America's Greatest Seed Establishment

Greetings to Our Friends and Customers Everywhere

IN inviting and welcoming you to continue favoring us with your valued orders again this season, we are actuated by two distinct emotions—Pride and Gratitude. A Pride that is pardonable because the glorious new year of 1908 finds us located in and occupying our Magnificent New Home. The most auspicious event in our career marking also the attainment of our one high aim. A record striven for and accomplished, viz., "America's Greatest Seed Establishment."

A Gratitude that gladly acknowledges an indebtedness for favors received; at the same time realizing that the unique position attained by this House, is due entirely to the unremitting friendship and support that has been bestowed upon us by our Friends and Customers everywhere.

Therefore, it is with profound sincerity that we ask you to again favor us with your valued orders, as we are sure that when you do, it will mean the celebration of a success that both yourself and family, as well as our house and the writer will enjoy.

Yours very truly,

St. Louis Seed Co.

January 1st, 1908.

Did You Receive Your Present?

"NICHOL"

LAST season I offered to each of Our Customers, a beautiful Life Size Bromide Portrait of themselves, valued at \$10.00 Absolutely Free, and owing to the enormous demand our artist's have been working almost day and night ever since, every mail bringing in requests for these magnificent Portraits, until today I believe we have made and shipped out over 200,000 Portraits. Did you receive yours? If so it is needless to dwell on the beauty and exquisiteness of life like expression contained thereon. I will venture to say that never before has any house ever given its customers such a handsome present, and while it cost us a large amount of money, yet I am glad we spent it for I feel as though we have been benefitted to twice the extent we would have been had we spent a like amount in the newspapers.

This season I am going to make a more liberal offering than I did last year. I am going to give a Beautiful Frame Free with each Picture and not charge you a cent for either one, and that is not all, each portrait will be worked up in water colors. Can you imagine anything more beautiful? But before I go further I want to urge you to send for yours at once. I know there is going to be a terrific demand and as I dislike to see a portrait delayed, yet I know that a great many will have to wait until the busy season before sending for theirs, therefore necessitating a few days delay and in justice to both yourself and the artists, I urge you to send for yours before the Big Rush.

on a Journey of Adver-
tising
for us

I believe it pays to give our customers the benefit of our advertising appropriation, instead of spending it promiscuously among the magazines and newspapers.

A Million Dollars Worth of Presents FREE! FREE! FREE!

When we say FREE, we mean FREE. We do not ask you to send us any money for the present, we do not ask you to do any work for us. We simply require that you send us your order, then the present is yours. Can anything be fairer?

READ EVERY WORD ON THIS PAGE.

When we say we will give \$1,000,000.00 worth of presents away, to our customers, we mean it. Many will say it is impossible. Such is not the case. It is possible, and we will do just what we say we will do, providing we receive enough orders to send out the above number of presents.

OUR GREAT BIG FREE OFFER FOR 1908.

Last season our customers know we advertised we would give away absolutely **FREE**, a beautiful life size (16x20 in.) bromide portrait, reproduced from any photo sent us, providing the sender would favor us with an order for at least \$1.50 (one dollar and fifty cents) worth of packet seed, selected from our catalog. The number of such orders we received was phenomenal; in fact they far surpassed our expectations, and why? Simply because our customers had faith in us and knew that we would do exactly as we agreed. But nevertheless giving away the portraits last season was merely an experiment with us, and we decided that if it was a success we would eclipse all records this season by giving away to our customers not only an enlarged portrait, but instead a portrait that is hand colored, as well as a handsome frame to match, **ABSOLUTELY FREE**. That is what we offer you now. If you are interested and desire a Beautiful Water Colored Portrait of yourself, your father or mother, or any friend, or last but not least your sweetheart, in a Beautiful Frame, then send us your order and a photo to copy from, and the present will be returned to you promptly as possible.

A Miniature Reproduction of the Beautiful Water Colored Portrait and Handsome Frame which we Offer You Absolutely Free.

WHAT TO DO TO OBTAIN THIS BEAUTIFUL PORTRAIT.

When you send us your order, send us your photograph (a cabinet if possible, clear and distinct, otherwise we cannot guarantee a first-class reproduction); our artists will then reproduce a beautiful cabinet water colored medallion portrait which will look exactly like the photo copied from (except the finish, which will be beautifully colored); as the camera reproduces exactly like copy, you need have no fear of not obtaining the likeness, which is nearly always the case when copied by hand in crayon. The portrait which we send you will please and surprise you beyond doubt. Your original photograph will be returned to you in the same condition received by us. All water colored portraits and frames must be shipped by express; of course you must pay the transportation charges, when received, which will be from 25c to 35c, according to distance; transferring by express companies where necessary, may slightly increase the above charges, but for all through points the above rate will apply.

NOTICE:—Each water colored portrait which we send out is handsomely mounted on black ebonized glass and framed in a magnificent gilded frame. (See cut).

REMEMBER:—We do not charge our customers one penny for the above, we only require that you send us your order as specified below.

IMPORTANT: READ THESE INSTRUCTIONS CAREFULLY.

In order to receive one of these handsome water colored portraits and frame free, you must send us an order for seeds in packets amounting to at least \$1.50; remember, packets, not ozs., ¼ lbs., ½ lbs., 1 lb., pkgs., bus., or bulk seed of any kind, neither tools, implements or supplies. The above present is for you when your order contains packet seed to the amount of \$1.50, and we positively cannot allow you any other discount when giving you this beautiful present. If you want one of these elaborate portraits, send us your order today. Please note: It usually requires about five days for making and framing portrait, therefore on account of the enormous rush, your photo must take its turn, and it will be shipped to you as soon as completed, which may be a few days later. However, you may rest assured we will ship it as soon as possible.

WHY WE GIVE THIS BEAUTIFUL PORTRAIT AND FRAME FREE.

Every house has their own theory for increasing their trade. Giving away presents is ours. This catalog goes to thousands of new friends yearly. If you are one of them and have never planted our "Pure and Sure" Seeds, our offer to you of a beautiful water colored portrait and frame will induce you to send us at least a trial order this season. Next season we will not need to offer you a present to obtain your order; you will be so located over the marvelous yields obtained from the seeds we send you that we will get both your and your neighbor's orders without any argument. Each season we spend thousands of dollars in the newspapers and in return receive thousands of new customers. This year we will increase our appropriation and give our customers the benefit. Remember, our old customers are just as welcome to one of these beautiful portraits as our new customers. Then do not delay, send us your order today.

OUR TERMS and GENERAL INFORMATION ABOUT ORDERING.

Please Read Carefully Before Sending Your Order.

WHAT WE PAY THE POSTAGE ON—We pay the postage on goods priced in this Catalog only where we say "Postpaid" after the price or somewhere else on the page. Generally speaking, we pay postage on Vegetable and Flower Seeds in packets, ounces and ¼ lbs., also on half pints, pints and quarts where specified and on Bulbs where noted. Seeds ordered at freight or express prices cost you 10c extra per pound for postage when requested sent by mail, which must be remitted when ordering. Mexico Postage same as United States and possessions. Canadian Postage 1c for each ounce or fraction thereof.

HOW TO REMIT—Money may be sent to us in the following manner: Postoffice order, draft on St. Louis or New York, or by express. Remittances for small amounts may be made in U. S. 2c postage stamps. If you send personal checks, add 15c additional, as it will cost us 15c each to collect. In remitting, purchasers will be particular to send a sufficient amount to cover their orders. When only a part is remitted, goods will be sent to the amount of the remittance only.

IF ON A "RURAL ROUTE," please see that we have your mail properly directed. If this Catalog was not correctly addressed, please advise us.

ABOUT WARRANTING—While we thoroughly test each and every variety, and we positively will not send out any seeds which we do not believe to be "Pure and Sure" in every respect, yet owing to the many contingencies on which the success of any crop depends, such as the weather being too dry or too wet, sowing too deep or too shallow, an attack of insects, etc., etc., hence it would be unwise, folly, for us to guarantee a perfect crop. *Therefore, St. Louis Seed Company gives no warranty, express or implied, as to description, quality, productiveness or any other manner, of any seeds, bulbs or plants they send out, and they will not be in any way responsible for the crop. If the purchaser does not accept the goods on these terms, they are at once to be returned.*—St. L. S. Co.

Every order for goods named in this Catalog will be executed on these conditions only. This is the same disclaimer as used by other responsible seed houses. All prices throughout this Catalog are subject to important market changes.

SHIPPING DIRECTIONS—We deliver our goods to any railroad depot or express office in St. Louis, as you may direct, the purchaser to pay transportation upon receipt of goods, except where ordered at prices including postage for forwarding by mail. Give your shipping instructions plainly, and if none are designated we shall exercise our best judgment as to forwarding. The day a shipment leaves we always advise by a card through the mail that goods are coming by express or freight. It is often necessary to ship different goods in two separate packages. Frequently we find that goods can be forwarded cheaper and safer by prepaid express than by mail, although you may instruct us to mail them. Please Note—We will not send any shipment weighing 20 lbs. or less by freight. All heavy orders will be shipped by freight unless otherwise ordered. *If you are in a hurry for your seeds and desire them shipped by express, state so; also mark your order **RUSH**.*

PACKET DISCOUNT—We sell 25 5c packets of seeds for \$1.00. 10c pkt counts as two 5c pkts; 25c pkt as five 5c pkts, etc. We allow discount on packet seed only, and then only when portrait offer on inside front cover page is not taken advantage of. Should you not make your selection, we will add discount packets gratis, or you may add the additional variety of seeds you prefer. **FOR EXAMPLE:** Remit us \$1.00 for each \$1.25 worth of packets ordered.

WHOLESALE PRICES for quantities not listed, after varieties throughout this Catalog, will be found on pages 4, 5 and 6. Write us for special prices on large orders.

The Plow is used to designate our own private strains, which are the best that can be grown. Watch for it throughout this Catalog. When planting these varieties you will have no cause for alarm.

Wholesale Price List of "PURE AND SURE" Seeds

For Gardeners, Truckers and Associations

If Goods ordered from this list are to be mailed, 10c PER POUND or 15c PER QUART must be sent IN ADDITION TO THESE PRICES. We do not pay the postage on seeds listed on pages 4, 5 and 6.

Having previously placed unusually heavy contracts with our private growers for this year's supply of seed, and having also grown an exceeding large quantity of our own private strains, we are not at all inconvenienced by the short crops of many varieties, as are several other seed houses, who have pasted slips with prices, in their catalogs, notifying their customers of the short crop and increase in prices.

We are in position to sell at the prices quoted in this catalog, which are **WHOLESALE** **DIRECT TO THE CONSUMER**; write us for special prices on larger lots than quoted here.

St. L. S. Co.'s Longfellow Bean

AN EXTRA EARLY VARIETY OF SUPERB MERIT
EXCEEDINGLY PROLIFIC—THE "QUALITY" SNAP BEAN

St. L. S. Co.'s Longfellow Bean.

