TOMATO
FOR 1905

**TOMATO, LIVINGSTON'S
NEW GLOBE.**

The fact that this is another new tomato, originating with the Livingston's of world-wide tomato fame, will be sufficient to warrant most growers of fine tomatoes to give it a liberal trial. It is of beautiful globe shape, with quite a percentage of elongated (stem to blossom) fruits, which permits of a greater number of slices being taken than with flat fruited sorts. Among the very first to ripen, although of large size, very smooth, firm fleshed, few seeds, ripens evenly; color a beautiful glossy rose, tinged purple. Flavor very delicate and agreeable; splendid slicing variety. The fruit is borne on short jointed, branching plants in great abundance—literally loaded with fruit. A good general cropper, and one of the very best for greenhouse growing

or first early crop on stakes or trellis. An entirely distinct and fixed new sort. Every grower of Livingston's New Globe, whether he grows for private or market purposes, will be pleased with the beautiful and attractive globe shaped fruit. Offered this season in packets of 40 seeds each. Per packet, 20c. 3 packets, 50c. 7 packets, \$1.00.

NOTE.—While we believe our seeds to be true to name and of the best quality, yet of course we cannot warrant them, nor be responsible for any loss or damage arising from failure thereof, as we cannot control seasons, soil or work. If purchaser does not accept them on these terms they must be returned at once. The fact that we have customers trading with us now who have been doing so for 25 years, shows that we send out the *Best of Seeds* and only *the Cream of Seeds*.

We have been so highly complimented on the following
Introductory remarks that we reproduce them
From last Season Catalogue.

INTRODUCTORY.

WITHOUT any bluster or exaggerated talk embellished with big I's and flaring red pictures, we come to you again with our seed Annual, thanking you for 25 or 30 years patronage, soliciting a continuance of the same.

As true and experienced **practical Seedsmen**, for over a quarter century, we have gathered together from our long established growers, a line of seeds that cannot be excelled in quality and adaptability to the **SOUTHERN STATES**, and send them out under their proper name. New names given to well known varieties, is a mistake and a deception perpetrated upon the buyer and too small a business for an honorable seedsman to engage in. Plant our seeds with the same confidence you eat a meal prepared by your mother and you are not apt to be deceived. The true types under their proper names, improved every year, is our motto.

Respectfully,
MARK W. JOHNSON,
MANAGER.

CORN—Mammoth red cob white Dent 2 00 60 15 10

CORN—Eureka, large white prolific, fine 2 25 75 15 10

CORN—Early White Dent. This is the most popular variety with our truck farmers for early green corn, as it comes in nearly as early as the Adams Early, and makes a much larger ear, usually two ears to the stalk, of pure white, deep grain; matures in about 90 days; also fine for planting after wheat or oats; makes fine meal 2 25 60 15 10

TENN. GOLDEN DENT, also TENN. WHITE DENT, \$1.50.

These having been grown in Tennessee, have larger ears and grain, but have lost their earliness, so be on your watch if you want Early Corn or quick-growing varieties.

CORN—Field varieties:
