BAY STATE NURSERIES

NORTH ABINGTON

MASSACHUSETTS

WINDSOR H. WYMAN, Proprietor

Telephone, Rockland, 26-13. Cable Address, "Nursery," Boston.

IMPORTANT

OUR GENERAL CATALOGUE should always be kept at hand. It contains the common names and full description of all the trees and plants mentioned in this list, with other valuable information of interest to the planter. If you do not possess a copy, send for one at once.

WE EMPLOY NO AGENTS

Our dealings are direct with the planter. Every order placed with us has the personal attention of expert Nurserymen from the time it is accepted until the goods are delivered to the carrier. Complaints of any character are seldom received.

VISITORS WELCOME

We invite all who can, to visit our Nurseries. Express trains leave South Station, Boston, at frequent intervals during the day. When we are notified by telephone in advance, visitors will be met at North Abington station on arrival of trains.

SUPERINTENDENTS AND GARDENERS

We are constantly in touch with reliable men, experienced in all lines of Gardening, Farming, Forestry and Landscape work who desire to make a change in their position. Any Lady, Gentleman or Estate requiring the services of a Superintendent or Head Gardener, married or single, should communicate with us. It is seldom that we cannot be of assistance to both employer and employee in this regard. No fee is required.

THE PACKING SEASON

The spring packing and shipping season usually opens here about the first of March and continues until the middle of May or the first of June. Stock kept dormant in our cold storage houses can be planted successfully until very late in the season.

Fall packing, the first of October, and continues until freezing weather sets in.

Evergreens can be successfully transplanted during August and September. Herbaceous Perennials should be transplanted either in the spring or during September and the first half of October.

NURSERY INSPECTION

Our nurseries are inspected annually by the State Board of Agriculture of Massachusetts, and found to be apparently free from all injurious insect pests and diseases. A certificate of such inspection accompanies every shipment of nursery stock.

PRICES AND DELIVERY

The articles in this list will be furnished at the annexed prices only when the quantity specified shall be taken. Five hundred will be furnished at the thousand rate; fifty at the hundred rate; and five at rate per ten. These prices include packing in the best possible manner, and free delivery to Express or Freight Station at North Abington.

TERMS AND CONDITIONS

Our terms are cash, unless by special agreement. We can ship by express C. O. D. when desired, with charges for collection added to the bill provided 20 per cent. of the amount of the order accompanies the same as a guarantee. Said guarantee will be required only from parties with whom we have no business acquaintance. All bills remaining unpaid December 1st in the fall, and June 1st in the spring, will be subject to sight draft without further notice.

While we exercise the greatest care to have all Trees, Shrubs and Plants genuine and reliable, and hold ourselves prepared to replace, on proper proof, all that prove untrue, we do not give any warranty, expressed or implied; and in case of any error on our part, it is mutually agreed between the purchaser and ourselves that we shall not at any time be held responsible for a greater amount than the original price of the goods. No complaints will be considered that are not made within ten days after the receipt of stock.

Ornamental Department

NOTE.—In compiling this list, we have endeavored to include only such varieties of stock as we have now in our nurseries, in the sizes and quantities offered. In filling orders, we shall grade stock according to these specifications. Should orders be received for sizes not found in this list, or should any specified grade be exhausted, we will send the nearest size we have in stock at the time the order is received and charge accordingly, unless otherwise advised.

Deciduous Trees

Under this head we include both upright and drooping forms of trees which shed their foliage in Winter. Our shade trees have all been several times transplanted and are as good as can be grown.

Evergreen Trees

We pay particular attention to the cultivation of Evergreens. The stock we offer is all thrifty and heavily rooted, having been root-pruned, and several times transplanted, thus assuring perfect success in removal.

HERBACEOUS DEPARTMENT

The growing and handling of Herbaceous Perennials has come to be an important part of our business. We are continually receiving letters of appreciation relative to the stock we are sending out, and our methods of packing. Our stock was never so large as now, and we feel sure that we can furnish this most popular class of plants from our fields that will be not only second to none, but far superior to much of the seedling, pot-grown and divided stock which is being offered by some dealers at low rates. Field-grown stock of the proper size will secure for the planter the best possible results.
