light yellow, very distinct in form; broad petals opening in a whorl, which, when matured, assume a convex form; tips turning backward and twisting in all directions.

Mrs. O. P. Bassett—The finest of its color ever offered. It is a sport from the grand variety, Mrs. Henry Robinson, and takes after its parent in all the fine qualities. The color is a fine canary-yellow of a soft texture. It is a large, flat, incurved variety with broad petals, out petals drooping a

little as the flower opens. The dark green foliage, stiff stems and medium height, make it one of the best cut-flower varieties we have ever grown. It has received several certificates of merit at the Chrysanthemum shows.

Kioto—No engraving can do justice to this unique and beautiful variety. The color is deep yellow, with a peculiar waxy lustre; petals incurved and twisted; a free bloomer.

Australian Gold—Heavily foliaged from the ground up to the flower; an extra fine variety, brings a very large bloom; color golden-yellow, shading lighter; flowers of extra size, averaging ten inches across by three in depth. Very valuable and takes front rank among the very best yellows.

William H. Lincoln—A magnificent golden-yellow variety, with straight, flat, spreading petals. An extra large flower, completely double and of great substance.

Minerva—An exceedingly attractive, bold, massive flower, very large, incurved, the outer petals drooping, forming almost a perfect flower of the most vivid clear yellow, with extra good stem and fine, handsome foliage within four inches of the flower. Certificates of merit at New York and Philadelphia.

Set of 8 for 50 cents.

Mrs. Henry Robinson.

MRS. HENRY ROBINSON

In the entire Chrysanthemum family there is no grander white variety, no matter when it blooms; it is of the most popular style—immense incurving, broad channeled petals of great substance and the purest white—can be used a few days earlier, but it is a sin to cut it until the center petals have begun to develop; from a flat incurved form it gradually changes into a perfect ball of snow; foliage as handsome as that of Mrs. Jerome Jones; a variety of the easiest arrangement. We do not think it possesses a single fault. Winner of twenty-six first prizes.

Minnie Wanamaker—Pure snow-white, incurved and perfectly double, with a breadth of petal and grandeur of build that is only found in the best varieties. The flowers are exceptionally large, produced on long, stiff stems, with large and handsome foliage. Secured the silver medal at Philadelphia.

Frank Hardy—Magnificent extra large white. Flower of the largest size and of perfect close form; petals incurving

and gracefully enfolded, giving the flower a unique appearance. A deep, solid, well-built flower.

Mrs. H. Weeks—An immense flower, with broad, claw-like petals incurving to form a globe of white, a few outer petals reflexing; has made a sensation in England, and in our own country last Fall appeared in fine shape at most of the principal towns.

Mrs. Jerome Jones—Large, creamy-white, incurved Japanese, sometimes showing a tinge of pink; high, round flower. One of the best Chrysanthemum flowers up to date. Indispensable for exhibition. Grand stem and foliage.

Miss Florence Pullman—Pure white, very large, of deep build and good breadth. We had this variety in bloom measuring eight inches in diameter, and know it to be an extra good one.

Silver Wedding—A grand white variety. Purest white with broad, reflexed petals, forming a bold, handsome flower, seven inches in diameter by five inches deep. One of the most distinct varieties.

The Queen—A grand double white, of fine form and great substance; very rounded in form, incurving and full. Attracted a great deal of attention at Madison Square, where it was awarded first premium for best white.

EIGHT ELEGANT PINK CHRYSANTHEMUMS

Price, 8c each; Set of Eight for 50c.

(See Note on page 17.)

Good Gracious—Delicate shade of peach-pink throughout. The form is remarkable; the petals are incurved and twisted, overlapping each other in irregular fashion, and resembling talons.

Helen Bloodgood—True, clear pink, without a trace of shading of purple or magenta. In form, a globe-shaped Japanese, of largest size, with robust habit.

Indiana—This variety produces the largest blooms to be found in the family, with one or two exceptions, perhaps. It is very nearly globular in form, and has a circumference of twenty-two inches; nicely incurved, and of a clear, bright pink; outside of petals a little lighter.

Marvel—The flowers are enormous; petals extra broad, slightly incurved; color a rosy-pink, flushed and streaked with red, charmingly distributed.

