Annual Catalogue

1907

We take pleasure in presenting to our patrons and friends our catalogue for 1907.

We offer our seeds with the full assurance that they are true and reliable, quality being always our first consideration, but at the same time we wish it particularly understood that we do not warrant them, for the ultimate success of a crop is dependent on so many contingencies that we cannot hold ourselves liable or responsible for failure. If the purchaser does not accept the seeds on these conditions, they must be returned at once.

In ordering goods please give your *Name, Post Office* and *State* in full, being particular to *write your name very distinctly*.

Remittances can be made by Post Office Money Orders, Bank Drafts, Express Orders or cash sent in registered letter.

Orders from unknown correspondents must be accompanied by a remittance or a satisfactory reference.

When ordering seeds by Mail, postage must always be added at the rate of *eight cents per pound*, in quantities of one-fourth pound and upwards. Seeds by packet and ounce will be mailed without extra charge.

In shipping we make no charge for delivery to railroads or express companies.

We are thankful for the generous patronage heretofore given and intend to continue to merit the same by exercising the utmost care and fidelity in promoting the interests of our customers.

R. B. DUNNING & CO.

LIBERAL REDUCTION TO CLUBS

Liberal reductions will be made to persons selecting packet seeds from our Catalogue, at the prices named, and will be forwarded, postage free, to any part of the United States.

Purchasers remitting \$1.00 may select seeds in packets, at Catalogue prices amounting to \$1.25

"	"	2.00	"	"	"	"	"	"	2.50

This reduction is for *packet seeds only*. Seeds when ordered by the *ounce, pound or quart* will not be included.

Novelties and Specialties for 1907

Early Dew Drop Potatoes

good, very much above the average. They are very fine grained, white as flour and of splendid flavor. They are excellent keepers and retain their good eating qualities till late in the spring, which some of the early varieties do not. The vines grow tall, stand erect and are of vigorous growth.

Price, 40 cts. per peck; \$1.25 per bush.; \$3.25 per bbl.

Perfection Early Blood Turnip Beet

This beet we are putting on the market after a number of years of careful selection.

It is very early with exceedingly small tops, roots globular and very smooth, flesh of a bright blood red color, very crisp, tender and sweet. It is equally good for the market or home garden as it is an excellent keeper as well as being very early.

Per pkt., 5 cts. Per oz.,
10 cts. Per $\frac{1}{4}$ lb., 25 cts.
Per lb., 75c.

Holmes' Premo Sweet Corn

Early Golden Bantam Sweet Corn

Extremely Early. Delicious in Flavor

This corn has a medium-sized ear of a bright golden color. It is extremely sweet, of delicious flavor and unusually tender.

The stalks grow about five feet high, and are very vigorous, bearing two to three well-filled ears on each stalk.

It is fully as early as the Cory and of far superior quality.

Price, per pkt., 5 cts. Pint, 15 cts. Quart, 25 cts. Peck, \$1.50.

Holmes' Premo Sweet Corn

A Pure Sweet Corn Five to Seven Days Earlier Than Any Other Variety.

No corn was ever introduced that gave such general satisfaction as Holmes' Premo. It is acknowledged by expert corn growers to be the earliest pure sweet corn under cultivation. The stalks grow about five feet high, and are very vigorous, generally bearing two well-developed ears to a stalk.

Pkt., 5 cts. Pint, 15 cts. Quart, 25 cts. Peck, \$1.30.

If corn is ordered by mail, add 6 cts. per pint, and 10 cts. per quart for postage.

Golden Bantam Sweet Corn

Dark Podded Telephone Peas

Dark Podded Telephone Pea

This new variety is a great improvement on the Carter's Telephone, both for purity and uniformity, showing no tendency to small late pods. It grows to a height of about four feet with a strong healthy vine, bearing extremely large dark green pods, which contain large peas of the very finest quality.

For fancy market garden trade, it has no equal as it is not only very attractive in appearance, but of the finest quality.

Pint, 15 cts. Quart, 25 cts.
Peck, \$1.75. Bush., \$6.50.

If peas are ordered by mail, add 8c per pint and 15c per quart for postage.

✓ Vick's Early Scarlet Globe Radish

This is a slightly olive-shaped variety of a rich, bright scarlet color, with white tender flesh. It is fit to pull as early as any known variety and is especially recommended to market gardeners whose market demands a large first early forcing variety.

Pkt., 10 cts.; oz., 20 cts.; $\frac{1}{4}$ lb., 60 cts.; lb., \$1.75.

Gradus or Prosperity Pea

Gradus Peas

This is a New, Very Large, Extra, Early Variety of Wrinkled Pea.

The most desirable sort for the home and market garden, large podded and of splendid quality.

The vines grow about three feet high and are vigorous and hardy. The immense pods are as large as those of the Telephone, uniformly well shaped and handsome, and more attractive than those of other extra early varieties.

They ripen slowly and continue fit for use much longer than most varieties making this by far the most desirable sort for the home garden. The peas are very large, of splendid quality and beautiful color which they retain after cooking.

Pint, 20 cts. Quart, 30 cts. Peck, \$2.00. Bush, \$7.50.

If Peas are ordered by mail, add 8c per pint, and 15c per quart for postage.

New Early Tomato "Freedom"

The plant is medium in size, presenting no peculiarities of foliage or habit. The fruit is borne mainly in clusters, perfectly round, having no sign of concave at the base. Of a bright, dazzling shade of scarlet. The flesh is remarkably solid, having but few seeds. The flavor is perfect, absolutely free from any acidity. Undoubtedly the most prolific of all early tomatoes, and equal in size to the largest of any early sort put on the market. A very valuable acquisition to the tomato list.

Pkt., 10 cts. Oz., 40 cts.; 2 oz., 70 cts.; 1/4 lb., \$1.25.

Selected Northern Grown Vegetable Seeds

Seeds sent by mail or express as the purchaser may wish. When ordering to be sent by mail, add postage for **Beans and Peas** at the rate of 15 cents per quart, and to **Corn**, 10 cents per quart, to catalogue prices.

Bulk seeds by the pound if ordered sent by mail add 8 cents per pound for postage.

Seeds in packets and ounces sent by mail free.

ARTICHOKE—Jerusalem

From four to five bushels will seed an acre; they should be cut the same as potatoes, one eye on a piece being sufficient, planted in May, in rows three feet apart and about eighteen inches in the rows, and covered about two inches deep.

They are the best hog food known, and are attracting much attention on account of their great fattening properties, and for milch cows, they excel any root grown for increasing the flow of milk, and make it much richer.

An acre will keep from 20 to 30 hogs during the fall and winter months.

They are well adapted to any soil where corn or potatoes can be grown.

Jerusalem Artichoke. Tubers, per quart, 25 cents; per peck, \$1.00; per bushel, \$3.00.

ASPARAGUS

This is one of the first and finest spring relishes which comes to the table from the garden, and it really requires very little trouble in cultivation, since a bed once properly made and planted will last for years. The soil for the bed can hardly be made too rich, and the fertilizer should be well trenched-in to the depth of 2 feet or more. The roots should be planted as early in spring as the ground can be prepared, setting them a foot apart in rows 3 or 4 feet apart, with the crowns from 4 to 6 inches below the surface of the bed. Asparagus seeds may be sown directly in the permanent bed and the plants thinned as they grow; or it may be sown elsewhere, and the seedlings transplanted the second year. An ounce of seed will sow 50 feet of drill, and produce about 300 plants. Fair crops may be expected the third year.

Colossal. Widely cultivated; very large, deep green; tender stocks of good flavor; the roots are vigorous and productive..

Pkt.	Oz.	½lb.
5	10	20

Beans—Dwarf or Bush

Improved Golden Wax Beans

One quart is sufficient for one hundred feet of drill; two bushels for one acre in drills.

A succession of sowings can be made from the first week in May until July. Plant in drills about two inches deep, and from eighteen inches to two feet apart, according to the richness of the soil; the poorer the soil the closer they can be planted; the plants should be about three inches apart.

Beans ordered by mail are subject to an extra charge of 15 cents per quart and eight cents per pint for postage. Pints furnished at quart rates.

	Qt.	Pk.	Bu.
Burpee's Stringless Pod Bush Beans. The only stringless green pod bush bean in cultivation, consequently it surpasses all others in crisp, tender flavor. All are absolutely stringless, and of a beautiful fleshy appearance. It is very early and very prolific	.25	1.75	6.00
Dwarf Horticultural. A fine early shell bean	.20	1.50	5.00
Currie's Rust Proof. Straight, yellow, stringless pod. Unsurpassed for quality	.20	1.50	5.50
Improved Golden Wax. An improvement on the old Golden Wax. The pod is somewhat round, meaty and entirely rust proof	.20	1.50	5.75
Davis Kidney Wax. This plant is a vigorous grower, carrying the pods well up from the ground. In productiveness it is astonishing, as it will produce at least one-third more bushels of pods to the acre than any other Wax Bean. The pods are long, straight, oval, of clear waxy white color, and handsome, often growing to a length of seven to eight inches, and when fit for use, are quite stringless and of fine flavor	.25	1.75	6.00
Wardwell's Kidney Wax. Early; vine medium, erect, hardy, productive. Pods long, broad, flat, brittle, and of a delicate waxy-yellow. Very attractive market sort. Beans large, kidney-shaped, white and dark markings about the eye. First-class snap bean, and a good one for winter..	.25	1.75	6.00
Early Mohawk. Very early, hardy and productive. Large flat, dark green pods, five to six inches in length	.20	1.50	5.50
Low's Champion. One of the best for either snap or shell beans. Very productive; large, green, flat pods	.20	1.50	5.50
Refugee Wax. Long, round yellow wax pods, very productive, and not inclined to rust	.20	1.50	5.50
Long Yellow Six Weeks. Hardy and prolific, an excellent early string bean	.20	1.50	5.50
Yellow Eye. (Old Fashioned). Very productive; not as large as the improved, but of better quality for baking ...	.20	1.25	4.50
Improved Yellow Eye. Very prolific; fine for baking	.20	1.15	4.00
Improved White Pea. Excellent for baking	.20	1.15	4.00

Early Pearl Pea Beans. This is a small, round, pure white variety; very early* and very prolific; and of excellent quality for baking. Last season these beans matured and were thoroughly ripe in eleven weeks from planting.....

Qt.	Pk.	Bu.
.25	1.50	5.00

BEANS—Pole or Running

Lazy Wives Pole Beans

One quart will plant one hundred hills, ten to twelve quarts to the acre.

These are more tender, and require rather more care in culture than the bush beans; they succeed best in sandy loam, which should be liberally enriched with short manure in the hills, which are formed according to the variety, from three to four feet apart; from five to six seeds are planted in each hill, about two inches deep.

Beans ordered by mail are subject to an extra charge of 15 cents per quart for postage. Pints furnished at quart rates.

Qt.	Pk.	Bu.
.20	1.50	5.50

Mammoth Horticultural. An improvement over the common Horticultural, being very much larger and much more productive. As a market shell bean, it has no equal

.25	1.75	6.00
-----	------	------

Indian Chief or Black Wax. A very tender string bean ...

.20	1.50	5.75
-----	------	------

Mont d'Or, or Golden Butter. Earliest of the wax pole varieties, unsurpassed in quality

.20	1.50	5.75
-----	------	------

Lazy Wives. Immensely popular everywhere. Pods are large, green, entirely stringless, and of excellent flavor. It is exceedingly productive and easily gathered. Such is the peculiar taste and pleasant flavor of this bean that many persons could not be induced to eat other varieties of string beans, after tasting Lazy Wives. Excellent for shelling or baking

.25	1.75	6.50
-----	------	------

Red Cranberry. Almost stringless; one of the very best of string beans

.20	1.50	5.50
-----	------	------

Kentucky Wonder Beans

White Dutch Runners. Large, white flowers; often planted with the scarlet variety; the effect is very beautiful10 .30 1.75

Owing to the extreme short crop of seed beans grown last season, the supply is very limited and high. Prices are subject to change without notice.

BEETS

One ounce to fifty feet of drill; six pounds to the acre.

The best results are obtained on a deep, rich, sandy loam. For early use sow as soon as the ground will admit, in drills fourteen inches apart, and thin to four inches; for the main crop sow the first week in May, and for winter use as late as June. The soil should be deeply manured and well cultivated. In lifting and storing the roots, care must be taken that they are not bruised.

KENTUCKY WONDER or Old Homestead

A very prolific sort producing its pods in large clusters. Pods green, very long, often reaching nine or ten inches, nearly round when young and very crisp, of fine flavor and most excellent for snap beans. One of the best and most profitable beans for the market gardener, the pods being so showy and produced in great abundance..

	Qt.	Pk.	Bu.
	.25	1.75	6.50

Early Jersey Lima.

Of large size. Very tender and of delicious flavor. Very early. Out of a number of varieties that we have tried, we found this to be the most desirable sort for this climate

	.30	2.00	7.00
--	-----	------	------

Scarlet Runner.

Very ornamental, free climber, with bright scarlet flowers

	.10	.30	1.75
--	-----	-----	------

Dirigo Beet

Perfection Beet. (See page 1).

Pkt. 2 oz. $\frac{1}{4}$ lb. 1b.

Dirigo Extra Early. Originated with a leading market gardener and was brought to perfection after years of careful cultivation. It is a rich, blood-red beet of fine grain and flavor, is earlier than either the Egyptian or Eclipse, of smooth and rapid growth; top and tap root being very small

5 .15 .25 .75

Cresby's Egyptian. This variety resembles the Egyptian only in its extreme earliness. It grows much larger and lighter colored. It is one of the best sorts for early planting as it reaches a usable size sooner than any other sort

5 .10 .20 .60

Eclipse. This variety is about as early as the Egyptian, but of larger and finer quality

5 .10 .20 .60

Bastian's Early Blood Turnip. Larger than the Egyptian and follows it and the Eclipse in point of earliness; not so dark in color

5 .10 .20 .60

Dewing's Blood Turnip.

