Annual Catalogue

1908

We take pleasure in presenting to our patrons and friends our catalogue for 1908.

We offer our seeds with the full assurance that they are true and reliable, quality being always our first consideration, but at the same time we wish it particularly understood that we do not warrant them, for the ultimate success of a crop is dependent on so many contingencies that we cannot hold ourselves liable or responsible for failure. If the purchaser does not accept the seeds on these conditions, they must be returned at once.

In ordering goods please give your Name, Post Office and State in full, being particular to write your name very distinctly.

Remittances can be made by Post Office Money Orders, Bank Drafts, Express Orders or cash sent in registered letter.

Orders from unknown correspondents must be accompanied by a remittance or a satisfactory reference.

When ordering seeds by Mail postage must always be added at the rate of *eight cents per pound*, in quantities of one-fourth pound and upwards. Seeds by packet and ounce will be mailed without extra charge.

In shipping we make no charge for delivery to railroads or express companies.

We are thankful for the generous patronage heretofore given and intend to continue to merit the same by exercising the utmost care and fidelity in promoting the interests of our customers.

R. B. DUNNING & CO.

LIBERAL REDUCTION TO CLUBS

Liberal reductions will be made to persons selecting packet seeds from our Catalogue, at the prices named, and will be forwarded, postage free, to any part of the United States.

Purchasers remitting \$1.00 may select seeds in packets, at	Catalogue prices amounting to \$1.25
" " 2.00 " " " " " "	2.50
" " 3.00 " " " " " "	4.00
" " 4.00 " " " " " "	5.50
" " 5.00 " " " " " "	7.00

This reduction is for *packet seeds only*. Seeds when ordered by the *ounce, pound or quart* will not be included.

Novelties and Specialties for 1908

Early Dew Drop Potatoes

good, very much above the average. They are very fine grained, white as flour and of splendid flavor. They are excellent keepers and retain their good eating qualities till late in the spring, which some of the early varieties do not. The vines grow tall, stand erect and are of vigorous growth.

Price, 40 cts. per peck; \$1.25 per bush.; \$3.25 per bbl.

Perfection Early Blood Turnip Beet

This beet we are putting on the market after a number of years of careful selection.

It is very early with exceedingly small tops, roots globular and very smooth, flesh of a bright blood red color, very crisp, tender and sweet. It is equally good for the market or home garden as it is an excellent keeper as well as being very early.

Per pkt., 5 cts. Per oz.,
10 cts. Per $\frac{1}{4}$ lb., 25 cts.
Per lb., 75c.

Early Golden Bantam Sweet Corn

Extremely Early. Delicious in Flavor.

This corn has a medium-sized ear of a bright golden color. It is extremely sweet, of delicious flavor and unusually tender.

The stalks grow about five feet high, and are very vigorous, bearing two to three well-filled ears on each stalk.

It is fully as early as the Cory and of far superior quality.

Golden Bantam Sweet Corn

Price, per pkt., 5 cts. Pint, 15 cts.
Quart, 25 cts. Peck, \$1.25.

If corn is ordered sent by mail, add 5c per pint and 10c per quart for postage.

Admiral Dewey Pea

A new variety, and is, without exception, the largest podded and best yielding pea yet introduced. The pods sometimes measure six inches and are very plump and well filled with eleven to twelve very tender large peas of excellent flavor.

The two pods shown in the accompanying cut were grown in our trial grounds this season, the larger one measuring six inches and contained twelve exceptionally large peas.

The foliage, vine and pod are of a dark, rich green, and are remarkably vigorous and healthy; height about three and one-half feet.

Prices: Pint, 15 cts. Quart, 25 cts.
Peck, \$1.75. Bushel, \$6.50.

If peas are ordered to go by mail, add 8c per pint and 15c per quart for postage.

Dark Podded Telephone Pea

This new variety is a great improvement on the Carter's Telephone, both for purity and uniformity, showing no tendency to small late pods. It grows to a height of about four feet with a strong healthy vine, bearing extremely large dark green pods, which contain large peas of the very finest quality.

For fancy market garden trade, it has no equal as it is not only very attractive in appearance, but of the finest quality.

Pint, 15 cts. Quart, 25 cts.
Peck, \$1.75. Bush., \$6.50.

If peas are ordered sent by mail, add 8c per pint and 15c per quart for postage.

Dark Podded Telephone Peas

Vick's Early Scarlet Globe Radish

This is a slightly olive-shaped variety of a rich, bright scarlet color, with white tender flesh. It is fit to pull as early as any known variety and is especially recommended to market gardeners whose market demands a large first early forcing variety.

Pkt., 5 cts.; oz., 15 cts.; $\frac{1}{4}$ lb., 40 cts.; lb., \$1.25.

Gradus or Prosperity Pea

Gradus Peas

Sparks' Earliana Tomato

A New Variety and the Earliest Large Tomato Yet Introduced.

It is of handsome shape and beautiful red color. The flesh is very firm and solid and of excellent quality. A good cropper, making it one of the best for the market and home garden.

Pkt., 10 cts; oz., 35 cts.; 2-oz., 60 cts.;
1/4-lb., \$1.00.

This is a New, Very Large, Extra Early Variety of Wrinkled Pea

The most desirable sort for the home and market garden, large podded and of splendid quality.

The vines grow about three feet high and are vigorous and hardy. The immense pods are as large as those of the Telephone, uniformly well shaped and handsome, and more attractive than those of other extra early varieties.

They ripen slowly and continue fit for use much longer than most varieties, making this by far the most desirable sort for the home garden. The peas are very large, of splendid quality and beautiful color, which they retain after cooking.

Pint, 20 cts. Quart, 30 cts. Peck, \$2.00. Bush., \$7.50.

If Peas are ordered sent by mail, add 8c per pint, and 15c per quart for postage.

Selected Northern Grown Vegetable Seeds

Seeds sent by mail or express as the purchaser may wish. When ordering to be sent by mail, add postage for **Beans and Peas** at the rate of 15 cents per quart, and to **Corn**, 10 cents per quart; to catalogue prices.

Bulk seeds by the pound, if ordered sent by mail add 8 cents per pound for postage.

Seeds in packets and ounces sent by mail free.

ARTICHOKE--Jerusalem

From four to five bushels will seed an acre; they should be cut the same as potatoes, one eye on a piece being sufficient, planted in May, in rows three feet apart and about eighteen inches in the rows, and covered about two inches deep.

They are the best hog food known, and are attracting much attention on account of their great fattening properties, and for milch cows, they excel any root grown for increasing the flow of milk, and make it much richer.

An acre will keep from 20 to 30 hogs during the fall and winter months.

They are well adapted to any soil where corn or potatoes can be grown.

Jerusalem Artichoke. Tubers, per quart, 25 cents; per peck, \$1.00; per bushel, \$3.00.

ASPARAGUS

This is one of the first and finest spring relishes which comes to the table from the garden, and it really requires very little trouble in cultivation, since a bed once properly made and planted will last for years. The soil for the bed can hardly be made too rich, and the fertilizer should be well trenched-in to the depth of 2 feet or more. The roots should be planted as early in spring as the ground can be prepared, setting them a foot apart in rows 3 or 4 feet apart, with the crowns from 4 to 6 inches below the surface of the bed. Asparagus seeds may be sown directly in the permanent bed and the plants thinned as they grow; or it may be sown elsewhere, and the seedlings transplanted the second year. An ounce of seed will sow 50 feet of drill, and produce about 300 plants. Fair crops may be expected the third year.

Colossal. Widely cultivated; very large, deep green; tender stalks of good flavor; the roots are vigorous and productive...

Pkt.	Oz.	¼ lb.
5	.10	.20

BEANS—Dwarf or Bush **Improved Golden Wax Beans**

One quart is sufficient for one hundred feet of drill; two bushels for one acre in drills.

A succession of sowings can be made from the first week in May until July. Plant in drills about two inches deep, and from eighteen inches to two feet apart, according to the richness of the soil; the poorer the soil the closer they can be planted; the plants should be about three inches apart.

Beans ordered sent by mail are subject to an extra charge of 15 cents per quart and eight cents per pint for postage. Pints furnished at quart rates.

	Qt.	Pk.	Bu.
Burpee's Stringless Pod Bush Beans. The only stringless green pod bush bean in cultivation, consequently it surpasses all others in crisp, tender flavor. All are absolutely stringless, and of a beautiful fleshy appearance. It is very early and very prolific.....	.20	1.50	5.50
Dwarf Horticultural. A fine early shell bean.....	.20	1.50	5.00
Currie's Rust Proof. Straight, yellow, stringless pod. Unsurpassed for quality.....	.20	1.50	5.50
Improved Golden Wax. An improvement on the old Golden Wax. The pod is somewhat round, meaty and entirely rust proof.....	.20	1.50	5.75
Davis Kidney Wax. This plant is a vigorous grower, carrying the pods well up from the ground. In productiveness it is astonishing, as it will produce at least one-third more bushels of pods to the acre than any other Wax Bean. The pods are long, straight, oval, of clear waxy white color, and handsome, often growing to a length of seven to eight inches, and when fit for use, are quite stringless and of fine flavor	.20	1.50	5.50
Wardwell's Kidney Wax. Early; vine medium, erect, hardy, productive. Pods long, broad, flat, brittle and of a delicate waxy-yellow. Very attractive market sort. Beans large, kidney-shaped, white and dark markings about the eye. First-class snap bean, and a good one for winter... ..	.20	1.50	5.50
Early Mohawk. Very early, hardy and productive. Large flat, dark green pods, five to six inches in length.....	.20	1.50	5.00
Low's Champion. One of the best for either snap or shell beans. Very productive; large, green, flat pods.....	.20	1.50	5.50
Refugee Wax. Long, round yellow wax pods, very productive, and not inclined to rust.....	.20	1.50	5.00
Long Yellow Six Weeks. Hardy and prolific, an excellent early string bean.....	.20	1.50	5.00
Yellow Eye. (Old Fashioned). Very productive; not as large as the improved, but of better quality for baking... ..	.20	1.25	4.50
Improved Yellow Eye. Very prolific; fine for baking.....	.20	1.15	4.00
Improved White Pea. Excellent for baking.....	.20	1.15	4.00

Early Pearl Pea Beans. This is a small, round, pure white variety; very early and very prolific; and of excellent quality for baking. Last season these beans matured and were thoroughly ripe in eleven weeks from planting.

Qt.	Pk.	Bu.
.25	1.50	5.00

BEANS—Pole or Running

One quart will plant one hundred hills, ten to twelve quarts to the acre.

These are more tender, and require rather more care in culture than the bush beans; they succeed best in sandy loam, which should be liberally enriched with short manure in the hills, which are formed according to the variety, from three to four feet apart; from five to six seeds are planted in each hill, about two inches deep.

Beans ordered sent by mail are subject to an extra charge of 15 cents per quart for postage. Pints furnished at quart rates.

Horticultural Pole.	Qt.	Pk.	Bu.
The most popular variety for both string and shell beans	.20	1.50	5.50

Mammoth Horticultural. An improvement over the common Horticultural, being very much larger and much more productive. As a market shell bean, it has no equal.	.25	1.75	6.00
---	-----	------	------

Indian Chief or Black Wax. A very tender string bean.	.20	1.50	5.75
--	-----	------	------

Mont d'Or, or Golden Butter. Earliest of the wax pole varieties, unsurpassed in quality	.20	1.50	5.75
--	-----	------	------

Lazy Wives Pole Beans

Lazy Wives. Immensely popular everywhere. Pods are large, green, entirely stringless, and of excellent flavor. It is exceedingly productive and easily gathered. Such is the peculiar taste and pleasant flavor of this bean that many persons could not be induced to eat other varieties of string beans, after tasting Lazy Wives. Excellent for shelling or baking.	.25	1.75	6.50
Red Cranberry. Almost stringless; one of the very best of string beans.	.20	1.50	5.50

KENTUCKY WONDER or Old Homestead

A very prolific sort producing its pods in large clusters. Pods green, very long, often reaching nine or ten inches, nearly round when young and very crisp, of fine flavor and most excellent for snap beans. One of the best and most profitable beans for the market gardener, the pods being so showy and produced in great abundance..

