NEW FORDHOOK BUSH LIMA BEAN

The only stiffly erect Bush form of the Potato Lima! Both pods and beans are twice the size of Dreer's and more than half again as large as the Challenger Pole Lima.

FORDHOOK BUSH LIMA is altogether unique. Nothing like it has ever been seen before! It was created by Nature as a single sport in a field of the Challenger Pole Lima in 1903. Until now the Kumerle or Dreer's Bush Lima has been the only dwarf form of the fat "Potato Lima." An objection to this, however, is found in the prostrate growth of the plant, the pods frequently becoming discolored from being beaten to the ground by wind or rain.

FORDHOOK BUSH LIMA is positively upright in growth. The strong, erect bushes withstand both whipping rains and high winds. The main stalk is stiffly erect, from two to two and one-half feet high, and from this is thrown out a great number of lateral branches, closely resembling Burpee's Bush Lima in this habit of growth. The foliage is much heavier than Dreer's; the leaf is broader, resembling that of a large Pole Lima, of heavy texture and dark green in color, while the pods are borne along stalks thrown out from the lateral and main stalks in "clusters" of from four to eight. The pods resemble Dreer's but are much larger, measuring from four to five and one-half inches long, one and one-eighth to one and one-quarter inches wide, by as much as three-quarters of an inch thick.

FORDHOOK BUSH LIMA is fully twenty-five to thirty-three and one-third per cent. a heavier cropper. Both the green and the dried beans, as compared with Dreer's, are truly enormous, being more than double the size. On one bush we counted fifty-two pods, the majority containing four beans, while a large number contained five. In a selected plant of Dreer's there were not nearly so many well-formed pods, while a number contained only two small beans. The flavor of the green beans is all that can be desired in this chubby or potato lima type, which is given such preference on the New York markets. Being more productive, and of upright growth, with larger, handsomer pods and from four to six days earlier, it is bound to entirely displace the Kumerle (Dreer's or Thorburn) Bush Lima.

Seed from **ORIGINATOR'S STOCK**, per pkt., 15c; pt., 40c., by mail, postpaid; by freight or express, pt., 30c., qt., 45c.; 2 qts., 80c.; 4 qts., \$1.50; peck, \$2.75; bush., \$10.00.

WHAT OTHERS SAY OF FORDHOOK LIMA BUSH

FORDHOOK BEYOND COMPARISON

Charles E. Brown, Lyndonville, N. Y., writes, October 2, 1909:—"Your New Fordhook Bush Lima Beans are beyond comparison in size, quality and productiveness; all other seeds you sent me were excellent."

THE FINEST EVER SEEN OR GROWN

H. Johnson, Waycross, Ga., writes, August 21, 1909:—"Your Fordhook Bush Lima Beans are the finest I have ever planted and every one here pronounces it the finest Lima Bean they have ever seen or grown."

JOHNSON'S THUNDERHEAD CABBAGE

A new second early and main crop cabbage, offered last season for the first time.

For many years the finest cabbage as well as the best cabbage seed grown in America comes from the eastern end of Long Island. Hundreds of growers there depend entirely on their crops of cabbage, dozens of whom have their own varieties or strains selected by themselves. By keeping in touch with these growers, we have secured seed stock of several new and distinct sorts by offering tempting and fabulous prices for our stock seed. We believe in the New Thunderhead we have the very best second early and one of the best main crop cabbages ever sent out, and we want every cabbage grower, who has not done so, to give it a trial, but regret the supply of seed is so limited this season that we cannot sell more than 1 lb. to any one customer. Prices for 1910; pkt., 15c.; oz., 50c.; 2 ozs., 85c.; $\frac{1}{4}$ lb., \$1.50; lb., \$3.50.

New Long-Keeping Celery JOHNSON'S MANHATTAN

This is no doubt the finest type of late winter keeping celery ever offered, even surpassing in this respect our famous Winter Queen Celery. Our attention was first called to it in New York markets two years ago, and upon investigation we learned the name of the grower on Long Island and secured from him, at high cost, a few ounces of seed, from which our present supply is grown. It is the heaviest green celery, full hearted, very solid and crisp. Pkt., 15c.; oz., 50c.; $\frac{1}{4}$ lb., \$1.25; lb., \$4.50.

What a Large Michigan Celery Grower Says:

H. L. Harris, Newberry, Mich., writes:—"All the celery seed purchased from you gave finest results, especially the 'New Columbia,' which I consider a wonderful variety for market and keeping."

From a Prominent Ohio Celery Grower

J. E. Uebelhart, Canton, Ohio, writes:—"Johnson's Manhattan and your New Columbia Celery are the best fall and winter celery I have grown in twenty years; both are of very stocky growth, have a fine flavor, and if bleached properly looks as pretty as a picture. Thanks for the fine quality of all seed I received from you."

JOHNSON'S MANHATTAN.—TRIMMED FOR MARKET

HOLYROOD HOT-WEATHER LETTUCE

HOLYROOD HOT-WEATHER LETTUCE

Hundreds of letters from customers all agree that this is the most remarkable heat resister they have ever grown, standing longer than any other of the rich butter varieties. Heads are large, firm and solid; light green outside, blanching to a beautiful cream yellow inside; unusually tender and crisp. Can be sown at any season of the year.

Pkt., 15c.; oz., 40c.; $\frac{1}{4}$ lb., \$1.25; lb., \$4.00.

BEST SUMMER HEADER

Erwin Church, Ellsworth, Mich.—"Holyrood is the best summer heading lettuce that I have ever seen, standing extreme heat better than any known variety."

BEST HE EVER RAISED

J. I. Cleveland, Fall River, Mass.—"We had the dryest season I remember, yet your New Holyrood Lettuce flourished and proved to be the best I ever raised."

WITHSTANDS HEAT

S. Forster, Hartford, Conn., writes:—"Holyrood withstands heat and drought better than any other lettuce. Out of 9,000 heads only 10 went to seed."

JOHNSON'S NORTHMOUNT EGG PLANT

This fine new variety is the result of selection of the very earliest and finest fruits of the celebrated "Black Beauty." It is, beyond question, the earliest and hardiest of all Large Smooth Purple Egg Plants. While the fruits are not always quite as large as Black Beauty, it ripens fully ten days earlier and is suited to more northern climates.

The plants branch freely near the ground and grow in well-rounded bushes. The fruits are thick, of most attractive shape, and in color a lustrous purplish black. This coloring is uniform over the whole fruit, and does not fade at the blossom end, as do so many of the older varieties.

Prices, per pkt., 20c.; 4 pkts., 60c.; $\frac{1}{2}$ oz., 75c.; oz., \$1.25; $\frac{1}{4}$ lb., \$4.00.

WHAT OTHERS WRITE:

"Northmount just as advertised. First Eggs picked July 2 brought \$2.50 per dozen."—Jesse G. Evans, Wood's Cross, Utah.

"Three weeks ahead of all other Egg Plants; the earliest and finest I ever raised."—E. H. Banque, Topeka, Kan.

"All that can be desired. Northmount a sure success for market growers."—J. Graham, Anthony, Fla.

"Northmount vines just loaded with fruit, many weighing 4 lbs. each."—A. B. Leigh, Meadows, N. J.

JOHNSON'S DREAMWOLD--The Most Profitable Muskmelon

Of the type of our Improved Shippers' Delight, but more densely netted, free from any tendency to knob at the blossom end and ripens two weeks earlier. It is remarkably early, and the quality of its thick, green flesh is simply perfection. If you grow for market and want to be the first with fine melons, plant Johnson's Dreamwold. Per pkt., 10c.; oz., 30c.; $\frac{1}{4}$ lb., 75c.; lb., \$2.75.

Cumming Brothers, the noted melon growers of South Jersey, write:

"After two years' experience, we consider Johnson's Dreamwold the finest, earliest and most profitable melon we have ever grown. The vines are free from louse or fungus. The last setting matured and were marketed in October, always holding the same delicious quality, uniform size and productiveness, as the earliest or first setting."

