DUNDEE NURSERY

WHOLESALE CATALOGUE

EVERGREENS

GROWN BY — LONG DISTANCE TEL. NO. 6	D. HILL DUNDEE, ILL.	EVERGREEN SPECIALT.
--	--------------------------------	------------------------

In presenting to my friends and patrons this my Thirtieth Annual Trade List I wish to tender my sincere thanks.

You have made possible the growth of my Evergreen Nursery from half an acre to nearly Two Hundred Acres. My aim in the future will be to serve you more faithfully, if possible.

Terms of payment to known, reliable parties, June 1st. UNKNOWN patrons, cash or bank references required.

C. O. D. orders must be accompanied by one-third cash.

Remittances can be sent as follows at my risk: Draft on Chicago or New York, Postoffice and Express Orders and Registered Letter. Do not send money in an ordinary letter without registering.

Trees furnished: Five of a size and variety at 10 rates; 50 at 100 rates; 500 at 1,000 rates, etc.

Packing moss in abundance. The work of packing is done by men of long experience and in a workmanlike manner and for which I charge only for the material used.

No charge for delivering shipments to freight or express office, after which they are at the risk of the purchaser.

Orders should be plainly written on a separate sheet from letter, with shipping directions—freight or express.

EXCELLENT SHIPPING FACILITIES.

My nursery is located on the open prairie, forty-five miles northwest of Chicago, on the C. & N. W. R. R., in direct communication with all parts of the United States.

SPECIAL TO NURSERYMEN AND DEALERS.

This list will only be sent to those in the trade. For the past thirty years I have made a specialty of growing Hardy Evergreens from seeds. My trees are all healthy and well grown; will be well assorted and packed by men of long experience to travel long distances with safety. While my prices will be found lower than most reliable establishments, I am confident that my trees will be equal to the best and superior to most. Certificates of health will accompany each shipment.

Correspondence solicited.

EVERGREEN SEEDLINGS.

PICEA PUNGENS—Of Colorado.

	100.	1,000.	10,000.	100,000.

DISCRIPTION OF EVERGREENS.

PICEA PUNGENS—Blue Spruce of Colorado.

This is the King of Spruces, clothed in royal robes of silver and sapphire, a very Kohinoor among the gems of the Rockies. It is a child of the Storm King, growing at an altitude of 8,000 to 10,000 feet above the level of the sea. We would naturally suppose that it could not endure a sudden change or thrive in a hot climate, but such is not the case. It readily adapts itself to all soils—North, South, East and West.

A most Noble Evergreen in every way, with close stiff branches, rich silvery blue foliage, perfectly hardy everywhere. As it becomes better known the demand for it is great.

ABIES CONCOLOR—Blue Fir.

Sometimes called White Fir. A host beautiful evergreen, native of the Rockies, of Colorado, and in many respects resembles the beautiful Pungens. Many of these trees are of a rich silvery blue. Its needles are long and soft, unlike the Blue Spruce in this respect. In its native soil it reaches a height of 100 to 150 feet. Perfectly hardy and readily adapts itself to various soils and climates.

DOUGLAS SPRUCE—Feudotsuga Douglassi, of Colorado.

This is emphatically a tree for the millions. While on a visit to the Eastern nurseries, I noted in almost every instance that it was the most rapid grower of all the conifers. Sometimes the complaint is made that it grows too fast, and is not compact enough for a lawn tree, yet on my grounds it seems to have the perfection of form. The foliage is soft and somewhat resembles the Hemlock, hence the name (resembling the Hemlock). In the mountains it is a grand tree. It reaches from the Rockies to the Pacific slope.

NORWAY SPRUCE—Abies Excelsa.

A very popular variety from Europe. It has been more extensively planted in this country than any other evergreen. In fact, it is so well known as being one of the best Evergreens for ornamental purposes, that it is only necessary to say that it is also the most valuable for wind breaks, screens and hedges.

AMERICAN WHITE SPRUCE—Picea Alba.

Pyramidal tree of dense growth, with light, silvery, green foliage, a more compact tree in all respects than the Norway Spruce. Fine for lawn planting or use near the sea shore. "Valuable for Hedges." One of the best for general use.

BLACK HILL SPRUCE.

This valuable Evergreen, sometimes called Picea Alba or White Spruce, is only found, so far as I am able to ascertain, in the Black Hills of South Dakota, and does not resemble the White Spruce except somewhat in its habits of growth. It has proved itself to be the very hardiest of the Conifer Family. During the trying winter of 1898 and 1899, as I am sure Nurserymen will remember nearly all of our hardy Evergreens, including the Norway Spruce, winterscalded. Their needles all turning brown and rendering them unsalable for that year. Nearly the same conditions occurred again last winter, 1903 and 1904. The Black Hill Spruce, notwithstanding they were in the most exposed position, were not in the least discolored.

This Evergreen will meet the requirements of a vast field, too dry or too cold for other varieties.

PINUS DIVARICATA.

Jack Pine, from Northern Wisconsin and Minnesota, an exceptionally hardy evergreen. It thrives in the poorest soils and barren places, especially soils of a sandy nature and on this account it will fill a long felt want in the states of Nebraska, Kansas, Oklahoma, and Colorado as well as the more northern and northwestern states. It thrives in rich soils as well as on the barren wastes and sand hills of Nebraska.

HEMLOCK SPRUCE, Abies, Candereces, sometimes called Weeping Spruce.

This is a well known Evergreen of high northern latitudes. It is one of the most graceful Spruces, with light and spreading spray, frequently branching almost to the ground. It is a beauty for the lawn and makes a highly ornamental hedge.

