MARKET GARDENERS'

Price List of

SELECT

VEGETABLE

SEEDS

Ellsworth E. Burwell,

160 BURWELL ST.

NEW HAVEN, CONN.

1907

Does Quality and Purity Count ?

**QUALITY in Seeds
Brings Quantity and
Quality in the Crop.**

I believe in improving by selection as far as possible the best of the standard varieties, adding newer varieties as soon as they prove to be superior. The varieties herein listed are those used most largely by the best Market Gardeners. I have tried to make the list as brief as possible and to the point. Too many varieties are often misleading. All seeds offered by me have been grown and selected with the utmost care, to have all varieties pure and true to name.

AND I WILL GUARANTEE

that all seeds sold by me shall be as represented; should they prove otherwise, I will fill the order gratis. But I cannot guarantee more than this, or guarantee the crop in any way, as there are so many causes over which I have no control, that, let seeds be ever so fresh, weather and other circumstances may cause a total failure.

For many years I have made a specialty of Market Gardeners' Seeds, grown from selected seed stock. The importance of following this system for the production of choice vegetables is familiar to all gardeners; if the vegetable from which seeds are grown are inferior or impure, so will be their product. *Perfection of quality with me is of the first importance.*

I make no charge for packing. Bags charged at cost price only.

Half a bushel will be supplied at bushel rates; half a peck at peck rates; one-half pound at pound rates. Orders for less than one-half peck or one-quarter pound will be charged at quart and ounce prices.

When seeds are to be sent by mail, in larger quantities than packets and ounces, postage must be added at the rate of 8 cents per pound, or 15 cents per quart for Peas and Beans, and 10 cents for Corn.

New Varieties of Special Merit

BLACK VALENTINE BUSH BEAN

A new bean, very hardy and very early, long round pods of light green color.

Quart, 20 cents. Peck, \$1.25. Bushel, \$4.50.

EXTRA EARLY REFUGEE

A selection from the Refugee, about ten days earlier, very prolific and of good quality.

Quart, 20 cents. Peck, \$1.15. Bushel, \$4.25.

STRINGLESS REFUGEE WAX

A wax pod strain of Refugee Bean, round pod, early, and an abundant yielder.

Quart, 20 cents. Peck, \$1.40. Bushel, \$5.00.

NEW EARLY MODEL BEET

Extremely early, of perfect globe shape and finest quality. The beets are always smooth and of the deepest blood-red color.

Ounce, 10 cents. Quarter-Pound, 30 cents. Pound, 90 cents.

EUREKA FIRST-EARLY CABBAGE

Early round, hard heading variety of medium size, said to be a cross of Wakefield and Succession, and the earliest flat-heading variety. Follows very close after the Wakefield.

Packet, 10 cents. Ounce, 25 cents. Quarter-Pound, 75 cents.
Pound, \$2.75.

THE VOLGA CABBAGE

A new Russian variety, very true to type and extremely hardy. Of very uniform size, round as a ball, of good quality, and a very reliable header, grown as a second early or full variety.

Packet, 10 cents. Ounce, 25 cents. Quarter-Pound, 85 cents.
Pound, \$3.00.

FRENCH'S SUCCESS CELERY

Keeps the best of any celery yet introduced. Growth compact and short in stem so that plants may be well earthed up for blanching while growing close together. Foliage dark green; heart large, solid and formed early; stalks white, thick, yet brittle and without stringiness and of good quality. It requires more time to mature than some sorts but remains firm, solid and in perfect condition until late in spring. We recommend it as the best variety for the late market.

Packet, 10 cents. Ounce, 25 cents. Quarter-Pound, 80 cents.
Pound, \$3.00.

BURPEE'S HOWLING MOB SWEET CORN

An early corn with large ears of handsome appearance, quite hardy and only a few days later than Cory.

Packet, 10 cents. Quart, 25 cents. Peck, \$1.40. Bushel, \$5.00.

THE KLECKLEY SWEETS WATERMELON

This famous "sweetest of all" watermelon has become very popular. Of superb luscious flavor, very fine grained and tender meat. The fruits are of large size. The rind is very thin and brittle, splitting ahead of the knife when cutting.

Packet, 5 cents. Ounce, 10 cents. Quarter-Pound, 25 cents.
Pound, 80 cents.

SUTTON'S EXCELSIOR PEA

The great merit of this new pea lies in the fact that in it we have an early dwarf wrinkled pea in the front rank for earliness, yet with much larger, handsomer pods than any dwarf wrinkled pea yet introduced. It is similar in habit of growth to Nott's Excelsior, which is one of the most popular dwarf wrinkled peas. It takes the place in the **Extra Early** class that is now so acceptably filled by Stratagem and Telephone in the later sorts. It grows to a height of about 12 to 14 inches, showing a great abundance of its long, broad, straight pods of a pale green color.