WHEN we offered this remarkable extra early snap bean to our customers a couple of seasons ago on our novelty pages, we anticipated that surely before this time we could supplant the space with another bean of equal or superior merit, but such is not the case. In fact we doubt if ever a better green-podded bush variety will be discovered; say what we may we cannot estimate the many good qualities of our private strain of Longfellow. Its handsome straight fleshy solid pods averaging from 6 to 7 inches in length, together with its captivating delicious flavor make it a bean so much in demand, that gardeners have been unable to supply the trade. Owing to its extra earliness it is ready for market fully a week before its nearest rival. Price: ½ pt 15c; pt 20c; qt 35c; postpaid.

In short we consider this the ideal beet of the day. Price: Pkt 10c; oz 20c; ¼ lb 50c; postpaid.

OUR NEW OFFERINGS THIS SEASON CANNOT BE SURPASSED.

This is the Cabbage that has made more Money for Gardeners than any other Variety ever discovered.

St. L. S. Co.'s NEW "AMERICAN KING" CABBAGE.

SUCCEEDS WHERE ALL OTHER VARIETIES FAIL. THE BEST KEEPER. THE LARGEST HEADED. THE FINEST QUALITY.

FOR family or market garden, for forcing or cold frames, this peerless main crop cabbage has proven its superiority over all other rivals. Its mammoth solid heads and its unique short stem make it a marvel of beauty. Introduced by us in 1904, it has met with universal praise everywhere. Mammoth, solid heads, weighing from 25 to 30 pounds are common sights in a field of this wonderful late Cabbage. We could not offer you anything better if we had the world's entire output of cabbage to select from. Its chief points of merit are its absolute reliability as a sure cropper, its uniformly large size of head, its great drought and worm-proof qualities, its sturdy constitution and its long standing character. In all points it excels by far all other late Cabbage. A very prominent and distinct feature of the AMERICAN KING is the small number of ribs and their

remarkable smallness in size. This stamps it of the highest table quality, whether for boiling, slicing or kraut. It is ready for use quite as early as any other fall Cabbage, but if allowed to stand in the field it will continue growing until it assumes an immense size. This marvelous new Cabbage will pay and surprise you beyond doubt. Pkt 10c; 1/2 oz 25c; oz 40c; 1/2 lb \$1.30; postpaid. For larger quantities see Wholesale Page.

NICHOL'S SUPERIOR SWEET CORN

OUR GREAT NEW SWEET CORN OFFERING FOR 1908

Its Delicious, Plump, Pearly White, Milky Kernels,
Fairly Melt in Your Mouth.

THIS new early variety is undoubtedly the most productive of all sweet corn as well as the finest ever discovered. Its mammoth yielding qualities are due to the fact, that nearly every stalk produces from 3 to 6 mammoth luscious ears of the finest quality. In fact its chief quality lies in the point, that it is the sweetest and most tender of any corn, as well as producing the most handsome ears imaginable. The stalk in itself is very distinct, growing only of medium height, but very thick; its firm husks insure it with retaining its sweetness longer than any other variety. In short it is the biggest, the best and sweetest corn we have ever offered, and our customers know what this means. Whether you plant for the home or the market garden we urge you to try this new Sweet Corn this season and you will have roasting ears such as you never saw before. Introduced by us two seasons ago, it is now planted in both hemispheres, in fact words of praise come to us from almost every civilized country. It is simply impossible to describe the good qualities of this new garden wonder, originated by our Mr. Wm. F. Nichol, the world's greatest Tomato specialist, who a few years ago discovered it. When we introduced it the demand for the seed was phenomenal. Gardeners realized that it was the Tomato they had been in search of, and some wrote us that they would not begrudge us \$25 a pound for the seed, were it necessary. ST. L. S. Co.'s NEW BURRELL GEM MUSKMELON.

The Melon that the Entire Country has Gone Wild Over.

Two seasons ago the originator shipped in a supply to the St. Louis market, and the demand became so great for then that the commission men could not supply the local trade. Consumers gladly paid 20 and 25c each for the New Burrell Gem in preference to paying 5 and 10 cents for "Rocky Fords." After sampling this famous melon we immediately closed a contract with the originator for all of his stock, seed, etc. It cost us an enormous price, but we want to give our customers the benefit of the new offer-

IT IS HARD

To sell a man seeds this year, whose crop was a failure last year. **NOTE**—Our business grows because our seeds "grow." If your crop failed you last year you didn't buy your seeds from us.

CARROTS is one of the rooted vegetables that should be cultivated extensively on every farm, for the reason that they are one of the best paying crops. To farmers and stockfeeders they are almost indispensable. One acre will yield from 800 to 1,000 bushels, which will insure you with a large supply of nutritious food for your cattle, horses, sheep and hogs.

New Golden Stump Rooted.

For market gardeners they are supreme, being sought after eagerly by hotels, restaurants, etc., and for home use there is nothing nicer than to be able to store away a large supply for the long winter months, when a nice bowl of carrot flavored soup is so much in demand.

Culture—Sow in the spring just as soon as the ground is in good working order, in drills 16 to 18 inches apart and about one-half inch deep. For field culture sow in drills from 20 to 30 inches apart pressing the ground over firmly, as the seed is slow to germinate. Carrots are very productive, as well as a good money making crop.

NEW GOLDEN STUMP-ROOTED CARROT.

Offered by us two seasons ago for the first time. Again we unhesitatingly say it is the finest carrot that either we or anyone else ever offered. It is a magnificent stump-rooted carrot of a rich golden orange shade, and of a most excellent flavor. It is valuable for all uses, owing to its extreme sweetness and its enormous yielding merits; it will prove a bonanza to either the gardener or the stock raiser; ripening as it does very early, it also surpasses every other known variety in size, shape, yield and quality. (See cut.) Pkt 10c; oz 15c; ¼ lb 40c; postpaid.

DANVERS HALF LONG—The leading standard variety, grown extensively for table use as well as for stock feeding. Fresh is of a dark orange color, very tender and appetizing; roots are of a medium length and taper proportionately; a great favorite with market gardeners; very sweet and productive. Pkt 5c; oz 10c; ¼ lb 25c; postpaid.

OXHEART (Guerande)—A beautiful, short, thick, stump-rooted variety, a heavy yielder and an ideal table variety, looked upon by market gardeners as one of the standard sorts. The roots are very smooth and cylindrical; meat of a delicious bright orange color; in fact, it is an ideal summer variety in every respect. Pkt 5c; oz 10c; ¼ lb 25c; postpaid.

EARLY SCARLET HORN—A favorite home garden variety, very early and of a very luscious, appetizing flavor. The meat is closely grained, stump-rooted and has very small tops. Grows well in shallow soil; very productive. Pkt 5c; oz 10c; ¼ lb 25c; postpaid.

HALF LONG SCARLET STUMP-ROOTED—One of the finest carrots ever grown; almost coreless; an excellent market variety with meat and flavor that is simply delicious. Medium early and of medium size. Pkt 5c; oz 10c; ¼ lb 25c; postpaid.

IMPROVED LONG ORANGE—A large, sweet, thick, tender, appetizing carrot, an immense yielder and an ideal variety for both table and stock feeding. Pkt 5c; oz 10c; ¼ lb 25c; postpaid.

ST. VALERY—In our new private strain of St Valery we offer you one of the Best. This wonderful carrot stands undoubtedly the undefeated conqueror of all rivals. For stock as well as for table use it cannot be surpassed. It is a great money maker and no one will do wrong to grow it for market. In size it is large, being from 10 to 12 inches in length and 2 to 3 inches in diameter at the top, gradually tapering throughout. Rich, deep orange in color and unusually smooth and attractive in appearance. Of very fine quality and is entirely free from hard core. An enormous yielder. We can not too highly recommend it. Pkt 5c; oz 10c; ¼ lb 25c; postpaid.

"Your St. Louis Late Market Cabbage is O. K. I was the only market gardener in our vicinity that marketed cabbage to the end of the season. I am more than pleased, as you may think, when I tell you I am building an addition to my house from the proceeds of that profitable crop of cabbage."

It is now planted in large areas all over the country for market, and the growers tell us that we have a strain which is better than that of any other seedsmen. The growers we refer to have tried it from all the best houses in the country. There is bound to be a heavy demand for it this season. Heads are of round, flat type. Matures almost as early as Wakefield, and fully a week earlier than any other flathead variety.

"I have tried several seed houses in the East, but none ever give the returns as yours did and never came near my expectations. I will get my seeds from your house in the future."

CELERY.

One ounce of seed will produce about 5,000 plants.

CELERY is undoubtedly one of the leading luxuries of the garden. Sow seed in boxes for early crop, transplanting as soon as ground is moist and warm. Celery thrives best in a rich, loamy soil. For main crop sow in open ground latter part of March or first of April, according to climate, stirring soil thoroughly as soon as plants are well up. Celery seed germinates slowly, but after breaking above the ground grows rapidly.

GOLDEN SELF-BLANCHING—This is undoubtedly the finest celery in cultivation. It is certainly the most popular early variety, and for the home and market garden it cannot be surpassed. Grows about 18 to 20 inches in height, unusually stocky and heavy. Straight, vigorous stalks of beautiful appearance and delicious flavor. A good keeper, a rapid seller, always very brittle and tender. Pkt 5c; ½ oz 15c; oz 25c; ¼ lb 75c; postpaid.

GOLDEN HEART—Very fine. When blanched the heart is of a beautiful, waxy, golden yellow color. Very showy and attractive. Dwarf Pkt 5c; ½ oz 10c; oz 20c; ¼ lb 50c; postpaid.

GIANT PASCAL—The largest ribbed variety. The stalks are very large, thick, solid, crisp, and of a rich, nutty flavor; blanches very easily and quickly, and retains its freshness a long time after being marketed. Good for the South. Practically a green-leaved selection of Golden Self-Blanching. Pkt 5c; ½ oz 10c; oz 15c; ¼ lb 45c; postpaid.

PINK BEAUTY

The Pink or Red Celeries, in quality, are particularly fine; while they are not only said to be better keepers than either the yellow or white varieties, they make a beautiful ornament for the dinner table, heart and stems being shaded to a fine rose color. Very rich in flavor and crisp. Pkt 5c; ½ oz 10c; oz 20c; ¼ lb 75c; postpaid.

WHITE PLUME—One of the most desirable home garden varieties. Is earlier than Golden Self-Blanching, but is white instead of yellow. Is not quite so large nor as good a keeper, but blanches equally as well. This famous variety is popular with market gardeners, and there are none better for the smaller home garden. Also very brittle, tender and appetizing. Pkt 5c; ½ oz 10c; oz 20c; ¼ lb 50c; postpaid.

SOUP OR FLAVORING CELERY—Excellent for flavoring soups, etc. Pkt 5c; ½ oz 10c; oz 15c; ¼ lb 30c; postpaid.