Qt.	Pk.	Bu.
.25	1.75	6.50

Early Jersey Lima.

Of large size. Very tender and of delicious flavor. Very early. Out of a number of varieties that we have tried, we found this to be the most desirable sort for this climate

Kentucky Wonder Beans

Scarlet Runner. Very ornamental, free climber, Pkt. Qt. Pk.
with bright scarlet flowers .10 .30 1.75

White Dutch Runners.
Large, white flowers; often planted with the scarlet variety; the effect is very beautiful..... .10 .30 1.75

BEETS

One ounce to fifty feet of drill; six pounds to the acre.

The best results are obtained on a deep, rich, sandy loam. For early use sow as soon as the ground will admit, in drills fourteen inches apart, and thin to four inches; for the main crop sow the first week in May, and for winter use as late as June. The soil should be deeply manured and well cultivated. In lifting and storing the roots, care must be taken that they are not bruised.

Detroit Dark Red Beet

Perfection Beet. (See page 1).

Detroit Dark Red Beet. As early as Crosby's Egyptian, with flesh a very dark, intense red. Tops small, roots globular or ovoid; very tender and sweet; good keeper, An early beet of the finest quality for either home or market use.....

Pkt.	2 oz.	¼ lb.	1 lb.
5	.10	.20	.60

Dirigo Extra Early. Originated with a leading market gardener and was brought to perfection after years of careful cultivation. It is a rich, blood-red beet of fine grain and flavor, is earlier than either the Egyptian or Eclipse, of smooth and rapid growth; top and tap root being very small.....

Crop a failure.

Crosby's Egyptian. This variety resembles the Egyptian only in its extreme earliness. It grows much larger and lighter colored. It is one of the best sorts for early planting as it reaches a usable size sooner than any other sort.....

Pkt.	2 oz.	¼ lb.	1 lb.
5	.10	.20	.60

Giant Feeding Sugar Beet

Eclipse. This variety is about as early as the Egyptian, but of larger and finer quality.....

5	.10	.20	.60
---	-----	-----	-----

Bastian's Early Blood Turnip. Larger than the Egyptian and follows it and the Eclipse in point of earliness; not so dark in color....

5	.10	.20	.60
---	-----	-----	-----

Dewing's Blood Turnip. Of fine form and flavor and deep blood red; a desirable variety.....

5	.10	.20	.60
---	-----	-----	-----

Long Smooth Blood Red. This is a long, smooth beet, growing to good size.....

5	.10	.20	.60
---	-----	-----	-----

Edmand's Early Blood Turnip. The largest sort for general crop. In quality one of the finest, exceedingly dark, shape globular, having only one tap root. Very popular with marketmen.....

---	-----	-----	-----

Swiss Chard. Used for greens.....

5	.10	.20	.60
---	-----	-----	-----

Giant Yellow Intermediate

Sugar Beets and Mangel Wurzels

Varieties Grown For Feeding Stock
(Sown in May or Early in June).

Six Pounds Per Acre.

Giant Feeding Sugar. A cross of the Mammoth Red Mangel and Improved Sugar Beet. Roots large, long and smooth, and of a beautiful light rose tint. Yields nearly as large a crop as the Mangels, and supplies a food of very much higher nutritive value. The roots grow partly out of the ground and can be harvested very easily.....

2 oz. ¼ lb. 1b.
.10 .20 .50

Lane's Improved Sugar. A well known variety; valuable for feeding to cattle... .10 .15 .35

Giant Yellow Intermediate.

This variety grows more than half above the ground, and is a russet, yellow color. The root is ovoid, intermediate between the long and globe varieties. Flesh white, firm and sweet, much liked by cattle. Produces enormous crops and a good keeper...

.10 .15 .35

Yellow Globe Mangel Wurzel. Roots of large size, and globular form; very productive..... .10 .15 .35

Improved Mammoth Long Red Mangel Wurzel. A variety producing roots of mammoth size..... .10 .15 .35

Golden Tankard. A half long variety of a bright yellow color.. .10 .15 .35

Norbiton Giant Mangel Wurzel. Extra fine Long Red, very large10 .15 .35

CABBAGE

One ounce will produce about three thousand plants.

The Cabbage is one of the most important vegetables, and some of its varieties universally cultivated. The ground must be highly manured, deeply dug or plowed, and thoroughly worked, to insure good, full sized heads. A heavy, moist and fresh loam is the most suitable. The early sorts should be sown very early in the spring, in hot-beds, or later in the open ground. Eighteen inches by three feet apart is the common distance.

Sure Head Cabbage

Early Winningstadt. An excellent sort; heads of large size.....

Pkt.	oz.	¼ lb.
5	.20	.60

Early Jersey Wakefield. This is the standard early pointed-head cabbage. For the market garden it is the best, and for early home use all should have it.....

5	.20	.60
---	-----	-----

Henderson's Early Summer. The standard summer variety. Unexcelled for the market garden and good for home use.....

5	.20	.60
---	-----	-----

Early Spring. The only Extra Early Round, Flatheaded Cabbage in the world. Coming in with the Wakefield, and yielding one-third more than any other Extra Early. This variety is of the Early Summer Type, but about one-fifth smaller, and has only four to five outside leaves, and these so small that it may be planted twenty-one inches apart, 14,500 to the acre. The stem is short, making almost the whole plant edible. It is finely bred, the veining of the leaves being particularly fine. There is no cabbage we know of having a more solid head; it has also the peculiarity of heading firmly at an early stage in its growth, so that the finest cabbage, though small, can be obtained long before it has attained its mature size

5	.30	1.00
---	-----	------

Premium Flat Dutch. The old standard variety for main crop. It has long stood the test and is yet one of the very best....

5	.20	.60
---	-----	-----

Stone-Mason Drumhead. One of the very best for a main crop

5	.20	.60
---	-----	-----

Deep Head. An early strain of the Flat Dutch type. The plant is rather below medium size; very short stemmed and few

leaved. The leaves are large, broad and quite thick. The head is oval and very large for size of plant, solid and of good quality. It matures just after the All Seasons' Cabbage, and is very popular with gardeners ..

Pkt.	Oz.	¼ lb.
5	.20	.60

Fottler's Improved Brunswick Cabbage

All Seasons'

Cabbage.

proved Bruns-

wick. An ex-
cellent early
Drum head
variety; pro-
duces a firm
and solid
head 5 .20 .60

Henderson's
Succession.

One of the
finest for a second early or late sort.....

Pkt. Oz. ¼ lb.
5 .20 .60

Autumn King. Entirely distinct, one of the best keepers, enormous sized head, of that dark shade of green, which is most desirable in a cabbage, and has such small outer leaves that it can be planted much closer together than the ordinary late sorts; therefore can be relied upon to produce a greater weight of crop per acre than any other variety. A distinct feature of the Autumn King is the peculiarly crimped leaf, which not only adds to its appearance, but enables it to be distinguished anywhere.....

5 .20 .60

Mammoth Rock Red. This is the best, largest and surest heading red cabbage ever introduced. The head is large, round, very solid and of deep red color.....

5 .20 .60

Sure Head. Produces large, round, flattened heads of The Flat Dutch type, and is remarkable for its certainty to head. It is all head and sure to head even under unfavorable conditions. The heads are remarkably uniform, very hard, firm and fine in texture, and, ordinarily weigh from 10 to 15 pounds each. Has but few leaves, keeps well. A good shipper, and just the variety to suit market gardeners and farmers.....

5 .25 .75

Danish Ball Head. An extremely hardy, imported cabbage, which is growing in popularity in America, having proven itself one of the very best winter sorts. It is a very sure header, very solid and heavy, an extra good keeper and seller. It is medium to late, but is generally grown as a late crop. Heads are not extra large and without many outer leaves. It is the best cabbage to raise where it is sold by weight, as its solidity is not equalled by any other cabbage grown.....

5 .25 .75

Early Spring Cabbage

CARROTS

One ounce to one hundred feet of drill; three to four pounds to the acre.

Carrots require a very finely pulverized soil to grow them to perfection. A good, light and well enriched sandy loam is the best for this crop. For field culture, sow in drills, three to three and one-half feet apart, so as to cultivate by horse. Market gardeners sow in drills about eighteen inches

apart, and cultivate by hand. For early crops cover one-half an inch deep, and thin to six inches apart, in the rows; for late, cover three-fourths of an inch deep, and thin to four inches.

Early French Forcing. The earliest variety in cultivation and the best suited for forcing and early market gardening. Tops, small and divided. The roots are a reddish orange color and nearly round. When fully matured, they are about two inches in diameter 5 .15 .25 .85

Ox Heart Carrot

Long Orange. Roots of large size, Pkt. oz. ¼ lb. 1b. heavy cropper and excellent keeper. . 5 .10 .20 .75

Danvers' Half Long. In form it is midway between the Long Orange and Ox Heart. The root is of a dark orange color and grows very smooth. Very productive. 5 .10 .25 .80

New Ox Heart. A very early and heavy yielder. Thick and short in form, scarlet in color. 5 .10 .25 .80

Long White Belgium. Large, long rooted variety; valuable for feeding. 5 .10 .20 .75

Cauliflower

One ounce will produce about three thousands plants.

Any soil that will grow early Cabbages will grow Cauliflower, as their requirements are almost similar; but as the product is more valuable, extra manuring and preparation of the soil will be well paid.

Danvers' Half-Long Carrot

The seeds may be sown in the hot-bed in March or April, and transplanted to open ground about the first of May.

Henderson's Early Snowball. A very reliable early variety. 10 2.00

French Forcing Carrot

Early Favorite. One of the best early varieties, very hardy, easily grown and will head under conditions in which many sorts will fail. Heads large, solid, crisp and tender.....

Pkt.	Oz.
5	1.00

CELERY

One ounce of seed produces about four thousand plants.

To have celery early, it should be sown in a hot bed quite early in the spring, and when three inches high plant out in a well prepared bed, which must be covered in frosty weather. For the principal crop, sow early in spring, very shallow in the seedbed, and when the plants

Golden Self-Bleaching Celery

are about six inches high, transplant them about six inches apart into trenches for blanching. Dig the trenches four feet apart, a foot wide and ten inches deep. Fill in five or six inches of well rotted manure, and mix thoroughly, half a spade deep, with the earth at the bottom. The tops of the plants should be shortened before they are set. Earth up to blanch, three or four times during their growth, taking care that no earth falls in the center of the plants.

Boston Market. A favorite variety, remarkable for its tender, crisp, succulent stems, keeps well.....

Pkt.	Oz.
5	.20

Henderson's White Plume. Crisp, solid and possessing a sweet, nutty flavor; requires very little labor in bleaching.

5	.20
---	-----

Golden Self-Bleaching. A self-bleaching, early golden-colored variety that is very popular.....

5	.25
---	-----

CORN—Sweet

One quart to two hundred hills, ten quarts to an acre.

The Sweet or Sugar varieties being liable to rot in cold or wet ground, should not be planted before the middle of May and for a succession continue planting every two weeks, until July, in rich, well manured ground, in hills three feet apart, each way, covering about half an inch and thin out to three plants to a hill, or plant in rows four feet apart, and to stand eight inches apart in rows. The field varieties should be planted four feet apart each way, leaving three plants to a hill.