Of fine form and flavor and deep blood red; a desirable variety

5 .10 .20 .60

Long Smooth Blood Red.

This is a long, smooth beet, growing to good size

5 .10 .20 .60

Edmand's Early Blood Turnip. The largest sort for general crop.

In quality one of the finest, exceedingly dark, shape globular, having only one tap root. Very popular with marketmen

5 .10 .20 .60

Swiss Chard. Used for

greens

5 .10 .20 .60

Giant Feeding Sugar Beet

Sugar Beets and Mangel Wurzels

Varieties Grown For Feeding Stock (Sown in May or Early in June). Six Pounds Per Acre.

Giant Feeding Sugar. A cross of the Mammoth Red Mangel and Improved Sugar Beet. Roots large, long and smooth, and of a beautiful light rose tint. Yields nearly as large a crop as the Mangels, and

Giant Yellow Intermediate

- supplies a food of very ^{2 oz.} $\frac{1}{4}$ lb. 1b.
much higher nutritive value.
The roots grow partly out
of the ground and can be
harvested very easily..... .10 .20 .50
- Lane's Improved Sugar.** A
well known variety; valua-
ble for feeding to cattle.... .10 .15 .35
- Giant Yellow Intermediate.**
This variety grows more
than half above the ground,
and is a russet, yellow color.
The root is ovoid, interme-
diate between the long and
globe varieties. Flesh white,
firm and sweet, much liked
by cattle. Produces enor-
mous crops and a good
keeper10 .15 .35
- Yellow Globe Mangel Wurzel.**
Roots of large size, and
globular form; very produc-
tive10 .15 .35
- Improved Mammoth Long
Red Mangel Wurzel.** A
variety producing roots of
mammoth size10 .15 .35
- Golden Tankard.** A half
long variety of a bright
yellow color10 .15 .35
- Norbiton Giant Mangel Wur-
zel.** Extra fine Long Red,
very large10 .15 .35

CABBAGE

One ounce will produce
about three thousand
plants.

The Cabbage is one of
the most important vege-
tables, and some of its
varieties universally culti-
vated. The ground must
be highly manured, deep-
ly dug or plowed, and
thoroughly worked, to in-
sure good, full sized
heads. A heavy, moist
and fresh loam is the
most suitable. The early
sorts should be sown very
early in the spring, in hot-
beds, or later in the open
ground. Eighteen inches
by three feet apart is the common distance.

Fottler's Improved Brunswick Cabbage

Sure Head Cabbage

Early; solid and sure headed	5	.20	.60
Fottler's Improved Brunswick. An excellent early Drumhead variety; produces a firm and solid head	5	.20	.60
Henderson's Succession. One of the finest for a second early or late sort	5	.20	.60
Autumn King. Entirely distinct, one of the best keepers, enormous sized head, of that dark shade of green, which is most desirable in a cabbage, and has such small outer leaves that it can be planted much closer together than the ordinary late sorts; therefore can be relied upon to produce a greater weight of crop per acre than any other variety. A distinct feature of the Autumn King is the peculiarly crimped leaves, which not only adds to its appearance, but enables it to be distinguished anywhere	5	.20	.60

Premium Flat Dutch. The old standard variety for main crop. It has long stood the test, and is yet one of the very best	5	.20	.60
--	---	-----	-----

Stone-Mason Drumhead. One of the very best for a main crop.	5	.20	.60
---	---	-----	-----

Deep Head. An early strain of the Flat

Dutch type. The plant is rather below medium size, very short stemmed and few leaved. The leaves are large, broad and quite thick. The head is oval and very large for size of plant, solid and of good quality. It matures just after the All Seasons' Cabbage, and is very popular with gardeners.....	5	.20	.60
---	---	-----	-----

Early Winningstadt. An excellent sort; heads of large size	5	.20	.60
Early Jersey Wakefield. This is the standard early pointed-head cabbage. For the market garden it is the best, and for early home use all should have it	5	.20	.60
Henderson's Early Summer. The standard summer variety. Unexcelled for the market garden and good for home use	5	.20	.60
All Seasons' Cabbage.

Early Spring Cabbage

Pkt. Oz. ¼ lb.

Danver's Half-Long Carrot

Mammoth Rock Red. This is the best, largest and surest heading red cabbage ever introduced. The head is large, round, very solid and of deep red color. 5 .20 .60

Sure Head. Produces large, round, flattened heads of The Flat Dutch type, and is remarkable for its certainty to head. It is all head and sure to head even under unfavorable conditions. The heads are remarkably uniform, very hard, firm and fine in texture, and, ordinarily weigh from 10 to 15 pounds each. Has but few leaves, keeps well. A good shipper, and just the variety to suit market gardeners and farmers. 5 .25 .75

Early Spring. The only Extra Early Round, Flatheaded Cabbage in the world. Coming in with the Wakefield, and yielding one-third more than any other Extra Early. This variety is of the Early Summer Type, but about one-fifth smaller, and has only four to five outside leaves, and these so small that it may be planted twenty-one inches apart, 14,500 to the acre. The stem is short, making almost the whole plant edible. It is finely bred, the veining of the leaves being particularly fine. There is no cabbage we know of having a more solid head; it has also the peculiarity of heading firmly at an early stage in its growth, so that the finest cabbage, though small, can be obtained long before it has attained its mature size 5 .30 1.00

CARROTS

One ounce to one hundred feet of drill; three to four pounds to the acre.

Carrots require a very finely pulverized soil to grow them to perfection. A good, light and well enriched sandy loam is the best for this crop. For field culture, sow in drills, three to three and one-half feet apart, so as to cultivate by horse. Market gardeners sow in drills about eighteen inches apart, and cultivate by hand. For early crops cover one-half an inch deep, and thin to six inches apart, in the rows; for late, cover three-fourths of an inch deep, and thin to four inches.

Ox Heart Carrot

Early French Forcing. The earliest variety in cultivation and the best suited for forcing and early market gardening. Tops, small and divided. The roots are a red-

dish orange color and nearly round. When fully matured, they are about two inches in diameter 5 .15 .25 .85

✓ **Long Orange.** Roots of large size, heavy cropper and excellent keeper 5 .10 .20 .75

✓ **Danvers' Half Long.** In form it is midway between the Long Orange and Ox Heart. The root is of a dark orange color and grows very smooth. Very productive.. 5 .10 .25 .80

✓ **New Ox Heart.** A very early and heavy yielder. Thick and short in form, scarlet in color 5 .10 .25 .80

✓ **Long White Belgium.** Large, long rooted variety; valuable for feeding 5 .10 .20 .75

CAULIFLOWER

One ounce will produce about three thousand plants.

Any soil that will grow early Cabbages will grow Cauliflower, as their requirements are almost similar; but as the product is more valuable, extra manuring and preparation of the soil will be well paid.

The seeds may be sown in the hot-bed in March or April, and transplanted to open ground about the first of May.

Henderson's Early Snowball. A very reliable early variety 10 2.00

Early Favorite. One of the best early varieties, very hardy, easily grown and will head under conditions in which many sorts will fail. Heads large, solid, crisp and tender 5 1.00

Henderson's Early Snowball Cauliflower

Golden Self-Bleaching Celery

CELERY

One ounce of seed produces about four thousand plants.

To have celery early, it should be sown in a hot bed quite early in the spring, and when three inches high plant out in a well prepared bed, which must be covered in frosty weather. For the principal crop, sow early in spring, very shallow in the seedbed, and when the plants are about six inches high, transplant them about six inches apart into trenches for blanching. Dig the trenches four feet apart, a foot wide and ten inches deep. Fill in five or six inches of well rotted manure, and mix thoroughly, half a spade deep, with the earth at the bottom. The tops of the plants should be shortened before they are set. Earth up to blanch, three or four times during their growth, taking care that no earth falls in the center of the plants.

Boston Market. A favorite variety, remarkable for its tender, crisp, succulent stems, keeps well	Pkt.	Oz.
Henderson's White Plume. Crisp, solid and possessing a sweet, nutty flavor; requires very little labor in bleaching	5	.20
Golden Self-Bleaching. A self-bleaching, early golden-colored variety that is very popular	5	.25

CORN—Sweet

Cory Corn

continue planting every two weeks, until July, in rich, well manured ground, in hills three feet apart, each way, covering about half an inch and thin out to three plants to a hill, or plant in rows four feet apart, and to stand eight inches apart in rows. The field varieties should be planted four feet apart each way, leaving three plants to a hill.

Corn ordered by mail is subject to an extra charge of ten cents per quart and five cents per pint for postage. Pints furnished at quart rates.

Holmes' Premo Sweet Corn. The earliest sweet corn in existence, (See page 2).

Early Golden Bantam Sweet Corn. (See page 2).

Early Cory. (Red Cob). Pkt. Qt. Pk. Bu.

A very early dwarf variety, an excellent sort, sweet and good flavor ... 5 .20 1.00 3.00

White Cory. Similar to the above, but with white cob and white kernels 5 .20 1.00 3.00

Early Marblehead. This resembles very closely the Cory, but is not so early. 5 .20 1.00 3.00

Early Crosby. Not so early as the Cory or Marblehead; of very rich, sugary flavor 5 .20 .80 3.00

Late Crosby. This resembles the Early Crosby. It has the same rich sugary flavor. Ears large and well filled. Kernels white. About one week later than the Early Crosby. One of the best medium late table and market varieties ever introduced 5 .20 .80 3.00

Stowell's Evergreen. This is a strain of this late variety of sweet corn that will

One quart to two hundred hills, ten quarts to an acre.

The Sweet or Sugar varieties being liable to rot in cold or wet ground, should not be planted before the middle of May and for a succession con-

Early Yellow Canada Corn

mature in this climate. We have been troubled in the past by our Evergreen Sweet Corn not maturing, owing to the short season in this section. We have tried this strain for the past few seasons and have been very much pleased with it. All lovers of sweet corn should not fail to try this variety. It is very large and deepkerneled with a sweet, sugary flavor 5 .20 .80 3.00

Black Mexican. Grain bluish black, but is especially rich in sugar qualities 5 .20 .80 3.00

CORN—Field

Early Yellow Canada. A very early eight-rowed variety... .10 .50 1.50

Red Cob Ensilage. A pure white corn. It is sweet, tender and juicy, has short joints, grows to a great height with an abundance of leaves10 .35 1.15

Evergreen Sweet Fodder. For cutting green and feeding to stock this variety excels all others in tenderness, sweetness and nutriment. Also popular as a silo variety10 .50 1.50

Early Sanford. A white flint variety, very valuable for ensilage and fodder, the stalks being very large and numerous. Particularly adapted to this climate as it ears well, and if planted early, will come to maturity...10 .35 1.25

Japanese Climbing Cucumber

Leaming. An early yellow dent variety. Very productive. One of the best for ensilage or green fodder10 .35 1.15

CRESS OR PEPPER GRASS

A well known salad. Requires to be sown thickly and covered very slightly. Sow at frequent intervals to keep up a succession as it soon runs to seed.

Double Curled. Very fine; may be cut two or three times 5 .15

CUCUMBER

One ounce to fifty hills.

The Cucumber is a tender annual, and therefore should not be planted or set out in the open air until there is a prospect of continued warm and pleasant weather. Cucumbers succeed in warm, moist, rich, loamy ground. The hills should be four or five feet apart in each direction.

When all danger from insects is passed, leave but three or four of the strongest plants in the hill.

Japanese Climbing.

A distinct and valuable variety, quickly climbing poles or trellis, taking up less room in the garden and keeping the fruit up from the ground and clean. It produces very long, round, crisp fruit of fine flavor and is very prolific

Improved White Spine Cucumber Pkt. Oz. ¼ lb. 1b.

Early Russian. The earliest variety.....	5	.15	.40	1.25
Early Frame. An early standard variety; about five inches long	5	.10	.25	.75
Improved White Spine. Superior for table use, very productive, medium sized, straight and well formed	5	.10	.25	.75
Nichols' Medium Green. This is a very fine table variety, and also good for early forcing. Color, dark green; flesh very crisp; very prolific and always straight, smooth and handsome. It also makes a very desirable sort for pickles	5	.10	.25	.75
Early Green Cluster. Grows in clusters, early and productive	5	.10	.25	.75
Improved Long Green. Long and crisp; a popular and reliable variety for pickles	5	.10	.25	.75
Boston Pickling. The finest variety to grow for pickles....	5	.10	.25	.75

DANDELION **Improved Thick-Leaved Dandelion**

One ounce to one hundred ft. of drill. The Dandelion resembles Endive, and affords one of the earliest, as well as one of the most healthful of spring greens. Sow as early as the weather will permit, in good, well-enriched soil, in rows twelve inches apart, covering seed one-fourth of an inch deep, the earth firmly pressed over the seed.

Improved Thick-Leaved. Best variety Pkg. Oz. ¼ lb. .10 .50 1.60

ENDIVE

Endive may be grown at any season of the year, but is more generally used late in the fall. Sow the seed during May or June, in drills, fourteen inches apart, and when well established thin to one foot apart. When nearly full grown, tie the outer leaves together over the center in order to blanch the heart of the plant. By covering every few days a succession may be kept up.

Green Curled. This is the hardiest variety, and very desirable for the home and market garden. The deep green leaves are beautifully cut and curled, easily blanched, and become very crisp, tender and fine flavored

5 .20

White Curled. By far the Pkt. Oz.
most beautiful variety.
Plants moderately dense,
with divided leaves, which
are coarser and less tender
than those of the
Green Curled; but even the
outer leaves are very light
colored, frequently white,
so that the plant is very
attractive and always
brings the highest price
on the market 5 .20

LEEK

Belongs to the onion family and
by some preferred to that vegetable.
Sow the seeds and care for the
young plants same as for onions,
but they need a little more room in

London Flag Leek

order to develop fully.
When the young plants are about the size of
a goose quill, transplant to a prepared bed in
rows one foot apart and four or five inches in
the row. Set the roots deep and draw the earth
to them when cultivating, so that they may be
well blanched by the time they are fit for use.

