CUCUMBER

CUCUMBER

"PERFECTION RIDGE"

(OUR OWN RAISING.)

This, as will be seen by the accompanying illustration, is a greatly improved ridge variety. It has been obtained by crossing Japanese Pole with Telegraph, and fortunately it inherits most of the good qualities of both parents. It is vigorous in growth, free in setting, and has the flavor of the Telegraph Cucumber. The fruits are a pleasing green, moderately spined and handsome in shape, and vary from 12 to 15 inches in length. They are produced with the freedom characteristic of the Japanese Pole Cucumber, but have the length and symmetry of the Telegraph.

The plants also inherit the robust constitution and hardiness of Japanese Pole, and can be grown on ridges, or trained on wires or poles. When grown in either way it will be found a most satisfactory and profitable variety. Price 15c Pkg.

"PERFECTION RIDGE"

The Great Ismene

(Ismene Calathena Grandiflora)

Those who are familiar with the true Giant Ismene cannot say enough in praise of its beauty and purity. The flowers are of a very large size, like an Amaryllis, novel form and of snowy whiteness, and are also exceedingly fragrant. It is really one of the most lovely of all the great Amaryllis tribe, having a peculiar grandeur which one can appreciate at sight, but cannot describe. Bulbs are large and strong and begin to flower in two or three weeks after planting, sending up tall flower stems, which bear several of its magnificent blossoms.

BULBS 15c

EXTRA EARLY MAYFLOWER CORN

Extra Early Mayflower Sweet Corn is the earliest of all the Extra Early Sweet Corns; has a large 8 or 10 rowed ear, well filled from tip to butt of the ear with large luscious kernels; in point of productiveness outyields two to one any of the Extra Early varieties. For the market gardeners this is one of the most valuable novelties placed on the market in many years. We cannot recommend this variety too highly to the market gardener or the private planter who wishes to beat out his neighbor by a few days in an extra early corn. Price 10 cts. Package, 30 cts. Pint, 50 cts. Quart.

MUZZY EXTRA AMAGAR

"Danish Ballhead"

Tall stemmed, head round, white, late, very hard, good for winter keeping. Especially recommended for low, moist and heavy soil.

Oz. 35c $\frac{1}{4}$ lb. \$1.00 lb. \$3.50

MUZZY IMPROVED AMAGAR

"Danish Roundhead"

Short stemmed, two weeks earlier than above, head round, large, good for winter keeping. Is especially recommended for high and light soil.

Oz. 35c $\frac{1}{4}$ lb. \$1.00 lb. \$3.50

NASTURTIIUM

Nasturtium: (Spencer, David Burpee) New. One of our this years novelties which we can strongly recommend. Its very peculiar wavy emerald green foliage is different from any known variety, (something like the flowers of Germania pansies). The plants grow very compact, and the fine velvety purple scarlet flowers borne on long steels come out extremely workingly upon the magnificent foliage. For bordering purposes the most magnificent sort. From seed comes so to say, fully true. Very recommendable.

PRICE 10 cts. PACKAGE

PANSY

Pansy. English, Finest, First Quality, Extra, exceedingly fine mixture of colors, not only containing the so-called faced variety, but completed by self-colored ones, as black, white, yellow, etc., giving on a whole a remarkably fine display of colors.

PRICE 10 cts. PACKAGE

TOMATO "KONDINE RED"

This new Tomato is the result of a cross between Holmes' Supreme and Lawrenson's No. 3. It has the free setting qualities of both parents, and the dwarf compact habit of the former. The fruit is round, smooth, handsome, of a brilliant red color, and of medium size.

The raiser states that the plant is of exceptionally heavy growth, free from disease, and a very heavy cropper. It has been largely grown in the Channel Islands the past season, and the fruit has invariably fetched top prices.

PRICE 25 cts. PACKAGE

CLARKIA ELEGANS FL. PL. "VESUVIUS"

(OUR OWN RAISING)

Very great progress has been made the last two of three years in the selecting of these tall growing varieties of Clarkias. The one we now offer has been raised at our Feltham grounds, and is quite fixed in character.

The colour is an intense orange scarlet shaded salmon, a most lovely and pleasing colour. The plants grow about 2 feet in height, and make a charming plant either for pot culture or open ground. Each plant is of upright habit, and forms quite a pyramid entirely covered with its showy flame-coloured flowers.

We can strongly recommend this variety as a grand addition to the hardy annual section. Package 15 cts.

Nasturtium. We have imported direct from Holland some new varieties of nasturtium, both tall and dwarf, in the separate colors, and ivy leaved varieties.

Ivy Leaved. Dark Leaved, Fiery scarlet, laciniated flowers. (Tall) Price 25cts. an oz., 10 cts. a package.

Queen. A new mixed variety, containing several new hybrids of the Queen Type, of about 6 or 7 new colors. (Tall) Price, 25 cts oz., 10 cts. package.

Empress of India. Brilliant, Dark Scarlet, of Dwarfish growth, extra dark leaved. 5 cts. package.

MUZZY BROTHERS ANNUAL SEED CATALOGUE FOR 1912

PRICES SUBJECT TO CHANGE

Muzzy Brothers give no warranty, express or implied, as to the description, quality, productiveness or any other matter of any seeds, bulbs or plants they send out, and they will not be in any way responsible for the crop. If the purchaser does not accept the goods on these terms, they are at once to be returned.

ARTICHOKE

German, Artichoke; French, Artichaut; Spanish, Albachofa.

	Per. oz.	¼ lb.	Per. lb.
French Globe.....	\$0 35	\$1 00	\$3 50
The Seeds should be sown early in the spring, in drills an inch and a half deep, and one foot apart. The next spring transplant to permanent beds, in rows or hills three feet apart and two feet between the plants. Plant in a deep rich, moist loam, and the plants should be protected in winter by a covering of leaves or coarse manure. A bed will continue bearing for several years.			
Jerusalem Artichoke, Tubers.....			qt. 25cts.

ASPARAGUS

German, Spargel; French, Asperge; Spanish, Esparrago.

	Per oz.	¼ lb.	Per lb.
Columbia, producing pure white shoots	\$0 10	\$0 20	\$0 60
Conover's Colossal	10	20	50
Palmetto, a light green variety.....	10	20	50
	Per 100	Per 1000	
Roots Colossal, 2 yrs.	\$0 90	\$6 00	
“ Palmetto, “ “	90	6 00	
“ Columbia, “ “	90	6 00	

Sow the seeds early in spring, in drills 15 inches apart, and about a dozen to the foot in the drill; keeps the soil mellow and free from weeds during the summer, and in the succeeding spring transplant to permanent beds which should be done in the following manner as described by a cultivator of Oyster Bay Asparagus.

Plant on sandy soil. To grow Asparagus in perfection, the soil need not necessarily be richer than it must be to produce a good crop of Corn. Some experiments have shown that by heavily manuring the crop cannot be made permanently greater than by moderate dressings. It is not desirable to plant them out very early; more plants will fail to grow than when the planting is deferred until the soil is dry and warm.

In planting for private use, set out in rows two feet apart, and allow twelve inches in the row. Set the plants at least six inches below the surface. For market on a large scale, set four feet apart one way and two the other which will allow the use of a horse and cultivator to keep the weeds under.

ASPARAGUS

BLACK VALENTINE

BEANS

German, Gartenbohne; French, Fève de Marais; Spanish, Hava
English or Broad

Per pt. Per qt.

Early Mazagan, prolific, very early..... Crop doubtful
Broad Windsor..... \$0 30 \$0 50
Sword Long Pod..... Crop doubtful

This class is very hardy and should be planted as soon as the soil is in good state in the spring. Plant four inches apart and two inches deep in drills four feet apart. To insure well filled pods, pinch off the tops as the lower pods begin to set.

Dwarf Green Podded Snap Beans

Per qt. ½ pk. pk. bu.

Valentine Black, long, round, green, solid pod, very early. (See Novelties)..... \$0 25 \$0 85 \$1 50 \$5 00

Valentine, Giant Stringless, about seven days later than extra Early Valentine. Slightly curved pods, brittle and stringless; a strong grower and good yielder..... 30 1 00 1 75 6 00

Valentine, Early. Productive, tender and of excellent flavor..... 25 85 1 50 5 00

Livingstone's Round Pod Six Weeks Bean..... 25 85 1 50 5 00

Muzzy's Stringless Green Pod, the best stringless bean grown. Ten days to two wks. earlier than the Valentine; pods full and

fleshy, extremely crisp and absolutely stringless. Very productive... 30 1 00 1 75 6 00
Early Mohawk, very productive and of good quality..... 25 85 1 50 5 00
Long Yellow Six-Weeks, early, excellent variety for general crop..... 25 85 1 50 5 00
Fulmers Forcing, fine dwarf forcing variety..... ½ pt. 50
Extra Early Refugee, similar to late Refugee, pods two weeks earlier..... 25 85 1 50 5 00
Refugee or Thousand to One, very early and prolific. The pods are round and full, stringless and of fine quality..... 25 85 1 50 5 00
Burpee's Bush Lima, beans are large as Large Pole Lima, stout growth, branches vigorously, bearing 50 to 200 large pods well filled with very large beans..... 35 1 25 2 00 7 00
Burpee's Improved Bush Lima, an improved strain of B. B. L., much larger pods and beans, enormously productive; extra early..... 35 1 25 2 25 8 50

Swiss Chard. Used for its leaves, which are cooked as spinach.....	10	20	60

BEETS—Continued

MANGEL-WURZEL AND SUGAR

Varieties used for feeding stock. Sow 6 lbs. per acre.

	Per oz.	$\frac{1}{4}$ lb.	lb.
Mammoth Red Mangel-Wurzel. Producing roots of mammoth size, very regular, and with a small top. 10 lbs. and over 25c lb.	\$0 10	\$0 15	\$0 40
Yellow Globe Mangel-Wurzel. Roots very large and globular. 10 lbs. 25c lb.	10	15	40
Long Yellow Mangel-Wurzel. Good for general crop. 10 lbs. 25c lb.	10	15	40
Golden Tankard Mangel-Wurzel. A new and very valuable variety of fine form and sweet flavor, bright yellow in color, when cut it shows interior ring, similar to most varieties of garden beet. 10 lbs. 30c lb.	10	15	40
White Silesian Sugar Beet. Extensively grown for feeding stock and manufacture of sugar.	10	15	40
Vilmorin's Improved Sugar Beet. An improved variety.	10	15	40
Lane's Improved Sugar Beet. Improved variety of the French Sugar Beet. obtained by careful selection in this country. 10 lb. 25c lb.	10	15	40

A rich, deep open soil is the best suited to the culture of Beets. Fresh manure is undesirable but land that has been well manured the previous year is highly suitable. For an early supply sow in the spring as soon as the ground becomes fit to work, in drills about one foot apart and two inches deep. For main crop sow the first week in May, and for winter use sow in June. When the plants have obtained three or four leaves, thin out, so that they may stand eight or nine inches apart. Keep free from weeds by hand weeding and hoeing. Those intended for winter use may be taken up in October, and stored in dry sand in the cellar or outhouse. Before storing, leaves and fibers must be cut off, but care must be taken not to bruise the main root.

BORAGE

German, Borritsch; French, Bourrache; Spanish, Berraja.

	Per oz.	$\frac{1}{4}$ lb.	lb.
Borage , used as a pot herb; also as a salad, or can be boiled, and also for garnishing, but chiefly required for claret cups and other cooling drinks. Bees are very partial to the flower.	\$0 10	\$0 30	\$0 90

BROCCOLI

German, Spragel Kohl; French, Chou Brocoli; Spanish, Broculi.

	Per oz.	$\frac{1}{4}$ lb.	lb.
Early White , heads medium size, compact, creamy white color, most certain to head.	\$0 30	\$0 85	\$3 00
Purple Cape , differing from the preceding color, greenish purple.	35	1 25	4 00
White Cape	45	1 50	5 00
Mammoth White	35	1 25	4 00

A favorite European vegetable, nearly allied to the Cauliflower, but more hardy and surer to head; the seeds should be sown in this district in the early part of May, and transplanted in June; farther south the sowing should be delayed until June or July, and the transplanting accordingly from August to October. In parts of the country where the thermometer does not fall below 20 or 25 degrees, broccoli may be had in perfection from November until March. It succeeds best in a moist and rather cool atmosphere.

BRUSSELS SPROUTS

German, Sprossen-Kohl; French; Chou de Bruxells, Spanish, Breza de Brusels.

Improved Seed, (French) half dwarf, oz. 20c, $\frac{1}{4}$ lb. 60c, lb. \$2.00.

Dalkeith Dwarf Improved, a variety producing compact sprouts of excellent quality, oz. 20c, $\frac{1}{4}$ lb. 60c., lb. \$2.00,

A tender, delicious vegetable. The plant grows two or three feet high, and produces from the sides of the stalks numerous little sprouts, one or two inches in diameter, resembling cabbage. The leaves, which look like a Savoy should be broken down in the fall, to give the little cabbages room to grow. They are very tender and sweet after early frosts. Sow early in hot-beds, or in seed-beds in May transplant and cultivate like cabbage.