Early Golden Bantam Sweet

Corn. (See page 2).

Holmes' Premo.

A very early, pure, sweet corn. The

Henderson's Early Snowball Cauliflower

Cory Corn

stalks grow about five feet high. Ears medium size and well filled. Kernels white and of excellent flavor. One of

	Pkt.	Qt.	Pk.	Bu.
the best early varieties grown.....	5	.20	1.25	4.00
Early Cory. (Red Cob). A very early dwarf variety, an excellent sort, sweet and good flavor.....	5	.20	1.25	4.00

Improved White Spine. Superior for table use, very productive, medium sized, straight and well formed.....	5	.10	.25	.75
Nichols' Medium Green. This is a very fine table variety; and also good for early forcing. Color, dark green; flesh very crisp; very prolific and always straight, smooth and handsome. It also makes a very desirable sort for pickles.....	5	.10	.25	.75
Early Green Cluster. Grows in clusters, early and productive	5	.10	.25	.75
Improved Long Green. Long and crisp; a popular and reliable variety for pickles.....	5	.10	.25	.75
Boston Pickling. The finest variety to grow for pickles.....	5	.10	.25	.75

DANDELION

One ounce to one hundred ft. of drill.

The Dandelion resembles Endive, and affords one of the earliest, as well as one of the most healthful of spring greens. Sow as early as the weather will permit, in good, well-enriched soil, in rows twelve inches apart, covering seed one-fourth of an inch deep, the earth firmly pressed over the seed.

Improved Thick-Leaved. Best variety.. Pkg. Oz. ¼ lb. 1.60

Improved Thick-Leaved Dandelion

ENDIVE

Endive may be grown at any season of the year, but is more generally used late in the fall. Sow the seed during May or June, in drills, fourteen inches apart, and when well established, thin to one foot apart. When nearly full grown, tie the outer leaves together over the center in order to blanch the heart of the plant. By covering every few days a succession may be kept up.

Green Curled. This is the hardiest variety, and very desirable for the home and market garden. The deep green leaves are beautifully cut and curled, easily blanched, and become very crisp, tender and fine flavored..... Pkt. Oz. 5 .20

White Curled. By far the most beautiful variety. Plants moderately dense, with divided leaves, which are coarser and less tender than those of the Green Curled; but even the outer leaves are very light colored, frequently white, so that the plant is very attractive and always brings the highest price on the market..... Pkt. Oz. 5 .20

Green Curled Endive

London Flag Leek

LEEK

Belongs to the onion family and by some preferred to that vegetable. Sow the seeds and care for the young plants same as for onions, but they need a little more room in order to develop fully. When the young plants are about the size of a goose quill, transplant to a prepared bed in rows one foot apart and four or five inches in the row. Set the roots deep and draw the earth to them when cultivating, so that they may be well blanched by the time they are fit for use.

London Flag. It is the variety more cultivated in this country than any other. It is hardy and of good quality.....

Pkt.	Oz.	¼ lb.
5	.20	.60

LETTUCE

One ounce to one hundred and twenty feet of drill.

Lettuce thrives best in rich, moist ground. Sow the seed in hot-beds in February or March, and transplant into a sheltered border with a southern exposure. For successive crops, sowings may be made in the open ground as early as the spring opens, and continuing until July.

Improved Hanson.

Forms very large, firm heads, which are deliciously sweet, crisp and tender; heads green outside and white within. For outdoor culture unexcelled.....

Pkt.	Oz.	¼ lb.
5	.20	.60

New Sensation.

This remarkable variety has rapidly grown in popularity until it has become the leader among gardeners.

Big Boston Lettuce

No other lettuce thrives so well when grown at any season of the year, withstanding the hottest weather in a remarkable degree. It is a beautiful light yellowish-green color, leaves much blistered on the surface, and has the peculiarity of forming a solid head, even before half grown. Its uniform, handsome and even growth is unequalled and it is one of the easiest to grow.....

Pkt.	Oz.	¼ lb.
5	.20	.60

Early Tennisball. White seeded. Extensively grown for forcing and heading under glass, heads firm and good size; very white and crisp

5	.15	.50
---	-----	-----

Early Tennisball. Black seeded. A very popular sort for open ground culture; forms a handsome head and is crisp and tender

5	.15	.50
---	-----	-----

	Pkt.	Oz.	¼ lb.
Boston Curled. A variety of great beauty and of superior quality. Leaves beautifully curled; attractive on table.....	5	.15	.50
Black Seeded Simpson. Heads very large with light colored leaves; leaves being almost white. Stands summer heat splendidly and remains long fit for use.....	5	.15	.50
Ferry's Early Prize Head. Forms a large, tender and crisp mass of leaves of superior flavor, and very hardy. Slow to run to seed and does not become bitter as early as many other sorts.....	5	.15	.50

Citron Preserving Melon

Big Boston. This is a new, very large strain of White Tennisball or Boston Lettuce excelling all other strains in size. Of great value to market gardeners.....

White Cabbage. Large, extra tender, and is a good keeper.....

MELON—Musk

One ounce for sixty hills; two to three pounds for an acre.

Melons thrive best in a moderately enriched light soil; the hills should be six feet apart each way. After all danger of frost is past, plant twelve or fifteen seeds in each hill, and when well up, thin out to three or four plants in each hill.

	Pkt.	Oz.	¼ lb.
Nutmeg. Named from its shape; flesh green and sweet.....	5	.10	.25
Large Round Yellow Cantaloupe. Flesh reddish orange, sweet and of good flavor; an early and productive variety.....	5	.10	.25
Miller's Cream. This is one of the finest all-round melons in existence. Flesh of a rich salmon color, very sweet and melting in quality.....	5	.10	.25
Extra Early Hackensack. A green fleshed nutmeg of splendid quality. It is very early and a prolific bearer.....	5	.10	.25

MELON—Water

One ounce for thirty hills; four to five pounds for an acre.

Plant in hills eight feet apart, and cultivate same as Musk Melon.

	Pkt.	Oz.	¼ lb.
Vick's Early. Productive, early and finely flavored; red flesh..	5	.10	.25
Mountain Sweet. One of the best for general culture.....	5	.10	.25
Citron. The standard variety for preserves.....	5	.10	.25

MUSTARD

Sow thickly in rows at different times from May to July, and cut when about two inches high. Used as a salad or cut and boiled for greens. The seed is used for flavoring pickles, etc.

White London. The leaves are light green, mild and tender when young; seed light yellow.....

Pkt.	Oz.	¼ lb.
5	.10	.25

ONION

One ounce to one hundred feet of drill; five pounds to the acre.

Yellow Globe Danvers Onion

No vegetable is more extensively known and cultivated than the Onion. A good crop is impossible unless the soil is very rich and kept clean. Use well-rotted manure freely, and get the crop in as early as possible in spring, no matter if the weather is cold and unpleasant. Sow in drills one foot apart, and cover about one-third of an inch, treading or rolling after sowing, so that the hot, dry atmosphere may not dry up and destroy the sprouting seed.

Large Red Wethersfield.

Large size, productive and a good keeper.....

Pkt.	Oz.	¼ lb.	1 lb.
5	.15	.50	1.75

American Silver Skin.

Flavor mild and pleasant. Skin silver white. Handsome in appearance. Highly esteemed for pickling when young; also for market in early winter.....

Pkt.	Oz.	¼ lb.	1 lb.
5	.20	.60	2.00

Prize Taker. This is one of the best of the huge foreign varieties. When started under glass and transplanted into open ground, they bottom well, are nearly free from

stiff neck, and when offered for sale always attract marked attention. The variety is without doubt the largest onion grown, samples under special culture sometimes weighing five pounds.....

Pkt.	Oz.	¼ lb.	1 lb.
5	.20	.60	\$2.00

Large Red Wethersfield

Onion Sets should be planted near the surface as early in the spring as the ground will permit, in drills about twelve inches apart and four inches in the rows. They produce a very early and profitable crop.

Onion Sets ordered by mail are subject to an extra charge of ten cents a quart for postage.

	Per Qt.	Per Pk.		Per Qt.	Per Pk.
White Sets	.25	1.75	Potato Onion Sets	.20	1.00
Yellow Sets	.20	1.50	Top Onion Sets	.25	1.50

For larger quantities prices will be given on application.

PARSLEY

One ounce to one hundred and fifty feet of drill.

Parsley requires rich, mellow soil; sow thickly in drills, one foot apart, and half an inch deep. As the seed germinates slowly, it is best to soak it for a few hours in tepid water before sowing. For winter use, protect it in a glass frame or light cellar.

	Pkt.	Oz.	¼ lb.
Double Curled.....	5	.10	.25

Double Curled Parsley

PARSNIP

One ounce for two hundred feet of drill; five pounds to the acre.

Sow as early in the spring as the weather will admit, in drills 15 inches apart, covering half an inch deep. When well up thin out to five or six inches apart in the rows. Unlike carrots, they are improved by frost, and it is usual to take up in the fall a certain quantity for winter use, leaving the rest in the ground until spring, to be dug as required.

Abbott's Improved, or Long Smooth. Smooth and quite large; one of the best.....	Pkt.	Oz.	¼ lb.	1 lb.
	5	.10	.25	.75

PEAS

One quart to seventy-five feet of drill; two to three bushels to the acre.

Peas for an early crop should be sown as soon as the ground is in working condition. The soil for their reception should be light, dry and well sheltered. Mild manure, such as leaf mould, has a beneficial effect; but for many of the varieties, the soil cannot be too rich. For general crop the ground should

be well manured the previous year which causes them to yield more abundantly. When grown as a market crop, peas are never staked, and are sown in single rows, two or three inches deep, and from two to three feet apart, according to the variety or strength of the soil. When grown in small quantities for private use, they are generally sown in double rows, six or eight inches apart, and the tall varieties staked up by brush.

Peas ordered sent by mail are subject to an extra charge of fifteen cents per quart and eight cents per pint for postage. Pints furnished at quart rates.

Extra Early Varieties

Gradus or Prosperity. (See page 4).

Thomas Laxton. A new, early wrinkled variety of great merit.

Vine three to three and one-half feet high, similar to that of Gradus, but darker in color, hardier and more productive. Pods large and long, similar to, but larger than those of the Champion of England, and as uniformly well filled. The green peas are very large, fine colored and unsurpassed in quality. This pea has only to be known to become one of the most popular sorts for the market and home garden, as it is one of the very best varieties yet produced.....

Qt.	Pk.	Bu.
.30	2.00	7.50

Cleveland's Eclipse. The earliest and most productive pea as compared with the hitherto earliest known pea on record. Grows about two feet high. seed green wrinkled. Smaller than the American Wonder,

Canada Field. Extensively used for field culture.50 1.75

Tall Gray Sugar. A very superior variety of the edible pod sort. Pods very tender and sweet.30 1.75 6.00

Bell Pepper

PEPPER

One ounce will produce fifteen hundred plants.

Grown largely for pickles. Sow in the hot-bed early in April, and transplant into the open ground when the weather is favorable. The plants should be set in warm, mellow soil, in rows eighteen inches apart. The seed may also be sown in the open ground, when danger from frost is passed, and the soil is dry and warm. Cultivate in the usual manner, and the crop will be fit for use early in September.

Large Bell. Large and of mild flavor..... Pkt. Oz.
5 .30

SEED POTATOES

Early Dew Drop. (See page 1).

