NEW RARE AND BEAUTIFUL PLANTS

SIEBRECHT & SON. ROSE HILL NURSERIES NEW ROCHELLE, N.Y.
Special Mention

It is worthy of notice that this is not an ordinary catalogue, such as generally sent out, describing a few articles with doubtful accuracy; but a carefully arranged Manual, embracing only the choicest selections, the results of years of experience.

This edition includes principally Plants cultivated under glass, quite a few of which, however, are valuable also for outdoor decorations in Summer. We issue a separate and special Handbook entitled, “The Beautifying of Country Homes,” which gives a full list of Hardy Ornamental Trees, Shrubs, Evergreens, Vines and Hardy Perennial Plants for permanent planting, a copy of which will be supplied upon application.

THE ROSE HILL NURSERIES

The Rose Hill Nurseries is the most complete horticultural establishment in the world. From these Nurseries, a new country place or a gentleman’s estate can be furnished completely with every kind and variety of stock, in sizes and quality to give immediate effect. Every known plant or tree in cultivation can be furnished direct from our Nurseries.

GREENHOUSES AND CONSERVATORIES

Our stock of plants for the furnishing and filling of these is unexcelled. We can supply every known variety of plant of ornamental and decorative value, in Palms, Ferns, Orchids and Ornamental Foliage Plants enumerated in this catalogue, and many others which are not mentioned.

LANDSCAPE CONTRACTING DEPARTMENT

In this important branch, we have a staff of able, experienced men of thorough knowledge, taste and genius, whose schemes and plans are based upon the most practical and natural, as well as artistic lines.

PLANTING ORNAMENTAL STOCK FOR IMMEDIATE EFFECT

Our specimen stock of large and matured Shade Trees for avenues, Evergreens for solitary specimens or for groups, large flowering Shrubs for plantations and decorative plantings, also material for Old-fashioned Gardens, is especially cultivated and trained for such purposes. In fruit trees and small fruit we have a particularly fine, healthy stock of this very important line, for orchards and fruit gardens, in all the different forms of Standard, Half-Standard, Trained Pyramid and Espalier, in all the leading varieties; also Grape Vines for arbors and small fruit of all the choicest varieties, of mature age, which will give an early yield of fruit.

THE PRESERVATION OF TREES

The practical and efficient preservation of Fruit, as well as Ornamental Trees, is of the greatest importance. Trees do not grow in a day, month, or year. It takes the best part of a life-time to raise a tree to mature size and value and, therefore, we cannot afford to lose even one of them. Trees, like animals, require care and attention to preserve them and keep them in vigorous and healthy condition. Neglected trees, even if old, can, by proper renovating, pruning, scraping, cleaning and spraying, be made to live and do well for many years.

Our experience of over forty years in Pomology, Entomology and Forestry enables us to effectually and successfully carry on such work. With our practical method of treatment we have saved thousands of trees from untimely death and decay.

Our “Sure-Kill” Emulsion for the extermination of insects, especially the San José Scale, is a positive remedy. Examinations of orchards and ornamental trees are made by us upon application, and estimates for treatment submitted. No charge for consultation.

THE MOVING AND TRANSPLANTING OF BIG TREES

We are closely identified with the American Big Tree Moving Company and, therefore, are enabled to undertake successfully the furnishing, moving and transplanting of trees of any size from 6 to 36 inches caliper, and from 20 to 60 feet high.

RUSTIC WORK

We are the oldest and largest manufacturers of Rustic Work in this country. Our artistic workers in this line will readily demonstrate their skill where opportunity is afforded; sketches and designs can be submitted.

ROCK WORK

We are the sole agents for the very valuable petrified Tuffa Rock, which is of a highly artistic formation, thoroughly porous, which makes it very valuable for plant life.

Our artists in Rock Work construction and the building of Rock Gardens and Grottoes, are conceded to be the very best.

Conditions under which we Conduct our Business

1. All purchasers are requested when ordering by mail or otherwise to give their own address and directions where to and how they desire their orders shipped—whether by freight or express. When not advised how to ship we exercise our own judgment, and forward to the best advantage of the purchaser.

2. New customers and persons unknown to us are kindly requested to accompany their esteemed orders either with cash, post office orders or drafts on New York, or with satisfactory reference.

3. All orders are carefully packed for shipment by experienced hands, so they may be sent to even far distant points with perfect safety; and no charges are made for packing and shipping by express or freight at New Rochelle.

4. After delivery to forwarders in good condition, all shipments are at customer's risk; and complaints of any kind will not be entertained unless made promptly upon receipt of stock.

Our Newport Store

Our Newport Store

New York, New Haven and Hartford Railroad.
INTRODUCTORY

IN PRESENTING a new edition of our General Catalogue, we wish to call attention to the variety and extent of our stock as well as to its superior condition. Since the issue of the last edition, we have added to our collection very many new and valuable plants of recent discovery and introduction, as well as brought forward a number of beautiful species which, while years ago found among the finest collections, have, through neglect or perhaps extreme modern fashions, been partially lost sight of. Among these latter especially may often be found the most charming forms, possessing all the attraction of the latest novelty, together with merits established by years of experience in their culture. We have for several years given especial attention to the re-introduction of many such deserving and valuable plants to their former place in the esteem of the horticultural public, and with gratifying success.

The 15th Street Store—Established 1867

The four illustrations shown on this page represent the progress of our New York stores from the founding of the business at 15th Street in 1867 to our magnificent new store, built in 1903, situated at 425 Fifth Avenue, Corner 38th Street.

Our Store at 5th Avenue and 37th Street in 1877

also a great advantage in enabling us to procure and exchange rare and valuable stock; wherefore it may be readily understood how we are in an exceptionally favorable way of meeting all demands for new, rare and valuable plants at the most reasonable prices.

A VISIT TO ROSE HILL NURSERIES SOLICITED

We invite personal inspection of the stock in our show houses at New Rochelle. Here are constantly many interesting sights, not common to ordinary nurseries—rare Orchids and tropical plants in bloom, grand specimen Palms and Cycads, a profusion of the finest Roses, etc., etc. We are glad to see visitors any day (except Sunday), and the Rose Hill Nurseries are easy of access from New York. Trains on the New York, New Haven and Hartford railroad, leaving Grand Central depot (Forty-second street), every hour, pass New Rochelle. Electric Road passing the Nurseries will be found at the station on the arrival of all trains, or we will be pleased to have our 'bus meet visitors.

Those residing on the New York and Harlem Railroad can reach the Nurseries by trolley from Tuckahoe, only twenty minutes' ride.

Our 5th Avenue and 42nd Street Store in 1879

OUR ADVANTAGES

We are operating extensive tropical nurseries on our plantations in the West Indies, and are thus enabled to grow rapidly and to perfection, under most favorable circumstances, many things which are slow and difficult of culture in North America. Our direct connections with the most prominent botanical and commercial establishments of Europe, the East Indies, Australia and South America, are

The New Siebrecht Building, 425 Fifth Avenue, Corner 38th Street
PRIVATE ESTATES

New and undeveloped places and gentlemen’s country estates furnished and planted complete. The stock of our Nurseries, both for indoor and outdoor purposes, is so comprehensive that everything called for to outfit greenhouses, conservatories, gardens, orchards, or for landscape and lawn decorations, can be furnished from our own establishment and will be guaranteed to give entire satisfaction.

BIG TREE-MOVING DEPARTMENT

We are prepared to move and successfully transplant and guarantee to grow any trees from 6 in. to 36 in. caliper, and from 20 ft. to 80 ft. high, a feat which, under ordinary methods of transplanting trees, cannot be accomplished. Our unique Big Tree-Moving Machines have done this work for the last twelve years with marvelous success.

We have engaged in the laying out, scientifically preparing and planting of fruit gardens and orchards for the past forty years.

PACKING DEPARTMENT

The most careful attention will be given to packing in order to secure safe arrival and light weight. We promise liberal count, careful labeling and light, secure packing.
**New and Rare Plants of Recent Introduction**

**NEPHROLEPIS SIEBRECHTII**

This is a sport from the Pierson Fern, in which the plummy peculiarity of the original form is even more distinctly developed than in the original; the side pinnae being again subdivided and starting out at right angles to the direction of the midrib, makes both sides of the frond equally beautiful, while, at the same time, the plant is of much more compact habit, growing only one-half as tall, but with the fronds nearly twice as wide, making it a much more desirable plant for all purposes. 6-inch pots, $1.25 each; 7-inch pots, $2.00 each. Large specimens, $5.00 each.

**BEGONIA REX IN VARIETIES**

We have a grand stock of new Hybrid Begonia Rex. Those who are making collections of Begonias would be well repaid by a visit to our Nurseries and an inspection of our grand collection. Prices on application.

**LADY BATTERSEA New Hardy Hybrid Tea Rose**

A seedling variety of great distinctness of character. The growth is vigorous, the shoots long, with fine green leaves, each shoot bearing a flower thrown well above the foliage, and produced singly, as to require little or no disbudding. The buds are long, oval and pointed, and of a beautiful cherry crimson, perfumed with an orange shade. The flowers are of medium size and almost full, so well together as to retain their form for a long time. When first open the blooms are light rose crimson, still keeping the orange tinge of the bud, brilliant in the extreme, passing to pure soft rose, the color clear and attractive.

Price, 1st size, 50 cents each, $5.00 per doz.; 2d size, 30 cents each, $3.00 per doz.; 3d size, 15 cents each, $1.50 per doz.

**PRINCE OF BULGARIA A Grand New Hybrid Tea Rose**

A very vigorous grower, with large, bright green foliage, beautiful in form of bud; flowers very large and full; the other petals are extremely large, of superb rosy flesh color; very fine and very free. First prize at Paris Exposition. Very much like a superb “Carnot” in form.

Price, 1st size, 50 cents each, $4.50 per doz.; 2d size, 30 cents each, $3.00 per doz.; 3d size, 15 cents each, $1.50 per doz.

**“RICHMOND” A Splendid, New Red Rose**

This splendid, new red Rose was raised by E. G. Hill & Co., and is the most valuable addition to the list of Winter blooming Roses sent out in years. It blooms as freely as the finest of the monthly Roses, is very easy to grow, has splendid foliage and long stems. The color is magnificent, a rich scarlet crimson, the most vivid and richly produced in the Hybrid Tea Rose. Unlike other red forcing Roses, it does not “blue” with age.

Price, 1st size, 60 cents each; 2d size, 40 cents each; 3d size, 25 cents each, $2.50 per doz.

**“CORALLINA” New Bedding Rose**

A European variety which is splendidly adapted to our American climate. Flowers deep, rosy crimson, large, full and finely formed. It makes beautiful buds, particularly during the Autumn months. It is a constant and abundant bloomer, strong stems and fine foliage, fine for cutting; its vigorous, healthy habit and bright color make it exceedingly valuable for the garden.

Price, 1st size, 60 cents each, $6.00 per doz.; 2d size, 40 cents each, $4.00 per doz.; 3d size, 20 cents each, $2.00 per doz.
PALMS

The Largest Stock in Varieties of Palms in the United States

A CLASS of plants especially noted for their majestic and very imposing character, and rightly called the monarchs of the vegetable kingdom. They are of great decorative value. Their grand appearance, their magnificent foliage and their universally graceful and imposing habit distinguish them from all other plants. No collection is complete without Palms; they are unrivaled for the decoration of greenhouses and conservatories, parlors and halls, and many establishments have stately structures used especially as Palm houses. Twenty years ago but few varieties of Palms were to be found in collections, as gardeners then generally supposed them difficult to cultivate, but now we find large numbers of species and varieties of Palms, Cycads, Zamias, etc., in nearly all the prominent gardens.

They can be justly recommended for their great usefulness, beauty and easy cultivation; in all modern decorations of churches, public and private festive halls, as well as for floral exhibitions, handsome specimens of Palms are the main factors, and are indispensable.

Foreseeing the steadily increasing taste and demand for these noble plants, we prepared our houses and stock for it, and, at great expense, continued cultivating and increasing our now unlimited supply. We have added, year by year, a number of new, handsome and distinct species and varieties, and our stock is now of such magnitude that it must be seen.

In order to form the least idea of it. As most of our stock is raised in our own plantations and tropical nurseries in Trinidad, West Indies, and cultivated and perfected in our extensive Palm houses at Rose Hill Nurseries, New Rochelle, N. Y., we are enabled to supply the trade of the country at most reasonable and popular prices.

The culture of most species of Palms is comparatively simple. On an average they give less trouble than the majority of plants, enduring rough usage, smoke, dust and changes of temperature in most heroic fashion. All the species in the following list require for their successful cultivation an average temperature of from 50 to 60 degrees; but when used as decorative plants for greenhouses, conservatories, winter gardens, or even for outdoor decorations, will endure without harm an occasional drop to 40 degrees in the temperature.

**ACANTHOPHENIX crinita (Arceo nobilis).** A Palm of very graceful habit, with fine pinnated fronds. The under sides of the pinnae are a silvery glaucous color, and the plant is furnished with long black spines, which give it a very decorative appearance. *$5* upward.

**ARECA.** Fine decorative plants of robust and dwarf habit, with strong pinnated fronds.

A. alba ............................................ *$3.50* to *$5.00*
A. Baueri (Kentia Baueri) ....... 2.50 to 10.00
A. lutescens. The most beautiful and graceful decorative Palm in cultivation, with light green, arching feathery fronds. *$1.00* upward.
A. Madagascariensis ............... 10.00 to 20.00
A. rubra. A fine pinnated Palm of high decorative value, with pinnate-centered foliage. *$1.50* to 3.50
A. sapida ............................................ 2.00 to 5.00

**ARENGA saccharifera.** The true Sugar Palm of India. *$2.50* to *$5.*

**ASTROCARYUM Ayri.** The Mururu Palm. A very fine pinnated and spineous Palm ............................................ *$5.00* to *$10.00*
A. argentatum. Leaves silvery underneath ............................................ *$5.00* to *10.00*

**CALAMUS ciliaris.** Beautiful and of very graceful habit, with colored spines. The young specimens are unrivaled for small decorations and for jardinières. *$5.00* to *$10.00*

**CARLUDOVICA.** Carludovicas are Cycadaceous plants, much like the small Latanias in habit. Their broad leaves are rich, dark green, and they are very useful decorative plants, of rapid and easy growth.

C. palmata ............................................ *$2.00*

**CARYOTA.** Caryotas are broad, acute, pinnate Palms of majestic habit, with bi-pinnate fronds. The pinnae are of a peculiar fish-tail-like form, and the species are admirable for decorative uses.

C. sobolifera ............................................ *$5.00* to *$10.00*
C. urens ............................................ 1.50 to 5.00

**CEROXYLON neveum.** The Wax Palm from the Andes: of very striking character, with beautiful and broad foliage, silvery underneath: very fine and imposing habit. *$7.50* to *$20.*

**CHAMELEOREA.** The Chameleon are Palms with pinnate fronds, and of a dwarf habit; useful for all sorts of decorations, and for table plants.

C. elegans ............................................ *$1.50* to *$5.00*
C. Ernesti-Augusti (C. latifrons goniom). An exquisite dwarf species, with large leaves, and producing large racemes of flowers, which afterward ripen into scarlet berries ............................................. 5.00

**CHAMEROPS.** During the Summer months all the Chamorops Palms are particularly hard in the open air. No better decorative plants for lawns and grouping can be found.

C. Fortunel (excelsa) ................. *$3.50* to *$10.00*
C. humilis ............................................ 5.00 to 10.00

**COCOS.** The Cocoa Palms are without exception majestic forms, with long fronds and narrow pinnae.

C. flexuosa ............................................ *$1.50* to *$2.50*
C. nucifera. The real fruit bearing species ............................................. 5.00 to 15.00

C. Weddeliana. A beautiful dwarf and graceful species, with very fine pinnate fern like fronds; excellent for jardinières, table decorations, etc.; it bears the same relation to other Palms as the fine Maidenhair fern does to all other ferns. *$1.00* to *10.00*
CORYPHA australis (Livistona australis). An excellent and hardy Palm of compact and robust habit. $1.50 to $10.

CYCAS. These are magnificent plants, the true type of the Cycads. Of noble and majestic habit, and most impressive, yet they do not grow too large. They are probably the most valuable decorative plants grown, both for indoor and outdoor use, and the cut leaves have recently been made available for funeral wreaths, etc. The Cycas are very hard; their heavy, glossy, deep green fronds resist alike the gas, cold and dust to which decorative plants must frequently be exposed. We grow them by the thousand, and offer a superb stock.

C. circinalis. A handsome species. $10.00 to $100.00
C. revoluta. Often called the “Sago Palm,” or Palm of Victory $1.00 upward
D. Demonorops. Very graceful Palms, much like the Calamus.
D. Palembanicas $5.00
DION EDULE. A well-known, fine, decorative Cycadaceous plant, much on the order of the Cycas. $2 to $10.

ENCEPHALARTOS Altensteinii. A cycadaceous plant, allied to the Cycas, conspicuous and odd in form, and very showy when grown in Palm houses and conservatories; even small specimens show their peculiar habit. $20.

EUPHORBIA. Tall growing Palms with clean and handsome stems.
E. edulis $1.00 to $5.00
E. montana 2.00 to 5.00

GEONOMA. Very graceful and elegant Palms of dwarf habit; the new leaves are of a beautiful red color.
G. gracilis $2.00 to $5.00
G. princeps 5.00 to 10.00

KENTIA. All the Kentias are of very graceful and decorative habit; of compact and well furnished growth of a most hardy, distinct character, they stand more hardship than any other Palm.
K. Baueri. A strong dwarf species. $2.50 to $10.00
K. Belmoreana. Very largely grown, and a splendid species. $3.50 to 5.00
K. Canterburyana (Teitchii). 5.00 to 10.00
K. frutescens. Very distinct. 5.00
K. Lindeni .5.00 to 10.00
K. MacArthuri .5.00 to 10.00
K. Mooreana. A handsome new Palm 7.50 to 10.00
K. Wendlandii .5.00 to 10.00

LATANIA. A small genus of handsome Fan-Palms, from the Mauritius Islands; they are among the best of the decorative species.
L. aurea. A distinct and showy form, with yellowish stems and leaves...........$10.00 upward

L. Borbonica. (See Livistona Chinenesis.)
L. rubra. A most distinct species, with large palmed fronds, finely serrated, and of a dark, often red brown color; a beautiful show plant .............$8.00 to $10.00

LICUALA. A class of dwarf but elegant Palms, of a conspicuous habit, with palmeated fronds; they make beautiful specimens for decorations, and are valuable for almost any sort of general grouping.
L. grandis (Pritchardia grandis). The rarest and handsomest Palm of the Fan-shaped type: handsome specimens ..........$3.50 to $10.00

L. horrida 5.00
L. peltata 5.00

LIVISTONA (Livistona Borbonica). Well known under both names—perhaps best under the latter. Probably the most widely distributed Palm for decorative purposes; its shining green fan-shaped foliage, resisting dust and gas, has made it most popular. Of free and rapid growth, and showing its fine and characteristic habit at an early stage, it is deservedly popular everywhere. We grow it in enormous quantities, and offer fine specimens in a wide range of sizes, at from $2.50 to $25; smaller plants, $1 to $2. See illustration.

MACROZAMIA spiralis. Perhaps the most graceful of all the Cycads, themselves so valuable; indispensable in any collection. $5.
**Palm**s

**MARTINEZIA.*** These are most remarkable and distinct showy Palms, with bi-pinnate fronds and pinnaules like a fish-tail; most elegant, in either large or small specimens.

- **M. carotatafolia.** $2.50 to $10.00
- **M. erosiformis.** 5.00 to 20.00
- **M. Lindenii.** Very fine species. 6.00

**RAVENALO Madagascariensis.*** This, the Traveler's Tree of Madagascar, is of stately and noble habit, and but for the musa like character of its large, handsome oblong leaves it might be taken for a Palm. Its singular character gives it a most interesting appearance, and it is a most useful decorative plant. Fine specimens, $5 to $10.

**RHAPIS.*** Very distinct Palms, of an exceedingly elegant habit, with segmental foliage of a rich color and great hardness. No better decorative plants are grown.

- **R. flabelliformis.** A very beautiful Palm, with slender, graceful leaf-stems, and five to seven cleft, somewhat plaited leaves. The main stems are curious and pretty, rather low growing, forming plants of most convenient size, which are very well adapted to withstand the trials which befall decorative plants. $2.50 to $10.00

- **R. flabelliformis intermedia.** Reminisces the above in every respect, but that the leaves, instead of having rather a semi-erect bearing, proceed in a nearly horizontal direction, giving the plant a most compact and graceful habit. $5.00 to 10.00

- **R. Khivanwoutsik.** An odd and somewhat rare species. $5.00 to 25.00

- **R. humilis.** An exceedingly graceful and very distinct form. $10.00 to 25.00

**SABAL.*** The Sabal or Umbrella Palms are majestic forms, like the Pritchardias, Latanias and Coryphas, with very large leaves, but young plants with well established leaves can be used for minor localities. For Palm houses these species are indispensable. To this genus belongs the native Palmetto of our Southern States, and some other common species.

- **S. glaucescens.** $1.00 to $2.50

**PHOENIX ROEBELINII**

**MAXIMILIANA regia (Attalea amygdaлина).** A very striking and dense growing, hardy, and yet very graceful Palm; a rare species. $10 to $20.

**OREDOXOA regia.*** The Royal Palm, from Cuba. A very lofty growing Palm, sometimes reaching over 100 feet in height. $2.50 to $10.

**PHOENICOPHORIUM Sechellarum (Stevensonia grandifolia).*** The celebrated Phoenix Palm; also called the "Thief Palm." Certainly the grandest of all the family. Even small plants show this beautiful habit. A worthy and esteemed member of any collection. $10 and upward.

**PHOENIX.*** This genus includes the Date Palm. All forms of it, even when small, are beautiful for decorative purposes. The pinnate leaves are long and graceful, spreading and recurving.

- **P. Canariensis.** From the Canary Islands. $3.00 to $10.00
- **P. daeystifera.** The true Date Palm. 2.50 to 10.00
- **P. sylvestris.** The Wine Palm. 2.00 to 10.00
- **P. spinosa.** 3.50 to 10.00
- **P. rupicola.** This, the handsomest species of all, is truly beautiful; quite rare. $2.50 to 10.00
- **P. reclinata.** 3.00 to 10.00
- **P. Roebelinii.** A most graceful decorative Palm, of dwarf habit. Quite new. $2.50 and upward

- **P. tenus.** $2.00 to 10.00

**PRITCHARDIA.*** Palms of majestic habit, with very large and serrated leaves of palmate form. The finest species for Palm houses; the rarest of all is called P. grandis.

- **P. aurea.** $10.00 to $15.00
- **P. grandis.** A handsome, dwarf growing Palm of unusually striking appearance; the rarest in cultivation. See Licuala grandis.

**PTYCHOSPERMA (Seafordia).*** Palms of graceful and elegant habit; the fronds are broad, pinnated and rich green above, silvery on the under side; largely used and highly esteemed.

- **P. Alexandrea.** Elegant and rare. $2.50 to $5.00

**PHOENIX RUPICOLA**

**THRINAX.*** Noble decorative plants, with long fronds and beautifully formed umbrella-like leaves of fine color, some of a silvery appearance beneath.

- **T. argentea.** $5.00
- **T. elegans.** 5.00
- **T. elegansissima.** 7.50
- **T. graminifolia.** 5.00
- **T. purpurea.** 7.50

**VERSCHAFFELTIA.*** Fronds of a most conspicuously and remarkable form, of fine red brown color.

- **V. melanocheta.** Rare. Price on application.

**V. splendida.*** Price on application.

**ZAMIA.*** Like the Cycas, very ornamental plants.

- **Z. integrifolia.** $5.00 to $20.00
- **Z. pungens.** 25.00 upward
- **Z. Roezelli.** 25.00 upward

RARE SPECIMENS OF PALMS, CYCADS AND TREE-FERNS

Plants of Extraordinary Size and Beauty

PALMS

Our collection of large, rare and beautiful specimens of every variety of Palms in cultivation is, without exception, the most complete and valuable in this country. All the superb specimens offered here are of perfect and symmetrical form and have for years been grown at the Rose Hill Nurseries with great care. We offer them at prices which will be supplied on application and describe them just as they stand. Those wishing superior specimens to grace any decorative position will find this list of great value.