CABBAGE

German, Kopfkohl; French, Chou; Spanish, Berza de repollo

	Per oz.	½lb.	1lb.
All Seasons , fine variety, for second early or late growing good size	\$0 20	\$0 60	\$2 00
Early Jersey Wakefield . The leading variety for market, very early of medium size, good quality, sure to head.	30	85	3 00
Early Flat Dutch . This is one of the best early cabbages in cultivation	20	60	2 00
Early Summer . A valuable early sort resembling the Early Flat Dutch	20	60	2 00
Early Winnigstadt . Heads large, one of the best for general use	25	75	2 25
Fottler's Improved Brunswick . This is the very fine second early variety	20	60	2 00
Henderson's Succession . A second early or late variety, a sure header: seeds sown in March produce large heads in June	35	1 00	3 00
MUZZY EXTRA AMAGAR DANISH BALL-HEAD . Large, round, solid sweet and crisp, sure header. (See Novelties)	35	1 00	3 00
Large Late Drumhead . An excellent fall and winter variety, grows to a large size	25	75	2 50
Large Late Flat Dutch . The most popular variety for late cultivation	20	60	2 00
Red Stone Head . Used almost exclusively for pickling	40	1 25	4 00
Drumhead Savoy (American) . The largest heading sort, of excellent flavor	25	75	2 50
MUZZY IMPROVED AMAGAR DANISH ROUND HEAD . (See Novelties)	35	1 00	3 00

For very early use plant in the autumn from 10th to 25th, September, in a seed bed, and protect in cold frames during the winter, being careful to set them down to the first leaf. Transplant in the following spring, as the soil will admit. For autumn and winter use, plant in seed-bed in May and early part of June, and when six inches high transplant into rich soil, two feet apart each way for the early varieties, and three by two and a half feet for the large winter varieties. To secure the best results, the soil should not be too dry, but should be thoroughly enriched, and the crop should be hoed at least once in ten days. Sow in hotbed early in spring, seed of the early kind for a second crop; also the late varieties for winter use.

CARROT

German, Moehren; French, Carotte; Spanish, Zanah.

	Per oz.	½lb.	1lb.
Early French Forcing . The earliest variety, valuable for forcing; root small and of fine flavor	\$0 20	\$0 60	\$2 00
Early Round Parisian . Small for frames or open ground	20	60	2 00
Early Scarlet Horn . Old and favorite sort, much esteemed for early summer	15	50	1 50
Half Long Danvers . A variety intermediate in size and period of maturity between the preceding and the Long Orange	15	50	1 50
Half Long Stump Rooted Chantenay . Like Nantes, broader shoulder	15	50	1 50
Half Long Pointed	15	50	1 50
Half Long Stump Guarande or Oxheart	15	50	1 50
Half Long Stump Nantes	20	60	2 00
Carentan . A new early variety without core. It is an excellent sort for forcing, or used as an early kind for planting in the open ground	20	60	2 00
Long Orange Improved . Roots of large size, equally adapted for garden or farm culture	15	50	1 50
Large White Belgian . Grown almost exclusively for stock	10	20	60

CARROT—Continued.

The Carrot, like other root crops, delights in a sandy loam, deeply tilled. It should never be sown on newly manured ground as forked roots are sure to be the result. It is best to sow on ground that has been well manured the previous year for some other crop such as celery, Potatoes, Onions or Peas, but avoid such crop as Cabbage and Turnips, or any of the tap rooted sections. For early or main crops sow the latter part of April; for later crops, they may be sown any time until the beginning of June. Sow in rows about 15 inches apart and half an inch deep, thinning out to three or four inches between the plants.

CELERIAC**CELERIAC****TURNIP ROOTED CELERY**

German, Knob-Celeri; French Celeri Rave.

Erfurt. For soups. oz. 15c. $\frac{1}{4}$ lb 50c. lb. 1.50.

Algiers. Popular late variety, sure to head, excellent for market. Pkt. 10c., oz. 60c., $\frac{1}{4}$ lb. 2.00, lb. 7.00.

Early London. Pkt. 5c., oz. 30c., $\frac{1}{4}$ lb. 1.00, lb. 3.50.

DENMARK, Special Large Late. Very fine variety, large white compact heads, necessary that distance between plants be greater than other varieties, Pkt. 20c, oz. 1.00, $\frac{1}{4}$ lb. 2.00. (See novelties.)

Cauliflower delights in rich, moist soil and in dry seasons should be abundantly watered. The seeds may be sown in September and wintered over in the same manner as described for early cabbage. Where this is not practicable, it may be had nearly as well by sowing the seed in the hot-bed in January or February and transplanting the plants at two or three inches apart in boxes, or in the soil of another hot-bed, until such time as they are safe to be planted in the open

CAULIFLOWER—Continued

ground, which in this latitude, is usually from the 15th of March to the 10th of April. If properly hardened off, they are seldom injured by being planted out too early.

CELERY

German, Celeri; French, Celerei; Spanish, Apih.

	Per oz.	$\frac{1}{4}$ lb.	lb.
Johnson's Manhattan	pkt. 15c \$0 50	\$1 25	
Thorburn's Fin de Siecle	20	60	\$2 00

Perle Le Grande. Full Golden Heart, good keeper	20	60	2 00
Sandringham Dwarf White, Soup Celery. An imported variety of fine flav or: soup greens	10	30	1 00
Boston Market. An excellent dwarf, growing white variety	20	50	1 75
Covent Garden Rose. Pink variety, good flavor	25	75	2 50
Celery Seed for Flavoring	05	10	35

The seeds may be sown in the open ground in April, as soon as the ground can be nicely worked. Sow about half an inch deep, and be careful to firmly press the soil over the seed; this should be done by treading over the rows with the feet after sowing; this prevents the air drying up the seed, which thereby loses its vitality and fails to germinate. Many valuable crops are annually lost by inattention to this important particular. After the seed is up, keep carefully clear of weeds until the time of planting June and July; the crops may be shorn off once or twice before planting; this makes them "stocky" and they suffer less in being transplanted. After the ground has been well prepared, plant in rows from three to four feet apart, according to the variety, setting the plants about six inches apart and pressing the soil firmly about the roots.

CHERVIL

German, Bisenlauch; French, Cerfeuil;
Spanish, Cerafolio

	Per oz.	$\frac{1}{4}$ lb.	lb.
Curled	\$0 10	\$0 30	\$1 00
Common or Tuberous Rooted	10	25	75

The young leaves are used in soups and salads. Sow thinly in May, in drills half an inch deep, one foot apart.

JOHNSON MANHATTAN

CHICORY

German, Chicorie; French, Chicoree Saur; Spanish, Escarola.

Per oz. $\frac{1}{4}$ lb.   lb.

Common. This variety produces the "Barbe de Capucin," a salad much used in France. Sown in June the roots are transplanted in autumn into sand in a cellar; the shoots which will come up soon from the "Barbe de Capucin" -----

\$0 20   \$0 50   \$1 50

Large Seeded	\$1 10	\$0 25	\$0 75
Lettuce Leaved	10	30	85
Small Seeded	10	25	75

Corn Salad, Feticus or Lambs Lettuce is used to a considerable extent as a salad. It is sown on the first opening of spring in rows one foot apart and is fit for use in six to eight weeks from the time of sowing. If wanted to come out early in spring, it is sown in September, covered up with straw or hay as soon as cold weather sets in and is wintered over the same way as Spinach.

CORN---Sweet

German, Zucker Welshkorn; French, Maise de Sucre; Spanish, Maiz de Azucar

FOUTERS EARLY SWEET CORN

CORN—Continued
EXTRA EARLY VARIETIES

	Per ear	100 ears.	qt.	½pk.	pk.	bu.
Mayflower Extra Early. Earliest of all the Extra Early sweet corn. See Novelties. Pkg 10c., Pt. 30c., Qt. 50c.

Early White Cory. Earliest grown, fit for use 60 days after planting. Very sweet, good size, white cobs.	\$0 05	\$3 50	25	75	1 25	4 00
Mammoth White Cory. Ears double size of the old Cory			25	75	1 25	4 50
Perry's Hybrid. Very early and of large size; extra early.....	05	3 50	25	75	1 25	4 00
Early Minnesota. Very early; ears fairly sized and uniform, plants rather dwarf; one of the best early kinds; extra early.....	05	3 50	25	75	1 25	4 00

SECOND EARLY OR INTERMEDIATE

Early Champion. Large ears, very sweet and productive. The earliest large sort grown and fine for either home or market use.....	05	3 75	25	75	1 25	4 50
Early Mammoth. Large and not very late; general crop.	05	3 50	25	75	1 25	4 00
Crosby's Early Sugar. Early sorts; ears short, from 12 to 16 rows, second early.....	05	3 75	25	75	1 25	4 00
Moore's Early Concord. Ears large and well filled from 12 to 20 rows; second early.....	05	4 00	25	75	1 25	4 00
Early Evergreen. A second early variety, resembling Evergreen; general crop.....	05	3 75	25	75	1 25	4 00
Stablers Early. Large and for second early.....	05	4 00	25	75	1 25	4 00
Folters Early. Excellent, medium early, large size, sweet.....	05	4 00	25	75	1 25	4 00
Black Mexican. One of the sweetest varieties.....			25	75	1 25	4 50

GENERAL CROP AND LATE

Stowell's Evergreen. A late variety, of excellent quality, remaining longer in the green state than any other; general crop.....	05	4 00	25	75	1 25	4 00
Hickox Improved. A new variety of superior excellence is 12 rowed, straight and handsome; a superior market kind; general crop.....	05	4 00	25	75	1 25	4 00
Mammoth Sugar. A late variety of large size, very sweet and immensely productive. A leading variety.	05	4 00	25	75	1 25	4 00
Country Gentleman. The sweetest and most tender of all sweet corn, late crop.....	05	4 00	25	75	1 25	4 50
Moonachi or Sugar. Tender, sweet and productive; general crop.....	05	4 00	25	85	1 50	4 50
Sweet Fodder. For ensilage.....			20	60	1 00	3 00

Sweet corn may be either sown in rows, four and a half feet apart, and the seeds planted at about eight inches in rows, or planted in the hills, at distances of three or four feet each way, according to the variety grown, or the richness of the soil in which it is planted. The taller the variety or the richer the soil, the greater should be the distances apart. The first plantings in this vicinity are made about the middle of May, and successive plantings every two or three weeks until the first week in July. In more southern latitudes planting is begun a month earlier and continues a month later.

Early Short Green. The standard for pickling, medium size, straight and handsome. It makes a beautiful pickle that keeps well	10	25	80
Long Green. A very excellent variety; a good bearer; about a foot in length rather pointed at both ends; dark green, firm and crisp	15	30	1 00
Green Prolific Pickling. Very prolific; and said by those who have tested it equally desirable as a market Cucumber	15	30	1 00
West Indian Gherkin or Burr. A very small oval shaped prickly variety. It is grown exclusively for pickling, and should always be pickled when young and tender	20	50	1 50

DAVIS PERFECT CUCUMBER

November, December or January, according to the time they are wanted for market.

Cucumbers succeed best in warm, moist, rich loamy ground. They should not be planted in the open air until there is a prospect of settled warm weather. Plant in hills about four feet apart each way. The hills should be previously prepared by mixing thoroughly with the soil in each a shovelful of well rotted manure. When all danger from insects is past, thin out the plants, leaving three or four of the strongest to each hill. English Frame Cucumber. — Per pkt. 25. Improved Sion House, Telegraph, Giant of Arnstadt, Juke of Edinburgh, Gen. Grant, Long Gun, Crater's Tender and True, Swan Neck, Blue Gown.

These varieties are for growing in hot-beds, or in hot-houses particularly constructed for forcing, so that a supply can be furnished during the winter months, at which time the prices are very remunerative. Sow seeds in

DANDELION

Montmagny	30	85	3 00

The Dandelion is much used for spring salads and resembles Endive. Sow the seed in May or June in drills half an inch deep and 12 inches apart. The plants will be ready for use the following spring.

DANDELION

ENDIVE OR CHICORY

German, Endevien; French, Chicoree; Spanish, Endivia.

	Per oz.	½lb.	1b.
Green Curled Winter. Very hardy; leaves dark green tender and crisp.....	\$0 15	\$0 30	\$1 00
Broad-Leaved Batavian. (Escarolle), chiefly used in soups and stews; requires to be tied up for blanching.....	15	30	1 00
Early White Curled. (Self Blanching), the best variety; grows to large size: very large and tender.....	15	30	1 00
Moss Curled Early Summer. Used for salads as winter varieties.....	15	30	1 00
Witloff or French Endive. New.....	20	60	2 00

GREEN CURLED ENDIVE

Endive is one of the best salads for fall and winter use. Sow for an early supply about the middle of April. As it is used mostly in the fall months, the main sowings are made in June and July, from which plantations are formed at one foot apart each way in August and September. It requires no special soil or manure, and after planting, is kept clear of weeds until the plant has attained its full size, when the process of blanching begins. This is affected by covering up the plants as they grow, with slats or boards, which serves the purpose of excluding the light and air.

EGG PLANT

German, Eier Pflanz; French, Aubergine; Spanish, Bereinfiena.

	Per oz.	½lb.	1b.
Pearl White. Very fine grain and well flavored.....	\$0 25	\$0 75	\$2 50
New York Improved. Superior market variety of large size and fine quality.....	35	1 00	3 50
Black Beauty Tendage. Earlier than New York Improved and as large, purplish black.....	40	1 25	4 00
Early Dwarf Purple. Medium size.....	35	1 00	3 50
Black Pekin. A fine variety, bearing large round, deep purple fruits, fine grained and of superior quality.....	30	90	3 25

The Egg Plant is a tender vegetable, and must not be planted out until the weather is warm and settled. Sow early in spring in hot-beds, or if they are not convenient, sufficient plants may be raised for a small garden by sewing a few seeds in common flower pots or in boxes in the house. Plant out early in June from two to three feet apart.

