LOUISVILLE, KY.

WOOD, STUBBS & CO.'S FAMOUS BLUE RIBBON SEEDS

Wood, Stubbs & Co.'s Blue Ribbon Seeds are recognized by all leading planters everywhere as the best and most reliable. They were awarded Gold Medal at St. Louis World's Fair in 1904, and the products have received first prizes at State and County Fairs wherever exhibited.

Quality and Quantity both are assured in the use of Blue Ribbon Seeds. Once used they are popular favorites.

Our packets are large, well filled, and the most handsomely lithographed packets ever sent out in this country. The colors are natural, drawn by a skilled artist, and are true to type as was possible to produce. Blue Ribbon Seeds in packets will sell where others will become shop-worn, being combined with attractiveness, cultural information, and quality which is unexcelled.

TERMS OF SALE.

This list cancels all previous quotations.

Owing to short crops in many varieties, prices are subject to change and orders binding only when accepted, and stocks offered here are subject to being unsold.

Unless otherwise specified we give 90 days from date of invoice, or 4 per cent. discount for cash in 10 days, or 1 per cent. discount per month. All bills, however, purchased prior to June 1st are due on June 1st.

WE DO NOT PLACE SEEDS ON COMMISSION. All seeds are sold outright, and all bills are payable to Wood, Stubbs & Co., at Louisville, Ky., direct, and not to any agent, unless he has our written authority to collect accounts.

Bags, Barrels, and Boxes are charged at cost, and not subject to return for credit.

We deliver all goods F. O. B. Louisville to Depots or Express Offices, but are not responsible, after we have a signed bill of lading in good order from the transportation company, for delays, accidents, or loss of goods in transit.

10 pounds will be supplied at 100 pound rate.

One-half pound and one-half bushel at pound and bushel rate.

Smaller quantities will be charged at higher rates.

TELEGRAPH CODES. American Seed Trade Association; A-B-C; 5th Edition; Robinson's and Baker's.

About Warranting Seeds

Wood, Stubbs & Co. give no warranty, express or implied regarding description, quality, productiveness, or any other matter connected with the goods they send out, and will not be in any way responsible for the crop. If the purchaser does not accept the goods on these terms, they are to be returned at once and any money that has been paid for them will be refunded. Every order received for articles in this catalogue will be executed on these conditions only.

AFTER USING
AMMONIATED LAWN LIME

BEFORE USING
AMMONIATED LAWN LIME

Ammoniated Lawn Lime

An Effective Weed Eradicator and Lawn Restorer. Kills all Flat Growing Weeds, such as DANDELION, DAISY, PLANTAIN, DOCK, SORREL, CHICKWEED, etc., and makes the lawn grasses grow luxuriantly.

Ammoniated Lawn Lime is a scientific chemical compound, which, when applied as a Lawn Dressing, adheres to the flat leaves of weeds, absorbing their juices and burning them up, in most cases killing leaf, bud, and root. The narrow leaves of the grasses do not retain much of the material on their surfaces, and it gets shaken or washed off to the roots, where it is immediately converted into a splendid fertilizer, stimulating and producing a luxuriant growth of grass, besides eradicating practically every weed. A single application usually destroys every coarse growing weed in the lawn, and in three or four weeks the difference in the grass where Ammoniated Lawn Lime was used can be distinctly seen fifty to one hundred feet away, as it is so much greener and richer in appearance.

ABOUT USING. Ammoniated Lawn Lime is a dry, very finely ground powder, which is odorless, does not easily pack, and can be spread by hand or a sifter. The best time to apply is when the weather is settled and moderately dry, from March to November. Forty-eight hours of dry weather after applying is sufficient to destroy most weeds, and in a week they will be almost effectually cleaned out.

Where lawns are extremely weedy, apply at the rate of one pound to forty square feet, one hundred pounds to four thousand square feet. An acre with a moderate amount of weeds will only require about one or two hundred pounds, and if applied judiciously will effectively clean out all of the weeds.

It is better to apply three or four days after grass is cut, or three or four days before cutting, and if the weather is very dry, water the lawn thoroughly the evening before the Lawn Lime is applied.

We are local agents for Ammoniated Lawn Lime, and it is guaranteed to give satisfaction, or money will be refunded, as the manufacturers, the Superior Chemical Co., Louisville, Ky., absolutely guarantee it to give satisfactory results when applied according to directions, and providing there is no rain within forty-eight hours to wash it off.