London Flag. It is the variety Pkt. Oz. $\frac{1}{4}$ lb.
more cultivated in this country
than any other. It is hardy and
of good quality 5 .20 .60

Improved Hanson.

Forms very large,
firm heads, which
are deliciously
sweet, crisp and
tender; heads
green outside and
white within. For
outdoor culture
unexcelled 5 .20 .60

Green Curled Endive

LETTUCE

One ounce to one hundred and twenty feet of
drill.

Lettuce thrives best in rich, moist ground.
Sow the seed in hot-beds in February or March,

Big Boston Lettuce

New Sensation. This remarkable variety has rapidly grown in popularity until it has become the leader among gardeners. No other lettuce thrives so well when grown at any season of the year, withstanding the hottest weather in a remarkable degree. It is a beautiful light yellowish-green color, leaves much blistered on the surface, and has the peculiarity of forming a solid head, even before half grown. Its uniform, handsome and even growth is unequalled and it is one of the easiest to grow	Pkt.	Oz.	¼lb.
.....	5	.20	.60
Early Tennisball. White seeded. Extensively grown for forcing and heading under glass, heads firm and good size; very white and crisp	5	.15	.50
Early Tennisball. Black seeded. A very popular sort for open ground culture; forms a handsome head and is crisp and tender	5	.15	.50
Boston Curled. A variety of great beauty and of superior quality. Leaves beautifully curled; attractive on table	5	.15	.50
Black Seeded Simpson. Heads very large with light colored leaves, leaves being almost white. Stands summer heat splendidly and remains long fit for use	5	.15	.50
Ferry's Early Prize Head. Forms a large, tender and crisp mass of leaves of superior flavor, and very hardy. Slow to run to seed and does not become bitter as early as many other sorts	5	.15	.50
Big Boston. This is a new, very large strain of White Tennisball or Boston Lettuce excelling all other strains in size. Of great value to market gardeners	Pkt.	Oz.	¼lb.
.....	5	.15	.50
White Cabbage. Large, extra tender, and is a good keeper	5	.15	.50

MELON—Musk

One ounce for sixty hills; two to three pounds for an acre.

Melons thrive best in a moderately enriched light soil; the hills should be six feet apart each way. After all danger of frost is past plant twelve or fifteen seeds in each hill, and when well up, thin out to three or four plants in each hill.

Nutmeg. Named from its shape; flesh green and sweet.....	Pkt.	Oz.	¼lb.
.....	5	.10	.25
Large Round Yellow Cantaloupe. Flesh reddish orange, sweet and of good flavor; an early and productive variety	5	.10	.25
Miller's Cream. This is one of the finest all-round melons in existence. Flesh of a rich salmon color, very sweet and melting in quality	5	.10	.25
Extra Early Hackensack. A green fleshed nutmeg of splendid quality. It is very early and a prolific bearer	5	.10	.25

MELON—Water

One ounce for thirty hills; four to five pounds for an acre.

Plant in hills eight feet apart, and cultivate same as Musk Melon.

Citron Preserving Melon

	Pkt.	Oz.	¼ lb.
Vick's Early. Productive, early and finely flavored; red flesh.	5	.10	.25
Mountain Sweet. One of the best for general culture	5	.10	.25
Citron. The standard variety for preserves	5	.10	.25

MUSTARD

Sow thickly in rows at different times from May to July, and cut when about two inches high. Used as a salad or cut and boiled for greens. The seed is used for flavoring pickles, etc.

White London. The leaves are light green, mild and tender when young; seed light yellow	Pkt.	Oz.	¼ lb.
	5	.10	.25

Yellow Globe Danvers Onion

✓ Extra Early Red Globe. A very early variety of medium size and deep red color; an abundant producer and of good form and flavor, keeping well.....				
✓ Yellow Globe Danvers. The most profitable variety to raise, very productive, a good keeper, of mild flavor, and always meets with ready sale				Crop Failed.
✓ American Silver Skin. Flavor mild and pleasant. Skin silver white. Handsome in appearance. Highly esteemed for pickling when young; also for market in early winter	Pkt.	Oz.	¼ lb.	lb.
	5	.20	.75	2.50

✓ Prize Taker. This is one of the best of the huge foreign varieties. When started under glass and transplanted into open ground, they bottom well, are nearly free from	Pkt.	Oz.	¼ lb.	lb.
	5	.25	.75	2.25

ONION

One ounce to one hundred feet of drill; five pounds to the acre.

No vegetable is more extensively known and cultivated than the Onion. A good crop is impossible unless the soil is very rich and kept clean. Use well-rotted manure freely, and get the crop in as early as possible in spring, no matter if the weather is cold and unpleasant. Sow in drills one foot apart, and cover about one-third of an inch, treading or rolling after sowing, so that the hot, dry atmosphere may not dry up and destroy the sprouting seed.

✓ Large Red Wethersfield. Large size, productive and a good keeper	Pkt.	Oz.	¼ lb.	lb.
	5	.20	.75	2.50

Large Red Wethersfield

stiff necks, and when offered for sale always attract marked attention. The variety is without doubt the largest onion grown, samples under special culture sometimes weighing five pounds 5 .25 .75 2.50

Onion Sets should be planted near the surface as early in the spring as the ground will permit, in drills about twelve inches apart and four inches in the rows. They produce a very early and profitable crop. *Onion Sets ordered by mail are subject to an extra charge of ten cents a quart for postage.*

	Per Qt.	Per Pk.		Per Qt.	Per Pk.
White Sets	.25	1.75	Potato Onion Sets	.20	1.00
Yellow Sets	.20	1.50	Top Onion Sets	.25	1.50

For larger quantities prices will be given on application.

PARSLEY

One ounce to one hundred and fifty feet of drill.

Parsley requires rich, mellow soil; sow thickly in drills, one foot apart, and half an inch deep. As the seed germinates slowly, it is best to soak it for a few hours in tepid water before sowing. For winter use, protect it in a glass frame or light cellar.

	Pkt.	Oz.	¼ lb.
Double Curled	5	.10	.25

PARSNIP

One ounce for two hundred feet of drill; five pounds to the acre.

Sow as early in the spring as the weather will admit, in drills 15 inches apart, covering half an inch deep. When well up thin out to five or six inches apart in the rows. Unlike carrots, they are improved by frost, and it is usual to take up in the fall a certain quantity for winter use, leaving the rest in the ground until spring, to be dug as required.

Abbott's Improved, or Long Smooth. Smooth and quite large; one of the best	Pkt.	Oz.	¼ lb.	1b.
	5	.10	.25	.75

PEAS

One quart to seventy-five feet of drill; two to three bushels to the acre.

Peas for an early crop should be sown as soon as the ground is in working condition. The soil for their reception should be light, dry and well sheltered. Mild manure, such as leaf mould, has a beneficial effect; but for many of the varieties, the soil cannot be too rich. For general crop the ground should

Double Curled Parsley

be well manured the previous year which causes them to yield more abundantly. When grown as a market crop, peas are never staked, and are sown in single rows, two or three inches deep, and from two to three feet apart, according to the variety or strength of the soil. When grown in small quantities for private use, they are generally sown in double rows, six or eight inches apart, and the tall varieties staked up by brush.

Gradus or Prosperity Pea

Peas ordered by mail are subject to an extra charge of 15 cents per quart and eight cents per pint for postage. Pints furnished at quart rates.

Extra Early Varieties

Gradus or Prosperity. (See page 4).

Thomas Laxton. A new, early Qt. Pk. Bu.
wrinkled variety of great merit. Vine three to three and one-half feet high, similar to that of Gradus, but darker in color, hardier and more productive. Pods large and long, similar to, but larger than those of the Champion of England and as uniformly well filled. The green peas are very large, fine colored and unsurpassed in quality. This pea has only to be known to become one of the most popular sorts for the market and home garden, as it is one of the very best varieties yet produced 30 2.00 7.50

Cleveland's Eclipse. The earliest and most productive pea as compared with the hitherto earliest known pea on record. Grows about two feet high. Seed green wrinkled. Smaller than the American Wonder,

Thomas Laxton Pea

	Qt.	Pk.	Bu.
the pods of which it resembles. Pods true American Wonder in shape and size. A most desirable sort for canners, market gardeners or private family use	.30	2.00	7.00
Cleveland's Alaska. A very early variety, smooth, blue, prolific and sweet. Height two feet; very desirable for early market gardening	.20	1.25	4.50
Nott's Excelsior. One of the most valuable of all the wrinkled dwarf peas. As early as the American Wonder, while the pods are larger, fully as well filled, and there are more of them. It grows a half taller than the American Wonder, and is a much heavier cropper	.20	1.50	5.50
Bliss' American Wonder. One of the earliest and best known wrinkled dwarf varieties, grows about nine inches high, and is covered with well filled pods	.20	1.50	5.50
Premium Gem. A dwarf, prolific, green, wrinkled marrow, very early; about nine inches high	.20	1.50	5.50
Laxton's Alpha. A very early wrinkled sort. Very prolific bearer, of fine quality, pods being large and well filled.....	.20	1.50	5.00

Second Early Varieties

Dwarf Telephone. A new variety with dwarf vines, bearing large, handsome pods, with peas of highest quality, without the long vines of the Telephone, and regular and uniform in growth. Height eighteen inches, stocky, healthy and vigorous, with almost no tendency to sport, and from five to seven days earlier than the Stratagem. Pods long, remarkably well filled, and of good lasting quality for market purposes. Peas of large size, tender and of delicious flavor	.25	2.00	7.00
Pride of the Market. Grows from eighteen inches to two feet high, and bears grand pods, well filled with large and finely flavored peas. Its robust constitution, enormous productiveness and superior appearance, insure its acceptance as a market favorite	.20	1.50	5.50
McLean's Advancer. An early, green wrinkled variety, of delicious flavor; grows about two feet high	.20	1.40	5.00
Bliss' Everbearing. Fine wrinkled marrow; pods three to four inches long, well filled with large peas; grows about two feet high	.20	1.50	5.00
Heroine. Grows about two and one-half feet high. A wrinkled variety of robust growth. It produces abundantly, long, pointed, well-filled pods, which contain from eight to nine fine, large peas	.20	1.50	5.50

For General Crop

Telephone. Dark Podded. (See page 3).

Carter's Telephone. A wrinkled variety of superior quality. It produces an abundance of large handsome pods, filled with immense peas, which are tender, sweet and of excellent flavor; grows about three feet high	.20	1.50	5.00
--	-----	------	------

Duke of Albany, or Qt. Pk. Bu.**American Champion.**

One of the best large podded late varieties. Very prolific. The vines are strong and vigorous, growing to the height of four feet, the pods are large, dark green and well filled with large, tender peas of delicious flavor20 1.50 5.50

Improved Stratagem.

A dwarf wrinkled pea of branching habit. The pods are of immense size, very uniformly filled with very dark green peas of the finest quality; an immense cropper. Grows about two feet high. .20 1.50 5.50

Champion of England.

Universally admitted to be one of the richest and best flavored peas grown; grows five feet high .20 1.25 4.00

Duke of Albany Peas

Yorkshire Hero. A green wrinkled variety of branching habit; Qt. Pk. Bu.
very productive and fine flavor; grows about two and one-half feet high20 1.50 5.00

Dwarf Champion. Has all the good qualities of the Champion of England, but does not grow so high; grows about two and one-half feet high20 1.50 5.50

White Marrowfat. One of the best late varieties; very productive10 .75 2.50

Black-eyed Marrowfat. An excellent field pea, hardy and productive10 .75 2.50

Canada Field. Extensively used for field culture50 1.75

Tall Gray Sugar. A very superior variety of the edible pod sort. Pods very tender and sweet30 1.75 6.00

Bell Pepper

PEPPER

One ounce will produce fifteen hundred plants.

Grown largely for pickles. Sow in the hot-bed early in April, and transplant into the open ground when the weather is favorable. The plants should be set in warm, mellow soil, in rows eighteen inches apart. The seed may also be sown in the open ground, when danger from frost is passed, and the soil is dry and warm. Cultivate in the usual manner, and the crop will be fit for use early in September.

Large Bell. Large and of mild flavor 5 .30

SEED POTATOES

Early Dew Drop. (See page 1).

Irish Cobbler. We have found this potato to be one of the most reliable, extra early potatoes. In ripening it seems to be more uniform than any other sort. Every hill seems to ripen at the same time. The potatoes in form are oval and round. They grow very smooth, cream white, with few and shallow eyes. The quality for early table use is not excelled by any early variety. It keeps perfectly through the winter until planting time in the spring and it is never out of season for the table.

Considering its earliness, yield, fine quality and handsome appearance, Irish Cobbler is one of the best of all early potatoes 35 1.00 2.75

Irish Cobbler Potatoes

Harmony Beauty Potatoes
All Grown in one hill, weight 5 3-4 lbs.

Harmony Beauty. This potato originated from the seed of a potato ball in Somerset county, Maine.

It is the favorite market potato of Bangor, having the preference over all other varieties wherever once used, and conceded by growers and consumers to be the best potato grown. It always brings a better price than any other in our market.

It is a prolific cropper and remarkably free from rot, and about two weeks earlier than the Early Rose.

		Bbl.
		of
		165 lbs.
Pk.	Bu.	
35	1.00	2.75

In appearance it has a russet, pinkish skin, a little lighter in color than the Early Rose and is of more oval shape. Bbl. of 165 lbs.
 Flesh white and mealy Pk. Bu. 2.75
 .35 1.00

Mortgage Lifter. This is one of the greatest yielders of all main crop varieties. It is a pure white potato, with small eyes, thin skin, very smooth, and fine grained flesh of excellent flavor. Shape slightly oblong, rather broad and of medium thickness. This potato cooks very white, dry and mealy. One of the best late varieties in existence 35 1.00 2.75

Green Mountain. A late variety of flat, oval form; white skinned, very smooth and handsome. One of the best yielders, free from blight, and rot, keeps well, and is never out of season for the table35 1.00 2.75

Bartlett's Perfection.