Here is the melon—the one we prophesied would become the leading muskmelon. Has our prophecy come true? Well, we wish you could see the wonderful reports of praise, in fact this wonderful new melon has taken the country by storm. Melon growers are enthusiastic in praise of this sweet green-flesh variety. Owing to its well-ribbed, heavily netted, compact form, it has proven to be one of the best shipping varieties. It grows larger than the Hackensack, almost round, being a trifle flat at the stem end. Its handsome appearance far supersedes anything ever before seen in the Muskmelon world and will prove a bonanza to the market gardener. It is the melon that those who want to grow melons for money and profit, are looking for. It is one of the earliest melons in cultivation, and, in fact, is a close second to our new introduction, "Burrell Gem." See Novelty pages. Price: pkt 5c; ½ oz 10c; oz 15c; ¼ lb 50c; postpaid.

HERE you are, Mr. Marketgardener, Mrs. Homegardener and every one else. This is the place for you to stop and read. Read about our mammoth new tomato, which we introduced two seasons ago. The tomato that has made more money for gardeners in every civilized country than any other new garden product ever discovered. We want you to try them this year. We know you will be elated. Why, just stop and think. Bushes laden down with big, solid, delicious tomatoes of the finest quality. Can you ask more?

READ DESCRIPTION—This Ideal Tomato, in richness, flavor and excellence is so much superior to any other known variety (except our new *Nichol's Early Cash Tomato*) that there cannot begin to be any comparison. It is of a beautiful, deep, rich red color, almost as solid as a rock, and contains very few seeds. For canning, slicing, cooking or serving in any way, its rich, appetizing flavor can not be equaled. In fact, it is a Tomato fit for the gods and a money-maker for everyone. Its appearance will command almost double the market price, and it is a Tomato that will always be in big demand. We urge our customers and friends everywhere to plant freely of this *New Wonder Magnus* this season. Pkt 20c; ½ oz. 35c; oz. 50c; ¼ lb \$1.75; postpaid.

Our Mr. Nichols is known throughout the world as "King of all Tomato Originators." Probably no man living has received more newspaper and magazine comments upon his introductions in this line than Mr. Nichol. One of his crowning achievements was to originate and introduce our *New Wonder Magnus* Tomato. Hence you may rest assured that every packet, ounce or pound of tomato seed which you may purchase from us is of the "purest and surest" strain that can be grown. We urge our friends to order their "*New Wonder Magnus*" Seed early, as the stock is limited.

Such Proof as the Above Cannot Be Doubted.

DWARF CHAMPION—This famous Tomato is a favorite home garden variety. Its stiff, upright stocks are so sturdy as to hold the fruit well above the soil, even without stakes or supports. It is early and larger than most extra large sorts. Medium to smaller in size—smaller than the great midsummer types. Of superior table quality. Resembles the *Acme* in color; very productive. A sure cropper. Pkt 5c; ½ oz 15c; oz 25c; ¼ lb 70c; postpaid.

A CATALOG IS LIKE AN EGG.

If it don't hatch us an order we lose. P. S.—We haven't lost yet.

Spark's Earliana.

Truckers' Favorite. A very large purple Tomato of superior quality, solid and free from cracks. An ideal shipper and a superb variety for the table. Pkt 5c; ½ oz 10c; oz 20c; ¼ lb 60c; postpaid.

LIVINGSTON'S BEAUTY—This standard Tomato is too well known to need any introduction. It ripens with Acme and Perfection, and is a model in beauty and shape, being entirely free from rough specimens. Grows in large clusters and retains its large size late in the season. It is very valuable for shipping and for early market, in fact, many Seedsmen claim it one of the best. Color, "purple." Pkt 5c; ½ oz 10c; oz 15c; ¼ lb 50c; postpaid.

ACME—A large hardy, productive variety, ripening its first fruit almost as early as any, and continuing to bear abundantly until cut off by frost. Fruit in clusters of four or five; of medium size, perfect form, round, slightly depressed at the ends and very smooth. Free from cracks and stands shipment remarkably well; flesh solid and of excellent flavor. This variety is also used for planting under glass. Color, glossy red, lightly tinged with purple. Pkt 5c; ½ oz 10c; oz 15c; ¼ lb 50c, postpaid.

St. L. S. Co.'s NEW DWARF STONE—The king of all dwarf varieties. One of our greatest offerings. Grows double the size of Dwarf Champion, fully as early and vastly more productive, 10 to 12 fruits having been picked at a time. Mammoth in size, weighing from 2 to 3 pounds each. Beautiful in appearance, solid in flesh, appetizing in quality. A close second to our New Wonder Magnus. Vigorous in growth, perfect in shape. Can be planted one-half closer than ordinary varieties. Does not crack about the stem end. Pkt 10c; ½ oz 15c; oz 25c; ¼ lb 40c; postpaid.

SPARK'S EARLIANA.

THIS is the famous Tomato that eastern Seed Houses laud so highly, and in fact, it is well worthy of any good comment. Market gardeners who have tried it are enthusiastic in its praise, and now grow it for early market in preference to any other old standard sort, it being fully a week earlier. It supersedes the Atlantic Prize by far, because the fruits are not only remarkable for their earliness, but for their large size, perfect form, bright red color and delicious flavor. Ripens clear to the stem and does not crack. Its solidity and fine quality are quite equal to the best medium and late sorts. Grows in clusters of five to eight, averaging 3½ inches in diameter. While we fully consider it one of the finest early Tomatoes, yet it cannot compare with our New Wonder Magnus or Nichol's Early Cash. Pkt 5c; ½ oz 15c; oz 20c; ¼ lb 65c; postpaid.

MAGNUS—Takes a front rank for early market. Flesh is very firm. It is a robust grower, setting its clusters closer together than most other varieties. The fruits are usually very deep from stem to the blossom end. We sell several thousand pounds of this well known Tomato annually which speaks for itself. Pkt 5c; ½ oz 10c; oz 20c; ¼ lb 65c; postpaid.

PONDEROSA.

This mammoth Tomato is a great favorite for the home garden because of its immense size, stone-like solidity, delicious quality and beautiful appearance, whether stewed, sliced, fried, stuffed and baked or canned. Contains very few seeds; is all "meat" and of perfect form. Is valuable to grow for market, and forces under glass. Color, glowing crimson. A very heavy yielder. Pkt 5c, ½ oz 20c; oz 35c; ¼ lb \$1.00; postpaid.

Mr. Samuel G. Reams, of Cherry Co., Neb., writes: "All seed I purchased from you last spring were O. K. in every respect. 'New American King' Cabbage outyielded anything ever seen before in this country."

The skin is remarkably tough and solid, so that ripe specimens picked from the vines will keep in good condition ten days. Color, rich cardinal red. Pkt 5c; ½ oz 10c; oz 15c; ¼ lb 45c; postpaid.

ATLANTIC PRIZE—Fruits are borne in large clusters; ripens very evenly, among the earliest. Color, bright red. A favorite among gardeners, Pkt 5c; ½ oz 10c; oz 15c; ¼ lb 50c; postpaid.

IMPERIAL—An extra large, smooth, purple Tomato, very productive. A rank grower, an early yielder and of excellent quality. An ideal home favorite. Pkt 5c; ½ oz 10c; oz 20c; ¼ lb 50c; postpaid.

GOLDEN BALL—A beautiful large, round, yellow sort. Very fine flavored. Excellent for table use. Pkt 5c; ½ oz 15c; oz 25c; ¼ lb 70c; postpaid.

Stone. This celebrated Tomato is without exception the standard leading variety for canning. It has come to be recognized as one of the best of all the standard sorts. Originated by our Mr. Nichol. The fruit is of large size, perfectly smooth, and of best table quality. Its shape, color and quality adapt it to the fancy trade. Color, bright red. We urge every one to plant

freely of this wonderful variety. Pkt 5c; ½ oz 10c; oz 15c; ¼ lb 45c; postpaid.

SEED CORN DEPARTMENT

Nichol's Yellow Queen.

A TREMENDOUS SUCCESS, TRIED
AND PRAISED EVERYWHERE.

*The Golden Yellow Corn that has Captivated the Entire Corn World,
Introduced By Us Last Season.*

Holds World's Record of 383 Bushels per Acre.

WE have just 10,000 bushels of this world-beating corn to offer our customers this season. Had we have had twice the amount last season we could not have filled all the orders we received. Message after message came to us from enthusiastic customers pleading and begging us to send them "just a little" of the seed, but we were compelled to return several thousand dollars on orders which we were unable to fill. Never before have we experienced such a terrific demand for a new introduction. The country is beginning to realize the importance of New Corn Seed. The press and public became wild when our new Yellow Queen Corn was discovered.

Yellow Queen's Eight Great Points of Supremacy.

1. It is the most robust yielder of any corn ever discovered.
2. It produces more well developed ears to the stalk than any other corn.
3. It is a *sure* yielder as well as a *sure* 100-day cropper.
4. It produces the most solid and heaviest ears of any yellow corn known.
5. It will thrive in extreme drouth or wet, where other varieties would die.
6. It will grow more bushels on good land or poor land than any other kind.
7. It will out-shell, out-yield and out-sell any other corn on the market.
8. It produces more fodder than any known variety.

After figuring out the many advantages of our great yellow corn offering it is well to take the following facts into consideration:

It costs about the price of thirty bushels of corn to raise one acre. Now at this rate the man who raises but thirty bushels per acre merely breaks even. But the man who raises forty bushels per acre has ten bushels profit. At a value of 50c per bushel his income is \$5.00 per acre for his land—a small dividend, is it not? Now on the other hand, the man who raises 200 bushels per acre has a net profit of 170 bushels per acre, yielding a dividend of \$85.00 per acre, clear of all expenses, including cost of seed, labor, etc. Therefore you will see that a low yield of our Yellow Queen corn on one hundred acres of ground would net the grower \$8,500.00, with absolutely no more labor than the thirty-bushel-per-acre man had in producing his yield, for which he received no recompense. We urge you to devote a good share of your ground to this marvelous new corn this season; you will be enthusiastic when husking time comes and will wonder if such enormous yields will ever cease. Say what we may we cannot describe its many good qualities. In fact it is superior to any other corn from every point of view. It defies the elements of the weather, and returns yields that please, profit and astonish you. It is the corn "to tie to," no matter where you live. It will do magnificently anywhere, where corn can be grown. The ears are very large, well developed and of a golden yellow color. The grains are deep and the cob is small. The stalks grow to a medium size in height, being very juicy and bushy, therefore making one of the finest fodder corns obtainable. Many of the stalks produce as high as six ears. There are very few suckers found in a field of our Yellow Queen. If you are looking for a corn that will make you more money than any you have ever seen or planted heretofore, stop right now. Here is the corn that will do it. Price: 1 lb 25c; postpaid. By freight or express; 8 lbs (will plant one acre) 50c; pk 90c; ½ bu \$1.75; bu \$3.00; 5 bu at \$2.75 per bu.

WHITE STAR

The GIANT WHITE CORN OF THE WORLD

237½ Bushels per Acre Record.