Mrs. S. T. Murdock—One of the finest varieties in cultivation; nice glistening pink, fine globular bloom of rather short, incurving petals; early mid-season, stem and foliage perfect; a fine keeper.

Maud Dean—An immense pink variety; finely incurved; petals broad, shell-shaped. One of the largest flowers exhibited in the fall shows. Almost a pure shell-pink.

President W. R. Smith—A pure, self pink; very heavy in substance, on stiff stems; very free in growth. It opens with a center incurving in a circle enclosed in broad outer petals; it gradually assumes the true Japanese form, rounded and deep, and this gradually changes to the informal reflexed; perfectly double; especially fine for cut flowers and exhibition blooms.

Mrs. Perrin—This is the nearest approach to the true pink so long desired. It has slender, stiff stems, a short neck, ornamental foliage. The flower is of globular form, incurved, full, and with a finish as soft as satin. Color, rose-pink within, glistening pink without. Every one who has seen it is loud in praise of its color. A wonderfully clear, bright pink; quite free from magenta. The flower is incurving, but loosely built.

Flower of Mrs. Perrin.

SIX BRILLIANT RED CHRYSANTHEMUMS

Price, 10c each; Set of Six for 50c.

(See Note on page 17.)

Cullingfordii—Exceedingly brilliant crimson, richly shaded with scarlet. Florets are of a beautiful, rich, velvety texture.

Fisher's Torch—The color is a bright red, passing to the richest velvety crimson, the flame-like flower borne at the end of a long stem gives it the appearance of a flaming brand, hence the name.

Gettysburg—Deep, rich crimson, which in the flower itself is soft and velvet-like. Outer petals are broad and drooping, and have a lustrous sheen in the sunlight. The form flat, with drooping outer petals, giving it a very graceful appearance.

John Shrimpton—Rich velvety crimson. The finest red Chrysanthemum extant, because it is simply an improved Geo. W. Childs. Blooms exactly similar but little larger, and the foliage much prettier.

Joey Hill—Color, deep cardinal red of beautiful shade, faced with old gold; the outer petals are flat, showing color to good advantage; center is an immense mass of closely-packed petals, no room for another one, apparently.

Robt. B. Laird—An incurved Japanese variety. Solid and globular petals, broad and deeply grooved, inside orange-red, outside old gold. A monster variety.

John Shrimpton.

Eight Earliest Flowering CHRYSANTHEMUMS

PRICE 8c EACH; SET OF EIGHT FOR 50c

(See Note on Page 17)

Belle of Castlewood—A rich enameled shell pink, broad petaled, incurving Japanese, a distinct and pleasing shade; bloom of large size, solidly set on a grand stem, with good foliage; extra early bloomer.

"Estelle"—Certificated at Cincinnati, October 18, 1902. Produces extra sized flowers of the purest white; fine, deep form, with foliage evenly distributed along stem. Marketable blooms were cut on October 4.

F. Coppee—Chrome-yellow, approaching orange in color; of fine size; nice to add variety to a collection, as the shade is very pleasing and size is large.

Glory of the Pacific—An extra early pink, being in good shape for cutting October 8. It is of fine size and depth, with broad petals, which reflex, showing the clear pink color to excellent advantage.

George W. Childs—The flowers are of massive size, with broad, stiff reflexed petals. Color is a deep, rich, velvety-crimson, with no shade of brown or chestnut. The stems are strong and erect.

Marion Henderson—The rich buttery-yellow color of the flowers is superb. It is full of petals and lasts a long time, in fact, although very early, it can yet be made late, because it remains perfect on the plant for a long time.

Triumph D'Ex de Marseilles—Color deep amber, shaded with a brown-yellow at the center. Very peculiar in form, having long pendant lower petals, which droop down some three inches. Center high and full of nicely arranged short petals.

Ivory.

Ivory—This is one of the very best varieties for pot culture or cut flowers. Plant is a vigorous, compact grower and makes a handsome specimen with very little training. Flowers snow-white, of exquisite form and finish; petals stiff and lasting.

8 OSTRICH PLUME CHRYSANTHEMUMS

PRICE 8c EACH; SET OF EIGHT FOR 50c

(See Note on Page 17)

Below we offer a grand collection of these unique Chrysanthemums. The term "Ostrich Plume" is applied to this type on account of the feathery growth with which the petals are thickly covered.