Areca alba. 12 feet; grand specimen.
Areca lutescens. 15 feet, three stems; fine specimen.
Areca lutescens. 15 feet, two stems; fine specimen.
Areca lutescens. 10 feet, one large stem, very well-furnished.
Areca Verschaffeltii. 9 feet, six leaves; fine specimen.
Astrocaryum Mexicanum. 10 feet, twelve leaves; a beautiful specimen.
Caryota sobolifera. 10 feet; exceedingly fine specimen.
Caryota sobolifera. 8 feet; handsome plant.
Caryota urens. 18 feet; grand specimen, with three stems.
Caryota urens. 12 feet; splendid specimen.
Chamaerops humilis. 6 foot clean stem, 6 inches in diameter; over 100 leaves; a magnificent plant, the largest in the country; it is rarely that C. humilis forms a stem, and the only other plant of such size and beauty in cultivation is in Berlin.
Chamaerops stauracanthus. 8 feet, nine leaves; fine plant.
Kentia Belmoreana. 17 feet.
Kentia Forsteriana. 26 feet.
Kentia Forsteriana. 25 feet.
Kentia Wendlandii. 15 feet, twelve leaves; the largest specimen in cultivation.
Livistona Chinensis (L. a. Borbonica). 12 feet, ten leaves.
Livistona Chinensis (L. a. Borbonica). 10 feet, twelve leaves.
Livistona Chinensis (L. a. Borbonica). 8 feet, eight leaves.
Livistona horrida. 5 feet, eight leaves; grand specimen.
Livistona rotundifolia. 8 feet, twelve leaves; largest known.
Livistona rotundifolia. 5 feet, twelve leaves; fine plant.
Martinezia Lindenii. 10 feet; a beautiful plant.
Phoenix roebiculum. 10 feet; grand specimen.
Phenix rupicola. 7 feet; a beautiful plant.
Pritchardia Pacifica. 8 feet, eight leaves; handsome plant.
Pritchardia grandis (Licuala). 5 feet, ten or more leaves.
Ptychosperma Alexandre (Kentia robusta). 16 feet, seven leaves; noble specimen.
Ptychosperma Alexandre (Kentia robusta). 12 feet; elegant specimen.
Thrinax elegans.12 feet; a grand specimen plant.
Thrinax elegans. 10 feet, eleven leaves; beautiful.
Thrinax elegans. 8 feet, eight leaves; very distinct.
Thrinax argenteum. A very distinct and rather robust variety; 6 feet; fine.

We have many other rare varieties of Palms in large specimens of from ten to twenty feet, a list of which will be promptly mailed on application.

CYCADS AND CYCADEAS

Of this very valuable class of plants we have in stock a number of very rare and unsurpassed specimens, a list of which will be sent upon application.

Cycas circinalis. This grand and most magnificent specimen stands twelve feet high, with a clean trunk or stem two feet in circumference, having 50 fine fronds, each eight feet long; perfect in shape, and is probably the finest specimen in America.

Cycas Lehmanii. Truly a noble plant of a most elegant and very distinct species. It is the only specimen in this country so far as is known, and has a clear stem or trunk two feet high and a foot in diameter, with 56 perfect fronds. The plant has a twelve-foot spread; its leaves are of a beautiful arching and graceful character, and measure seven feet in length, with still another new growth of many more fronds starting.

Cycas Rumphii. This another grand specimen, is much like the foregoing, but of a different species: it is of a beautiful compact habit, and its widely-spreading, handsome fronds are of a somewhat glossy, rich green color. The plant has a two-foot stem or trunk, and a ten-foot spread, with 50 perfect fronds, each six feet in length; also the only specimen of its kind in the country, so far as is known.

Cycas revoluta. (Commonly called the "Sago Palm".) A noble specimen, with stems fully one foot high, well proportioned, with upwards of 200 fronds—a magnificent pair.

Cycas revoluta. A beautiful specimen, with five-foot stem, well proportioned, and with 40 fronds, all perfect.

Seaforthia elegans (Ptychosperma Cunninghami). 16 feet; a magnificent pair, with beautiful straight stems; very handsome.

Seaforthia elegans. 14 feet; elegant pair.

Seaforthia elegans. 12 feet; elegant, perfect plants.

Seaforthia elegans. 10 feet; elegant, perfect plants.

Verschaffeltia melanochante. 9 feet, six leaves; probably the largest and handsomest specimen of this very rare species in cultivation under glass anywhere in the world.

Livistona Chinensis (Latania Borbonica)

Cycas revoluta. A splendid plant, with four-foot stem; of good shape, with upwards of 40 fronds.

Cycas revoluta. Elegant specimens, three-foot stems; in fine shape, with upwards of 40 leaves; a magnificent pair.

Cycas revoluta. A fine specimen, with a 3½-foot stem; a magnificent plant, with splendid head of perfect leaves.

Cycas revoluta. A beautiful specimen, with three-foot trunk and perfect head.

Cycas revoluta. Grand specimens; a fine pair, with 2½-foot stems and good heads.

Cycas revoluta. Magnificent specimens, with two-foot stems, well proportioned.
Rose Hill Nurseries, New Rochelle, N. Y.

Cycas revoluta. Very handsome specimens, with eighteen to twenty-inch trunks, all with magnificent heads.

Cycas revoluta. Splendid half-specimens, with trunks from one to 1½ feet, all with perfect heads and a number of leaves.

Dion edule. A grand specimen, with a clear stem of three feet, and a perfect head of 10 fronds.

Dion edule. Handsome specimens, with one-foot stems and good heads.

Zamia Lindenhii. A most magnificent specimen, with a two-foot clear stem, and 14 elegant fronds, six to seven feet long.

Zamia Roezlii (true). Beautiful specimens, seven feet high, with seven perfect fronds and strong trunks.

Zamia Mexicana. Beautiful specimens, of compact, dwarf habit, and dark purplish green, gracefully curved leaves, about four feet high.

TREE FERNS

A remarkable class of ferns, which of themselves form stems or trunks from the top of which they throw their stately fronds in great profusion.

Besides this list of extraordinarily large and handsome specimens, we have many half and three-quarter specimens closely approaching the sizes mentioned and described below. For full list of Tree Ferns, see Ferns.

Alsophila australis. Handsome specimen, with stem of four feet, crowned with eight large perfect fronds of a charming rich green color; the plant has a six-foot spread.

Cyathea dealbata. A grand plant, with a seven-foot stem and 15 fronds; this is a rare specimen.

Cyathea Smithii. A perfect pair of this grand species, with five-foot stems, and upwards of twenty fronds; very rare variety.

Cibotium Schiedei. A very beautiful and graceful specimen, which is established upon a six-foot stem of Cyathea dealbata, with 12 fronds.

Cibotium regale. One grand specimen of this handsome variety, with rich light green fronds, which strongly contrast with the golden yellow silk-like fur on the leaf-stalks; the stem is three feet, with a beautiful top.

Cibotium princeps. Magnificent specimen of this noble and vigorous-growing tree fern, about six feet high, with about the same spread, and many fine fronds.

PRITCHARDIA GRANDIS

See description, page 11

ORCHIDS

The Largest and Oldest Orchid Establishment in America
(We Introduced Orchids in a Commercial Way in This Country)

It is well known that we have one of the most extensive and valuable commercial collections of Orchids in America, to which we are constantly adding, both by our own propagation of the most desirable species, and by large importations from the various quarters of the globe in which are found growing these strange and most beautiful members of the floral kingdom.

Orchid culture and propagation has always been with us a labor of love as well as a matter of business; therefore we may be pardoned for our enthusiasm. Indeed, anyone who has ever been engaged in the culture of Orchids will agree with us that it is a most fascinating employment, interesting to every sense of man, and filling him with admiration and reverence for the great Creator of whose wonders these are but a fragment. There is something about these plants which, while they may attract first only from curiosity aroused by the grotesque form of a particular species, will always hold the lover of Nature with triple bands of interest, surprise and admiration.

Orchids Have Become Popular.—But a short time ago comparatively few people knew anything about this class of plants and quite often the question was asked, "What is an Orchid?" Since then, however, nearly every lover of flowers has become acquainted with the Orchid, and not only knows them in their various varieties and wonderful colors, but as well cultivates them in greenhouses and conservatories.

View in one of our Orchid Houses—Cattleya Trianae in Bloom
Orchids the flower par excellence.—There is no other class of plants in cultivation which can vie with the Orchid in production of beautiful and wonderful flowers; with this beauty, they combine highly artistic forms and are as attractive as they are highly interesting. The flowers, also, are of great substance, possessing immense vitality and, while others fade in a few short hours, those of the Orchid will keep fresh for weeks, and it is this fact which adds so much to their value over all other flowers. The collection we here present includes all the very choicest varieties and can be readily cultivated. We have given every variety in the list below a designating mark, and here append the outlines of culture for each class.

Cool-House Orchids, or all those marked c in the list which follows, require a so-called cool treatment. A Winter temperature of from 50 to 55 degrees, with plenty of moisture, is best suited to them, and in Summer they should be kept as cool as possible; the direct rays of the sun should never reach them. The principal species which constitute this section are Odontoglossums, Masdevallias and Oncidiums, together with a few sorts of Lelia, Cattleya, Maxillaria, Epipendrum and Disa, all of which are very beautiful and most satisfactory flowering Orchids. The principal thing in successfully growing these Orchids is to keep them cool and moist, and to admit plenty of air.

Orchids for an Intermediate Temperature, marked d in the following list, can be grown in any ordinary greenhouse or, where the facilities are limited, in those parts of houses where cool and hothouse Orchids are grown which may favor their requirements as to a little cooler or warmer temperature.

Hothouse or East Indian Orchids, marked $ in this catalogue, include many magnificent species. They are usually grown in a stove-plant house, or in any house having a temperature of from 60 to 70 degrees, and a moist atmosphere.

NEW, RARE AND SELECT ORCHIDS.

ACINETA.
Epiphytal plants of stout habit, bearing showy, fragrant flowers in drooping racemes. They are related to the Peristeria or Holy Ghost Orchid. All the species are grown in baskets.

iA. Barkeri..........................$1.00 to $2.00
iA. Humboldtii.........................1.00 to 2.00

AERIDES.
The Aérides are among the most beautiful of East Indian Orchids. These plants are of easy culture, and should be grown in pots or baskets with peat and moss, and a good supply of water at all times.

iA. Ballantinianum. A new and really valuable introduction of this handsome species. The flowers of this plant are produced like those of A. crispus, on long racemes, but differ from them in being suffused with a much brighter rose color, while equally sweet scented; a free grower and bloomer........................................$10.00

iA. crassifolium. This is not a new variety, but certainly is one of the most free flowering and easiest cultivated, and a truly beautiful and bright, showy sort. We offer a few perfect specimens, twelve inches high with twelve to fifteen leaves. Large specimens, $10; smaller.......$2.50 to 7.50

iA. crispus Warneri..................2.50 to 5.00

iA. Fieldingii. Fox-brush Orchid. 2.50 to 5.00

iA. Lecanum..........................2.50 to 7.50

iA. Lobellii..........................2.50 to 7.50

iA. quinquevulnerum. This is a splendid free growing and free flowering Orchid, and though not exactly new, is yet rare. Grows more open than any other of the genus; its flowers are fragrant and of a beautiful combination of rose purple and white. Large specimens, $10; smaller...........$2.50 to 5.00

iA. ordoratum........................2.50 to 4.00

iA. ordoratum majus..................3.50 to 5.00

iA. purpureascens...................3.50 to 5.00

iA. saraiscum........................2.50 to 10.00

iA. virens............................2.00 to 4.00

iA. virens Dayanum...................2.00 to 4.00

ANGRECUM.
A very curious genus of Orchids, all of them being very handsome, and desirable for every collection.

iA. citratum. This really coquetish, dwarf growing variety is one of the most interesting of the genus. Numberless pure white flowers are set in regular order upon round green stems which curve out from the plant in a most graceful manner. Several fine plants..........$5.00 to $15.00

iA. Angrecum eburneum.................$3.50 to $7.50

iA. eburneum superbum. A grand specimen three feet high and the same in spread..............$3.50 to 10.00

iA. eburneum viridum.................3.50 to 5.00

iA. falcatum..........................3.00 to 6.00

iA. Leonis (Eranthus Leonis). A very distinct Orchid, of dense, rather dwarf habit, with stiff leaves of a fleshy texture; many flowers, in branching spikes, of pure white and sweet scented perfume and most worthy..........................2.50

iA. sesquipedale. Often called the "Ivory Orchid" for its ivory white flowers, which are curiously as well as handsome, quite fragrant and very showy, lasting a long time in perfection; before fading the flowers turn a lemon yellow....................$7.50 to 25.00

iA. superbum..........................5.00 to 10.00

iA. virens............................3.50 to 5.00

BRASSAVOLA.
Epiphytal plants. They should be grown on a block.

iB. glauca.............................$1.50 to $2.50

iB. Digbyana (Lelia Digbyana). 1.50 to 2.50

BRASSIA.
This genus is closely allied to Oncidium. Best grown in pots, with fibrous peat and moss; should be watered freely. $2.50 up.

iB. maculata..........................$1.50 to $3.00

iB. maculata major...................3.50 to 5.00

iB. verrucosa.........................75.00 to 1.50

iB. verrucosa grandiflora.............1.00 to 1.50

CALANTHE.
A very distinct genus. The several species and garden hybrids are among the finest flowering and most satisfactory Orchids. They are of easy culture. The majority of them are terrestrial Orchids, and therefore should be potted in loam and leaf-mold, and given a liberal supply of water when growing.

hC. oulata gigantea. This very rare and truly handsome Calanthe is certainly the most beautiful and showy of the genus. It has been commonly known as "Christ Orchid," as the pure white, five petalled flower, with the rich blood red blotch in the center, very correctly represents the wounded hand of the Saviour on the cross. $3.00 upward

hC. Fournerii.........................3.50 to $5.00

hC. Regnierii. Quite a rare acquisition, as its very beautiful and bright, striking flowers, with a whole rosy pink lower petal, appear much later than those of most other varieties. Several strong plants...........$3.50 upward
Orchids

CATASETUM.
A genus of a very remarkable character, with short stemlike pseudo-bulbs, large leaves and erect spikes of quaint looking flowers. The plants should be potted in a compost of peat with good drainage.

hC. Bungerothii. A beautiful and very handsome Orchid, with large white flowers of a waxy texture and of great substance. Its bold and strong growing habit and its easy cultivation make it at once a favorite with all who have seen it. $7.50 to $10.00

hC. macrocarpum

CATTLEYA.
The species of this popular genus rank among our finest Orchids; they are general favorites, and we are glad to find that they are beginning to be extensively cultivated in this country. The pseudo-bulbs are, in many cases, elongated and thickened, and the dark, massive, evergreen foliage renders the plants peculiarly attractive. The flowers are all large and elegant, and can scarcely be surpassed for their sparkling richness and depth of color, the most frequent tints of which are violet, rose, crimson, magenta, white, yellow, mauve and purple, with their intermediate shades. The flowers, which are enormous, and are enclosed in a sheath, issues from the top of the stem, and a single spike sometimes contains as many as from ten to twenty flowers. The plants are easily grown in baskets or pots, with a compost of fibrous peat and moss, and require a liberal supply of moisture when growing; they should always be shaded from the direct rays of the sun. (See view of one of our Cattleya houses.)

hC. amethystina

hC. amethystoglossa

hC. amethystoglossa sulphurea

iC. aurea. This lovely Cattleya is from Colombia, and is quite distinct from C. Dowiana aurea, with which it is often confused. It is of strong growth and free flowering; very distinct. It flowers in the Autumn; sepals and petals greenish lemon yellow; lip is undulated and of rosy purple, with yellow streaks; the flowers are large and abundant. $10.00 to 15.00

hC. bicolor

iC. Bowringiana. A capital Orchid, of free and easy growth; an abundant bloomer in Autumn; flowers amethyst; rosy petals and sepals; with rich purple lip; many flowered, and good for cut blooms. Fine specimens $3.50 upward

iC. citrina. This is the only Cattleya that thrives in a coolhouse, and it there grows to perfection. It is citron colored and citron scented; should be grown on blocks of wood. $1.00 to 2.00

hC. Crispa

iC. Dowiana

iC. Eldorado

iC. Eldorado alba (Wallisi)

iC. Eldorado splendens

iC. Eldorado Wallisi (or Virginialis). A pure white Cattleya, flowering in September. Sepals, petals and lip pure white, with orange yellow throat; very sweet scented $25.00 upward

iC. gigas. The Giant flowering Cattleya. This section contains the largest and most showy flowering Cattleyas known. It is of robust growth and good, strong constitution, and delights in plenty of heat and moisture; does best in baskets. On some extra fine specimens we have had as many as 26 flowers, measuring from seven to nine inches across. Fine specimens $2.50, $5, $10, $25 and $50

hC. gigas, var. — We have several new unnamed varieties, with extraordinarily handsome, rich and brilliantly colored flowers; they are extremely large; the sepals and petals are very full and round, so as to almost entirely enclose the rich broad lip. Strong and perfect specimens $25.00 upward

hC. gigas Sanderiana

hC. guattata

hC. guattata Leopoldii

hC. Harrisoniana

hC. Harrisoniana violacea

hC. imperialis (gigas)

iC. intermedia

iC. intermedia superba

iC. labiata autumnalis

iC. labiata Warnerii

iC. lobata

iC. Lodrigesii

iC. luteola. An abundant bloomer. 1.00 to 2.50

iC. maxima

iC. Mendelli

iC. Mendelli grandiflora

iC. Mendelli superbiussima

Coeogyne.

There are numerous species of Coeogyne, many of them very beautiful, the color of the flowers being generally pure white, with rich yellow throats, and often richly margined. The blossoms are generally produced with the young growth, and are excellent for cut flower purposes, measuring often as much as three inches across. They should be grown in pots of peat and moss, with a liberal supply of water when growing.

Co. cristata. (Clawworth variety). They are freely produced in winter; and in a long time when cut and placed in water. We offer some very large and extra-fine specimens of this charming Orchid at $5.00 upward; smaller plants. $1.00 to $2.00

Co. Dayiana. . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . ....

Cymbidium.

These are all evergreen plants of a noble and decorative aspect, with closely set tufts of long and somewhat narrow leaves; most of them are large and vigorous plants, with short pseudo-bulbs, from which the leaves and flowers proceed. The flowers are large, beautiful and very attractive, the racemes being often three feet long, and remaining perfect for many weeks. Cymbidiums require plenty of pot room for their many roots; we grow them most successfully in rough peat and moss, with good drainage.

Dendrobiums.

The Dendrobiums are a diverse group of orchids, including some of the most popular and well-known species. They are known for their showy flowers, which come in a wide range of colors and shapes. Many Dendrobiums are epiphytic, growing on trees and other vegetation, and some are terrestrial, growing in the ground. They are generally easy to care for, with most species doing well in warm, humid conditions. Here is a selection of Dendrobiums available for purchase:

- **Dendrobium Bensoniense**
  - $8.00 to $5.00
- **Dendrobium bigibbum**
  - $2.50 to $4.00
- **Dendrobium bignibbum**
  - $2.50 to $4.00
- **Dendrobium bigibbum superbum**
  - $5.00 to $7.50
- **Dendrobium Brynerianum**
  - True. Large, golden yellow flowers, beautifully fringed, and having beard-like appendages.
  - $8.50 to $7.50
- **Dendrobium Cambridgianum**
  - $1.50 to $3.00
- **Dendrobium chrysanthum**
  - $1.25 to $2.50
- **Dendrobium chrysothamnus**
  - $2.00 to $3.50
- **Dendrobium clusia**
  - $1.50 to $3.00
- **Dendrobium crepidatum**
  - $2.00 to $3.50
- **Dendrobium crysanthum**
  - $2.00 to $3.50
- **Dendrobium Dalhianum**
  - $2.50 to $4.00
- **Dendrobium Dearei**
  - $1.50 to $3.00
- **Dendrobium Dearei grandiflorum**
  - $5.00 upward
- **Dendrobium densiflorum**
  - $7.25 to $2.50
- **Dendrobium densiflorum Walkerianum**
  - $10.00 to $20.00
- **Dendrobium Devonianum**
  - $1.50 to $2.50
- **Dendrobium Dominicam**
  - $6.00 to $10.00
- **Dendrobium Farmeri**
  - $2.50 to $4.00
- **Dendrobium fimbratunum**
  - $2.00 to $5.00
- **Dendrobium Findleyanum**
  - $2.50 to $5.00
- **Dendrobium formosum**
  - $1.50 to $2.50
- **Dendrobium formosum giganteum**
  - A fine evergreen species, and no doubt the largest flowering of the genus. Its flowers, which are pure white with an orange yellow center, often attain the extraordinary size of a Calla-ya. It delights in plenty of heat and moisture. Some fine, strong specimens are offered at $5.00 and upward. Smaller plants... $2.00 to $3.50
- **Dendrobium Jamesianum**
  - The only species of the genus for the coolhouse. A lovely white flowering orchid...
  - $2.50 to $3.50
- **Dendrobium Lowii**
  - $5.00 to $7.50
- **Dendrobium macrophyllum**
  - $3.00 to $5.00
- **Dendrobium nobile**
  - $1.00 to $3.50
- **Dendrobium noble Cooksonianum**
  - $5.00
- **Dendrobium noble intermedium**
  - $5.00
- **Dendrobium noble niliblum**
  - $5.00 to $10.00
- **Dendrobium noble superbum**
  - This is a grand, very distinct and most superior variety of *D. noble*. Finest large specimens... $5.00
- **Dendrobium Parishii**
  - $1.00 to $2.50
- **Dendrobium Phalenopsis**
  - Best of all for cut flowers
  - $2.00 to $5.00
DENDROBIUM THYSIFLORUM

\textbf{Dendrobium Pierardii} ............ $1.00 to $2.00
\textbf{D. primulinum} .................. 2.00 to 2.50
\textbf{D. primulinum giganteum} ....... 3.50 to 5.00
\textbf{D. superbiens} ................... 7.50 to 70.00
\textbf{D. thyrsiflorum} .................. 1.00 to 2.50
\textbf{D. tortilis} ....................... 2.50 to 3.50
\textbf{D. Wardianum} ................... 2.00 to 3.50
\textbf{D. Wardianum candidum} ........ 10.00 to 15.00
\textbf{D. Wardianum giganteum} ...... 10.00 to 25.00
\textbf{D. Wardianum Lowi} ........... 5.00 to 7.50

\textbf{EPIDENDRUM.}

We offer only the choicest species in this extensive genus. They are all of very luxuriant and rapid growth, easily cultivated, and can be grown upon blocks of wood, in pots or in baskets, with fibrous peat and sphagnum moss, in equal parts, for potting material. They delight in plenty of moisture nearly all the time.

\textbf{E. atropurpureum} .............. $2.00 to $3.00
\textbf{E. atropurpureum roseum} ...... 5.00 to 7.50
\textbf{E. aurantiacum} .................. 2.00 to 3.00
\textbf{E. bicornutum} ................. This beautiful and chaste white Orchid produces its delightfully sweet scented flowers about Christmas... $1.50 to 2.50
\textbf{E. ciliare} ....................... 1.00 to 2.00
\textbf{E. grassifolium} ................. 1.50 to 2.50
\textbf{E. fragrans} ....................... 2.00 to 3.00
\textbf{E. microchilum atropurpureum} .. 2.00 to 3.00
\textbf{E. microchilum roseum} ......... 5.00 to 7.50
\textbf{E. maculatum} ................... 2.50 to 4.00
\textbf{E. nemorale} ..................... 1.50 to 2.50
\textbf{E. nemorale majus} ............. 2.00 to 4.00
\textbf{E. prasinocarpum} .............. 2.00 to 4.00
\textbf{E. radicans} ...................... 2.50 to 4.00
\textbf{E. Stamfordianum} .............. 2.50 to 4.00
\textbf{E. tibicinis} ................. c E. vitellinum .................. 1.00 to 1.50
\textbf{E. vitellinum majus} ........... 1.50 to 2.50

The last two are the only Epidendrums we can recommend for the coolhouse. They require to be grown in baskets or on rafts, with peat and moss, and need a liberal supply of water all the year.