THIS Great White Corn offering has proved itself the leader in the 100-day white corn class, as we prophesied when introducing its brilliant future. So it has come. Thousands of farmers and stockmen report enormous crops from this magnificent variety. The yield, did you say? Here are a couple of letters. Read them. They speak for themselves:

"Your White Star Corn, which I planted this season, broke all records here. There must be something about your seed corn that is marvelous, as I have a friend who beat everything in his state (Kansas) with your 'Gold Bond.' I certainly am going to try some of that this year. My White Star yielded 237½ bushels per acre. B. T. Rogerson, McLean Co., Ill."

"White Star outshines anything ever seen here in the corn line. I purchased 10 bushels from you last spring, and I trust you will not think me enthusiastic when I say it made me ten times more money than any other investment I ever made. Success to you. M. J. Boden, Fremont Co., Ia."

Need we say more? In our New White Star Corn you will find none of the bad qualities sustained by other white varieties, and not only does it contain all the good points in the makeup of other famous varieties, but many more as well. We used great care in selecting this wonderful new variety, and we have no hesitancy in saying it is without exception the finest and largest yielding white corn in the world.

WE WANT YOU TO TRY IT THIS YEAR.

We want you to write us your results. You will find it to be the purest white, the deepest grain, the smallest cob, with the largest percentage of perfect, smooth ears of any corn you have ever grown. For a bottom ground variety it will outyield by far any other known corn on the market.

Our many growers who have tried this new corn are enthusiastic in their praise and all prophesy a brilliant future for it. It will undoubtedly prove a prize winner wherever exhibited. Just think of a field of corn laden down with beautiful, silvery ears, not nubbins. Can you resist giving it a trial? Surely you will not continue planting your old stock, or any other new stock of white corn that may be offered you, when you can obtain such a wonderful yielding variety as this is. If we did not know it was the best to be had we would not recommend it as such. Every wide-awake, intelligent farmer will realize this. Your success is our success. Our benefits are mutual. Therefore, let us urge you to order a liberal supply to-day. The cost is not great, and the returns will prove to you the best investment you have ever made in the corn line.

DESCRIPTION.

Stalk is of the most vigorous growth, being tall and of a beautiful appearance, with wide, medium length leaves extending thickly around joints, from which shoot ears in abundance. It is a very deep-rooted corn, hence it is not easily injured by wind storms. Neither are the roots near the surface, thus insuring you against any chance of being broken off and the vitality of the plant sapped in cultivation. For a genuine perfect corn in every respect we are sure it will please you.

Price: 1 lb 25c, postpaid. By freight or express, 8 lbs 50c; per pk 85c; ½ bu \$1.50; bu \$2.50; 5 bu at \$2.25 per bu.

"The 'White Star' Corn I purchased from you last spring turned out wonderful, yielding nearly 200 bushels per acre. D. C. Lewis, Morgan Co., Ill."

A WORD ABOUT ORDERING SEED CORN.

Last year we were unable to fill all our orders for seed Corn, the demand being far beyond expectations; hence we returned money for several thousand bushels, much to the disappointment of our customers. This year we have provided for a large demand, and while we are already booking hundreds of orders, we feel that we will be able to fill all orders; but to insure you with obtaining a supply which you had figured on we would advise you to order early; or if you prefer we will book your order and ship at any time you advise. This way it will insure you with being able to obtain your stock of seed corn without question. Send us your order to-day. Do it now.

Some people look upon buying Seed Corn as an expense. Possibly it has proven so with you heretofore. If so reduce your expense account this year by planting

some of our new varieties. They're a paying investment, not an expense. Try them.

NICHOL'S GOLD BOND

THE GREAT BIG DEEP GRAIN VARIETY.

THE LARGEST, BEST AND MOST PRODUCTIVE YELLOW CORN EVER KNOWN.—THE GREAT 90 DAY YIELDER.

THIS FAMOUS new variety introduced by us four seasons ago is now acknowledged by growers everywhere as the "King" of all corn. Could our forefathers have had access to such productive corn as our **Nichol's Gold Bond**, they simply would have been elated beyond expression. Just think! A 90-day corn yielding over 250 bushels per acre. Can you imagine what such a variety of corn as this means to the agricultural world? Little did we think when we offered this big early yellow corn for the first time that it was going to create such a demonstration throughout the country as it did. Why, we were compelled to work day and night to fill the orders that poured in from all quarters, and the reports which we received are simply astonishing. From 200 to 275 bushels per acre seems to be its yield. Everywhere it has proven itself the most marvelous and extraordinary corn ever discovered. It grows as naturally as a weed. It produces just as readily. It is an ideal corn to plant for a general crop. Enthusiastic growers pride it as Two-to-One better than any other early corn. It is a money maker for anyone. In fact it is the most remarkable corn ever offered. It is the corn for you, Mr. Stockman. It is the corn that is a winner every time. We challenge the world to produce its equal. It can't be done.

READ DESCRIPTION.

Stalk grows to a height of 8 to 10 feet; ears grow midway, hence making it easy to pick; all stalks are heavy ear yielders, there being no barren stalks, as is the characteristic of many other noted varieties; ears grow 10 to 12 inches long, being very thick and uniform in appearance, with 18 to 20 rows of very deep, yellow kernels, set on a very small red cob, and well filled over the tips, being capped with a snug-fitting husk, thus insuring it "Frost Proof" in the lowland districts. The leaves grow broad and long, which make it an ideal fodder corn after husking. This corn is not only good for certain sections, it is good for any climate where corn will grow, north, east, south or west. For high or low lands, it is the best. Do not fail to give it a trial this year. You will never have known the pleasure of growing big, yellow corn until you have tried this variety.

Nichol's Yellow Dent

The Greatest Ninety-five Day Corn Ever Discovered. The Large, Deep-Grain Variety. The Small-Cob Corn.

Recently introduced by us, this corn met with universal demand. Growers are enthusiastic about it. They write us from far and near. Never before has a new corn met with such approval. When we discovered it we would have offered it as our leader had we discovered it sooner. Look at the grains, 95 days from time of planting. Need we say more. A corn with ears of unusual length, evenly filled, medium long grains and a small cob, together with an enormous yield, such is the makeup of this wonderful new variety. No grower will make a mistake to devote a good share of his ground to this famous new corn.

READ DESCRIPTION. The ears are large, handsome and well filled from butt to tip. The cob is very small; in fact, a couple of grains will more than reach across it. It is early, sure to mature from 95 to 100 days. It generally produces 3 to 4 well-developed ears to a stalk. The stalks grow from 8 to 12 feet in height. The ears growing midway, it is a natural yielder in spite of excessive wet or dry weather; for latitudes where heretofore corn would not thrive our Yellow Dent will prove a winner. This wonderful new corn combines more merit than any other corn ever discovered in this class. It will produce twice the amount on poor soil than any we have ever tried. It is the corn for you, Mr. Farmer. It is the corn for you, Mr. Stockraiser. It is the corn for everybody, rich or poor; in fact it is the ideal corn of the corn world, and is surpassed by no other 95 day corn.

Price: 1 lb. 25c; postpaid. By freight or express: 8 lbs. (will plant one acre) 50c; pk. 75c; ½ bu. \$1.25; bu. \$2.00; 5 bu. at \$1.90 per bu.

Just a Sample of the Testimonials Received Praising "White Diamond" Corn.

"When I sent to you for seed of your Nichol's White Diamond Corn my neighbors laughed at me. Now it is my turn to laugh. They have the same old 'scraggy' fields of corn, while mine is beautiful beyond comparison, with a yield that will more than double any that has ever been raised in these parts."

FRANK TOWNSEND, Van Buren Co., Ia.

We want your testimonial. Your testimonial will be like the others.

FIRST—Because it is the earliest white corn in existence.

SECOND—Because it is one of the most productive varieties ever offered.

THIRD—Because it has a large number of rows on a cob, making it an immense yielder.

FOURTH—Because it is the greatest and handsomest white corn you ever saw.

DESCRIPTION—Stalks grow of medium height, laden down with ears of pearly white, on a cob of the same color and of very small proportion. The ears are well filled from butts to tips and of uniform size, there scarcely being any nubbins. Owing to its extreme earliness, it is sure to mature. Our first testing yield of this marvelous variety being near the 200 bushel mark. Its supreme whiteness will demand a higher market price than any other variety. Nichol's Yellow Beauty

THE NEW CORN THAT IS LEADING THE CORN BELT DISTRICT.

EXPERT corn growers everywhere predict for this new corn a golden future. It is so much superior to the famous Iowa Gold Mine there can not begin to be any comparison. From every point, depth of grain, smallness of cob, productiveness and yield, our new Yellow Beauty will surpass Gold Mine 33¼ per cent. Be one of the first in your neighborhood to grow this money making sort. You will find no suckers or barren stocks in this variety; in fact, it is the dent corn we have all been looking for. It is much larger than Pride of the North, and heavier, two ears of this sort weighing as much as three ears of Gold Mine, owing to the extreme smallness of the cobs, which weigh only about 5 or 5½ pounds to the bushel. This is a point that can not be equalled by any other corn. In order to obtain this wonderful new variety, you must purchase it from us, as we are the sole introducers, and this is the third season it has ever been offered for sale. We confidently recommend this variety as the acme of perfection, and urge you to plant it freely. Nichol's Yellow Beauty will prove a magnificent corn for main crop; indeed, we predict you will plant no other when once you have tried it. You will find this corn ready to crib long before your home grown varieties. Now, do not wait until after our stock is exhausted, but send us your order to-day. Price: 1 lb 20c; postpaid. By freight or express: Pk 50c; ½ bu 90c; bu \$1.65; 5 bu at \$1.55 per bu.

St. L. S. Co.'s CALICO

THIS famous speckled variety is one of the most prolific yielders known. Our imported strain of this old standard sort is so much superior to its predecessor that there can hardly be any comparison in yield. As will be seen by the tip of the ear in illustration, it carries that distinctness of form and closely netted grains that go to make up an ideal corn. Cob is of medium thickness and the grains have a speckled coloring, hence its name "Calico." Mammoth yields are reported from growers, and in the Great Corn Belt district it is looked upon as a "stand-by" variety, owing to its drought and wet-resisting powers. It is a vigorous grower and thrives exceedingly well on thin soil, and is greatly relished by stock of all descriptions. As a flesh producer it is second to no other corn. Stalks are very solid and juicy, and is ranked high as an excellent fodder corn. Price: 1 lb, postpaid, 20c. By freight or express: Pk 65c; ½ bu \$1.00; bu \$1.75; 5 bu at \$1.65.

