For 1910

OLDS' IDEAL EARLY SWEET CORN. The best early sweet corn we know of.

Mr. C. S. Clark the well known seed corn grower, of Wakeman, Ohio, says: "You have a valuable sweet corn in this new variety of yours and I consider it one of the grandest varieties grown. It is something wonderful in size for so early a variety, and it is the most showy, large grain, extra early variety of sweet corn I have ever seen."

It withstands drought remarkably well and adapts itself to any kind of soil.

The fodder will average 6 feet in height, producing two and three good ears to a stalk.

The ears are almost as large as Stowell's Evergreen, of excellent flavor, which combined with its earliness makes it a very desirable corn.

It is an early real sweet corn and sells on sight in any market. It is just the corn all market gardeners are looking for.

Price:- **Bu. \$3.00; 10 bus. or more, at \$2.50 per bu.** (retail price \$4.00 per bu.) **3 per cent 10 days, net 90 days.** Electrotpe furnished free with every order of 10 bushels or more.

EARLY MODEL MUSKMELON. The Model is a perfect melon.

It averages about two pounds in weight, is perfect in shape, very productive and possesses all the good qualities of the Rocky Ford. The flesh is green, seed cavity small with few seeds. It bears transportation well and on account of its size and shape, will bring fancy prices in any market. The flesh is firm and flavor unexcelled. The vines grow fast and during dry weather do not lose their strength, but upon the coming of rain respond quickly. As a table melon and for the home garden **The Model cannot be surpassed.**

Price:- **Lb. 75 c. in lots of 10 lbs. or more** (retail price \$1.25 per lb.) **3 per cent 10 days, net 90 days.** Electrotpe furnished free with an order for 10 lbs. or more.