NEW YORK EGG PLANT

SEA-KALE

German, Seekohl; French, Crambe Maritime; Spanish, Berton de Mar

Sea-Kale Seeds. Very much like Celery..... Per oz. 25c. ½lb. 75c. 1b. \$2 50

Cultivate for its blanched shoots, which are cooked in the same way as Asparagus. A supply may be had all winter by planting the roots closely in warm cellar before frost. Sow one inch deep in drills two feet apart; thin out to six inches, and the next spring plant in hills three feet apart, three plants in each.

KALE

German, Blatter-Kohl; French, Chou Vert; Spanish, Breton.

Per oz. $\frac{1}{4}$ lb.   lb.

Siberian German Greens or "Sprouts." This Variety is extensively used for early greens for which it is sown in the fall in rows one foot apart and treated in the same manner as Spinach; it is ready for use in early spring. Sowing can also be made in spring.

Dwarf Green Curled Scotch. A beautifully fringed dwarf growing kind, with bright green leaves

Tall Green Curled Scotch. Tall growing, very hardy variety, leaves a bright green, beautifully curled

Tall Brown German Curled. A very hardy and useful variety

Dwarf Brown German Curled

\$0 10   \$0 20   \$0 60

10   30   90

10   30   90

10   30   90

KALE

Kale may be grown in almost any soil, but the richer it is the more abundant the product. Sow early in the spring, in prepared beds, covering the seeds thinly and evenly; transplant in June and treat in the same manner as for cabbage. Of all the cabbage tribe, this is the most tender and delicate and would be much more extensively grown than it is, if its excellent qualities were generally known. The varieties are all extremely hardy, and are best when touched by frost.

KOHL-RABI

German, Kohl-Rabi; French, Chou Rave; Spanish, Colinabo.

Per oz. $\frac{1}{4}$ lb.   lb.

Early White Vienna. Flesh white and tender; best market sort; good for table use

Early Purple Vienna. Differing from the above in color, which is of a bluish purple

Large White or Green. Large ball, not so fine, but more productive

0 20   \$0 60   \$1 75

20   60   2 00

10   35   1 25

Kohl-Rabi or Turnip stemmed Cabbage, is a vegetable that is not so much cultivated as it deserves to be.

The stem above the ground swells into a bulb somewhat resembling a Turnip; this again is covered with leaves. The edible part is the bulb, which is dressed and served like turnip; and is very delicate and tender when young. It is very hardy, withstands severe draught, and is a good keeper. Cultivate the same as Cabbage, but in hoeing be careful not to throw dirt into the heart of the plant, or the bulb cannot form.

EARLY VIENNA,
KOHL-RABI

LEEK

German, Lauch; French, Poireau; Spanish, Puerro.

Per oz. $\frac{1}{4}$ lb.   lb.

Large American Flag.

The kind mostly grown for market

Large Carenten. A

large growing French variety of excellent quality

Large Rouen. Very

large and fine

\$0 20   \$0 60   \$2 00

20   60   2 00

20   60   2 00

The Leek is very hardy and easily cultivated; it succeeds best in a light, but well enriched soil. Sow as early in the spring as practicable, in drills one inch deep and one foot apart. When six or eight inches high they may be transplanted in rows ten inches apart each way, as deep as possible; that the neck, being covered, may be blanched. If fine leeks are desired, the ground can hardly be made too rich.

AMERICAN FLAG LEEK

MAY KING LETTUCE

German, Laittick; French, Laitue; Spanish, Lechuga.

	Per oz.	4lb.	1b.

ROMAINE OR COS VARIETIES

Trianon Cos. The best of the Cos variety.....	20	50	1 50
White Paris Cos (Romaine). Sow early; tie up to blanch.....	15	35	1 25
Golden Yellow Cos. Long standing, large solid heads, crisp and tender.....	20	60	2 00

Lettuce is the most popular of all salads. Boiled, is quite equal to Spinach; and it is also sometimes used in soups. It is easy of cultivation, but likes a good rich soil. For early use, sow Simpson and Tennis Ball under glass in February and March and transplant as soon as the ground can be worked. Later sowings may be made in the open ground for successions as long as the weather permits; thin out well or the plants will be weak, and set in rows two feet apart and eight inches between the plants. The best early plants are obtained by sowing in the open ground in September, and transplanting to cold frames the latter part of October, being wintered over in the same manner as early Cabbage. Lettuce requires good ground and abundant moisture.

MELON, MUSK

German, Melone; French, Melon; Spanish, Melon Muscatel.

	Per oz.	1lb.	lb.
	\$0 25	\$0 60	\$2 00
POLLOCK. (See Novelties.)

Montreal Market. Green flesh, very thick; fine flavor		15	35 1 25
Long Yellow Cantalope. Yellow flesh, suitable for the market		15	35 1 00
Baltimore Market. Oblong; orange flesh		15	35 1 25
Jennie Lind. A very early kind, of small size, but delicious flavor		15	35 1 25
White Japan. Size medium and nearly round; skin cream white and very thin; flesh pale green; early and sweet		20	60 2 00
Rocky Ford. Very sweet; spicy flavored, small and oblong, most popular sort.		10	30 1 00

POLLOCK MUSK MELON

Melons thrive best in a moderately enriched live soil: the hills should be six feet apart each way. Previous to planting incorporate well with the soil in each hill a couple of shovelfuls of thoroughly rotted manure; plant twelve or fifteen seeds in each hill early in May, and when well up, thin out three or four of the most promising. Pinch off the leading shoots as the growth becomes too luxuriant, and if the fruit sets too numerously thin out when young, which will increase the size of those remaining, and cause them to ripen quicker.

MELON, WATER

German, Wassermelone; French, Melon d' Eau; Spanish, Zaudia

	Per oz.	1lb.	lb.
	\$0 10	\$0 25	\$0 75
Kolb's Gem. Nearly round, dark green		10	25 75

Citron. (Red seeded), round handsome fruit of small size and used in the making of sweetmeats and preserves	10	25	75
Citron. (Green Seeded), used for preserves	10	25	75

IRON CLAD

Plant in hills directed for Muskmelons, giving them more room, as their vines extend much farther. If they are wanted of a large size, three or four melons to each plant will be sufficient, and when only one is allowed to grow from each plant they will grow to an immense size.

MUSHROOMS

German, Chimpignoubrut; French, Champignon; Spanish, Hongo.

Imported English Spawn	15c per lb.	10 lbs. \$1 00	100 lbs. \$9 00
Imported French Spawn	30c per lb.	10 lbs. \$2 50	

Mushrooms should be grown either in a building especially erected for the purpose or some shed, stable or cellar, where the temperature of from 40 to 60 degrees can be kept up in winter. To every barrow load of fresh horse droppings add about the same weight of loam or soil of any kind that has not been manured. Turn the heap every day, so that it is not allowed to heat violently, until you have quantity enough to form a bed of dimensions required. Be careful that your heap is under cover, so that it cannot possibly get wet. The most convenient size is from three to four feet long and eight inches deep.

Prepare the mixture of loam and manure, making the bed in layers, and pounding down each with the back of a spade. Leave this to heat through for a few days, and as soon as the heat subsides to 90 degrees, make holes in the bed about a foot apart each way into which put pieces of spawn two or three inches in diameter; fill up the holes with the compact and at the expiration of a week or ten days the spawn will have thoroughly diffused itself through the bed. Now spread a layer of fresh soil over the heap to the depth of two inches, firm it down moderately and cover with three or four inches of hay or straw. Examine the bed often to see that it does not get dry. When water is given it should be at a temperature of about 100 degrees.

MUSHROOMS

MUSTARD

German, Sent; French, Moutarde; Spanish, Mostaga.

	Per oz.	$\frac{1}{4}$ lb.	lb.
White London. Best of salads	\$0 05	\$0 10	\$0 25
Black. Used for cooking and salads	05	10	25

Mustard in the green state is a refreshing salad, mixed with Cress, Lettuce, or other salad plants. It is necessary to make frequent sowing of it, as it should be cut and used in a very young state, even before the first rough leaf appears. The seed should be sown thickly in light soil, the surface of which should be made very smooth. The seed should be pressed into the soil with the back of a clean spade.

NASTURTIUM

German, Nastrutian; French, Capusine; Spanish, Maranuela

	Per oz.	$\frac{1}{4}$ lb.	lb.
Tall Scarlet	\$0 15	\$0 40	\$1 25
Tall Yellow	15	40	1 25
Tall Nasturtium, Mixed	10	25	75
Dwarf Nasturtian, Mixed	10	35	1 00

NASTURTIUM—Continued

Cultivate both for use and ornament; the green seed pods preserved in vinegar make an excellent pickle. The young leaves are also useful in salads. Its scarlet and orange-colored flowers which appear freely all summer, add a charm to the garden.

ONION

German, Zweibel; French, Oignon; Spanish, Cebolla

YELLOW DANISH ONION

	Per oz.	$\frac{1}{4}$ lb.	lb.
Early Red Flat. About ten days earlier than the Large Red, and not quite so large	\$0 20	\$0 55	\$1 75

Southport Yellow Globe. Same as above, except in color.....	20	60	2 00
White Flat Bermuda. Very early.....	30	1 00	3 50
Red Flat Bermuda. Very early.....	30	85	2 75

ITALIAN VARIETIES

Adriatic Barletta. White, new variety, fully two weeks earlier than the Queen	20	60	2 00
Early Queen. Excellent variety, very early, a good keeper and mild flavor white	20	50	1 50
Giant Rocca. A splendid large variety from Naples, of globular shape, bright brown skin and delicate flavor.....	20	60	2 00

The onion thrives best in a rather strong, deep, rich loamy soil, and unlike most vegetables succeeds well when cultivated on the same ground for successive years. The ground should be deeply trenched and manured the previous autumn, and laid up in ridges during the winter to soften. As early in the spring as the ground is in working order, commence operations by leveling the ground with a rake, and tread firmly; sow thinly in drills about a quarter of an inch deep and one foot apart; cover with fine soil and press down with the back of a spade or a light roller. When the young plants are strong enough, thin gradually so that they stand three or four inches apart.

ONION SETS

	Per qt.	$\frac{1}{4}$ pk.	pk.	bu.
White Onion Sets	\$0 25	\$0 75	\$1 25	\$4 00

OKRA OR GUMBO

German, Essbarer Safran; French, Gomo; Spanish, Quibombo.

DWARF GREEN OKRA

	Per oz.	¼lb.	lb.
Improved Dwarf White. Long slender pods, very productive, only 14 in. high	\$0 10	\$0 20	\$0 50
Dwarf Green. Early and productive...	10	20	50
Long Green. Fine long pods, very good	10	20	50

The pods in a young state are used in soups, sauces and stews, and are very wholesome and nutritious. It is the easiest culture and grows freely, bearing abundantly when grown in ordinary garden soil. It is sown at the usual time of all tender vegetables in drills two inches deep, setting the plants from two to three feet apart.

PARSNIPS

German, Pastinake; French, Panals; Spanish, Chirivia

	Per oz.	¼lb.	lb.
Guernsey or Cup. Leading variety....	\$0 15	\$0 35	\$0 90
Long Smooth or Hollow Crown. Long roots.....	15	35	90
Early Round.....	15	35	90

They succeed best in a deep rich soil that has been well manured the previous season, as manure freshly applied tends to the production of forked and ill-shaped roots. Sow the seed early in spring in drills eighteen inches apart in the garden, and three feet apart in the field, thin the plants to six inches in the drill.

PARSLEY

German, Petersilie; French, Persil; Spanish, Perjil

	Per oz.	¼lb.	lb.
Extra Double Curled. A fine dwarf variety excellent for garnishing....	\$0 15	\$0 35	\$0 90
Fern Leaves. The most beautiful form of parsley, resembling crested fern or moss in its growth.....	15	35	1 00
Plain Leaves. Hardier than the curled variety.....	15	35	90
Moss Curled.....	15	35	90
Hamburg, or Rooted. Edible roots....	25	50	1 75

Should be sown very early in the spring in beds or in lines, and the seeds which are somewhat slow to vegetate should be previously soaked 24 hours in warm water. The soil should be kept free from weeds, which should be extracted by the hand, so as to avoid disturbance of the seed when about to germinate. As soon as the plants are large enough they should be thinned out so as to stand five or six inches apart.

MOSS CURLED PARSLEY

PEAS

German, Erbsen; French, Pois; Spanish, Guisantes.