Irish Cobbler. We have found this potato to be one of the most reliable, extra early potatoes. In ripening it seems to be more uniform than any other sort. Every hill seems to ripen at the same time. The potatoes in form are oval and round. They grow very smooth, cream white, with few and shallow eyes. The quality for early table use is not excelled by any early variety. It keeps perfectly through the winter until planting time in the spring and it is never out of season for the table. Considering its earliness, yield, fine quality and handsome appearance, Irish Cobbler is one of the best of all early potatoes.....

	Pkt.	Oz.	¼ lb.	1 lb.
5	.30	1.00		

TOMATO

One ounce will produce fifteen hundred plants. This vegetable is one of the most important of all garden products. They thrive best in a warm, light, rich soil. For early plants, sow about the first week in March in a hot-bed; or in boxes or pots in a warm window. When the plants are about two inches high, set out in boxes, three inches deep, four inches apart, in the same temperature, or pot singly. If again transplanted before setting out, the plants will be still more stocky. Set out in the open ground about the first of June, four feet apart each way, using a shovelful of rotted manure in each hill. Keep well sheltered and watered until they are established, after which let the fruit have plenty of sun.

Crimson Cushion Tomato

Sparks' Earliana. (See page 4).

Early Freedom. The plant is medium in size, presenting no peculiarities of foliage or habit. The fruit is borne mainly in clusters, perfectly round, having no sign of concave at the base. Of a bright, dazzling shade of scarlet. The flesh is remarkably solid, having but few seeds. The flavor is perfect, absolutely free from any acidity. Undoubtedly the most prolific of all early tomatoes, and equal in size to the largest of any early sort put on the market.....

5	.25	.75
---	-----	-----

Dwarf Champion. This is an early variety, which forms very stout, strong plants, about two feet high. The branches are short, making a bushy plant that stands quite erect without stakes. Fruit, smooth, medium sized, fairly solid, but has no hard core, and is of good flavor.....

5	.25	.75
---	-----	-----

Crimson Cushion. For so large a tomato it is very early, very smooth, of a bright, scarlet crimson. Ripens almost completely to the stem end. The flesh is so firm and solid that it requires four times the quantity to produce a pound of seed than it does of ordinary sorts. Without doubt the most prolific of any variety yet brought out. A grand tomato for slicing or canning.....

5	.25	.75
---	-----	-----

New Stone. Of a bright, scarlet color. Very large and very smooth; ripening evenly to the stem without a crack; exceedingly solid and firm-fleshed (as its name indicates); is an excellent shipper; quality the very best; a good keeper; without hard core and not subject to rot. A great yielder.....

Pkt.	Oz.	¼ lb
5	.25	.75

TURNIP

One ounce for one hundred and fifty feet of drill; one to two pounds in drills for an acre.

Turnips do best in highly enriched light, sandy or gravelly soil; sow the earliest varieties as soon as the ground can be worked in the spring, in drills twelve to eighteen inches apart. For a continuous supply through the season, sowings should be made every two weeks until the last of July; from which time until the middle of August the principal sowings are made for the fall and winter use. Swedish or Ruta Baga turnips are largely grown for a farm crop, as well as for the table; make sowings from the tenth of June until the first of July, in drills two to three feet apart, and the plants when well up should be thinned

**Purple Top Strap
Leaf Turnip**

to ten inches apart. To keep the roots fresh during the winter, they may be placed in a cool, dry cellar and buried with dry sand.

FLOWER SEEDS

NASTURTIUM—Tall

Elegant profuse flowering plants for verandas, trellises, etc. The seed pods can be gathered while green and tender, for pickling. Hardy annuals.

Tall Mixed. Fine colors.. 5 Pkt. oz. 1b. .10 1.00

NASTURTIUM—Dwarf

The dwarf varieties are among our most popular plants, standing any amount of heat and drought, growing vigorously and flowering freely all summer and fall; excellent for massing and ribboning, doing well even in poor soil. Hardy annuals, one foot.

Dwarf, Mixed. Fine colors 5 Pkt. oz. 1b. .10 1.00

Dwarf Nasturtium

SWEET PEAS

Very lovely, beautiful, fragrant, free blooming, climbing plants. Sweet peas are grown very extensively by florists and gardeners for cut flowers, and when placed in water will last many days, and their sweet perfume delights many.

Supported by common pea sticks they form admirable screens for protecting tender plants and excluding unsightly objects. They are invaluable for trailing and trellis work and covering fences, etc.

The more the flowers are cut, the more freely they will bloom.

Dunning's Choice Mixed Sweet Peas. This mixture is made up entirely of the choice new and standard varieties. These varieties are all grown separately and are selected and mixed in such variety and proportions as to give a mixture that is second to none.

Price per pkt., 5 cts. Per oz., 10 cts. Per $\frac{1}{4}$ lb., 25 cts. Per lb., 75 cts.

ENGLISH LAWN FERTILIZER

An Odorless Chemical Fertilizer For Lawns, Flower Beds and Kitchen Gardens.

This is a high-grade chemical fertilizer, especially prepared to promote the vigorous and healthy growth of luxuriant grass, enabling it to withstand rough usage and the protracted heat of summer.

Being free from weed seeds, and odorless, it is far superior to unsightly and strong smelling stable dressing for use on lawns and tennis courts.

EXTRA SELECTED FARM SEEDS

At market prices at time order is received. All inquiries for quotations will be promptly answered.

GRASS SEEDS

Orchard Grass

Kentucky Blue Grass. An excellent variety for pasture. Also valuable for lawns when mixed with other grasses; 14 lbs. to the bushel.

Awnless Brome Grass—(*Bromus Inermis*)

An erect growing perennial that attains a height of from three to five feet.

It is especially recommended for dry and arid soils where the more delicate grasses will not grow. Its remarkable drought resisting qualities make it very valuable for dry situations, while its extreme hardiness enables it to withstand our coldest winters without serious injury. The rootstocks of this variety spread rapidly under ground, sending up new shoots, and thus form a close, dense sod. On this account it should not be sown except where a permanent grass crop is desired; 20 lbs. to the bushel.

Timothy or Herd's Grass. The best grass for hay; 45 lbs. to the bushel.

Red Top. A valuable grass and extensively cultivated; 10 lbs. to the bushel.

Fancy Red Top. Clear seed.

Rhode Island Bent. Very fine lawn grass; 10 lbs. to the bushel.

Orchard Grass. Valuable on all dry soils, very valuable as a pasture grass; 14 lbs. to the bushel.

Fowl Meadow Grass. Grows tall and thick, succeeding best on low, moist land; 10 lbs. to the bushel.

Canada Blue Grass. A very hardy variety of Blue Grass. Excellent for pasture and especially adapted to dry, sandy, thin soils. Does not make as fine a sod as the Kentucky Blue Grass, but will stand rougher usage.

MILLETS

Hungarian Grass

been grown from a single seed. Hay and fodder are very nutritious and much liked by all kinds of stock. Sow in June and July, one peck to the acre; 48 lbs. to the bushel.

Millets should be sown in June and July, and are annual forage plants of thick growth, valuable for green fodder or hay, maturing in fifty to seventy-five days from the time the seed germinates, producing an abundant yield of forage, relished by all kinds of stock. They must be cut while in blossom to make good hay. At market prices at time order is received. All inquiries for quotations will be promptly answered.

Hungarian Grass. Early; grows two to three feet high; abundant foliage; withstands drought and yields well on light soils; 48 lbs. to the bushel.

Golden Millet. Requires a dry, light, rich soil, and grows two and a half to four feet high, with a fine bulk of stalks and leaves, and is excellent for foraging; 48 lbs. to the bushel.

New Siberian Millet. A new and wonderfully productive forage plant from Russia, which has given excellent results in the United States. It is extremely hardy and about two weeks earlier than German Millet, growing about four feet in height. Its stooling properties are remarkable, as high as 41 stalks having

CLOVERS

Prices subject to market changes.

There are no plants so valuable for fertilizers as the clovers. They have the faculty for absorbing nitrogen from the air, and also of rendering available much of the inert plant food of the soil. Their long, powerful tap roots penetrate to a great depth, loosen the soil, admit air, and by their decay add immensely to the fertility of the soil. The seed may be sown in fall or spring; the best results will come from sowing in the spring, and is often sown on the late snows of April.

Medium Red Clover. **Pea Vine or Mammoth Clover.** **Alsike Clover.**

White Dutch Clover. Valuable for pasture and for lawns.

Scarlet or Crimson Clover. This variety is fine for soiling cattle; has a beautiful blossom.

Alfalfa or Lucerne Clover. Very productive; requires deep soil.

DWARF ESSEX RAPE

This is very valuable for sheep pasture. It can be sown in May, and will be ready for pasturing in July or August; or it may be sown in June or even

up to the middle of July, and yet furnish, under reasonably favorable circumstances, a large amount of pasture and fodder. It is very suitable for sowing on land that an early crop of potatoes has been taken off. In drills, about four pounds to the acre; broadcast, eight pounds to the acre. Pound, 9 cts.; 13 pounds for \$1.00.

Soja or Soy Beans

Soja or Soy Bean

Very valuable for fertilizing and enriching the soil; also used for pasturing, feeding as green fodder, and for silo purposes. Sow broadcast in May or June, at the rate of one bushel to the acre; or they may be planted in drills three feet apart and one foot between plants.

At market prices time order is received.

Sand, or Winter Vetch

One of the pea vine class of plants. Better than other fodder crops on poor, dry, sandy soil, while in good soil it makes a rank growth of four to five feet. Perfectly hardy all over the United States, stands drought well and remains green all winter. It is the earliest of all spring fodder crops. Sow for spring use in August with $\frac{1}{2}$ bushel winter rye or oats, or in spring with $\frac{1}{2}$ bushel of oats, rye or barley. It is exceedingly nutritious, eaten with relish, and may be fed with safety to all kinds of stock. Sow at the rate of one bushel per acre.

At market prices time order is received. All inquiries for quotations will be promptly answered.

Early Black Eye Cow Peas

The great soil improver. Green crops plowed under are one of the best and cheapest ways of improving the soil. For this purpose the Cow Peas are the most popular, especially for medium and light soil. They should be sown in May or June, at the rate of one and one-half bushels to the acre, and plowed under as soon as they have attained their growth. There is no surer or cheaper means of improving poor soil than by sowing Cow Peas. In its capacity as a nitrogen gatherer, its growth largely enables the farmer to dispense with the use of nitrogen or ammoniated fertilizers.

Cow Peas are also valuable as a forage crop.

At market prices time order is received.

Sand, or Winter Vetch

JAPANESE BARNYARD MILLET

This wonderful and valuable new forage plant was introduced into this country by Prof. Brooks, of the Massachusetts Agricultural Experiment Station. It has proven an enormous yielder in all sections of the United States; hay and fodder of most excellent quality on any soil, yielding 8 to 10 tons per acre and growing from 5 to 7 feet in height.

Cattle and horses eat it greedily.

The accompanying cut is from a photograph of a bunch that was raised on our farm. We found it very satisfactory in every way.

Sow in May and June broadcast, 10 to 15 lbs. per acre (it stools remarkably), or in drills, 8 lbs. per acre.

Price, per pound, 9c.

Per 13 pounds, \$1.00.

If sent by mail, add eight cents per pound for postage.

GRAINS

Prices subject to market changes. All inquiries for quotations will be promptly answered.

Wheat, Spring Rye, Winter Rye, Barley, Oats, Silver Hull Buckwheat, Common Buckwheat, Indian Wheat or Rough Hulled Buckwheat.

All our grains are selected expressly for seed, and are strictly pure and true. All inquiries for quotations for grass seeds, grains, etc., will be promptly answered and samples sent by mail when desired.