\textbf{GONGORA.}

This genus is much like the Acroperas in habit but larger; they require the same treatment.

\textbf{G. atropurpurea} ............... $1.00 to $1.50
\textbf{G. fuscata} ...................... 75 to 1.50

MAXILLARIA.
A very interesting and free growing genus. The flowers are pretty and sweet scented, and the plants are all evergreen and compact in growth. They succeed best grown in pots of peat and moss, and require a liberal supply of water while growing.

ODONTOGLOSSUM.
To this comprehensive genus of Orchids so many magnificent additions have been made during the last few years that it now contains some of the choicest and most useful Orchids in cultivation. Most of them can be grown in pots or baskets in rough fibrous peat and moss, with good drainage and plenty of water.

ODONTOGLOSSUM Roelii album... $5.00 to $10.00

ONCIDIUM.
One of the older and therefore larger classes of Orchids. The species are all evergreen. Some varieties succeed well on blocks, but they are generally best grown in pots or baskets.

### PHALAEOPSIS

In popular estimation this is the grandest genus among all the Orchids, and its magnificent flowers do indeed outshine all others. The plants are of singular habit and birdlike appearance when looking at them suspended upon rafts, branches or baskets, with their beautiful leaves, some of which are richly painted green, while others are whitish, mottled and marbled, on a brown green ground; all the leaves are of a very flimsy texture. In cultivating a number of different species some may be had in bloom the year round. The flowers are produced upon long, branching scapes which proceed from the axis of the leaves near the base, there being no pseudo-bulbs to this Orchid. The flowers come in great variety, more than 30 having been counted on a single plant; the color of these beautiful and delicate flowers and their construction is most wonderful. The plants need constant high temperature, and during their growing season from March to October, require plenty of moisture. Fibrous peat, charcoal, potsherds and live sphagnum moss are what they delight to grow in.

#### amabilis
- Price: $2.50, $3.50 and $5.00

### P. amabilis Dayana
- This is a beautiful and very distinctly marked variety of P. amabilis, from which it differs in its flowers being larger and the two lower sepals thickly dotted with carmine; the side lobes of the lip at the lower edge are of deep yellow, heavily marked with carmine crimson across the base of the hastate lobe, and a distinct stripe of color down its center. $15.00 to 20.00

#### amethystina
- Price: 10.00 to 15.00

#### Esmeralda
- Price: 3.50 to 5.00

#### grandiflora
- A truly noble Orchid, second to none of which we know. It resembles P. amabilis, but has larger leaves and flowers, besides there being more yellow and less rose color in this than in P. amabilis. Its flower stems are tinted with purple, and it blooms at different periods of the year. A grand exhibition Orchid, as it lasts a long time in perfection. Several fine, strong specimens $12.00 to 20.00

#### aurea
- (Borneo variety) 7.50 to 10.00

#### Ludemanniana
- Price: 4.00 to 7.00

#### Sanderiana
- Price: 4.00 to 6.00

#### Schilleriana
- The finest and most beautiful species in cultivation. It has handsome mottled green and yellow foliage, and its long, branching, graceful flower scapes or peduncles, covered with upwards of 100 charming blossoms of the most delicate mauve and rose pink, spotted with reddish brown, give it a queenly and fairy like appearance. This, being a member of the East India section, requires a hot and moist atmosphere. Grand specimens, with large leaves and plenty of roots. $10.00 upward

### P. Stuartiana
- Price: 4.00 to 6.00

### P. violacea
- Price: 5.00 to 7.50

In color they are a beautiful combination of bright cinnamon, yellow, white and soft rose violet. It is a free and easy grower, and needs intermediate temperature. Finely established strong plants 1.50 to 3.00

**PAPHinia**

Of this rare and pretty genus we have but few species. They are easily grown in fibrous peat and moss with a liberal supply of water when making their growth.
**Orchids**

SACCOLOBIUM.
These require the same treatment as the Vandas and Aéridae, and need all the light it is possible to give them.

- hS. ampulaceum ........................ $2.50 to $3.50
- hS. Blumei (Java variety) ............. 3.50 to 5.00
- hS. Blumei var. Dayl. .................. 2.50 to 3.50
- hS. Blumei majus. Fine, handsome
  specimens ................................ 5.00 upward
- hS. giganteum ........................... 2.50 to 3.50
- hS. guttatum ............................ 2.50 to 3.50
- hS. Harrisonianum. Very fragrant. 5.00 to 7.50
- hS. Illustre ............................. 3.50 to 5.00
- hS. violaceum ........................... 2.50 to 5.00

SCOMBURGKIA.
This genus resembles the Cattleyas and Laelias in growth, except that they are less compact. A liberal supply of water is necessary to make them thrive during the growing season; after they have finished their growth, no more water should be allowed until they show flowers.

- hS. tibicinis. The handsomest and best known of the genus. Flowers a beautiful combination of rosy crimson, reddish brown, purple and white........ $3.50 to $5.00
- hS. undulata ............................ 5.00 upward

SCUTICARIA.
These can be grown either on blocks or in baskets, with a liberal supply of water while growing.

- S. Hadwenii .............................. $3.50 to $5.00

SOFARIAL.

- iS. macrantha. Large pots, well drained and filled with rough, fibrous peat suit the plant best...................... $3.50 to 5.00
- iS. macrantha alba. Prices on application

SOFRONITES.
These pretty little evergreen plants thrive best on blocks of wood, or in small baskets, with a moderate supply of moisture all the year 'round.

- iS. Sophronites coccinea ............... $3.50 to $5.00
- iS. grandiflora ........................ 1.50 to 3.50
- iS. violacea ............................ 2.50 to 4.00

STANHOPEA.
Of easy culture, and best grown in baskets with moss; they require a liberal supply of water and plenty of shade.

- hS. grandiflora ........................ $1.50 to $2.50
- hS. insignis .............................. 2.50 to 3.50
- hS. ochulata ............................. 2.50 to 5.00
- hS. tigrina .............................. 2.50 to 4.00
- hS. Wardi aurea .......................... 5.00

THUNIA.
Deciduous Asiatic Orchids, which need a decided period of rest. They should be grown in pots filled with equal parts of peat and moss, and have plenty of water while growing.

- T. alba .................................. $1.00 to $3.00
- T. Bensoniae ................................ 1.00 to 2.00
- T. Marshalliana .......................... 1.00 to 3.00

TRICHOCENTRUM.
Very free growing and free blooming; they present a pretty appearance when growing on blocks, upon which they do best; care must be taken not to allow too much water about their roots.

- T. albo-purpureum ....................... $1.00 to $2.50
- T. tigrinum ............................. 3.50 to 5.00

TRICHOPILIA.
They are grown in pots, with peat, and not too much water.

- T. candida ................................ $2.50
- T. crispa .................................. $3.50 to 5.00
- T. suavis ................................ 1.50 to 3.50
- T. tortils ................................ 1.50 to 2.50

VANDA.
A genus of epiphytal East Indian Orchids. The flowers are of peculiar butterfly form, and of great beauty; very showy and highly and deliciously scented. All but a few species require regular East India house temperature, and do well in pots or baskets filled with

---

A COLLECTION OF CHOICE VARIETIES OF PHALAENOPSIS

potsherds, charcoal and sphagnum moss. During their growing season they should have abundance of water, while in the Winter very little will suffice.

**hVanda Amesiana** ................................ $10 00 to $20 00

**hV. Batemanni** ................................. 3 50 to 5 00

**hV. Bensonii** ................................. 2 50 to 4 00

**hV. Cathecartii** .............................. 10 00 upward

**hV. coerulea**. This remarkably handsome plant produces erect scapes from between its leaves, and upon these in dense racemes are borne from ten to fifteen flowers, which are about four inches across. The sepals and petals are of a beautiful pale blue, while the small lip is of a deep, rich blue and of a leathery texture, the spur being short and blunt; it flowers during the Autumn and lasts six weeks in perfection. We offer some very fine, strong specimens at...

**hV. Denisoniana** ............................... 5 00 upward

**hV. insignis** (true) ......................... 3 50 to 5 00

**hV. Kimballiana** ............................. 5 00 to 10 00

**hV. Lowii** ................................... 10 00 upward

**hV. Sanderiana** ................................ 10 00 upward

**hV. suavis** ................................... 5 00 to 10 00

**hVanda teres**. A very handsome and distinct species of curious aspect and scrambling or climbing habit, the growth extending several feet in length. The stems as well as the leaves are terete or cylindrical and dark green. The beautiful, large flowers are produced in ascending, mostly two flowered, racemes; in coloring they are much like those of _Phalaenopsis Schilleriana_, but of a heavier texture and very lasting. We offer several fine specimens at ........................................... 2 50 upward

**hV. tricolor** ................................... 5 00 to 7 50

**hV. tricolor superba** ......................... 10 00 to 20 00

**ZYGOPETALUM.**

Most of the species are rather large growing, of easy culture; they are grown in pots with peat and moss, and should be given plenty of water while growing.

**iZ. crinitum** .................................. $1 75 to $4 00

**iZ. Gautieri** .................................. 3 00 to 5 00

**iZ. intermedium** ................................ 3 50 to 6 00

**iZ. Mackayi** .................................. 1 50 to 3 50

**iZ. rostratum** .................................. 2 50 to 4 00

**COLLECTIONS OF ORCHIDS**

In forming collections of Orchids, whether large or small, it is of the utmost importance to begin aright if, besides being beautiful, we wish them to be practical and useful. Thus, in order to have Orchids in bloom throughout the year, a careful selection of such varieties as will give a succession of bloom is necessary. Such assortments may also include a wide range of form and coloring in the flowers. All who are not familiar with the many species, varieties and habits of these plants will find it perfectly safe to intrust the selection to us, as we often make up such collections for customers, always to their entire satisfaction. We need only to know for what purpose the Orchids are desired, and to have some idea of how much money the customer wishes to invest in the collection.

Botanical collections of Orchids are formed in quite a different way; by selecting from different genera, species and varieties; this we undertake also, performing the work in a scientific and satisfactory manner; the purchaser, however, must give us an idea of the number of specimens wanted and the number of dollars to be invested. The preceding extensive list includes all the best and most useful varieties.

Some of the very rare and costly varieties of Orchids which we have in stock are not mentioned in this Catalogue, as there are very few specimens of each of them—in some cases only one. But to all who desire very rare Orchids, and will address us, mentioning this fact, we will give particulars of such plants, sending samples of their flowers when this is requested.

As might be supposed, among our vast collection of Orchids there are new and rare varieties of great beauty and value constantly coming into bloom, some of them for the first time. We keep the more enthusiastic of our patrons well-informed concerning the flowering of these plants, and would suggest to all who are forming collections of Orchids that they send us their names and addresses so that we may advise them of the blossoming of any new or rare plants.

**ORCHID MISCELLANY**

The culture of Orchids presents no special difficulty; there are no "secrets" which must be found out in order to succeed, but all who wish more explicit directions concerning their culture than can be given here will be furnished same on application.

**Orchid Peat.—** We would also call especial attention to the unusually fine quality of our fibrous peat, acknowledged to be the best fibrous peat in this country. We supply it in large and small quantities; also live and dry Sphagnum, Orchid-eribs and Pots, in fact, all requisites for the Orchid house, a detailed list of which will be found in the regular list of Supplies in the last pages of this Catalogue.
Tropical Greenhouse Plants

This important Department includes all the best genera, species and varieties of flowering and foliage plants which are grown under glass, either in a stove or warm-house temperature, or in a greenhouse or cool-house temperature. The majority of tender flowering bulbs form a sub-department; the bulbous and tuberous forms, grown for their beautiful leaves, are classed here with other foliage plants.

Plants requiring a stove or warm-house temperature are marked with S. Those that grow best in a cool or greenhouse temperature are marked with g.

**Abutilon.** A class of showy flowering plants, with bell shaped flowers, produced in profusion. They are of good habit and very decorative in any situation.

- **gA. Boule de Neige.** White flowers .......... $0.25
- **gA. Prince of Orange.** .......... 25
- **gA. Thompsonii.** Richly variegated .......... 25

**Acaicia.** A large genus of flowering plants and trees, with exquisitely beautiful and delicate flowers, mostly of yellow tints and fine fernlike foliage. We offer only the best kinds useful for cut flowers and as decorative plants.

- **gA. cordata.** .......... $0.50
- **gA. cultriformis.** .......... 50
- **gA. dealbata floribunda.** .......... 50
- **gA. Drummondii.** Lovely pale lemon yellow flowers; plants of dwarf habit .......... 1.00
- **gA. ornata.** .......... 50
- **gA. paradoxa.** .......... 50
- **gA. pubescens.** Very fine and showy, with yellow flowers .......... $1.00 to 2.50

**Echmea.** Very handsome stove plants, with gracefully disposed straplike leaves, and flowers of rich and brilliant colors in panicles on erect scapes.

- **sE. celestit.** .......... $1.00
- **sE. cerulemites.** .......... 1.00
- **sE. fulgens.** .......... 1.00
- **sE. Luddemanniana.** .......... 1.00
- **sE. miniata.** .......... 1.00
- **sE. Regina-Amazon.** .......... 1.00
- **sE. spectabilis.** .......... 1.00
- **sE. Veitchii (Chellalleria).** .......... 1.00

**Aglanema.** Fine Aroids, with beautiful foliage. Only the best species are given below.

- **gA. costata.** .......... $2.00
- **gA. plecta.** Of dwarf habit, with fine, dark-colored and white leaves .......... 1.50

**Alocasia.** These beautiful stove decorative plants are of comparatively easy growth, and all have conspicuous and handsome foliage, beautifully marked and blotched.

- **sA. Chantrieri.** .......... $5.00
- **sA. Chelsems.** .......... $2.50 to 5.00
- **sA. intermedia.** .......... 2.00 to 3.00
- **sA. Jenningsii.** .......... 1.00 to 2.00
- **sA. Johnstonei.** .......... 2.50
- **sA. Lowi.** .......... 1.00 to 2.00
- **sA. maccorhiza fol. var.** .......... 5.00 to 1.50
- **sA. metallica.** .......... 1.00 to 1.50
- **sA. princeps.** A species from the Malay Archipelago .......... 5.00
- **sA. Regina.** .......... 5.00

**Alocasia Thibautiana.** A very imposing plant, with immense leaves of elegant form and rich coloring .......... $2.50 to $4.00

**A. Veitchii.** .......... 1.50 to 2.00

**A. violacea.** .......... 50

**A. zebrina.** .......... 1.00 to 2.00

**Alpinia vittata.** An ornamental perennial, with ginger-like roots, pink flowers, and smooth, lanceolate leaves, beautifully striped with white. $1.00 to $2.00

**Amorphophallus.** A very curious and remarkable genus, with odd foliage and very large flowers formed like a Calla Lily, but the spadix greatly enlarged and prolonged; the flowers appear before the leaves.

- **sA. campanulatus.** .......... $0.75 to $1.50
- **sA. Rivieri.** .......... 50 to 1.00

**Ananassa.** The genus to which belongs the Pineapple; all are handsome, strong plants of a very interesting character.

- **sA. Porteana fol. var.** Leaves deep olive green, with a broad band of pale yellow .......... $1.50 to $3.00
- **sA. sativa fol. var.** A variegated form of the ordinary Pineapple, and a very handsome plant; leaves beautifully striped with white, green and creamy yellow, and tinged with red .......... $2.50 to 5.00

The Most Complete Collection of Plants in America.
ANTHURIUM MAXIMUM

A very fine and peculiar profuse flowering species; spathe rich, bright scarlet, mottled with white. $2.00 to $5.00

S. maximum Wardii. Leaves and flowers especially broad; as brilliant and rich in color as the foregoing, while of entirely distinct shape. A splendid and noteworthy variety. We have a large and elegant stock of this fine Anthurium. $5.00 to 10.00

S. Siebriechtianum. Spathe narrow and green; spadix stout, greenish white; leaves long, cordate, bright green; ribs prominent and of a paler hue. A handsome plant. $3.00 to 7.50

S. Veitchii. One of the grandest of the genus, with extraordinarily long leaves; very imposing and decorative. $5.00

ANTHURIUM. A very large genus of valuable plants, many of which are remarkably beautiful in both foliage and flower. No stovehouse collection is complete without Anthuriums.

S. Andreaeum. The true species. A most striking and beautiful plant, with extra large brilliant scarlet flowers of a leathery texture and of long duration. Large plants are always in bloom. A plant exceedingly useful to florists. $2.00 to $5.00

S. Andreaeum. Hohe stämme. 5.00 to 7.50

S. Andreaeum crystallinum. One of the handsomest of this excellent class of decorative plants, with large leaves of deep velvety green, marked with broad, silvery veins and ribs. $1.00 to 2.50

S. Ferrierense. This is much like S. Andreaeum, both in habit and character, only that the flower is of a rich, deep rosy pink; a very free grower and free bloomer. $2.50 to 4.00

S. magnificum (grande). $1.50 to 3.00

S. regale. 1.00 to 2.00

S. Scherzerianum. A beautiful plant, excelled for conservatory decoration, mingled with palms, etc., the beautiful bright crimson spathe and striking orange spadix last in perfection for months. $8.50 to 1.00

S. Scherzerianum album magnificum (Devausay's var.). A magnificent white form of the well known type, having spathe as large as its type, but white; very rare. 10.00 up

S. Scherzerianum Bennettii. Distinct in appearance, with lanceolate foliage, having sharper points than any of the other Anthuriums; the same characteristic is noticed in the flower, which has a long, sharp spathe and an enormous fiery red spadix. $5.00 to 10.00

S. Scherzerianum. Very large spathes. 1.00 to 2.00
AZALEAS. See special department, following Ferns. $1.00 upward

BEGONIAS. To this very large genus, itself the basis of a natural order, belong many of our most useful and valuable hothouse plants. No other genus of such ready growth includes at once so many species of beauty, both in flower and foliage. Those offered below are all distinct and noteworthy.

g Billbergia vittata ........................................... $1.00
g B. zebrina ............................................................ 1.00
g BORONIA heterophylla ........................................... 1.00
BOUVARDIA. The handsome single and double flowers of the Bouvardias are produced freely in round, graceful corymbs and in all rich and delicate tints and colors. They are among our best Winter blooming plants, and are greatly prized for cutting. Good strong plants of the varieties named below, 25¢ to 50 cents each.
g B. Alfred Neuner. Double white; of elegant habit.
g B. Bridal Wreath. Delicate pink.
g B. candidissima. White.
g B. Hogarthii fl. pl. Double; scarlet.
g B. President Garfield. Double; reddish pink.
g BRUGMANSIA arborea. (Datura.) $1.00 to $2.00
B. cornucopia. (Datura.) Strong plants... 50
B. suaveolens. Very sweet scented and fine. $0.50 to 1.00
g BURCHELLIA capensis. An elegant plant, with rich dark evergreen foliage, lighten by a profusion of bright scarlet flowers. $1.

CAMELLIA CHANDLERII

CAMELLIAS. (Camellia Japonica and hybrida.) Splendid evergreen shrubs or trees, with glossy foliage and flowers of great beauty and regularity of outline; varying from pure white to rich crimson scarlet. We cultivate and keep in stock all the leading sorts, principally those with imbricated flowers, of the most distinct colors, and furnish good, strong plants, with flower buds, at $1 to $2 each. Prices for larger quantities and for larger specimens, on application.
g C. reticulata. This, one of the best of a good old family, is not a new plant, but has been lately introduced. It blooms freely, and the large, semi-double flowers are clear, bright red and very showy... $2.50 to $5.00
C. Chandlerii. One of the best varieties... 2.50 to 5.00

CITRUS. To this family belong the orange, lemon, lime, etc. We offer varieties which form very handsome dwarf ornamental trees and fruit easily in a greenhouse temperature. Their rich green leaves, fragrant flowers and attractive fruit commend them.
g C. aurantium amarum. Sour orange... $1.50 to $2.50
C. aurantium dacie Otatetoi. A dwarf Chinese orange, with pretty edible fruit. The tree flowers and fruits continually and is very ornamental... 2.50
C. nobilis. The peculiar and very distinct "Mandarin" orange... $2.00 to 4.00
C. Japonica. The "Kumquat"; bears small fruits, which are eaten skin and all: very ornamental and desirable... $0.50 to 1.00
C. BLETRA arborea. The "Lily of the Valley Tree." A splendid greenhouse tree. $1.

C. aureum. Leaves beautifully and symmetrical marked with rich yellow. One of the brightest, best and hardiest of Citruses... 5.00
C. Baron Adolphe Sellier. A rare Citrus, of strong and robust growth. The brilliant green leaves are large, with pale yellow nerves, which soon become ivory white, the contrast of color producing a striking effect... 2.00
C. Baronne James de Rothschild. Long and handsome leaves, of olive green and yellow, changing to brilliant crimson... $0.50 to 1.00
C. Beauty. Leaves lanceolate, profusely and strikingly variegated with golden yellow on a rich green ground; as they attain age the green ground color gradually becomes a deep bronze, while the yellow variegation develops into a rich, rosy crimson. $0.50 to 3.00
C. Challenger (Imperator). Long leaves: midribs at first creamy white suffused with red, deepening to bright carmine; one of the best. $0.50 to 1.00
C. C. Cronstadtii or Corkscrew Citrus. One of the finest varieties... $1.50 to 3.00
C. Dayspring. Orange yellow, edged with green and tinged with red... $0.50 to 1.00

S & S

CROTON OR CODIAEUM.

The leaves of this brilliant genus of greenhouse foliage plants are unrivaled in beauty and variety of form and coloring. The plants are useful for almost any kind of decorative work, and large collections may be made of entirely distinct varieties; with large, broad smooth-leaves, narrow and twisted ones, or curiously cut and lobed forms; all richly and differently colored.

C. Andraeanum. Of neat habit and free growth, with highly colored foliage... $0.50 to 1.00
C. angustifolium. Very narrow leaves, green and yellow... $0.50 to 5.00
C. aureum. Green, yellow and crimson... $0.50 to 5.00
C. aureum. Leaves beautifully symmetrical marked with rich yellow. One of the brightest, best and hardiest of Crotons... 5.00
C. Baron Adolphe Sellier. A rare Citrus, of strong and robust growth. The brilliant green leaves are large, with pale yellow nerves, which soon become ivory white, the contrast of color producing a striking effect... 2.00
C. Baronne James de Rothschild. Long and handsome leaves, of olive green and yellow, changing to brilliant crimson... $0.50 to 1.00
C. Beauty. Leaves lanceolate, profusely and strikingly variegated with golden yellow on a rich green ground; as they attain age the green ground color gradually becomes a deep bronze, while the yellow variegation develops into a rich, rosy crimson. $0.50 to 3.00
C. Challenger (Imperator). Long leaves: midribs at first creamy white suffused with red, deepening to bright carmine; one of the best. $0.50 to 1.00
C. C. Cronstadtii or Corkscrew Citrus. One of the finest varieties... $1.50 to 3.00
C. Dayspring. Orange yellow, edged with green and tinged with red... $0.50 to 1.00

S & S
Croton Delight. A very handsome variety, with oblong acute leaves. In the young state they are bright yellow, margined with green, the veins being cream color; as they attain maturity, the bright central variegation changes to clear ivory white, with here and there a few dots of the same color scattered through the margin of the leaf.

Disraeli. Leaves oddly shaped; golden ribs and veins.

