TINSLEY SEED CO. VERIBEST LAWN MIXTURE.

Our Veribest Lawn Grass Seed is a mixture of the finest Lawn Grass Seeds, especially adapted for lawns. It will give perfect satisfaction, can also be sown in shady places. Sow early in fall. This is really the best time for sowing, although if sown very early in the spring it will do well. If your lawns need fertilizing, the best time to do this is in September or October, and can be put on the same time you sow your seed.

PRICE ON LAWN GRASS SEED.

1 lb., 20c; 3 lbs., 50c; 7 lbs., \$1.00; 100 lbs., \$12.50.

One pound will sow 300 square feet, or 50 to 60 pounds to the acre.

Lawn Fertilizer should be put on in the fall or early spring before the sun gets too hot.

5 lbs., 20c; 10 lbs., 35c; 25 lbs., 75c; 100 lbs., \$2.50.

TINSLEY SEED CO. SELECTED FLOWER SEEDS.

All our Flower Seeds have been grown by the very best growers in Europe and are all of the very best quality and true to name.

All 5c packet seed are 6 for 25c; 25 for \$1.00; or \$1.25 worth for \$1.00.

This also applies to the Vegetable Seeds in packets, and packets only, not seeds by the pound, quart, peck or bushel.

FERTILIZER.

(Ox High Grade Vegetable Grower).

This brand of Fertilizer is especially adapted for the use of truck growers on all classes of soil for early vegetables, insuring quick growth, tenderness, brightness, fine flavor and early maturity, one or two weeks earlier than by the usual methods, per 100 pounds, \$2.00; ton, \$35.00.

	100 lb.	Ton.
Ox Wheat and Corn Guano.....	1.60	30.00
Ox Alkaline Bone	1.40	25.00
Ox Amoniated Potash.....	1.50	28.00
Ox High Grade, dissolved Bone.....	1.10	20.00
Nitrate of Soda.....	3.50	65.00

THE USE OF FERTILIZER.

Fertilizer is no longer an experiment; it pays on all crops and on any kind of land. It is used with paying results on the richest land as well as the poorest. Recent test at the Tennessee Experiment Station shows that the best returns for capital invested in fertilizer came from the plot on which the most fertilizer had been applied, viz., 1,525 pounds per acre. The test also demonstrated the superior value of Tennessee Acid Phosphate as compared with Bone Meal. One-half quantity being equal in results to Bone Meal.

Phosphate from the mines in Tennessee is considered as good as any in the world. It is exported to the agricultural countries of Europe in large quantities. This alone demonstrates the great values as a fertilizer. It supplies the best source of Phosphoric Acid, and as this chemical remains in the soil until absorbed by the plant, and is not leached out as ammonia and potash, the farmers are making a permanent investment to his soil in applying Tennessee Acid Phosphate. The great value of a fertilizer is in its solubility and its special fitness for the crop to which it is to be applied.

A fertilizer for one crop is not always good for another. It is, therefore, important that the farmer should purchase his fertilizer with full information as to the crop it is intended for.

We have enjoyed twenty years of successful manufacture of fertilizer, and it is with great pleasure that we see the sales of goods increasing each year. Customers write us in every Southern States attesting the value of our goods. The gradual improvement of the land where the Ox Brands have been used successfully for several years.

GRADES OF FERTILIZERS FOR SPECIAL SOILS.

A gray sandy soil is generally deficient in all the elements of plant food and requires a complete fertilizer.

Clay lands have more or less Potash, but need Phosphoric Acid. Bottom lands, rich in vegetable matter, are generally deficient in Phosphoric Acid and Potash. In places where rich soil and vegetable matter has accumulated, and the grain crops do not flourish, on account of the straw being weak and the grain lodging, a liberal application of Potash is generally very beneficial.

Agents wanted in all localities for our Fertilizer. Write or call, 912 North Broadway.

PLANET, JR. AND GARDEN TOOLS.

We handle all kinds of Planet, Jr. Tools and will mail catalogue free of charge to any one desiring one.

For some years, we find, in addition to a combined seed and fertilizer sower, there is a demand for a larger drill for fertilizer only. This demand we can now supply with the most perfect tool of its kind, we have ever offered. Simple, strong reliable and durable, holding one-half bushel. Complete with plow, coverer, roller and marker.

It will sow fertilizer evenly from 100 to 1,000 lbs to the acre.

**No. 20, PLANET, Jr.
Fertilizer, Pea and
Bean Seeder.**

Weight 97 lbs.

Price, Complete,
\$16.00.

Without Opening
plow, Coverer, Rol-
ler and Marker,
\$13.00.

This machine is a combined feeder and fertilizer drill, and can be used to sow seed only, either in hills or in drills, or to sow fertilizer only, or to sow both together. It works equally perfect when used in any of the ways. A special plow is furnished for sowing onion seed for sets. Price 50c extra.

**No. 21 Combined Hill & Drill Seeder
and Fertilizer Drill.**

Weight 96 pounds.
Price \$18.00.

**Planet Jr. No. 4 Hill and Drill Seeder, Single Wheel Hoe,
Cultivator and Plow.**

This machine is a Hill and Drill seeder; will drop 2-4-6-12 and 24 inches apart, and also sow in continuous row. Can be changed into a single wheel hoe in a few seconds, very simple and easy to handle.

We recommend this tool very highly, especially for small farmer or market gardeners.

No. 3 Plant Jr. Hill and Drill
seeder.

Price \$10.00.

The favorite machine among
Onion growers and Market
Gardeners. Sows in drills, and
also in hills 4-6-8-12 and 24
inches apart.

No. 17 Single Wheel Hoe, Cul-
tivator and Plow.

Price \$4.50.

Very popular machine
with the Market gardener.

No. 16 Single Wheel Hoe
Cultivator, rakes and plow.
Price \$5.35.

No. 17½ same as No. 17
without plow. Price \$4.00.

No. 18 with pair of Hoes
only. Price \$3.00.

No. 12 Double Wheel Hoe, Cultivator
and Plow.

Price \$6.50.

This machine is used by large
gardeners and Onion growers.

No. 13 Double Wheel Hoe,
same as the above with 6 inch
hoes only. Price \$4.25.

No. 12 Tooth Harrow and cul-
tivator complete. Price \$8.00.

Without Pulverizer. Price
\$6.40.

Without Pulverizer or Wheel,
Price \$5.30.

Mammoth Japanese Fern Ball.

JAPANESE FERN BALL—IN LEAF.

Requires neither pots nor soil. Lives upon air and water.
Flourishes in a window suspended by a cord.

Thousands of this interesting Japanese novelty were sold in the last two years. The ball is composed of dormant fern roots wound upon a globe of moss, and so constructed as to send out beautiful green leaves from every point. They grow rapidly and make a beautiful decoration.

When the ball is received, immerse it in water several hours, then suspend in any desired position, after which, water about three times a week.

Requires from 1 to 4 weeks to start into growth and the most water when it is in full leaf.

The fern ball may be allowed to dry up at any time, and be set away and be started again by watering as before,

Price each 35 cents; by mail 50 cents, post paid.

Tinsley Seed Company,