Dunning's Lawn Grass Seed

This is a mixture of the different varieties of grass seed, which is best suited to this climate for lawns, grass plots, cemetery lots, etc., and selected with a view of suiting all soils and situations, and whether used in pastures or lawns, has invariably produced the best results. It must be remembered, however, that much of the fine appearance of our lawns depends upon regularity in mowing. If they are left too long in spring before the operation is begun, or if allowed to grow strong in summer, and, more especially, if not closely mown at the latest period in autumn, they become coarse, the stronger grass overgrowing the weaker and the best, the smoothness of the surface being destroyed, and ultimately the whole becoming patchy and unsightly. All lawns should also be regularly rolled and, unless the subsoil be a porous, alluvial gravel, should also be thoroughly drained at their formation. A drain should be carried along at the bottom of each terrace slope, so that they may at all times be comfortable to walk upon. The seed may be sown in spring or fall, but, if sown in hot weather, a slight sowing of oats, which vegetates quickly among the grass, will serve to protect the springing grass. For forming new lawns, four bushels are required per acre, or about one quart to each square rod of land, which should be regularly and evenly distributed. Sixteen pounds to the bushel.

A liberal quantity of seed should always be used to insure the best results. Per pound, 25 cents. If sent by mail, add eight cents per pound for postage.

Per bushel of 16 lbs., by Freight or Express, \$3.50.

For English Lawn Fertilizer. (See page 32).

White Victor Oats

This is one of the most productive varieties of oats ever introduced. The straw is very stiff holding the heavy head up well. It is early and the grains are large, plump and heavy. Plant grows to medium height, of vigorous growth, stools out well and yields an immense crop. They are pure white in color and are entirely free from rust and smut.

A change of seed oats is very necessary to a good crop. In making the change why not get seed of this choice new variety that will insure you an extra large crop?

Price: By Express or Freight, pk., 40 cts.; bu., \$1.25; 10 bu. lots, \$1.20 per bu. In lots of one bushel or over, there will be a charge of 20 cts. for bags; bags capable of holding 2½ bushels.

White Matchless Oats

This is a very choice oat of Swedish origin. The straw is coarse, noted for its stiffness and power to withstand lodging. The grains are pure white in color, large, thick and plump, making a very handsome appearance. They are very thin hulled and large heavy meated, weighing 40 lbs., to the measured bushel. Very productive.

Price: \$1.10 per bushel.

Samples of oats and other grains mailed on application.

IMMENSE CROPS WITHOUT FERTILIZERS

A new, sure and easy way has recently been discovered to make worn-out or poor land, enormously productive without fertilizers and almost without expense. Plants need nitrogen—can't grow without it. Heretofore fertilizers have been needed to put nitrogen into the soil. Nitrogen is very necessary—is the most expensive part of fertilizers. The new way is easier, surer, cheaper—it is to let nitrogen gathering germs feed the plants.

The soil is full of air. Air is four-fifths free nitrogen. Think what limitless plant food, in the form of free nitrogen, the air contains. Right here the new discovery comes in. Plants can't extract nitrogen from the air, but there are germs that can. These germs have been discovered and are now being used for that purpose.

These germs, when put into the soil, fasten themselves to the roots of the plants, draw the free nitrogen out of the air, and feed it to the plants. That's the secret of the new way that is making

Roots of Soy Beans, showing the nodules which collect the free nitrogen from the air and deposit it in the soil, thus making barren land productive, and after the first crop is harvested the ground is left richer and better for the next year's crop.

many farmers rich. The germs do the work—the farmer gets the profit. They save expense, reduce the work, increase the crop enormously, even make it possible to grow Alfalfa and other crops where they never would grow before.

The new way saves the cost of fertilizers, and is very easy to use. The germs come ready for use, in a form called Nitro-Culture. Nitro-Culture is put up in small dry packages you can put in your vest pocket. Simply add it to water, and sprinkle the water over the seeds before planting. The germs remain on every seed—live with it—increase about it—feed the roots when they start and keep on feeding them. They also enrich the soil by storing nitrogen in it, so that the second year's crop, whatever it may be, is increased from two to ten times.

The U. S. Department of Agriculture says: "It is worse than useless to attempt to grow any leguminous crop without being certain of the presence of the bacteria which enable the plants to fix free nitrogen. Certain regions are practically devoid of the right kind of bacteria, and unless some artificial means of inoculating the germs be resorted to, the crop will be a failure."

Special Garden Packages

By mail post paid. Sweet Peas, 25c. Garden Beans, 25c. Garden Peas, 25c.

Send for Catalogue of Nitro-Culture which more fully describes this wonderful discovery.

Specimen plants characteristic of uninoculated and inoculated field of Alfalfa, on farm near Bynum, Hartford County, Maryland. The uninoculated plants turning yellow, though sown on ground richer and better than the inoculated field. Gain from inoculation with Nitro-Culture nearly 500 per cent. by weight.

For All General Farming

are, without doubt, the best fertilizers in the world for producing the largest possible crops of Grass, Grain and Vegetables in the shortest time. The Bradley Fertilizer Co. manufacture fertilizers of **all Grades** and for **all Crops** and being the **largest manufacturers in the world** their facilities for furnishing all kinds of fertilizers and agricultural chemicals at the lowest prices are absolutely unequalled.

A full stock of the following standard fertilizers constantly on hand:

Bradley's X L Superphosphate

Bradley's Potato Fertilizer

Bradley's Potato Manure

Bradley's Corn Phosphate

Bradley's Eureka Seeding-down Manure

Bradley's Complete Manure with 10% Potash

Bradley's Complete Manure for Potatoes and Vegetables

For Lawn Fertilizer. (See page 32).

Send to us for finely illustrated pamphlets, describing all of their brands, and let us quote you prices on these unequalled fertilizers, before purchasing elsewhere.

Agricultural Lime

Especially prepared for agricultural purposes, and, being finely ground, it can be used in any broadcast sower.

Many plants, such as beets, spinach, lettuce, onions, parsnips, cabbages, cucumbers, potatoes, peas, beans, turnips, carrots, corn and all grains, show a decided increase and are greatly benefited by the use of lime, as it corrects all acidity of the soil, sweetening it, and freeing it from impurities.

Lime properly applied at certain intervals will be found a most perfect renovator, one that can be relied upon. For the ordinary piece of land that requires lime it will be found that once in the rotation of crops, or, say once in four years, is as often as lime should be applied. It will hold the land in its proper condition for that length of time.

Put up in 100-pound bags.

Price per ton.....\$10.00.

Send for Illustrated Catalogue.

IS BEYOND QUESTION THE BEST FOOD EVER MANUFACTURED for Hens, Turkeys and Ducks. Its continual use by the largest Poultry Raisers proves it is unequalled for quickly growing large-sized birds of fine flavor, and for producing LARGE YIELDS OF SUPERIOR QUALITY EGGS

WE SELL THE GENUINE CYPHERS INCUBATORS

Free on Board Cars, Bangor, Me., at Factory Prices.

The Celebrated, Genuine, Patented Cyphers Non-Moisture Incubators, of which we are authorized agents, are guaranteed by the manufacturers as follows: To hatch a larger percentage of fertile eggs; to produce larger and more vigorous chicks or ducklings; to operate with less oil and at less expense than any other make of incubator; to require no supplied moisture and to be self-ventilating; to have a more sensitive, accurate and durable regulator than any other make and to maintain a more even temperature; to be more strictly automatic in action and to give better results in your hands than any other make of incubator in the world.

Each and every genuine Cyphers Incubator sold under registered trade-mark is positively guaranteed to do satisfactory work in the hands

of the purchaser who will give it a fair trial, or it can be returned to us within ninety days, in good repair, less reasonable wear, and the purchase price will be refunded.

THE WORLD'S STANDARD HATCHER

The genuine Standard Cyphers Incubators are not an experiment. They have been before the public ten years, and have received the benefits of ten years' improvements. Their fame has grown until they are now acknowledged to be the "World's Standard Hatchers."

Standard Cyphers Incubators are used on more Government Experiment Farms, on more successful, large commercial poultry plants, and by more successful fanciers, than all other incubators combined.

PRICES

No. 0, 66	Egg Size.....\$14.00.	No. 2, 240	Egg Size.....\$30.00.
No. 1, 140	Egg Size.....\$21.00.	No. 3, 390	Egg Size.....\$36.00.

LOW-PRICED INCUBATORS

While we unhesitatingly recommend the Standard Cyphers Incubator as the best on the market, we realize that there is a demand for lower-priced incubators, and offer the following low-priced machines in order to meet this demand. These machines are made of first-class materials and will be found to work very satisfactorily.

PRICES

Boys' Choice, capacity, 50 eggs, \$7.50; Farm Economy, capacity, 110 eggs, \$12.00.

CYPHERS UNEQUALLED APARTMENT BROODERS

Free on Board Cars, Bangor, Me., at Factory Prices.

Cyphers Brooders, like Cyphers Incubators, are correct in principle, durably made out of suitable material, fire-proof, guaranteed to be the best brooders on the market, regardless of price.

All Cyphers Brooders, 1908 pattern, are shipped knock-down, and compactly crated, thus insuring lower freight rates. In setting up these brooders, no tools are required, no screws or nails to be put in place.

Full set of directions for setting up with every brooder.

Cyphers Style A 3-Apartment Outdoor Brooder and Colony House

Style A Out Door Brooder. Next to its incubators, the Cyphers company especially prides itself on its Three Apartment Style of A, Outdoor Brooder, which is pronounced by thousands of users to be the best brooding device invented thus far for indoor or outdoor use. The Style A brooder is 36x72 inches in size, has three apartments; one, under the hover, averaging 90 degrees in temperature; one outside the hover, averaging 80 to 85 degrees and a separate apartment averaging 70 degrees. This brooder is heated by a Cyphers Insulated Brooder Stove. It is wind-proof and storm-proof, and will last many years with reasonable care.

Price: Style A Outdoor Brooder.....\$15.00.

CYPHERS STORM KING OUTDOOR BROODER

A practical outdoor brooder especially constructed to meet the demand for a practical outdoor brooder at a lower price than the Style A Brooder. The 1908 Brooder has a floor space of 3x3 feet and a capacity of 75 chicks. It has the brooding apartment of the Style A Brooder without the exercising apartment.

Price\$10.00.

CYPHERS IMPROVED HYGIENIC INDOOR BROODER

Cyphers Hygienic Indoor Brooder has been on the market several years and has given the best of satisfaction. We offer this brooder with the opinion that it is the best device in the form of an individual indoor brooder thus far conceived and invented for the safe and healthful rearing of chicks. It is strictly Hygienic, and reliable in operation. This brooder is composed of three apartments allowing the chicks to seek whatever temperature suits them best. The outside run is hinged to the brooder proper, so as to drop to the floor, in which position it serves as an incline between the brooder and the floor. The improved heating system used in this brooder is the same as that employed in the Style A and other Cyphers Brooders.

Price\$9.00.

CYPHERS SAFETY BROODER STOVE

These stoves positively have no equal. They furnish twice as much heat as the ordinary brooder lamp. The safety water pan on the Cyphers Safety Brooder Stove holds nearly a quart of water and extends out over the entire surface of the oil bowl, removing all danger of overheating the oil. Just the stove for use in home-made brooders. Height, 7½ inches; greatest width, 10½ inches.

Price of stove complete and ready for use, \$1.75.

CYPHERS INSULATED BROODER STOVE

For those desiring to buy brooder lamps, or stoves, we offer the Cyphers Improved Insulated Brooder stove. This new stove does away with the water jacket or reservoir required on brooder stoves usually sold for the purpose. The insulating plate of heavy galvanized iron is so placed between the burner and the oil bowl that all heat of the flame is deflected away from the oil reservoir, so that the oil remains cool at all times. The stove has a seamless bottom, hence will not leak.