Ears of good size and symmetrical. Color, a bright golden yellow. Grain very deep; cob small and therefore dries out very quickly as soon as ripe. It has received everywhere the most cordial indorsement as "one of the best" and the "most profitable varieties ever grown." Price: 1 lb 20c, postpaid. This corn was originally originated by Mr. Leaming, the famous originator in Ohio, and still retains the same characteristics that made it famous. In fact, it is one of the best general

purpose varieties in use to-day. Classed as 100 to 110 days in ripening. We have known it under favorable conditions to mature in less time. REED'S YELLOW DENT

THIS celebrated variety is being widely advertised and introduced throughout the country, it being an ideal all-purpose corn, the butts and tips being well filled. Much has been written by experts regarding the good qualities of this corn in Agricultural papers throughout the country; in fact it is one of the most popular varieties in the Central States. The ear is of an excellent shape, growing from 8 to 10 inches long and from 20 to 24 rows to the ear, it is very productive and solid and matures in from 95 to 100 days. Owing to its very beautiful cylindrical shape it is an ideal sort for exhibitions, having carried off many high honors at fairs and corn shows. Our stock of this variety is superb and we can please you beyond doubt. Price: 1 lb, 20c; postpaid. By freight or express: ¼ bu 50c; ½ bu 85c; bu \$1.50; 5 bu at \$1.40 per bu.

HICKORY KING

This white corn is a great favorite everywhere. So large are the grains and so small is the cob that on an ear broken in half a single grain will almost cover the cob section. It is of a strong, vigorous growth; the stalks are deep rooted, taking a firm hold in the ground and stand upright. It yields splendid crops on light soil, and is undoubtedly one of the most productive white field corns in existence. Frequently grows with three ears to the stalk. Price: 1 lb 20; postpaid. By freight or express: Pk 65c; ½ bu \$1.00; bu \$1.75; 5 bu at \$1.65.

PRIDE OF THE NORTH

A very early Dent variety grown everywhere. Stalks small, with broad leaves; ears are short, 12 to 16 rowed, and carry grains clear to the tip. On good corn land it will yield as much as any larger eared variety; owing to its small size it can be planted closer. Its chief use, however, is for planting late in the season. About 90-day. Price: 1 lb, 20c; postpaid. By freight or express: Pk 50c; ½ bu 85; 1 bu \$1.50; 5 bu at \$1.40 per bu.

Please Remember that all our seed corn is tipped before shelling, thus insuring you with the most perfect seed at all times. If you are a stock man or farmer it will pay you to make note of this fact, and we are sure that after you have done so you will appreciate our efforts in advising you to do so. Again we urge you earnestly to order early in order to avoid our being sold out of any variety you may desire.

Hickory King.

POP CORN

OWING to the continued increasing demand for Pop Corn on the market it is fast becoming a profitable crop to grow. It will, in fact, pay one to grow it in large fields, as the pure food industries throughout the country are consuming thousands of bushels daily. It is as easily grown as field corn and yields from 3 to 4 times more per acre, bringing a much larger price than the field varieties. The fodder is excellent for stock, thus insuring it a two-fold paying investment. We have taken special pains with our stock this year, and we are in a position

to supply you with the best Pop Corn obtainable.

FALL and WINTER WHEAT

NICHOL'S NEW "HUNDRED BUSHEL WHEAT"

The Greatest, Grandest and Most Productive Wheat Ever Discovered—Now Offered in Our Catalogue for the First Time.

THE world's greatest offering for 1908. Have you seen the wondrous reports from the press throughout the country of our new wheat? We wish we had space to reproduce a few of the enthusiastic writeups by those who witnessed our trial test.

Every one was elated, the unanimous verdict being, "The finest and best wheat in the world." We want you to try it this fall. You will be elated. The heads are of mammoth size. Just think, many of them contains over 200 kernels each. The straw is bright and very upright, and owing to its very deep root, therefore is the "ideal" variety to sow. We regret that, owing to lack of space, we are prevented to illustrate and describe this new wheat more fully. Again we say, try it next fall. Price: Pk 65c; bu \$2.00; 10 bu at \$1.90 per bu.

Nichol's Wall Street Favorite

—Our great wheat that we introduced two years ago. Its mammoth record yield of 83½ bushels per acre famed it as the world's leader until we originated "Nichol's Hundred Bushel Wheat," listed above. Nichol's Wall Street Favorite is a smooth, strong, healthy wheat and is seldom troubled with insects that affect other wheats. The straw is very long, with big, full, solid heads (see illustration of heads). In fact, it is the wheat that will make any man dollars.

Read this testimonial: "Hurrah for NICHOL'S WALL STREET FAVORITE! 83½ bushels grown on the same land that heretofore yielded 25 to 30. Can you beat it? If not, I will beat it next season. I am going to sow new ground and I am positive I will pass the 100 bushel mark. Gentlemen, your wheat is a wonder."—Geo. Bidwell, Dickey County, N. D. Need we say more. Price: Pk 65c; bu \$2.00; 10 bu at \$1.90 per bu.

NICHOL'S NEW PROSPERITY—A close second to our famous Wall Street Favorite, with the exception that it is about 5 to 6 days later, an abundant yielder, a sure cropper and an ideal variety to sow with Wall Street Favorite, for the reason that by the time you have Wall Street Favorite cut New Prosperity is ready to cut. We could write pages of good qualities of this new smooth variety, but for lack of space we must omit it. As a yielding variety it is a close second to Wall Street Favorite, having yielded 79 bushels per acre. Price: Pk 65c; bu \$2.00; 10 bu at \$1.90 per bu.

Think What This Means.

Mr. Wheat Raiser, are you going to hesitate putting in a crop of these three immense yielding wheats listed above? No, we know you will not. No industrious farmer will hesitate one moment. Just imagine had you raised a crop of either of these varieties this season the amount of money you would be ahead to-day. Think of the coming crop; it will do just as well. Remember, they are not acclimated to any special wheat regions, as a great many other varieties are. Don't you think it will pay you to try them this fall?

PEDIGREE FULTZ (Smooth)—Its yielding powers throughout the North and Northwest is superior to any of the other old-time varieties. Our customers tell us that the main trouble they have in securing this variety from other houses is the fact that it is mixed with common sorts. Our stock is "Pure and Sure" and true to name, being of uniform size throughout. Price: Pk 50c; bu \$1.75; 10 bu at \$1.60.

Full Corncribs. That is what every farmer likes to see. That is what every farmer would see if he would only stop experimenting with old, worn out varieties of corn and begin planting some of the new kinds which we are offering. It is a shame to see the amount of good soil, rain and sunshine annually wasted on the old, old worn out stock. Many will not believe that horticulture and agriculture have advanced with the progress made in other lines of commerce. This is a wrong belief; on the contrary both gardening and farming have advanced rapidly, both in quality and quantity. This you can see exhibited at the fairs everywhere each year. Then why not begin this year right by planting the new varieties offered in this catalog? The cost is not as great, comparatively, and the result will surprise you, beyond doubt.

NICHOL'S NEW UP-TO-DATE

AS modest as we are, we cannot restrain our enthusiasm. Such a mammoth late white potato we never saw before. We christened it Up-to-Date because it more than meets the requirements of the demand. We wish we had space to tell you all we know about this wonderful new late Potato. Up-to-Date is just the right shape, just the right color, just the right size; in fact, it is the ideal of all varieties. Has a good, thick, white skin, with a mealy, white, dry, floury meat that is irresistible.

It is a Potato we know that will not only make dollars for the grower, but please him beyond a doubt as well. A striking characteristic of this new Irish beauty is its productiveness. We will say right here that it will yield more potatoes by far on the same amount of ground than any other late sort you ever saw. We will back this statement by saying that it will be the most beautiful and of uniform size, as well as the highest price demanding potato you ever raised.

Need we say more? Our plea with you to plant freely of this new Potato is a guarantee that is mutual—your interests are ours. We know you will thank us and become as enthusiastic as we when once you see the enormous crop of handsome, large, mealy Potatoes you will raise.

PRICE: By freight or express, ½ pk 50c; pk 75c; ½ bu \$1.25; bu \$2.25; bbl \$5.75.

"The New Up-to-Date Potatoes that I purchased from you last spring yielded the astonishing amount of over 750 bushels per acre. They are certainly marvelous beyond a doubt.

St. L. S. Co.'s New Early "DIX" Potato.

THIS is the new Potato which we offered last year for the first time, and it is needless to say it merited the full confidence of the growers which it so richly deserved. We termed it the pride of the "Red River Valley," owing to its mammoth test yield,—1,034 bushel per acre! Did you ever dream of such a wonderful yielding potato? No, we know you didn't. Neither did we until after we discovered this marvel. We offer it to you now as "The Finest Potato on Earth." We mean just what we say. We are ready to stake our reputation that you will say so, too, when you have tried it. It is of the most uniform size ever grown—all large, no small potatoes being found. It is earlier than the famous Early Ohio. It is ten times better as a yielder, and has no yellow or black core. Its tops are of an upright growth, bush form. Its skin is of a light red pinkish color; its eyes are very shallow, and many; its dry and mealy nature is supreme. We hesitate to tell you of the marvelous good qualities which this New Early "Dix" Potato contains—we fear you might think our statements exaggerated. But say what we may, we could not do this new potato justice. Try a few hills of them this year. You will write us words of praise this fall. **Price:** 1 lb 50c; 3 lbs \$1.40; postpaid. By express or freight, ½ pk \$1.75; pk \$3.00.

NICHOL'S KING OF EARLIES

ONE OF THE EARLIEST POTATOES IN EXISTENCE

A handsome variety which is nearly as early as Early "Dix", it has proven itself superior to the famous Extra Early Ohio, which it very much resembles in appearance. It is composed of a very thick skin, with a beautiful pinkish color, with shallow fair sized eyes. It will undoubtedly prove popular among potato growers as the earliest for market use. It is wonderfully productive, 10 to 15 marketable size potatoes having been produced from a single eye, and the production per acre is immense. Its keeping qualities are better than any other early sort, the tubers remaining sound and in the best of condition until late in the spring. We are the sole introducers of this wonderful early variety, and it is of better quality, which is of choice Northern grown stock, grown for us under contract in the famous Red River Valley. It does not boil to pieces as do other early varieties; it is of an excellent quality. Early potatoes always bring good prices, even if they are of inferior quality. But when you have a large size, good shape, handsome color and beauty added, together with the superb quality, as in our New Nichol's King of Earlies, it means money in your pocket. If you desire a profitable crop this year—a crop that will surprise and please you beyond doubt, whether for home or market use, plant this variety; it will fill the bill. Price by freight or express: ½ pk. 50c; pk., 75c; ½ bu., \$1.25; bu., \$2.25; bbl., \$5.75.

"KING" OF MISSOURI

One of the Best Medium Late Potatoes Ever Offered—a Close Second to Our Wonderful New "Big Buster"

Being an improved late variety of slight russet appearance, growing to an enormous size. It is of a solid type, being firm and of a compact growth; is an excellent yielder and wonderfully productive. It is an improved variety over all other medium late sorts, such as Rural New Yorker and Carmen No. 3. The beauty of this new variety is that practically all the potatoes grow to an enormous size, yielding no small ones, as do other varieties. The term "Jumbo," would really apply to it for a name notwithstanding its well-earned title, "King" of Missouri. "KING" OF MISSOURI is a beautiful potato, most desirable of shape, very smooth and regular in form, and with a handsome russet skin with an unusually thick netting, making it an ideal shipping as well as a first-class keeping potato. It is of the finest quality, an excellent cooking variety, being of a dry, white, mealy nature. It will undoubtedly prove one of the favorite market sorts, and no one will do wrong to devote a large share of his ground to this new variety the coming season. Price by freight or express: ½ pk., 35c; pk., 60c; ½ bu., \$1.10; bu., \$2.00; bbl., \$5.00.