BURPEE'S UNIQUE NEW BUSH BEAN FOR 1910

A White-Seeded Stringless Green-Pod

Now first introduced for advance trials, in connection with interesting Special Prizes.

This is undoubtedly the best green-podded bush bean yet produced! The original Burpee's Stringless Green-Pod, so long famous as unequaled, matures from three to five days earlier, however, and for first-early will probably still remain as popular as ever. For gardeners to whom a few days do not matter, **Burpee's New White-Seeded Stringless Green-Pod** will prove, without question, under severe test, to be the "very best of all."

The bushes attain a height of eighteen to twenty inches, are very vigorous and their prolific character is immediately noticed when one separates the foliage at the top. The leaves are of a bright dark green, quite heavy, but not over abundant, so that the strength of the plant is concentrated upon the production of an enormous crop of handsome pods. The pods measure from five and one-half to six and one-half inches long; they are one-half inch wide and one-half inch thick—so full and fleshy that they are almost perfectly round. They are brittle, juicy, entirely free from fibre and absolutely stringless at all stages of growth. The handsome light green pods will immediately attract all who desire both quality and quantity. The seed being white, can be used for dried beans in the winter. Most gardeners who grow this unusual Novelty in 1910, will surely want to save all the seed for planting in 1911—and it will pay to do so, as it must take several years before we can "work up" sufficient stock to offer at a moderate price. Sold only in sealed packets, each containing thirty beans. Per Pkt. 15 cts.

BURPEE'S DANISH

"ROUNDHEAD" CABBAGE

An Earlier Shorter Stemmed Type of the Famous Danish "Ballhead."

Of more robust growth, the heads are heavier and of (equally fine quality. The original Danish Ballhead Cabbage first introduced by us twenty-three years ago) is esteemed for the extreme solidity and great weight of the heads as well as for its superior keeping qualities, but it can be grown most successively only in a comparatively cool location.

Danish "Roundhead" has less outer foliage and is better able to resist blight, being, in most sections, as vigorous in growth as the best American types. The heads average larger and mature nearly two weeks earlier. The heads are unusually solid, and beautifully white when trimmed. They are splendid keepers when stored away for the late winter and spring, at which time the fine heads bring the highest market price. Crop short. Pkt., 10 cts.; $\frac{1}{2}$ oz., 25 cts.; oz., 45 cts.; $\frac{1}{4}$ lb., \$1.25; lb., \$4.50.

MUZZY BROTHERS

ANNUAL SEED CATALOGUE

FOR 1910

Muzzy Brothers give no warranty, express or implied, as to the description, quality, productiveness or any other matter of any seeds, bulbs or plants they send out, and they will not be in any way responsible for the crop. If the purchaser does not accept the goods on these terms, they are at once to be returned.

ARTICHOKE.

German, Artichoke; French, Artichaut; Spanish, Albachofa.

	Per oz.	1 lb.	Per lb.
French Globe	\$0 35	1 00	\$3 00

The Seeds should be sown early in the spring, in drills an inch and a half deep, and one foot apart. The next spring transplant to permanent beds, in rows or hills three feet apart and two feet between the plants. Plant in a deep, rich, moist loam, and the plants should be protected in winter by a covering of leaves or coarse manure. A bed will continue bearing for several years.

Jerusalem Artichoke, Tubers	3 lbs. by mail \$1 00	qt. 25 cts., pk. \$1 00
-----------------------------	-----------------------	-------------------------

ASPARAGUS.

German, Spargel; French, Asperge; Spanish, Esparrago.

	Per oz.	1 lb.	Per lb.
Columbia, producing pure white shoots	\$0 10	\$0 20	\$0 60
Conover's Colossal	10	20	50
Palmetto, a light green variety	10	20	50
	Per 100	Per 1000	
Roots, Colossal, Two years old	\$0 80	\$6 00	
" Palmetto, " " "	80	6 00	
" Columbia, " " "	1 00	7 00	

Sow the seed early in spring, in drills 15 inches apart, and about a dozen to the foot in the drill; keep the soil mellow and free from weeds during the summer, and in the succeeding spring transplant to permanent beds, which should be done in the following manner as described by a cultivator of Oyster Bay Asparagus.

Plant on sand soil. To grow Asparagus in perfection, the soil need not necessarily be richer than it must be to produce a good crop of Corn. Some experiments have shown that by heavily manuring the crop cannot be made permanently greater than by moderate dressings. It is not desirable to plant them out very early; more plants will fail to grow than when the planting is deferred until the soil is dry and warm.

In planting for private use, set out in rows two feet apart, and allow twelve inches in the row. Set the plants at least six inches below the surface. For market on a large scale, set four feet apart one way and two the other which will allow the use of a horse and cultivator to keep the weeds under.

CONOVER'S COLOSSAL ASPARAGUS.

BEANS.

English or Broad.

German, Gartenbohne; French, Fève de Marais; Spanish, Hava,

	Per pt.	Per peck
Early Mazagan, prolific, very early	\$0 30	\$1 50
Broad Windsor	30	1 50
Sword Long-Pod	25	1 25

This class is very hardy and should be planted as soon as the soil is in good state in the spring. Plant four inches apart and two inches deep, in drills four feet apart. To insure well-filled pods, pinch off the top as soon as the lower pods begin to set.

BEANS-Bush or Snap Varieties.

German, Bushbohnen; French, Haricots nains; Spanish, Habichuelas enanas.

Burpee's White Seeded, stringless, green pod. (See novelties) 15 cts. pkt.

Black Valentine, long, round, green, solid pod, very early. qt. 35 cts. $\frac{1}{2}$ pk. \$1 25 pk. \$2 bu \$7.

Early Valentine, early, productive, tender and of excellent flavor. qt. 30 cts. $\frac{1}{2}$ pk \$1. pk. 1 75 bu \$6.

Livingstone's Round Pod Six Weeks Bean, qt. 30 cts. $\frac{1}{2}$ pk, 80c. pk, 1 50 bu. 5 00

Muzzy's Stringless Green Pod, the best stringless bean grown. Ten days to two weeks earlier than Valentine; pods full and fleshy, extremely crisp and absolutely stringless. Very productive. qt. 35 cts. $\frac{1}{2}$ pk. 1 25 pk. 2 00 bu. 7 00

Early Mohawk, very productive and of good quality. qt. 30 cts. $\frac{1}{2}$ pk. 1 00 pk. 1 75 bu. 6 00

Long Yellow Six-Weeks early, excellent variety for general crop, qt. 30 cts. $\frac{1}{2}$ pk. 85c, pk 1 50 bu. 5 50

Fulmers Forcing. Fine dwarf forcing variety. quart 50 cents.

Extra Early Refugee, similar to late Refugee, pods two weeks earlier. qt. 30 cts. $\frac{1}{2}$ pk. 1 00 pk. 1 75 bu. 6 00

Refugee, or Thousand to One, very early and prolific. The pods are round and full, stringless and of fine quality. qt. 30 cts, $\frac{1}{2}$ pk. 1 00 pk. 1 50 bu. 5 50.

Burpee's Bush Lima. Beans as large as Large Pole Lima, stout growth, branches vigorously, bearing 50 to 200 large pods well filled with very large beans. qt. 35 cts. $\frac{1}{2}$ pk. 1 25 pk. 2 00 bu. 7 00.

Long White Kidney, excellent as a shell bean, green or ripe. pt. 25 cts, $\frac{1}{2}$ pk, 75c. pk. 1 25 bu. 4 50.

Fordhook Bush Lima, (See novelties) Pkt 15 cts. pt. 30c. qt. 45c. $\frac{1}{2}$ pk. 80c. $\frac{1}{2}$ pk. 1 50.

BURPEE'S BUSH LIMA

	Per qt.	$\frac{1}{2}$ pk.	per pk.	per bu.
White Marrowfat, extensively grown for sale in the dry state.	\$0 25	\$0 75	\$1 25	\$4 50
Golden Refugee, pods round and light color	30	1 00	1 75	6 00
Dwarf White Lima,	35	1 25	2 00	7 50

MUZZY STRINGLESS GREEN POD

DWARF WAX VARIETIES.