Price, each.....\$1.75.

Cyphers Dry Food Hopper and Sanitary Shell and Grit Box

Price 75 Cents

These are made of heavy galvanized iron, practically indestructible and will last a life-time with ordinary usage. They are practical labor and food saving devices.

THE DRY FOOD HOPPER has two compartments—a large one for grain mixtures, holding about six quarts, and a small one for beef scrap, holding about three quarts.

THE SANITARY GRIT AND SHELL BOX has three compartments for grit, oyster shells and charcoal. Can be used for dry food hopper where a small flock is kept.

Price 50 Cents

Cyphers Wall Fountain

Cyphers Galvanized Iron Drinking Fountains

One of the most important appliances for use in the poultry yard is a truly sanitary drinking vessel.

These fountains are made of the best galvanized iron and guaranteed to last many years with proper treatment.

----------------------	----------------------	-----------------------

CYPHERS CHICK FOOD

This is a complete, scientifically compounded food for young chicks. It is a mixture of 11 different grains and seeds proportioned so as to meet all the needs of growing chicks and to thoroughly nourish them. In compounding Cyphers Chick Food, the protein (or flesh and muscle forming element) is maintained high, the carbo-hydrates (or fat and heat forming elements) are reduced to their proper proportion and the ash (or mineral elements) is in sufficient amount to supply the needs of the rapidly growing bird. If chicks are to be developed into breeders, no other food is required for the first eight weeks.

Prices: 100 lb. bag, \$2.50. Small lots, 3c per lb.

Cyphers Developing Food

Cyphers Developing Food is a special food intended for properly maturing young chicks, after they are ready to be weaned from Chick Food, and to carry them along to the age when it is desirable to place before them the larger whole grains. When the chicks are from six to eight weeks old they are able to eat, and exhibit a preference for larger particles of grain than are found in our chick food. Full directions for feeding are in every bag. Put up in sealed bags only, bearing manufacturer's trade-mark.

100 lb. bag.....\$2.25.

Cyphers Mealed Alfalfa

This is the best form of clover for use in mash food for small chicks, the meal being ground just coarse enough to give bulk to an otherwise soggy mash and thus allowing the gastric juices to become mixed with the food and to assist in thoroughly digesting it. Mealed clover contains the entire food plant—nothing is removed.

Prices: 50 lb. bag, \$1.15; 100 lb. bag, \$2.20.

Cyphers Short Cut Alfalfa

Guaranteed 95 per cent. Pure Alfalfa. Alfalfa possesses from 14 to 17 per cent. protein. Protein is the most valuable and most expensive element in all foods.

CYPHERS ROUP CURE

This remedy is positively guaranteed by the manufacturers to cure roup in all its forms. It is simply put in water and the chick takes its own medicine. It prevents and cures cold and is unequalled for canker, especially in pigeons. No poultryman can afford to be without Cyphers Roup Cure.

Price, 50c. Small size package makes 25 gallons of medicine.

CYPHERS LICE POWDER

In offering Cyphers Lice Powder we present a powder that we believe to be stronger than any other preparation sold for the purpose. It is carefully compounded and contains no chemicals that will injure the fertility of the eggs or prove dangerous to newly hatched chicks. It will positively kill lice on poultry, cattle and horses; ticks on sheep and fleas on dogs.

Prices

48 ounce package, 50c; postpaid.....\$1.00

CYPHERS EGG STIMULANT

Cyphers Egg Stimulant is a tonic and condition powder for promoting the general health. It is a condition, not a food. As a gentle stimulant of the productive organs of the fowl resulting in an increased production of eggs, this preparation has no equal. Each box contains enough to treat two bushels of food. Put up in one size package only.

Price25c Postpaid35c

OVINAPHTHOL LICE KILLING NEST EGG

Our Ovinaphthol Lice Killing Nest Egg is a combined nest egg and lice killer. By simply using it in the nests in the same manner as an ordinary nest egg is used, laying hens are cleared of lice and mites and are able to occupy the nests with comfort. Being prepared with great care for this special purpose, they last a long time and always retain their effectiveness. The genuine nest eggs bear embossed on each egg the words, "Ovinaphthol Nest Egg."

Prices: Each, 10c; per dozen, 75c.

CYPHERS INCUBATOR THERMOMETERS

CYPHERS FULL-NEST EGG FOOD

A Meat Food Tonic Conditioner That Makes Hens Lay

Full-Nest Egg Food is the standard condition powder for all ages of poultry. Besides being an unexcelled egg producer, it is a concentrated meat food possessing tonic properties which promote good health and fine condition. It stimulates and invigorates, but unlike other tonic foods, it also builds up the system and keeps it up. Many condition powders tone up the bird's system for a while, only to let it drop back as soon as the use of the tonic is discontinued. Full-Nest Egg Food will help your birds through their molt, make the feathers develop normally and induce a high state of perfection in plumage. Hens begin laying sooner after molting where this egg food is used. Full-Nest Egg Food contains no injurious drugs or chemicals; it is safe and easy to use.

“Victory” Lawn Mower

This machine has Ball Bearings of the very highest grade which reduce the friction astonishingly and render it possible to use much wider machines than heretofore.

Triple gear entirely enclosed, so that no dirt or cut grass can find its way into the pinions and clog them.

The adjustments are the simplest, most perfect, and most positive.

These mowers are high speeded and have a four bladed reel, which leaves the lawn with a very smooth and velvety surface.

“SPIDER” LAWN MOWER

WITH BALL BEARINGS

The Spider Mower is light and strong, and glides over the lawn lightly, easily and almost noiselessly reminding you strongly, as it nips off the grass, of the vigorous action of the ferocious and cunning little insect whose name it bears. This machine has finely adjusted, high grade ball bearings, which greatly reduce the friction and render it possible to use much wider machines than heretofore with parallel bearings.

Has two pawls in each pinion, making the machine much more positive and durable. The reel is four bladed and high speeded, which leaves the lawn with a very smooth and velvety surface.

Send for descriptive catalogue and prices.

The Champion Self-Feed Drag Saw Machine

LEADS ALL OTHERS.

Capacity 20 to 40 Cords Per

Day with 2 to 4 Horses.

The Reason Why This Machine Will Please You

The operator can raise saw with one hand and throw self-feed in gear with the other, thus changing and setting for a new cut with no stopping of team or slowing of motion whatever. The self-feeding machine moves the log automatically along the carriage; while with an old style hand-feed machine the log must always be moved by hand. The main length of our log carriage is 12 feet, and the length which attaches on is 8 feet, making together a splendid length of carriage.

We furnish a Disston champion-tooth saw, which has been found to give the best results and is absolutely satisfactory. It is 5½ feet long, 7x5 inches. No. 10 gauge.

It is operated with any kind of power—Tread power, Water-power, Wind-mill or Steam-engine, and can be run by either a belt or tumbling-rod.

The main shaft is 1½-inch steel in No. 1 machine, and projects sufficiently outside or beyond the frame of the machine, and is at such a height above the ground, that it gives an abundance of room for the belt-wheel, which is 24x4 inches.

The Pitman Boxes are so arranged that they are easily adjusted to compensate for any wear that may occur. All boxes are babbitted and are durable.

The stroke of saw can be adjusted to either 16, 20 or 24 inches.

Twenty feet of Log Carriage, Trucks, Rollers, Dogs, etc., are always furnished with this outfit.

Cuts faster, runs easier, wears better than any other Drag Saw machine ever made.

No. 1 Self-feed Drag Saw machine, including Log Carriage, Trucks, and all extras complete\$80.00 Weight 1,100 lbs.

No. 2 Self-feed Drag Saw-machine, including Log Carriage, Trucks, and all extras complete\$90.00 Weight 1,200 lbs.

No. 1 Machine is recommended for all ordinary farm or timber work.

No. 2 Machine has extra heavy Shafts and Boxes, otherwise same as No. 1; is recommended where extra heavy work is required, or if machine is to be driven by steam-power.

The Standard Liquid Sprayer

This Sprayer sprays a perfect mist which completely covers all parts of the plants. It will cover thoroughly from six to eight rows, depending upon the mixture and width of row. There are no nozzles to stop up or clog, no pump or pipes to be affected by chemicals. Wheels are adjustable to different width rows.

Send for Descriptive Circular.

Price \$65.00

PERFECTION SPRAYER

The most practical potato sprayer ever put on the market; it can be attached to any wagon, is very simple in construction and durable, nothing about it to get out of order.

This sprayer was got up to meet the demand for a practical and efficient sprayer at a low price.

This sprayer can be readily adjusted to rows any width apart, the liquid is conducted from the pump by two lines of rubber hose, making the pressure on the nozzles uniform, thereby insuring a perfect spray from all of the nozzles at once.

In a great many of the sprayers that are put on the market, the liquid is conducted to the spray nozzle through iron pipe, the action of the Bordeaux Mixture on this pipe soon corrodes it causing the pipe to clog and become unfit for use.

The pump is of large size, strongly constructed, and very powerful, it is also very easy working, one man can easily drive the team and work the pump.

This sprayer is always ready to do the work when wanted, it has no complicated parts to get out of order. It is sure, effective and cheap, and is so simple in construction that a child can understand it.

The pump has a dasher agitator which keeps the liquid thoroughly mixed, and is fitted to attach to the head of any oil or kerosene barrel, no extra charge made for fitting to side of barrel, if so ordered.

Every sprayer guaranteed to give perfect satisfaction. We do not furnish barrel with sprayer as they can be obtained nearer home at quite a saving in freight charges.

THE "KING OF THE CORNFIELD"

**Corn Planter and Fertilizer
Distributor**

**Superior to all for Planting Field, Ensilage and
Fodder Corn, Broom Corn, Beans,
Peas, Beets and Other Seeds
of Like Size**

This Planter is perfectly adapted to every requirement; durable and simple in construction; not liable to get out of order, in consequence of its having no gears, chains or other complicated parts to break or wear out. Anyone can at once understand and manage it. An important feature in this planter is that none of the working parts, except the Drive Wheel, are in motion only at the instant the seed and fertilizer is dropped in the hill, then it remains still until the next hill is reached. Corn planted by this machine germinates much quicker and comes up much more uniformly than if planted by hand.

Circulars and Price List mailed on application.

ECLIPSE CORN PLANTER AND FERTILIZER DISTRIBUTER

Plants Corn, Beans, Peas or Beet Seeds,
in hills, drills or checks.

Circulars and Price List mailed on application.

Standard Steel Frame Weeder

This weeder is well made, strong and durable. It has a set of runners, not shown in cut, which regulate the depth of cultivation. When the weeder is used on soft ground, and shallow cultivation is desired, the runners may be set so as to cultivate at the depth desired. They are also very useful in transporting the weeder to and from the field and from one field to another.

Price \$8.00

"The Keystone" Weeder

Can be expanded to 7½ feet and narrowed to 30 inches.

Narrowed to 30 inches

Expanded to 7 1-2 feet

The "KEYSTONE" is the only Weeder that is adjustable to any depth and width. It can be used as a shallow cultivator—working close to the plants between the rows until the crops mature—long after other weeders are laid aside.

It has no shafts that will hinder working close to the fence.

IT WILL NOT CLOG—The long, curved, spring teeth are so placed and shaped that clogging is impossible.

It is V shaped, which not only makes it a stronger tool than the straight framed weeders, but adapts itself much better to uneven surface.