EXTRA EARLY VARIETIES

	Per qt.	¼pk.	pk.
Primo. Very early, cross between Gradus and Early William. Pods same as Gradus but with this advantage, much more prolific and harder. 25c. pkt.			
Gradus or Prosperity. Earliest wrinkled Pea grown. Can be sown early as the round sorts. Large Peas and pods, splendid flavor. Requires no sticks reaching only 36 inches in ordinary good soil. Height, 3 feet.....	\$0 60	\$2 25	\$4 00

PEAS—Continued

	Per qt.	½ pk.	pk.
Nott's Excelsior. Extra early dwarf wrinkled, pods larger than American Wonder, 1 foot.....	\$0 50	\$1 75	\$3 00
American Wonder. Earliest wrinkled variety, 1½ feet.....	45	1 50	2 50
Alaska. Very early and retain their color well, height 2½ feet.....	40	1 30	2 25
First and Best. One of the very best extra early Peas. An improved strain of the Extra Early Market, height 2½ feet.....	35	1 25	2 00
Little Gem. A dwarf green wrinkled, Market, very prolific, of superior flavor, and a first early, 1½ feet.....	45	1 50	2 50
Premium Gem. A fine flavored dwarf, wrinkled variety; good cropper and fine quality. Height 18 inches.....	45	1 50	2 50

SECOND EARLY VARIETIES

Heroine Medium Early. Green wrinkled, height 2½ feet.....	45	1 50	2 50
Everbearing, good size pea, long pod, height 2½ feet.....	40	1 30	2 25
McLean's Advancer. Early green wrinkled varieties, delicious flavor, height 2½ feet.....	40	1 30	2 25
Pride of the Market. Very large pods, green peas, sow thin, height 2 feet.....	50	1 75	3 00
Yorkshire Hero, or Dwarf Champion	40	1 25	2 25
Abundance. 18 inches high, 6 to 8 peas in a pod, large and wrinkled....	45	1 50	2 50
Dwarf Telephone. Same quality and productiveness as Telephone excepting the vines grow 2 feet high, pods are large and filled with immense peas of excellent flavor and very sweet.....(very scarce)	55	2 00	3 50

GENERAL CROP

Champion of England. A popular wrinkled variety, of delicious flavor; profuse bearer. Peas are very large, tender, height 5 feet.....	45	1 50	2 50
Telephone. This is the best pea for general crop, both for home and market use. Immediately productive and of finest quality. Vines very strong, averaging 18 to 20 large pods per stalk, 4 feet.....	50	1 75	3 00
Stratagem. Mammoth pods, well filled, height 1½ feet.....	50	1 75	3 00
Black-Eyed Marrowfat. Grown for market, hardy, productive, 3 ft. bu. \$5 00.....	25	90	1 65
White Marrowfat. An old favorite sort for market, 4 ft. Per bu. \$5 00.....	25	90	1 65
Tall Sugar. Edible pods, a fine flavored variety, can be used in the green state like string beans. Height 5 feet. Per bu. \$10 00, 1 pt. 40c, 1 qt. 75c.....			
Dwarf, Sugar. Edible pods. Per bu. \$7 00, 1 pt. 30c, 1 qt. 50c.....			

Peas come earlier to maturity in light soil. For general crop a deep rich loam, or strong loam inclining to clay is best. For early crops decomposed leaves or leaf mould should be used, or if the soil is very poor, strong manure may be employed. For general crop a good dressing should be applied, and for the dwarf growing kinds the soil can hardly be too rich. When grown as a market crop, peas are not staked, but sown in single rows, two or three inches deep, two or three feet apart according to the variety. When grown in small quantities for private

PEAS—Continued

use, they are sown in double rows six or eight inches apart, and the rows three feet apart, the tall varieties staked up by bush. For an early crop, sow as soon as the ground can be worked, and make repeated sowings every two weeks for succession. A quart is sufficient for a row of about eighty feet.

PEPPER

German, Pfeffer; French, Piment; Spanish, Pimiento

PEPPERS

	Per oz.	$\frac{1}{4}$ lb.	lb.
Ruby King. Very large; bright red	\$0 35	\$0 85	\$3 00
Sweet Spanish. One of the largest. Best for salads, very hot	25	75	2 50
Large Bell or Bull Nose. An early variety of mild flavor	25	75	2 50
Sweet Mountain or Mammoth. Of large size, best for mangoes	25	75	2 50
Chinese Giant. Double the size of Ruby King. This is the largest and finest mild Red Pepper. Flesh is thick and unusually mild. Productive bearer	40	1 25	4 00
Long Red Cayenne. Used for Pepper, sauces very pungent	25	75	2 50
Long Yellow Cayenne. Similar to Long Red, except in color	30	80	3 00
Golden Queen Mammoth. Large, golden, yellow, early	25	75	2 50
Chili. Very piquant and prolific, fruit conical, bright scarlet	25	65	2 25
Golden Dawn Mango. This is a remarkably prolific Pepper of the Bell class of a magnificent golden color	25	75	2 50

The Pepper or Capsicum is valuable for its seasoning qualities, as well as for pickling. Sow early in heat and transplant when the weather is warm and settled, or sow in warm situation in the garden about the middle of May. Plants should be set a foot and a half apart.

POTATOES

German, Kartoffel; French, Pomme de Terre; Spanish, Petata

Houlton Extra Sunlight. New. Very early, good yielder	} Prices on application
Norton Beauty. Extra early sort, very productive, uniform round shape	
Houlton Hebron. White skin, the most popular variety in cultivation	
Houlton Rose. The standard variety	
Houlton Early Queen. Early and productive	
Houlton Green Mountain. Late variety, good keeper, white and mealy	
Houlton Irish Cobbler. Very early, round white	

POTATOES—Continued

HOULTON MAINE POTATOES

PUMPKIN

German, Kuerbis; French, Cource; Spanish, Calabaz a Totanera.

CHEESE PUMPKIN

	Per oz.	$\frac{1}{4}$ lb.	lb.
Calhoun. Flesh wonderfully thick and fine grained, cooks very yellow.....	\$0 10	\$0 25	\$0 75
Large Cheese. The best variety, hardy and productive.....	10	20	60
Connecticut Field. Very productive, largely grown for feeding stock 20c. per quart, \$3.00 per bushel....	10	15	40
Mammoth King. Grows to an immense size.....	15	40	1 25
Early Sugar. Fruits medium size, of excellent keeping quality. Flesh very sweet.	10	20	60
Cushaw. Salmon color, crooked neck.....	10	25	80
Tennessee Sweet Potato. Bell shaped, thick, white flesh, nothing finer for pies.....	10	25	80

These are usually planted in fields of Corn or Potatoes, but may be profitably raised in fields by themselves. Sow in May; in hills eight feet apart.

RHUBARB

German, Rabarber; French, Rhuperbe; Spanish, Ruibarbo.

	Per oz.	$\frac{1}{4}$ lb.	lb.
Linnaeus. Early, large and tender.....	\$0 20	\$0 50	\$1 50
Victoria. Very large, later than Linnaeus.....	15	40	1 25
Roots			5c. each

Sow early in spring, in drills a foot apart, thinning out to about the same distance apart in the rows when a few inches high. In fall or following spring, transplant into deep, rich soil, about three feet apart each way.

RADISH

German, Retting; French, Radis; Spanish, Robanitos

	Per oz.	$\frac{1}{4}$ lb.	lb.
Vick's Scarlet Globe. New, very fine	\$0 10	\$0 2	\$0 60
Early Scarlet Turnip. The standard variety, of quick growth, mild and crisp when young	10	20	50
Early Scarlet Turnip. Forcing variety, maturing in three weeks	10	20	60
Early Scarlet Turnip. White tipped, a beautiful new early kind, round in shape; color scarlet, tipped with white, a favorite for market gardeners. Market gardeners price.....10 lbs. at 40c lb.	10	15	50
Early Scarlet Turnip. White tip, forcing	10	20	60
Olive Shape Deep Scarlet	10	20	60
French Breakfast. Of quick growth, very mild and tender, of oval form, color scarlet, tipped with white	10	20	65
Long Scarlet. One of the leading market kinds	10	20	50
White Summer Turnip. A summer variety of mild flavor	10	25	75
Yellow Summer Turnip. Grows to a large size	10	25	75

RADISH

WHITE SUMMER TURNIP

Rose China Winter. Flesh firm and piquant; excellent for winter use	10	25	75
Black Spanish Winter. Long, one of the hardiest and best for winter use	10	25	75
Black Spanish Winter. Round	15	35	1 00
Giant Stuttgart. Summer favorite, German sort	10	25	75
California Mammoth White. A giant white fleshed Fall Radish	15	35	1 00
White Spanish. Long, rather milder than the black	10	25	75
White Strasburg. Very large, German sort	10	20	65
White Vienna or Lady Finger. Crisp and tender in summer	10	25	75

There are two classes of Radishes, those for Spring and Summer use, which are small and arrive quickly at maturity, and with proper care can be kept all winter. The summer radishes should be used while young and tender; if allowed to grow too long they become tough and stringy; they thrive best in light rich soil. For a successive supply, sow from the middle of March until September, at intervals of two or three weeks. For an early supply, they may be sown on a mild hotbed in February. The winter varieties may be sown from the latter part of July to the middle of September.

SPINACH

German, Spinat; French, Spinard; Spanish, Espinaca

Special price on lots of 10 to 25 lbs.

	Per oz.	$\frac{1}{4}$ lb.	lb.
Long Standing, Round Leaved	\$0 10	\$0 15	\$0 35
Flander's Round Leaved. The variety commonly grown, good for spring or fall sowing	10	15	35
Large Viroflay. A new variety, with leaves much larger and thicker than the old variety	10	15	35

SPINACH—Continued

	Per oz.	$\frac{1}{4}$ lb.	lb.
Victoria, New. Dark green color, sow early.....	\$0 10	\$0 15	\$0 35
Bloodsdaie Savoy Leaved. A large, curled, thick leaved variety, the market gardner's favorite ...	10	15	35
Prickly. Prickly seeded, with triangular arrow-shaped leaves.....	10	15	35
New Zealand. Produces leaves in great abundance throughout the summer, should be raised in heat and transplanted three feet apart each way into light rich soil.....	10	30	80

Sow in fall for spring use. in drills a foot apart, thinning out the plants to three inches apart in the rows. Spinach is very hardy and does not require protection except in very exposed places, where a covering of straw or leaves is useful. For summer use sow as early as possible in spring, and at frequent intervals, during the season for succession.

SALSIFY, OR OYSTER PLANT

German, Bocksbart; French, Salsifis; Spanish, Salsifi

	Per oz.	$\frac{1}{4}$ lb.	lb.
Long White French.....	\$0 20	\$0 50	\$1 50
Mammoth Sandwich Island.....	15	40	1 25

This very nutritious vegetable requires the same cultivation as Carrots or Parsnips. It is quite hardy and the roots may remain in the ground all winter; a quantity can be taken up and packed in earth or sand, and stored away for use when needed. It makes a fine soup, like the oyster. It is also half-boiled, grated fine, made into small balls, dipped into butter, and fried.

SALSIFY

SQUASH

German, Garten Kuerbiss; French, Courge; Spanish, Eutera

Per oz. $\frac{1}{4}$ lb. lb.

WHITE BUSH S QUASH

	Per oz.	$\frac{1}{4}$ lb.	lb.
Mammoth Summer Crookneck. Twice size of Summer Crookneck	\$0 10	\$0 25	\$0 80
Fordhook Squash. Bright, yellow, good keeper	15	40	1 25
Early Golden Bush Scaloped. True bush growth producing fruit ready for use early in the summer	10	25	75
Early White Bush Scaloped. A white variety of the above	10	25	75
Summer Crookneck. Early, productive and of good quality	10	25	75
Canada Winter Crookneck. Flesh close grained, sweet and fine flavored	15	40	1 25
Boston Marrow. A very valuable medium early variety, an excellent keeper and of superior quality	10	30	1 00
Hubbard. The best Winter Squash, fine grained, dry, keeps well and is of excellent flavor	15	40	1 25

SQUASH—Continued

	Per oz.	$\frac{1}{4}$ lb.	1 lb.
Mammoth Chili. Grows to a large size, often weighing two hundred pounds. Excellent for stock-----	\$0 15	\$0 40	\$1 25
Vegetable Marrow. A favorite English sort, skin greenish yellow, flesh white, soft and rich flavor-----	15	40	1 35

Squashes are divided into two classes, Summer and Winter. The Summer varieties come into use about midsummer, and are eaten when the rind and flesh are young and tender. The Winter varieties are left on the vines until they are thoroughly ripe, gathered in the Fall, and stored away for Winter use. If well ripened and kept in a good cellar, they can be preserved until May. Prepare hill for the seeds by incorporating two or three shovelfuls of well rotted manure with the soil, for each hill. For the bush varieties, from three to four feet each way, and for the running sorts from six to eight feet. Eight or ten seeds should be sown to each hill, thinning out after they have attained their rough leaves, leaving three or four of the strongest plants.

SWISS CHARD

SWISS CHARD OR SILVER BEET

This is a Beet producing leaves only, of a quality superior to those of the ordinary Beet, and excellent greens. Cultivate about the same as spinach, by sowing in early spring in drills about a foot apart. Oz. 10c, $\frac{1}{4}$ lb. 20c, 1 lb. 60c.

TOBACCO

Connecticut Seed Leaf. This variety is best adapted to the climate of the Northern and Middle States. Per oz. 25c, $\frac{1}{4}$ lb. 75c, 1 lb. \$2 50.

Havana. Imported Seed, Vuelto de Abbaajo. Per oz. 40c, $\frac{1}{4}$ lb. \$1 25, 1 lb. \$4 00.

TOMATO

German, Liebesapfel; French, Tomote; Spanish, Tomata.

	Per oz.	$\frac{1}{4}$ lb.	1 lb.
Kondine Red, New. Enormously productive. See Novelties. 25c package.			
Atlantic Prize. Extra early, smooth, bright red, good size-----	\$0 25	\$0 75	\$2 50

New Buckeye State. Large size, similar to Livingstone's Beauty, little darker in color-----	30	85	3 00
Thorburn's Terra Cotta. A cross between the Stone Peach and Ponderosa	30	85	3 00
Ponderosa. Very large and solid-----	40	1 25	4 00
New Stone. Large and smooth-----	25	75	2 50
Livingston's Perfection. Very early, round, smooth tough skin brilliant; solid and rich flavor; ripening thoroughly. A favorite market variety	25	75	2 50
Ignotum. Early, large and smooth-----	25	75	2 50
Livingston's Beauty. Large dark crimson, thick skin-----	25	75	2 50
Dwarf Champion. Resembles Acme, early-----	30	85	3 00
Acme. A beautiful variety. Fruit of medium size, form perfect and very smooth. Ripens all over and through at the same time. This variety seems to possess all the good qualities that can be desired in a tomato	25	75	2 50

TOMATO—Continued

	Per oz.	$\frac{1}{4}$ lb.	lb.
Trophy. (Selected), The leading variety for general cultivation, and when properly grown will give satisfaction. The seed we offer is carefully selected from pure stock.....	20	65	2 25
Golden Queen. A first class large, smooth, pure yellow Tomato. Fine bearer and of excellent flavor.....	25	75	2 50
Yellow Plum. Used principally for pickling.....	30	85	3 00
Red Pear Shape. Used principally for preserving and pickling.....	30	85	3 00
Red Currant. For preserves.....	30	85	3 00
Yellow Cherry. Similar to above, except in color.....	25	75	2 50

EARLIANA TOMATO

The seed should be sown in a hotbed about the first week in March, in drills five inches apart and half an inch deep. When the plants are about two inches high, they should be set out four or five inches apart in another hotbed, or removed into small pots, allowing a single plant to a pot. About the middle of May the plants may be set in the open ground, at a distance of three to four feet apart in hills in which a good shovelful of rotted manure has been mixed.