	Per qt. $\frac{1}{2}$	pk. per	pk. per	bu.
Refugee Wax, Stringless, good for early or late, immense yielder.	\$0 35	\$1 25	\$2 00	\$7 00
Golden Eyed Wax, very early, prolific, free from rust.	30	1 00	1 75	6 00
Saddleback Wax, long straight pods, round, golden yellow stringless	35	1 25	2 00	7 00
Wardell's Kidney Wax, extra early, long flat pods, very productive.	30	1 00	1 75	6 00
Black Wax or Butter Improved, very early and prolific. The pods are round, full, stringless; of very fine quality.	35	1 25	2 00	7 00
Davis' White Wax, beans pure white, pods yellow, flat, tender, rich,	35	1 25	2 00	7 00
Golden Wax, This valuable variety is about ten days earlier than the Black Wax, pods large, long, semi-round, brittle, stringless.	30	1 25	1 75	6 00
Yosemite Mammoth Wax, the largest pods of all wax varieties	60			
Hudson Wax, very large, tender, pods stringless, very productive.	30	1 00	1 75	6 00
Detroit Wax, similar to Golden Wax, less rust.	35	1 25	2 00	7 00
White Wax, stringless, round pods, beans pure white, strong grower	50			

BEANS, Pole or Running Varieties.

German, Slangenbollen; French, Haricots a rames; Spanish, Judlos.

Challenger Lima, potato variety, five and six in a pod.	35	1 25	2 00	7 00
King of Garden Lima, vigorous in growth and immensely productive, pods large, numerous and well filled and beans of an enormous size. Generally grown for main crop.	35	1 25	2 00	6 50
New Early Jersey, very early.	35	1 25	2 00	6 50
Large White Lima, a greatly esteemed variety.	35	1 25	2 00	6 50
Kentucky Wonder, or Old Homestead Extra Early, pods flat, long tender and good flavor, very productive.	35	1 25	2 00	6 50
New Lazy Wife, long green pods, good quality, white beans.	35	1 25	2 00	7 50
Dutch Case Knife, a very productive variety, and one of the earliest	30	1 00	1 75	6 00
Horticultural or Speckled Cranberry, a popular variety for private use, equally serviceable in the green state or when shelled.	30	1 00	1 75	6 00
Scarlet Runner, beautiful scarlet flowers; for ornamental and table use.	35	1 25	2 00	6 50
Black Wax, pods long thick and fleshy; pale yellow color; waxy appearance; very productive and tender; excellent as a snap or shelled green.	35	1 25	2 00	7 00
Early Golden Cluster, bright yellow pods, stringless, in clusters.	35	1 25	2 00	7 50
Yard Long French, pods sometimes grow from 2 to 3 ft. long, are very slender like a pipe stem, should be grown on pea brush. Pkg. of 1 gill 20 cents.				

Sow Bush sorts in drills about two feet apart, and drop the beans about three inches apart in the drills; cover two inches or less; for a succession, sow at intervals of two weeks. Lima beans should not be planted until settled weather; make rich hills, four feet apart each way; set a pole eight or ten feet high in each; press the beans into the soil eye down, six or eight to each pole, and when they are well up, thin out to four. A quart of Limas is sufficient for 75 or 80 hills, and a quart of Bush Beans will sow a row 100 feet long.

BEETS.

German, Runkelrub; French, Bourrache; Spanish, Remolacha.

DEWING'S EARLY BLOOD TURNIP BEET

	Per oz.	$\frac{1}{4}$ lb.	Per lb.
Detroit Dark Red, a splendid beet for market or home use, of a deep color, tender and of delicate flavor.	\$0 10	\$0 25	\$0 75
Dark Red Egyptian, the earliest beet in cultivation, color deep crimson; of excellent quality.	10	20	60

BEETS-Continued.

	Per oz.	$\frac{1}{4}$ lb.	Per lb.
Extra Early Eclipse, very early, good size.	\$0 10	\$0 20	\$0 60
Early Flat Bassano, chiefly valuable for its earliness.	10	20	60
Early Blood Turnip, standard early sort, an excellent variety.	10	20	60
Edmand, market garden variety, uniform shape, dark.	10	25	70
Dewing's Blood Turnip, of fine form and flavor.	10	25	75
Long Smooth Blood Red, an excellent late variety.	10	20	60
Swiss Chard, used for its leaves, which are cooked as spinach.	10	20	50

MANGEL-WURZEL AND SUGAR.

Varieties used for feeding stock. Sow 6 lbs. per acre.

Mammoth Red Mangel-Wurzel, producing roots of mammoth size, very regular, and with a small top. 10 lbs. and over, 25¢ lb.	10	15	35
Yellow Globe Mangel-Wurzel, roots very large and globular. 10 lbs. 25¢ lb.	10	15	35
Long Yellow Mangel-Wurzel, good for general crop. 10 lbs. at 25¢ lb.	10	15	40
Golden Tankard Mangel-Wurzel, a new and very valuable variety of fine form and of sweet flavor. bright yellow in color, when cut it shows interior ring, similar to most varieties of garden beet. 10 lbs. at 30¢ lb.	10	15	40
White Silesian Sugar Beet, extensively grown for feeding stock and manufacture of sugar.	10	15	30
Vilmorin's Improved Sugar Beet, an improved variety.	10	15	30
Lane's Improved Sugar Beet, improved variety of the French Sugar Beet obtained by careful selection in this country. 10 lbs. at 25¢ lb.	10	15	30

A rich, deep open soil is the best suited to the culture of Beets; fresh manure is undesirable, but land that has been well manured the previous year is highly suitable. for an early supply sow in the spring as soon as the ground becomes fit to work, in drills about one foot apart and two inches deep. For main crop sow the first week in May, and for winter use sow in June. When the plants have obtained three or four leaves, thin out, so that they may stand eight or nine inches apart. Keep free from weeds by hand weeding and hoeing. Those intended for winter use may be taken up in October, and stored in dry sand, in the cellar or outhouse. Before storing, leaves and fibres must be cut off, but care must be taken not to bruise the main root.

BORAGE.

German, Borritsch; French, Bourrache; Spanish, Berraja.

	Per oz.	$\frac{1}{4}$ lb.	Per lb.
Borage, used as a pot herb; also as a salad, or can be boiled, and also for garnishing, but chiefly required for claret cups and other cooling drinks.	\$0 10	\$0 30	\$0 90
Bees are very partial to the flower.			

BROCCOLI.

German, Spragel Kohl; French, Chou Brocoli; Spanish, Broculi.

	Per oz.	$\frac{1}{4}$ lb.	Per lb.
Early White, heads medium size, compact, creamy white color, most certain to head.	\$0 20	\$0 60	\$2 00
Purple Cape, differing from the preceeding color, greenish purple,	35	1 00	3 50
White Cape.	45	1 50	5 00
Mammoth White,	35	1 00	3 50

A favorite European vegetable, nearly allied to the Cauliflower, but more hardy and surer to head; the seeds should be sown in this district in the early part of May, and transplanted in June, farther south the sowing should be delayed until June or July, and the transplanting accordingly from August to October. In parts of the country where the thermometer does not fall below 20 or 25 degrees, broccoli may be had in perfection from November until March. It succeeds best in a moist and rather cool atmosphere.

BRUSSELS SPROUTS.

German, Sprossen-Kohl; French, Chou de Bruxells; Spanish, Breza de Brusels.

	Per oz.	$\frac{1}{4}$ lb.	Per lb.
Improved Seed, (French) half dwarf.	0 20	\$0 50	\$1 50
Dwarf Improved, a variety producing compact sprouts of excellent quality.	20	60	2 00

A tender delicious vegetable. The plant grows two or three feet high, and produces from the sides of the stalk numerous little sprouts, one or two inches in diameter, resembling cabbage. The leaves, which look like a Savoy should be broken down in the fall, to give the little cabbages room to grow. They are very tender and sweet after early frosts. Sow early in hot-beds, or in seed-beds in May, transplant and cultivate like cabbage.

