John B. Broadwell,
PROPRIETOR

**BROADWELL'S
DOUBLE-JOINTED
COTTON SEED.**

THE PRIZE WINNER.

BROADWELL'S DOUBLE JOINTED COTTON.

The only long limb prolific Cotton known, it will grow more bolls to the stalk than any other Cotton discovered.

This Cotton was awarded the first prize in the Georgia State Fair for the two past years 1905-1906 and is now on exhibition at the Georgia State Fair again 1907.

YIELD

I claim that this Cotton will yield more to the acre than any other Cotton, I have averaged three bales to the acre on my entire crop. I have been improving this Cotton for the past six years, my object has been from the start to make two bolls grow where one has been growing heretofore.

DOUBLE JOINTED

You will see from cut above that two limbs come out together from the main stalk and two bolls side by side on limb. You will notice that the space between limbs from the ground to the top of stalk is very short. Bolls are medium size. Seed very small, Staple above average in length, and very early.

SEED

Any one wishing to buy seed from this wonderful Cotton can get them \$1.00 a peck or \$3.50 per bushel, will make special prices club of five bushels and more. None genuine unless direct from me. Cash must accompany orders.

For Full Particulars Address,

JOHN B. BROADWELL,
R. F. D. No. 3. **ALPHARETTA, GA.**