C. elegantissimus. One of the most charming and elegant varieties offered. $1.50 to 3.00

C. Evansianum. Trilobed leaves, richly variegated and striped. $0.50 to 1.00

C. excelsior

C. fasciatum

C. gloriosum (Prince of Wales). Long and narrow drooping leaves; markings variable, but always beautiful. $1.00 to 1.50

C. illustris. A very handsome Croton, with leaves like those of Passiflora trifasciata; very brilliant and conspicuous.

C. interruptum. Peculiar twisted leaves, dark purplish green above; crimson midrib. $0.35 to 0.50

C. Lady Zetland. Of brilliant coloring and graceful habit.

C. maculatum Katonii. Bright green leaves with round yellow spots.

C. majesticism. Long, narrow leaves; of elegant drooping habit; green and yellow, changing to olive and crimson. $0.50 to 1.00

C. Mrs. H. F. Watson

A CHOICE COLLECTION OF CROTONS

Croton multicolor. Irregularly formed leaves, of varied hue. $0.50 to 1.00

C. musicaeum. New; wavy oblong leaves; crimson, green and cream. 1.50

C. nobile. Leaves on the order of C. interruptum, but very highly colored. $0.50 to 1.00

C. picturatum. Leaves on the order of C. interruptum, but very highly colored. $0.50 to 1.00

C. Queen Victoria. Golden yellow, mottled green; ribs magenta. $0.50 to 1.00

C. recurvifolium. A most beautiful sort, with broad recurved leaves of striking variegation. 1.00

C. rosea picta

C. ruberrimum. Narrow drooping leaves of crimson, marked with creamy white. 2.00

C. rubrum striatum

C. spirale. Richly colored and quaintly curled spiral leaves. $0.50 to 1.00

C. Sunbeam. An attractive variety, with dark bronzy leaves from nine to ten inches long and about two inches wide. $1.50 to 3.00

C. tricolor

C. triumph ans. Oblong leaves; deep green and crimson, changing to greenish bronze and rose crimson. $1.00 to 1.50

C. undulatum. Broad and long undulated or crimped leaves, with scarlet, crimson and purplish veins. $0.75 to 1.00

C. Veitchii. Rather narrow leaves, marked with broad bands of creamy yellow, changing to rose and carmine purple. 1.00

The Most Complete Collection of Plants in America.
**Croton Victory.** Young leaves are of deep orange yellow, blotched with crimson; they change with age to deep olive green, with crimson veins and costa, and a blotching of red. $3 00

**C. volutum.** Leaves rolled or volutol; rich golden veins. $0 50 to 1.00

**C. Williamsii.** Undulated edges; leaves of magenta, crimson and yellow. 1.00

**CURCULIGO.** Very ornamental foliage plants of an elegant palmlike habit.

**C. recurvata.** Elegant dark green leaves. $0 50

**C. variegata.** Handsome leaves, beautifully banded with clear white stripes; a grand plant. 75

**CURTHERIA (Homalomena).** From this class of shrubby tropical foliage plants we have chosen the two handsomest species.

**C. picturata.** Beautiful Maranta like leaves, marked with silvery white. $1.50 to $3.00

**C. Wallisii.** Large, white bordered leaves, with central blotches of bright golden yellow. $1.75 to 2.50

**CYANOPHYLLUM magnifica.** A noble and effective foliage plant, with grand leaves of velvety green and rich brownish purple. $1 to $2.

**DAPHNE.** Dwarf shrubs, with rich, glossy, dark green foliage and clusters of dainty pink and white four petalled and sweet scented flowers. An excellent florist’s plant for cut flowers.

**D. Indica alba (alba).** $0.50 upward

**D. Indica rubra.** $0.50 upward

**DARLINGTONIA California.** A very interesting pitcher plant of low growth, with small upright pitchers of green color, striped brown; they are entirely distinct from any other form of pitcher plant, and are admired in any collection. $1.50 to $2.50.

**DIEFFENBACHIA.** A large genus of very beautiful and ornamental foliage plants, presenting a wide range of markings and blotchings in the handsomely formed leaves. Not of difficult culture and essential in all decorative arrangements.

**D. Dieffenbachia Baraquiniana.** $1.00 to $2.00

**D. Bausei.** $1.00 to 2.00

**D. Cheloni.** $1.50 to 2.50

**D. insignis.** Leaves dark green, with irregular angular blotches of pale yellow green; six inches or more broad. $1.00 to 3.00

**D. Leopoldii.** $3 00 to 2.50

**D. magnifica.** $1.50 to 2.50

**D. majestica.** Leaves are narrowly lanceolate, with scattered bright yellowish blotches and a feathery silver bar along the central line. A foot or more in length, and five to six inches in width, and are very distinct and stocky in habit. $3.00 to 5.00

**D. nobilis.** $1.50 to 3.00

**D. Regina.** A very distinct and striking species, with oblong elliptical leaves of greenish white, mottled and blotched with alternate light and dark green tints. $3.50 to 5.00

**D. Rex.** A robust and vigorous growing form of extreme beauty. $3.50 to 5.00

**D. splendidus.** $1.00 to 2.00

**D. triumphans.** A very ornamental form, from Colombia, with fine variegated leaves. $3.50 to 5.00

**DIONAEA muscipula.** The well known “Venus’s Fly Trap.” 50 cents to $1.

**DRACENA.** (Including Cordyline and Steereia.) These plants are of great and varied beauty of foliage, and are easily grown and cared for, many of them thriving well in ordinary sitting rooms. As decorative plants they are unexcelled as to elegant habit of growth, attractive variation of color, and indifference to exposure. Unlike many other plants of similar habit they are distinct and decorative even when very young. We grow enormous quantities annually, enjoying special advantages in obtaining propagating material from our own tropical nurseries in Trinidad.

**D. albo-marginata.** Leaves margined with white. $2.50

**D. amabilis.** Long, rather broad leaves of bright glossy green, marked and suffused with pink and creamy white. 1.00

**D. Amboynensis (Aletris).** Bronzy green, with distinct edging of rosy carmine; leaves gracefully arched. 1.00

**D. American Florist.** 5.00

**D. Anerleyensis.** 1.00

**D. argenteo-striata.** $7.00 to 7.50

**D. Australis.** Oblong lanceolate leaves, with many parallel veins; an elegant species, and very decorative. $0.75 to 1.00

**D. Australis aurea stricta.** 10.00

**D. Baptista.** A distinct form, in which both stem and leaves are striped with yellow and pink; ground color green. $1.00 to 1.50

**D. Bausei.** 1.50

**D. bella.** Small leaves; purplish, marked red; a pretty sort. 1.00

**D. Braziliensis (Eschscholtziana).** A robust growing species, with broad green foliage. $0.50 to 1.00

**D. congesta discolor.** A fine variety, of much decorative value; very tough and hardy, and unsurpassed for decorations. $1.00 to 2.50

**D. Cooperi.** A beautiful form of D. terminals; its leaves are long and gracefully recurved. A splendid decorative plant. $0.50 to 1.00

**D. De Smetiana.** 5.00

**D. Draco.** The true “Dragon’s Tree,” and a superior decorative species. The glossy green leaves are especially fine when young. 1.00
Tropical Greenhouse Plants

$Dracaena Elizæthæ$ ........................................... $1.00
$D. ferrea$. Broad, dark crimson foliage........... $0.50
$D. fragrans (Aletris)$. A superb African species, with beautiful deep green leaves, lighter in the young growth................. $1.00
$D. fragrans Massangeana$. A species with broad, yellow striped leaves; a first class decorative plant of robust and stout habit. $2.00
$D. Fraseri$. Broad and rather erect leaves, blackish purple in color, with a glaucous bloom and a marginal stripe of deep, rosy lake ........................................... $1.00

The Most Complete Collection of Plants in America.
**Dracena umbraculifera.** A very conspicuous and stout dwarf species, with closely set recurved leaves, giving it the appearance of a table top or umbrella. $5.00

**D. Youngi.** Broad leaves; bright green when young, streaked deep red and tinged with rose, changing to bright bronze; of robust growth. 1.00

**ERANTHEMUM.** Small decorative plants with finely colored and variegated leaves and peculiar flowers.

**E. Eldorado.** Golden yellow leaves, mottled and veined with green. $0.50

**E. purpureum.** Leaves and stems dark, lurid purple; a beautiful variety. 50

**E. nigrescens.** 50

**E. nierium rubrum.** Leaves irregularly shaped, shaded with light and dark green, and blotched with yellow, which darkens to reddish purple. 1.00

**EUPHORBIA.** The species offered here are all showy flowering species, very bright and handsome; for slower-growing, more succulent forms, see Succulents.

**E. jacquiniiflora.** A beautiful winter-flowering plant, with bright orange scarlet blossoms, forming long wreaths. $0.50 to $1.00

**E. splendens.** 1.00

**E. pulcherrima.** See Poinsettia pulcherrima.

---

**Dracaena Lindeni—See description, page 29**

**Dracena metallica.** Erect, arching leaves, coppery purple when young, changing to dark purplish bronze. $1.00 to $1.50

**D. Mrs. Bause.** 1.00

**D. Mrs. Willis.** 1.00

**D. nigro-rubra.** Dark brown leaves with rosy crimson centers; young leaves bright rosy crimson. A bold and fine sort. $0.50 to 75

**D. Norwoodiensis.** Leaves banded yellow, green and crimson, the last named color being chiefly confined to the marginal portion; petioles bright carmine. Of dwarf and compact habit; fine and elegant in every way. One of our very best Dracenas. 2.50

**D. regina.** A handsome species. 1.00

**D. rubra (Charlswoodia).** See D. congesta. 50

**D. salomea.** 1.00

**D. Scottii.** This is one of the most conspicuous hybrid Dracenas; has exceedingly broad and very substantial foliage—deep green, crimson edged and lanceolate. One of the best and noblest plants for exhibition. $1.50 to 5.00

**D. stricta albo-lineata.** 5.00

**D. stricta grandis.** This is one of the strongest and most robust growing sorts of the highly colored species; its noble aspect and bold, erect habit give it a majestic appearance. 2.00

**D. terminalis.** This fine, old and extremely handsome species can be furnished in beautiful color at all seasons, in quantities at moderate prices; it is an indispensable decorative and vase plant. 80 to 25

**D. terminalis alba.** This rare Dracena is the exact counterpart of the old red Terminalis, its leaves being white instead of red; in all other respects it is like that good and very popular sort. $1.50 to 2.50

**D. Titworthiana.** 5.00

---

**FICUS ELASTICA—See description, page 31**
Tropical Greenhouse Plants

EUGENIA. A beautiful genus of shrubby evergreen plants, resembling the Myrtles in habit and form of flowers.

E. australis. Fine foliage and red berries... $0 50

E. Jambos. The "Rose Apple," a beautiful evergreen tree or shrub, with long and narrow, thick and shining foliage... 1 00

FARFUGIUM grande. An elegant decorative greenhouse plant, with large, round, glossy, leathery leaves, irregularly blotched with rich yellow. The flowers are yellow and borne on stout stalks. 50 cents to $1.

FERDINANDA eminens (Zaluzania). An excellent decorative plant, with large and fragrant leaves. $1.

FICUS. This, the fig family, contains, besides the fruiting forms, very many grand decorative species, all of easy and luxuriant growth. They are particularly valuable for house decorations, the thick, handsome leaves withstand dust and changes of temperature well.

F. elastica. This, the well-known "Rubber Tree," is certainly one of the best plants grown for any decorative purpose. $0 50 to $5 00

F. elastica aurea var. Undoubtedly one of the finest decorative foliage plants. In habit and growth it is like the ordinary F. elastica, but the leaves have a pleasing yellow variegation throughout. In every respect a most charming plant, and differing from all others... $2 50 to 5 00

F. macrophylla. The "Moreton Bay Fig" of Australia; has very large leaves... $1 50 to $3 00

F. Parcelli. Has large serrated leaves of light green, blotched with white and dark green; an elegant plant... $0 50 to 1 00

FITTONIA. Elegant dwarf growing perennials, with beautifully marked leaves.

F. argyrophylla... $0 25

F. gigantea... 25

F. Verschaffeltii... 25

FRANCISCEA (Brunfelsia). Elegant Winter blooming plants, with handsome, sweet-scented flowers.

F. calycina major. Flowers purple, disposed in large trusses, which are produced in succession throughout the whole year; one of the finest of the species grown... $1 50 to $2 50

F. Hopeana. The corolla has a whitish tube and a bluish violet or purple limb. A very distinct variety; Winter flowering. $1 50 to $2 50

GARDENIA. Handsome, glossy-leaved plants, much valued for their beautiful and richly fragrant flowers.

G. floribunda f. pl........................... $0 25 to $1 00

G. Fortunul f. pl. (Camelliaflora)... 25 to 1 00

GREVILLEA robusta. The Australian "Silk Oak," and a most beautiful plant, with large but delicate, fern-like foliage; forms a most attractive specimen for any decorative use, 50 cents to $1.

GUZMANNA. Very handsome herbaceous plants, on the order of Tillantisias; the flowers are very pretty, while the foliage is also quite ornamental.

G. Devsangiana............................... $1 00

G. fragrans (Canistrum eburneum)... 1 00

G. tricolor................................. 1 00

HABROTHAMNUS (Cestrum). Bright evergreen shrubs, covered in their blooming season with clusters of pretty, fragrant flowers.

H. fasciculatum............................. $0 50

H. Newelli. Bright crimson flowers... 50

HEDYCHIUM. The two species given below are quite showy and attractive, bearing fine terminal spikes of brilliant flowers.

H. coccineum. Flowers red... $0 50

H. flavum. Yellow flowers... 50

HELICONIA. Ornamental foliage plants, allied to the Musas, and greatly valued for decorating.

H. angustifolia............................ $1 00 upward

H. aureo-straeta. A grand plant, with beautiful yellow striped leaves... $1 00 to $2 50

HELIOTROPUM Peruvianum. All the best varieties of the popular and desirable Heliotrope. 25 cts.

A HOUSE OF HYDRANGEA OTAKSA IN FULL BLOOM—See description, page 32

The Most Complete Collection of Plants in America.
HIBISCUS. Of this very extensive genus we offer here only varieties of the species H. rosa-sinensis, which are all very showy and brilliant flowering plants, growing and blooming freely outdoors in Summer. They form magnificent specimens when liberally treated, and are especially valuable to give life and color to groups of tropical foliage plants.

gH. rosa-sinensis chrysanth. A shrubby form with large golden yellow flowers. $1.00

gH. rosa-sinensis carneae pleno. $50

gH. rosa-sinensis Cooperi. Beautiful variegated leaves, marked with white and pink, or green and yellow on an elegant plant. $50

gH. rosa-sinensis fulgens. A single flowering sort of great beauty. $50

HYDRANGEA. The Hydrangeas are indispensable for decorative purposes because of their large showy terminal heads of flowers, which range in color from pure white through many delicate tints into deep blue and crimson. The flower panicles often remain in full beauty for months, and the small flowers of which they are composed can be used to much advantage in all floral work.

gH. cyanoclada. $1.00

gH. hortensis. 25

gH. hortensis ceruleus. Bright blue flowers. 75

gH. hortensis Otaka. 25

gH. hortensis rosea. 50

gH. hortensis Thomas Hogg. 50

gH. Otaka. $0.25 to 50

IMPATIENS. Of the Balsams we present only the superior varieties for pot culture. They are quite handsome, and flower constantly. I. Sultana is now also much used in bedding.

I. Hawkerii. A fine new Impatien, with very large and showy brownish red flowers, freely produced. A beautiful plant. $0.50

I. Sultana. Pretty carmine magenta flowers which contrast beautifully with the shining green foliage. 25

IKORA. Very handsome and elegant flowering evergreen plants, especially adapted for the stovehouse. The flowers remain a long time in perfection and are on the order of Bouvardias; they are produced in enormous trusses of orange, crimson, scarlet and white.

I. alb. White flowers. $0.50 to $1.00

I. Bandhurca. Deep scarlet. 50 to 1.00

I. Chelsoni. Orange salmon, shaded pink. $0.50 to 1.00

I. coccinea grandiflora. Large flowers of bright red. $0.50 to 1.00

I. Colei. Pure white; a splendid species. $0.50 to 1.00

I. conspiciu. Buff yellow flowers. 50 to 1.00

I. Dixiana. Dark orange flowers. 50 to 1.00

I. ornata. Bright orange salmon. 50 to 1.00

I. prinses. 50 to 1.00

I. Prince of Orange. 75 to 2.00

I. Regine. 75 to 1.00

I. sanguinea. Crimson, shaded deep violet; handsomest. $0.50 to 1.00

I. Williamsi. Reddish salmon. 75 to 2.00

I. ASIANDRA macrantha. A beautiful plant, bearing large deep purple violet flowers in Winter; blooms best when of good size. 50 cents.

LUCULIA. Very ornamental greenhouse shrubs, with fragrant flowers and handsome leaves. The flowers are borne on terminal cyrtes.

L. gratissima. Very fragrant. $2.00

MARANTA. An extremely valuable genus of decorative perennial plants, remarkable for the richness and beauty of their variegated foliage. They are free in growth in the stovehouse, and largely used in decorative work.

Maranta Bachemmiana. $0.50 to $1.00

M. bicolor. 1.00

M. bicolorata. 1.00 to 2.00

M. Kerechoviana. 50 to 1.00

M. Lindeni. 1.00 to 1.50

M. Littizii. 1.00

M. Mackoyana. 1.00 to 1.50

M. Massangeana. 1.00 to 1.50

M. ornata picta. 1.00 to 2.00

M. Portegana. 50 to 1.00

M. princeps. 50 to 1.00

M. regalis. 1.00 to 2.00

M. rosea picta. 1.00 to 2.00

M. tubispatha. 2.00

M. Vanderheekii. 2.00

M. Veitchii. 1.00 to 2.50

M. Warseeleezii. 1.00 to 2.50

M. zebrina. 50 to 1.00

MEDINILLA. Beautiful evergreen shrubs, producing profusely elegant flowers in terminal pendulous racemes; require a moist and high temperature.

M. magnifica. Rosy pink flowers. $2.00 upward

METROSIDEROS (Callistemon). Evergreen trees, mostly with fine flowers; from the Pacific Islands.

M. dasya variegata. $0.50 to $1.00

M. robusta. 50 to 1.00

M. semperflores. 25 to 1.00

MUSA. The well-known Banana family, of magnificent tropical foliage.

M. Cavendishii. The real Banana.$1.00 to $2.00

M. Ensete. The majestic Abyssinian Banana, and the best species for greenhouse cultivation or outdoor decorations. 1.50

M. sanguinea.$1.50 to 3.00

M. vittata. A dwarf specimen, having rose and white variegations.$1.50 to 3.00

M. zebrina. 2.00

NEPENTHES. This curious and interesting class of plants thrives best in a warm, moist atmosphere, and all the forms are usually suspended from the roof in baskets. Complete shade and a compost of two parts peat with one of sphagnum moss, plenty of drainage, and an abundant supply of water, will grow them to perfection. They should always be thoroughly shaded. Our collection of these highly ornamental plants is unequalled in America, many new and beautiful varieties obtained by hybridization, which are not to be found elsewhere, being included. The large size of their leaves and pitchers, the brilliant coloring and variety of form, make them desirable for any collection of plants.

N. amplaria. Has light green pitchers of robust growth.$2.00 to $4.00

N. amplaria vittata. Striped pitcher. $2.50 to 5.00

N. amplaria major. Beautifully mottled.$3.00 to 6.00

N. Chelsonii. 3.50 to 5.00

N. Courtii. A beautiful hybrid. 5.00 to 7.50

N. Curtisi. A new and distinct species from Borneo. 10.00

N. Cruajiana. A very handsome hybrid, of strong and vigorous habit, producing, when well grown, some of the most perfect pitchers of the Maxima type, large and of good color. $3.50 to 5.00

N. Dicksoniana. 5.00 to 7.50

N. distillatoria. The true species. 2.50 to 5.00

N. Dominiana. A fine, robust growing hybrid. $2.00 to 4.00

N. excelsior. (Now.) A hybrid between N. Hookeri and N. Rafflesiana, and of exquisite beauty; large and marked foliage. $0.50 to 4.00

Rose Hill Nurseries, New Rochelle, N. Y.
Nepenthes Dicksoniana

Nepenthes Sedonii. Light green pitchers, blotched brownish crimson; a fine hybrid. $2 00 to $3 50

N. Stewartii. $3 00 to 3 50

N. Taplini. 4 00 to 6 00

N. Tildeniana. A fine hybrid, with gorgeous pitchers resembling N. Siebrecichii; a very strong grower. 4 00 to 6 00

N. Thorpeiana. 2 50 to 4 00

N. Veitchii. Very large pitchers of a light green color. $2 50 to 2 00

N. Wadleyana. A remarkable hybrid, with long, narrow necked mugs of a beautiful color. $3 00 to 5 00

NIDULARIUM. Included by some with Karatas. All are beautiful South American Bromeliads and valuable for decorative purposes.

N. Mackoyanum. $5 00

N. maculatum. 2 00

N. Meyendorfii. 2 00

N. princeps. 1 50

N. spectabilis. 3 00

N. striatum. 3 00

OPHIOPOGON Japonicus variegatus. A fine flowering and foliage plant; flowers violet purple. Foliage finely variegated. $1.

PANAX. Decorative plants of Aralia-like habit and moderately free growth; very ornamental and desirable for greenhouse or Summer outdoor decorative uses.

P. Forsteriana. (Aralia) $1 00 to $2 00

P. graminifolius. $0 50 to 1 00

P. Javanicus variegatus. 1 00 to 2 00

P. utilis. Leaves rich green, with small red spines at the edges. 50 to 2 50

P. Veitchii. Splendid long, narrow leaves of rich dark green, beautifully variegated with broad bands of pure white. Our immense stock of this plant enables us to supply symmetrical plants of any size...

PHILODENDRON. The species named below have superb foliage, much like that of the Alocasias.

P. Andreanum. Finely colored leaves. $3 00 to $5 00

P. speciosum. Large, light green, leathery leaves. $5 00 to 10 00

The Most Complete Collection of Plants in America.

PANDANUS VEITCHII

Nepenthes Dicksoniana

Nepenthes Eyermanii. A distinct hybrid, one of the most beautiful of the highly colored varieties; though not so large as the Maxima type it is one of the best of all. $3 50 to $5 00

N. Hookeriana. Very handsome. 2 50 to 4 00

N. Hybrid maculata. Long pitchers, reddish, purplish and dark green. $2 50 to 4 00

N. Johnsonii. This grand novelty is in the way of N. picturata, though of more robust growth. The pitchers, which are highly colored, are produced freely, nearly every leaf bearing a pitcher of good size. $3 50 to 5 00

N. lanata (Veitchii). Rare; a very slow grower, and slow to propagate.

N. Lonwoodii. $4 50 to 7 50

N. Mayi. 2 50 to 4 00

N. Mastersii. No. I. The true dwarf variety, beautifully colored with deep red, purple, and pink and cream. One of the most distinct and showy sorts. $6 00 to 10 00

N. Mastersii. No. II. A new hybrid between N. distillatoria and N. sanguinea; of exquisite beauty. 3 50 to 5 00

N. Morgania. 3 50 to 5 00

N. Northiana. Very large green pitcher, spotted with purple. 15 00

N. Pattersonii. $2 50 to 4 00

N. picturata. 3 50 to 5 00

N. Rafflesiana. The true East Indian species, remarkable for the long processes supporting the pitchers. This grand old species is still one of the best. It is one of the parents of all the really good hybrids we have to-day. $3 50 to 5 00

N. Rafflesiana insignis. 2 00 to 3 50

N. Savageana. Much like N. Craigiana, but differs from that variety in that the pitchers are not quite so long but broader, like those of N. Hookeriana. 3 50 to 5 00

N. Siebrechtiana. One of the grandest new hybrids yet introduced; a free and vigorous grower, producing its immense pitchers freely. It resembles N. Amesiana, more than any other variety, though its pitchers are of lighter color, and the dent on side of each one makes the variety quite distinct. $5 00 to 10 00

Tropical Greenhouse Plants
PHORMIUM. The Flax Lily or New Zealand Flax. Excellent greenhouse plants of distinct habit.

S. Cookianum (Colemanii) variegatum. Has elegantly varied foliage...$1 00 to $2 00

S. tenax. A well-known form; has yellow or red flowers and dark green foliage, with red margins...$1 00 to $2 00

S. tenax atropurpureum. Elegant purple leaves...2 50

S. tenax variegatum. Leaves striped yellow and white...$1 00 to $2 50

S. Veitchii. Has shorter leaves, handsomely striped...

PHRYNIUM. A beautiful plant for table decorations; of dwarf habit, with small, light green leaves variegated with cream white stripes. We have a large stock of this plant, and can supply it in all sizes...$1 to $2.

PHYLLANTHUS. A large genus, including many curiously and very ornamental species.