CABBAGE.

German, Kopfkohl: French, Chou; Spanish, Berza de repollo.

SELECTED LATE FLAT DUTCH CABBAGE

	Per. oz. $\frac{1}{4}$ lb. Per lb.		
All Seasons, fine variety, for second early or late growing good size.....	\$0 20	\$0 60	\$2 00
Etampes, early French variety, with pointed heads	20	50	1 50
Baseball, Early, The finest early all head Cabbage	30	85	3 00
Early Jersey Wakefield, the leading variety for market, very early, of medium size, good quality, sure to head...	35	1 00	3 00
Early Flat Dutch, This is one of the best early cabbages in cultivation....	20	60	2 00
Early Summer, a valuable early sort resembling the Early Flat Dutch	20	60	2 00
Early Winnigstadt, heads large, one of the best for general use.....	15	40	1 25
Large York. Larger and later than the Early York.....	15	40	1 25
Fottler's Improved Brunswick, This is the very fine second early variety...	20	60	2 00
Henderson's Succession, a second early and late variety, a sure header; seeds sown in March produce large heads in June.....	25	75	2 50
Danish Ballhead, large, round, solid heads; sweet and crisp, sure header	30	1 00	3 00
Large Late Drumhead, an excellent fall and winter variety, grows to a large size.....	20	60	1 75
Large Late Flat Dutch, the most popular variety for late cultivation.....	20	60	2 00
Red Stone Head, used almost exclusively for pickling.....	25	75	2 50
Drumhead Savoy (American), the largest heading sort, of excellent flavor...	20	60	2 00
Burpee's Danish Round Head Cabbage, (See novelties) Pkt. 15 ct. $\frac{1}{4}$ oz. 25c. 1 oz. 45c. $\frac{1}{4}$ lb. \$1 25.			
Johnson's Thunderhead, (See novelties). Pkt. 15 cts. 1 oz. 50c $\frac{1}{4}$ lb. \$1 50.			

For very early use plant in the autumn, from 10th. to 25th. September, in a seed-bed, and protect in cold frames during the winter, being careful to set them down to the first leaf. Transplant in the following spring, as soon as the soil will admit. For autumn and winter use, plant in the seed-bed in May and early part of June, and when six inches high transplant into rich soil, two feet apart each way for the early varieties, and three by two and a half feet for the large winter varieties. To secure the best results, the soil should not be too dry, but should be thoroughly enriched, and the crop should be hoed at least once in ten days. Sow in hotbed early in spring, seed of the early kind for a second crop; also the late varieties for winter use.

DANISH BALL HEAD.

CARROT.

German, Moehren; French, Carotte; Spanish, Zanah.

	Per. oz. ¼ lb. Per lb.		
Early French Forcing, the earliest variety, valuable for forcing; root small and of fine flavor.....	\$0 15	\$0 40	\$1 25
Early Round Parisian, small for frames or open ground.....	15	40	1 25
Early Scarlet Horn, an old and favorite sort, much esteemed for early summer.....	10	30	90
Half Long Danvers, a variety intermediate in size and period of maturity between the preceding and the Long Orange.....	10	25	86
Half Long Stump Rooted Chantenay, like Nantes, broader shoulder.....	10	25	80
Half Long Pointed.....	10	30	1 00
Half Long Stump Guarande or Oxheart.....	10	30	1 00

Cauliflower delights in rich, moist soil and in dry seasons should be abundantly watered. The seeds may be sown in September and wintered over in the same manner as described for early cabbage. Where this is not practicable, it may be had nearly as well by sowing the seed in the hot-bed in January or February and transplanting the plants at two or three inches apart in boxes, or in the soil of another hot-bed, until such time as they are safe to be planted in the open ground which, in this latitude, is usually from the 15th of March to the 10th of April. If properly hardened off, they are seldom injured by being planted out too early.

The Carrot, like other root crops, delights in a sandy loam, deeply tilled. It should never be sown on newly manured ground as forked roots are sure to be the result. It is best to sow on ground that has been well manured the previous year for some other crop such as Celery, Potatoes, Onions or Peas, but avoid such crop as Cabbage and Turnips, or any of the tap rooted sections. For early or main crops sow the latter part of April; for later crops they may be sown any time until the beginning of June. Sow in rows about 15 inches apart and half an inch deep, thinning out to three or four inches between the plants.

The seeds may be sown in the open ground in April, as soon as the ground can be nicely worked. Sow about half an inch deep, and be careful to firmly press the soil over the seed; this should be done by treading over the rows with the feet after sowing; this prevents the air drying up the seed, which thereby loses its vitality and fails to germinate. Many valuable crops are annually lost by inattention to this important particular. After the seed is up, keep carefully clear of weeds until the time of planting June and July; the crops may be shorn off once or twice before planting: this makes them "stocky" and they suffer less in being transplanted. After the ground has been well prepared, plant in rows from three to four feet apart, according to the variety. setting the plants about six inches apart and pressing the soil firmly about the roots.

CORN SALAD.

Corn Salad, Feticus, or Lambs Lettuce is used to a considerable extent as a salad. It is sown on the first opening of spring in rows one foot apart, and is fit for use in six to eight weeks from the time of sowing. If wanted to come out early in spring, it is sown in September, covered up with straw or hay as soon as cold weather sets in, and is wintered over the same way as Spinach.

Sweet Fodder, for ensilage.....			20	60	1 00	3 00

Sweet Corn may be either sown in rows, four and a half feet apart, and the seeds planted at about eight inches in rows, or planted in the hills, at distances of three or four feet each way, according to the variety grown, or the richness of the soil in which it is planted. The taller the variety or the richer the soil, the greater should be the distance apart. The first plantings in this vicinity are made about the middle of May, and successive plantings every two or three weeks until the first week in July. In more southern latitudes planting is begun a month earlier and continues a month later.

ENDIVE OR CHICKORY—Continued.

Endive is one of the best salads for fall and winter use. Sow for an early supply about the middle of April. As it is used mostly in the fall months, the main sowings are made in June and July, from which plantations are formed at one foot apart each way in August and September. It requires no special, soil or manure, and after planting is kept clear of weeds until the plant has attained its full size, when the process of blanching begins. This is affected by covering up the plants as they grow, with slats or boards, which serves the purpose of excluding the light and air.

GREEN CURLED ENDIVE.

EGG PLANT.

German, Eicpflanze : French, Aupergine : Spanish, Bereinfiena.

NEW YORK EGG PLANT.

Northmount Egg Plant, (See Novelties). Pkg. 20c., $\frac{1}{2}$ oz. 75c, 1 oz. \$1.25,			
	Per oz. $\frac{1}{4}$ lb. Per lb.		
Pearl White, very fine grain and well flavored.	\$0 30	\$0 85	\$3 00
(Per pkt., 10c.)			
New York Improved, a superior market variety of large size and fine quality.	40	1 25	4 00
Black Beauty Tendage, earlier than N. Y. improved and as large, purplish black.	40	1 25	4 00
Early Dwarf Purple, medium size.	30	85	3 00
Black Pekin, a fine variety, bearing large round, deep purple fruits, fine grained and of superior quality.	40	1 25	4 00

The Egg Plant is a tender Vegetable, and must not be planted out until the weather is warm and settled. Sow early in spring in hot-beds, or if they are not convenient, sufficient plants may be raised for a small garden by sowing a few seeds in common flower pots or in boxes in the house. Plant out early in June from two to three feet apart.

KALE.

German, Blatter-Kohl; French, Chou Vert: Spanish, Breton.

Per oz. $\frac{1}{4}$ lb. Per lb.

Siberian German Greens or "Sprouts." This variety is extensively used for early greens for which it is sown in the fall in rows one foot apart, and treated in the same manner as Spinach; it is ready for use in early spring. Sowing can also be made in spring.	\$0 10	\$0 20	\$0 60
Dwarf Green Curled Scotch, a beautifully fringed, dwarf growing kind, with bright green leaves.	10	30	1 00
Tall Green Curled Scotch, tall growing, very hardy variety, leaves a bright green, beautifully curled.	10	30	1 00
Tall Brown German Curled, a very hardy and useful variety.	10	30	1 00
Dwarf Brown German Curled.	10	30	1 00

KALE.