This potato was originated by J. S. Bartlett of Bangor from the seed of a potato ball. Out of sixty varieties grown by him, this he considered to be by far the best variety for a general crop, and did not show the least sign of rot or blight, which was the only variety out of the sixty, but showed more or less of it. It is medium early, very prolific and a very robust grower Pk. Bu. 2.75
 .35 1.00

Bartlett's Perfection Potato

In appearance it has a white skin, flat, oval form, flesh white and mealy, and very smooth and handsome.

Price on potatoes subject to market changes.

Sugar Pumpkin

PUMPKIN

One pound will plant two hundred and fifty hills. Chiefly used for agricultural purposes. Same cultivation as for cucumbers and melons.

Large Yellow. Large size, good for cooking	Pkt.	Pt.	Qt.
	5	.10	.20
Sugar. Fine grained, sweet and prolific	Pkt.	¼ lb.	lb.
	5	.25	.80

RADISH

One ounce to one hundred feet of drill.

Radishes thrive best in a light, rich, sandy loam; heavy or clayey soils not only delay their maturity, but produce crops much inferior, both in appearance and flavor. For a successive supply, sow from the middle of March until September, at intervals of two or three weeks. For an early supply they may be sown in a hot-bed in February.

✓ **Vick's Early Scarlet Globe Radish.** (See page 3).

✓ **Long Scarlet Short Top.** Very long and crisp Pkt. Oz. ¼ lb. 1b.
5 .10 .25 .75

✓ **Early Scarlet Turnip.** Round, scarlet, small, mild and crisp 5 .10 .25 .75

✓ **Lady Finger.** Long slender, and of a beautiful snow white. It is of rapid growth, remarkably crisp, brittle and tender.

Quality desirable for the market or home garden Pkt. Oz. ¼ lb. 1b.
5 .10 .25 .75

✓ **White Pearl Radish.** Seventeen days from planting to the table. The quickest on record. Pearly white, globe shaped, small top; quality unparalleled; very sweet, tender and crisp. Equally adapted for forcing or growing out of doors 5 .20 .50 1.50

✓ **French Breakfast.** A favorite oval-shaped, bright scarlet Radish, with white tip; fine for either open ground or forcing 5 .10 .25 .75

White Pearl Radish

SPINACH

Long Standing Spinach

One ounce to one hundred feet of drill.

Sow in early spring, in drills a foot apart, every two weeks for a succession; and as it grows, thin out for use. For fall use, sow in August, and for winter crop in September. Cover that which is left out over winter with straw or leaves, after the weather becomes quite cold.

✓ **Large New Round Thick Leaved.** Has very large and thick leaves Pkt. Oz. ¼ lb. 1b.
5 .10 .20 .50

✓ **Long Standing.** An improved round seeded strain of excellent merit, having all the good qualities of the ordinary sorts, and continuing in condition for use much longer. The leaves are smooth and very dark, rich green. Very popular with market gardeners 5 .10 .20 .50

✓ **New Zealand.** This sort is grown to supply the place of the ordinary Spinach during the hottest months of the year, or in dry, arid localities, where the ordinary Spinach does badly. Has a luxuriant growth of succulent leaves which can be cut through the entire summer. 5 .10 .30 1.00

SQUASH

One ounce of summer varieties will sow forty hills; one ounce of winter varieties will sow fifteen hills; four pounds per acre.

Turban Squash

Any good rich soil is adapted to the growth of the Squash. They only thrive well in a warm temperature, as all the varieties are tender annuals; and the seed should not be sown in spring until all danger from the frost is past, and the ground is warm and thoroughly settled. The hills for bush varieties should be about six feet apart, for running sorts, ten feet. Leave two plants to a hill and keep covered in the early stages with plaster.

Summer Crookneck. Early, productive and of good quality; fruit bright yellow.....

Pkt.	Oz.	¼ lb.	1 lb.
5	.10	.25	.75

White Bush Scalloped. An early flat, scalloped shaped variety; very productive

5	.10	.25	.75
---	-----	-----	-----

Turban. Early fall variety; orange-yellow flesh of good flavor

5	.10	.25	.75
---	-----	-----	-----

Hubbard. One of the most desirable varieties in cultivation; color, dark green; flesh, bright orange-yellow; fine grained, very dry, sweet and rich flavored; keeps perfectly good throughout the winter

5	.10	.25	.75
---	-----	-----	-----

Warted Hubbard. An improvement over the old-fashioned Hubbard. Same shape, large size, dark green, almost black, distinguished by a dense covering of knots, which justifies the name of "warted."

Warted Hubbard

Very thick flesh, first-class quality and a good keeper

5	.10	.30	.90
---	-----	-----	-----

Boston Marrow. A fall and winter variety, very popular in the Boston market; of oval form; skin thin; when ripe, bright orange; an excellent keeper and of superior quality

5	.10	.25	.75
---	-----	-----	-----

Early Prolific Marrow. Earlier than the Boston Marrow. Very productive and grows to weigh from seven to twenty pounds. Its color is most attractive, a brilliant orange red. Quality excellent when mature, and a good keeper

5	.10	.25	.75
---	-----	-----	-----

SUNFLOWER

Large Russian Per pound, 15 cents

TOBACCO SEED

Connecticut Seed Leaf. Best adapted to the climate of the northern states, as it is more hardy and endures the cold better than the tender varieties grown south

5	.30	1.00
---	-----	------

TOMATO

One ounce will produce fifteen hundred plants. This vegetable is one of the most important of all garden products. They thrive best in a warm, light, rich soil. For early plants, sow about the first week in March in a hot-bed; or in boxes or pots in a warm window. When the plants are about two inches high, set out in boxes, three inches deep, four inches apart, in the same temperature, or pot singly. If again transplanted before setting out, the plants will be still more stocky. Set out in the open ground about the first of June, four feet apart each way, using a shovelful of rotted manure in each hill. Keep well sheltered and watered until they are established, after which let the fruit have plenty of sun.

Crimson Cushion Tomato

New Early Freedom Tomato. (See page 4).

Livingston's Beauty. Color, very glossy crimson; grows in Pkt. Oz. $\frac{1}{4}$ lb.
clusters of four or five fruits; large and solid 5 .25 .75

Livingston's Favorite. Productive; good flavor; few seeds;
flesh solid; smooth and handsome 5 .20 .60

Livingston's Perfection. Early, large, smooth and solid, blood-
red color 5 .25 .75

Trophy. Very large, solid and of fair quality 5 .20 .60

Atlantic Prize. This tomato is the result of many years' care-
ful selection by one of the most successful tomato-growers of
New Jersey. It is very early, fruit is of good size, round,
very solid, and of excellent quality..... 5 .25 .75

Dwarf Champion. This is an early variety, which forms very
stout strong plants, about two feet high. The branches are
short, making a bushy plant that stands quite erect without
stakes. Fruit smooth, medium sized, fairly solid, but has no
hard core, and is of good flavor 5 .25 .75

Crimson Cushion. For so large a tomato it is very early, very
Smooth, of a bright, scarlet crimson. Ripens almost com-
pletely to the stem end. The flesh is so firm and solid that it
requires four times the quantity to produce a pound of seed
than it does of ordinary sorts. Without doubt the most pro-
lific of any variety yet brought out. A grand tomato for slic-
ing or canning 5 .25 .75

New Stone. Of a bright, scarlet color. Very large and very
smooth; ripening evenly to the stem without a crack; exceed-
ingly solid and firm-fleshed (as its name indicates); is an ex-
cellent shipper; quality the very best; a good keeper; with-
out hard core and not subject to rot. A great yielder 5 .25 .75

TURNIP

**Purple Top Strap
Leaf Turnip**

One ounce for one hundred and fifty feet of drill; one to two pounds in drills for an acre.

Turnips do best in highly enriched light, sandy or gravelly soil; sow the earliest varieties as soon as the ground can be worked in the spring, in drills twelve to eighteen inches apart. For a continuous supply through the season, sowings should be made every two weeks until the last of July; from which time until the middle of August the principal sowings are made for the fall and winter use. Swedish or Ruta Baga turnips are largely grown for a farm crop, as well as for the table; make sowings from the tenth of June until the first of July, in drills two to three feet apart, and the plants when well up should be thinned

to ten inches apart. To keep the roots fresh during the winter, they may be placed in a cool, dry cellar and buried with dry sand.

✓ Golden Ball or Orange Jelly. A rapid grower of excellent flavor; bright yellow, good keeper, and a superior table variety	Pkt. 2 oz.	¼ lb.	1 lb.
	5	.10	.20 .60

Henderson's Colossal. In mixed colors or white. Large plants in bloom, all double,10c each; \$1.00 per dozen
Small plants for Summer and Autumn Blooming25c per dozen

We cannot warrant our small plants to be over 75 per cent. double flowering, as these seeds do not come true.

VERBENAS

Ready May 1st

Extra Choice Large Flowering Sorts. Mixed colors. Six in basket25c per basket
Strong Rooted Cuttings25c per dozen

ZINNIAS

Ready June 1st

Large double flowers of very bright mixed colors.

Large plants in bloom. \$1.00 per dozen. Small plants25c per dozen

On any of the above plants we can make special prices for large lots packed in moss. Write for prices stating quantity desired.

Plants on this page sent by Express or Freight only.

FLOWER SEEDS

NASTURTIUM—Tall

Elegant profuse flowering plants for verandas, trellises, etc. The seed pods can be gathered while green and tender, for pickling. Hardy annuals.

Tall Mixed. Fine colors. . . 5 .10 1.00

NASTURTIUM—Dwarf

The dwarf varieties are among our most popular plants, standing any amount of heat and drought, growing vigorously and flowering freely all summer and fall; excellent for massing and ribboning, doing well even in poor soil. Hardy annuals, one foot.

Dwarf, Mixed. Fine colors 5 .10 1.00

Dwarf Nasturtium

SWEET PEAS

Very lovely, beautiful, fragrant, free blooming, climbing plants. Sweet peas are grown very extensively by florists and gardeners for cut flowers, and when placed in water will last many days, and their sweet perfume delights many.

Supported by common pea sticks they form admirable screens for protecting tender plants and excluding unsightly objects. They are invaluable for trailing and trellis work and covering fences, etc.

The more the flowers are cut, the more freely they will bloom.

Dunning's Choice Mixed Sweet Peas. This mixture is made up entirely of the choice new and standard varieties. These varieties are all grown separately and are selected and mixed in such variety and proportions as to give a mixture that is second to none.

Price per pkt., 5 cts. Per oz., 10 cts. Per $\frac{1}{4}$ lb., 25 cts. Per lb., 75 cts.

ENGLISH LAWN FERTILIZER

An Odorless Chemical Fertilizer For Lawns, Flower Beds and Kitchen Gardens.

This is a high-grade chemical fertilizer, especially prepared to promote the vigorous and healthy growth of luxuriant grass, enabling it to withstand rough usage and the protracted heat of summer.

Being free from weed seeds, and odorless, it is far superior to unsightly and strong smelling stable dressing for use on lawns and tennis courts.

Twenty-five pound bags for 2,500 square feet	\$1.00
Fifty pound bags for 5,000 square feet	\$1.50
One hundred pound bags for $\frac{1}{4}$ acre	\$2.50

Extra Selected Farm Seeds

At market prices at time order is received. All inquiries for quotations will be promptly answered.

Orchard Grass

Awnless Brome Grass

(*Bromus Inermis*)

An erect growing perennial that attains a height of from three to five feet.

It is especially recommended for dry and arid soils where the more delicate grasses will not grow. Its remarkable drought resisting qualities make it very valuable for dry situations, while its extreme hardness enables it to withstand our coldest winters without serious injury. The rootstocks of this variety spread rapidly under ground, sending up new shoots, and thus form a close, dense sod. On this account it should not be sown except where a permanent grass crop is desired; 20 lbs. to the bushel.

GRASS SEEDS

Timothy or Herd's Grass. The best grass for hay; 45 lbs. to the bushel.

Red Top. A valuable grass and extensively cultivated; 10 lbs. to the bushel.

Fancy Red Top. Clear seed.

Rhode Island Bent. Very fine lawn grass; 10 lbs. to the bushel.

Orchard Grass. Valuable on all dry soils, very valuable as a pasture grass; 14 lbs. to the bushel.

Fowl Meadow Grass. Grows tall and thick, succeeding best on low, moist land; 10 lbs. to the bushel.

Kentucky Blue Grass. An excellent variety for pasture. Also valuable for lawns when mixed with other grasses; 14 lbs. to the bushel.

Hungarian Grass

from a single seed. Hay and fodder are very nutritious and much liked by all kinds of stock. Sow in June and July, one peck to the acre; 48 lbs. to the bushel.

MILLETS

Millets should be sown in June and July, and are annual forage plants of thick growth, valuable for green fodder or hay, maturing in fifty to seventy-five days from the time the seed germinates, producing an abundant yield of forage, relished by all kinds of stock. They must be cut while in blossom to make good hay. At market prices at time order is received. All inquiries for quotations will be promptly answered.

Hungarian Grass. Early; grows two to three feet high; abundant foliage; withstands drought and yields well on light soils; 48 lbs. to the bushel.

Golden Millet. Requires a dry, light, rich soil, and grows two and a half to four feet high, with a fine bulk of stalks and leaves, and is excellent for foraging; 48 lbs. to the bushel.

New Siberian Millet. A new and wonderfully productive forage plant from Russia, which has given excellent results in the United States. It is extremely hardy and about two weeks earlier than German Millet, growing about four feet in height. Its stooling properties are remarkable, as high as 41 stalks having been grown

CLOVERS

Prices subject to market changes.