S. rosea picta. A beautiful variety, with delicate rosy flowers...$1 00

PHYLOSTEGIUM Lindeni. A most beautiful foliage plant of the natural order of Aroiden, with large Calla-like leaves of a beautiful velvety green, zebra striped and veined with white. We have a fine stock of this plant, and can supply shapely specimens in different sizes at from $1 to $2.

PITCAIRNIA corallina. This grand plant is beautiful, not only when in flower, but at all times, because of its foliage, which makes it a striking bit of furniture for the house or conservatory. It grows freely, requiring a stove or hothouse temperature and plenty of water.

POINSETTIA. The small flowers of these plants are surrounded by many brilliantly colored bracts, which give to them great beauty.

S. pulcherrima. Brilliant scarlet bracts at end of branches, sometimes a foot in width; most conspicuous and beautiful...$0 50

ROHDEA. Plants valued for their handsome leaves, somewhat like those of the Aspidistra.

S. Japonica var. $0 50 to $1 00

RUSELLA. The flowers of this genus are exceedingly bright and attractive, and borne quite freely. These plants are easily grown.

S. Devoniensis...$0 50

S. macrantha. Flowers magenta pink and borne in great clusters...1 00

SANSEVIERIA. Interesting plants from South Africa and the East Indies; the foliage is attractively variegated, and the flowers quite pretty.

S. Zeylanica. A tough and useful decorative plant...$0 50

SCHISMATOCLOTTIS. Aroids, much prized for their beautiful leaves.

S. Robelina. Fine leaves, beautifully marked with silvery lines...$1 00 to $2 50

S. Siamensis. A favorite decorative plant because of its neat, rather dwarf habit, and glossy, white flecked leaves...$3 00 to 5 00

SKIMMIA japonica var. A fine plant, with glossy variegated leaves, fragrant flowers and a profusion of red berries. 50 cents to $1.

SONERILA. Dwarf growing and beautiful greenhouse plants, with silvery dotted and veined foliage. The two last named, besides their ornamental foliage, have bright rose or purple flowers.

S. argenta...$0 50 to 1 00

S. marmorata...50 to 1 00

S. Margaritacea alba...50 to 1 00

S. picturata...50 to 1 00

S. picturata picta...50 to 1 00

SPHÄROGYNE (Tocacea). Superb decorative plants with wonderful foliage, and of extreme beauty in both texture and coloring.

S. imperialis...$3 00

S. latifolia...3 00

STRELCITZIA. Regal plants, with strange and wonderfully brilliant flowers.

S. Augusta...$2 50 to 5 00

S. reginae. (Bird of Paradise Flower)...$1 00 to 2 50

THEOPHRASTA. Imposing and decorative plants from South America.

S. imperialis...$3 00 to 5 00

TRADESCANTIA discolor. Fine plant, with purple leaves; an old favorite, not so often seen as it deserves to be...$1 50 to 2 50

G. Warscewiczii. A Dracaena-like plant, with fine foliage...$0 50 to $1 50

TILLANDSIA. This large and important genus includes very many handsome and peculiar forms, with richly colored flowers. Some have also beautifully varied leaves, and the genus, as a whole, is most important for stoveshower decoration.

S. bivittata...$2 00 to $3 50

S. bracteata...75

S. farinosa...50 to 1 00

S. glaucophylla...25 to 1 00

S. LaSalliana

S. Lindeii var...1 00

S. musacea. A remarkable species, with beautifully marbled leaves...5 00

S. mucosa...$2 00 to 3 50

S. splendens major...

S. VIRBURNUM tinus floribundus (Laurustinus). The Laurustinus, a handsome evergreen flowering shrub. 50 cents.

VRIESIA. This genus is now usually included with Tillandsia, which see, for characteristics.

S. brachystachys...$2 00 to 3 00

S. bracteata...2 00 to 3 50

S. helicenoides...2 00 to 3 50

S. hieroglyphica. Leaves marbled and banded with brownish violet...$3 50 to 5 00

S. psittacina...1 50

S. splendens. A singularly beautiful plant, with intense purple bracts, yellow flowers and superb leaves banded with rich dark brown...1 50
BULBS AND TUBERS FOR STOVE AND GREENHOUSE CULTURE

ANY OF our most showy and brilliant flowering plants have bulbous or tuberous roots which, with but a minimum of care, are very free of bloom. Our Amaryllis will be found worthy of especial attention; we make a specialty of this superb genus, and are headquarters for it. Some of the species are peculiarly adapted to house culture, thriving exceedingly well in an ordinary window, and presenting their brilliant flowers in Winter and early Spring. We have many rare species, and grow them to great perfection at our Tropical Nurseries in Trinidad. The beautiful new hybrids are fine for early forcing.

AGAPANTHUS umbellatus. A very fine blue flowering plant of easy cultivation. 50 cts. to $1.
A. umbellatus albidus. A white flowering variety, with beautiful blooms........... $1.00

AMARYLLIS. Including Hippeastrum. A superb genus of gorgeous flowering bulbous plants, of the greatest beauty and value for house culture. The lovely and showy flowers are of great range of color, and many of the hybrids are of such richness as to make it almost impossible to do them justice. Our tropical nurseries at Trinidad give us superior opportunities for the rapid and perfect growth of Amaryllis.
A. aulica. The "Lily of the Palace." A species with large and extremely handsome flowers of crimson, green and purple........... $1.00
A. aulica platyveta. A very fine species of the utmost elegance.............. 2.50
A. Belladonna. A very ornamental species, with gorgeous heads of flowers, ranging from white to a purplish hue... $1.00 to 3.00
A. Catherine Waterbury. A splendid hybrid 3.00
A. Dutch Hybrids ....................... 1.50
A. English Hybrids. In finest sorts 2.00
A. equestrum. A grand old species 1.50
A. equestrum major. A showy variety 1.00
A. (Sprekelia) formosissima ............... 25
A. Graveana. Richly colored........... 1.00
A. hybridana, Empress of India. Two new
A. hybridana, Thomas Speed. And rare
hybrid bulbs from the West Indies; fine
bulbs, certain to bloom immediately...... 1.00
A. Johnsonii. A well-known sort, with dull red
flowers, striped white; an abundant
bloomer, and especially fine for house cult.
...... 25
A. Mrs. Col. Cruger. A new hybrid........ 3.00
A. pardinum. A splendid species; flowers rich
cream, dotted with crimson.............. 1.50
A. pardinum Hybrids. In several fine sorts 2.00
A. reticulatum. Beautiful pink and white
flowers; leaves have white midribs...... 1.50
A. reticulatum Hybrids. In fine sorts 2.00
A. rubra striata ......................... 3.00
A. Trinidad Hybrids. Many fine varieties
grown by our nurseries in the West
Indies .......................... 1.00
A. vittata. The typical species; flowers clear
white, with double red stripes in each seg.
ment, 1.00
A. vittata Hybrids. The finest assortment 1.00
A. vittata Regina. Hybrids; fine bulbs 1.00

ARUM sanctum. The Black Calla. $1.

BEGONIAS, Tuberosa. These charming Begonias are the handsomest of all the Summer flowering plants. The flowers frequently measure from 4 to 6 inches in diameter, the colors ranging from the purest white and the most delicate tints of pink, yellow and orange to intense scarlet and rich crimson. The double flowering varieties are perfect rosettes in form. Their culture is of the simplest, requiring only an abundance of water and partial shade; will succeed equally as well when grown as pot plants for the conservatory or window-garden.

The Most Complete Collection of Plants in America.
Crinum capense (Amaryllis longifolia). A hardy species, requiring only light protection in Winter; flowers very beautiful... $0.50
C. nobile ........................................ 5.00
C. ornatum ........................................ 2.00
CYCLAMEN. A grand genus of greenhouse plants, producing quaintly elegant and lovely flowers well above the corolla, leathery, silver splashed leaves.
C. persicum. Extra large tubers. 25 cts each; per doz... $2.00
C. persicum giganteum, Rose Hill Stain. The very best forms and colorings yet produced are included in this strain of our own selection. 50 cts each; per doz... 5.00
EUCHARIS. The Amazonian Lily, also called “Star of Bethlehem,” Greenhouse bulbs, producing lovely white fragrant flowers several times, during the year. We offer bulbs which can be guaranteed to flower promptly. They are now very popular for growing for cut flowers.
E. Amazonica (grandiflora). The best known species... $0.50
E. candida. A lovely sort... 50
E. Sanderiana. Another new Eucharis... 75
FREESIA. Greenhouse bulbs, producing fine spikes of delicately beautiful and very fragrant flowers in Winter.
F. Leichtlini. Yellow or cream. Per doz... $1.00
F. refracta alba. Pure white flowers. This species is very largely grown and forced. Per doz... 1.00
NEW HYBRID GLOXINIAS.
The handsomest of our Summer blooming plants, the rich and varied coloring of the flowers being beautiful in the extreme, many of them strikingly speckled; flowers 3 inches long, 2 inches in diameter, upright and pendulous; colors various and exceedingly rich in appearance. 10 cents each, $1 per doz.
Gloxinias in separate colors, as follows: White, Red, Violet, Red, white edge, and Violet, white edge. 10 cents each, $1 per doz., $0.50 per 100.
GRIFFINIA. Brazilian bulbs, with showy blue and rose colored flowers of fine and graceful form.
G. Blumonavia. White flowers, streaked pale rose... $1.00
G. hyacinthina. Delicate blue and white flowers... 1.00
IMANTOPHYLLUM (Orchis). Magnificent Spring and Summer blooming plants, with large umbels of brilliant flowers that remain perfect a long time, and strap like, leathery leaves.
I. miniatum. Deep orange flowers; blooms early in Spring... $1.00
I. miniatum grandiflorum. New. Flowers larger and of deeper color than in the type... 1.00
I. nobilis. A grand variety... 1.50
I. nobilis New Hybrids... 2.00
OXALIS. Pretty basket plants, with clover like foliage and abundant flowers of white, pink and yellow. Best varieties, 25 cts. per doz.
O. floribunda... $0.25
O. floribunda var. alba... 50
O. intea. Flowers yellow... 25
PANCRACTIUM. Very fine bulbous plants, producing lovely lily like flowers of different colors.
P. ovatum. A fine species, with broad leaves; from Trinidad... $1.00
P. Caribbæum. True... 1.00
RICHARDIA (Calla). Well-known favorite plants of easy growth and tropical appearance.
R. Æthiopica. Pure white quenly flowers, produced in Winter and Spring... $0.25
R. albomaculata. White flecked foliage... 25
R. hastata. Yellow flowers... 25
UTRICULARIA montana. (Bladderwort.) Pretty and curious white and yellow flowers. $1.
VALLOTA purpurea. The Scarborough Lily. An Amaryllid, with beautiful red flowers, produced in Summer. 30 cts.
### VINES

VINES are indispensable in all decorative arrangements, and lend grace and beauty which cannot be supplied otherwise. Many have very handsome flowers, while others are attractive for their beautiful foliage. We include species that require different degrees of heat, and have distinguished them, for convenience, as follows: (g) indicates plants needing greenhouse temperature; (s) indicates plants for stove or hothouse.

### ASPARAGUS SRENGERI

**BOUGAINVILLEA.** Grand climbing shrubs from the South Sea Islands. The foliage is luxuriant while the inconspicuous flowers are surrounded by large and showy bracts of brilliant colors. | 50 |
| B. glabra | $0.50 to $1.00 |
| B. refulgens | $1.00 |
| B. Sanderiana | $1.50 |
| B. spectabilis | $1.00 |
| B. splendens | $1.00 |
| CAMPANULUM filicifolium | A very handsome and well-known climber, with rich orange flowers. $2.50 |

### CISSUS

CISSUS. Beautiful climbing foliage plants, with richly variegated leaves. | 50 |
| C. Amazonica | $0.50 |
| C. argentea | | 50 |
| C. discolor | The familiar handsome species. | 50 |
| CLERODENDRON | A valuable genus of ornamental plants some of which are of a clinging habit. | 50 |
| C. Balfouri | Flowers scarlet and white | $0.50 |
| C. Thomsone | A beautiful climber, with very handsome scarlet and white flowers | 50 |
| COBEA scandens variegata | A variegated form of the old, superb, well known climber, with large, bell shaped purple flowers. 50 cts. | 50 |
| DIPLADENIA | Most ornamental stove twining plants and showy rose and purple flowers. | |
| D. amabilis | $1.00 |
| D. atropurpurea | | 1.00 |
| D. splendens | | 1.00 |
| FIGUS stipulata (repensa) | A fine climber with small glossy leaves; attaches itself to walls, and is also good for baskets. 25 cts. | 50 |

The Largest Horticultural Establishment in America.
BOUGAINVILLA SANDERIANA—See page 37

FUCHSIA procumbens. A pretty creeper from New Zealand, with yellow and blue flowers, followed by very ornamental crimson berries. $1.50

GLORIOSA superba. Ornamental plant with peculiar and handsome red and orange flowers. $1

HEDERA Helix. The true Ivy and among the most useful, permanent and valuable climbers grown. In several fine varieties, each 25 cents.

HOYA. The “Wax Flowers” are ornamental flowering plants, mostly of climbing habit, with very handsome and peculiar wax-like flowers.

H. bella ............................................. $0.50

H. carnosa. The well known form ..................................... 50

H. carnosa fol. var. Has variegated leaves. 1.00

H. imperialis ........................................ 1.00

ISOLEPIS pygmae (Scirpus gracilis). A pretty basket or vase plant. 25 cents.

JASMINUM. Elegant climbers, with beautiful and sweet flowers.

J. gracilum ........................................ $0.50

J. grandiflorum .................................. 50

J. grandiflorum flore pleno ................................. 50

J. sambac fl. pl ........................................ 50

LANTANA delicatissima. For brackets, baskets, etc. 25 cents.

LAPAGERIA. Most beautiful greenhouse climbing shrubs, bearing lovely pendent, waxy flowers; very popular in England.

L. alba. A very beautiful form, with spotless white flowers; an admirable contrast to the typical species, and will form a splendid ornament in a warm greenhouse. $2.50, $5, $15.

L. rosae. Rich rosy crimson flowers. $1.50 to $5.

Lapageria rosea superba. Flowers rich rosy crimson, large, pendulous in the axis of the upper leaves, solitary or few, produced in great abundance, and remaining in full beauty several months. The Lapagerias are beautiful plants of a partly climbing habit and, though very popular in England, are not well known here. We have a large stock of this fine climber. $1.50, $5, $15.

L. rosea superba Nash Court var. $5.

LYGODIUM scandens. A beautiful climbing fern. $0.25

MANETTIA. Flowering climbers of beauty and value.

M. bicolor. The hothouse species; flowers bright scarlet and yellow. $0.25

PASSIFLORA. Superb climbing vines with entirely distinct, handsome and attractive flowers and mostly rich foliage. Should be in every collection.

P. coreoula. A lovely blue, flowered species, of fine habit; hardy if protected. $0.50

P. coreoula alba. (Constance Elliott). One of the best flowering vines; hardly with slight protection ........................................ 50

P. pfordtii ........................................ 2.50

P. princeps (racemosa). Deep red or scarlet flowers ........................................... 5.00

PASSIFLORA quadrangularis. A beautiful and robust growing species, with large leaves; white and purple fragrant flowers. 25

P. violacea. A beautiful and floriferous species, with fine, large violet blue flowers. 1.00

PHILODENDRON. A genus of climbing shrubs and small trees with large leaves, from Tropical America.

P. giganteum (pinatifida) ................................ 75 to 81.50

P. bipinnatifidum. A remarkable and unsurpassed decorative plant of a robust habit and fine dark green, dissected leaves; should not be neglected in any collection. It is also useful for outdoor decorations during Summer ........................................ $5.00 to 10.00

P. nobile ........................................ 2.50 to 5.00

P. pertusum (Monstera deliciosa). A superb tropical climber; the leaves are very large, finely perforated. $1.00 to 3.00

POTHOS. Tall climbing shrubs, with many branches.

P. argentatus ........................................ 50 to 1.00

P. argyreia. Much like a small Philodendron, with white or green leaves and pretty flowers ........................................ $0.50 to 1.00

RUSSELLIA scoparia (juncera). A fine basket plant, with drooping sprays of brilliant scarlet flowers. $1.

STEPHANOTIS floribunda. A grand old stove climber producing exquisite white flowers, most deliciously scented; universally admired. $1.

STIGMAPHYLLON ciliatum. The Golden Butterfly Vine of Brazil. A rapid climber, with pretty golden yellow flowers. $1.

TACSONIA. Splendid climbers, resembling Passion flowers in many particulars.

T. floribunda ........................................ 80.50

T. manicata. Scarlet flowers ..................................... 50

THUNBERGIA. A genus of valuable climbers, including many handsome species.

T. affinis .......................................... 50

T. chrysops .......................................... 50

T. fragrans. Beautiful white, fragrant flowers ................................. 50

T. grandiflora. Blue flowers; fine .................................. 50

TRADESCANTIA. Fine creeping plants; most excellent for baskets or vases and also for growing on the surface of large pots containing specimen palms, etc. Being subaquatic they will grow freely in a very moist place.

T. Warscewiczii ........................................ 80.50

T. zebrina multicolor. Varied foliage ..................................... 50

VANILLA aromatica. A climbing orchid from which are obtained the vanilla beans of commerce. $1.50 to $5.

VINCA major. For baskets and vases; a trailer. In sorts, each 50 cents.
SUCCULENT PLANTS

Including Agaves, Aloes, Echeverias, Euphorbias, Mesembryanthemums, Rocheas, Sansevieras, Sedums, Sempervivums and Cactuses.

SUCCULENT plants are useful in many situations, both indoors and in the garden or on the lawn. They are especially available for rockeries, and lend themselves to outdoor bedding in sunny places in a most distinct and effective way. Nearly all of the Agaves, and many of the Aloes, and others of the robust habit, make handsome ornamental plants on lawns, or for decorating entrances, balconies, etc., affording a most admirable contrast to the tropical foliage plants, while the extreme beauty and regularity of “carpet” or “ribbon” beds, wrought out with Echeverias as the principal factor, is well known. Many of the Cactuses and Mesembryanthemums are noted for their brilliant and beautiful flowers of great range of color and form and often richly fragrant; while the strange and wonderful shapes and habits of the Euphorbias, Stapelias and Crassulas win for them much admiration.

This class of plants is rapidly returning to public favor, and has the great merit of requiring a minimum of care and attention from the planter. We keep in stock all select ornamental forms of succulent plants, and furnish a Descriptive Price List to all who ask for it.

Select Collections of Cactuses

The order Cactaceae includes many separate genera of succulent plants—Cereus, Echinocactus, Echinocereus, Epiphyllum, Mammillaria, Phyllocactus, Pilocereus, Rhipsalis, etc. The different types and varieties are wonderfully varied and curious, and the majority are very ornamental. The prices for Cactuses vary from 25 cents to $1, according to size and variety. We furnish prices, together with a descriptive list, upon application.

A Bed of Cactuses, such as is here represented, is most unique and attractive in appearance, and requires but a minimum of attention if planted in a dry and sunny spot. Prices for sufficient plants for such beds will be given on application.

We will select twelve distinct varieties, including the best species, for $3, $5 or $10, according to size and varieties. To those desiring to form collections of greater extent we will be pleased to supply lists of the best species, with prices. Cactuses for bedding can also be supplied by the dozen or hundred at very moderate prices.

The Largest Horticultural Establishment in America.
A COLLECTION of plants is complete without Ferns and Mosses. Their beautiful foliage seems especially fitted to combine with all brilliant and lovely flowers, and to supplement the majestic elegance of the Palms and Cycles we have the large Tree ferns. A vast variety there is, too, among them, from the delicate, transparent green fronds of the finer Adiantums to the bold and handsome foliage of the Nephrolepis and Pteris; or from the lovely Selaginellas, carpeting the ground, to the stately and tall Tree Ferns.

The appreciation of Ferns has increased vastly of late years, and they are now extensively used for all decorative purposes and in all elegant floral work. Our extensive and carefully grown stock affords ample opportunity for buyers to select any forms which may please their fancy or suit their convenience. New and really valuable species are constantly being added to our stock.

### ADIANTUM

A large genus of handsome tropical and subtropical Ferns, commonly known as “Maidenhair” Ferns, with light, filmy fronds and slender, glossy black stems. Their value is well known, and they are appreciated the world over.

### ADIANTUM FARLEYENSE—THE QUEEN OF THE MAIDENHAIR FERNS
Ferns and Selaginellas

Adiantum gracilimum. Foliage minute, finely divided, and of an exquisite color; of a delicate palm-like appearance; always admired. The finest form of the Adiantums ........................................ $0.50
A. macrophyllum. Distinct and large .................................. 75
A. palatum. Very distinct, and of noble appearance; the large pinnae produce a
palm-like appearance, which gives the plant a striking beauty. ................ $0.50 to
A. princeps. Very graceful, and fine ........................................ 2.00
A. Persioanum. Very tall and large leaved; an easily grown species of great beauty... 1.00
A. rhodophyllum. One of the most beautiful new varieties with reddish colored fronds.. 1.00
A. rubellum. The fronds of this choice and beautiful Fern are of a rich crimson tint
when young, changing to light green, edged pink as they grow old. .............. 1.00
A. Sanctor Catherina. A robust growing and useful species ......................... 25
A. Siebrechtsii ................................................................. 50
A. speciosum ................................................................. 25
A. trapeziforme. A very fine species, with elegant fronds and large pinnae ......... 75
A. Victorie. A lovely Fern, of dwarf and compact growth; finest varieties ......... 50
A. Williamsii ................................................................. 1.00
ANEMIA villosa. A handsome, tropical American Fern, rare and distinct. $1.50.
ASPIDIUM. The “Shield Ferns” form a group alike useful and beautiful.
A. decurrens. A robust and remarkable species. $1.50
A. molle .......................................................... 50
ASPLENIUM. A large and widely distributed genus, including many species of great
beauty and value.
A. affine .......................................................... 1.00
A. formosum (Hemionitis) .............................................. 1.00
A. palatum (Hemionitis) .............................................. 1.00
A. splendens strictum .................................... $1.00 to $3.00
BLECHNUM. An attractive and valuable genus of stouter Ferns of distinct habit, being rather
upright in growth.
B. Brasiliiense. A very fine and decorative variety for subtropical gardens... $0.25 to $0.50
B. occidentale. From the West Indies and South America ......................... 1.00
DAVALLIA. The Davallas are among the best of our decorative Ferns, possess
marked peculiarities of habit. They may be distinguished by
their creeping rhizomes.
D. Fijensis. A fine species, with lace-like and gracefully arching fronds. ................ $1.00
D. Mooreana. Exquisitely beautiful; one of the choicest species ................... 1.00
DOODIA superba. A pretty, dwarf growing greenhouse Fern; valuable in collections. $1.00 to $5.00.
DOROPTERIS palma. A pretty Fern, sometimes classed with Pteris, 50 cts.
GLEICHENIA. These Ferns have finely divided fronds, and being neat and peculiar in habit, are
useful for table decoration, basketwork, cuttings, etc.
G. dicarpa .............................................. $1.50 to $2.00
G. dicarpa longipinnata .............................................. 3.50 to 5.00
GYMNOGRAMME. A class of very handsome Ferns, including many species with
delicately divided fronds, commonly called Gold and Silver Ferns.
G. chrysophylla. The Gold Fern .................. $0.50
G. Pervinca (argyrophylla). This is the genuine Silver Fern ...................... 50
Gymnogramme schizophylla gloriosa. A beautiful variety; with long, graceful
fronds and narrow segments; a fine plant for baskets and tablework. The very
handsomest Fern in cultivation ........................................ $1.00
LASTREA. A genus of easy growing Ferns, with species of great beauty; often classed with Nephro-
dium.
L. aristata variegata (Polystichum). This beautiful Fern has a broad band of yellow-
ish green running through the pinnae along the course of the rachis; very orna-
tmental ............................................................... $1.00
L. dissecta .............................................................. 50
LOMARIA. An excellent and widely distributed genus, with many species of great value for table
decorations.
L. ciliata .............................................................. $0.50
L. gibba ................................................................. 25
LYGODIUM scandens (Japonicum). A beautiful climbing Fern, often used in decorations in
the way of the well known “Silulix.” 25 cts.
MARATTIA elegans. A conspicuous noble Fern of imposing habit. $2.50.
MICROLEPIA hirta cristata. A beautiful Fern from the South Sea Islands; sometimes classed
with the Davallas. A choice decorative species, with finely divided, elegant fronds; indispensable
even in the smaller collections. $1.50.