NICHOL'S New Improved PEACHBLOW

OVER 600 BUSHELS PER ACRE

Read what Mr. Horne says:

"Hurrah for Nichol's New Improved Peachblow! It is the finest Potato I ever raised. I planted five acres and gathered over 3,000 bushels of nice, large, pink-eyed beauties. I will never plant any other variety."

"ALEX A. HORNE, Poweshiek Co., Iowa."

This is the wonderful new potato which we introduced in 1905. It is the potato we attached so much faith to. It is the potato that more than fulfilled every promise which we made. In fact, it is the potato that has taken the entire country by storm. Market gardeners report it as the finest potato they ever raised, both in appearance and in quality.

Our New Improved Peachblow since the above time has been tested with more than one hundred other varieties, and in every case it has proven itself superior to them all, not only in its enormous yielding capacity, but its improved size, the fine grain, the white mealy qualities and excellent flavor which has so long made the old Peachblow such a universal favorite. The potatoes are of a very uniform size, none growing so small but that they can be readily used. It is of a beautiful type, producing large, white, smooth potatoes, with handsome, shallow, pink eyes, giving them a very appetizing appearance when on the market. It is an excellent keeper, and we have never known them to rot, even late in the spring. One potato characteristic it does not contain, and that is, it does not have any black or hollow core; in fact, it is so much superior to any other Medium Late Potato there cannot begin to be any comparison. Adding to these points its great attractiveness is one of the main features. Market gardeners and others growing for shipping purposes should take into consideration that it gives to you an ideal potato in every respect. You who were not fortunate enough to obtain stock last season, we urge you to try them this year. You will never regret the test. Order early, as there undoubtedly will be a big demand. Price—By freight or express: ½ pk., 60c; pk., 85c; ½ bu., \$1.40; bu., \$2.50; bbl., \$6.25.

RURAL NEW YORK No. 2.

THIS famous late sort we concede as one of the best of the well known varieties. Much has been written by the press throughout the country on its good merits. It is quite distinct in appearance, flesh white, quality excellent, shape nearly round, somewhat flattened. Tubers large to very large, but not rough or irregular, eyes quite small, form symmetrical. One of the best late potatoes grown. An enormous yielder. $\frac{1}{2}$ pk 30c; pk 50c; $\frac{1}{2}$ bu 90c; bu \$1.60; bbl \$4.00.

CARMEN No. 3.

This great potato was originated by Mr. E. S. Carmen and is different from other famous varieties that so soon die out. Probably because it is a wonder everywhere and retains its popularity. It is little affected by drouth or bugs, and is a No. 1 yielder, of perfect form, almost every potato being of uniform size or shape, averaging nearly a pound each in weight. It has but few eyes, which are very hollow. Skin and flesh extremely white, having no dark or hollow parts, and its cooking qualities are exceptionally fine. Price: $\frac{1}{2}$ pk 30c; pk 50c; $\frac{1}{2}$ bu 90c; bu \$1.60; bbl \$4.00.

EARLY OHIO (Northern Grown.)

Our stock of this standard old variety is grown for us under special contract by one of the greatest potato specialists in the Red River Valley. Much need not be said of this great potato. Among the standard early varieties it undoubtedly stands at the head of the list. It is a favorite everywhere, and one of the market gardener's money makers. However, neither this or any of the other varieties listed on this page can begin to compare with our great offerings on the preceding pages. Early Ohio is now widely known and is the popular sort for early planting. It has the advantage of being fit for use and sale even before becoming fully ripe. We have a splendid stock, and we urge you to order early.

Note—Unlike other extra early varieties, our Red River Valley strain of Early Ohio does not produce a crop of walnut-size tubers, but all are uniformly large and smooth. It is an extra early and heavy yielder. It is an excellent keeper for such an early variety, and the quality is choice. It is indeed a highly valuable variety and we are not too strongly recommending it when we say to every potato grower—plant our special strain of Early Ohio this year. Price: $\frac{1}{2}$ pk 30c; pk 50c; $\frac{1}{2}$ bu 90c; bu \$1.60; bbl \$4.00.

EARLY ROSE.

No introduction is necessary for this standard productive variety; among gardeners and homelovers everywhere it is considered best. For earliness, goodness of quality and a No. 1 market sort it stands in the top rank. Price: $\frac{1}{2}$ pk 30c; pk 50c; $\frac{1}{2}$ bu 90c; bu \$1.60. bbl \$4.00

EARLY TRIUMPH.

This variety matures its crop at least a week in advance of the Early Rose. Potatoes are of medium size, round and uniform in shape, and but very few small ones. Eyes are slightly depressed, color a beautiful light red. One of the best extra early market varieties, especially for the South. Price: $\frac{1}{2}$ pk 30c; pk 50c; $\frac{1}{2}$ bu 90c; bu \$1.75; bbl \$4.00.

CLOVER seed is one of our specialties, and our facilities for cleaning it are superior to many of our competitors. We leaving no trash, sand or shrunken seed in our stock, as do many other seed houses. Our supply is all choice, fancy re-cleaned stock, the actual test showing that our Choice Grade is equal to any Fancy Re-cleaned seed offered by other houses. Bags and drayage free. Crop is very short this season.

PRICES ARE SUBJECT TO MARKET CHANGES.

Write for Our Semi-Monthly Price List. It Quotes all Farm Seeds at Lowest Market Prices. Issued January, February and March, also September and October.

RED CLOVER—(Fancy re-cleaned.) The most practical of all Clovers, being used for hay and pasturage, as well as for enriching lands. Our strictly "Fancy Re-cleaned" grade cannot be surpassed by anyone, and we strongly advise all to use this grade. Always bear in mind that it takes *less seed* when you sow the best. Hence, it costs no more than inferior grades. Price: 1 lb 35c, postpaid, or 25c per lb by freight or express; 10 lbs \$1.80; bu \$9.65; 100 lbs \$15.50.

MAMMOTH CLOVER—(*Sapling*) Grows much taller and heavier than common Red Clover. Produces an enormous yield and is of high feeding quality. It is a great soil enricher and is far cheaper than any other fertilizer. It will make your soils light and loamy. Do not fail to give it a trial. Price: Fancy Re-cleaned, 1 lb 35c, postpaid; by freight or express, 1 lb 25c, 10 lbs \$1.75; bu \$9.25; 100 lbs \$15.00.

CRIMSON CLOVER—(*Scarlet Clover*) This is a highly valuable variety on account of its wonderful quick growth. Sown early in spring it furnishes a large crop of hay in May or June. It may be sown in midsummer or early fall as a catch crop for fine winter pasturage and for early spring, before other grasses or clovers are ready. It does not winter-kill so easily as Red Clover, owing to its mass of roots which spread out and go to the depth of furrow. For hay, it must be cut before coming into full bloom. Price: 1 lb 25c, postpaid; by freight or express, 1 lb 15c; 10 lbs \$1.00, bu \$5.75; 100 lbs \$9.00.

ALFALFA CLOVER—(Fancy)—The King of Forage Plants—Alfalfa is the corner-stone upon which is being built the prosperity of wide areas of our agricultural country—with its never-failing four to five crops of from six to twelve tons per acre, and having a value of \$12.00 to \$18.00 per ton; its great fattening qualities for horses, cattle, hogs, sheep and poultry, its drought-resisting qualities. After once being rooted, its perennity is more than two decades while some claim for its immortality. There is not one crop known to the West that pays better returns in cost per acre. The plant is not so fastidious as to soils as has been thought, but flourishes best in rich, loamy soil. It does not thrive where plant food is deficient. It grows in many dry places without irrigation; but where there is sub-irrigation in dry land, or good drainage in moist soils, the plant will go fifty feet down and grow and bloom perennially. The best time to sow is in the spring. In some sections it is sown in the fall. Ground must be very carefully prepared. Price: 1 lb 35c, postpaid; by freight or express, 1 lb 25c; 10 lbs \$1.80; bu \$9.65; 100 lbs \$15.50.

GENUINE TURKISTAN ALFALFA—Superior to the ordinary variety because of its greater ability to resist drought or stand higher temperatures. Parallel experiments show it to be superior to our Alfalfa in yield where only a minimum supply of water may be depended upon. It possesses a very large root system, and the general construction of the plant is to enable it to do this. Price: 1 lb 40c, postpaid; by freight or express, 1 lb 30c, 10 lbs \$2.40, bu \$12.40, 100 lbs \$20.00.

ALSIKE OR SWEDISH CLOVER—A very hardy variety that succeeds on any kind of soil and resists extremes of heat and drought. It is usually planted in mixture with grasses for pasturage and for hay; especially with Timothy. It is excellent for bees. When once established it yields enormously, and can be cut several times during the season. In recent years failures to secure a stand with Red Clover is of frequent occurrence. We suggest you trying Alsike. Many have done this to their advantage. It is similar to Red Clover in every particular of growth and feeding value. Price: freight or express, 10 lbs \$1.65; bu \$8.90; 100 lbs \$14.50.

WHITE CLOVER—A small creeping perennial variety, valuable for pasturage and lawns; its flowers are well liked by bees. Flourishes in a variety of soils, but prefers moist ground. It should be included in mixtures for permanent pastures and for lawns. It is effective in preventing the soil from being washed by heavy rains. Price: 1 lb 50c, postpaid; by freight or express, 1 lb 40c; 10 lbs \$2.25; bu \$10.00; 100 lbs \$16.00.

BOKHARA OR BEE CLOVER—(*Honey Sweet*)—Highly recommended by experimental stations; especially adapted to bees, the honey from it being as clear as a crystal. It is also recommended as a fertilizer, to be turned under when green. It is a very quick, vigorous grower, and possesses superior qualities to most other clovers. Price: 1 lb 45c, postpaid; by freight or express, 1 lb 35c; 10 lbs \$2.75.

JAPAN CLOVER—(*Lespedeza*)—A low spreading perennial, very valuable for dry, sandy land. Price: 1 lb 55c, postpaid; by freight or express, 1 lb 45c; 10 lbs \$3.50, 100 lbs \$34.00.

PERMANENT PASTURE MIXTURES

Every successful farmer and stockman will agree with us that a pasture or meadow of mixed grasses is far superior to a field of Clover or Timothy alone. More grass in the pasture season is an increasing need all over. Land, whether cut-over timber, hilly and dry, or low and wet, needs seeding to suit new conditions. Wild grasses are disappearing. Replace them with tried cultivated grasses instead of weeds. Use our Pasture Mixtures, which contain grasses of the best mixture.

PASTURE MIXTURE "A"—Good Moist Soils. Sow ten to fifteen pounds per acre. This is intended for the average soil. Use more seed where land is dryer. If stock does not keep down to six or ten inches use the mow to do so. Do not pasture too closely. This is well suited for "patching" your present pasture by disking or harrowing in. Price: 1 lb 30c, postpaid; by frt or exp, 1 lb 20c, 10 lbs \$1.75, 100 lbs \$14.00.

