SMITH'S GIANT TOMATO

This is our mammoth variety which possesses every good quality to be found in a tomato. The vines grow strong and vigorous and when properly trained will easily carry their enormous weight of fruit, as shown by this colored engraving. Its massive fruits are almost perfect in form, free from ridges and as to size, weight and solidity we challenge any one to equal it. Three-pound specimens are a common occurrence. The skin is very firm and one peculiar thing about this variety is that it is almost seedless, which makes the seed cost much more to grow than any other variety. It is a splendid tomato for training to a trellis or support of any kind, and the enormous weight of fruit will surprise every one. There are many varieties of tomatoes called Tree Tomatoes and if you want the handsomest large perfect tomato in cultivation today, try our Giant. It will surprise you as well as your neighbors. Pkt., 6c., 3 pkts., 15c., 6 pkts., 25c.

MAMMOTH BLACKBERRY

Try our Mammoth Blackberry this year. It differs somewhat from any other Blackberry on account of its size of fruit, and we believe it is the largest blackberry ever grown. The enormous fruits sometimes measure 2¼ to 2½ inches in length. The core is small and very soft, while the flavor is of unusual richness. The engraving conveys some idea of size, shape and handsome appearance. Vine is a vigorous grower and will trail on a fence or arbor 15 to 20 feet. We offer seed only—Pkt., 6c. 3 pkts., 15c.

MAMMOTH BLACKBERRY

Our engraving shows only a few of the many varieties this mixture contains. Try it.

How to Order--In making out your order, always write Name, Post-office, County and State and the varieties you want, quantity of each, and carry out the catalogue price after each one and enclose the total amount in any convenient form of remittance and send it to us by mail. Be sure to use our Order Blank if you have it.

Mail or Express--We send Seed postpaid by mail at the prices named in this catalogue, except where there are special quotations for the goods to be sent by Express, customers to pay the charges. To points where the Express Companies touch, we can send some orders as cheaply by express as by mail. Whenever we do this we notify the purchaser to that effect.

Express or Freight--We do not prepay Express or Freight, except in case we have quite an order purchased at postpaid prices to deliver and may prefer to send by Express prepaid.

Prepaid Railroad Stations--Some customers live near prepaid railroad stations where there are no agents. In such cases we cannot ship unless we prepay the charges and whenever it is possible we ship to the nearest station to this prepaid station, as we never pay freight charges.

How to Send Money--We advise our customers to send money by Money Order, Bank Draft or Registered Letter. Small amounts will be accepted in postage stamps when it is not convenient to send anything else. Everbearing Strawberry--An Interesting Berry

Here is an Everbearing Strawberry that grows freely from seed and will fruit the first summer. The seed can be sown early in the spring in the house or hot bed, and will soon produce young plants; seed can be sown later in open garden if desired. The plants grow very fast and in a short time will be large enough to transplant in the garden. If the seed is sown by March, the plants will begin to bloom early in July, and in from two to three weeks will begin to bear ripe fruit.

The valuable point about this New Berry is that from the time the first ripe fruit appears they continue to fruit until late in the fall. The Berries are not quite so large as garden varieties, but they are much higher flavored and of excellent quality. They are enormous yielders, single plants having produced nearly half pint of Berries as late as October. They are perfectly hardy and will grow anywhere. We recommend all our customers to try this grand Berry this year. Think of it--grow Strawberries from seed and have delicious fruit all summer. Seed per pkt. 5c., 3 pkts. 12c., 7 pkts. 25c.

Garden Huckleberry

Fruits in Four Months from Seed

This new fruit belongs, botanically, to the same family as the potato, egg plant and tomato, and in some sections has become very popular. The fruit should not be used when green or in a raw state, but when ripe is excellent for pies, preserves, etc. It is easily grown from seed and bears an abundance of fruit that ripens in the fall. The color when ripe is a shining jet black. The plant should be treated and cultivated the same as tomatoes. Plant seeds in a box or pan in the house and plant out of doors when danger of frost is past. It is a very prolific yielder, always producing an immense crop of fruit, is not hardy, but must be planted each season from seed. Our illustration was made direct from plants growing in September and gives an idea of the immense quantities of fruit a plant will produce. It is claimed that a frost will improve the quality of the fruit, and they will cook up much finer and with better flavor. Try them this year. You will be pleased.