Kale may be grown in almost any soil, but the richer it is the more abundant the product. Sow early in the spring, in prepared beds, covering the seeds thinly and evenly; transplant in June and treat in the same manner as for Cabbage. Of all the Cabbage tribe, this is the most tender and delicate, and would be much more extensively grown than it is, if its excellent qualities were generally known. The varieties are all extremely hardy, and are best when touched by frost.

SEA-KALE.

German, Seekohl, Meerkohl; French, Crambe Maritime; Spanish, Breton de Mar.

Sea-Kale Seeds, very much like Celery.....

Per oz. $\frac{1}{4}$ lb. Per lb.

\$0 25 \$0 75 \$2 50

Cultivate for its blanched shoots, which are cooked in the same way as Asparagus. A supply may be had all winter by planting the roots closely in warm cellar before frost. Sow one inch deep in drills two feet apart; thin out to six inches, and the next spring plant in hills three feet apart, three plants in each.

EARLY VIENNA
KOHL-RABI.

KOHL-RABI.

German, Kohl Rabi; French, Chou Rave; Spanish, Colinabo.

Per oz. $\frac{1}{4}$ lb. Per lb.

Early White Vienna , flesh white and tender; best market sort; good for table use.....	\$0 20	\$0 65	\$2 25
Early Purple Vienna , differing from the above in color, which is of a bluish purple.....	20	65	2 25
Large White or Green , large ball not so fine, but more productive.....	10	30	1 00

Kohl-Rabi, or Turnip-stemmed Cabbage, is a vegetable that is not so much cultivated as it deserves to be. The stem above the ground swells into a bulb somewhat resembling a Turnip; this again is covered with leaves. The edible part is the bulb, which is dressed and served like turnip, and is very delicate and tender when young. It is very hardy, withstands severe draught, and is a good keeper. Cultivate the same as Cabbage, but in hoeing be careful not to throw dirt into the heart of the plant; or the bulb cannot form.

LEEK.

German, Lauch; French, Poireau; Spanish, Puerro.

Per oz. $\frac{1}{4}$ lb. Per lb.

Large American Flag , the kind mostly grown for market.....	\$0 15	\$0 30	\$1 00
Large Carenten , a large-growing French variety or excellent quality.....	20	50	1 50
Large Rouen , very large and fine.....	20	50	1 50

The Leek is very hardy and easily cultivated; it succeeds best in a light, but well enriched soil. Sow as early in the spring as practicable, in drills one inch deep and one foot apart. When six or eight inches high they may be transplanted in rows ten inches apart each way, as deep as possible; that the neck, being covered, may be blanched. If fine leaks are desired, the ground can hardly be made too rich.

LEEK.

LETTUCE.

German, Laitick; French, Laitue; Spanish, Lechuga.

The Holyroad Hot Weather Lettuce, (see novelties) Pkt. 55c. 1 oz. 40c. $\frac{1}{4}$ lb. \$1.25..

New York Early Cabbage, large solid heads; inside white; very early.....	20	50	1 50

ROMAINE OR COS VARIETIES.

Trianon Cos, the best of the Cos variety.....	20	50	1 50
White Cos Romaine, sow early; tie up to blanch.....	20	50	1 50
Golden Yellow Cos, long standing, large solid heads, crisp and tender.....	20	50	1 50

Lettuce is the most popular of all salads. Boiled, is quite equal to Spinach; and it is also sometimes used in soups.

It is easy of cultivation, but likes a good rich soil.

For early use, sow Simpson and Tennis Ball under glass in February and March and transplant as soon as the ground can be worked. Later sowings may be made in the open ground for successions as long as the weather permits; thin out well, or the plants will be weak, and set in rows two feet apart and eight inches between the plants. The best early plants are obtained by sowing in the open ground in September, and transplanting to cold frames the latter part of October, being wintered over in the same manner as early Cabbage. Lettuce requires good ground and abundant moisture.

LARGE WHITE CABBAGE LETTUCE.

MELON, MUSK.

MUSHROOMS.

German, Chimpignonbrut; French, Champignon; Spanish, Fongo.

Imported English Spawn,.....	15c. per lb.	10 lbs, \$1 00	100 lbs, \$9 00
Imported French Spawn,.....		30c per lb.	10 lbs, 2 50

Mushrooms should be grown either in a building especially erected for the purpose or some shed, stable or cellar, where the temperature of from 40 to 60 degrees can be kept up in winter. To every barrow load of fresh horse dropping add about the same weight of loam or soil of any kind that has not been manured. Turn the heap every day, so that it is not allowed to heat violently, until you have quantity enough to form a bed of dimensions required. Be careful that your heap is under cover, so that it cannot possibly get wet.

The most convenient size bed is from three to four feet long and eight inches deep.

Prepare the mixture of loam and manure, making the bed in layers, and pounding down each with the back of a spade. Leave this to heat through for a few days, and as soon as the heat subsides to 90 degrees, make holes in the bed about a foot apart each way into which put pieces of spawn two or three inches in diameter; fill up the holes with the compact and at the expiration of a week or ten days the spawn will have thoroughly diffused itself through the bed. Now spread a layer of fresh soil over the heap to the depth of two inches, firm it down moderately and cover with three or four inches of hay or straw. Examine the bed often to see that it does not get dry. When water is given it should be at a temperature of about 100 degrees,

MUSHROOMS.

MUSTARD.

German, Senf; French, Moutarde; Spanish, Mostaga.

	Per oz.	$\frac{1}{4}$ lb.	Per lb.
White London, best of salads.....	\$0 05	\$0 10	\$0 25
Black, used for cooking and salads.....	05	10	25

Mustard in the green state is a refreshing salad, mixed with Cress, Lettuce, or other salad plants. It is necessary to make frequent sowing of it, as it should be cut and used in a very young state, even before the first rough leaf has appeared. The seed should be sown thickly in light soil, the surface of which should be made very smooth. The seed should be pressed into the soil with the back of a clean spade.

NASTURTIIUM.

German, Nastrutian; French, Capusine; Spanish, Maranuela.

	Per oz.	$\frac{1}{4}$ lb.	Per lb.
Tall Scarlet,.....	\$0 15	\$0 40	\$1 25
Tall Yellow.....	15	40	1 25
Tall Nasturtium, Mixed.....	10	25	75
Dwarf Nasturtium, Mixed.....	10	35	1 00

Cultivate both for use and ornament; the green seed pods preserved in vinegar make an excellent pickle. The young leaves are also useful in salads. Its scarlet and orange-colored flowers, which appear freely all summer, add a charm to the garden.

ONION.

German, Zweibel; French, Wignon; Spanish; Cebolla,

	Per oz.	$\frac{1}{4}$ lb.	Per lb.
Early Red Flat, about ten days earlier than the Large Red, and not quite so large..	\$0 20	\$0 65	\$2 25
Large Red Wethersfield, the staple variety of the Eastern onion growers; of large size; deep in color, and a good keeper..	20	60	2 00
Yellow Globe Danvers, an excellent variety mild flavor and very productive; ripens early and a good keeper.....	15	50	1 50
Prizetaker or Yellow Globe Spanish, immense size.....	20	65	2 25
White Portugal or Silver Skin, a handsome onion of mild flavor; extensively grown for pickling.....	35	1 00	3 00
Southport Red Globe, similar to the large Red in flavor and color, but quite distinct in form, being nearly globular....	20	50	1 75
Southport White Globe, form nearly ovoid symmetrical, keeps well, is an excellent variety.....	30	1 00	3 00
Southport Yellow Globe, same as above, except in color.....	20	50	1 75
White Flat Bermuda, very early.....	25	80	2 75
Red Flat Bermuda, very early.....	25	80	2 75

ITALIAN VARIETIES.