There are no plants so valuable for fertilizers as the clovers. They have the faculty for absorbing nitrogen from the air, and also of rendering available much of the inert plant food of the soil. Their long, powerful tap roots penetrate to a great depth, loosen the soil, admit air, and by their decay add immensely to the fertility of the soil. The seed may be sown in fall or spring; the best results will come from sowing in the spring, and is often sown on the late snows of April.

Medium Red Clover. **Pea Vine or Mammoth Clover.** **Alsike Clover.**

White Dutch Clover. Valuable for pasture and for lawns.

Scarlet or Crimson Clover. This variety is fine for soiling cattle; has a beautiful blossom.

Alfalfa or Lucerne Clover. Very productive; requires deep soil.

DWARF ESSEX RAPE

This is very valuable for sheep pasture. It can be sown in May, and will be ready for pasturing in July or August; or it may be sown in June or even

up to the middle of July, and yet furnish, under reasonably favorable circumstances, a large amount of pasture and fodder. It is very suitable for sowing on land that an early crop of potatoes has been taken off. In drills, about four pounds to the acre; broadcast, eight pounds to the acre. Pound, 9 cts.; 13 pounds for \$1.00.

Soja or Soy Beans

Soja or Soy Bean

Very valuable for fertilizing and enriching the soil; also used for pasturing, feeding as green fodder, and for silo purposes. Sow broadcast in May or June, at the rate of one bushel to the acre; or it may be planted in drills three feet apart and one foot between plants.

At market prices time order is received.

Sand, or Winter Vetch

One of the pea vine class of plants. Better than other fodder crops on poor, dry, sandy soil, while in good soil it makes a rank growth of four to five feet. Perfectly hardy all over the United States, stands drought well and remains green all winter. It is the earliest of all spring fodder crops. Sow for spring use in August with $\frac{1}{2}$ bushel winter rye or oats, or in spring with $\frac{1}{2}$ bushel of oats, rye or barley. It is exceedingly nutritious, eaten with relish, and may be fed with safety to all kinds of stock. Sow at the rate of one bushel per acre.

At market prices time order is received. All inquiries for quotations will be promptly answered.

Early Black Eye Cow Peas

The great soil improver. Green crops plowed under are one of the best and cheapest ways of improving the soil. For this purpose the Cow Peas is the most popular, especially for medium and light soil. They should be sown in May or June, at the rate of one and one-half bushels to the acre, and plowed under as soon as they have attained their growth. There is no surer or cheaper means of improving poor soil than by sowing Cow Peas. In its capacity as a nitrogen gatherer, its growth largely enables the farmer to dispense with the use of nitrogen or ammoniated fertilizers.

Cow Peas are also valuable as a forage crop.

At market prices time order is received.

Sand, or Winter Vetch

JAPANESE BARNYARD MILLET

This wonderful and valuable new forage plant was introduced into this country by Prof. Brooks, of the Massachusetts Agricultural Experiment Station. It has proven an enormous yielder in all sections of the United States; hay and fodder of most excellent quality on any soil, yielding 8 to 10 tons per acre and growing from 5 to 7 feet in height.

Cattle and horses eat it greedily.

The accompanying cut is from a photograph of a bunch that was raised on our farm. We found it very satisfactory in every way.

Sow in May and June broadcast 10 to 15 lbs. per acre (it stools remarkably), or in drills, 8 lbs. per acre.

Price, per pound, 9c.

Per 13 pounds, \$1.00.

If sent by mail, add eight cents per pound for postage.

GRAINS

Prices subject to market changes. All inquiries for quotations will be promptly answered.

Wheat, Spring Rye, Winter Rye, Barley, Oats, Silver Hull Buckwheat, Common Buckwheat, Indian Wheat or Rough Hulled Buckwheat.

All our grains are selected expressly for seed, and are strictly pure and true.

All inquiries for quotations for grass seeds, grains, etc., will be promptly answered and samples sent by mail when desired.

Dunning's Lawn Grass Seed

This is a mixture of the different varieties of grass seed, which is best suited to this climate for lawns, grass plots, cemetery lots, etc., and selected with a view of suiting all soils and situations, and whether used in pastures or lawns, has invariably produced the best results. It must be remembered, however, that much of the fine appearance of our lawns depends upon regularity in mowing. If they are left too long in spring before the operation is begun, or if allowed to grow strong in summer, and, more especially, if not closely mown at the latest period in autumn, they become coarse, the stronger grass overgrowing the weaker and the best, the smoothness of the surface being destroyed, and ultimately the whole becoming patchy and unsightly. All lawns should also be regularly rolled and, unless the subsoil be a porous, alluvial gravel, should also be thoroughly drained at their formation. A drain should be carried along at the bottom of each terrace slope, so that they may at all times be comfortable to walk upon. The seed may be sown in spring or fall, but, if sown in hot weather, a slight sowing of oats, which vegetates quickly among the grass, will serve to protect the springing grass. For forming new lawns, four bushels are required per acre, or about one quart to each square rod of land, which should be regularly and evenly distributed. Sixteen pounds to the bushel.

A liberal quantity of seed should always be used to insure the best results. Per pound, 25 cents. If sent by mail, add eight cents per pound for postage.

Per bushel of 16 lbs., by Freight or Express, \$3.50.

For English Lawn Fertilizer. (See page 33).

White Victor Oats

This is one of the most productive varieties of oats ever introduced. The straw is very stiff holding the heavy head up well. It is early and the grains are large, plump and heavy. Plant grows to medium height, of vigorous growth, stools out well and yields an immense crop. They are pure white in color and are entirely free from rust and smut.

A change of seed oats is very necessary to a good crop. In making the change why not get seed of this choice new variety that will insure you an extra large crop.

Price: Postpaid, lb., 20 cts.; 3 lbs., 50 cts. By Express or Freight, pk., 25 cts.; bu., 90 cts.; 10 bu. lots, 80 cts. per bu. In lots of one bushel or over, there will be a charge of 18 cts. for bags; bags capable of holding 2½ bushels.

IMMENSE CROPS WITHOUT FERTILIZERS

Roots of Soy Beans, showing the nodules which collect the free nitrogen from the air and deposit it in the soil, thus making barren land productive, and after the first crop is harvested the ground is left richer and better for the next year's crop.

many farmers rich. The germs do the work—the farmer gets the profit. They save expense, reduce the work, increase the crop enormously, even make it possible to grow Alfalfa and other crops where they never would grow before.

The new way saves the cost of fertilizers, and is very easy to use. The germs come ready for use, in a form called Nitro-Culture. Nitro-Culture is put up in small dry packages you can put in your vest pocket. Simply add it to water, and sprinkle the water over the seeds before planting. The germs remain on every seed—live with it—increase about it—feed the roots when they start and keep on feeding them. They also enrich the soil by storing nitrogen in it, so that the second year's crop, whatever it may be, is increased from two to ten times.

The U. S. Department of Agriculture says: "It is worse than useless to attempt to grow any leguminous crop without being certain of the presence of the bacteria which enable the plants to fix free nitrogen. Certain regions are practically devoid of the right kind of bacteria, and unless some artificial means of inoculating the germs be resorted to, the crop will be a failure."

Send for Catalogue of Nitro-Culture which more fully describes this wonderful discovery.

A new, sure and easy way has recently been discovered to make worn-out or poor land, enormously productive without fertilizers and almost without expense. Plants need nitrogen—can't grow without it. Heretofore fertilizers have been needed to put nitrogen into the soil. Nitrogen is very necessary—is the most expensive part of fertilizers. The new way is easier, surer, cheaper—it is to let nitrogen gathering germs feed the plants.

The soil is full of air. Air is four-fifths free nitrogen. Think what limitless plant food, in the form of free nitrogen, the air contains. Right here the new discovery comes in. Plants can't extract nitrogen from the air, but there are germs that can. These germs have been discovered and are now being used for that purpose.

These germs, when put into the soil, fasten themselves to the roots of the plants, draw the free nitrogen out of the air, and feed it to the plants. That's the secret of the new way that is making

Specimen plants characteristic of uninoculated and inoculated field of Alfalfa, on farm near Bynum, Harford County, Maryland. The uninoculated plants turning yellow, though sown on ground richer and better than the inoculated field. Gain from inoculation with Nitro-Culture nearly 500 per cent. by weight.

For All General Farming

are without doubt the best fertilizers in the world for producing the largest possible crops of Grass, Grain and Vegetables in the shortest time. The Bradley Fertilizer Co., manufacture fertilizers or **all Grades** and for **all Crops** and being the **largest manufacturers in the world** their facilities for furnishing all kinds of fertilizers and agricultural chemicals at the lowest prices are absolutely unequalled.

A full stock of the following standard fertilizers, constantly on hand:

Bradley's X L Superphosphate

Bradley's Potato Fertilizer

Bradley's Potato Manure

Bradley's Corn Phosphate

Bradley's Eureka Seeding-down Manure

Bradley's Complete Manure with 10% Potash

Bradley's Complete Manure for Potatoes and Vegetables

For Lawn Fertilizer. (See page 33).

Send to us for finely illustrated pamphlets, describing all of their brands, and let us quote you prices on these unequalled fertilizers, before purchasing elsewhere.

Agricultural Lime

Especially prepared for agricultural purposes, and, being finely ground, it can be used in any broadcast sower.

Many plants, such as beet, spinach, lettuce, onions, parsnip, cabbage, cucumbers, potatoes, peas, beans, turnip, carrots, corn and all grains, show a decided increase and are greatly benefited by the use of lime, as it corrects all acidity of the soil, sweetening it, and freeing it from impurities.

Lime properly applied at certain intervals will be found a most perfect renovator, one that can be relied upon. For the ordinary piece of land that requires lime it will be found that once in the rotation of crops, or, say, once in four years, is as often as lime should be applied. It will hold the land in its proper condition for that length of time.

Put up in 100-pound bags.

Price per ton\$10.00

Send for Illustrated Catalogue.

IS BEYOND QUESTION THE BEST FOOD EVER MANUFACTURED for Hens, Turkeys and Ducks. Its continual use by the largest Poultry Raisers proves it is unequalled for quickly growing large-sized birds of fine flavor, and for producing LARGE YIELDS OF SUPERIOR QUALITY EGGS

WE SELL THE GENUINE CYPHERS INCUBATORS

Free on Board Cars, Bangor, Me., at Factory Prices.

The Celebrated, Genuine, Patented Cyphers Non-Moisture Incubators, of which we are authorized agents, are guaranteed by the manufacturers as follows: To hatch a larger percentage of fertile eggs; to produce larger and more vigorous chicks or ducklings; to operate with less oil and at less expense than any other make of incubator; to require no supplied moisture and to be self-ventilating; to have a more sensitive, accurate and durable regulator than any other make and to maintain a more even temperature; to be more strictly automatic in action and to give better results in your hands than any other make of incubator in the world.

Each and every genuine Cyphers Incubator sold under registered trade-mark, is positively guaranteed to do satisfactory work in the hands

of the purchaser who will give it a fair trial, or it can be returned to us within ninety days, in good repair, less reasonable wear, and the purchase price will be refunded.

THE WORLD'S STANDARD HATCHER

The genuine Standard Cyphers Incubators are not an experiment. They have been before the public ten years, and have received the benefits of ten years' improvements. Their fame has grown until they are now acknowledged to be the "World's Standard Hatchers."

Standard Cyphers Incubators are used on more Government Experiment Farms, on more successful, large commercial poultry plants, and by more successful fanciers, than all other incubators combined.

PRICES

No. 0, 66 Egg Size	\$13.00.	No. 2, 240 Egg Size,	\$29.00.
No. 1, 140 Egg Size	\$20.00.	No. 3, 390 Egg Size	\$35.00.

LOW-PRICE INCUBATORS

While we unhesitatingly recommend the Standard Cyphers Incubator as the best on the market, we realize that there is a demand for lower-priced incubators, and offer the following low-priced machines in order to meet this demand. These machines are made of firstclass materials and will be found to work very satisfactory.

PRICES

Boys' Choice, capacity, 50 eggs, \$7.50; Farm Economy, capacity, 110 eggs, \$12.00.

CYPHERS UNEQUALLED APARTMENT BROODERS

Free on Board Cars, Bangor, Me., at Factory Prices.

Cyphers Brooders, like Cyphers Incubators, are correct in principle, durably made out of suitable material, fire-proof, guaranteed to be the best brooders on the market, regardless of price.

All Cyphers Brooders, 1907 Pattern, are shipped knock-down, and compactly crated, thus insuring lower freight rates. In setting up these brooders, no tools are required, no screws or nails to be put in place. Full set of directions for setting up with every brooder.

Style A Out Door Brooder. Next to its incubators, the Cyphers company especially prides itself on its Three Apartment Style of A, Outdoor Brooder, which is pronounced by thousands of users to be the best brooding device invented thus far for indoor or outdoor use. The Style A brooder is 36x72 inches in size, has three apartments; one, under the hover, averaging 90 degrees in temperature; one outside the hover, averaging 80 to 85 degrees and a separate apartment averaging 70 degrees. This brooder is heated by a Cyphers Insulated Brooder Stove. It is wind-proof and storm-proof, and will last many years with reasonable care.

Price: Style A Outdoor Brooder\$14.00.

Cyphers Style A 3-Apartment Outdoor Brooder and Colony House

CYPHERS STORM KING OUTDOOR BROODER

A practical outdoor brooder especially constructed to meet the demand for a practical outdoor brooder at a lower price than the Style A Brooder. The 1907 Brooder has a floor space of 3x3 feet and a capacity of 75 chicks. It has the brooding apartment of the Style A Brooder without the exercising apartment.

Price\$9.00.