Price \$9.00

Fuller's Unique Wheel Hoe No 2

For closely planted crops, as Beets, Carrots, Onions, etc., this hoe is without an equal and can be used the entire season. Having only one wheel it runs between the rows without bruising the tops, and having no frame work it does not tear the growing plants on either side. The great feature of this hoe above all others is that it can be easily and quickly adjusted to any height or pitch desired by means of thumb nuts. The entire hoe weighs less than ten pounds and yet is a most practical tool.

Price \$2.50

Fuller's Unique Wheel Hoe No 1

For cutting over yards or avenues, walks and driveways in cemeteries and parks Fuller's Unique Wheel Hoe No. 1 stands far ahead of all other tools. It is light, strong and durable and does most satisfactory work where other hoes have failed. The steel blades are exceptionally hard and heavy so as to give little wear and great resistance. Being easily adjusted to any height or pitch, the long tedious work of the hand hoe is superseded by ease and facility.

Price \$2.50

Fuller's Daisy Scuffle Hoe No. 4

This scuffle hoe is far in advance of the common scuffle hoes on the market, in that it cuts both ways having both edges of the knife sharpened and the start pitched so that it cuts equally with a draw motion toward the operator as with a push from the one using the tool. The handles are of ash six feet long. Those who have used it like it very much for hoeing over small yards and short walks, for hoeing between rows of closely planted crops, where a quick stirring of the top soil is desired. It can be used wherever a scuffle hoe is commonly used, with much better results.

Price 60 Cents

Fuller's Daisy Scuffle Hoe

No. 5

No. 5 is a short handled scuffle hoe of very light, narrow steel for hoeing and thinning celery, lettuce and all similar crops. The handle is four feet long and the steel is of good quality and bent as seen on the accompanying cut, so that there will be no clogging. It can be used in various ways, so that the entire weeding can be accomplished easier and much quicker than by ordinary methods.

Price with 8 inch blade, 50 Cents

Matthews' New Universal Gem Seed Drill, No. 18

This has been perfected to meet the demand for a low price drill. It has all the essential qualities of the larger and more expensive drills, the Seed Dial and Indicator being made from exactly the same patterns.

Price \$5.25

Matthews' New Universal Garden Drill, No. 17

NONE BETTER CAN BE PRODUCED. Medals and testimonials confirming its superiority over all other Drills have been repeatedly bestowed upon it from all quarters, and as it has been improved from time to time, it is now everywhere acknowledged to be THE MOST PERFECT DRILL MADE. It has been many years in use and its still increasing sale is the best evidence of its merits.

Price \$6.75

Matthews' New Universal "Hill and Drill" Seeder, No. 16

This Seeder is the same as the Garden Drill with the exception that it has pins in the wheel, which serve as a means for securing the various dropping distances of 4, 6, 8, 12, 16, 24 and 48 inches apart, as well as for sowing continuously in drills.

Price \$7.50.

Matthews' New Universal Constellation Drill, No. 19

With Hoe, Cultivator, Plow and Rake Attachments.

This is the same as the Garden Drill, with cultivating attachments. It can be used either as a Double Wheel or Single Wheel machine and change can be readily made. We do not particularly recommend a two-wheel seed sower, as the nicer work may be accomplished by a one-wheel machine. The two wheels are desirable, however, when used as a cultivator or wheel hoe, as in this way the rows of young plants may be straddled and the cultivating done on both sides of the rows at one passing.

Price \$8.50

New Universal Double Wheel Hoe Cultivator, Plow and Rake, No. 14

Specially Designed for Working Both Sides of the Row at One Passing

This new hand implement embraces all the good points of older efforts in the same line, and in addition offers new features which can not fail of appreciation. The special recommendation is the ADJUSTABLE ARCH, by which not only the depth of work can be gauged, but which, by an ingenious device, enables the teeth to be pitched at any angle desired.

There are nine adjustments of depth. The attachments are: 1 pair Hoes, 4 Cultivator Teeth, 1 pair Plows, 1 pair Rakes and 1 pair Vine or Leaf Guards. Price, \$5.50.

Price, with hoeing blades, only \$3.75.

Send for Descriptive Catalogue of the Universal Garden Tools.

Syracuse Steel Frame Cultivator

No. 81

Standards Separable and Adjustable. Side Shifting Handles.

A Good Cultivator at a Low Price.

No. 81.—Five 3-inch Points and Wheel

Unsurpassed for all hilling purposes. By reversing the Sweeps and fastening Center Standard to the rear end of the Bar, it is changed into an excellent Coverer.

No. 124.—Expanding lever, five 3-inch Points, Hiller Sweeps and Wheel\$5.50

Syracuse Spike Tooth Cultivator

Especially adapted to pulverize the soil and leave it smooth and level. The teeth are reversible and the pitch can be quickly changed forward or back by simply loosening one bolt at each tooth.

No. 114.—Expanding lever, fourteen Spike Teeth and Wheel....\$5.25

No. 114

Standard Pivot Axle Riding Cultivator

The greatest labor-saving device ever offered in the line of cultivation, adapted for all kinds of farmers in cultivating all kinds of crops on hillside or plain,—in fact, to practically universal use. Pivot wheels—Gang Adjusting Lever, Strong Steel Wheels, and, although it is light and simple in construction, it is very strong, and possesses many advantages not contained in far more complicated tools. Quality of material and finish is the very best.

Send for Descriptive Catalogue and Prices.

Hussey's "New Model Centennial" Lever Cultivator

Our New Lever Expander

Is simple, strong and easy to operate. Has no "Dead Centers," and no Loose Joints. Adds stiffness to the entire frame.

Price, with expanding lever.....\$7.00

Standard Steel Frame Spring Tooth Cultivator

A very strong and durable Cultivator, especially adapted for rough, stony ground.

Price, with expanding lever and five teeth, \$5.00

Syracuse Steel Frame Spring Tooth Cultivator

This series of Cultivators is especially adapted for use in stony ground. The frames are steel, strong and well put together throughout. The castings are malleable. The teeth are fine oil tempered springs and are alike and interchangeable; they are also adjustable for angle and depth.

Price, with expanding lever and five teeth, \$6.00

Syracuse Reversible Sulky Plow

Does perfect work on hillside or level land. No ridges or dead furrows. Light and strong. Simple and practical.

Two perfect Combination Plows on separate Steel Beams, operated by separate levers.

A power lift of simple design and easily handled, enabling any boy competent to handle horses, capable of running the plow.

Steel wheels running on steel axle.

With each Sulky is furnished Neck Yoke and Two-Horse Whiffletrees, Wrench and Oil Can. Descriptive Catalogue and Price mailed on application.

Syracuse Contractor's Plow

Steel truss beam. Steel mouldboard and land-side. Separate shin piece. Heavy overlaid wrought steel point. Adjustable shoe in place of wheel. Loop handle wear irons. Very strongly built. Slight turning capacity. Suitable for severe grading purposes in shale or hard pan.

No. 99. Four to eight-horse. Weight with shoe, 265 lbs. Send for Prices.

Wood Beam Wing Shovel Plow

Blades and wings of steel. Wings adjustable to throw more or less earth. Especially adapted for hilling potatoes and other light work.

Price, without wheel\$3.00

Price, with wheel\$3.25

The "Improved Bangor" Potato Hoe

This hoe is especially adapted as a potato, corn or celery hiller, or as a coverer. Wings are polished steel, are adjustable to tilt up or down on the standards and the desired distance apart by moving standards in or out upon the cross bar. The wings are made in two parts so that the end or tail of the wing can be dropped down and thus work the earth up under the tops, instead of burying them. The cross bar is strengthened with iron braces, which connect it with the pole making a strong and durable frame.

PRICE \$7.00

We also have a Potato Hoe with a one-piece wing if desired.

The Oliver Reversible Sulky Plow

A Highly Practical, Convenient and Very Simple
Tool, Specially Adapted to Side Hills and
Irregular Shaped Lands, but Equally
Useful in any Kind of Plowing

This implement consists of a pair of right and left-hand plows, mounted in a heavy steel frame, each plow having a separate bail. While one plow is in operation the other is hung up out of the way, high enough to escape all trash.

**This Plow is Without Question the STRONGEST
REVERSIBLE SULKY PLOW on the Market**

Write for Descriptive Catalogue and Prices.

The Yankee Pulverizer

A superior Disc Harrow, combining all the late improvements.

Send for Descriptive Catalogue
and Prices.

We have this harrow in the cuterway
patterns if desired.

The Morgan Spading Harrow

The Morgan Spading Harrow is an "all around general purpose Harrow" and is adapted to all soils and conditions of soils. While not particularly attractive or handsome in appearance, a trial will convince any farmer that it will do the work. As a pulverizer, it is unequalled, and especially on broken or uneven surfaces, among stones, in sod or heavy clay. It has more cutting surfaces than any pulverizer in the market. The high arched frame allows it to pass over obstructions easily. The blades are S-shaped and ground sharp on the cutting edges and overlap; they cut into and lift the soil to a depth of 4 to 6 inches, turning and pulverizing the ground precisely like the hand spade. The gangs which float

freely can be adjusted to any desired angle by the hand levers. The cleaners are stationary and clean the blades, no matter what the condition of the soil.

Send for Descriptive Circular and Prices

Old Original Perry Harrow

The Wood Frame Perry Harrow is the most durable of the spring tooth harrows. Is simplicity itself. Iron plated on the under side and in front, the entire length. Teeth cannot get loose. No levers or joints to wear and get out of repair. Harrows of this kind have been in constant use for fifteen years.

PRICES

14-Tooth, \$10.00; 16-Tooth, \$10.00; 18-Tooth, \$11.00.

Aberdeen Spring Tooth Lever Harrow

Made entirely of steel and malleable iron; teeth set to any required depth. Tooth bars round and well elevated to prevent clogging.

PRICES

15-Tooth\$16.00
17-Tooth\$17.00

Syracuse Spring Tooth Lever Harrow

This style of Harrow has an advantage over the ordinary float harrow in that the depth of work can be quickly changed even while the harrow is in motion, and by operating the levers a uniform depth can be maintained in soils of variable hardness. The harrow will clog less and clear easier than any other harrow on the market.

15-Tooth Harrow\$16.00
17-Tooth Harrow\$17.00

Syracuse 1-Horse Spring Tooth Harrow

Frame of steel similar to Two-horse Harrow and is the best One-horse Harrow in the market.

Ten Tooth With Lever

Price \$9.00

REVERSIBLE SMOOTHING HARROW

The teeth are reversible, namely by the draw bar being attached to one end of the harrow, they are slanting, as shown in cut, while if attached to the other end they are vertical, same as the ordinary harrow. With the teeth slanting, it is a smoothing harrow. This is not only a smoothing Harrow, but a Pulverizer, a Leveler, a broadcast Weeder and Seed Coverer. It is made in sections of twenty-four teeth each. Two, three or four sections may be, but usually three are used.

Two Section Peerless Smoothing Harrow, weight 135 lbs.....\$10.00

Three Section Peerless Smoothing Harrow, weight 200 lbs.....\$14.50

Superior Steel Land Rollers

This roller has cushioned rims, and will, therefore, stand that which no other roller will. More Superior Steel Rollers in use than all others put together.

Barrel Header

This is the most simple labor-saving machine ever invented for heading up barrels and is used extensively for heading up apples, fish and other merchandise.

1-inch Iron Screw (attached follower).....\$1.20

Wright's Animal Tether

This device is designed to obviate the danger of horses and other animals becoming entangled in the rope with which they are fastened. It consists of a pole about ten feet in length, connected with an upright bar, upon which it turns in any direction. The animal is fastened to the end of this pole by a rope, which is kept taut above his head by means of a spring at the base of the pole; this keeps the pole high in the air until in reaching for the feed the animal pulls it down, thus at all times keeping the rope from under his feet.