Adriatic Barletta, white, new variety, fully two weeks earlier than the queen..	20	60	2 00
Early Queen, excellent variety, very early, a good keeper and mild flavor, white	20	60	2 00
Giant Rocca, a splendid large variety from Naples, of globular shape bright brown skin and delicate flavor.....	20	60	2 00

The onion thrives best in a rather strong, deep, rich, loamy soil, and unlike most vegetables, succeeds well when cultivated on the same ground for successive years. The ground should be deeply trenched and manured the previous autumn, and laid up in ridges during the winter to soften. As early in the spring as the ground is in working order, commence operations by leveling the ground with a rake, and tread firmly; sow thinly in drills about a quarter of an inch deep and one foot apart; cover with fine soil and press down with the back of a spade or a light roller. When the young plants are strong enough, thin gradually so that they stand three or four inches apart.

ONION SETS.

	Per qt. $\frac{1}{4}$ pk.	Per pk.	Per bu.

OKRA OR GUMBO

German, Essbarer Safran; French, Gomo, Spanish Quibombo.

DWARF GREEN OKRA.

	Per oz. $\frac{1}{4}$ lb.	Per lb.
Improved Dwarf White, long slender pods, very productive; only 14 in. high	\$0 10	\$0 20
Dwarf Green, early and productive	10	20
Long Green, fine long pods, very good	10	20

The pods in a young state are used in soups, sauces and stews, and are very wholesome and nutritious. It is the easiest culture and grows freely, bearing abundantly when grown in ordinary garden soil. It is sown at the usual time of all tender vegetables in drills two inches deep, setting the plants from two to three feet apart.

PARSNIPS.

German, Pastinake; French, Panals; Spanish, Chirivia.

	Per oz. $\frac{1}{4}$ lb.	Per lb.
Guernsey or Cup, leading variety	\$ 10	\$0 20
Long Smooth or Hollow Crown, long roots	10	20
Early Round	10	20

They succeed best in a deep rich soil that has been well manured the previous season, as manure freshly applied tends to the production of forked and ill-shaped roots. Sow the seed early in spring in drills eighteen inches apart in the garden, and three feet apart in the field, thin the plants to six inches in the drill.

PARSLEY.

German, Petersilie; French, Persil; Spanish, Perjil.

	Per oz. $\frac{1}{4}$ lb.	Per lb.
Extra Double Curled, a fine dwarf variety, excellent for garnishing	\$0 10	\$0 20
Fern Leaves, the most beautiful form of Parsley, resembling crested fern or moss in its growth	10	25
Plain Leaves, hardier than the curled variety	10	20
Moss Curled	10	20
Hamburg, or Rooted, edible roots	10	20

Should be sown very early in the spring in beds or in lines, and the seeds which are somewhat slow to vegetate, should be previously soaked 24 hours in warm water. The soil should be kept free from weeds, which should be extracted by the hand, so as to avoid disturbance of the seeds when about to germinate. As soon as the plants are large enough they should be thinned out so as to stand five or six inches apart.

MOSS CURLED PARSLEY.

PEAS.

German, Erbse; French, Pois; Spanish, Guisantes.

XTRA EARLY VARIETIES.

PRIMO PEA NO. 1

	Per qt. $\frac{1}{2}$ pk.	Per pk.	Per bu.
Primo , Very early, cross between Gradus and Early William. Pods same as Gradus but with this advantage much more prolific and harder. 25 cts. Per pkt.			
Gradus or Prosperity , earliest wrinkled Pea grown. Can be sown early as the round sorts. Large peas and pods, splendid flavor. Requires no sticks, reaching only 36 inches in ordinary good soil. Height 3 ft.	\$0 40	\$1 50	\$2 50
Nott's Excelsior , extra early dwarf wrinkled, pods larger than American Wonder, 1 foot.	35	1 25	2 00
American Wonder , earliest wrinkled variety, $1\frac{1}{2}$ feet.	35	1 25	2 25
Alaska , very early and retain their color well, height $2\frac{1}{2}$ feet.	30	1 00	1 75
First and Best , one of the very best extra early Peas. An improved strain of the Extra Early Market, height $2\frac{1}{2}$ feet.	30	1 00	1 75
Little Gem , a dwarf green wrinkled, Market, very prolific, of superior flavor, and a first early; $1\frac{1}{2}$ feet.	30	1 00	1 75
Premium Gem , a fine flavored dwarf, wrinkled variety; good cropper and fine quality. Height 18 inches.	30	1 00	1 75

SECOND EARLY VARIETIES

Heroine Medium Early , green wrinkled, height $2\frac{1}{2}$ feet.	35	1 25	2 00
Everbearing , good size pea, long pod, height $2\frac{1}{2}$ feet.	30	1 00	1 75
McLean's Advancer , early green wrinkled varieties, delicious flavor, $2\frac{1}{2}$ feet.	35	1 25	2 00
Pride of the Market , very large pods, green peas, sow thin, height 2 feet.	30	1 00	1 75
Yorkshire Hero , or dwarf champion.	30	1 00	1 75
Abundance , 18 inches high, 6 to 8 peas in a pod, large and wrinkled	30	1 00	1 75

GENERAL CROP

Champion of England , a popular wrinkled variety of delicious flavor; profuse bearer. Peas are very large, tender, height 5 ft.	35	1 25	2 00
Telephone . This is the best pea for general crop, both for home and market use. Immediately productive and of finest quality. Vines very strong, averaging 18 to 20 large pods per stalk, 4 ft.	35	1 25	2 25
Stratagem , mammoth pods, well filled, height $1\frac{1}{2}$ feet.	40	1 25	2 25
Black-Eyed Marrowfat , grown for market, hardy, productive, 3 feet	25	75	1 25
White Marrowfat , an old favorite sort for market, 4 feet.	25	75	1 25
Tall Sugar , edible pods, a fine flavored variety, can be used in the green state like string beans. height 5 feet.	50	1 75	3 00
Dwarf, Sugar edible pods.	35	1 25	2 00

PEAS—Continued.

Peas come earlier to maturity in light soil. For general crop a deep rich loam, or strong loam inclining to clay, is best. For early crops decomposed leaves of leaf mould should be used, or if the soil is very poor, strong manure may be employed. For general crop a good dressing should be applied, and for the dwarf growing kinds the soil can hardly be too rich. When grown as a market crop, peas are not staked, but sown in single rows, two or three inches deep, two or three feet apart according to the variety. When grown in small quantities, for private use, they are sown in double rows six or eight inches apart, and the rows three feet apart, the tall varieties staked up by bush. For an early crop, sow as soon as the ground can be worked, and make repeated sowings every two weeks for succession. A quart is sufficient for a row of about eighty feet.

PEPPER.

German, Pfeffer; French, Piment; Spanish, Pimiento.

PEPPERS,

	Per oz.	$\frac{1}{4}$ lb.	Per lb.
Ruby King, very large; bright red.....	\$0 25	\$0 65	\$2 25
Sweet Spanish, one of the largest mild and pleasant best for salads.....	25	65	2 25
Large Bell or Bull Nose, an early variety of mild flavor.....	25	65	2 25
Sweet Mountain, or Mammoth, of large size, best for mangoes.....	25	65	2 25
Chinese Giant, double the size of Ruby King. This is the largest and finest mild Red Pepper. Flesh is thick and unusually mild. Productive bearer.....	40	1 25	4 00
Long Red Cayenne, used for Pepper sauces, very pungent.....	25	65	2 25
Long Yellow Cayenne, similar to long Red, except in color.....	30	80	3 00
Golden Queen Mammoth, large Golden Yellow Early.....	25	65	2 25
Chili, very piquant and prolific, fruit conical, bright scarlet.....	25	65	2 25
Oxheart, heart shaped, very fine, excellent for pickling.....	25	75	2 50
Golden Dawn Mango. This is a remarkably prolific Pepper of the Bell class of a magnificent golden color.....	25	75	2 50

The Pepper or Capsicum is valuable for its seasoning qualities, as well as for pickling. Sow early in heat and transplant when the weather is warm and settled, or sow in warm situation in the garden about the middle of May. Plants should be set a foot and a half apart.

POTATOES.