Louis Boehmer—Has a wonderful hair-like growth or excrescence. Color, most beautiful shade of lavender-pink, shaded silvery-pink on ends of petals. Flowers splendidly incurved, inside of petals deep rose. For evening wear the Louis Boehmer is sure to be in demand. Flowers enormous; is absolutely free from any taint or blight.

Mrs. Higinbotham—Enormous bright pink, broad spreading Japanese variety, with extremely wide cupping and incurving petals, which are covered with glandular hairs; reported as the largest and best hairy variety ever exhibited. Habit, stem and foliage perfect.

Monarch of Ostrich Plumes—Bright, chrome-yellow; is quite large for this type; of beautiful form and finely incurved.

Perle of Lyonaise—Bright, clear, golden-yellow, somewhat plumed; quite full; one of the very finest; of medium size; beautiful globular form; new.

Santels White—Decidedly the best white Ostrich Plume variety yet introduced. A strong grower and early, profuse bloomer. Flowers large, perfectly formed. Pure white with creamy center; inner petals nicely incurved and well covered with hair or plush. Very pretty.

Wm. Falconer—This grand variety will increase the popularity and interest in this beautiful class. Color is an exquisite shade of rosy-blush, changing to a delicate flesh-pink as flowers advance in age. Flowers are of largest size, and borne on strong, vigorous stalks.

W. A. Manda—Ostrich plume type. Flowers very large, of a clear golden-yellow color. Plant is vigorous in growth and flower is borne upright on stout stem. This is the grandest introduction from Japan, and no collection can afford to be without this variety.

Child of Two Worlds.

Child of Two Worlds—Pure white. This grand sport from L. Boehmer was well received, having many admirers at the shows. Like the parent, it is a strong grower, of good habit, considered the best white of hairy type, and well deserves a prominent place in any set of this peculiar style of Chrysanthemum.

SELECT LIST of STANDARD VARIETIES of CHRYSANTHEMUMS

Autumn Glow—There is nothing like it in color, which is a deep reddish-salmon upon opening, and gradually changes to a soft shrimp-pink when fully finished; of the largest size, and takes on great depth.

Bronze Giant—Exhibition bronze. This is an elegant grower, heavy, stocky stem, clothed throughout in fine foliage. The flower is of immense size, crowded with petals, which are stiff and of great substance; form incurving a most imposing bloom of largest size; a beautiful, rich bronze, or gold color. Received premium of \$50.00 for best bronze.

Christmas Eve—Pure white; petals curved and twisted, forming a flower of peculiar appearance and great beauty. It is the latest to bloom, and remains in good flower until nearly Christmas, hence the name.

Evangeline—Pure white; similar in form to Kioto, but larger and more graceful; stem and foliage perfect.

Jennie Williams—Creamy-white, yellow shadings; extremely double; petals upright and incurving; outer petals broader; massive and grand in build; a splendid exhibition variety; good grower.

Jessica—The earliest white grown; flowers average six inches in diameter; away ahead of anything yet produced.

Mrs. M. M. Johnson—This is another beautiful variety. It won the prizes at Chicago and Cincinnati before the judges on October 20, thus making it a very early variety. Nivius—A grand snow-white variety. Center irregularly incurving, with outer petals reflexing nearly to the stem. Constitution robust, foliage large and abundant, while the keeping qualities of the flowers are unsurpassed.

Oakland—Clear shade of even terra cotta, full and deep. Straight stem and good foliage. Four feet high. A splendid exhibition bloom. Has taken first prize wherever exhibited.

Polly Rose—This is one of the prettiest of all the early varieties; being a sport from Glory of the Pacific, it has all the parent's good qualities, together with a perfect color, pure paper white. Very easy to grow; fine for pots.

Pitcher and Manda—There is nothing that has ever been offered that in any way approaches it. The outer five or six rows of petals are pure white and Dahlia-form, while the center is a bright, deep yellow, the colors being sharply defined. One of the most distinct novelties.

GENERAL COLLECTION OF DOUBLE GERANIUMS

Price, 10c each; Selection of any six for 50c; any fifteen for \$1.00.

Emerson—A most charming variety, having large trusses of double flowers of clear nankeen-salmon.