NEPHROLEPIS ELEGANTISSIMA—See description, page 42

NEPHRODIUM. Valuable and handsome Ferns of easy cultivation.
N. molle. A well known species, with many fine sub-varieties ............ $0.25
NEPHROLEPIS. A genus of very beautiful and useful Ferns, much used for decorative work, for which
their comparative hardiness fits them especially well.
N. Barrowii (Improved Ostrich Plume Fern). This beautiful Fern possesses the same
vigorous growth which is characteristic of the Boston Fern, with its graceful
fronds, but with each pinnae or leaflet subdivided so as to form a perfect miniature
frond. The fronds grow broad and heavy, measuring when fully developed at least
6 inches across. It is impossible in any description to convey even a slight idea of the
grace and plume-like beauty of this Fern ................................ $0.25 to $1.00

The Largest Horticultural Establishment in America.
Nephrrolepis Bausel. A very fine, new species ................................................... $0.75

N. davallioides furcans. A remarkably distinct and beautiful variety, with long and light green fronds. Unexcelled for decorative purposes on account of its hardiness; a capital house plant ........................................ $0.50 to 1.00

N. Duffii. Another remarkable species of easy cultivation; the long and upright fronds are of a very peculiar form; a first class ornamental plant .......................................................... 50

N. Elegantissima. This is a "sport" from the Ostrich Plume Fern, in which the plumy peculiarity of the original is even more distinctly developed, the side pinnae being again subdivided and standing at right angles to the midrib, making both sides of the frond equally beautiful. The plant is of more compact habit, with fronds nearly twice as wide, making it a much more desirable plant for all purposes. ........................................... $0.50 to 1.50

N. exaltata. Well known as the "Sword Fern." A very useful and decorative species of easy cultivation; the long and upright fronds are very distinct and effective; good for all decorative purposes .......................................................... 50

N. furians .................................................. 50

N. rufescens tripinnatifida. A new and most beautiful variety of noble habit .......................................................... 1.50

N. Scottii (Dwarf Boston Fern). As a decorative house plant we believe this will give better satisfaction than any Fern now in cultivation. In a general way it may be described as a miniature Boston Fern, the whole plant being daintier and more compact. The fronds are shorter and narrower, gracefully recurving, and which even in a small specimen makes a finished plant with which no other variety can compare ............................................... $0.25 to 1.00

Nephrrolepis Whitmani. An improvement on N. Elegantissima, with still more gracefully divided pinnae, giving the whole plant an airy lace-like appearance not found in any other variety ........................................... $0.75

Onychium Japonicum. A very useful Fern for florists. 25 cts.

Osmunda Japonica corymbifera. New; has beautiful crested foliage; of fine decorative habit, and very useful. $2.50.

Polyodium. An indispensable genus of decorative Ferns, of easy and rapid growth, including many beautiful species.

P. aureum. Very fine and distinct foliage of a bluish hue .......................................................... $0.50

P. Catherinea .................................................. 50

P. glaucum. Beautiful bluish foliage .......................................................... 75

Platycerium. (Elkhorn or Staghorn Fern.) We have, without a doubt, the largest and most valuable collection in the world. This wonderful genus is a native of the wilds of New Zealand. The type, Platycerium Alcicorne, is the ordinary variety; but there are quite a few hybrids. These are of most extraordinary forms and not only are they very interesting because of their semblance to the horns of the Elk or Deer family, but they are exceedingly hardy and excellent decorative house plants. They are epiphytal in habit, and succeed in baskets, shallow pans, or when fastened on blocks of wood; in the latter way, suspended, their peculiarities are well displayed. The shape of the odd foliage is shown in the accompanying illustrations: its color is a peculiar gray. The plants are of easy culture, and constantly producing new prothalliums or fronds; they are grand plants for house culture.

P. alcicorne. The beautiful Elkhorn Fern: see illustration ............................................... $0.50 to 1.00

P. alcicorne majus .................................................. 1.50 to 3.00

P. zEthiopica. New .................................................. 2.50 to 3.00

P. bifurca .................................................. 2.50 to 5.00

P. grande. See illustration .................................................. 3.50 to 5.00

P. Hillii .................................................. 5.00 to 10.00

P. Willinkii .................................................. 5.00

Nephrrolepis Scottii
Ferns and Selaginellas

**TODEA superba.** This, the “Filmy Fern,” is a remarkable species, with long, gracefully curved, rich green fronds, having moonlike segments. Its lovely filmy appearance is entirely distinct from that of any other fern. It is an excellent species for Wardian cases, and requires constant moisture; in other respects it is easily cared for. $5 and upward.

---

**PLATYCEM J LACONICORNE—THE ELKHORN FERN**

The Largest Horticultural Establishment in America.
THE stately grace and elegance of the wonderful Tree Ferns is beyond description. Vying with the Palms, they are of the greatest beauty and utility for all decorative purposes and have a charm belonging to no other order of plants. No tropical greenhouse is complete without them. We are constantly importing fine, healthy stems of all the leading varieties, as well as some new and rare species, all of which we offer at moderately low prices. We have also many large and extra large specimens of extreme beauty, in perfect condition, the prices of which can be had on application. For particulars as to varieties and sizes of these specimens Tree Ferns, see page 12.

**ALSOPHILA.** A magnificent genus, with handsome, upright trunks and ample foliage of rather drooping habit.

* A. australis. One of the finest and most striking species. The large, plumy fronds which form the crown are silvery and glaucous underneath, showing delicate contrasts in green. This Tree Fern is beautiful in all stages of growth. The clear, upright trunk resembles that of a Palm, but is not so firm in texture. $1.00 to $5.00

* A. capensis .................. 3 00 to 10 00

* A. excelsa. A splendid, rapid growing species, that quickly becomes effective; the delicate, wide spreading fronds are dark green above, paler beneath. $2.00 to 5 00

**ASPLENIUM.** These Ferns form handsome specimens, and are graceful and distinct in character.

* A. decussatum. From the Polynesian and Malay Islands. $2.00 to $5.00

* A. arboreum luteum. One of the largest and finest species in the genus, and of peculiar and interesting habit. $2.00 to 4 00

**BLECHNUM Braziliensis.** Of peculiarly graceful habit, with broad and finely divided fronds which, when young, are a rich wine color finally changing with age to dark green. $1.50 to $5.00.

**CIBOTIUM.** Among the best of the Tree Ferns and sometimes included under Dicksonia. The leaves are long, wide spreading and finely cut.

* C. princeps (Cyathea) ... $2.50 to $10 00

* C. regale ...... 2 50 to 10 00

* C. Schiedei ....... 2 00 to 5 00

**CYATHEA.** A superb genus, showing marked peculiarities of form and habit.

* C. dealbata. The most elegant of all the species; broad, dark green fronds, with a silvery under surface. $3.00 to $10 00

* C. Smithii .......10 00 to 20 00

**DICKSONIA.** This is perhaps the most widely known genus of these grand plants. All the species are fine.

* D. antarctica. A well grown specimen of this is majestically beautiful; the tall and heavy stem is surmounted by gracefully arching fronds of a soft and rich green, which are of a very firm and lasting texture; one of the most popular Tree Ferns. $5.00 to $20 00

* D. Schmittii .......10 00 to 20 00

* D. squarrosa ...... 5 00 to 10 00

**LOMARIA.** Tall growing species of this valuable and extensive genus; all of distinct and desirable character. The stems are not so tall as in some of the other genera.

* L. ciliata ......... $2.00 to $5 00

* L. discolor ......... 3 00 to 5 00

* L. gibba ......... 1 00 to 5 00

* L. intermedia ...... 1 00 to 5 00

**CHOICE TREE FERNS**

(1) Dicksonia antarctica, specimen 12 ft. high

(2) Alsophila Rebecca

(3) Lomaria intermedia

(4) Alsophila ferox

(5) Dicksonia squarrosa

(6) Asplenium arboresum luteum
Azaleas—Rhododendrons

AZALEAS AND RHODODENDRONS
Including Both Tender and Hardy Species

Our collection of these superb shrubs or dwarf trees, so indispensable for Winter flowers, or for massing in bold outdoor groups, is easily the largest and choicest one in America. As they are most effective when intermingled, either for greenhouse or lawn decoration, we group them under one general head, including both tender and hardy species. They are grown in fine shape and well rooted. All tints and shades of color are represented in the best types of flowers.

Varieties of Azalea Indica

For Winter and early Spring flowering, the greenhouse Azaleas become more popular every year. Perhaps no other class of plants yields such a brilliant display of flowers for so little care. The experience of many years has taught us that the dwarf standard or crown head is decidedly the best form in which to grow Azaleas for this country, and we therefore offer only plants in that shape. The following collection embraces all the very best and most distinct sorts of both old and new varieties:

ONE OF OUR AZALEA INDICA VARIETIES

A. Borsig. Pure white; a standard old variety.
Alba speciosa plena. Fine, double white.
Apollon. Brilliant red.
Baronne de Vriere. Large white flowers, ribboned with light red.
Baron Nathaniel von Rothschild. Double purple violet.
Bernhard Andrea. Double; bright rose.
Bernhard Andrea alba. Fine; pure white.
Candidissima. Excellent; pure white.
Cassandra. White, pointed with red.
Chas. Darwin. Double white, pointed rose.
Ch. Encke. Rose, edged with violet.
Comte de Chambord. Very large; salmon rose.
Comtesse de Flandres. Striped salmon rose.
Deutsche Perle. Double white; good for bouquets; one of the very best Azaleas.
Distinction. Fine large rose flowers.
Dr. Liebig. Highly colored, rich crimson; large and full; very floriferous.

Duchesse Adelaide de Nassau. Amaranth red and vermilion orange; very large and finely formed.
Due de Nassau. Dark rose carmine.
Flag of Truce. Very large; double white; very fine.
Gloire de Belgique. White, striped with carmine.
Grosfurstin Helene. Orange and deep brown spots.
Gustave Guilmot. Striped flowers; good for forcing.
Harlequin. Striped and blotched with rose and violet.
Herman Seidel. Double; lively rose.
Le Flambeau. Very deep crimson.
Mad. Louise de Kerchove. Large white flowers with orange blotches and flesh colored circles.
Mad. J. E. Plancheon. Large flowers of clear white, striped yellow.
Mad. L. Van Houtte. Fine large scarlet flowers, striped with white; extra fine.
Mad. Van der Cruyssen. By far the best flower of its color; very large; deep rose, a vivid and brilliant color; in our judgment one of the best Azaleas in cultivation.

The Largest Horticultural Establishment in America.
Marshall P. Wilder. Double white, dotted and striped with lilac rose; a new color.
Marquis of Lorne. Orange, with yellow blotches.
Memoire de Louis Van Houtte. Very large brilliant rose flowers.
Meteor. Double bright rose.
Narcissiflora flore pleno. Double white.
Oswald de Kerchove. Lively lake rose, with fiery blotch; splendid habit.
Pauline Mardner. Rose; double; a fine sort.
Pluto. The darkest and richest blood red, large flowered Azalea.
Princess Charlotte. Lively deep rose.
Roi de Beauties. Rose, edged with white.
Roi de Holland. Fiery red; very free flowering.
Roi Leopold. Double orange.
Sacountala. Very floriferous; white flowers, double and large; fine market plant.
Senator Van Camp. Very large, double; lively Carmine, with deeper center.

Souvenir de Arthur Veitch. A very large single flower of satiny salmon crimson, blotched deep red.
Souvenir de Francois Verweye. White, striped rose; a very pretty flower.
Souvenir de Prince Albert. A large and double light rose and variegated flower.
Vesuviana. New. The best double variety ever introduced. Coloring is superb.

Price for strong plants, $1 to $2 each and up.

**RHODODENDRONS**

The Rhododendrons, both tender and hardy, are magnificent shrubs, unsurpassed for all sorts of indoor and outdoor decoration. Properly planted and cared for, their beauty increases with every year. For outdoor planting we offer only perfectly hardy varieties, knowing that only such will prove satisfactory. The splendid effects that they give when planted in masses may be seen in many public and private pleasure grounds and gardens, for which we have supplied shrubs, in and around Newport and New York. In greenhouse Rhododendrons, besides the species and varieties named in the short and select list below, we can supply any other good sorts that our customers may desire, at reasonable prices. See offer of Special Collection below.

**Greenhouse Rhododendrons**

Our collection of tender varieties of Rhododendrons for greenhouse culture and decoration includes the best and most distinct varieties. They are chiefly hybrids of *R. arboreum* and the Himalayan species of *R. ponticum*. The shrubs are shapely, vigorous and well rooted, equal to any ever sent out.

**Brilliant.** Bright, deep scarlet; the finest of its color.
**Diadem.** Orange scarlet, tinted with Carmine.
**Duchess of Connaught.** Brilliant vermilion red.
**Duchess of Edinburgh.** Brilliant scarlet, shaded with crimson.
**Favorite.** Light, satiny rose, with white tube and crimson filaments.
**Jasminiflorum.** (Species.) White, with white tube and crimson filaments.
**Lord Wolseley.** Bright orange yellow, tinted with rose toward the margin; truss large; plant vigorous and free blooming.
**Princess Alexandra.** White, with faint blush tinged.
**Princess Frederica.** Light buff yellow, with a faint tinge of rose at the margin.
**Triumphans.** Crimson scarlet, with large, globular truss; a splendid variety, distinct and brilliant.

**Strong plants, well set with buds, $1 to $5 each. Special rates on large quantities.**

We offer a fine collection of Greenhouse Rhododendrons in 20 different sorts at $2.50

**IVIES IN TUBS**

We have a splendid collection of specimens globe shaped and Pyramid Ivies, ranging in height from 3 to 7 feet. These are well furnished with foliage and require only ordinary attention to preserve their beauty and contour. They are distinctly ornamental and will do much to satisfy the desire of those who do not care for Bay Trees. $5 to $20.

**Ivies in pots.** Fine large plants, 6 to 7 feet high. $2 to $3.

Climbing Wm. Allen Richardson. Coppery yellow.
Climbing Marechal Niel. Dark golden yellow.

We have a large stock of Hardy Everblooming Roses, bush and standards. See our Nursery Catalogue

NEW AND RARE CHRYSANTHEMUMS

Herewith we offer a carefully selected list of the best of the new and rare varieties shown at the exhibitions last season. They are all very distinct and marked improvements over previously introduced sorts.

No flower makes a more magnificent display in the Autumn than these, with their almost endless variety of form and colors, ranging from the purest snowy white, delicate pink and rose, through all the shades of brilliant yellows and deep reds. Set out the plants in a sunny, sheltered location, in good, rich soil, using plenty of well rotted cow manure. Water freely and keep well cut back until the first of August. If wanted for indoor blooming, they should be lifted about the middle of September, potted, watered thoroughly, and set in a shady place for a few days; afterward expose them to the full light, in a temperature not higher than fifty degrees.

Beatrice May. A splendid white variety, of the largest size. It is unsurpassed in stem and foliage and has a splendid habit; dwarf, strong and stocky. The foliage comes up to the flower. Flowers on terminal buds taken in September show a flush of pink on the petals.

Ethel Fitzroy. An early variety, color an orange amber with red shadings which is very attractive. A magnificent flower, very large and handsome; a bold, fine incurved, Japanese type with broad, curling petals. A very popular variety and one of the very best in the list of new sorts.

The Largest Horticultural Establishment in America.
TYPES OF WELL GROWN GREENHOUSE CHRYSANTHEMUMS

C. Montigny. A very large, globular, closely incurved flower with rather narrow petals; yellow with light lacing of red on the edges of the petals. A grand exhibition variety. Mid-season.

Dolly Gride. A grand grower, color a soft creamy white, with broad and heavy petals. Not the largest, but splendid form, strong, erect stems and fine foliage.

Japan. A very unique variety, imported from Japan. The color is an exceedingly rich orange yellow, with citron red at the base of the petals. It is distinctly Japanese in shape, loose and graceful, with the ends of the petals curiously hooked and cleft. Very useful for loose bunches of flowers. It makes a splendid plant for growing in pots.

Mrs. D. Willis James. A rich, warm shade of chestnut terra cotta with an old gold reverse. It is very early; perfect flowers were certificated in New York October 9th. Fine for bush plants, as in that stage the flowers are brilliant red. A nice dwarf grower with splendid stem and foliage.

Mrs. John E. Dunne. A splendid terra cotta, with just enough pink and golden yellow to brighten it and make it most attractive. It is of dwarf habit, stocky, with fine stems and foliage. A beautiful flower and grand either for exhibitions or for cut flowers; very large.

Jeannie Monin. A grand, late, globular white. For Thanksgiving Day and later this has no rival. It is a splendid flower, keeping well long after being cut. Won the silver cup at Chicago for the best white. A stately flower and the most valuable of recent introductions for cut flowers.

G. J. Brooks. Crimson maroon with reverse of plum color and touches of white; a loosely formed flower of the incurved type, very graceful, showing the unique coloring at its best. The form is excellent and the finish to the flower splendid. Strong stiff stems and splendid foliage. Fine for exhibitions.

Lady Cranston. A sport from Mrs. Barkley. It is pure white with a vivid pink center, unique and distinct; a sensational variety.

Mrs. J. A. Miller. A deep red and dwarf sturdy grower. One of the largest flowers, and held a commanding position in the exhibitions.

Mrs. F. F. Thompson. An informal flower of enormous size. The form is deep and incurving, the petals twist and curl like a mass of ostrich plumes. Color pink with creamy white center. A grand exhibition sort.

Matchless. A magnificent deep Indian red. The form is a fine type of the reflexed Japanese which displays at its best the beautiful rich color effects of the flower. It is a variety of very easy growth, fine habit, and one of the best for keeping up for some time after being cut. In full bloom about October 15th.

Old Gold. A charming color, aptly described by the name. The flower is not one of the largest, but its lack of size is made up by the splendid foliage. It is of unusual excellence for growing in pots and for use in decorative effects.
Valerie Greenham. A beautiful, bright pink variety, shading deeper towards the center and lessening slightly towards the extremities. The coloring is charming, one of the best in its type. The petals are extra long and they droop and curl in the most lavish profusion, forming one of the grandest specimens of the drooping Japanese type. It has been a uniform winner at the exhibitions.

Price, 40c. each, $4.00 per doz., except where noted. Set of 19 new and rare sorts for $7.00.

THE FINEST TYPES OF JAPANESE VARIETIES

The following list represents the finest type of the Japanese Chrysanthemum, the results of high breeding by experts in all parts of the world. Gradually the Japanese type has asserted itself in this flower until it has almost submerged the others. From Japan have been brought the finest varieties grown there, the results of centuries of work, and their blood—to use the term—flows in the veins of these.

Henry Barnes. An exceptionally deep but vivid crimson, showing a rich golden reverse of the petals just enough to intensify the crimson but not to nullify it. The form is loosely incurved; broad and massive petals. A grand variety for exhibitions.

Ethelyn. A splendid globular variety with loosely incurred petals, so that the style of the flower is graceful for a rather compact type. The coloring is exquisite, a soft white with a warm blush pink at the base of the petals; this coloring less or more suffuses the whole flower.

Miss D. V. West. A grand Chrysanthemum for all purposes. Pure white, with broad curling florets which twist into very graceful lines. It is altogether unique in form and is one of the largest sorts grown. A gem, and should be grown by every lover of the "Autumn Queen."

Price for the above, 30 cts. each, $3.00 per doz. Collection of six for $1.50.

NEW LARGE EARLY VARIETIES

A new strain from European growers, blooming by October 15th, and bearing flowers as large as most later sorts.

Baron Chiseul. A good red of fine incurving form. Japanese. Very usual for this date, October 15th.

Carrie. Deep yellow, dandellion shade, blooms in September. A splendid variety for pots or outdoor planting.

C. Choulet. A superb, tawny orange; petals reflexed so that the color is shown at its best. A splendid grower.

Clementine Tousset. An enormous early white, certificated on October 8th. A glistening white, lasts splendidly when cut.

Etienne Bonnefond. Golden yellow, shaded red; Japanese incurved; very broad claw petals, forming a globe.

Mlle. Marthe Morel. A beautiful blush pink, similar to the V.-Morel in form. Fine for such an early bloom.

Mme. Paul Sahut. Pure white, incurving form. It opens blush in the center, but becomes pure white as it takes form.

Reveil de Belgium. A big, incurving golden yellow, in perfection October 15th. A splendid cut flower variety, fine stem and foliage.

Roï d'Italie. Somewhat later than the others; a splendid large flower, compact, incurving; a rich shade of yellow.

Price, 20 cts. each. Set of ten "Large Early" for $1.50.

The Largest Horticultural Establishment in America.
**GENERAL COLLECTION OF CHRYSANTHEMUMS**

**Timothy Eaton.** This is unquestionably the largest white incurved variety yet offered. Form perfect, with stout, stiff stems and healthy foliage.

**Vivian-Morel.** Extra large flowers; petals long and loosely arranged; a beautiful light shade of pink.

**Golden Wedding.** Of a rich golden yellow color, intense and dazzling. Flowers 10 to 12 inches in diameter, 4 to 6 inches in depth; petals broad and long, double to the center without an eye.

**Major Bonnaffon.** Grand incurved yellow of largest size.

**Maud Dean.** Extra large flowered variety; petals broad and incurved; color pink, almost rose, an unusual shade.

**Mrs. R. M. McArthur.** Magnificent clear snow white, solid; petals incurred and cupped, hemispherical in form.

**Philadelphia.** An immense incurved flower, opening yellow, but changing to white with yellow at the tips.

20c. each, $2.00 per doz. Set of 3 for 50 cts.

**DAHLIAS**

At the present time this form is the most popular of all the Dahlias, as it combines the grace and beauty of the single forms and is less formal in outline than the double varieties.

**Austin Cannell.** Deep crimson rose.

**Countess of Lonsdale.** Beautiful salmon pink: large and full to the center. A very profuse bloomer.

**Cycle.** Bright rosy crimson; an early and profuse bloomer.

**Delicata.** A beautiful true Cactus variety. Light salmon at base of petals shading to a delicate pink.

**Earl of Pembroke.** Bright plum; petals long and pointed; regular form and finish.

**E. O. Greening.** Purplish crimson red flowers, long pointed petals.

**Fuselier.** Very deep salmon; perfect shaped flowers.

**G. W. Childs.** Shining black; petals edged with purple; free blooming; good for cut flowers.

**Geisheler.** A pleasing shade of rosy crimson, occasionally striped white. A charming variety.

**Genista.** Yellow changing to golden yellow. Beautiful form and strong long stems.

**Gloriosa.** Vivid carmine crimson; extremely beautiful.

**Green's White.** Pure white.

**Henry Stredwick.** Rich velvety maroon; petals long and narrow. An exquisite flower.

**Hohenzollern.** A rich bronzy orange red color with golden sheen; fine.

**Henry F. Michell.** Acknowledged to be one of the noblest. Of immense size and irregular form; petals long, broad and twisted. Colors range from soft yellow to deep orange red. A beautiful variety, the shades and tints blending with perfect harmony.

**Imperator.** Robin red color with chestnut; beautiful form.

**I. W. Wilkinson.** Carmine rose petals shaded scarlet in the center.

**John H. Roach.** A fine light yellow, of perfect form; long, incurved pointed petals. A beautiful flower and always full to the center.

**Lodestone.** Apricot color.

**Loreley.** Soft La France pink, shaded lighter toward the center, which is a creamy white.

**Lyric.** Yellow green, changing to a bronze red; fine.

**Madame Medora Henson.** Large and fine; clear cherry red petals. This variety produces more flowers than any other Cactus Dahlia.