TURNIP

TURNIPS—Continued

RUTA BAGAS

PURPLE TOP STRAP TURNIP

mode of obtaining fair and smooth Spring Turnips in old gardens where they are almost certain to grow wormy if the earth is allowed to remain in contact with the roots. It is important to get them started very early so that they may have time to grow a sufficient size before very hot weather, when they will soon become tough and strong. For the Fall and main crops, sow from the middle of July to the last of August in drills as directed for the Spring sowing. In the field, Turnips are more generally sown broadcast though much larger crops are obtained by drill culture.

American Improved Purple Top.

The leading variety, of fine quality, valuable both for the table and for feeding stock. Per oz. 10c, $\frac{1}{4}$ lb. 20c, lb. 60c.

Carter's Imperial Royal Swede.

An English variety, highly recommended as producing enormous crops. Per oz. 10c. $\frac{1}{4}$ lb. 20c, lb. 60c.

White or Sweet German. A large solid variety. Per oz, 10c, $\frac{1}{4}$ lb. 20c lb. 50c.**L a i n g ' s .** Improved, globe-shaped, with small top and tap root. Per oz. 10c, $\frac{1}{4}$ lb. 20c, lb. 60c.

For spring crop commence sowing early varieties as soon as the ground can be worked, in drills fourteen inches apart; thin out the plants to five or six inches apart. Keep clear from weeds, and when the bottoms begin to enlarge, brush away the earth from about the roots the depth of an inch or more, and give them a light dressing of wood ashes. This is the surest

SWEET POT AND MEDICINAL HERB SEEDS

Herbs are valuable for culinary and medicinal purposes, but they do not always receive the attention which they deserve. They are easily grown, and when preserved by drying are ready for use at any season of the year. Sow in Spring as soon as the weather is warm, and thin out as the plants grow up.

Per oz.

Anise (<i>Pimpinella anisum</i>), an annual, cultivated for its seeds and its leaves, which are used for garnishing and for seasoning.....	\$0 10
Balm (<i>Melissa officinalis</i>), a hardy perennial, used for making balm tea and balm wine.....	25

HOW TO MAKE A LAWN

The ground ought to be carefully prepared during the winter, by draining if found requisite, and digging to the depth of six to twelve inches, according to the nature of the soil. The land should then be leveled and raked to remove stones, etc., and then made firm with a heavy iron roller. When the natural soil is too stony, a supply of good mould should be spread over it to a depth of two or three inches. In March or April, before sowing the seed, the ground ought to be thoroughly cleaned and made perfectly level with the iron roller and as the subsequent appearance of the lawn depends in a great measure on this part of the preparation, it is of the utmost importance it should be well done. The ground should then be evenly raked and the seeds sown. April and September are the best months for sowing. The seed should be sown on a calm day, at the rate of four bushels to the acre.

After the sowing has been accomplished, the ground should be again rolled, and as soon as the young plants have attained the height of two or three inches, the whole plot should be carefully gone over with a sharp scythe, and from the months of April to October it should be mown every ten days. Mowing machines are excellent after a comparatively close turf is established, but for the first six months' sowing the scythe should be used in preference to the machine. Frequent mowing and rolling are indispensable to maintain the turf in good order. By adopting these means a close green sward will be obtained in a short time.

For lawns requiring improvement, and on croquet grounds, where the turf has become bare through constant use, it is only necessary to sow fresh seed at the rate of one or two bushels to the acre, either in the Spring or Fall, using a small tooth rake and rolling afterwards. A slight dressing of manure late in the Fall, will often be found beneficial in encouraging the growth of finer kinds of grasses, and helps to produce a close growing turf.

MEADOW AND PASTURE MIXTURES

The formation of permanent and productive meadows and pastures is of great value to farmers, and has been given thorough study by numerous experts, resulting in formulas that will give good results under the varying conditions of our climate.

It is a well known fact that a heavier and more prolonged growth is produced by a mixture of many sorts of grasses than by only one or two. Some sorts do best on high dry soil, while others prefer plenty of moisture. Some mature so early and others so late that there is no time in the season when one sort or another is not at its best. Grass seed may be sown either early in spring or in fall, from September to the middle of October in this latitude. Below we give mixtures that we are confident will give good results.

MEADOW MIXTURE FOR ONE ACRE

No. 1. On Good Land, Neither Too Dry or Too Wet

Price \$4.00 per bushel of 20 lbs. Sow 2 bushels to the acre.

No. 2. For High and Dry Land

Price \$4.50 per bushel of 20 lbs. Sow 2 bushels to the acre.

No. 3. On Wet Land

Price \$4.00 per bushel of 20 lbs. Sow 2 bushels to the acre.

PASTURE MIXTURE FOR ONE ACRE

No. 4. On Good Land. Neither Too Wet or Too Dry.

Price \$4.50 per bushel of 20 lbs. Sow 2 bushels to the acre.

No. 5. On Dry Land

Price \$5.00 per bushel of 20 lbs. Sow 2 bushels to the acre

No. 6. On Wet Land

Price \$4.50 per bushel of 20 lbs. Sow 2 bushels to the acre.

These Prices are Subject to Variation.

	Per 10 lbs.	Per lb.
Blue Grass Kentucky (<i>Poa pratensis</i>), extra clean; does well on light dry soils; recommended for permanent pasture; it requires two or three years to form a good sod, and does not arrive at its perfection as a pasture grass until it is much older; valuable in mixtures for lawn. 14 lb. bushel	\$3 75	\$0 40
Creeping Bent Grass, Florin (<i>Agrostis stolonifera</i>), used for lawns, well adapted to most places.....	3 50	37
Crested Dogtail (<i>Cynosurus cristatus</i>), good for permanent pasture for sheep, is productive and early, suffers but little from dry weather, and is one of the best grasses for lawns. 25 lbs. to the acre.....	3 25	35

GRASS SEED—Continued

	Per 10 lbs.	1 lb
Hard Fescue (<i>Festuca duriuscula</i>), admirable pasture grass of fine quality, thrives well in dry situations. 30 lbs. to the acre.....	2 50	27
Meadow Fescue (<i>Festuca pratensis</i>), this is excellent for hay when sown with other grasses, such as Orchard Grass and Timothy, and is also considered one of the best grasses for permanent pasture on a great variety of soils. 40 lbs. to the acre.....	4 50	47
Sheep's Fescue (<i>Festuca ovina</i>), does well in high dry and open pastures, is of short, dense growth, and valuable in lawn mixtures. 30 lbs. to the acre.....	2 60	28
Meadow Foxtail (<i>Alopecurus pratensis</i>), regarded as one of the most desirable grasses for permanent pasture, being early and rapid growth. 25 lbs. to the acre.....	4 00	43
Meadow Soft Grass (<i>Holcus lanatus</i>), will grow with little or no care in any soil; it is chiefly cultivated where the better grass will not grow. 3 bu. to the acre; 7 lbs. to bushel.....	1 75	20
Orchard Grass (<i>Dactylis glomerata</i>), is one of the most desirable of all pasture grasses, coming early in the Spring and remaining later in the Autumn than any other. 3 bu. to the acre. 14 lb. bu.	2 65	28
Red Top Grass (<i>Agrostis vulgaris</i>), good permanent grass, excellent for lawns, pastures, etc., and sowing with Timothy and Red Clover for cutting for hay. Sack 50 lbs., \$4.00; per bushel of 14 lbs., \$1.50.....		
Fancy Red Top Grass , cleaned like Timothy; free from chaff.....	Market Price	
Rhode Island Bent Grass (<i>Agrostis canina</i>), best of all grasses for lawn where only one variety is used.....	3 50	37
Rye Grass English (<i>Lolium perenne</i>). Probably one of the most important and valuable of the cultivated grasses; is naturally adapted to almost any soil; matures early, and is very productive, but contains less nutrition than Orchard Grass.....	1 50	20
Rye Grass Italian (<i>Lolium Italicum</i>). This ripens much sooner than the English Rye Grass, and is greatly preferred by cattle, and greedily eaten by them, either in a green or dry state.....	1 25	15
Sweet Vernal Grass (<i>Anthoxanthum odoratum</i>), is not valuable when sown alone, but when sown with other grasses, it becomes so because of its early growth. It also yields a delightful odor when cured for hay. 10 lbs. to the acre, mixed with other grass annuals.....	7 00	75
Tall Meadow Oat Grass (<i>Avena elatior</i>), very valuable for pasture on account of its early and luxuriant growth. It shoots up very quickly after being cut, and produces a thick crop of aftermath, which also makes it valuable as a soiling crop. It has been lately in demand and is much valued in the South.....	3 00	35
Timothy, Herd's Grass (<i>Phleum pratense</i>). As a crop to cut for hay, this is probably unsurpassed. It thrives best on moist, peaty or loamy soils, and is not suited to light or sandy soils, although on such it can with care, be made to produce fair crops. Price according to market. 45 lbs. to bu.	Market Price	
Rough Stalked Meadow Grass (<i>Poa trivialis</i>), produces a constant supply of highly nutritious herbage, particularly on dry soils; one of the most valuable for laying down pastures and meadows on soils either moist or moderately dry. 14 lbs. to the bushel; 20 lbs. to the acre.....	4 50	50
Wood Meadow Grass (<i>Poa nemoralis</i>). This grass grows well both on shady and exposed situations. 30 lbs. to the acre.....	6 50	70
Yellow Oat Grass (<i>Avena flavescens</i>), good for dry pastures and meadows. Is much relished by sheep.....		1 00
Golden or German Millet . This variety is a heavier cropper than the Hungarian Grass, and needs a longer season and stiffer soil. Grows from three to five feet high, stands up well, is easily cured; gives general satisfaction. Three pecks to the acre. Per bushel of 48 lbs.	Market Price	
Hungarian Grass . A valuable forage plant, succeeds well on dry, light soil; withstands the drought remarkably, remaining green when all other vegetation is parched up, and if its development is arrested by dry weather, the least rain will restore it to vigor. Sow broadcast. Three to the acre. Per bushel of 48 lbs.	Market Price	

GRAINS

All grains are selected expressly for seed, and are strictly pure and true to name.

Sold at Market Prices

SPRING WHEAT, 60 lb. Bushel

Saschatewan Fife

China Spring. Chaff bearded variety, and a general favorite.

Mediterranean Spring. This variety has been grown with great success for a number of years in some sections of New England, and is very highly recommended, is bearded, yields well and the kernels are larger than those of other Spring varieties.

White Russian. This variety, recently introduced, has proved very valuable in many localities in the Northwestern States. Straw of good length, strong, does not lodge. It is not inclined to rust. Heads of large size and well filled with plump kernels weighing 60 to 63 lbs. to the bushel. Has produced 40 to 50 bushels to the acre.

WINTER WHEAT, 60 lb. Bushel

Jones' Winter Five. Surpassing all other varieties in hardiness and productiveness.

Golden Cross. Has the yield of the Clawson, with flower of the Mediterranean.

Clawson. Also known as the Seneca. This is a beardless white wheat with red chaff. It proves early and hardy, has a stiff straw, yields larger crops than any other.

Fultz. A beardless amber variety, grown largely in some sections of Pennsylvania and with very satisfactory results. It is very hardy and productive, and the straw is of medium length and very strong; makes excellent flour.

Red Mediterranean. (American) This is the imported variety fully acclimated and is a standard wheat. The heads are bearded and well filled. It succeeds well in nearly all localities and ripens early.

OATS, 32 lb. Bushel.

SWEDISH or WASHINGTON. Very popular and standing well until fully ripe. (See Novelties.)

Probsteiner. Very productive and heavy. The straw is very strong: No. 32.

Scotch. One of the leading varieties.

Welcome.

RYE 56 lb. Bushel.

Spring and Winter Rye.

SPRING BARLEY, 48 lb. Bushel

Vermont Champion (two rowed)

BUCKWHEAT, 48 lb. Bushel

Silver Hull. This variety is a great improvement on the common Buckwheat. Sown at the same time it will continue to bloom longer, matures a few days sooner, and yields nearly or quite double under the same conditions.

JAPANESE BUCKWHEAT

Yields twice or three times as much as Silver Hull and ripens a week earlier

MISCELLANEOUS SEEDS ETC

Cow Peas. For Fodder.

Kaffir Corn or Sorghum.

Canada Field Peas

Winter Vetches

Spring Vetches

Flax. Very clean

MUZZY BROS.' SWIFT "SURE" SUPER PHOSPHATE

FOR POTATOES

Nearly every farmer grows Potatoes, and consequently is, with the tucker and market gardener, interested in buying that fertilizer which for the least cash outlay, will bring him the best returns; as it is no longer a question, but an actual fact, that with a potato. Manure made from first class material, like our "SWIFT-SURE" SUPER PHOSPHATE FOR POTATOES, you can grow a larger crop of potatoes than you can with barnyard manure, and have them smoother, free from imperfections and of more uniform size.