Quart, 25 cents. Peck, \$1.75. Bushel, \$6.50.

NEW LARGE PODDED ALASKA PEA

As early as Alaska, with pods and peas almost double the size, more vigorous and productive; a great acquisition.

Quart, 20 cents. Peck, \$1.45. Bushel, \$5.60.

GRADUS OR PROSPERITY PEAS

Extra early, of best quality and now the leading early Market Pea. Gradus is a large wrinkled pea, growing about 24 to 30 inches high, pods are of a bright green color and as large as Telephone and equally as well filled with luscious peas—seven to nine or more in a pod.

Quart, 25 cents. Peck, \$1.90. Bushel, \$7 50.

SPECIAL ATTENTION IS ALSO CALLED TO THE FOLLOWING:

Pole and Bush Limas (Connecticut grown). Selected Snowball Cauliflower. All-Head, Xtra Flat Dutch and Hollander or Danish Cabbages. Danvers Carrot (Essex Strain). Selected White Spine Cucumber. Market Gardener and Early Champion Sweet Corn. Select Big Boston Lettuce. Southport Globes and Danvers Globe Onions. Eureka Pie Pumpkin. Selected Michigan and Giant Summer Crookneck Squashes. Extra Selected Earliana Tomato. Chalks, Jewel and Matchless (Originator Stocks). Selected White Egg and L. I. Purple Top Yellow Ruta-Baga Turnips.

Extra Early Dwarf Erfurt. Select stock.....	.20	2.00	7.50

CABBAGE

The Cabbage crop is one of the first in importance with the Market Gardener, and its success or failure is due in a large measure, to the seed used. The only consideration is "Where can the best seeds be procured?" To meet the demand made on us for this class of seed, we are paying special attention to its production, and to secure the best seed, we select fully developed heads, such as are absolutely perfect.

	Oz.	$\frac{1}{4}$ Lb.	Lb.
Large Jersey Wakefield. The best, large early variety, <i>choice</i>	.25	.75	2.75
Burpee's All Head. The best for second early and very late planting. <i>Choice</i> stock.....	.25	.75	2.75

" White Dutch. Extra choice.....	60 " "
Lawn Grass. Finest mixed. <i>Choice seed</i>	Qt. Bush. \$0.15 \$3.75

Advice to Buyers of Fertilizers.

Consumers Should Know From What Fertilizers Are Made.

People often think that all kinds of Nitrogen. Phosphoric Acid and Potash are alike, that they possess equal Agricultural value as food for plants; but this is not the case. One form of Nitrogen may be worth *three times as much as another*, one form of Phosphoric Acid *ten times as much as another*. The same holds true with potash, depending upon the source from which it is derived. Unless the Gardener knows what material the manufacturer uses he can be no judge of the worth of the fertilizer, for these reasons and at the earnest solicitation of my customers I have furnished them with my special mixtures for several years, and always (in favorable seasons) with the *very best satisfaction*. In buying *special* Fertilizers for your crops you are buying just the amount of plant food that that particular crop requires, *as near as can be calculated*, to carry it from start to finish; no more, no less. And right here is where "experience is the best teacher:" it *must* be in the right form to give best results.

For many years I have made a specialty of mixing Fertilizer to order, for all crops and soils, from best materials, Mixing Regrinding and putting up in the best mechanical condition, any materials or any given analysis the Gardener may require.

Dont pay Agents profits on your Fertilizers but have them mixed to order, and get just what you want. A well known brand of manufactured fertilizer analyzing 3 to 4 % Ammonia, 9 to 10 % Available Phos. Acid and 4 to 5 Actual Potash, and is selling as high as \$35.00 per ton by Agents, who pay \$31.00 in car lots, or \$29.00 spot cash for car load lots. It can be made for \$27.00 per ton or \$26.00 in quantity, and guaranteed. Is the difference worth saving? Why pay five dollars or more for the same grade of goods. I carry a good stock of all.

FERTILIZING MATERIALS and CHEMICALS

Special prices given on application, correspondence solicited.

PERSONAL ATTENTION

Given to all mail orders. I have also standard varieties of Flower Seeds, such as Mixed Sweet Peas, Nasturtiums, etc: Write me for prices on anything in my line you require. Thanking all for past favors, I respectfully ask for a continuance of the same.

E. E. BURWELL,

160 Burwell Street,

NEW HAVEN, CONN.

Telephone Connection.