La Favorite.

LA FAVORITE

In this new Geranium we believe we have the finest double white in cultivation. La Favorite is a pure, double white Geranium, as free-flowering as the single varieties, and which can be used for planting in beds for furnishing a supply of beautiful white flowers for vases, etc., or for pot culture for Winter forcing. It is a dwarf, compact-growing variety. The foliage is bright, healthy green, with a band of darker green encircling each leaf. The flowers are borne in large trusses, of the purest snow-white, retaining this pure whiteness even in the height of Summer, and for Winter blooming it is all that can be desired.

Bed of Gold—Artists in color who have for the past two seasons seen it flower, declare it to be a rich golden-orange shade of the most brilliant color. The flowers are of the largest size, most perfectly shaped in large trusses opening freely at all seasons.

California—Rich, golden-orange shade of the most brilliant hue—we need not add another word to its color. The flowers are of the largest size, most perfectly shaped, in large trusses, opening freely at all seasons.

Contraste—Among the most beautiful of new double Geraniums is Contraste. The flowers and trusses are very large. Lower petals orange and carmine, upper petals clear orange, making a striking contrast of colors that is beautiful.

Crepuscle—Another fine Geranium, raised by Bruant. Trusses large and freely produced; dark purplish-crimson, marked at the center with capucine-red. Best of the color.

Colossus—Floret quite circular, semi-double; $2\frac{1}{2}$ inches in diameter; truss also fine. The color is very beautiful, a rich shade of rosy-crimson. Very free in bloom. One of the very largest and finest among the double reds.

Glorie De France—This is one of the most beautiful partly colored Geraniums, which appear so bewitching to the eye. Large, round florets of waxy appearance. Flowers are carmine and white, carmine center; each petal delicately edged with carmine. An excellent pot variety.

Geoffrey De St. Hilare—Large, spherical trusses of glowing scarlet, rayed with intense violet crimson. A strong bushy variety of great merit, and after a thorough trial we can recommend it as unequalled in its class.

Harriet Thorpe—The handsomest light flowers we have yet seen; delicate blush with pearl-pink; the edge of each flower having a wire-like edge of deep pink resembling a Picotee more than a geranium, trusses large and well shaped.

Jas. Y. Murkland—Bright peach-rose, broadly margined with white.

GENERAL COLLECTION OF DOUBLE GERANIUMS-(Continued.)

Price 10c each; any 6 for 50c, 15 for \$1.

Louis Fihol—Bright orange-scarlet, shaded salmon; plant very free and flowers very perfect. A good variety.

M. Sandorf—Orange-salmon, with silver shadings; flowers large and finely shaped.

Miss Frances E. Willard—This very choice variety originated with this establishment in 1888, being one of several seedlings raised from seed obtained from a flower of White Swan. It is of vigorous growth; the flower stalks are very long and are carried well above the foliage; the color is a delicate blush, shaded with pearl-pink, a most charming piece of shading.

M. Caro—The first real approach to lilac yet attained in Geraniums; the double flowers are a delicate shade of light lilac, the outer edge of the petals changing to deep rose, shaded in a most charming manner.

Madame Dieulafoy—A charming variety. Its dwarf habit, with immense leaves; the florets are large, of good form, and are borne on immense trusses; the color is a tender rose, flaked with white.

Wilhelm Pitzer—A beautiful bright apricot color; quite distinct and by far the best ever sent out of this color. We think this is one of the best pot or market Geraniums. Its peculiar and distinct color is wonderfully attractive.

ROSEBUD GERANIUM

Florets like perfect rosebuds. The habit of growth is dwarf and compact, making this variety one of the most desirable for pot culture. The novelty and merit, however, are principally in the flower, the perfect trusses of miniature rosebud florets, which are wonderfully attractive and pleasing. The color is bright scarlet, flamed with purple shadings, and the substance most lasting. A button-hole bouquet of this variety will last longer than any other we know of, and then it is entirely unique. Certainly no Geranium in cultivation today is as distinct.

S. A. Nutt.

S. A. Nutt—This is the darkest and richest double Geranium grown. It is a very bright, dark, deep, rich, velvety-maroon, an excellent bedder and a perfect pot plant; one that must find its way into every collection. Always in bloom.