German, Kartoffel; French, Pomme de Terre; Spanish, Petata.

Houlton Extra Sunlight, new. Very early, good yielder.....	} Prices on application.
Noroton Beauty, extra early sort, very productive, uniform round shape.....	
Houlton Hebron, white skin, the most popular variety in cultivation.....	
Houlton Rose, the standard variety.....	
Houlton Early Queen. Early and productive.....	
Houlton Green Mountain, late variety, good keeper, white and mealy.....	

POTATOES-Continued.

Houlton Irish Cobbler. A white potato of splendid quality, medium size, but run very evenly. Size strong and well developed, flesh white, mealy when cooked and of excellent flavor, very early, ripening before Early Queen. You will not be disappointed in this potato, which cannot be recommended too highly.

The foregoing varieties are grown for us at Houlton, Aroostock Co., Me., are the choicest stock ever offered. Coming from the extreme northern part of Maine, and raised without the aid of manure, causes them to have very strong eyes, and to be hardy and very smooth. Productiveness unsurpassed. The following are raised for us in Washington County, northern New York:

Thorburn, very early, very productive..... } Prices on
Early Ohio, a seedling of the Early Rose, ripening a week earlier, productive..... } application.

EXTRA EARLY SUNLIGHT POTATO.

PUMPKIN.

German, Kuerbis; French, Courge; Spanish, Calabaz a Totanera.

CHEESE PUMPKIN.

Per oz. $\frac{1}{4}$ lb. Per lb.

Calhoun , flesh wonderfully thick and fine grained, cooks very yellow.....	\$0 10	\$0 25	\$0 75
Large Cheese , the best variety, hardy and productive.....	10	20	60
Connecticut Field , very productive, largely grown for feeding stock 20c. per quart, \$3.00 per bushel.	10	15	25
Mammoth King , grows to an immense size.....	15	35	1 00
Small Sugar , fruits medium size, of excellent keeping quality. Flesh very sweet.	10	20	50
Cushaw , salmon color, crooked neck.....	10	25	75
Tennessee Sweet Potato . Bell shaped, thick, whiteflesh, nothing finer for pies.....	10	25	80

These are usually planted in fields of Corn or Potatoes, but may be profitably raised in fields by themselves. Sow in May; in hills eight feet apart.

RADISH.

German, Retting, French Radis, Spanish, Robanitos.

French Breakfast, of quick growth, very mild and tender, of oval form, color scarlet, tipped with white.....	10	20	60
Long Scarlet, one of the leading market kinds.....	10	20	50
White Summer Turnip, a summer variety of mild flavor.....	10	20	60
Yellow Summer Turnip, grows to a large size.....	10	20	60

WHITE SUMMER TURNIP RADISH.

Rose China Winter, flesh firm and piquant: excellent for winter use.....	10	20	50
Black Spanish Winter, long, one of the hardiest and best for winter use.....	10	20	60
Black Spanish Winter, round.....	10	20	60
Giant Stuttgart, Summer favorite, German sort.....	10	20	60
California Mammoth White, a giant white fleshed Fall Radish.....	10	25	75
White Spanish, long, rather milder than Black.....	10	25	75
White Strasburg, very large, German sort.....	10	20	60
White Vienna or Lady Finger, crisp and tender in summer.....	10	20	60

There are two classes of Radishes, those for Spring and Summer use, which are small and arrive quickly at maturity, and with proper care can be kept all winter. The summer radishes should be used while young and tender; if allowed to grow too long they become tough and stringy; they thrive best in light rich soil. For a successive supply, sow from the middle of March until September, at intervals of two or three weeks. For an early supply, they may be sown on a mild hotbed in February. The winter varieties may be sown from the latter part of July to the middle of September.

RHUBARB.

German, Rabarber; French, Rhuperbe; Spanish, Ruibarbo.

	Per oz.	$\frac{1}{4}$ lb.	Per lb.
Linnaeus, early, large and tender.....	\$0 15	0 40	1 25
Victoria, very large, later than Linnaeus.....	15	40	1 25
Roots.....	15c each;	1.50	per dozen

Sow early in spring, in drills a foot apart, thinning out to about the same distance apart in the rows when a few inches high. In fall or following spring, transplant into deep, rich soil, about three feet apart each way.

SPINACH.

German, Spinat; French, Spinard; Spanish, Espinaca.

Special price on lots of 10 to 25 lbs.

	Per oz.	$\frac{1}{4}$ lb.	Per lb.
Long Standing, Round Leaved.....	0 10	0 15	0 25
Flander's Round Leaved, the variety commonly grown, good for spring or fall sowing.....	10	15	35
Large Viroflay, a new variety, with leaves much larger and thicker than the old variety.....	10	15	25
Victoria New, dark green color, sow early.....	10	15	35
Bloomsdale Savoy Leaved, a large, curled, thick leaved variety, the market gardener's favorite....	10	15	35
Prickly, prickly seeded, with triangular arrow-shaped leaves.....	10	15	35
New Zealand, produces leaves in great abundance throughout the summer, should be raised in heat and transplanted three feet apart each way into light, rich soil.....	10	25	75

Sow in fall for spring use, in drills a foot apart, thinning out the plants to three inches apart in the rows. Spinach is very hardy and does not require protection except in very exposed places, where a covering of straw or leaves is useful. For summer use sow as early as possible in spring, and at frequent intervals during the season for succession.

SALSIFY, OR OYSTER PLANT.

German, Bocksbart; French, Salsifis; Spanish, Salsifi.

	Per oz.	$\frac{1}{4}$ lb.	Per lb.
Long White French.....	0 20	0 50	1 50
Mammoth Sandwich Island.....	15	40	1 25

This very nutritious vegetable requires the same cultivation as Carrots or Parsnips. It is quite hardy and the roots may remain in the ground all winter; a quantity can be taken up and packed in earth or sand, and stored away for use when needed. It makes a fine soup, like the oyster. It is also half-boiled, grated fine, made into small balls, dipped into butter, and fried.

SALSIFY.

SQUASH.

German, Garten Kuerbiss; French, Courge; Spanish, Calabaza Bonetera.

WHITE BUSH SQUASH.

	Per oz.	$\frac{1}{4}$ lb.	Per lb.
Mammoth Summer Crookneck, twice size of Summer Crookneck.....	0 10	0 25	0 75
Fordhook Squash, bright yellow, good keeper.....	10	20	75
Early Golden Bush Scalloped. True bush growth producing fruit ready for use early in the summer.....	10	25	75
Early White Bush Scalloped, a white variety of the above.....	10	25	75
Summer Crookneck, early, productive and of good quality.....	10	25	75
Canada Winter Crookneck, flesh close grained, sweet and fine flavored....	10	25	75
Boston Marrow, a very valuable medium early variety, an excellent keeper and of superior quality.....	10	25	75

SQUASH—Continued.

Hubbard, the best Winter Squash, fine grained, dry, keeps well and is of excellent flavor.....	15	35	1 00
Mammoth Chili, grows to a large size, often weighing two hundred pounds, excellent for stock.....	15	35	1 00
Vegetable Marrow. A favorite English sort, skin greenish-yellow, flesh white, soft and rich flavor.....	20	50	1 50

Squashes are divided into two classes, Summer and Winter. The Summer varieties come into use about midsummer, and are eaten when the rind and flesh are young and tender. The Winter varieties are left on the vines until they are thoroughly ripe, gathered in the Fall, and stored away for winter use. If well ripened and kept in a good cellar, they can be preserved until May. Prepare hills for the seeds by incorporating two or three shovelfuls of well rotted manure with the soil, for each hill. For the bush varieties, from three to four feet each way, and for the running sorts from six to eight feet. Eight or ten seeds should be sown to each hill, thinning out after they have attained their rough leaves, leaving three or four of the strongest plants

SWISS CHARD.

SWISS CHARD OR SILVER BEET.

This is a Beet producing leaves only, of a quality superior to those of the ordinary Beet, and excellent greens. Cultivate about the same as spinach, by sowing in early spring in drills about a foot apart. Oz. 10c $\frac{1}{4}$ lb. 20c. lb. 50c.