PASTURE MIXTURE "B"—Dry, Hilly Uplands. Sow fifteen to twenty pounds per acre. Recommended for rolling ground, or where stones or sand in soil demand drought-resisting varieties. Plow or disk in where possible, and on unplowed, stumpy or stony ground brush thoroughly. Price: 1 lb 30c, postpaid; by freight or express, 1 lb 20c, 10 lbs \$1.75, 100 lbs \$14.50.

PASTURE MIXTURE "C"—Shaded Pastures. Sow five to ten pounds per acre. This is especially planned to suit the woods, which is often waste except for its timber. Get the seed on and into the ground, do not leave on top of the leaves. The more open use the more seed. Price: 1 lb 30c, postpaid; by freight or express, 1 lb 20c; 10 lbs \$1.85, 100 lbs \$15.50.

PASTURE MIXTURE "D"—Wet, Swampy Soils. Sow ten pounds per acre. Intended to furnish feed where heretofore useless. Burn off the old grass. Use your judgment when and how to sow, keeping in mind washing away by water and getting it covered. Price: 1 lb 40c; postpaid, by freight or express, 1 lb 30c, 100 lbs \$24.00.

GRASS SEED. PRICES SUBJECT TO MARKET CHANGES.

GRASS SEEDS are sold on a very close margin of profit and the prices named are what we are selling the seed for at the time this catalog goes to press, and are subject to market changes at the time of receiving your order. However, you may always rest assured that we will give you value for the amount received, whether the market be up or down. Should you desire a large quantity of anything in this line, write us for special prices, naming the amount needed. Please remember that our quotations are for our best grades of cleaned seed. Grain bags to hold seed included free.

WE ISSUE A SEMI-MONTHLY PRICE-LIST ON FARM SEEDS DURING JAN. FEB. AND MARCH, ALSO SEPT. AND OCT. IT'S FREE.

TIMOTHY—(45 lbs per bu.) The best of all grasses for hay. Is occasionally used for temporary pasture. It yields fair crops even on light soils. It should be cut when in blossom, in June or July. It is preferable to sow in the fall, but we sell almost as much seed in the early spring, and it is frequently sown then with equal success. Price: 1 lb 25c; postpaid. Fancy—By freight or express: 1 lb 15c; 10 lbs 75c; bu \$2.65; 100 lbs \$5.50. Choice—25c lb postpaid; by freight or express: per lb 10c; 10 lbs 65c; bu \$2.40; 100 lbs \$5.00.

KENTUCKY BLUE GRASS—(14 lbs per bu.) Also called June Grass and Spear Grass. Very valuable and exceedingly popular as a pasture grass. Is too well known among our stock-raising friends to need any comment. It is also valuable as a lawn grass, but we advise sowing a lawn-grass mixture such as our "Havalawn," because it contains some Kentucky Blue Grass and white clover. Kentucky Blue Grass forms excellent pasturage for all kinds of stock and in many sections all winter long. It also makes good hay. (Beware of Canadian Blue Grass, which contains thistles, etc.) Perennial; flowers in June, height, 10 to 15 inches. Sow in October or early spring. Fancy solid seed for pastures—1 lb 40c; postpaid; by freight or express: 1 lb 25c; bu \$2.50; 100 lbs \$16.00. Extra clean in chaff—10 lbs \$1.10, 100 lbs \$9.50.

For LAWN GRASS, see page 76.

RED TOP—A very hardy native perennial grass, succeeding best on moist land. It accommodates itself to a variety of soils, however, even to quite dry situations, and stands our hot climate admirably. It is, perhaps, the most permanent grass we have. It remains green for the greater part of the year, and its long, trailing stems form a very close matting turf that is not affected by trampling. Sown largely in marshy land or sloughs. Fancy or solid seed—Price: 1 lb 25c, postpaid; by freight or express: 1 lb 15c; 10 lbs \$1.10; 100 lbs \$9.50. Choice seed in chaff—Price: by freight or express: 10 lbs 75c; 100 lbs \$5.00.

ENGLISH PERENNIAL RYE GRASS—(20 lbs per bu.) This grass is of as great value to Great Britain as Timothy is to this country. It is invaluable for permanent pastures, for hay if cut when in blossom, and for lawn mixtures. Height 15 to 24 inches. 1 lb 25c, postpaid; by freight or express: 1 lb 15c; 10 lbs \$1.00; bu \$1.50; 100 lbs \$7.00.

REED CANARY GRASS—This is also an excellent grass for a covering for wild game and for food, and is sown around spots similar to Smart Weed seed and wild rice. Price: 1 lb 60c, postpaid; by freight or express: 1 lb 45c; 10 lbs \$3.50; 100 lbs \$32.00.

Price: 1 lb 30c, postpaid; by freight or express: 1 lb 20c; 10 lbs \$1.65; bu \$2.00; 100 lbs \$12.75.

MILLETS. (50 lbs. per bu.)

PRICES SUBJECT TO MARKET CHANGES.

The several varieties will furnish food for live stock in the form of grain, fodder or pasture. Especially valuable in seasons when the hay crop is short. They make the best hay if cut when in blossom and carefully cured.

Can be sown late after some early crop, and if sown early will mature in time for the ground to be plowed for wheat, and it leaves the ground in fine shape for this purpose. For hay, sow from May to August 1st. For grain, sow in drills not later than June 20th. Fancy—Price: 1 lb 20c. postpaid; by freight or express: 1 lb 10c; 10 lbs 40c; bu. \$1.40; 100 lbs \$2.50.

COW PEAS.

Our Cow Peas are Home Grown Stock.

Subject to Market Changes.

COW PEAS are too well known in the South to need any description, and have been used to such an extent in sections close to us and further north that their adaptability to these latitudes is past the experimental stage. They are usually compared with clover. Their feeding value is about equal, and many claim them superior, and their fertilizing value for land is about the same as clover. They can be sown from corn planting time in the spring to September 1. It takes 1½ to 2 bushels for an acre. There are a large number of varieties, but we list only a few and these are the most popular and best sorts.

See page 4 for prices on larger quantities on the two above varieties.

SOJA OR SOY BEANS—Like Cow Peas, they are grown for soiling purposes, for ensilage, for pasture and for green manure. Their greatest value, however, will be found in furnishing food for dairy cows, as they are in proper condition for being thus fed at that season of the year when but few plants are available for such use. 1 lb 25c; postpaid. THE NEW BRANDT SPRAYER.

IN OFFERING this new Sprayer to our customers, we do so with the knowledge that we are offering the finest and best Compressed Air Sprayer on the market. The cone of the nozzle is rigid therefore the spray is solid and uniform. The double nozzle will spray two rows at once, (see top cut) doing just as good work, with the same amount of labor as if only one nozzle was used. However 10 to 15 acres of potatoes per day can easily be sprayed with only one sprayer. The nozzles and attachments are made of brass. In short we consider this the finest sprayer ever invented. Price, with single attachment, (see cut) \$4.50; price with double attachment (see cut) \$6.50. Tree spraying attachment 3 feet long \$1.50 extra. No. 2 cap used for coarser spraying 50c each.

TO HAVE A LAWN, THAT IS A LAWN, IT MUST BE SOWN WITH "HAVALAWN"

Nothing better can be purchased on any market, no matter what claims may be advanced by other seedsmen. Try it this season and be convinced. Price: 1 lb (sows 300 sq ft) 25c; 4 lbs (sows 1200 sq ft) \$1.00; 7 lbs (½ bu sows 2,100 sq ft) \$1.75; 14 lbs (1 bu sows ½ acre) \$3.00.

We recommend this lawn seed for those who desire a coarse grass. Sow, for 1 acre, 40 to 50 lbs; for ¼ acre, 2 bu. We advise heavy sowing for a new lawn. For renewing old lawns, use ¼ or ½ of these amounts. Price: 1 lb 25c; 2 lbs 45c; 5 lbs \$1.00; 7 lbs (½ bu) \$1.35; 14 lbs (1 bu) \$2.50. Note—Sow same amount per sq ft as "Havalawn."

EXTRA FANCY KENTUCKY BLUE GRASS SEED—(Price Subject to Change.) It is most valuable as a lawn grass, but we advise sowing a lawn-grass mixture such as our Havalawn, because it contains some Kentucky Blue Grass, White Clover and other lawn grasses in proper proportions to make a lawn that is not so easily affected by drouth and heat and is more permanent in winter weather. Sow Blue Grass in October or early spring. Price: 1 lb 25c; 2 lbs 45c; 5 lbs \$1.00; 7 lbs (½ bu) \$1.35; 14 lbs (1 bu) \$2.50.

Flourishes in a variety of soils, but prefers moist ground. It should be included in mixtures for permanent pastures and lawns. ST. L. S. CO.'S SPECIAL

Lawn and Garden Fertilizers

PRICES QUOTED ARE BY FREIGHT OR EXPRESS

The farms of our land were never in such need of fertilizing as they are to-day. The Government Experiment Stations have proven that with the use of fertilizer you can raise much larger and finer crops, and without drawing on the land for all its nutriment. Reports show that the Western States are "waking up," and that there has been from 500 to 1000 per cent. more increase in different States in the past year in the use of fertilizers. Eastern farmers never think of sowing wheat and grasses without sowing fertilizer also, and our western customers will soon do the same. The proper time to fertilize in St. Louis latitude is September for fall sowing and March for spring sowing.

PURE BONE MEAL, for Farm Purposes—It will take from 200 to 500 lbs to the acre, according to crop. 10 lbs 25c; 25 lbs 60c; 50 lbs \$1.00; 100 lbs \$1.75; 500 lbs \$8.00; 1 ton \$30.00.

PURE BONE FLOUR—Mostly used by florists. Dissolves very quickly. 100 lbs \$2.50.

NITRATE OF SODA—95 to 98 per cent. purity, 18½ to 19½ per cent. ammonia. Sow 100 to 200 lbs to the acre. 25 lbs \$1.50; 50 lbs \$2.50; 100 lbs \$4.25; 500 lbs \$20.

PULVERIZED SHEEP MANURE—As a top dressing for lawns there is nothing better. Promotes a steady and rapid growth in the vegetable garden. For garden and field crops, 1 to 2 tons per acre; one-half before plowing, balance before harrowing. For top dressing use 1 ton per acre—fall or early spring. Our Sheep Manure is treated by a secret process which adds vitality to all roots that cannot be secured otherwise. 25 lbs 75c; 100 lbs \$2.00; 1 ton \$25.00.

Our stock is perfectly free from the San Jose scale, being inspected annually by the State Entomologist. We pack and ship nursery stock as follows: Oct. 15th to Dec. 15th and from Feb. 1st on according to the weather. FLOWER SEED DEPARTMENT

A HANDY FLOWER SEED GUIDE That will enable you to quickly learn the different names of Flowers without searching all through the catalog. It tells of the purposes for which many of the plants are best suited.