Montesquieu—Soft lavender pink of even shade, form of a Rose; circular in form. A grand variety.

Walter Scott—Entirely distinct from any Geranium yet offered. Flowers double, of the most dazzling vermilion-scarlet, shaded with mahogany at base of petals; trusses very large, often measuring 5 inches in diameter, of globular shape, resembling a scarlet ball. A remarkably free bloomer and equaling General Grant as a bedder. A magnificent bedder.

White Swan—In the White Swan we have the finest double white Geranium ever introduced, and, unlike other double white Geraniums, it is suitable for bedding, and flowers as profusely as the best single varieties. It is a dwarf, compact growing variety, with handsome banded foliage of a light healthy green. The perfect double flowers are unsurpassed for cut flowers. They are borne in large trusses, and are spotless and snowy-white, retaining their pure whiteness even in the heat of Summer.

Mlle. Hoste.

Mlle. Hoste—Umbels large and borne well above the foliage; flowers of enormous size; color flesh, lined and shaded with bright salmon; one of the very finest in the collection; shading simply exquisite.

BEGONIAS FLOWERING VARIETIES

Price, 10c each, except where noted. Selection of any 6 for 50c; any 15 for \$1.00.

This beautiful class of plants is deservedly popular. They are suitable for pot culture in the window or the outdoor plant stand. During the greater portion of the year the plants are, in the different varieties, covered with a profusion of graceful, drooping racemes of pink, white, crimson and bi-colored buds and blossoms that are exceedingly attractive, and having a waxy, coral-like appearance. The plants themselves are of neat, compact habit, with glossy green leaves in some varieties and exquisitely cut ones in others.

Argentea Guttata.

ARGENTEA GUTTATA.

This variety is an introduction of M. Lemoine, and is a cross between Olbia and Alba Picta. This beautiful sort has the silvery blotches of Alba Picta, the grace and beauty of growth of Olbia. It has purple bronze leaves, oblong in shape, with silvery markings, and is in every way a most beautiful Begonia. Produces white flowers in bunches on ends of growth stems. Good for house culture.

ALBA PICTA—Long, pointed, slender leaves, thickly spotted with silvery-white. Foliage small and elegant.

ARGYROSTIGMA PICTA—A handsome, compact-growing variety. Leaves a silvery-green, dotted white; smooth and glossy. Flowers a lemon-white, produced in corymbs. Magnificent pot plant.

ALBA PERFECTA GRANDIFLORA—We doubt if there is a white-flowered variety that equals it. The foliage resembles Rubra in shape, but it is lighter green, while the flower panicles are much handsomer. It is a pure white flowering Begonia of much merit.

COMPTA—A new variety resembling closely the old Zebrina. Compta is a more compact grower, with long-pointed green leaves; a silver tinge along the mid-rib; underside of leaves and stem pale pink.

ERFORDII—The finest bedding variety extant, used by thousands in the Chicago parks. Dwarf and compact in growth, and covered with flowers of soft pink color.

McBETHII—Foliage fern-like; panicles of pure white flowers produced in great profusion. Most persistent bloomer of the Begonias; supersedes Richardsonii, which variety it resembles in foliage. Price, 8 cents.

NITATA ALBA—One of the most showy Begonias we grow. Blooms in good-sized clusters of large flowers; white, delicately flushed rose. 15c.

PRESIDENT CARNOT—A strong growing variety of stiff, upright habit; foliage large, somewhat in style of B. Rubra, but more than twice as large; upper side deep green, under side purplish red; flowers beautiful coral red in large pendant panicles. 15c.

MRS. C. A. TOWNSEND—This new Begonia is indeed one of the most beautiful varieties that we ever have had the pleasure to offer our customers. It belongs to the *Racinifolia* family. The leaves are of the Rex nature, rather irregular, of a charming lustrous metallic green color, the under surface deep crimson at the ribs, shading out to a carmine. An unusually profuse bloomer; flower of a delicate light pink, borne on long footstalks. Price, 25c each.

RUBELLA—A very ornamental Indian species, belonging to the *Racinifolia* section. The leaves are irregular and blotched red, on a pallid ground; ribs banded with a purplish brown, under surface red. This makes a grand specimen plant, and will enrich any collection of Begonias. The flowers are borne on strong stalks one foot above the foliage, in large panicles of pink and white. A superb Begonia. Price, 20c each.