**Miss A. Nightingale.** Deep yellow heavily tipped bright red.

**Mrs. Winstanley.** Yellow petals, edged scarlet red; large flowers; free bloomer.

**Nibulunger.** Entirely distinct: pleasing shade of red overlaid blue. Finely quilted petals.

**Primrose Dame.** Light yellow.

**Red Rover.** Scarlet red.

**Sailor Prince.** Bright crimson red; long petals; perfect form.

**Siegfried.** Ivory white.

**Sonnenstrahlen.** Canary yellow.
**DAHLIAS**

**DAHLIAS, POMPON**

Allie Mourey. A very pretty Pompon, of fine form and good habit. Small, compact flowers, pinkish white tipped deep pink.

Canary. The finest pure yellow Pompon variety, always full to the center, and a very profuse bloomer.

Catherine. A fine pure yellow of good form; full to the center and borne on long stems.

Eleganta. Soft pink tipped deep pink.

Little Prince. Red tipped pinkish white; sometimes mottled deep crimson and shaded maroon.

Any of the above, 15 cents each, $1.50 per doz.

**TYPE OF DECORATIVE DAHLIA**

**DAHLIAS, QUILLED**

A. D. Livoni. Seashell pink.

Apple Blossom. Nearly all the colors of the apple blossom.

C. W. Bruton. Canary yellow flowers of immense size.

Electric. Brilliant magenta.

Grand Duke Alexis. Flowers large creamy white tipped lilac.

M. D. Hallock. Clear yellow; early.

Nymphaea. White and shell pink.

Prince Charming. Flowers white suffused purple pink.

Price of any of the above varieties, 20 cents each, $2 per doz.

**DAHLIAS, SINGLE**

C. E. Varnum. Very large red flower tipped lighter.

Fashion. Crimson maroon.

Isaac Pitman. Fine large purple.

Lehrr Cark Sache. Bright rosy lavender.

Snow Queen. Pure white.

Price of any of the above varieties, 15 cents each, $1.50 per doz.

The Largest Horticultural Establishment in America.
NEW AND RARE FRENCH CANNAS

The advent of the French or Crozy race of Cannas, so named in honor of the originator, M. Crozy, revolutionized the floral decoration of American gardens. A comparatively obscure race of plants has risen to the front rank because of its vastly improved character in flower and foliage. France, Italy and America have vied for premier honors in improving the race. There are probably over five hundred sorts in cultivation and the varieties in our list are selected from that great number. They represent the highest types and the best contrasting colors. The height to which these Cannas usually grow, except where stated in description, is four to five feet, according to season and soil. The foliage of all is green except where stated otherwise in the description.

Alsace. Delicate sulphur yellow, changing to a creamy white without spots. Very free flowering, medium height. A grand variety for massing.

America. The foliage is bronze color, with dark red hues and metallic luster. The flowers are enormous, beautiful, flowing purplish red, flamed and striped.

Beaute Poitivene. A very fine dark crimson variety with dark metallic green foliage and deep rich crimson flowers. A prolific bloomer.

Black Prince. Intense dark velvety maroon; grows strong and erect. 3 to 4 feet; fine dark red stems and deep green leaves edged with purple.

Buttercup. Intensely bright yellow, as lustrous and bright as the “buttercup” of our fields. Best in its color. Height, 3 feet.

Cinnabar. Cinnabar red, distinctly edged with golden yellow; a fine round flower of great substance held well above the foliage.

Defender. Clear rich yellow striped with bright scarlet; 3 to 3½ feet high. This is the best of the spotted varieties.

Directeur Potier. A stately very free blooming variety. Foliage deep green and abundant. Flowers light orange, brilliant yellow edge flamed yellow at throat.

Duke of Marlborough. This is decidedly the darkest and richest colored Canna in existence. The flowers are a deep rich crimson maroon.

Gladiator. A rugged, strong growing variety which withstands our Summer storms better than almost any other Canna. The flowers are bright yellow thickly spotted with crimson and blossom profusely. Heads are unusually large and borne on long, strong stalks with tough, deep green foliage. A superb variety alone or in masses.

Gloriosa. Color bright rich crimson, with wide border of deep golden yellow. One of the most showy varieties. Height, 3 feet.

Luray. Large well formed flowers of a very attractive rosy pink.

Martha Washington. The flowers are very large and frequently have five broad petals; the trusses are immense and the color pure bright rose. Height, 2½ to 3 feet.

Mrs. Kate Gray. Flowers a rich shade of orange scarlet, marbled with intense coppery red; yellow in the throat. They measure from 6 to 7 inches across, individual petals often being over 2 inches wide. Height, 6 feet.

Mrs. C. W. Ward. Color a brilliant crimson scarlet. Flowers very large, sometimes almost semi-double, and borne in large spikes. The habit is dwarf and compact; flower trusses stand well above the foliage.

Olifant. Foliage deep green. Flowers rich golden yellow, lightly speckled with brownish red. They are very large and broad and are produced in abundance. Height, 2½ feet.

Olympia. Very free bloomer, bears large trusses, always erect and stands the sun a long time. The color is a violet purple shaded with crimson.

Orange Queen. The color is very distinct, being a true burnt orange. It is handsome in foliage and habit; blossoms most profusely. Height, 3 feet.

Papa Canna. Considered by many the finest red; certainly a grand addition to this color. It grows about 3 feet high; has immense spikes of flowers, the florets being of grand size and fine form; color pure red; habit of plant graceful with wavy light green foliage.
P. J. Berckmans. A grand, robust growing Canna, large, deep green foliage, flowers a rich shade of carmine crimson, soft and yet brilliant; broad, strong petals.

Pennsylvania. The flowers are often 7 to 8 inches across, with petals 2½ inches broad. It will produce double the number of flowers of any other of the giant flowering Canas. Height, 6 feet.

Pres. McKinley. Brilliant crimson with scarlet shading. Dwarf habit, growing only 2½ to 3 feet.

Price, dormant roots, up to April 1, 15 cts. each, $1.50 per doz.; growing plants, after April 1, 25 cts. each, $2.50 per doz.

CARNATIONS

The Carnations we offer are strong, young plants out of 2-inch pots. If planted out in Spring they should begin blooming about July or earlier. If potted in the Fall they should bloom profusely during the Winter months.

Robert Craig. Perfection is more nearly attained in this peerless variety than in any other scarlet yet introduced. The flowers are of the largest size, perfect form, fragrant, and borne on long, stiff stems. The growth is splendid, healthy and vigorous. An early and continuous bloomer. 30 cts. each, $3.00 per doz.

Harlowarden. The best rich crimson Carnation on the market. Splendid color, long stems, large flowers and a very healthy grower; very productive. 15 cts. each, $1.50 per doz.

Gov. Wolcott. A grand white Carnation which gives every evidence of becoming a standard in its color. The flowers are pure white, measuring 3 to 3½ inches across; long, strong stems and splendid foliage. It is very healthy and vigorous, being immune against most carnation diseases. 15 cts. each, $1.50 doz.

Queen Charlotte. A grand Canna, with a distinct golden belt around each petal, the center brilliant orange scarlet, with crimson tones.

Sir Trevor Lawrence. Soft carmine rose, changing to delicate rosy pink. Around the entire flower, but broader at the ends, is a border of bright yellow.

Souv. d’Antoine Crozy. Intense scarlet, rich and dazzling, rich golden yellow edge; does not fade or scorch in the hot weather. The most brilliant Canna in existence.

Mrs. M. A. Patten. Another new Carnation of the highest merit. The flowers are very large, borne on extra long stems. They are a glistening white, striped and penciled with bright red. Decidedly the best striped Carnation. 15 cts. each, $1.50 per doz.

STANDARD NAMED CAR-NATIONS

Adonis. The ideal scarlet.
Daheim. Brilliant crimson, shades maroon.
Dorothy. A fine clear deep pink.
El Dorado. Canary yellow, tipped rosy carmine.
El Dorado. Rich yellow, striped and penciled bright red.
Enchantress. A superb shade of rosy blush pink.
Flamingo. A grand carnation; deep crimson scarlet.
Genevieve Lord. A beautiful light pink.
Gen. Maceo. One of the darkest and richest colored.
Golden Nugget. Clear deep yellow, slightly marked with red.
Harry Penn. A deep crimson. A gem in its color.
Jessica. Red and white variegated.
Lillian Pond. A fine white, with flowers 3½ inches in diameter.
Morning Glory. Delicate pale pink.
Mrs. Franz Joost. A very valuable variety, highly esteemed for its free flowering qualities. Color, beautiful rich salmon scarlet.
Mrs. Thomas W. Lawson. Pure brilliant rose pink.
My Maryland. Large flower, pure white.
Properity. White, irregularly overlaid, rosy pink.
Queen Louise. Clear, snowy white, large flowers.
Red Lawson. A sport from Mrs. Thos. W. Lawson; much deeper in color but identical in other respects.
Victory. Grand brilliant scarlet.
Wm. Scott. Large flowers, deep pink; long stem.

Price, 10 cts. each, $1.00 per doz., $6.00 per 100.

A VASE OF CARNATION ROBERT CRAIG

The Largest Horticultural Establishment in America.
This very popular family contains innumerable varieties and comprises every imaginable shade of color from the most gorgeous and dazzling to the most fascinating and delicate tints. They are invaluable for garden ornamentation and for the house, as they are extremely durable and lasting.

BRENCLEYENSIS. Red; the strongest flower. $2 per 100, $15 per 1000.

COLVILLEI RUBRA. Rose; very early. $1.50 per 100, $12 per 1000.

C. alba. The Bride. Pure white. $1 per 100, $8 per 1000.

EXTRA SUPERFINE. Mixed. This is a mixture of the very best varieties, and contains an elegant assortment, light colors predominating. 30 cents per doz., $1.75 per 100, $15 per 1000.

HYBRIDUS NANCEANUS. In the following varieties:

Comte Horace de Choisel. Orange yellow, purple.

Le Grand Carnot. Large flower, effective; brilliant.

Maurice de Vilmorin. Purple, dark red.

M. Hardy. Cherry red, with yellow.

P. Ducharte. Dark velvet red.

President Carnot. Extra large flowers, carmine red, yellow bordered.

Professor Lombin. Lilac violet.

A. R. Smith. Large flower, carmine, orange; brilliant.

Above varieties, 50 cents each, $3 per collection, one of each variety; $30 per 100.

LEMOINE'S HYBRIDS. Very beautiful, remarkable for fine colorings and markings and distinctive form; extra fine sorts. 35 cts, doz., $2.50 per 100.

La Bien Aimee. 25 cents each, $2.50 per doz.

Lord Salisbury. Orange flowered. 35 cents each, $3.50 per doz.

General Gordon. Bright deep scarlet. 25 cents each, $2.50 per doz.

Marie. 10 cents each. $1 per doz.

Queen Victoria. 15 cents each. $1.50 per doz.

Superfine. Mixed. $3.50 per 100.

Pink Shades. 35 cents per doz., $2 per 100.

Scarlet and Crimson. Extra choice. 30 cents per doz., $1.75 per 100.

Snow White. When first opening, frequently show a tinge of purple in the throat, but if cut then and put in water, will open fully and of purest snow white, every flower opening to the tip. 20 cents each, $2 per doz.

White and Light. 35 cents per doz., $3 per 100.

Yellow. 50 cents per doz., $3 per 100.

RAMOUSUS. A dwarf growing variety. 50 cents per doz., $3 per 100.

The following collection was personally selected by us in Europe. Many of them are rare and scarce.

Ami Berat. Perfect form, fine spikes; bright clear red slightly suffused with purple. 25 cents.

Baronne Burdett-Connis. Magnificent spikes of flowers, rose shaded lilac; unusually large. 30 cents.

Belisare. Deep rose, delicately striped salmon. 25 cts.

Depute Berteaux. Bright red, dark velvety flamed crimson, blotted with white shaded with purple. 50 cents.

Directeur Barnsby. Very large flowers of deep rose, striped with mauve, dark on the edge of petals, spotted white. 50 cents.

Docteur Darses. Long spike of large flowers, brilliant, clear red, rich, velvety, marbled with clear white. 20 cents.

Docteur Fieret. Large bright red flowers spotted with Naples yellow. 20 cents.

Elegant. A grand spike of flowers; bright rose lined with white, striped carmine, spotted red and shaded yellow. 50 cents.

Enchanteresse. A superb, compact spike, with enormous finely opened flowers of pale satiny lilac, with delicate violet lines on some of the petals. 50 cents.
BEDDING PLANTS

Including Summer Flowering Bulbs and Tubers

It would be useless to offer for Summer bedding plants which cannot endure, by turns, fierce heat and drouth and deluges of rain. Popular bedders must grow thriftily and bloom profusely and continually, or keep their foliage bright, despite all such hardships; and, moreover, must court themselves with but a moderate amount of care. We offer only the brightest and sturdiest of the class including the best Summer Blooming Bulbs and Tubers, Foliage and Flowering Plants.

Prices range from $1 to $3 per doz. and from $6 to $20 per hundred

ACALYPHAS. The foliage of all sorts of Acalypha is handsomely blotched and marked; A. torta has leaves beautifully cut and curiously twisted. All the best bedding varieties, $2 doz., $12 per 100.

ACHYRANTHES. We offer all the best varieties of this section of bright-leaved bedders at $1 per dozen. $6 per 100.

AGERATUMS. On account of their free-flowering qualities and their large fluffy clusters of bloom of all shades of blue and also pure white, the Ageratums have become quite popular as bedders. All the best varieties, $1 per dozen, $6 per 100.

ALTERNANTHERAS. These are dwarfer and more compact in habit, with smaller leaves than the majority of foliage plants for bedding. They are very brightly colored and especially adapted for working out designs, letters, etc. $1 per dozen, $6 per 100.

BEGONIAS, Lemoine's Hybrids. This is a new class, especially bred for bedding. 50 cents to $1 each.

BEGONIAS, Tuberous. As a bedding plant the Tuberous Begonia seems to eclipse all the old favorites. We now have species that, with good culture, endure the hottest suns and produce rich and brilliant effects. For varieties and descriptions, see Bulbs and Tubers.

CALADIUM esculentum. The well known bedder, with immense tropical plant green leaves, $1 to $3 per dozen; $6 to $20 per 100, according to size of bulbs.

CENTAUREAS. (Dusty Miller). The silvery white leaves of these plants contrast finely with those of dark colored sorts. Some of them are finely cut and fernlike. $1 per dozen, $6 per 100.

FUCHSIAS. For bedding in shaded places, covering unsightly angles and corners, or for flowering on porches and verandas, Fuchsias are the perfection of grace and exceedingly pretty. 20 cents each; $2 per dozen.

GERANIUMS. We keep in stock a fine assortment of the best double and single forms of these popular old plants. They have not been overlooked in the general plant evolution, as many excellent new sorts will show. 15 cents each, $1.25 per dozen, $10 to $15 per 100.

HELIOTROPE. For bedding and pot culture these fragrant heat loving plants are alike indispensable. Their flower trusses now show many shades of color from pure white through lavender and pinkish violet to rich deep purple, and some have golden variegated leaves. All the best varieties, 15 cents each, $1.50 per dozen.

LANTANAS. These bedders are bright with bloom the entire season, very pretty, and require little care. All the best colors, 10 to 15 cents each; $1 per dozen.

LOBELIAS. The blue and scarlet Lobelias are brilliant and free flowering; unsurpassed for bedding, edgings, baskets and vases. $1 per dozen, $6 per 100.

MARGUERITES. Paris Daisy—The Frenchman's.

POLIANTHES tuberosa. This, the well known Tuberose, is one of the best of our Summer bulbs.

Single Tuberose. The "Orange-Flowered" variety. 10 cents each, $1 per dozen.

Excelsior Pearl. The finest strain of the double varieties, and a beautiful flower; of dwarf habit. 10 cents each, $1 per dozen.

SALVIAS. These are among our very best plants for Summer display. Their habit is very compact and graceful and the flowers are of various colors; pure white, blue, white with scarlet spots, and in red from all deep, dark shades to bright scarlet. 10 cents each, $1 per dozen. $8 per 100.

TIGRIDIAS. (Ferraria.) Splendid Summer blooming bulbs; the flowers are showy and freely produced. T. conchiflora. Dark yellow flowers. 5 cents each, 50 cents per dozen.

T. grandiflora alba. White flowers. 10 cents each, $1 per dozen.

T. grandiflora rosea. A beautiful new and rare variety, with flowers of lilac rose. 60 cents per dozen, $5 per 100.

T. pavonia. Scarlet. 5 cents each, 50 cents per dozen.

TROPHÉUMS. We have no more brilliant flower than this for any purpose. Quick growing, free flowering and having marked individuality in both leaf and flower, it is par excellence as a bedding plant, or for growing in baskets, vases, etc. All the best species and varieties 10 cents each, $1 per dozen, $6 per 100.

T. variegatum. A new and valuable plant. Has finely marked white and green leaves like those of a Silver Geranium, and is excellent for ribbon work. 50 cents each.

VERBENAS. These are elegant bedding plants, with showy clusters of flowers in every shade of every color except yellow. The large flowering strain, V. hybrida grandiflora, now supersedes all others. 10 cents each, $1 per dozen, $6 per 100.

The Largest Horticultural Establishment in America.
AQUATIC PLANTS

Plants which grow in or near the water are receiving much attention now, and they are well worthy of it, for some of the most beautiful of all our flowers are aquatic in their nature. The exquisite Water Lilies, the stately Lotus, the wonderful Victoria regia, serve with others to distinguish this class. It is not at all difficult, in reality, to provide for them the necessary conditions. In a modest way the hardy Water Lilies can be enjoyed growing in an ordinary tub, with a minimum of attention; or a brick tank of any desired dimensions, in which all the fine aquatics will flourish, can be readily constructed and lined with cement. If contiguous to a greenhouse, so that a section of the tank can be warmed by a hot water or steam pipe, the great Victoria regia can be flowered. We will construct and arrange aquatic tanks anywhere desired.

A POND OF HARDY WATER LILIES AND BAMBOOS AND GRASSES, WITH BEAUTIFUL SURROUNDINGS

ACORUS. Fine decorative plants for borders of ponds or shallow water; they are hardy and have pretty flowers.
A. calamus. The root is the well known Calamus or Sweet Flag; yellow flowers. 25 cents.
A. graminifolius variegatus. A pretty variety, with white striped leaves. 25 cents.
A. Japonicus var. Variegated foliage; fine. 50 cts.
APONOGETON distachyon. The “Water Hawthorn.” Pure white and fragrant flowers, suitable for indoor and outdoor culture, being hardy; the leaves are also pretty. 50 cents.
ASPIDISTRA lurida var. This plant is good everywhere and will grow freely on the margins of ponds or small streams. Few plants of value are so available for all decorative uses. 50 cents to $2.
BUTOMUS umbellatus. The “Floating Rush.” Fine, large pink flowers; one of the best hardy swamp plants. 25 cents.
CALLA palustris. A pretty little hardy aquatic, growing in swamps or shallow ponds. 25 cents.
C. æthiopica (Richardia). The Calla Lily. 25 cts.
C. albo-maculata (Richardia). The Spotted Calla. 25 cents.
CALTHA palustris monstrosa plena. A fine hardy plant, bearing large golden double flowers. 25 cts.
CERATOPTERIS thalictroides. The “Floating Staghorn Fern.” A very curious hothouse aquatic Fern of much interest. 75 cents to $1.
CYPERUS alternifolius. The “Umbrella Plant.” Useful for swampy places, and also for aquariums. 25 cents.
C. alternifolius var. 75 cents.
EURYALE Amazonica. A noble Water Lily, with very large, thorny leaves and large and beautiful pink flowers. $2.
E. ferox. Like the foregoing, but the flowers are deep violet. $3.
**Aquatic Plants**

**HIBISCUS.** Of this extensive genus there are several species which do well planted on borders of ponds, etc. They have beautiful foliage and attractive white, rosy and crimson flowers.

- *H. coccineus.* 50 cents.
- *H. militaris.* 25 cents.
- *H. Moschutos.* 25 cents.
- *IRIS pseudo-acorus var.* 50 cents.
- *I. foetidissima var.* 50 cents.

These two Irises form excellent decorative water plants that adapt themselves readily to all sorts of marshy places.

**JUNCUS.** Odd, grass-like plants, for bogs or marshy places.

- *J. effusus aureo-straitus.* Striped leaves, curiously twisted; very distinct plant. 50 cents.
- *J. zebrinus* (Scirpus). A fine variegated plant. 50 cents.

**LIMNOCHARIS Humboldtii** (Plunieria). The pale yellow miniature Water Lily; a pretty stoved aquatic. 50 cents.

**LIMNANTHEMUM** (Villarsia) *nymphaeoides.* A pretty little hardy aquatic with yellow flowers and leaves somewhat like those of the Water Lily. 25 cents.

**NELUMBium.** Superb aquatic plants growing to considerable height above the surface of the water. Their flowers and foliage are both of great beauty and their habit makes them valuable for planting in backgrounds.

- *N. luteum.* The American yellow flowered Lotus; a splendid hardy plant, bearing large and frangrant yellow flowers resembling Double Tulips; the leaves are large and of a peculiar bluish green. Very ornamental for aquarium planting or for the borders of small lakes or ponds. $1.

- *N. speciosum.* The Water Lily of Hindoostan; the Egyptian Lotus Bean of Pythagoras. A magnificent aquatic, bearing immense double flowers of white and rose color, richly fragrant and very beautiful. They are held up on long stems above the very large umbrella-like leaves and the unopened buds are of elegant appearance. The flowers are followed by an odd seed-pod, resembling closely the rose of a water pot, holes and all. This superb plant is one to delight any flower lover, and, although not hardy, may be readily flowered outside in the Summer, in a tank or pond. $1.50.

**VILLARSIA nymphaeoides.** See Limnanthum. 50 cents.

**TENDER NYMPHAEAS**

These should be grown in tubs or boxes sunk below the surface. For the Winter, after the foliage has died off, remove them to a cellar or under a greenhouse bench, and keep them moist. *Night bloomers.

* *Bissetii.* Grand new hybrid; immense flowers of glowing rose pink. $3.00

Special collections of the best and most distinct Aquatics, suited to either large or small ponds, made up at special rates.

We also carry a large stock of Hardy Varieties. List and prices on application.

(For Hardy Aquatics see Nursery Catalogue.)

The Largest Horticultural Establishment in America.

**VICTORIA REGIA**

Truly the queen of Water Lilies. A magnificent and remarkable giant aquatic plant, needing a high temperature to develop its flowers, which are a foot or more in diameter, and very beautiful. The leaves are also enormous, being four to six feet in diameter, lying flat on the water, with peculiar turned-up margins. These gigantic leaves are sufficiently buoyant on the water to support the weight of a child of eight or ten years. This grand plant may be flowered outdoors in Summer by anyone who can provide a tank in which the water can be kept at 80 or 85 degrees. Plants, $5; seeds, 25 cents each.
BULBS FOR WINTER BLOOMING LILIUMS

No herbaceous border, shrubbery border, or wild garden, is complete without a liberal representation of these most graceful and charming flowers. For chasteness and beauty of color and magnificence of form the Lilium stands preeminent. Contrary to general expression, they are of the easiest culture and will thrive and bloom in almost any situation except dense shade. They are equally decorative and attractive as cut flowers for the house. In view of the rising popularity and increasing demand for these beautiful plants we have imported from all parts of the world varieties of great merit suitable for this climate.

We take pleasure in offering to our patrons the following superb collection, feeling assured that the returns will be more than commensurate with investment in the whole or any of the varieties.

Many of the kinds we can supply in thousand lots for mass planting. We shall be pleased to quote special prices to customers desiring to purchase in large quantities.

L. AURATUM (Golden-banded Lily). Appropriately called the queen of Lilies. Of all Lilies this is undoubtedly one of the finest, whether we regard its size, sweetness or its exquisite arrangement of color. Its large and graceful flowers are composed of six petals of a delicate ivory white color, thickly studded with chocolate crimson spots and striped through the center a golden yellow. From 6 to 20 flowers are produced on a stem, and as the bulbs acquire age and strength the flowers increase in size and number. Good bulbs, 8 to 9 inches in circumference, 10 cents each, $1 per doz., $7 per 100; fine bulbs, 9 to 11 inches in circumference, 15 cents each, $1.50 per dozen, $10 per 100; selected bulbs, 11 to 13 inches in circumference, 25 cents each, $2.50 per dozen, $15 per 100.