CYPHERS IMPROVED HYGIENIC INDOOR BROODER

Cyphers Hygienic Indoor Brooder has been on the market several years and has given the best of satisfaction. We offer this brooder with the opinion that it is the best device in the form of an individual indoor brooder thus far conceived and invented for the safe and healthful rearing of chicks. It is strictly Hygienic, and reliable in operation. This brooder is composed of three apartments allowing the chicks to seek whatever temperature suits them best. The outside run is hinged to the brooder proper, so as to drop to the floor, in which position it serves as an incline between the brooder and the floor. The improved heating system used in this brooder is the same as that employed in the Style A and other Cyphers Brooders.

Price\$8.00.

CYPHERS SAFETY BROODER STOVE

These stoves positively have no equal. They furnish twice as much heat as the ordinary brooder lamp. The safety water pan on the Cyphers Safety Brooder Stove holds nearly a quart of water and extends out over the entire surface of the oil bowl, removing all danger of overheating the oil. Just the stove for use in home-made brooders. Height, 7½ inches; greatest width, 10½ inches.

Price of stove complete and ready for use, \$1.35.

CYPHERS INSULATED BROODER STOVE

For those desiring to buy brooder lamps, or stoves, we offer the Cyphers Improved Insulated Brooder stove. This new stove does away with the water jacket or reservoir required on brooder stoves usually sold for the purpose. The insulating plate of heavy galvanized iron is so placed between the burner and the oil bowl that all heat of the flame is deflected away from the oil reservoir, so that the oil remains cool at all times. The stove has a seamless bottom, hence will not leak.

Price, each\$1.50.

Cyphers Dry Food Hopper and Sanitary Shell and Grit Box

Price 75 Cents

These are made of heavy galvanized iron, practically indestructible and will last a lifetime with ordinary usage. They are practical labor and food saving devices.

THE DRY FOOD HOPPER has two compartments—a large one for grain mixtures, holding about six quarts, and a small one for beef scrap, holding about three quarts.

THE SANITARY GRIT AND SHELL BOX has three compartments for grit, oyster shell and charcoal. Can be used for dry food hopper where a small flock is kept.

Price 50 Cents

Cyphers Galvanized Iron Drinking Fountains

Cyphers
Wall Fountain

One of the most important appliances for use in the poultry yard is a truly sanitary drinking vessel.

These fountains are made of the best galvanized iron and guaranteed to last many years with proper treatment.

CYPHERS CHICK FOOD

This is a complete, scientifically compounded food for young chicks. It is a mixture of 11 different grains and seeds proportioned so as to meet all the needs of growing chicks and to thoroughly nourish them. In compounding Cyphers Chick Food, the protein (or flesh and muscle forming element) is maintained high, the carbohydrates (or fat and heat forming elements) are reduced to their proper proportion and the ash (or mineral elements) is in sufficient amount to supply the needs of the rapidly growing bird. If chicks are to be developed into breeders, no other food is required for the first eight weeks.

Prices: 100 lb. bag, \$2.50. Small lots, 3c per lb.

Cyphers Developing Food

Cyphers Developing Food is a special food intended for properly maturing young chicks, after they are ready to be weaned from Chick Food, and to carry them along to the age when it is desirable to place before them the larger whole grains. When the chicks are from six to eight weeks old they are able to eat, and exhibit a preference for larger particles of grain than are found in our chick food. Full directions for feeding are in every bag. Put up in sealed bags only bearing manufacturer's trade-mark.

100 lb. bag.....\$2.00

Cyphers Mealed Alfalfa

This is the best form of clover for use in mash food for small chicks, the meal being ground just coarse enough to give bulk to an otherwise soggy mash and thus allowing the gastric juices to become mixed with the food and to assist in thoroughly digesting it. Mealed clover contains the entire food plant—nothing is removed.

Prices: 50 lb bag, \$1.10; 100 lb. bag, \$2.00.

Cyphers Short Cut Alfalfa

Guaranteed 95 per cent. Pure Alfalfa. Alfalfa possesses from 14 to 17 per cent. protein. Protein is the most valuable and most expensive element in all foods.

Price

50 lb. bag.....\$1.00

Cyphers Forcing Food

The mash food specially designed to promote rapid growth.

Price

100 lb. bag.....\$2.00

Cyphers Scratching Food

An ideal dry-grain mixture; affords variety and promotes exercise.

Price

100 lb. bag\$2.00.

Cyphers Laying Food

A balanced ration, ready mixed for the daily mash.

Price

100 lb. bag\$2.25.

CYPHERS ROUP CURE

This remedy is positively guaranteed by the manufacturers to cure roup in all its forms. It is simply put in water and the chick takes its own medicine. It prevents and cures cold and is unequalled for canker, especially in pigeons. No poultryman can afford to be without Cyphers Roup Cure.

Price, 50c. Small size package makes 25 gallons of medicine.

CYPHERS LICE POWDER

In offering Cyphers Lice Powder, we present a powder that we believe to be stronger than any other preparation sold for the purpose. It is carefully compounded and contains no chemicals that will injure the fertility of the eggs or prove dangerous to newly hatched chicks. It will positively kill lice on poultry, cattle and horses; ticks on sheep and fleas on dogs.

Prices

15 ounce package, 25c.; postpaid 40c.

48 ounce package, 50c.; postpaid \$1.00.

CYPHERS EGG STIMULANT

Cyphers Egg Stimulant is a tonic and condition powder for promoting the general health. It is a condition, not a food. As a gentle stimulant of the productive organs of the fowl resulting in an increased production of eggs, this preparation has no equal. Each box contains enough to treat two bushels of food. Put up in one size package only.

Price 25c

Postpaid, 35c.

OVINAPHTHOL LICE KILLING NEST EGG

Our Ovinaphthol Lice Killing Nest Egg is a combined nest egg and lice killer. By simply using it in the nests in the same manner as an ordinary nest egg is used, laying hens are cleared of lice and mites and are able to occupy the nests with comfort. Being prepared with great care for this special purpose, they last a long time and always retain their effectiveness. The genuine nest eggs bear embossed on each egg the words, "Ovinaphthol Nest Egg."

Prices: Each, 10c; per dozen, 75c.

CYPHERS INCUBATOR THERMOMETERS

These thermometers are thoroughly and expertly tested before leaving the factory.

Price, 60c each.

CYPHERS BROODER THERMOMETERS

Price, 50c each.

CYPHERS PERFECT MARKER

This punch is simple in construction and made especially for marking chicks and poultry.

Price each 50c.

CYPHERS FULL-NEST EGG FOOD**A Meat Food Tonic Conditioner That Makes Hens Lay**

Full-Nest Egg Food is the standard condition powder for all ages of poultry. Besides being an unexcelled egg producer, it is a concentrated meat food possessing tonic properties which promote good health and fine condition. It stimulates and invigorates, but unlike other tonic foods, it also builds up the system and keeps it up. Many condition powders tone up the bird's system for a while, only to let it drop back as soon as the use of the tonic is discontinued. Full-Nest Egg Food will help your birds through their molt, make the feathers develop normally and induce a high state of perfection in plumage. Hens begin laying sooner after molting where this egg food is used. Full-Nest Egg Food contains no injurious drugs or chemicals; it is safe and easy to use.

"Victory" Lawn Mower

This machine has Ball Bearings of the very highest grade which reduce the friction astonishingly and render it possible to use much wider machines than heretofore.

Triple gear entirely enclosed, so that no dirt or cut grass can find its way into the pinions and clog them.

The adjustments are the simplest, most perfect, and most positive.

These mowers are high speeded and have a four bladed reel, which leaves the lawn with a very smooth and velvety surface.

"SPIDER" LAWN MOWER

WITH BALL BEARINGS

The Spider Mower is light and strong, and glides over the lawn lightly, easily and almost noiselessly; reminding you strongly, as it nips off the grass, of the vigorous action of the ferocious and cunning little insect whose name it bears. This machine has finely adjusted, high grade ball bearings, which greatly reduce the friction and render it possible to use much wider machines than heretofore with parallel bearings.

Has two pawls in each pinion, making the machine much more positive and durable. The reel is four bladed and high speeded, which leaves the lawn with a very smooth and velvety surface.

Send for descriptive catalogue and prices.

The Champion Self-Feed Drag Saw Machine

LEADS ALL OTHERS.

Capacity 20 to 40 Cords Per
Day with 2 to 4 Horses.

The Reason Why This Machine Will Please You

The operator can raise saw with one hand and throw self-feed in gear with the other, thus changing and setting for a new cut with no stopping of team or slowing of motion whatever. The self-feeding machine moves the log automatically along the carriage; while with an old style hand-feed machine the log must always be moved by hand. The main length of our log carriage is 12 feet, and the length which attaches on is 8 feet, making together a splendid length of carriage.

We furnish a Disston champion-tooth saw, which has been found to give the best results and is absolutely satisfactory. It is 5½ feet long, 7x5 inches. No. 10 gauge.

It is operated with any kind of power—Tread power, Water-power, Wind-mill or Steam-engine, and can be run by either a belt or tumbling-rod.

The main shaft is 1½-inch steel in No. 1 machine, and projects sufficiently outside or beyond the frame of the machine, and is at such a height above the ground, that it gives an abundance of room for the belt-wheel, which is 24x4 inches.

The Pitman Boxes are so arranged that they are easily adjusted to compensate for any wear that may occur. All boxes are babbitted and are durable.

The stroke of saw can be adjusted to either 16, 20 or 24 inches.

Twenty feet of Log Carriage, Trucks, Rollers, Dogs, etc., are always furnished with this outfit.

Cuts faster, runs easier, wears better than any other Drag Saw-machine ever made.

No. 1 Self-feed Drag Saw machine, including Log Carriage, Trucks, and all extras complete\$80.00 Weight 1,100 lbs.

No. 2 Self-feed Drag Saw machine, including Log Carriage, Trucks, and all extras complete\$90.00 Weight 1,200 lbs.

No. 1 Machine is recommended for all ordinary farm or timber work.

No. 2 Machine has extra heavy Shafts and Boxes, otherwise same as No. 1; is recommended where extra heavy work is required, or if machine is to be driven by steam-power.

THE WORCESTER BUCKEYE MOWER

New Standard Gear

Light draft, very simple in construction, and of extraordinary strength and durability. Send for descriptive catalogue and price list. We carry a complete line of repairs for the Worcester Buckeye Mower.

Bullard's Improved Hay Tedder

The Bullard Improved Hay Tedder having been submitted to the severest test of field work, is admitted to be the only one yet offered to the public that will thoroughly spread long, heavy grass, taking it up from the bottom, tossing it gently into the air, and leaving it light upon the ground for free access of sun and air.

Price on Application

WORCESTER HORSE RAKE

It is made from right principles, simple, strong, durable and reliable. Will rake the roughest places as well as smooth ground.

It is so easily managed that a boy can run it as well as a man.

Price on Application

NEW YORK CHAMPION HORSE RAKE

The New York Champion Rake
Has Many Imitators, But
No Equals

Why It Takes The Lead

It has our patent tooth to prevent scratching.

It has no springs to get out of order.

It produces no jar on the thills when dumping.

It is so easily managed that a boy who can drive a horse can use it as well as a strong man.

Every rake warranted. Write for prices.

Worcester Kemp Manure Spreader

It will evenly and thoroughly distribute all kinds of manure found upon the farm, from the roughest and toughest down to the finest, including ashes, lime and fertilizers, in all conditions, wet or dry, and the time required to spread a load is from one and one-half to two minutes, without manual labor.

It is regulated to put out different quantities to the acre. The farmer may know exactly how much manure he is using without the trouble of measuring his field and his manure pile. It can be accurately regulated to spread any number of bushels of ashes or lime to the acre.

Send for Descriptive Catalogue and Prices.

The Standard Manure Spreader

To be of value, manure must change to liquid form quickly. It must therefore be cut into fine pieces and distributed uniformly. A spreader which frequently throws out bunches and does not keep up to an even width, will not give the purchaser as full value and quick returns as he will obtain from the Standard.

This spreader is very durably built and simple in construction.

Send for Descriptive Circular and Prices.

EVANS' POTATO PLANTER

This is the most improved machine of its class on the market, being strictly up-to-date in every particular.

It is force-feed, is positive in its action, and will drop potatoes 10, 12, 14, 16, 18, 20, 28 and 36 inches apart.

The Fertilizer Attachment is a positive force-feed and any kind of fertilizer can be sown with it, at the rate of from 50 to 1,600 pounds to the acre.

Send for Descriptive Circular.

Price \$65.00

EUREKA POTATO PLANTER

Requires but one horse and one man to operate it. It is light, strong and durable. Weight with fertilizer, 280 lbs. It can easily be drawn by one horse. Its capacity for sowing fertilizer is from 150 to 1,200 lbs. per acre. It plants seed at any required distance. The operator can see every seed dropped. It is cheap in price, excellent in work. A plow in front of shoe is thrown in or out of the soil by a lever at will of operator. This not only opens a deep furrow, but clears the ground for the shoe and makes a looser seed bed. Send for Descriptive Circular and Prices.

The Standard Elevator Potato Harvester

This is without question the easiest draft Potato Digger on the market. It is also very strong and simple in construction.

Send for Descriptive Circular and Price.

The Standard Liquid Sprayer

This Sprayer sprays a perfect mist which completely covers all parts of the plants. It will cover thoroughly from six to eight rows, depending upon the mixture and width of row. There are no nozzles to stop up or clog, no pump or pipes to be affected by chemicals. Wheels are adjustable to different width rows.

Send for Descriptive Circular.

Price\$60.00.

PERFECTION SPRAYER

The most practical potato sprayer ever put on the market; it can be attached to any wagon, is very simple in construction and durable, nothing about it to get out of order.

This sprayer was got up to meet the demand for a practical and efficient sprayer at a low price.

This sprayer can be readily adjusted to rows any width apart, the liquid is conducted from the pump by two lines of rubber hose, making the pressure on the nozzles uniform, thereby insuring a perfect spray from all of the nozzles at once.