REX BEGONIAS

The Begonia Rex is the king of foliage plants, for outshewing all others. Give them a soil composed of rich loam, woods earth and sharp sand. They require a warm, moist atmosphere and a shady situation. Do not allow the sun to strike the leaves while wet, and do not over-water. Nothing can surpass them for the window or conservatory culture; they may be planted in a shady situation under trees or alongside of the house. Rex varieties make immense leaves. We can furnish Rex Begonias in six choice sorts at 15c each; set of four for 50c.

It can be planted with telling effect in juxtaposition with any variety, crimson, yellow, red or spotted.

Two Splendid New Cannas

TARRYTOWN.

The finest of all Cannas. No variety approaches it for display. The flowers are large, but its particular value lies in the earliness with which it blooms, the abundance of flowers produced, its branching habit, and the length of time the flowers remain after they open. The flowers are thrown well above the foliage, and the heads of bloom are held very evenly, and so freely produced that the foliage is almost hidden, two or three spikes of flowers being in bloom on the same stem at the same time, producing a mass of bloom. The flowers are an exceedingly brilliant carmine-crimson, and last for an unusually long time. Price, 25c each.

CARNATIONS

THE DIVINE FLOWER

IT IS NOT TO BE wondered at that, next to the Rose, the Carnation has become a favorite flower among all classes. Is there a sweeter flower than the Carnation, or Pink? What flower presents a greater variety of colors and variation? What flower has such lasting quality, combined with its graceful form and most delightful fragrance? The variation of colors is greater than in almost any other flower, and the cultivation is of the easiest.

The Baby Primrose.

(*Primula Forbesi*.)

It is a wonderfully free-blooming plant, commencing to flower as soon as born. It forms a dense rosette of somewhat fleshy leaves, from which spring the flowering stems, twelve, fifteen and even twenty inches tall, supporting three tiers of whorls of dainty flowers of a delicate rosy-lilac, with eye of pale gold. The flowers are not more than half an inch in diameter, but they are produced in such great abundance that a few plants present a dense mass of bloom, which continue without interruption and with increasing vigor until June. This is a grand, large-flowering daisy originated by Luther Burbank, first by crossing the largest flowered European and Japanese Daisies, and then further improved by careful selection. The plants are entirely hardy in any climate, are very robust in growth, and produce larger and finer flowers each season as the plants increase in strength. Small plants do not flower until late the first Summer, but when well established, large flowers are produced freely throughout the second season. The flowers measure fully four inches in diameter, and while single, have three or more rows of long, slender, snowy-white petals surrounding a small golden-yellow center or eye, so that while they have the same form as the common white daisy, they are greatly superior in size, grace of form, and general effectiveness. As the large flowers come singly on a stiff, slender stem nearly two feet in length, they are especially useful as cut flowers to arrange in tall vases, etc., as well as most showy bloomers for planting in beds or borders of perennial or hardy flowers. These beautiful small-flowered varieties are again coming to the front, and are certain to become popular for outdoor bedding purposes. They are absolutely hardy, and produce an abundant, almost lavish profusion of blooms, and the plants lend a coloring to the garden just at a time when other plants have been destroyed by frost and are looking their worst. Frost does not materially affect the flowering, and it will frequently happen that an armful of flowers can be cut after a sharp frost. HARDY ORNAMENTAL CLIMBING VINES

The Clematis we offer this season are exceptionally fine. They delight in a rich, cool soil in an open sunny position. For covering walls, trellises or verandas, old trees or ruins, or as specimens on the lawn or for massing in large beds on the lawn, they have scarcely an equal, certainly no superior.

Select Flower Seeds

All the seeds herein offered are grown for us by the most experienced seedsmen of this country and Europe, and are the best that money can buy. Every ounce of seed we send out is fresh. We buy the best, send out full sized packets and sell as cheaply as is consistent with honest goods. Most flower seeds germinate well in a fine, sandy loam, partly protected from the sun. Heat and moisture are the two essential points to start life in seeds. A general and fatal error is to start the seed too deep; small seeds should be barely covered with fine earth; large seeds by about half an inch. After sowing, the ground should be watered with a very fine sprinkler, regularly. Many seeds are killed by drought.

CHOICE AND RARE FRUITS

Good fruit is one of the greatest luxuries a family can have, and those who have a chance to grow them should spare no trouble or expense to secure a good supply of the best sorts. We have carefully prepared a limited list of varieties which are perfectly adapted to all parts of the country. The trees we offer are young and thrifty and will make a very rapid growth and bear quickly.

SPECIAL NOTICE—As our Nursery is a separate and distinct department from our Greenhouses, it is necessary that all Fruit Orders be shipped direct from the Nursery, and we therefore ask customers to kindly keep fruit orders separate from the Plant and Seed Orders. Fruits will not be shipped with other plants.

THE BEST PEARS

Rossney.

ROSSNEY

A new and excellent Pear, raised from seed at Salt Lake City, Utah. In size medium to large; very fine grained, flesh melting, juicy, very sweet. Ripens two weeks after Bartlett; it is an excellent keeper and shipper, with tree much stronger than Keiffer. Specimens of this new variety were received by us from the originator last year, and we were very much impressed with its beautiful and attractive appearance, excellent quality and size; in general appearance it somewhat resembles Bartlett, but is more round. It is very seldom you can find a single variety combining so many rare qualities as this does, and we have great pleasure in offering it as the best Pear on the market at the present time. Price, first-class, 50c each; second-class, 40c each.

KOONCE PEAR

Tree is a very vigorous grower, free from blight, hardy and productive; fruit medium to large; skin yellow, with a very handsome blush; does not rot at the core, like many of the other early sorts. Ripens two weeks earlier than Harvest Belle. For fruit growers, both in the North and South, this should prove very valuable. Its vigorous growth, with heavy foliage, should enable it to endure a hot climate, while its late blooming and hardness of bud will insure for it abundant crops, despite frosts. It is so hardy that it will stand the rigor of Northern winters, and, being so early in season, will come into the market and bring the highest price. Price, first-class, 40c each, \$4 per dozen; medium, 30c each; \$3 per dozen.

VERMONT BEAUTY PEAR

It is very hardy. The growth is vigorous, the leaves free from blight; it is an annual and abundant bearer. In quality the fruit approaches nearer that most delicious Pear, the Seckel, than any other Pear on the market. It is full-medium size, yellow, covered on the sunny side with bright crimson-red; flesh melting, rich, juicy, aromatic. Ripening with and after Seckel, though much larger in size and more attractive in appearance, it cannot fail to prove a general favorite and very valuable. Price, first-class, 40c each, \$4 per dozen; medium, 30c each, \$3 per dozen.

NOTE.—The blossoms of those marked with (p) are destitute of stamens and are termed pistillate, and unless a row of perfect flowering variety is planted at intervals not exceeding about a rod, they will produce imperfect fruit, and but little of it; but when properly fertilized, as a rule, they are more prolific than those with perfect flowers.

NEW STRAWBERRY

Two Crops Produced in One Season

(Description by Peter Henderson.)

For several seasons past our attention has been called to a Strawberry which made its appearance in market in September, and we were at first loath to believe that the fruit could be obtained under natural conditions at that season of the year. Investigation, however, showed that such was the case; the fruit was picked in the open field from the same plants that produced a bounteous crop in June. The fruit is very large when well grown, a glossy crimson, delicious flavor, and a great point in its favor is that it is very easily hulled. It is a perfect blossomed variety, medium to late. Price, 50 cents per dozen, by mail; \$2.00 per 100, by express.

are vigorous and healthy. The fruit is glossy black; quite firm. Price, 25 cents each; \$2.00 per dozen.

CUMBERLAND

The largest Black Raspberry known. It has been well tested in nearly all sections the past seasons, giving thorough satisfaction. In hardness and productiveness it is unexcelled by any other variety. In size, the fruit is simply enormous, far surpassing any other sort. The berries run seven-eighths and fifteen-sixteenths of an inch in diameter. The quality is very similar and fully equal to Gregg. In spite of its unusual size, the fruit is possessed of great firmness and is thus well adapted for standing long shipments. A mid-season variety. Price, by mail, 10c each, \$1.00 per dozen; \$3.00 per 100 by express.

NEW RASPBERRY—HAYMAKER.