Improved White Mountain Freezers

This is universally the favorite family Ice Cream Freezer, because it combines more excellences than all the other family freezers made. It is the only freezer made with a duplex dasher and double self-adjusting scrapers, which, by keeping every particle of cream in constant motion, causes it to freeze faster and more evenly than can possibly be accomplished by any other freezer.

CHAMPION MILK COOLER AND AERATOR

This is a perfect Aerator, removing flavors arising from excessive cabbage, turnip or silo rations.

It is a complete Deodorizer, removing the animal heat or cowy taste and all odors arising from the absorption by the milk of stable or other unpleasant gases.

It is a thorough Cooler, reducing the temperature of the milk in one minute nearly to the temperature of the cooling medium.

It is equally well adapted to the use of any cooling medium, either running water, or ice water.

Every farmer or milkman handling milk cannot afford to be without one.

The Blanchard Print Butter Carrier

This Carrier is designed more especially for the use of dairymen who deliver their butter directly to the consumer, though they are largely used for express shipments, and are substantially made so as to withstand considerable rough treatment. The trimmings are japanned throughout, the covers are strongly cleated and hinged; the corners are dovetailed; the finish first-class.

Buckley's Patent Watering Device

FOR WATERING STOCK IN STABLES

Water in the stable is a necessity for the proper caring of the stock; it should be of suitable temperature, and the stock should have constant access to it.

This is the most practical and economical device for watering cattle in the stable. The iron basins can be kept clean much easier than any form of wooden troughs and there is nothing to wear or rot out.

The check valve at the bottom of each basin prevents clogging of pipes because no hay, meal or other substances can be drawn into them. It also greatly prevents the spread of contagious disease, as the supply of each basin is drawn directly from the main reservoir.

Water from a spring or reservoir is piped into a small tank, and the level of water in the basins is controlled automatically by a float valve or an overflow in this tank.

PRICE.

Stanchion Basins, with brass valve seat and aluminum valve\$1.50 each

New England Root and Vegetable Cutter

This machine is made with a wrought shaft with sections of knives fastened to it and arranged so that a rotation of knives is continually passing a bed knife with cross knives passing between the section of knives; cutting always near the center shaft, making it cut easy and fine enough for cattle or sheep; also making a very regular cut. It will cut one bushel of roots per minute.

Price \$6.00

PREPARED LIME

This Lime is specially prepared for use in making Bordeaux Mixture and is being extensively used for that purpose.

Much better results may be obtained from the use of this lime than from the ordinary lime, from the fact that no further slacking or screening is necessary, hence clogging of the sprayer is overcome by its use.

The following has been found to be the most satisfactory formula for making Bordeaux Mixture: Six pounds prepared lime, five pounds copper sulphate and 50 gallons of water.

Prepared Lime is in a powdered form and put up in one hundred pound bags.

Price, per pound 2 cents.

Price, per 100 pound bag \$1.00.

Lion Brand Bordeaux Mixture

This mixture is a scientific preparation and combined in a manner heretofore unknown, thus enabling the manufacturer to place it on the market in a practical and usable shape, as by simply adding water and stirring, it is ready for use.

One gallon will make 50 gallons by the addition of 49 gallons of water. Actual cost to you when ready for use 2 cents per gallon.

BUG DEATH

Pat. March 16 and Nov. 9, 1897.

Pat. in Canada Nov. 2, 1897.

No other agent can do this Bug Death must be the reliance of the fruit grower, who by spraying seeks after perfect fruit.

Bug Death costs you nothing The increased yield and improved quality more than pays the expense. A perfectly sure, safe and effective insecticide.

Bug Death kills the potato, squash and cucumber bug, currant and tomato worm, also other plant and vine eating pests.

Directions for Spraying One Acre of Potatoes with Bug Death

Fill a pail or bucket, holding about 12 quarts, half full of water. Stir 15 to 25 lbs. Bug Death into this water (the larger amount will pay best). Fill sprayer tank nearly full with clear water (not too cold), then pour Bug Death from bucket into tank and start machine at once, being sure that agitator is working properly.

Directions for Spraying One Acre of Potatoes with Bug Death and Bordeaux Mixture

Dissolve 6 lbs. copper sulphate (blue vitriol) in 6 gallons of water. Slack 6 lbs. lump lime, slowly adding water as it slacks, being careful not to burn the lime. When thoroughly slacked, strain it through about a No. 50 wire strainer to remove any lumps before it goes into sprayer. When ready to spray, fill tank two-thirds full of clear water (not too cold) and add the 6 gallons blue vitriol water. Next put in 15 to 25 lbs. Bug Death (first mix Bug Death in pail of water, same as under directions for using Bug Death alone). Fill tank almost full of clear water; lastly put in the lime water. Stir well with a stick and start machine at once, being sure that agitator is working properly. Bug Death kills all insects and being very adhesive holds the mixture on to the vines throughout the season, and can be applied in damp weather as rain will not wash it off.

The above solution, if properly applied, will positively prevent blight on potatoes, tomatoes, etc.

IF USED DRY

Apply with Dickey Bug Death Duster or a cloth bag of right mesh; 12½ to 25 lbs. per acre per application. The more freely used the better the plant will thrive. Dust plant evenly and thoroughly.

Dickey Duster

PRICE LIST

One Pound Package	\$.15	Twelve and One-Half Pound Package..	\$1.00

Five Pound Package	\$.50	Dickey Duster	\$.25

ENGLISH BUG COMPOUND

A BUG KILLING WONDER

A safe, sure and cheap insecticide for destroying the pests, which attack Potato Vines, Cabbages, Squash, Cucumber, Melons, Tobacco, Currant, Rose Bushes (Chaffer), Pear, Cherry, Plum, or Quince Slug, Grapevine, Flea Beetle, Raspberry, Gooseberry, Small Shrubs, or for killing any coleopterous Bug whatever.

English Bug Compound kills every coleopterous insect known. It is a combination of chemical poison and fertilizers, mechanically incorporated in a manner that prevents loss of strength by evaporation or by age. It is a dark, gray colored, flour fine powder, and its application to the afflicted plant, kills the bugs at once and promotes the growth when the insects are destroyed.

It is an established fact that a Paris Green water mixture produces a lifeless, soggy potato; while the use of English Bug Compound (at a great ultimate saving) brings forth a healthy, hardy, nutritious vegetable. The smallest grain acts as a deadly poison to the bugs and is food and drink to the vine. The extreme fineness allows a most thorough distribution and the smallest quantity will spread itself over a large space.

Send for circular showing testimonials from some of the prominent farmers who have used English Bug Compound. We sold a carload of these goods last year and found them very satisfactory. English Bug Compound does not burn or injure the vine, and is sure death to the bugs.

Price

Per pound	\$.04.
Per 100 pounds	\$3.00.

KNOX=EM=ALL

FLY OIL. THE BEST THING ON THE MARKET

For ridding Horses and Cattle of flies and all insect pests. And Poultry of lice and mites. Gad flies will not work on Sheep and they will not have Grub in the head. Inoffensive and harmless to persons and stock. Deadly to flies and lice. One hundred per cent. more lasting in effect than other kinds.

Contains no fish oil or other objectionable ingredient. Can be used freely on Cows' Bags without inconvenience to milker or injury to the milk.

Cows give more milk and pay \$8 to \$10 per head more during the season at a cost of about 50 cents per cow. It can be used on horses without gumming or otherwise injuring the hair, and affords instant relief, making them thrive and drive better.

Directions:—For flies apply freely with a good sprayer. For lice spray the roosts, nests, and all places where vermin find lodgment, including the poultry when on the roosts.

Brighten Up

THE great and growing demand for S-W. Paints and Varnishes is essentially the result of quality. Quality may be summed up as covering capacity, working and wearing qualities and appearance, but none of these things are possible without "specializing." The Sherwin-Williams Co. specialize—a product for each purpose and that the best it is possible to make for that purpose.

Sherwin-Williams Paint, Prepared (S. W. P.), is the most economical paint procurable for painting buildings outside and inside; it will cover more surface and require less of the painter's time and labor than any other paint; it will look better when on the job and remain there longer. In other words S. W. P. costs less by the job. This is the only way to arrive at the cost of paint—not by what it costs per gallon.

S-W. Varnishes are also "specialties"—a special varnish for every purpose. They are so skillfully made, and so long and thoroughly aged before being put on the market, that they have become the highest standard in varnish.

A list of S-W. Specialties is shown on the reverse of this sheet. These are "Brighten Up" goods. The value and satisfaction of having the contents of the house "Brightened Up" once or twice a year is out of all proportion to the cost in time and material. You can attend to "Brightening Up" in your spare time at a very small cost. If you look around the house in the Spring or Fall you can see what needs "Brightening Up." No matter what it is—a shabby chair, a worn floor, dingy cupboards—there is an S-W. Specialty made especially for refinishing it.

In buying Paris Green you must be sure of the Quality. The way to do this is to use Sherwin-Williams Paris Green. It is both expensive and unsatisfactory to experiment with an inferior make. S-W. Paris Green is both uniform in quality and reliable in action. The use of free arsenic cheapens Paris Green but makes it more dangerous to handle and causes it to blight the vegetation and diminish the crop. On account of its purity and strength S-W. Paris Green will produce more uniformly poisoned spray and spray a larger acreage than any other make.

THE SHERWIN-WILLIAMS PAINTS AND VARNISHES

Per 500	\$2.75.
Per 1,000	\$5.25.

Double Grooved Foundation Fastening Hoffman Self-Spacing Brood Frames

As thick-top frames practically prevent the building of burr combs, frames with a thick top bar are almost universally used. The top bar is $\frac{7}{8}$ -in. thick and $1\frac{1}{8}$ -in. wide. The top bar is made with a double groove on the under side. One of the grooves is fitted with a bevel strip which presses the thin piece between the grooves against the foundation holding it perfectly straight and exactly in the center of the top bar. To put in foundation, insert edge in the groove in center of top bar, slip in the wedge in other groove and tack in place with two or three small wire nails.

Prices not set up

Per lot of 10.....\$.35.

Per lot of 100.....\$3.00.

COMB FOUNDATION

This foundation is made from the best grade of pure beeswax and before being made into foundation is entirely cleansed of all foreign substances.

Prices

Standard Brood..60c per lb. Light Section..68c per lb.

If foundation is wanted by mail, add 25 cents per pound for postage.

BEE KEEPERS' SUPPLIES

FIVE BAR BEE VEIL

Has five cross bars riveted through the center at the top. These button to studs on the neckband. The bars are light spring steel, the neckband is of hard spring brass and the cover is of handsome, light material. It is very easily put together—no trouble to put on or take off. It protects against mosquitoes, flies, bees, gnats, etc. The veil weighs only five ounces. Price, \$1.00.

Parker's Machine for Fastening Starters in Section Boxes

Fasten machine to table with screws that are sent with it. Dampen the under side of point of lever with honey or water to prevent its sticking to the foundation. Place section in position with strip of foundation just under the end of lever; press lever down on foundation by lifting handle, turn foundation up against end of lever and slide lever off of foundation by lifting on handle and drawing it backward, which fastens the foundation to section.

Price for $4\frac{1}{4} \times 4\frac{1}{4}$ section... 30 cents.
By mail 45 cents.

PAGE FEEDER

One of the best feeders for feeding over the brood nest. It is made from a solid block of wood and is covered with wire cloth. It has a bee space under bottom and also at top between wire cloth and top of partitions. Bees cannot escape while feeder is being filled. A small hole cut in mat and feeder set over same will be found a convenient way of using it, but it can be used in many ways.

Each nailed up complete, 40c; by mail, 65c.

Corneil Smoker

Price, 90c each.