In a great many of the sprayers that are put on the market, the liquid is conducted to the spray nozzle through iron pipe, the action of the Bordeaux Mixture on this pipe soon corrodes it causing the pipe to clog and become unfit for use.

The pump is of large size, strongly constructed, and very powerful, it is also very easy working, one man can easily drive the team and work the pump.

This sprayer is always ready to do the work when wanted, it has no complicated parts to get out of order. It is sure, effective and cheap, and is so simple in construction that a child can understand it.

The pump has a dasher agitator which keeps the liquid thoroughly mixed, and is fitted to attach to the head of any oil or kerosene barrel, no extra charge made for fitting to side of barrel, if so ordered.

Every sprayer guaranteed to give perfect satisfaction. We do not furnish barrel with sprayer as they can be obtained nearer home at quite a saving in freight charges.

PRICES

Perfection Two Row Sprayer, \$13.00

Perfection Four Row Sprayer, \$16.00

RACINE BROADCAST SEEDER

It will sow perfectly any quantity to the acre of all kinds of Grain, Wheat, Oats, Barley, Rye, Buckwheat, etc., or Grass Seeds, Clover, Millet, Timothy, Hungarian, etc. It will also sow Flax Seed, Hemp Seed, Peas, Corn and Fertilizers, in fact, anything which requires broadcasting, in a most satisfactory manner. It is the latest Wagon End Seeder on the market and superior to all others. It is heavier and stronger than any other seeder in use.

Price \$9.00

Send for Descriptive Circular.

THE "KING OF THE CORNFIELD"

**Corn Planter and Fertilizer
Distributor**

**Superior to all for Planting Field, Ensilage and
Fodder Corn, Broom Corn, Beans,
Peas, Beets and Other Seeds
of Like Size.**

This Planter is perfectly adapted to every requirement; durable and simple in construction; not liable to get out of order, in consequence of its having no gears, chains or other complicated parts to break or wear out. Anyone can at once understand and manage it. An important feature in this planter is that none of the working parts, except the Drive Wheel, are in motion only at the instant the seed and fertilizer is dropped in the hill, then it remains still until the next hill is reached. Corn planted by this machine germinates much quicker and comes up much more uniformly than if planted by hand.

Circulars and Price List mailed on application.

ECLIPSE CORN PLANTER AND FERTILIZER DISTRIBUTER

Plants Corn, Beans, Peas or Beet Seeds, in hills, drills or checks.

Circulars and Price List mailed on application.

Pierce's Improved Cahoon's Patent Broadcast Seed Sower

For sowing Wheat, Barley, Oats, Buckwheat, Rye, Grass Seed, etc. Sows from four to eight acres per hour, at a common walking gait, throwing out wheat about forty feet wide.

A person entirely unused to sowing by hand can use this machine with perfect success.

Price, 10 cents.

Noyes' Hand Weeder

Steel blade. Price, 25 cents.

Haseltine Patent Hand Weeder and Scraper

Price, 25 cents.

Standard Steel Frame Weeder

This weeder is well made, strong and durable. It has a set of runners, not shown in cut, which regulate the depth of cultivation. When the weeder is used on soft ground, and shallow cultivation is desired, the runners may be set so as to cultivate at the depth desired. They are also very useful in transporting the weeder to and from the field and from one field to another.

Price \$8.00

Narrowed to 30 inches

"The Keystone" Weeder

Can be expanded to 7½ feet and narrowed to 30 inches.

Expanded to 7 1-2 feet

The "KEYSTONE" is the only Weeder that is adjustable to any depth and width. It can be used as a shallow cultivator—working close to the plants between the rows until the crops mature—long after other weeders are laid aside.

It has no shafts that will hinder working close to the fence.
IT WILL NOT CLOG—The long, curved, spring teeth are so placed and shaped that clogging is impossible.

It is V shaped, which not only makes it a stronger tool than the straight framed weeders, but adapts itself much better to uneven surface.

Price \$9.00

Fuller's Unique Wheel Hoe No 2

For closely planted crops, as Beets, Carrots, Onions, etc., this hoe is without an equal and can be used the entire season. Having only one wheel it runs between the rows without bruising the tops, and having no frame work it does not tear the growing plants on either side. The great feature of this hoe above all others is that it can be easily and quickly adjusted to any height or pitch desired by means of thumb nuts. The entire hoe weighs less than ten pounds and yet is a most practical tool.

Price \$2.50

Fuller's Unique Wheel Hoe No 1

For cutting over yards or avenues, walks and driveways in cemeteries and parks Fuller's Unique Wheel Hoe No. 1 stands far ahead of all other tools. It is light, strong and durable and does most satisfactory work where other hoes have failed. The steel blades are exceptionally hard and heavy so as to give little wear and great resistance. Being easily adjusted to any height or pitch, the long tedious work of the hand hoe is superseded by ease and facility.

Price \$2.50

Fuller's Daisy Scuffle Hoe No. 4

This scuffle hoe is far in advance of the common scuffle hoes on the market, in that it cuts both ways having both edges of the knife sharpened and the start pitched so that it cuts equally with a draw motion toward the operator as with a push from the one using the tool. The handles are of ash six feet long. Those who have used it like it very much for hoeing over small yards and short walks, for hoeing between rows of closely planted crops, where a quick stirring of the top soil is desired. It can be used wherever a scuffle hoe is commonly used, with much better results.

Matthews' New Universal Gem Seed Drill, No. 18

- This has been perfected to meet the demand for a low price drill. It has all the essential qualities of the larger and more expensive drills, the Seed Dial and Indicator being made from exactly the same patterns.

Price \$5.75

Matthews' New Universal Garden Drill, No. 17

NONE BETTER CAN BE PRODUCED
Medals and testimonials confirming its superiority over all other Drills have been repeatedly bestowed upon it from all quarters, and as it has been improved from time to time, it is now everywhere acknowledged to be THE MOST PERFECT DRILL MADE. It has been many years in use and its still increasing sale is the best evidence of its merits.

Price \$7.25

Matthews' New Universal "Hill and Drill" Seeder, No. 16

This Seeder is the same as the Garden Drill with the exception that it has pins in the wheel, which serve as a means for securing the various dropping distances of 4, 6, 8, 12, 16, 24 and 48 inches apart, as well as for sowing continuously in drills.

Price \$8.00.

Matthews' New Universal Constellation Drill No. 19

With Hoe, Cultivator, Plow and Rake Attachments.

This is the same as the Garden Drill, with cultivating attachments. It can be used either as a Double Wheel or Single Wheel machine and change can be readily made. We do not particularly recommend a two-wheel seed sower, as the nicer work may be accomplished by a one wheel machine. The two wheels are desirable, however, when used as a cultivator or wheel hoe, as in this way the rows of young plants may be straddled and the cultivating done on both sides of the rows at one passing.

Price \$9.50

New Universal Double Wheel Hoe Cultivator, Plow and Rake, No. 14.

Specially Designed for Working Both Sides of the Row at One Passing.

This new hand implement embraces all the good points of older efforts in the same line, and in addition offers new features which can not fail of appreciation. The special recommendation is the ADJUSTABLE ARCH, by which not only the depth of work can be gauged, but which, by an ingenious device, enables the teeth to be pitched at any angle desired.

There are nine adjustments of depth. The attachments are: 1 pair Hoes, 4 Cultivator Teeth, 1 pair Plows, 1 pair Rakes and 1 pair Vine or Leaf Guards. Price, \$6.00.

Price, with hoeing blades, only \$3.75.

Send for Descriptive Catalogue of the Universal Garden Tools.

Syracuse Steel Frame Cultivator

Syracuse Spike Tooth Cultivator

Especially adapted to pulverize the soil and
leave it smooth and level. The teeth are re-
versible and the pitch can be quickly changed
forward or back by simply loosening one bolt
at each tooth.

- No. 114.—Expanding lever, fourteen
Spike Teeth and Wheel...\$5.25

No. 114

Standard Pivot Axle Riding Cultivator

The greatest labor-saving device ever offered in the line of cultivation, adapted for all kinds of farmers in cultivating all kinds of crops, on hillside or plain,—in fact, to practically universal use. Pivot wheels—Gang Adjusting Lever, Strong Steel Wheels, and, although it is light and simple in construction, it is very strong, and possesses many advantages not contained in far more complicated tools. Quality of material and finish is the very best.

Send for Descriptive Catalogue and Prices.

Hussey's "New Model Centennial" Lever Cultivator

Our New Lever Expander

Is simple, strong and easy to operate. Has no "Dead Centers," and no Loose Joints. Adds stiffness to the entire frame.

Price, with expanding lever.....\$7.00

Standard Steel Frame Spring Tooth Cultivator

A very strong and durable Cultivator, especially adapted for rough, stony ground.

Price, with expanding lever and five teeth \$5.00

Syracuse Steel Frame Spring Tooth Cultivator

This series of Cultivators is especially adapted for use in stony ground. The frames are steel, strong and well put together throughout. The castings are malleable. The teeth are fine oil tempered springs and are alike and interchangeable; they are also adjustable for angle and depth.

Price, with expanding lever and five teeth \$6.00

Syracuse Reversible Sulky Plow

Does perfect work on hillside or level land. No ridges or dead furrows. Light and strong. Simple and practical.

Two perfect Combination Plows on separate Steel Beams, operated by separate levers.

A power lift of simple design and easily handled, enabling any boy competent to handle horses, capable of running the plow.

Steel wheels running on steel axle.

With each Sulky is furnished Neck Yoke and Two-Horse Whiffletrees, Wrench and Oil Can. Descriptive Catalogue and Price mailed on application.

eral purpose plow.

Send for Descriptive Catalogue and Prices.

Syracuse Contractor's Plow

Steel truss beam. Steel mouldboard and
landside. Separate shin piece. Heavy over-
laid wrought steel point. Adjustable shoe in
place of wheel. Loop handle wear irons.
Very strongly built. Slight turning capacity.
Suitable for severe grading purposes in shale
or hard pan.

No. 99. Four to eight-horse. Weight with shoe, 265 lbs. Send for Prices.

Wood Beam Wing Shovel Plow

Blades and wings of steel. Wings
adjustable to throw more or less earth.
Especially adapted for hilling potatoes
and other light work.

Price, without wheel\$3.00

Price, with wheel\$3.25

The "Improved Bangor" Potato Hoe

This hoe is especially adapted as a potato,
corn or celery hiller, or as a coverer. Wings
are polished steel, are adjustable to tilt up or
down on the standards, and the desired dis-
tance apart by moving standards in or out
upon the cross bar. Our hoe for 1907 has
some valuable improvements, the cross bar is
strengthened with iron braces, which connect
it with the pole making a strong and durable
frame.

PRICE \$7.00

The Oliver Reversible Sulky Plow

**A Highly, Practical, Convenient and very Simple
Tool, Specially Adapted to Side Hills and
Irregular Shaped Lands, but Equally
Useful in any Kind of Plowing**

This implement* consists of a pair of right and left-hand plows, mounted in a heavy steel frame, each plow having a separate bail. While one plow is in operation the other is hung up out of the way, high enough to escape all trash.

**This Plow Is Without Question the STRONGEST
REVERSIBLE SULKY PLOW on the Market**

Write for Descriptive Catalogue and Prices.

The Yankee Pulverizer

A superior Disc Harrow, combining all the late improvements.

Send for Descriptive Catalogue
and Prices.

The Morgan Spading Harrow

The Morgan Spading Harrow is an "all around general purpose Harrow" and is adapted to all soils and conditions of soils. While not particularly attractive or handsome in appearance, a trial will convince any farmer that it will do the work. As a pulverizer, it is unequalled, and especially on broken or uneven surfaces, among stones, in sod or heavy clay. It has more cutting surfaces than any pulverizer in the market. The high arched frame allows it to pass over obstructions easily. The blades are S-shaped and ground sharp on the cutting edges and overlap; they cut into and lift the soil to a depth of 4 to 6 inches, turning and pulverizing the ground precisely like the hand spade. The gangs which float

freely can be adjusted to any desired angle by the hand levers. The cleaners are stationary and clean the blades, no matter what the condition of the soil.

Send for Descriptive Circular and Prices.

Old Original Perry Harrow

The Wood Frame Perry Harrow is the most durable of the spring tooth harrows. Is simplicity itself. Iron plated on the under side and in front, the entire length. Teeth cannot get loose. No levers or joints to wear and get out of repair. Harrows of this kind have been in constant use for fifteen years.

PRICES

14-Tooth, \$10.00; 16-Tooth, \$10.00; 18-Tooth, \$11.00.

Aberdeen Spring Tooth Lever Harrow

Made entirely of steel and malleable iron; teeth set to any required depth. Tooth bars round and well elevated to prevent clogging.

PRICES

15-Tooth\$16.00

17-Tooth\$17.00

Syracuse Spring Tooth Lever Harrow

This style of Harrow has an advantage over the ordinary float harrow in that the depth of work can be quickly changed even while the harrow is in motion, and by operating the levers a uniform depth can be maintained in soils of variable hardness. The Harrow will clog less and clear easier than any other harrow on the market.

17-Tooth Harrow\$17.00

15-Tooth Harrow\$16.00

Syracuse 1-Horse Spring Tooth Harrow

Frame of steel similar to two-horse Harrow and is the best one-horse Harrow in the market.

Ten Tooth With Lever

Price \$9.00

REVERSIBLE SMOOTHING HARROW

The teeth are reversible, namely by the draw bar being attached to one end of the harrow, they are slanting, as shown in cut, while if attached to the other end they are vertical, same as the ordinary harrow. With the teeth slanting, it is a smoothing harrow. This is not only a smoothing Harrow, but a Pulverizer, a Leveler, a broadcast Weeder and Seed Coverer. It is made in sections of twenty-four teeth each. Two, three or four sections may be, but usually three are used.