L. CANDIDUM (Madonna Lily). An old favorite; flowers are pure white and very fragrant. 15 cents each, $1.50 per doz.

L. SPECIOSUM (Lancifolium). The varieties of Lilium speciosum comprise the most important group of any one species. They are of easy growth and can always be relied upon to give satisfaction. The flowers are very beautiful, showy and distinct and exquisitely fragrant. Magnificent as border plants. They are also excellent for pot culture.

L. speciosum album. Large white flower of great substance, with a greenish band running through the center of each petal. Fine bulbs, 15 cents each, $1.50 per dozen; extra large bulbs, 20 cents each, $2 per dozen.

L. speciosum album Krantzii. One of the finest Lilies in cultivation, having white flowers, with dark orange colored anthers. 35 cents each, $3.50 per doz.

L. speciosum Melpomene. Very large flowers, rich blood crimson, heavily spotted. 15 cents each, $1.50 per doz.

L. speciosum roseum. White, shaded and spotted with rose. Fine bulbs, 15 cents each, $1.50 per doz.; extra large bulbs, 20 cents, $2 per doz.

L. speciosum rubrum. White, heavily spotted with rich crimson spots. Fine bulbs, 15 cents each, $1.50 per doz.; extra large bulbs, 20 cents each, $2 per dozen.

L. speciosum Schyrmakersii. Early and free flowering variety, producing many deep rose colored flowers spotted with purple. 25 cents each, $2.50 per doz.

L. LONGIFLORUM. A beautiful well known variety, with snow white trumpet shaped flowers that are very fragrant. Blooms in June and July. First class, 12 cents each; $1.25 per doz. Extra size, 25 cents each; $2.00 per doz.

We also carry a large stock of Tulips, Hyacinths, Narcissus and Daffodils, and many other varieties of Liliums. Any customer desirous of procuring a list of these varieties of Bulbs, will, with pleasure, be furnished the same upon application. We also carry these Bulbs in varieties such as are best adapted for outdoor planting or for forcing under glass.
Grape Vines—Small Fruits

Grape Vines and Small Fruits
For Forcing Under Glass

Foreign Grape Vines For Hot and Cold Graperies

We make a specialty of Grape Vines for Vineries, and supply fine and healthy two-year-old plants, guaranteed free from diseases, of the best selected sorts. One-year-old vines of any of these varieties may be had at prices one-third less than for two-year old. Special prices for large quantities will be given on application. All our vines are guaranteed true to name and variety.

We also carry a large stock of 5-year-old Canes. Price on application

Black Barbarossa. Berries round, very large; a very late sort; best suited for hot viney. $2.

Black Frontignan. Berries below medium size, flesh rich and juicy; a very reliable sort. $2.

Black Hamburg. Berries roundish oval, very large, juicy and rich; the most popular and most reliable sort in cultivation.

Black Prince. Berries roundish oval, juicy and rich; bunch long and tapering; best for cold vineyres. $2.

Black St. Peter. Black. Very fine dark variety, good free grower; best for hot viney. $2.

Canon Hall Muscat. Berries very large, roundish oval; juicy and rich; best for hot viney. $2.

Calabrian Raisin. Berries large, round and juicy; a first class white grape; late. $2.

Chasselas de Fontainebleau. Berries round and large, very juicy and sweet; a good sort for cold viney. $2.

Duchess of Buccleugh. Berries round and golden; good bearer; a very excellent grape. $2.

Golden Queen (Pearson's White). Bunch large and well shouldered; berries large, oblong; said to be the best late keeping white grape in cultivation; of strong and vigorous habit. $2.

Gros Colman. Berries round and extra large, of peculiar flavor; very large bunches of vigorous habit; a very handsome grape. $2.

Gros Morce. Berries large, ovate, dark plum color; flesh firm and juicy; bunches medium, and set freely. $2.

Lady Downes' Seedling. Black. Large aid handsome berries, above medium size; bunch medium, long, tapering, always well set; flesh firm, sweet and richly flavored; a good keeper and one of the best late sorts. $2.

Mrs. Pine (Black Muscat). Bunch large and tapering, well shouldered and handsome; berries medium and oval; flesh firm, rich and sweet, with true Muscat flavor; a late grape, and an excellent keeper; best for hot viney. $2.

Muscat Hamburg or Black Muscat. Berries very large, roundish oval; flesh melting, juicy and rich; a most delicious grape, with a distinct Muscat flavor; a valuable midseason variety; best suited for hot viney. $2.

Muscat of Alexandria. Greenish yellow, golden when fully ripened. Bunches large and shouldered, long tapered; berries large and oval; flesh firm, rich and sugary, with a delicious Muscat flavor; very prolific and requires high temperature; a very valuable and well known grape, ripening late; best for hot viney, $2.

Madresfield Court. Black Muscat. Bunch large and well shouldered; berries large, oblong, with a fine delicate bloom; flesh melting, juicy and rich, with a strong Muscat flavor; a valuable variety, of robust habit. $2.

Prince Albert. Berries large, in fine bunches; red, juicy and highly flavored; a very fine grape, and best suited for hot viney. $2.

Royal Muscadine. Berries round, of a pale amber when ripe; flesh firm, juicy and very pleasant; a very good grape of the Sweet-water type; sometimes called White Chasselas; suitable for cold viney. $2.

Royal Ascot. Bunches large; berries firm, jet black and very juicy, with a piquant plumlike flavor; best for hot grapeyres. $2.

Santa Cruz. White; large berries, large bunch; a vigorous grower and a very good sort. $2.

Tretham Black. Berries oval, large, very juicy and rich; a great bearer and a very good sort; best for cold viney. $2.

White Frontignan. Bunch medium; berries round and thickly set; flesh rich and juicy, of a distinct Muscat flavor; an excellent midseason variety; best for hot viney. $2.

White Niece. Large bunch, good cropper and a free growing sort; very sweet and juicy; ripens late; best for hot viney. $2.

White Tokay. Bunch large, compact and well shouldered; berries large and oval; flesh tender, rich and juicy, of a rich flavor; good keeper and vigorous grower; a well known and valuable grape; best for hot viney. $2.

White Sweetwater. Bunch medium; a well known variety. $2.

White Syrian. Berries oval, good size; bunches very large; best for hot viney. $2.

Wilmot's Hamburg. Berries jet black, much like the old and popular Black Hamburg; of a very agreeable and spicy flavor. $2.

POT GROWN FRUITS

Cherries, Peaches, Nectarines, Strawberries. Varieties and Prices on Application

The Largest Horticultural Establishment in America.
BAY TREES—Laurus Nobilis
(SWEET BAY)

No decorative plant can take the place of the classical Bay Tree, with its thick crown or pyramid of glossy leaves, for outdoor decorations, or for ornamenting halls, stairways, etc. We have a choice stock of these handsome trees, grown both as Standards and Pyramids.

We are the largest growers and importers of Bay Trees in the country, and have constantly on hand a fine assortment of various sizes and shapes. The illustrations on this and the following page show some of our extra-large specimen trees. On next page we quote the following prices on these trees, and shall be pleased to answer inquiries concerning them:
Bay Trees

Pyramidal-shaped

Each

5½ feet high, 24 inches in diameter at base, tapering to a point $10.00
7 feet high, 30 inches in diameter at base, tapering to a point $12.50
8 feet high, 36 inches in diameter at base, tapering to a point $15.00
8½ feet high, 40 inches in diameter at base, tapering to a point $22.50
9 feet high, 45 inches in diameter at base, tapering to a point $30.00
10 feet high, 50 inches in diameter at base, tapering to a point $35.00

Standard or Tree-shaped

Each

Stems 45 inches high, crowns 24 inches in diameter....... $7.50
Stems 45 inches high, crowns 35 inches in diameter........ $15.00
Stems 45 inches high, crowns 40 inches in diameter........ 10.00
Stems 45 inches high, crowns 45 inches in diameter........ 17.50
Stems 45 inches high, crowns 50 inches in diameter........ 22.50
Stems 45 inches high, crowns 50 inches in diameter........ 25.00

We are the largest dealers in America in large specimen Bay Trees, Pyramidal, Standard or Tree-shaped; and in large specimen Orange Trees, Camellias, Agaves and Oleanders, for the ornamentation of private estates.

The Largest Horticultural Establishment in America.
Our Rustic Construction Department

This is one of our leading Departments. We are the originators of many of the beautiful effects obtained in the building of Rustic Summer Homes, Bridges and Pergolas. No estate is complete without rustic effect. There are always hillsides, ravines, or woodland spots where nothing so appropriate can be used. Consultations free of charge.

A comfortable Piazza Arm Chair, which we make with oval as well as with square backs, and also with rockers. Made of Laurel roots; substantially and elegantly finished. Price, $8.

A Rustic Pagoda, substantial and handsome. Price, $75 to $200.

Settee of fancy pattern, built of Laurel roots and very substantial. Oiled and varnished; four sizes, 4, 5, 6 and 7 feet in length. Price, $10, $12, $15 and $17.50.

We furnish artistic and massive Rustic Work of all sorts and descriptions. Summer houses, arbors, bridges, bathing and well houses, gateways, lawn pagodas, settees and chairs, tables and rustic stands, vases and tubs—everything needed in this line we can supply in artistic designs and the best red cedar, finely finished. Further information on application.
**Vases, Tubs and Pots**

**Vases, Tubs and Pots**

No. 943. **World's Columbian Fair Vase**

*Two sizes*

20 inches high, 2 feet in diameter; capacity, 1½ bushels. $10 each.

27½ inches in diameter, 23 inches deep; capacity, 2½ bushels. $14 each.

No. 173. **In two sizes**

29 inches in diameter, 23 inches high; capacity, 3 bushels. $16 each.

25 inches in diameter, 21 inches high; capacity 1½ bushels. $12 each.

---

**Terra Cotta Flower Pots.** The construction of the rim permits the hands to firmly grasp it, ensuring lifting and moving the pot with facility.

- No. 14G, 12 in. high, 12¾ in. wide: $1.50
- No. 24G, 12 in. high, 17½ in. wide: $2.50
- No. 34G, 16 in. high, 19½ in. wide: $3.50
- No. 44G, 18 in. high, 21½ in. wide: $4.50
- No. 54G, 20 in. high, 24 in. wide: $8.00
- No. 64G, 24 in. high, 30 in. wide: $13.00

**Italian Flower Pots**

- No. 15G, 17 in. wide, 11 in. high: $2.00
- No. 25G, 20 in. wide, 12 in. high: $3.50
- No. 35G, 24 in. wide, 15 in. high: $5.50
- No. 45G, 27½ in. wide, 17 in. high: $8.00
- No. 55G, 30½ in. wide, 18 in. high: $12.00
- No. 65G, 37 in. wide, 22 in. high: $18.00
- No. 75G, 43 in. wide, 24½ in. high: $40.00

**Simple and Cheap Plant Tubs.** Made of hard wood, steel wire hooped, painted green:

- No. 1, 14 in. in diameter, 12 in. deep: $1.00
- No. 2, 15 in. in diameter, 12½ in. deep: $1.25
- No. 3, 17 in. in diameter, 14 in. deep: $1.50
- No. 4, 19½ in. in diameter, 14½ in. deep: $1.75

---

No. 373. **Italian Flower Pot**

26 inches in diameter, 22 inches high; capacity, 2 bushels. $13.50 each.
Columbia Flower Tubs. These tubs are made from the best cypress lumber, and will last for years without decay. They are held together by two heavy steel wires, which are connected with substantial iron handles, and are so arranged that the wire can be tightened or loosened simply by turning a nut on the handle. They are finished in natural wood, varnished, or we can furnish them painted, but to order only.

12 in. in diameter, 11 in. deep. $1.00
15 in. in diameter, 14 in. deep. $1.50
18 in. in diameter, 16½ in. deep. $2.00
21 in. in diameter, 18½ in. deep. $2.50
24 in. in diameter, 20½ in. deep. $3.00

Larger sizes made to order.

Price No. 1 is for tubs with iron bands and feet, for outdoors.

We also wish to state that we manufacture Tubs in many other designs and sizes in addition to those herein stated. One of our specialties is Cedar Tubs, either square or round, making them in stands, from one to eight on a stand, used for lawn decorations. We would be pleased at any time to furnish sketches or drawings of many other designs.
SUPPLIES AND REQUISITES

Including many articles essential in Gardens and Greenhouses

W have arranged to supply our customers with the many essentials required in garden and greenhouse work, some of which are not readily accessible, or cannot well be procured of proper quality for the purpose intended. Orchid growers, especially, will find our peat, moss, cylinders, cribs, rafts, etc., the very best for the purpose, and of moderate price.

MATERIALS FOR ORCHID CULTURE
(Also for Nepenthes and Sarracenias)

RAFTS, CYLINDERS and CRIBS. Made of hard wood, put together with copper wire and brass nails.

Cribs.
Per doz.—4 inch, $2; 5 inch, $2.25; 6 inch, $2.50; 7 inch, $2.75; 8 inch, $3.00; 9 inch, $3.50; 10 inch, $3.75; 11 inch, $4.20; 12 inch, $4.50.

Rafts.
Per doz.—7 inch, $1.50; 8 inch, $2; 9 inch, $2.25; 10 inch, $2.50; 11 inch, $2.90; 12 inch, $3.25; 14 inch, $3.50; 16 inch, $3.75.

Cylinders.
Each.—8x12 inch, $1; 10x14 inch, $1.25; 12x18 inch, $1.50; 14x25 inch, $2.

ORCHID POTS. All sizes supplied at manufacturers’ prices; send list of your wants.

Special prices for large quantities.

PEAT, FIBROUS, of best quality. The proper article in which to grow most orchids is our fibrous peat, which is really the fine wirelike roots of hard wooded vegetation, combined with a proportion of decomposed wood. The fibrous parts is separated from the finer decomposed material by drying and shaking the large clumps or cakes as received, and is really the very best thing in which to grow orchids, affording proper support and perfect drainage. In practice, it is used with about one-fourth of sphagnum moss, chopped up with it and thoroughly mixed. The finer portion of the peat, as shaken out, is a very good material, when mixed with good loam, in which to grow palms, ferns and all store plants. We claim that our fibrous peat for orchid culture is of superior quality; nowhere else have we found peat to equal it. Our peat is taken from upland bogs, and does not rot or decay quickly, as is generally the case with peat which is taken from wet, marshy places; it will not sour. Anyone familiar with the appearance of the healthy stock throughout all the orchid houses at Rose Hill well knows that the quality of peat and the best quality of live sphagnum moss contribute considerably to the general good result. Fibrous peat, per bag, $2; per barrel, $2.50; prices for larger quantities on application.

LIVE SPHAGNUM MOSS. First quality, short variety, upland grown, $3 per barrel; second quality, long variety, swamp grown, $2.50 per barrel.

Dead or Dry Moss. Excellent for mixing with peat for potting material, and also good for packing, $2 per barrel. Prices for larger quantities on application.

POTTING MATERIAL

Suitable for Palms, Stove Plants, Ferns and New Holland Plants; also for Rhododendrons and Azaleas for Pot or Outdoor Culture

COCOA NUT FIBER. The real article, in the fine hairlike state; the best thing for perfect drainage in flower pots or tubs. Per barrel, $3; smaller quantities in proportion.

FINE PEAT, not fibrous. Per bag, $1.50; per bbl., $2.

LEAF MOLD. Per bag, $1; per barrel, $1.50.

PEAT and LEAF MOLD MIXED. Per bag, $1.50; per barrel, $2.

INSECTICIDES

Preparations which will keep your plants from being infested with insects; use them in time, and avoid injury; prevention is far better than cure.

TOBACCO JUICE. Chemically prepared with other ingredients. Will keep roses, chrysanthemums, carnations, bouvardias, orchids, palms, foliage and many other plants free from the green and black aphis, the rose bug, red spider, and green worm, known as the “spanner”; also mealy bag, scale, etc. Should be applied with a syringe three or four times in succession where the least sign is shown of their appearance; it is diluted with water. Quart bottles, 50 cents; per gallon, $1.50, in one to five gallon cans. Full directions given with each bottle or can.

TOBACCO DUST. This is a splendid insecticide for general use, and the best article for dusting vegetable plants, such as melons, cucumbers, etc., as it quickly destroys the flea and the striped beetles which feed upon the leaves; it should be sprinkled upon them while moist. Sprayed upon the ground it keeps off earth insects, and acts as a fertilizer. Per lb., 8 cents; 10-lb. pkg., 60 cents; 100 lbs., $5.

TOBACCO SOAP (Rose Brand). Makes an excellent wash for plants and trees infected with green fly, lice and eggs of insects. Dissolve two ounces in a gallon of water. ½ lb. tins, 25 cents. In 10, 25 or 50-pound cans, $1, $10 and $18.

SIEBRECHT’S TOBACCO POWDER. Chemically prepared. This is the only article used with effect for destroying thrips which infest orchards. In canisters, 50 cents each.

TOBACCO STEMS FOR FUMIGATING. Clean and free from rubbish. In bales of 100 lbs., $1.50 each; about 500 pound bales, $6.

FIR-TREE OIL. This insect destroyer has proved to be most effective for red spider, green fly, mealy bug, caterpillars, slugs, blight, etc. Dilute with water and apply with ordinary or bellows syringe, or by dipping the plants in it. Price, with full directions, ¼ pint bottle, 50 cents; pints, 75 cents; qt., $1.50; ½ gal., $2.75; gal., $5.

LITTLE ANTIPEST. One of the safest and most powerful insect destroyers: it kills the pests every time. In liquid form, diluted with water, $2.80 per gal.

WHALE OIL SOAP. Makes an excellent wash for trees and plants; kills insects and eggs on the bark. Per lb. 12 cents; 5 lbs., 50 cents; 25 lbs. and over, 8 cents per lb.

The Largest Horticultural Establishment in America.
HELEBORE. Powdered White Hellebore for rose slugs, currant worms, etc. Dust on with gun or bellows while the foliage is moist. A small quantity of flour is sometimes mixed with the powder when it is applied, to give adhesiveness. Price 30 cents per lb.

SULPHUR, Flowers of Sulphur. This is a staple article for greenhouse use; mixed with linseed oil and painted on the pipes it has been found a sure cure for mildew. It should be painted to the consistency of a thick paste and applied with a brush. In packages of 5 and 10 lbs., 30 and 50 cents each.

SLUG-SHOT. Destroys all insects injurious to house and garden plants, shrubs, trees, vines, potatoes, melons, cabbage, currants and vegetables and fruits of all kinds. Equals Paris green, where used liberally, without the danger from poison. Prices, 5 lb. ptk., 30 cents; 10 lbs. 50 cents; per bbl. of 255 lbs., 4 cents per lb.

HAMMOND’S GRAPE DUST. A preparation to kill the destructive mildew that strikes the grape vine, affecting fruit and stems in unfavorable seasons. Also for like use upon any other plants or trees affected with mold, mildew or rust mites, and for any use where a fumigator or antiseptic is required, either in greenhouses or the open air. It is superior to the majority of liquid remedies used for this purpose, and can be more easily handled and applied. 5 lb. ptk., 35 cents; bags of 100 lbs., $5.

THOMPSON’S “SURE KILL”

is used exclusively at the Rose Hill Nurseries, which are noted for their large collection of ornamental trees, shrubs, evergreens, also the largest collection of palms, orchids, ferns and trees.

SIEBRECHT & SON, Sole Agents

The most satisfactory Shading ever used. Never gets out of order. Lasts as long as a good Greenhouse.

How It Is Made and Operated — The shading is made of slats, which are of the best chestnut wood. It is arranged in sections, either 6½ or 8 feet wide, but can be made any width and length to suit size of roof. These slats are fastened together very substantially with galvanized wire bands and rings. The chain-like fastenings are from 16 to 18 inches apart, each section of Shading having a roller attached to the lower end, the upper portion being fastened to the ridge of the house or highest point to be shaded. By means of a pulley and line it is easily rolled up and down at whatever distance may be desired. It can be operated inside or outside of the house. It will protect your glass from hail storms, and your plants from the intense heat in Summer, and from severe cold in Winter. Does not get out of order; does not destroy paint, putty or glass, as is the case with the old-fashioned method of white wash or paint. It gives your house an even and cooling shade and a neat appearance. It can be rolled up and down at will, which is a great advantage, especially when the short dark days come and only a little shading is needed. Estimates given on application.
Grass Seed—Fertilizers

LAWN GRASS SEED AND FERTILIZERS

**SIEBRECHT'S LAWN GRASS SEED.** One of the best lawn mixtures, which we make ourselves, using our own formula. We have always had the best results from it and it gives entire satisfaction. Pk. $1.25, bus. of 20 lbs. $4.50.

**SIEBRECHT'S GREEN VELVET LAWN GRASS SEED.** This is one of the greatest and most satisfactory lawn seed mixtures ever used. It produces the quickest lawn and grows so evenly and thickly that it gives the effect of green velvet cloth. The proportion of the several varieties is so exact, and they are so evenly mixed, that it never fails to give entire satisfaction. Bus. of 20 lbs. $5.

**SIEBRECHT'S SHADY NOOK GRASS SEED.** This gives the best results in shady places. Bus. of 20 lbs. $5.50.

**SIEBRECHT'S SPECIALLY PREPARED GRASS SEED FOR TERRACES, TENNIS COURTS, AND GOLF LINKS.** Bus. $5.50.

Note.—Our bushel is based upon a full weight of 20 lbs., and that weight is guaranteed in every bushel of seed. On larger quantities we shall be pleased to submit estimates.

SIEBRECHT'S ROSE HILL BRAND LAWN ENRICHER AND PLANT FOOD. The best Lawn and Garden Dressing. This is a fertilizer specially made for the Rose Hill Nurseries, and has stood the test of time and use. It has always been found to be a perfect lawn enricher, producing the best and greatest amount of nourishment. It can also be used in the vegetable garden or in the greenhouse. We have two qualities, put up in bags or barrels, at the following prices: Siebrecht's X, ton, $27.50; Siebrecht's XX, ton, $32.50.

FERTILIZERS

We offer here some pure natural fertilizers. There is nothing like the genuine article for plants. Can be used with great satisfaction on most all plants in this catalogue, either in liquid form or mixed with the soil.

**EXCELSIOR FERTILIZER.** Specially prepared plant food, put up in small quantities for conservatory and house plants; a very good article for its purpose. 20 cents per package.

**PURE GROUND BONE MEAL.** Coarse or Fine, for mixing with soil for potting or planting out roses, either in the greenhouse or outdoors; also essential for grape borders, in proportions of one to fifty. This is one of the best and most permanent fertilizers.

Coarse Ground Bone, in about 200 pound barrels, $2.75 per 100 pounds, $42 per ton.

Fine Ground Bone, in barrels of about 200 pounds, $2.75 per 100 pounds, $42 per ton.

**PURE SHEEP MANURE.** The best natural manure in the market is compressed sheep manure. It comes in cakes. These are soaked in water, and the liquid is the best and purest medium for fertilizing pot plants of any kind. House and window plants are greatly benefited by the occasional application of this most excellent and economical fertilizer. Per bag of 100 lbs., $2.75; per ton, $90.

**LAWN FERTILIZER.** Siebrecht & Son's Special Brand. Odorless; a little can be used all through the season; tested by leading agricultural chemists; will produce richer lawns than any other used. Per 100 pounds, $2, about 250 pounds to the barrel; $37.50 per ton.

The Largest Horticultural Establishment in America.
Our City Office—Siebrecht Building

Is located in the centre of the Metropolis, corner of 38th Street and Fifth Avenue, only a short distance from the Grand Central and the Pennsylvania R. R. Depots.

Here orders are received for Wedding Decorations and other social functions and from hence flowers are shipped to all parts of the country.

Flowers sent by our special arrangements to all parts of the civilized world.

A special feature of our Decorative Department is the artistic embellishment of parlors and churches for weddings or other social events of like character. With unequaled resources and long experience, we can assure satisfactory results.

OUT-OF-TOWN DEPARTMENT.

We make a specialty of decorations out of the city. We have specially trained and experienced men, who are artists in this line and who are constantly getting up new designs and arrangements for decorations. Careful attention is always given to orders for out-of-town work, and satisfactory results can be assured.