Take, for example, Floss Flower. It is not listed in our catalog by that name, and you do not remember or may not know its other name. Look down this Guide for Floss Flower and you find that it is numbered 103, which number is only used for convenience. You often see that its other name is number 4. Look back for 4 and you find the name Ageratum. Now you can readily find the description and price by looking for Ageratum, which is on page 90. If you found Ageratum first, the number of its other name, as you see, is 103.

The letters signify, that it is good for bedding, B; for cut flowers, C; for both bedding and cutting, marked X. If it is fragrant it is marked F, and for window boxes, W; for partial shade, S. Where there is no number given, it is known by no other name.

ANNUALS—Are marked for hardy HA; these will bear a hard frost. Half-hardy annuals HHA; these will bear but very little. Tender annuals TA; will bear no frost at all.

BIENNIALS—The hardy, half-hardy and tender biennials require same treatment as annuals, and are marked respectively, HB, HHB and TB. Perennials, HP, HHP and TP. G preceding any of these marks signifies it is a variety that requires indoor culture, and generally the seed requires particular care and attention to successfully start it.

OUR PACKETS ARE LARGE—Instead of giving a large selection of premiums and other catch-penny "gifts" which the CUSTOMER always pays for, we give a larger quantity of SEED. **CULTURAL DIRECTIONS** will be found in each packet.

YOU MUST NEVER ORDER THE SEED BY THE NUMBERS.

New Comet Aster

RUBY AND WHITE

THIS strikingly beautiful Novelty, of the same habit as the other varieties of this popular class of aster, originated from the Ruby Giant Comet Aster introduced a few years ago. Its peculiar color is quite unique among all asters. It is equally valuable for bedding, potting and cutting purposes; in fact we consider it the peer of all asters. Pkt 25c.

BUTTERFLY RUNNER BEAN

One of the most beautiful new climbing flowers. The vine is also extremely floriferous, its leaves, of a somewhat lighter green than other runners, almost disappearing beneath the clusters of charming flowers which gracefully rise and fall, like butterflies in the passing breeze. In the Butterfly Bean we have a beautiful new plant both for the kitchen and pleasure garden, which answers the purpose of both, viz: The flowers and vine being exquisite for beauty, and the fruits or beans being of the finest cooking variety. Hence we have a flower that is both useful and ornamental. Price per pkt, 15c; 2 pkts 25c; postpaid.

The Bridal Robe Chrysanthemum

In this beautiful new Chrysanthemum we offer you a variety that is as distinct as it is beautiful. Of very compact and upright habit, its good growth not exceeding 10 inches in height; the sturdy plants throw out their finely feathered foliage from the base and deck themselves with a

mantle of extra double pure white flowers. With their short closely-set petals the latter recall the finest forms of very large-flowering double Daisies and appear in such number that a large bed in full bloom may well be compared to a drift of snow. Chrysanthemum Bridal Robe from seed, has certainly proven a bedding plant of the very first rank, while also useful for pot culture, and considering the long time the flowers last when cut we safely predict for this new Chrysanthemum a feature never before equaled. We urge our customers everywhere to give it a trial this season. Price per pkt 20c; postpaid.

St. L. S. Co.'s Gilt Edge Nasturtium Mixture.

It matters not whether you have room for a single bed or a flower garden, it will pay you to give preference to this Mixture above all other flowers. Price, per pkt 10c; oz 20c; postpaid.

In fact it is the most gorgeous petunia ever discovered, and no lover of petunias can afford to be without the "Rheingold." Price: Pkt 25c; postpaid.

New Glandulosa Aquilegia.

The flowers of this new strain are greatly enlarged, and the range of colors of the flower is of a most delicate blue, the Corolla being pure white. They, of course, are hardy perennials, luxuriating in the more moist situations in the garden, where they form permanent clumps, growing from 1 to 1½ feet high. of the most exquisite pink. Its delicate tone adds to its feminine appearance. It produces in the greatest profusion flowers of enormous size on stems that make them ideal for cutting. The vines are the most vigorous growth, with heavy foliage; in fact it is our grandest new Sweet Pea offering. Pkt 25c; postpaid.

MRS. ROOSEVELT

THE GRAND NEW DAHLIA

Our greatest offering, this new Dahlia, is acknowledged to be far superior to any other Dahlia ever before discovered. It is of larger size, better color, more graceful in form, has better stems for cutting, will bloom better, and last, but not least, will keep longer when cut. The flowers are perfectly double, of largest size, 6 to 8 inches, while the color is a delicate pink, shading to soft, clear pink. In fact it is impossible to correctly describe this exquisite beauty. It must be seen that one may fully appreciate its marvelous achievements. The plant is a strong, vigorous, sturdy grower, of branching habit, and is very hardy. It is a very early bloomer, and continues a mass of bloom until killed down by frost. As the season advances, the delicate soft pink zone becomes lighter and the color contrast exquisitely lovely, and can be compared with no other flower as it stands in a class by itself. The color of this new wonder does not fade or change like many other flowers, but it is a case where each succeeding flower improves in blended appearance. In short the accompanying illustration can give but a faint idea of its supreme splendor. Of the thousands of varieties of Dahlias exhibited on our trial grounds every one was enthusiastic in praise of our new Mrs. Roosevelt in preference to any other Dahlia. The leading florists of the country predict for it **THE LEADER**, in the foremost rank. We urge you to give it a trial this season. Price: Extra strong hardy roots, each 60c; by express.

ST. L. S. CO.'S NEW "EROS" PANSY

THIS grand new Pansy novelty produces very large flowers of a deep velvety brown color, with a broad golden yellow margin. The chief characteristic of this variety is just like that of the well known Pansy Freya, that the back of each blossom has the same broad margin as the frontside, while the dark velvety center is shining through, so that a bed of this lovely Pansy has an appearance of being especially full and rich-flowering. This peculiarity renders this

A Bed of Our New "Eros" Pansy.

new Pansy most valuable for groups and beddings, giving them a uniform imposing aspect from all sides. In recent tests we find this to be one of the most thrifty Pansies we have ever seen. Pkt 25c; postpaid.

ST. L. S. CO.'S NEW ADMIRABILIS PANSY

THIS handsome new Pansy is conceded by critics to be one of the finest of recent introductions. The plants form round, compact bushes with elegant, dark green foliage and produce a great number of long-shafted flowers being regularly set and standing free above the foliage. Up to now only white, blue and yellow and shades thereof were to be found. In our new Admirabilis the most peculiar and most brilliant colorings are to be found. It is of the ever-live Specie. By a slight covering of straw it is thoroughly protected during the winter months, hence its superiority. There are all shades from purest yellow to brightest scarlet, from delicate rose to deepest purple. Three or five large dark blotches are on each flower, the latter being more or less surrounded with a yellow or whitish edge. It comes true from seed. Pkt 25c; postpaid.

DAHLIAS.

BUT few people know that Dahlias can be raised from seed and will bloom the first year. The Dahlias we offer, if sown early, will bloom profusely all fall. The seeds germinate as easily and certainly as Zinnias, and from the very first development are strong, stocky little plants. Plant them in a shallow box or pan early in March or April, transplant them carefully as their growth demands, and keep the soil moderately moist. When all danger from frost is over, plant them in the bed or border in the garden, and from then on they will prove no more trouble than if the tubers had been used instead of seed.

DIANTHUS OR ANNUAL PINKS.

In this large and greatly varied genus are some of the most beautiful and best-loved flowers, unsurpassable for color and fragrance. They are hardy biennials that bloom finely the first season, remaining green all winter and blooming the next year also, if lightly protected. Old plants flower the earliest, but as young ones give the largest, finest flowers, sowings are made every year. Seed can be sown under grass in spring, or in an open sheltered bed. The seedlings are easily transplanted and should stand 8 to 12 inches apart; dwarf ones about 6 inches. If especially large, brilliant flowers are desired, a bed of well-mixed turfy loam, leaf-mould and well-decayed manure should be prepared for them. Average height, 1 foot.

PETUNIA.

THE large-flowered varieties of Petunia, four or more inches in diameter, are best for single plants or small groups. The strains we offer are unrivalled in beauty and variety. The seeds are high-priced because of the great amount of labor and care in artificial fertilization. Seed sown in a hotbed or coldframe early in the spring will produce flowering plants in June. Set the plants about 18 inches apart. They come pretty true from seed, but are not reliable in this respect, being inclined to sport. The seeds of the double Petunia do not possess as much vitality as those of the single, and care must be used to get them to germinate. HA.

St. L. S. Co.'s New Forest Park Petunia

This wonderful new petunia, has met with universal satisfaction everywhere. It is a strain of incomparable beauty, size and luxuriance. Most of the flowers are exquisitely ruffled or fringed on the edges, and are of enormous dimensions, but their great merits lie in the tremendous variety of colors, markings, veining, blotches and stripings, in the most grotesque and beautiful combinations; some with charming deep throats of yellow, white, black, green and maroon, running off into intricate veins. Some of the colors are rich and gorgeous and others lovely of delicate shades. This new offering has revolutionized the petunia growing everywhere. Pkt 25c postpaid.

DO YOU WANT A PARROT, CANARY

OR A BOWL OF FANCY GOLD FISH?

"Of all the Birds, There are but Two,
The Parrot and the Canary, That will please You"

IN reading the above lines one cannot fully realize the truth or sentiment unless they have at some time had a Parrot or Canary in their home. It is indeed truly wonderful the attachment that arises between these little feathered pets and their master.

While a Parrot is undoubtedly the more amusing and human like of the two, yet the Canary adds a spark of happiness to the home which can not be kindled in any other way.

Our Mr. John A. Rau, Manager of our Bird Store is known throughout the Bird World as one of the most reliable authorities upon the feathered race. Mr. Rau's wide acquaintance with all the large bird growers throughout Mexico, Cuba, Panama, Australia and Germany, insures us with receiving nothing but the choicest species of birds from the above countries, therefore you may order from us with the assurance that you are getting the "Pride of the Flock," "In every bird we may send you. Should you desire any special color or plumage, mark your order, "Mr. Rau Special" and state your desire, and he will personally select a bird that will please you beyond doubt. He does this in order that every customer may select their bird through him, as though they were at our store themselves. Thus you will realize that, no difference where you live, you are sure of receiving a bird, such as your heart desires.

DECORATE YOUR HOME

No other decoration adds more to the charm of a library, parlor or den than a handsome bowl of Gold Fish. In it we have animal life in its quietest form.

Fish are the greatest puzzle of any pets which we have. No one has as yet, ever been able to fully determine the exact nature of these little silent creatures. It matters not what hour of the day or night, they may be seen silently darting through the water here and there with seemingly never a thought of the outside world. While fish are unable to demonstrate their appreciation of their keeper's kindness, never the less one becomes so attached to them that it is almost impossible to part with them when once they have been displayed in your home. We handle thousands of fancy imported specimens and we can supply you at all times with a collection of fish, such as your heart desires. We urge you to send today for the beautiful collection listed on this page.