Two Section Peerless Smoothing Harrow, weight 135 lbs.....\$10.00
Three Section Peerless Smoothing Harrow, weight 200 lbs.....\$14.50

The "Hartman" Steel Tree Guard

Ornamental, Strong, Durable and Cheap

Made of heavy Steel Rods, Galvanized. The guards are light and graceful in appearance, making an ornament to the grounds; will not conceal the foliage nor shade the tree from the sun; will not harbor insects, and will allow cultivation of the ground. They take but a moment to erect and are easily moved from place to place.

The Spiral Wire Coils for attaching this guard to the tree are elastic and freely expand with the growth of the trunk, and also prevent any friction or chafing of the tree against the guard during storms or high winds.

WHAT HOLDS YOUR MILK AND WATER and the other liquids?

Why not use vessels made of a material that is light enough to be easily portable and yet strong enough to stand any ordinary use and a great deal of misuse?

INDURATED FIBRE WARE is strong, and yet light.

It will not taint milk or other liquids no matter what the climate or temperature—the change or condition.

This is the only material that combines the valuable qualities of not watersoaking, swelling, shrinking, or leaking; it is absolutely impervious to moisture.

No hoops—no joints—no seams.

Pressed out of a solid mass of wood pulp and then thoroughly hardened to wear.

Always clean, sweet and dry, and, best of all—it is cheap.

Let us fill a small trial order; you will never use anything else once you see it.

Hammock Chairs

Made of hardwood, finished natural color and nicely varnished. Covered with fancy striped duck. Will fold to less than two inches in thickness, and weighs but eight pounds. Easily adjusted to any position desired.

Price \$1.00

Lawn Settees

Made of hard wood nicely painted and varnished. Can be folded up.

Price \$1.00.

Clough's Adjustable Sieve

In offering this adjustable Sieve to farmers and others, we know that they will find it useful and valuable for separating foul seed from grain, and sifting out the small grains, thereby getting the most vigorous kernels for seed; also for cleaning and sorting peas, beans, etc.

Price \$1.75

Polar Hardwood Refrigerators

These illustrations show our Hardwood "Polar" Refrigerators

Note the general style and beauty, and observe the artistic carvings. No wood is exposed in the interior of these Refrigerators, a strong metallic lining covering every part of the inside thoroughly. They are built with heavy air tight walls, thoroughly insulated. They have swing base boards which facilitates the placing of the drip pan and makes sweeping easy. They are trimmed with strong, handsome locks and hinges, and are a high grade and first-class refrigerator in every particular.

Butter and Grocers' Refrigerator

This is a refrigerator especially adapted for retail butter dealers and grocers. It is fitted with an automatic shelf which when pulled out closes the opening. Fitted with six massive doors trimmed with solid brass hinges and levers, nickel plated. Ice chamber doors fitted with French bevelled mirror plates, middle provision chamber doors fitted with clear double glass panels so that the contents of the refrigerator may be seen. Send for prices.

Improved White Mountain Freezer

This is universally the favorite family Ice Cream Freezer, because it combines more excellencies than all the other family freezers made. It is the only freezer made with a duplex dasher and double self-adjusting scrapers, which, by keeping every particle of cream in constant motion, causes it to freeze faster and more evenly than can possibly be accomplished by any other freezer.

CHAMPION MILK COOLER AND AERATOR

This is a perfect Aerator, removing flavors arising from excessive cabbage, turnip or silo rations.

It is a complete Deodorizer, removing the animal heat or covey taste and all odors arising from the absorption by the milk of stable or other unpleasant gases.

It is a thorough Cooler, reducing the temperature of the milk in one minute nearly to the temperature of the cooling medium.

It is equally well adapted to the use of any cooling medium, either running water, or ice water.

Every farmer or milkman handling milk cannot afford to be without one.

Buckley's Patent Watering Device

FOR WATERING STOCK IN STABLES

Water in the stable is a necessity for the proper caring of the stock; it should be of suitable temperature, and the stock should have constant access to it.

This is the most practical and economical device for watering cattle in the stable. The iron basins can be kept clean much easier than any form of wooden troughs and there is nothing to wear or rot out.

The check valve at the bottom of each basin prevents clogging of pipes because no hay, meal or other substances can be drawn into them. It also greatly prevents the spread of contagious disease, as the supply of each basin is drawn directly from the main reservoir.

Water from a spring or reservoir is piped into a small tank, and the level of water in the basins is controlled automatically by a float valve or an overflow in this tank.

PRICE.

Stanchion Basin, with brass valve seat and aluminum valve\$1.50 each

New England Root and Vegetable Cutter

This machine is made with a wrought shaft with sections of knives fastened to it and arranged so that a rotation of knives are continually passing a bed knife with cross knives passing between the section of knives; cutting always near the center shaft, making it cut easy and fine enough for cattle or sheep; also making a very regular cut. It will cut one bushel of roots per minute.

Price, \$6.00

BOILER AND FEED COOKER

This feed cooker is so constructed as to get the best possible results from a small amount of fuel. The kettle is of very smooth cast iron, and can be removed from the casing instantly.

The casing or jacket is cold rolled steel.

PREPARED LIME

This Lime is specially prepared for use in making Bordeaux Mixture and is being extensively used for that purpose.

Much better results may be obtained from the use of this lime than from the ordinary lime, from the fact that no further slacking or screening is necessary, hence clogging of the sprayer is overcome by its use.

The following has been found to be the most satisfactory formula for making Bordeaux Mixture: Six pounds prepared lime, five pounds copper sulphate and fifty gallons of water.

Prepared Lime is in a powdered form and put up in one hundred pound bags.

Price, per pound 2 cents.

Price, per 100 pound bag \$1.00.

Lion Brand Bordeaux Mixture

This mixture is a scientific preparation and combined in a manner heretofore unknown, thus enabling the manufacturer to place it on the market in a practical and usable shape, as by simply adding water and stirring, it is ready for use.

One gallon will make 50 gallons by the addition of 49 gallons of water. Actual cost to you when ready for use 2 cents per gallon.

It Prevents Potato Rot, Potato Blight, Downy Mildew and Anthracnose of

Grape, Peach, Pear and Cherry Blight, Etc.

1 Gallon Can, \$1.00.

1 Quart Can. 40 Cents.

WHALE OIL SOAP

Makes an excellent wash for Trees, Rose Bushes and Plants; destroys Insects and their eggs.

Price Per Pound, 15 Cents.

BUG DEATH

Pat. March 16 and Nov. 9, 1897.
Pat. in Canada Nov. 2, 1897.

No other agent can do this. Bug Death must be the reliance of the fruit grower, who by spraying seeks after perfect fruit.

Bug Death costs you nothing. The increased yield and improved quality more than pays the expense. A perfectly sure, safe and effective insecticide.

Bug Death kills the potato, squash and cucumber bug, currant and tomato worm, also other plant and vine eating pests.

This Insecticide and Plant Food Combined has been on the market for nine years and its sales have shown a large increase each year. We can say to our customers that we give Bug Death our fullest endorsement. While the first cost to kill the bugs on an acre of potatoes is rather more than the arsenical insecticides, the results at harvesting time are entirely satisfactory, and where practical tests have been made, the extra yield of marketable potatoes has more than paid the entire expense. It is **non-poisonous**, which makes it perfectly safe to use on all plants or vines.

Very Beneficial Results are obtained by using Bordeaux Mixture in connection with Bug Death, and they can be mixed and sprayed on the vines at the same time, with any of the spraying machines on the market for that purpose. **Bug Death prevents blight.**

Use Bug Death for your fruit trees. It kills the insect pests, protects the trees, promotes their vigorous growth, gives freedom to the bees, and insures quality and quantity of fruit.

Directions for Spraying One Acre of Potatoes with Bug Death

Fill a pail or bucket, holding about 12 quarts, half full of water. Stir 15 to 25 lbs. Bug Death into this water (the larger amount will pay best). Fill sprayer tank nearly full with clear water (not too cold), then pour Bug Death from bucket into tank and start machine at once, being sure that agitator is working properly.

Directions for Spraying One Acre of Potatoes with Bug Death and Bordeaux Mixture

Dissolve 6 lbs. copper sulphate (blue vitriol) in 6 gallons of water. Slack 6 lbs. lump lime, slowly adding water as it slacks, being careful not to burn the lime. When thoroughly slacked, strain it through about a No. 50 wire strainer to remove any lumps before it goes into sprayer. When ready to spray, fill tank two-thirds full of clear water (not too cold) and add the 6 gallons blue vitriol water. Next put in 15 to 25 lbs. Bug Death (first mix Bug Death in pail of water, same as under directions for using Bug Death alone). Fill tank almost full of clear water; lastly put in the lime water. Stir well with a stick and start machine at once, being sure that agitator is working properly. Bug Death kills all insects and being very adhesive holds the mixture on to the vines throughout the season, and can be applied in damp weather as rain will not wash it off.

The above solution, if properly applied, will positively prevent blight on potatoes, tomatoes, etc.

IF USED DRY

Apply with Dickey Bug Death Duster or a cloth bag of right mesh; 12½ to 25 lbs. per acre per application. The more freely used the better the plant will thrive. Dust plant evenly and thoroughly. Cloth bag mailed free on application.

ENGLISH BUG COMPOUND

A BUG KILLING WONDER

A safe, sure and cheap insecticide for destroying the pests, which attack Potato Vines, Cabbages, Squash, Cucumber, Melons, Tobacco, Currant, Rose Bushes (Chafer), Pear, Cherry, Plum, or Quince Slug, Grapevine, Flea Beetle, Raspberry, Gooseberry, Small Sarubs, or for killing any coleopterous Bug whatever.

English Bug Compound kills every coleopterous insect known. It is a combination of chemical poison and fertilizers, mechanically incorporated in a manner that prevents loss of strength by evaporation or by age. It is a dark, gray colored, flour fine powder, and its application to the afflicted plant, kills the bugs at once and promotes the growth when the insects are destroyed.

It is an established fact that a Paris Green water mixture produces a lifeless, soggy potato; while the use of English Bug Compound (at a great ultimate saving) brings forth a healthy, hardy, nutritious vegetable. The smallest grain acts as a deadly poison to the bugs and is food and drink to the vine. The extreme fineness allows a most thorough distribution and the smallest quantity will spread itself over a large space.

Send for circular showing testimonials from some of the prominent farmers who have used English Bug Compound. We sold a carload of these goods last year and found them very satisfactory. English Bug Compound does not burn or injure the vines, and is sure death to the bugs.

Price, 4c per pound

KNOX=EM=ALL

FLY OIL. THE BEST THING ON THE MARKET

For ridding Horses and Cattle of flies and all insect pests. And Poultry of lice and mites. Gad flies will not work on Sheep and they will not have Grub in the head. Inoffensive and harmless to persons and stock. Deadly to flies and lice. One hundred per cent. more lasting in effect than other kinds.

Contains no fish oil or other objectionable ingredient. Can be used freely on Cows' Bags without inconvenience to milker or injury to the milk.

Cows give more milk and pay \$8 to \$10 per head more during the season at a cost of about 50 cents per cow. It can be used on horses without gumming or otherwise injuring the hair, and affords instant relief, making them thrive and drive better.

Directions:—For flies apply freely with a good sprayer. For lice spray the roösts, nests, and all places where vermin find lodgment, including the poultry when on the roösts.

Per 1,000.....	\$5.25.

Brood Frames. Thick-Top Frames

As thick-top frames practically prevent the building of burr combs, frames with a thick top bar are almost universally used. This frame has a top bar $\frac{7}{8}$ -inch thick including the comb guide, which is moulded out solid from a piece $\frac{7}{8}$ -inch thick. This leaves the top bar $\frac{3}{8}$ -inch thick on the side. The width of top bars is $1\frac{1}{8}$ inches. The end bars are $1 \times \frac{1}{4}$ -inch. The bottom bar is $\frac{1}{4} \times \frac{3}{4}$ -inch. The projections on top bar are narrowed to $\frac{3}{4}$ -inch in width to allow more room for taking hold of frame.

Prices not set up

Per lot of 10.....\$.35.

Per lot of 100\$3.00.

COMB FOUNDATION

This foundation is made from the best grade of pure beeswax and before being made into foundation is entirely cleansed of all foreign substances.

Prices

Standard Brood..60c per lb. Light Section..68c per lb.

If foundation is wanted by mail, add 25 cents per pound for postage.

BEE KEEPERS' SUPPLIES

FIVE BAR BEE VEIL

Has five cross bars riveted through the center at the top. These button to studs on the neckband. The bars are light spring steel, the neckband is of hard spring brass and the cover is of handsome, light material. It is very easily put together—no trouble to put on or take off. It protects against mosquitoes, flies, bees, gnats, etc. The veil weighs only five ounces. Price, \$1.00.

Parker's Machine for Fastening Starters in Section Boxes

Fasten machine to table with screws that are sent with it. Dampen the under side of point of lever with honey or water to prevent its sticking to the foundation. Place section in position with strip of foundation just under the end of lever; press lever down on foundation by lifting handle, turn foundation up against end of lever and slide lever off of foundation by lifting on handle and drawing it backward, which fastens the foundation to section.

Price for $4\frac{1}{4} \times 4\frac{1}{4}$ section...30 cents.

By mail45 cents.

PAGE FEEDER

One of the best feeders for feeding over the brood nest. It is made from a solid block of wood and is covered with wire cloth. It has a bee space under bottom and also at top between wire cloth and top of partitions. Bees cannot escape while feeder is being filled. A small hole cut in mat and feeder set over same will be found a convenient way of using it, but it can be used in many ways.

Each nailed up complete, 40c; by mail, 65c.

Corneil Smoker

Price, 90c each. By mail, \$1.15 each.

We also carry the Cleated Separators or Fences for the $4\frac{1}{4} \times 4\frac{1}{4} \times 1\frac{1}{2}$ -inch plain section boxes and for the $3\frac{3}{8} \times 5 \times 1\frac{1}{2}$ -inch plain section boxes.