The yield is very large for an early variety, and equal to some of the late ones in bushels per acre. The flesh is pure white and of the finest quality—not excelled by any other early variety on the market. Its strong growth, earliness, uniformity, large yield and very handsome appearance have brought the Early Irish Cobbler to the front as a profitable variety for the market and home use. SMITHS' BLIGHTLESS

WONDER

This extra fine potato has been under our careful observation for the past three years on our testing grounds and they have failed to blight during this time. They have been grown in the same field with other potatoes and where the others have blighted, these have held firm and green until time to ripen up. The vines are very large and strong and hold a dark green color for a long time. The potatoes are long and smooth, somewhat larger in the middle, and of a straw color, and are very fine eating and good keepers in the cellar throughout the winter. They are great yielders, and have gone over 400 bushels per acre. There are many so-called blight-resistant potatoes, but we believe these will lead any other variety that is offered, and are as near blight proof as can be obtained. We are the only seed house that has this stock to offer and as our supply is limited, we advise you to place your order early. Prices—One large potato 10c., 3 for 20c., lb. 35c., 3 lbs. 75c., postpaid. By express or freight, pk. 75c., $\frac{1}{2}$ bu. \$1.25, bu \$2.25.

Smiths' Highland Oats

The reports that we have received on the Oats that we have sold for the last three years has more than repaid us for the time and money spent in introducing them to the farmers of the United States. The Highland Oat is one of the new seeds of great merit which far surpasses anything we know of in the oat line. The straw is very long and stiff, growing from four to six feet high, often running a head of more than a foot in length, with a peculiar stalk that makes it strong and excellent to grow with peas for fodder. The grain is short and meaty and of a bright yellow color when ripe, with very thin hulls, and we have them this year weighing from 36 to 40 pounds per bushel and running from 75 to 85 bushels per acre. We are the only seed house that has this stock and we ask you all to try them, as a better oat cannot be had by any farmer. We have raised oats for more than 20 years and fail to find anything that will equal them under all conditions. Many letters have been received of the wonderful yields and the satisfaction given therefore we are compelled to offer them again, in order that all our customers may get some of them, as last year we could not fill all our orders. Try some of these oats this year. They will more than please you.

Prices as follows:—Pkt. 6c., 3 pkts. 12c., lb. 30c., 3 lbs. 60c., postpaid. By express or freight, not prepaid, peck 50c., $\frac{1}{2}$ bu. 85c., bu. \$1.60, 2 bu. at \$1.45 per bu., 5 bu. \$7.00, (32 lbs. to bu.) Special prices on large orders of 10 bushels or more, sacks free.

**Burbank's Crimson Winter
RHUBARB**

Burbank's Crimson Winter Rhubarb is one of the greatest and most valuable Novelties we have ever offered. It is the earliest of all Rhubarb, and fit for use, not only in the spring, but all through the summer and fall, while common sorts are fit to use only a few weeks in spring. As fast as stalks are pulled new ones take their place, and in the south or Pacific states it may be used all the year, requiring only water in dry localities to keep it growing. Stalks are of medium size, of good length, about one inch in diameter, of beautiful crimson color, the quality being simply superb, fully equal to the finest berries for sauce or pies and is really a combination of fruit and vegetable. The skin is so thin and tender it is not necessary to remove it and when cooked a beautiful crimson sauce is the result, looking and tasting like berries. It is especially adapted for forcing in greenhouses or cold frames. It will stand frosts which will destroy any other sort. Rhubarb is the first vegetable we have from the ground in spring and it is the easiest plant of all the perennials to grow. A half dozen plants will supply a large family during the season, and plants once established will last for years. We offer good seed grown especially for us from true stock and urge every customer to start a few plants this year. Pkt. 6c.; 3 pkts 15c.; 7 pkts., 30c.

THIS ROSE
IS A WONDERFUL
FREAK OF NATURE

THIS is a Wonderful Rose. It will produce semi-double and double flowers from 2 to 3 months after sowing the seed. Long before that however, when the plant is not over 1½ inches high, and having two or three very small leaves, it will throw out from 1 to 3 single flowers about the size of strawberry blossoms, but much more delicate, and very attractive as it plainly shows the true rose bush type. With the increase in size of the plant, the blossoms increase until it is a magnificent sight. It is a hardy hybrid perpetual everblooming Rose, sure to be in bloom from spring until winter. The seed is mixed and from one packet of seed you will get PINK, CRIMSON, WHITE, and various shades. Pkt., 8c.; 3 pkts., 20c.; 6 pkts., 35c.

THE SPENCER HYBRID OR

GIANT-FLOWERED SWEET PEAS

THIS is the Sweet Pea that is very popular. The above engraving gives but little idea of its mammoth size, and a very faint idea of the shape and coloring, as the enormous flowers are frilled, crinkled and waved to a remarkable degree, giving them the well deserved title "GIANT ORCHID-FLOWERED" beyond comparison to all other varieties, and the harmony of soft coloring in the varieties we offer in this mixture is simply beyond the power of words to describe. This mixture contains shades in White, Rose, Crimson, Lavender, Blush, etc., some deeper in shade to others of the same color. If you only have one packet of Sweet Peas this season, let it be this collection of Spencer or Giant Orchid-Flowered. Pkt., 6c.; 3 pkts., 15c.; 6 pkts., 25c.