PURE PULVERIZED SHEEP MANURE

A pure, natural and nutritious manure. Immediate and lasting in effect. Excellent for mixing with the soil of the greenhouse plants. In the vegetable garden it promotes a rapid, steady growth until maturity. It makes a rich Liquid Manure.

Quantity Required. For garden and field crops. 1 to 2 tone per acre— $\frac{1}{4}$ before plowing the balance before harrowing. For top dressing grass, use 1 ton per acre in fall or early spring.

Price, 100 lb. bag, \$2.00; per ton of 2,000 lbs., \$30.00; in packages of 2 lbs., 15c., 10 lbs., 50c.

NITRATE OF SODA

A fertilizer for all crops. It is very quick in action, and hastens maturity of crops fully two weeks. Being extremely soluble, it should not be applied until the crops are above the ground when 100 pounds per acre should be sown, mixed with wood ashes. Does not exhaust the land.

5 lbs., 35c.; 10 lbs., 50c.; 25 lbs., \$1.25; 50 lbs., \$2.00. Bags trifle over 200 lbs., \$3.25 per 100 lbs.

HIGH GRADE FERTILIZERS—Continued

MURIATE OF POTASH

50 per cent Actual Potash

One of the Best Fertilizers for Grass, Wheat, Rye, Oats, Barley, etc. Used with Nitrate of Soda, Ground Bone, Acid Phosphate would furnish sufficient available for an increase in yield by 50 per cent. Price, \$3.25 per 100 lbs. \$5.50 Bag of 200 lbs.

ACID PHOSPHATE

14 to 16 per cent Available Phosphoric Acid

This is one of our Fertilizers which is used in the largest quantity in most of our mixtures as a base. Price, \$1.25 for 100 lbs. \$2.25 Bag of 200 lbs.

KAINIT

12 per cent Annual Potash

Used mostly where a small amount of Potash is required, is recommended as a good preventive of Grub's Worms. Price, \$1.15 for 100 lbs. \$1.90 Bag of 200 lbs.

GENERAL LIST OF FLOWER SEEDS**HARDY ANNUALS**

Successive sowing may be made from March to the end of September: March, April and May are the best months for general summer display; June and July for Autumn blooming, and August and September for Spring flowering. The soil should be carefully prepared by being finely pulverized and made light and rich.

Sow thinly: cover with a very thin coat of fine dry earth the smallest seeds needing but a mere dusting to cover them—and from the first keep the plants thinned sufficiently to prevent overcrowding, which weakens them and produces poor blooms.

HALF HARDY AND TENDER ANNUALS

These include some of the most beautiful and varied of our Summer flowers, among which may be mentioned Aster, Balsam, Ten-Weeks' Stocks, Phlox, Drummondii and Double Zinnia, which in form, size and brilliancy of flowers, and their great diversity of color, are now brought to a high state of perfection.

Sow from the beginning of March to June; when sown in March and early part of April, sow thinly in well-drained pots, pans or boxes; place in the greenhouse or a frame where there is a mild heat, or in the absence of these a sunny window in the house will do; cover the seeds lightly, press down the soil firmly and give a gentle watering with a fine rose watering pot.

Separate the plants when large enough to handle, and firmly plant out in May, as soon as the weather is sufficiently warm where intended to flower. The seed can be sown in the open ground in May and June.

HARDY BIENNIALS AND PERENNIALS

These can be grown at all seasons of the year in the open garden without protection, and may therefore be placed among the most useful of our flowering plants; their variety is almost endless, producing almost every form of flower and shade of color.

The seed may be sown from May to October, but the best time is in May and June. Select for sowing a shady, moist situation, and in order to secure fine, strong plants, sow thinly, and as soon as large enough transplant in showery weather to nursery beds, and finally plant out in October and November, those sown in Autumn are best planted out in March or April, when intended to flower. Many Perennials, if sown early and treated as Annuals will flower the first sea-

GENERAL LIST OF FLOWER SEEDS—Continued.

son. The Pansy, Petunia, China Pink and its several splendid varieties, and many others, do better as Annuals than Perennials.

Half Hardy Biennials and Perennials may be raised and treated in the same way as recommended for Half Hardy Annuals.

ANNUALS FOR WINTER BLOOMING

Many Annuals are very desirable for the greenhouse for Winter blooming; these should be sown in July or August. The most important are Browallia, Candy Tuft, German Stocks, Lobelia, Mignonette, Schizanthus, Sweet Alyssum and Dwarf Nasturtiums. Many varieties as well as the above may be sown in the Fall and Winter for blooming early in the Spring, such as Acroclinium, Ageratum, Antirrhinum, Apple-scented Geranium, China Pinks, Dinathus, Mimulus, Myosotis, Pansy, Petunias, Phlox Drummondii, Salpiglossis, Verbena Vinca and others.

Abbreviations and Signs Used in the following List

A. Annuals, refers to those plants that last but one season, and must be raised annually.	t. Tender, require to be raised and grown under glass, and will only do in the open air in July, August and September.
B. Biennial, raised one year, bloom and die the next.	cl. Climbing; as Cypress Vine, Morning Glory, etc.
P. Perennial, lasts two or more seasons.	spr. Spreading or trailing as Verbena.
h. Hardy, are those that may be grown at all seasons in open air, without protection.	g. Greenhouse, those plants which require to be grown under glass.
hh. Half hardy, require the protection of a frame pit, or handlight till May, when they may be transferred to the open garden.	s. Shrubs, plants of a shrubby or bushy habit.

Those Biennials and Perennials marked with a (*) will bloom the first year if sown early.

AMMONIATED FLOWER FOOD

A dressing made expressly for plants grown in the house, garden, or conservatory. Clean, odorless and producing early and abundant blossoms of rich and brilliant color, and healthy, luxuriant plants free from vermin.

This Ammoniated food was the first odorless chemical preparation made and sold in this country. It is made expressly for flowers grown in the house, garden, or conservatory, and contains the same plant food as stable dressing, but in a cleaner and more soluble form.

Price 15 cents per package

ROSEBUSHES, BULBS ETC.

Hardy Roses. Two year old. Holland grown, our own Importation. We carry the largest assortment of Rosebushes in the state. Both hardy and ever blooming we append a partial list of the varieties we carry in stock for immediate delivery—they will produce a full crop of blooms the first summer.

American Beauty. Rich, rosy-crimson. Very large.

F. K. Druschki, White American Beauty. Very large, pure snow white.

Baroness Rothschild. Bright, rosy pink. Immense size.

Crimson Rambler. Immense cluster bright red flower—very quick grower and hardy.

Thalia, White Rambler. Same as Crimson, cut with pure white blooms, hardy.

Aglaya, Yellow Rambler. Yellow blooms in big clusters, hardy.

Euphrosine, Pink Rambler.

Gen'l. Jack. Large, brilliant blood red blooms. Fine Bloomer.

La France Pink. One of the sweetest and most beautiful roses grown. Large, silvery pink. Blooms till frost.

La France Red. Large blooms of brilliant rose pink almost crimson.

La France White. Same as above two, but blooms are pure white. Very free bloomer.

Marechal Neil. Large, clear yellow. Ever bloomer.

Magna Charta. Rosy crimson, Large buds and blooms.

Mrs. John Laing. Clear shining pink, beautifully shaded.

P. des Blanches.

U. Brunner. Cherry red.

Perle de Lyon. Deep golden. Ever bloomer.

Paul Neyron. Dark rose, very large and fragrant.

Price 15c. each.

Tube roses. One of the most delightfully fragrant and beautiful of the summer flowering bulbs. By skillful management a succession of flowers may be obtained all the year around. For early flowers they can be started in February or March in the greenhouse or hotbed; and for a succession they can be planted at intervals as late as July. For flowering in the open border, plant about the middle of May or as soon as the ground becomes warm. 1c. and 2c. each.

TUBE ROSE

Gladiolus, Extra Fine Mixed. With a view to supplying a high grade mixture at moderate prices we have had grown for us by Gladiolus specialists good quantities of some of the choicest named kinds for this mixture, and shall use with them some of Child's hybrids and other best mixtures which will insure a large variety of shades and colors. This is truly a banner strain. Price 3c. each; 25c. dozen.

Dahlias. Our Dahlia roots are exceptionally fine this year, being Southern grown, and true to name and color. We carry a large assortment of colors. 10c. each.

Caladium Esculentum. Elephant's ears. One of the most effective and easily grown plants for the lawn or flower border. Will thrive in any ordinary garden soil, but to get the best results plant in rich soil and give plenty of water. 5c. 10c., 15c. each.

Paeonies. No other plant flowering at the same season can vie with the Paeony for beauty. They are perfectly hardy, requiring no protection whatever are not troubled with insects or disease, and once planted take care of themselves. Price 20c. each.

TEA ROSES.

GLADIOLUS

DAHLIAS

HYACINTHS

NARCISSUS

ROSES—LARGE ASSORTMENT

BULBS—Continued

Cannas. Extra strong roots 5c. each.

Rhododendrons. Fine large plants. Holland Grown, \$1.00

Hydrangeas, fine quality, Holland Grown.

Snow Ball.

Clematis, for verandas and trellises, Holland Grown.

Flowering Bulbs for Autumn Planting

Being pioneers in the Bulb line for over fifty years we are in a position to give you the best value for the least money. It is poor economy buying unreliable Bulbs, for its simply love's labor lost. We want to gain your confidence, and if once gained, we assure you we will retain it and give you what you ask for without substituting.

REPAIRS FOR ABOVE PLOWS ALWAYS IN STOCK

No. 115x—Swivel, Light Two-horse, Charcoal Iron Beam, Full Rigged with Colter and Adjustable Clevis.....	\$13 15
No. 21—Swivel, One-horse, Cast Moldboard, Wood Beam.....	7 98
Weeder—7½ feet wide, 35 adjustable spring steel teeth.....	7 98

No. 24—One-horse, Cuts 10 Inches, Weight 50 lbs.....	\$5.48
It has Clevis that permits horse to walk in furrow. An excellent Plow. Low in price, Chilled Iron. Landside chilled on bottom; is very strong and convenient.	

THE BEST PLOW

This is the best one-horse convertible Plow ever sold for the use of market gardeners and farmers generally. By changing the Moldboards and Shears that come with the plow, the purchaser actually has four plows in one. Price complete..... \$4 98

No. 1½ Moldboard and Share makes a large one-horse Plow

No. 2½ Moldboard and Share making a medium sized one-horse Plow, a cabbage Moldboard and Share making a complete Cabbage Plow, and by using the Plow without the moldboard with the small Share bolted to the standard, makes a superior Plow for working among cabbage, strawberries, etc.

MITCHELL POTATO DIGGER AND SHOVEL PLOW COMBINED

Price with wings only.....	\$5 00
" " Potato Digger.....	6 00
" " Wing and Potato Digger attachment.....	7 98

This implement should be in the hands of every practical farmer, doing its work easily and in the most perfect manner. By the changing of one bolt it may be converted into a Shovel Plow or Potato Digger. The fingers are adjustable, being held in position by the plow point. Thus in case of breakage, a new part may be inserted without the expense of a whole new head. The fingers, points and wings are of steel, rendering it light strong and durable.

Darnell' Patent Furrower and Marker

In presenting the numerous merits of this invaluable little implement we would be glad to draw a comparison with another of its kind, but we have seen or heard of nothing but the ordinary scratch sleds which make a mere mark as a guide for the plow which follows, thus increasing the work instead of lessening it.

We have a genial ever-borrowing neighbor, however, with whom we might compare notes, and we will just bring him forward with his plow which he is inclined to think is good enough yet. We think you will not fail to notice the difference.

We ride while he walks.

We bring into requisition the services of our boy, if busy ourselves, while nothing short of a man, and a good one, too, can handle the plow.

We open two furrows while he opens one in clean ground, and do it better.

Price \$18.00

THE EDDY IMPROVED MARKER

EDDY'S NO. 10 DISC HOE AND COVERER

These Markers have chilled Shoes of Runners with steel wings bolted on, and may be easily replaced when worn. Frames made of seasoned oak firmly braced and bolted together, arranged with holes permitting the adjustment of the shoes to any width desired. Gauge is adjustable and swings to either side. It will save time enough to pay for it in one season, also improve the looks of your fields. Price \$11.00

The Eddy Disc Hoe and Coverer have 20 inch steel Discs, adjustable handles and are invaluable for covering and ridging all kinds of row crops. Adjustable in every way it is one of the best implements on the market.

Price \$10.00

ACME ASPARAGUS BUNCHER

A greatly improved pattern with knife guide and adjustable head piece for regulating the length of the bunch. This is the latest pattern, 1907 patent.

Price \$1.75

"Planet Jr." Farm and Garden Tools

"Planet Jr." No. 4

COMBINED SEED DRILL SINGLE
WHEEL HOE, CULTIVATOR
AND PLOW

Price complete \$10 50

"Hill and Drill Seeder only 8 50

This admirable tool combines in a single convenient implement a capital hill dropping seeder, a perfect drill seeder, a single wheel hoe a cultivator, and a plow. It holds two quarts and as a seeder sows in continuous rows or drops in hills at five different distances. It is thrown out of gear by simply raising the handles. The index is accurate, simple and easily set. The drill is detached and the tool frame substituted by removing but one bolt. It then becomes a single wheel hoe, garden plow or cultivator.