BALSAM FIR, ABIES BALSAMEA.

A well known, popular tree, very handsome while young, assuming the upright, conical form; leaves dark green above, silvery beneath; retains its color throughout the severest weather; grows quite rapidly when established, desirable in every way.

WHITE PINE, P. STROBUS.

It is the most ornamental of all our Native Pines. Foliage a light, delicate, silvery green. Flourishes in the driest, poorest soil. It is easily transplanted. Unsurpassed for forest culture.

SCOTCH PINE, Pinus Sylvestris.

A rapid growing, hardy variety, with stout, erect shoots, and silvery green foliage; valuable for shelter; makes a good lawn tree, being one of the hardiest of the Evergreen Family it readily adapts itself to the trying climate of Minnesota, the Dakotas, and Montana. It also thrives well on the dry plains of Kansas, and is perfectly at home in Illinois, Iowa, Nebraska and other states.

AUSTRIAN OR BLACK PINE, P. Austrica Syn. Nigrisans.

A remarkably robust, hardy spreading tree; leaves long, stiff and dark green; rapid grower; valuable for this country.

PINUS PONDEROSA, of Colorado.

Heavy, wooded pine; rapid grower; forming a tree of great size; the bark is reddish; foliage longer and coarser than the Red or Norway Pine; a valuable tree for the west and northwest.

DWARF MOUNTAIN PINE, Pinus Montana.

It is a beautiful little tree or bush, foliage very dense and of a rich, dark green; very valuable for ornamental purposes; it is perfectly hardy in the most exposed situations.

JUNIPER VIRGINIA, Red Cedar.

A well known American tree which varies much in habit and color of foliage. It succeeds well on the plains of Nebraska and Kansas where other Evergreens fail and is very desirable for ornamental purposes; also for windbrakes, shelter belts and hedges.

AMERICAN ARBORVITAE, Thuya Occidentalis.

A handsome tree of regular and symmetrical habits; growth thick and bushy; one of the best and most useful Evergreens; excellent for screens and hedges.

PYRAMIDAL ARBORVITAE.

A superb, new and hardy sort of very compact habit; much better than the Irish Juniper; grows in a perfect column; is rare and beautiful, and is largely planted in cemeteries owing to the small amount of space it occupies. This is perhaps the most valuable Arborvitae in cultivation.

THE EUROPEAN LARCH.

It is the greatest timber tree in Europe, combining rapid growth with great durability; extreme hardness; adaptibility to any variety of soil that is not too wet; and remarkably free from disease. It is also very desirable as an ornamental tree, its conical shape, regular, delicate branches and soft green leaves making a striking contrast to the different varieties of European and ornamental trees. It thrives well in Minnesota and in the Dakotas.

EVERGREEN TREE SEEDS

	Oz.	Lb.
Abies Concolor, Colorado Seed, collected in Colorado	\$.75	\$3.00
Abies Douglassi, Douglas Spruce, Colorado Seed	.75	4.00
Abies Balsamea, Balsam Fir, Seed from Northern Wisconsin	.50	2.00
Abies Canadensis, Hemlock Spruce, from Northern Wisconsin	.85	6.00
Picea Pungens, Colorado Blue Spruce, collected in Colorado	.80	4.50
Picea Engelmann, Spruce, collected in Colorado	.75	4.00
Picea Rubens, Red Spruce, collected in Nova Scotia	.75	4.00
Picea Excelsa, Norway Spruce, collected in Northern Germany	.25	1.00
Picea Alba, White Spruce, collected in Northern Wisconsin	.50	5.00
Pinus Strobus White Pine, collected in Northern Minnesota	.25	2.25
Pinus, Sylvestris, Scotch Pine, collected in Scotland	.25	2.00
Pinus Austrica, Black Austrian Pine, collected in the Black Forest of Germany	.25	2.50
Pinus Ponderosa, Bull Pine, collected in the Black Hills of S. Dakota	.25	1.50
Pinus Divaricata, Jack Pine, collected in Northern Minnesota	.80	5.00
Pinus Montana, Mugho Pine, collected in Germany	.50	4.00
Pinus Rigida, Pitch Pine, collected in New Brunswick	.30	3.00
Pinus Flexilis, Limber Pine, collected in Colorado	.40	3.00
Thuja Occidentalis, American Arborvitae, collected in Northern Wisconsin	.25	2.50
Juniper Virginia, Red Cedar, collected in Wisconsin	.25	1.50

DECIDUOUS TREE SEEDS

European Larch, Larix Europea, collected in Scotland	.25	1.50
Catalpa Speciosa, a hardy Catalpa, collected in Dundee	.20	1.00
Russian Mulberry, Morus Alba, collected in Kansas	.25	2.00
Black Locust, Robinia Pseudacacia, Common Locust, collected in Dundee	.20	.75
Honey Locust, Native Seed	.20	.60

Above Seeds will be sent Prepaid by Mail or Express.

OFFICE OF ILLINOIS STATE ENTOMOLOGIST.

This is to certify that the growing nursery stock and premises of the Dundee, (D. HILL) and Elgin Nurseries, situated at Dundee, and Elgin Illinois, have been inspected by E. M. Wright, a duly appointed inspector of this office, according to the provisions of an Act to prevent the introduction and spread in Illinois of the San Jose scale and other dangerous insects and contagious diseases of fruits, approved and in force April 11, 1899, and that no indications have been found of the presence of the San Jose scale or other dangerous insect or plant disease.

This certificate applies only to the condition of these nurseries for the period ending July 1, 1905.

S. A. FORBES, State Entomologist.