The Haymaker is a purple cap, not so dark as Columbian or Shaffer, and much larger and firmer than either of those varieties; never crumbles, and stands up well in shipping. It is a berry to grow for either home use or market. The originator has found it the most profitable berry ever raised for market, and has never yet been able to supply the local demand. So much of a favorite has the Haymaker become that local growers have said that it has ruined the sale of other varieties. Very popular as a canning berry. Price, 10 cents each; \$1.00 per dozen.

EARLY KING.

An extra early and exceedingly hardy variety of great merit. Canes of strong growth, as hardy as Snyder, and very prolific. It is larger and earlier than Early Harvest, and its delicious sweetness renders it of special value for the home garden. It is also free of double blossoms, rust or other disease. It has been thoroughly tested at the North, and has given very general satisfaction. Highly recommended by the experiment stations. Growers coin money on the variety on account of its hardiness, large size, and earliness. The only large early berry grown. Many dealers send out early Harvest plants for this variety, as the genuine stock is very scarce. Our plants are fine and true to name. Be sure to add it to your collection. Price, \$1.00 per dozen; \$3.00 per 100.

Premo Dewberry.

NEW DEWBERRY—PREMO.

Much like Lucretia, but very distinct, and exceedingly early, being seven to ten days ahead and all cleaned off when Lucretia is beginning. Quality and size uniform. Was found in a Lucretia patch. Price, 25c each; \$2.00 per dozen.

THE LOGAN BERRY.

A hybrid between the Raspberry and Blackberry. The fruit is as large as the largest Blackberry, and is produced in immense clusters. The color is a clear, dark red. It partakes of the flavor of both the Blackberry and the Raspberry—mild, pleasant, vinous flavor, delicious and peculiar to this berry alone. Seeds small, soft and few. Berries very firm, and carry well. Strong grower; enormous bearer. Fruit ripens early, just after Strawberries. Price, 20c each; \$2.00 per dozen, by mail, postpaid.

Dwarf Juneberry.

JAPANESE WINEBERRY.

This interesting plant belongs to the Raspberry family. The fruit is borne in large clusters, and each berry is at first tightly enveloped by the large calyx, forming a sort of burr. For jelly making, canning and preserving, it is without an equal. Price, 10c each; \$1.00 per doz., by mail, postpaid.

White Blackberry.

CRYSTAL WHITE BLACKBERRY.

Berries of fine, translucent white, of good size, sweet and pleasant. Canes prolific, but not entirely hardy. Should be planted near other sorts to fruit well. Price, 75c per dozen, \$3.00 per 100.

IMPROVED DWARF JUNE BERRY.

A good substitute for the large or Swamp Huckleberry. The fruit is borne in clusters, and is reddish-purple in color, changing to a bluish-black. In flavor it is a mild, rich subacid; excellent as a dessert fruit or canned. Price, 10c each; \$1.00 per dozen, by mail, postpaid.

LUCRETIA DEWBERRY.

One of the low-growing, trailing Blackberries. In size and quality it equals any of the tall-growing sorts. The plant is perfectly hardy, healthy and remarkably productive, with large, showy flowers. The fruit, which ripens early, is often 1 to 1½ inches long, by 1 inch in diameter; soft, sweet and luscious throughout, with no hard core; ripe before late Raspberries are gone. Price, 50c per dozen, by mail, postpaid.

ROCKY MOUNTAIN CHERRY.

This shrub originally grew wild in the Rocky Mountains. The fruit has been greatly improved by cultivation, and is claimed to be, when fully ripe, the best fruit of the season. It is jet black and about as large as English Morello Cherry. Price, 20c each; \$2.00 per dozen.

Donald's Elmira—This fine new variety produces thick, green stalks of the finest quality and has recently become very popular. It is also called Vick's Mammoth. This is undoubtedly the largest and best Asparagus grown. In size, color and yield it far surpasses any other variety in cultivation, while we find it to be less susceptible to disease than any other. No one should fail to try it.

Palmetto—A valuable new variety, and is being planted very largely; nearly twice the size of Conover, fully as early and as productive; flavor excellent.

Barr's Mammoth—A variety that comes highly praised. Said to be much more productive than Conover's Colossal.

Conover's Colossal—The old standard and popular variety, a good producer, of large, quick growth, and superb in quality.