It is useful almost every day of the season, at every stage of garden work. With this one implement the small farmer can do practically all the work in his small crops.

"Planet Jr." No. 12 Double Wheel Hoe Cultivator and Plow

This perfected wheel hoe is invaluable for use in all small crops. Its variety of work is almost incredible. Changes and adjustments of the tools are made with the greatest quickness. It has 11-inch wheels, which can be set at four different distances apart; the frame is malleable, with ample room for tool adjustment and can be set three different heights. The handles are adjustable at any height, and, being attached to the arch, are undisturbed in making changes of adjustment in frame, wheels or tools. The arch is of stiff steel, unusually high; the quick change frame permits the tools to be changed without removing the nuts. All the blades are of tempered and polished steel,

PRICE \$6 50

"Planet Jr." No. 13 Double Wheel Hoe Price \$4 50

This tool is the No. 12 with 6-inch hoes only, these being the tools that are used by everybody. Any or all of the tools shown with No. 12 may be added at any time.

Planet Jr. No. 17 Single Wheel Hoe, Cultivator and plow

PRICE \$4 75

For easy gardening, and at the same time clean and perfect gardening, the kind that will make your garden the talk of the neighborhood and cause your face to glow with honest pride, nothing is quite the equal of this. No. 17 Single Wheel Hoe. It is suited to all kinds of garden cultivation and all garden crops. You can do more and better hoeing with it in one day than you can do in three days with a hand hoe. The No. 17 has a pair of 6-inch hoes, a plow and a set of cultivator teeth, an outfit sufficient for most garden work.

"Planet Jr." No. 18 Single Wheel Hoe. Price \$3.50 Net

This tool has the same frame and handles as No. 17 but has one pair of 6-inch hoes only—the tools that are most constantly used throughout the season. All other tools can be added as needed.

New No. 14 Planet Jr. Double-Wheel Disc-Hoe, Cultivator and Plow

Has three adjustable discs on each side, a pair of new-idea pronged cultivator teeth that run shallow next the row, steels for plowing, furrowing and covering, and a pair of leaf lifters

PRICE, COMPLETE, \$8.00 NET

No. 38 Planet Jr. Single-Wheel

Disc-Hoe, Cultivator and Plow

Is a handy tool for quick thorough garden cultivation. The new style cultivator teeth run shallow next the row, and the leaf-lifter prevents injury to plants. Discs are adjustable for depth, and throw to or from the rows.

PRICE, COMPLETE, \$7.00 NET

Planet Jr. No. 7 Horse Hoe and Cultivator.

Price \$7.98

This new cultivator is strongly built to withstand incredible strain, yet it is light and easy to handle. You can do almost anything you want with it in the garden or field. It opens and closes furrows, hoes right up to the plants without danger or injury, throws dirt to and from the row and throws back from center again. You can set the hoes at any angle or reverse altogether, cultivate to any depth desired, and adjust for any width.

PLANET JR. NO. 9 HORSE HOE AND CULTIVATOR. PRICE \$7.25

This Admirable Tool is identical with No. 7, except that it has a piano wheel instead of the lever wheel. It has the high frame, patented hollow steel standards, patent lever Star wheel patent lever expander, and new hollow steel wheel arms.

STEEL HOE AND CULTIVATOR

This is our new Steel Hoe and Cultivator. It has an expanding lever with an adjustable wheel. Will find it a first class tool at low price..... \$4.98

PLANET JR. TWELVE-TOOTH HARROW. CULTIVATOR AND PULVERIZER

Price with lever wheel and pulverizer \$3.50
 " with No. 9 wheel 6.40
 " less wheel and pulverizer 5.70

Gardeners cultivate better than formerly. It has been found to pay best. The farmer or gardener is most likely to cultivate best who has the tool best adopted to his purposes. With the Twelve-Tooth Harrow here shown, you go as deep or shallow as you like, come up close to the row without injuring plants, cut out all the weeds, stir the soil and mellow and fine it as with a garden rake. You widen and narrow as you please between 12 and 32 inches. It's a

special favorite with strawberry growers, market gardeners and truckers.

THE GEM SEED POTATO CUTTER

24 Inches
Long
8 Inches
Wide
Weight 8 lbs.

Cutter
Will Last a
Lifetime
Can You Afford
to be
Without One

The GEM SEED POTATO CUTTER shown herewith has all the essential features necessary to a first-class tool. It will cut any size potato in pieces uniform to size, thereby insuring more accurate planting when power planter is used. The operator, to get the best results, will pick up the tuber, look for seed or blossom end, passing it over the knife on upper side of pressure lever, thus removing the cause of so many empty potato hills in your potato patch. Then according to size of potato, place it on knives so that when lever is pushed down it will be cut into either two, four or six: or if a very large one, split it and cut each half into as many pieces as its size will require. From six to eight bushels can be cut with it in an hour. The saving in time alone will more than pay for this cutter the first season it is used.

PRICE \$2.50

INSECTICIDES AND REMEDIES FOR PLANT DISEASES

Lemon Oil—Insecticide. This well known article is in general use all over the country for destroying Scale, Mealy Bug, Greenfly or Alphis-Ant-Thrip-Caterpillar, etc., on Rose Bushes, Palms, Rubber Plants, etc. Dilute with water 30 to 50 parts. $\frac{1}{2}$ pt. 25c.; pt. 40c.; qt. 75c.; $\frac{1}{2}$ gal. \$1 25; gal., \$2 00.

White Hellebore. An excellent remedy against currant worms, rose slugs, caterpillars, etc. Can be used either dry or in water, 15c. per lb;

Whale Oil Soap. One of the most effective agents used for destroying scale, bug, plant lice and all other insects, injurious to vegetation. Price 1 lb. box, 15c; 2 lb. box 25c.

Standard Fly and Germ Killer. It is a thorough disinfectant and germicide. Protects horses and cows from the torture of flies, The **Lightning Insect Exterminator No. 1** discharges the preparation in a fine, broad spray without waste and using but very little. Fifty cows can be sprayed in a few minutes. 60c. per gallon.

Pratt's Scalecide. It will positively destroy all soft-bodied, sucking insects, including all forms of the dreadful "Scale." It is simple, cheap, easily applied and wonderfully effective. Endorsed by government experiment stations, agricultural schools and thousands of fruit growers.

Sulphur, Powered. A remedy for insects of all kinds, both by itself and in combination with other remedies. Market rates.

Hammond's Slug Shot. An insecticide for the destruction of Potato and Rose bugs, and all Lice, Worms or caterpillars upon Melons, Egg, Cucumber, Cotton, Tobacco and Cabbage plants, Tomato, Currants, Fruit or Ornamental Trees, Grape Vines, Shrubs and Flowering Plants. 5 lb. pkg. 30c.

Strictly Pure Paris Green. Market price.

Double Ground Land Plaster. Per 100 lb. bag 50c.

Price 10c.

BORDEAUX MIXTURE OR FUNGIROID

For all fungous diseases, such as mildew and the various rots of the grape. Full directions on label. Dry, 1 lb. box 25c. 5 lbs. and over at 20c; per lb. 50 lbs. for \$7 00; liquid, 1 qt. 35c.; 1 gal., \$1 00

ROSE NICOTINE

Most powerful insect and Parasite Destroyer known. Guaranteed to kill Insects, Lice on Flowers, Plants, Fruits, Trees, Vegetables, Human body, Dogs, Cats, Fowls, Earth Worms, Ants, also any House bugs or Vermin.

1 lb. 10c. 3 lbs. 25c.

SULPHO-TOBACCO SOAP

A Wonderful and Inexpensive Insecticide

Sulpho-Tobacco Soap is a powerful agent for the destruction of all bugs and insects. One or two applications will rid plants of the pests. Full directions with each cake.

Destroys cabbage-, squash- and potato-bugs, currant-worms, lice, green-fly, mealy bug, red spider, etc. Sure death to all plant insects indoors and out-of-doors. Of special value for spraying shrubs, fruit-trees and vines.

3-oz. Cake makes $1\frac{1}{2}$ gallons prepared solution. 10 cents. Mailed, postpaid, for 13 cents.

8-oz. Cake makes 4 gallons prepared solution. 20 cents. Mailed, postpaid, for 28 cents.

10-lb. Cake makes 80 gallons prepared solution. By Express, \$3.00.

Free with every order, "The Window Garden," a booklet by Eben E. Rexford, giving valuable information on the cultivation of plants and the extermination of insects.

PUMP NO. 25

Price \$6.98

used for spraying fruit trees etc. The operator is enabled to keep a constant pressure of 50 to 100 pounds at the nozzle with very ordinary exertion. Will throw a solid stream 50 feet, or make a fine spray by adjustment of the nozzle. When spraying, a fine jet at the bottom keeps the solution thoroughly stirred. Price \$35.00 See cut.

"Fruitall," Spray Pump. "Fruitall" Spray Pump is made on the same general lines as the famous "Pomona" it is, however, lighter and of smaller capacity. All working parts including plunger, gland, valves, valve seats and strainer are made of bronze. Regularly fitted with wing agitator similar to one used on "Pomona," and which has proved to be the best type. Not made for side of barrel. Price with hose complete, no barrel \$12.00

"Premier" Brass Bucket Pump

"Premier" is arranged with suction and discharge hose and spray nozzle. With this nozzle a solid stream may be thrown, or a fine spray. Pump has brass cylinder, plunger and rod. It is particularly adapted for washing windows and wagons, spraying plants in conservatories, greenhouses, etc. Its weight is only eight pounds.

Price with 2½ feet ¾ inch suction and 3 feet 3-8 inch discharge hose. "Seneca" Spray Nozzle and Strainer, \$5.98.

LIGHTNING ALL BRASS SPRAY PUMP

This spray pump is constructed entirely of brass, so it is not affected by the arsenates

LIGHTNING ALL BRASS SPRAY PUMP

Price \$3.50

LIGHTNING BARREL SPRAY PUMP NO. 25

This pump has great capacity, and will throw a continuous stream, or any sized spray desired, by the use of our graduating nozzle. The air is compressed into the airchamber, thereby giving an unbroken stream, and making it the most rapid spraying pump made. The agitator thoroughly stirs the liquids and prevents the same from settling. It is adapted for all kinds of spraying, whitewashing, etc. Price \$6.98. See cut.

GLASS TANK SPRAYER

A general utility sprayer, adapted to all liquid Disinfecting and Poison Preparations for Orchard, Field and Garden, as well as for use on Cattle, Horses, Sheep, Swine and Poultry.

Capacity One Qt.
Price 65 cents.

CHAMPION DRY POWDER GUN

For applying dry Paris Green, Hellebore, etc., to plants and trees, the powder being evenly distributed

over a wide space with the least possible waste. The quantity may be regulated as desired.

Price \$7.00

"LIGHTNING" WHITEWASH SPRAYER

This is the only Spray Pump that will properly spray whitewash without clogging. It is constructed of heavy galvanized iron, with brass tops and valves. Large air chambers and ball valves, the pressure maintaining a continuous stream or spray not affected by the upward stroke. Can also be used for washing windows, buggies and sprinkling lawns, flowers, etc. Galvanized iron, \$2.25, brass, \$2.75.

The Lowell Fountain Compressed Air Sprayer.

One-pumping will expel entire contents of tank and is sufficient to spray 2,000 plants. Spraying nozzle may be reversed to spray under side of bushes and plants. The Automatic Thumb Lever Valve is at all times under complete control of operator, hence none of the solution is wasted. It saves its cost in making a given amount of compound do so much more work. An Adjustable Shoulder Strap and Tree Attachment with suitable couplings for orchard and tree spraying, furnished with each machine. Aluminum finish. Capacity 3 gallons. Price \$4.98.

The "Lowell" Blow Powder Sprayer is fitted with a Ball Valve which is positive in its action, preventing any powder being drawn back into the pump—thus insuring at all times a perfect working machine. Adapted to Paris Green, Slug Shot, Bug Finish, Lice Powder and all Dry Powder Disinfectants and Poisons. Aluminum finish. **Caution:**—Powder must be thoroughly dry. Price 60c.

STEEL FRAME FREEZER **THE NORTH POLE****ALL METAL FREEZER**

Price, 1 qt. \$1.00 2 qt. \$1.30

THE NORTH POLE is absolutely the ONLY practical and thoroughly dependable all-metal freezer. It must not be confused with any of the flimsy, cheap "Tin Freezers," so-called, but it is in a class by itself. It is extremely simple and is constructed on the same lines and of identically the same material as our higher priced freezers with exception of a metal tub.

The Steel Frame Freezer has a Triple Motion. Can revolves from right to left, outer beater from left to right and the inner beater in the opposite direction. Under ordinary conditions it will produce in about 3 minutes a thoroughly beaten, smooth velvety cream.

Prices, 2 qt. \$1.98 3 qt. \$2.25 4 qt. \$2.69 6 qt. \$3.69 8 qt. \$4.69

THE BLANCHARD CHURN

The body of the churn being Cylindrical, all the cream is churned alike and at the same time making streak butter impossible. This is conceded by all to be the best churn on the market.

HIGH GRADE Poultry and Pigeon Supplies

The great need to poultrymen is for a dependable main ration, which shall be the basis of all feeding, something which, with necessary changes for age of fowls, may be used continuously from the beginning to the end of the feeding operations.

The line of poultry feeds hereafter given is believed to furnish the base for the best system for scientific feeding of poultry that is available.

The "SUN" Chick Starter A Baby Chick Feed

This is the food to start chicks right. In size and in contents it is adapted to the wants of chicks for the first twenty days.

It contains the elements of growth and it is a food the chicks can digest.

