General Instructions for Ordering.

Quality. This is my First and Greatest consideration "Nothing but the Best" is my motto in producing and selling seeds.

Reliability. I have been in the seed business over 20 years and have customers in every section of the country; many have bought their seed of me year after year for nearly that time. They say they can not procure as good seed elsewhere. The fact that my seed trade was last season about double that of the season before shows that people appreciate Good Seeds and Low Prices.

Mailed Postpaid. I mail postpaid all seed quoted in this catalogue except the few marked By Express.

By Express. The cheapest way to have most seeds sent is by mail. The WHOLESALE LIST which is enclosed in this catalogue gives prices at which I will send them by express or freight as you wish; you pay express or freight charges at your station when you receive the seeds. Express is expensive, freight is slow. You could ascertain cost from your station agent. I get a reduction for customers of 20 per cent on express shipments. Deduct postage, 8cts. lb. and 15cts. a quart from mail prices if you want them by express or freight.

My Northern Grown Seeds possess a hardy, vigorous constitution which enables them to produce an earlier and better crop than those grown in warmer localities or on western prairies.

Warranting. I warrant seeds to the extent that I will replace free any which fail to grow or prove to be a variety different from labeled.

Send Money With Order. When possible send Postoffice Money Order and deduct cost of same from amount of order. Small amounts may be sent in Postage Stamps or silver carefully wrapped. Express Orders, Registered Letter, etc. are all right.

Look over your order carefully before sending to see if your Address is all on and plainly written and the correct amount enclosed.

Send me addresses of your friends who buy seeds on a slip of paper and I will add something to your order to pay for your trouble.

Errors. Should there be any mistake in filling your order or should anything prove unsatisfactory please advise me. I aim to please all my customers.

All Orders promptly Filled except plants and bulbs when cold.

THE GREATEST OF FORAGE PLANTS.

This great forage plant, which is similar to Pearl Millet, has been before the people only a few years. So far we have heard no complaint, although we sent out a few thousand packets last season. The introducer claims as follows.

"Grows 12 to 14 feet high and resembles giant timothy or Indian Corn. It is equal to corn in every respect for fodder and is relished by cattle either green or dry. Will produce 95 tons of green fodder or 16 tons of dry fodder per acre. Seed sown the 15th. of May will cut a big crop by July first, another by the middle of August, and a third crop by October. Seed is small and the plants stool, producing 20 to 30 plants from one seed so that 1 pound will sow one acre. Stands wet or drought well. Do not plant till ground becomes warm in spring."

It is one of the strongest sowers; made of steel and malleable iron—no tin, and will last a lifetime.

It will throw seed as far and evenly as the best sower made. Flow can be instantly stopped. It is guaranteed not to clog. \$1.00. (See next page.)