50 lb. Bag at \$1.50 100 lb. Bag at \$2.75

"QUEEN" Poultry Mash a Poultry Food

The mash with many poultrymen enters largely, into the feeding plan.

The theory is that it is easily digested

warms up the fowls system causes the blood to circulate properly and thus gives health, strength and good feeling. It is a select mixture of ground feeds made from choicest, sound, sweet, wholesome grain. It contains absolutely nothing but what is of real value and is at the same time a growing and a health food, a molting food and an egg producer.

50 lb. bag at \$1.25. 100 lb. bag at \$2.25

"CRESCENT" Chick Feed for the Growth Stage

The Crescent Chick Feed is designed to take the little chicks where the "Starter" leaves off, at about the age of twenty days, and carry them through to the end of the eighth week.

50 lb. Bag at \$1.38,
100 lb. Bag at \$2.50.

SCRATCH FOOD For Grown Fowls.

Snitable at all Seasons

A carefully selected mixed balanced ration of grains, cracked and whole seeds, etc., adapted to the vigorous growth of fowls and production of eggs. Scratching food should be scattered in the litter the first thing in the morning and at noon; late in the afternoon feed all the mash food they will clean up.

50 lb bag at \$1.25. 100 lb. bag at \$2.15

DEVELOPING FOOD
A special food for properly maturing young chicks after they are weaned from Chick Food up to the time for feeding scratching food and laying food. Developing food is dry grain and may be fed from hoppers, but better results may be had by scattering broadcast.

50 lb. bag at \$1.38. 100 lb. bag at 2.50

LAYING FOOD

A ground food ready for the mash made up of carefully selected materials that will greatly increase the production of eggs. The use of this food will greatly increase the profits of the poultry raiser and cannot be too highly recommended.

50 lb. bag at \$1.25. 100 lb. bag at \$2.25

BEEF SCRAP

Standard Meat Food for Poultry of all Ages.

High Protein Beef Scraps is an especially valuable meat food for poultry and gives very satisfactory results. Any kind of Beef Scraps will not answer. Poor Beef scours the birds and often injures them, when the first is used the results are uniformly good. Do not fail to buy your supply from a reliable source.

100 lb. bag at \$3.25

PRATT'S POULTRY FOOD

A specially prepared and highly nutritious food. Used at all the principal shows all over the world. The most successful food for all kinds of poultry.

1 lb. at 10c; 25 lb. at 7c; 100 lbs \$5.50

MUZZY "PIGEON FEED" A SQUAB**DEVELOPER**

Right feeding of pigeons is considered something of a problem. Most raisers do not understand either the pigeon or its feeding as well as they do poultry. The true fancier, the man raises birds for their beauty, for the show, for the pleasure there is in it, or for sporting, finds in our Pigeon Feed a combination suited to his needs.

50 lb. Bag \$1.38 100 lb. at \$2.50

CHARCOAL

Prepared expressly for poultry, absolutely pure, essential to health of fowls and aids to digestion. We carry three grades:

No. 2. Fine, for use on mash mixtures.

No. 1. Medium, for small chicks.

No. 0. Coarse, for fowls.

1 lb. 5c; 5 lbs. 15c; 10 lb. 25c; 25 lbs. 65c;

100 lbs. \$1.90

GROUND BONE, Fine and Granulated

Ground Bone is made from the Dry Bone and contains Phosphates, Lime and Protien and is especially valued as an egg producer.

5 lb. 25c; 10 lbs. 40c; 25 lbs. 88c; 100 \$2.50

CUT ALFALFA CLOVER

A Poultry Food that aids digestion and assists in the assimilation of grain foods, thereby giving better results at lower cost. Among green foods, Alfalfa stands at the top. Mealed Alfalfa is a boon to poultrymen. It is used in a mash for small chicks as well as to mature fowls. If more of this meal was fed to young chicks there would be less mortality.

5 lbs. 15c 10 lbs. 25c 25 lbs. 60c 50 lbs.

\$1.10 100 lbs. \$2.00

CUT RED CLOVER

Cut Clover has become the standard green food for winter egg production. It is used and recommended by every poultry expert and well-known practical poultryman in America.

Writers on poultry topics endorse it as a necessity, especially during the long winter months when the fowls are unable to obtain a substitute for the bulky green food which is so plentiful during the summer season in the shape of grass clover and vegetables.

5 lbs. 15c 10 lb. 30c 25 lbs. 75c 50 lbs.

\$1.25 100 lbs. \$2.25

CRUSHED OYSTER SHELLS

It is needless for us to enlarge on the value of oyster shells for poultry. Every poultryman realizes their importance as an egg maker and general promoter of good health.

1 lb. 1c, 5 lbs. 5c, 25 lbs. 25c, 100 lbs. 60c

CRYSTAL GRIT

We supply 4 sizes of Grit No. 4 for Brooder Chicks; No. 3 for Pigeons; No. 2 for half-grown Chicks; No. 1 for Hens, Turkeys, Ducks and Geese.

1 lb. 2c, 5 lbs. 10, 25 lbs. 35c, 100 lbs. 70c

FOUST'S HEALTH GRIT

1 lb. 3c, 5 lbs. 15c, 10 lbs. 30c, 25 lbs. 75c, 100 lbs. \$2.00.

SEEDS AND GRAINS

We carry a full line of the following: Wheat, Barley, Millet, Hemp, Sunflower, Kaffer Corn, Canadian Peas, Cracked Rice, Linseed Meal, Canary Seed and Mixed Bird Seed, Buckwheat, Rye, etc.

GRIT AND SHELL BOX

Sanitary grit and shell boxes make a material saving on grit and oyster shells, ground bone, charcoal or poultry foods. They are practical self feeding boxes made of heavy galvanized iron.

50 cents each.

SANITARY DRYFOOD BOX

Dry Food hopper is a practical labor and food saving device for feeding dry grain, whole or ground.

75 cents each

CAPONIZING REQUISITES

GAPE WORM EXTRACTOR

The use of this instrument is so simple that a few moments practice will give almost all information needed. The wires being flexible, may be made smaller or larger by bending to suit any age fowl. Full directions with each instrument. Price 25 cents.

PILLING FRENCH POULTRY KILLING KNIFE

Every poultry raiser should have one of our killing knives. They are made of a finely tempered instrument steel, with nicked handle; will last a life time. Sent postpaid on receipt of 50 cents. Don't wait! Send for one now.

RELIABLE SPRING LEVER

POULTRY PUNCH

If you keep a record of your chicks, of the different breeds, hatches, strains, etc., there is no better, quicker, or easier way than by using our latest invention

Price 25 cents

PEERLESS DRINKING FOUNTAIN
Combination for Winter or Summer

PILLING CAPONIZING SETS

Capons are aptly termed "the finest chicken meat in the world," for there is nothing growing feathers their equal or superior. A capon is neither rooster or hen—it is nothing else than a capon. After removing the testicles from the cockerel its nature becomes entirely changed. They take on a more rapid growth; are more tame, awkward in carriage and always exceedingly lazy; take on a very heavy and beautiful plumage, the comb and wattles cease to grow, the spurs do not develop as in the cockerel, and being cast off by both rooster and hen they soon show fondness for the society of little chicks. To these they will act as mother, covering them with their heavy plumage at night or leading them about during the day. In France this is extensively practiced, the capon taking the place of the mother in rearing chicks while the mother, unfettered by the cares of her feathered family, becomes a layer only.

The operation is very simple and is practiced by the leading poultrymen throughout the United States.

HUMPHREY NO. 1

**Humphrey Open Hopper
Bone Cutter**

MANN'S PAT BONE CUTTERS

No. 1—Hand Power. Capacity, 10 to 200 hens. Weight 120 pounds. Price \$12.00.

The Humphrey Bone Cutter
does better work because

It takes a large bone without any preliminary cutting with an axe, as it is necessary in many types of bone cutters.

It turns more easily;

It cuts more rapidly;

It does not break or get out of repair; and

It is easily kept clean.

The construction is extremely simple yet strong and effective.

The Humphrey has an always open hopper and is entirely free from springs, screws and split nuts. It works with direct action and is freest from friction of all bone cutters.

No. 7 MANN

Mann's Pat. Bone Cutters

Are one of the best Bone Cutters ever sold to the public and they are one of the most successful Hand and Power Machines on the market today for cutting green bones.

VEGETABLE AND ROOT CUTTER

This handy invention is used for cutting up green food of different kinds, for poultry, sheep, and cattle. It is a practical success. It is very easy to operate, cuts rapidly. It will cut all kinds of roots, including beets, turnips, etc., also cabbage and other similar vegetables. Green food prepared can be mixed with the soft food that is fed to fowls, and used in this way, there will be no waste whatever. Green food is

essential to the health of the fowls during the winter, and insures an increased egg yield. The accompanying cut shows the Reliable Vegetable Cutter all complete, ready for operation.

WHITEWASH SPRAYER

This is the only spray pump that will properly spray whitewash without clogging. It is constructed of heavy galvanized iron with brass tops and valves.

Large air chamber and ball valves, the pressure maintains a continuous stream or spray not affected by the upward strokes. Galvanized Iron \$2.25
Brass \$2.75.

FLY-KILLER OIL 75c. gal.

BOSTON HOP- PER RAT PROOF

These Hoppers are absolutely automatic and positive in their action. They cannot clog--they do not waste. They are made of galvanized iron with swinging grind (mesh) and hold from $\frac{1}{2}$ peck to $\frac{1}{2}$ bushel respectively, and will last a lifetime. Feed is always accessible and in sight, they save labor and money.

"THE BOSTON" POULTRY DRY FEED HOPPER CO. BOSTON MASS. U.S.A.

PATENTED NOV. 12, '07.

THE IDEAL Automatic Feeder and Exerciser

Directions:

Hang the Ideal Feeder up so that the Rubber Ball will clear the floor 12 inches. Fill it with anything you wish to feed, raise the slide clear up, and they will soon work the feeder so you will have to close down the slide some, or they will get too much. This feeder will increase your egg yield 25 to 40 per cent as it feeds them slow and they get the exercise. Try one.

PRICE :

No. 1—12 quart

\$1.75

Guarantee:

We guarantee that all Fowls will work this Feeder, and also guarantee the Feeders not to clog.

SOLE AGENTS FOR

Genuine Standard Cyphers Incubators

No. 1 INCUBATOR, CAPACITY 144 EGGS

Our No. 1 Incubator holds 144 eggs. The breeder who desires to raise 100 to 300 chicks throughout the season chooses this machine. For that reason it is popular with farmers and fanciers who are branching out into a substantial business. Like our other incubators, it does its work, as the letters appearing in our 104-page catalogue prove.

Price \$22.00

No. 2 Standard Cyphers Incubator, 1911 pattern, Fire-Proofed, Insurable. Showing nursery drawers partly drawn out. (This machine possesses drop

bottom, as shown on illustration of No. 3 Incubator on this page.)

PRICE, \$32.00

No. 2 INCUBATOR, CAPACITY 244 EGGS

Our No. 2 Incubator holds 244 eggs, and is a most desirable machine in every way. It serves the fancier who wishes to hatch a couple of hundred of chicks and hatch them all at one time, or the breeder who wishes to raise from 500 to 600 during the early spring months. It is the most economical machine on the market, except our 390-egg incubator, which is generally used upon very large plants. The 244-egg machine is the one we recommend to the full-fledged fancier and the farmer who raises poultry on a good-sized scale.

No. 3 INCUBATOR, CAPACITY 390 EGGS

Our No. 3 Incubator is the machine that operators of large poultry plants are using. It holds 390 hen eggs, and is a model of usefulness and finish. They are the business machine of the Twentieth Century, and have enabled practical men to increase the size of their plants till they raise 40,000 and 50,000 ducks a year, as told and illustrated in our big main catalogue.

The Products of
MUZZY BROTHERS
(Founded 1835)
WERE FAMOUS

S I N C E our establishment in 1835, our products have gained a wide reputation. We have upheld the motto of "Quality" in all our goods and anything upon the market bearing our label is guaranteed to be of the best. From time to time we have added to our line such articles as the public demanded, and today our stock is up-to-date in every respect.

Within the past few years, owing to the increased prices of Linseed Oil and Turpentine, the public has sought a less expensive material for painting and decorating, and we have responded by placing upon the market several good substitutes, of which we shall make brief mention:

LUMINA COLD WATER WALL FINISH

A Sanitary Cold Water Wall Finish that produces decorative results equal to the most expensive oil paints and enamels, at a fraction of the cost. LUMINA is the ideal material for the interior decorating of residences, hotels, public schools, etc., and the results it produces are a revelation to the artistic eye.

LUMINA is manufactured in dry powder form in a number of attractive shades and is ready for immediate use when mixed with Cold Water.

AQUARINE

WEATHERPROOF EXTERIOR PAINT

A reliable substitute for oil paint at a fraction of the cost. AQUARINE is manufactured in dry powder form and is ready for immediate use when mixed with ordinary Cold Water. It is made in white and numerous practical colors, and is packed in 400 lb. and 280 lb barrels, 100 lb. kegs and 25 lb. boxes. AQUARINE can be applied on any solid surface, such as brick, wood, or stone. It has twice the covering power of oil paint and will dry within two hours after application, remaining permanent and weatherproof. It is absolutely fire-proof, and in many instances fire insurance is taken at a far less premium if the building is painted with this material. AQUARINE will reduce your painting bills 75%.

INTERIOR AQUARINE

Interior AQUARINE is made in White only, and is unequalled for the interior painting of factories, warehouses, etc.

We will gladly furnish you with color cards and samples of the above materials upon request.