TOBACCO.

Connecticut Seed Leaf. This variety is best adapted to the climate of the Northern and Middle States.....

.....Per oz., 25c; $\frac{1}{4}$ lb., 75c; per lb., \$2.50

Havana, imported seed, Vuelto de Abbajo.....

.....Per oz., 45c; $\frac{1}{4}$ lb., \$1.50; per lb., \$4.50

TOMATO.

German, Liebesapfel; French, Tomote; Spanish, Tomata.

	Per oz. $\frac{1}{4}$ lb. Per lb,

Imperial, very smooth, bright red color, good size.....	25	75	2 50
New Buckeye State, large size, similar to Livingston's Beauty, little darker in color.....	30	85	3 00
Thorburn's Terra Cotta, a cross between the Stone Peach and Ponderosa.....	25	75	2 50
Ponderosa. Very large and solid.....	40	1 25	4 00
New Stone, large and smooth.....	30	85	3 00

LIVINGSTON'S NEW CORELESS TOMATO.

TOMATO—Continued.

	Per oz. $\frac{1}{4}$ lb. Per lb.		
Livingston's Perfection, Very early round; smooth tough skin brilliant; solid and of rich flavor; ripening thoroughly. A favorite market variety.....	\$0 25	\$0 75	\$2 50
Ignotum, early large and smooth.....	25	75	2 50
Livingston's Beauty, large dark crimson, thick skin.....	25	75	2 50
Dwarf Champion, resembles Acme, early.....	30	85	3 00
Acme, a beautiful variety, fruit of medium size, form perfect and very smooth, ripens all over and through at the same time. This variety seems to possess all the good qualities that can be desired in a Tomato.....	25	75	2 50
Trophy (selected), the leading variety for general cultivation, and when properly grown will give satisfaction. The seed we offer is carefully selected from pure stock.....	25	75	2 50
Golden Queen. A first class large, smooth, pure yellow Tomato. Fine bearer and of excellent flavor.....	25	75	2 20
Yellow Plum, used principally for pickling.....	25	75	2 50
Red Pear Shape, used principally for preserving and pickling.....	30	85	3 00
Red Currant, for preserves.....	30	85	3 00
Yellow Cherry, similar to above, except in color.....	25	75	2 50

The seed should be sown in a hotbed about the first week in March, in drills five inches apart and half an inch deep. When the plants are about two inches high, they should be set out four or five inches apart in another hotbed, or removed into small pots, allowing a single plant to a pot. About the middle of May the plants may be set in the open ground, at a distance of three to four feet apart in hills in which a good shovelful of rotted manure has been mixed.

TURNIP

American Improved Purple Top, the leading variety, of fine quality, valuable both for the table and for feeding stock.....	10	20	50
--	----	----	----

PURPLE TOP STRAP LEAF TURNIP

Carter's Imperial Hardy Swede, an English variety, highly recommended as producing enormous crops. Per oz., 10c; $\frac{1}{4}$ lb., 20c; per lb., 60c.

White or Sweet German, a large, solid variety. Per oz., 10c; $\frac{1}{4}$ oz., 20c; per lb., 50c.

Laing's Improved, globe-shaped, with small top and tap root. Per oz., 10c; $\frac{1}{4}$ lb., 20c; per lb., 60c.

For spring crop, commence sowing early varieties as soon as the ground can be worked, in drills fourteen inches apart; thin out the plants to five or six inches apart. Keep clear from weeds, and when the bottoms begin to enlarge, brush away the earth from about the roots to the depth of an inch or more, and give them a light dressing

TURNIP—Continued

of wood ashes. This is the surest mode of obtaining fair and smooth Spring Turnips in old gardens, where they are almost certain to grow wormy if the earth is allowed to remain in contact with the roots. It is important to get them started very early so that they may have time to grow to a sufficient size before very hot weather, when they will soon become tough and strong. For the Fall and main crop, sow from the middle of July to the last of August in drills as directed for the Spring sowing. In the field, Turnips are more generally sown broadcast though much larger crops are obtained by drill culture.

SWEET POT AND MEDICINAL HERB SEEDS.

Herbs are valuable for culinary and medicinal purposes, but they do not always receive the attention which they deserve. They are easily grown, and when preserved by drying are ready for use at any season of the year. Sow in Spring as soon as the weather is warm, and thin out as the plants grow up.

	Per oz.
Anise (<i>Pimpinella anisum</i>), an annual, cultivated for its seed and its leaves, which are used for garnishing and for seasoning.....	\$0 10

Borage (<i>Borago officinalis</i>), hardy annual, sometimes used as a pot herb, and also for garnishing, but chiefly for claret cup and other cooling drinks. Bees are very partial to the flowers.....	10
Caraway (<i>Carum cauri</i>), hardy biennial, cultivated for its seeds. which are largely used in various kinds of confectionery and for giving flavors to liquors.....	10
Catnip (<i>Nepeta cataria</i>), perennial.....	45
Coriander (<i>Coriandrum salivum</i>), an annual, raised for its seeds, which are used by confectioners, and sometimes to disguise the taste of medicine.....	10
Dill (<i>Anethum graveolens</i>), annual, the leaves are used in soups and sauces, and the seeds are sometimes added to pickle cucumbers to heighten their flavor. Medicinally they are good for flatulence and colic in infants.....	10
Fennel (<i>Antehum foeniculum</i>), hardy perennial, leaves used for garnishing, and in the preparation of various fish sauces.....	15
Horehound (<i>Marrubium vulgare</i>), hardy perennial, principally used for medicinal purposes.....	20
Hyssop (<i>Hyssopus officinalis</i>), hardy perennial, the leafy tops and flowers are used for making hyssop tea.....	20
Lavender (<i>Lavandula spica</i>), a popular aromatic herb.....	20
Majorum, Sweet (<i>Origanum Majorana</i>), for seasoning.....	15
Opium Poppy (<i>Papaver somniferum</i>).....	20
Rosemary (<i>Rosmarinus officinalis</i>), an aromatic herb.....	40
Rue (<i>Ruta graveolens</i>), used for medicinal purposes, also frequently given to fowls for the roup.....	30
Saffron (<i>Carthamus tinctorius</i>).....	15
Sage (<i>Salvia officinalis</i>), much used for flavoring various articles of cookery. It is also possessed of medicinal virtues. Tea made from its leaves is a soporific: causing profuse perspiration.....	15
Summer Savory (<i>Satureia hortensis</i>), annual. It has medicinal and culinary uses. Its aromatic leaves are much esteemed in salads and soups.....	15
Sorrel, Broad Leaved, used in salads.....	15
Thyme, Broad Leaved English, hardy perennial. Thyme is used in various ways for soups, sauce and dressings, and a tea is made of the leaves which is a great remedy for nervous headache.....	50
Tarragon, Roots, each 50 cts.....	
Tansy (<i>Tanacetum vulgare</i>).....	45
Wormwood (<i>Antemesia abietnium</i>), used for medicinal purposes: it is also beneficial to poultry and should be planted in poultry grounds.....	20

MUZZY BROTHER'S CELEBRATED LAWN GRASS.

	1 qt.	2 qt.	4 qt.	8 qt.	1 bu.
Muzzy Bros.' Fine Mixed Lawn Grass. Composed of a mixture of the finest grasses; sow four to five bushels per acre.....	\$0.15	\$0.25	\$0.50	\$0.75	\$3.00
Muzzy Bros.' Special Lawn Mixture. This extra choice mixture contains a large proportion of the finer and more expensive species of grasses, in extra heavy samples, producing a turf of the closest and finest texture possible.....	0.25	0.40	0.75	1.25	4.50
Muzzy Bros.' Shady Lawn Mixture. A mixture of grasses that thrive in shady situations, under trees, or close to walls where there is little sun.....	0.30	0.50	0.85	1.50	5.00

QUANTITIES TO BE USED

Plot 20 feet by 20 feet, sow 1 quart	Plot 25 feet by 50 feet, sow 4 quarts
" 25 " " 25 " " 2 "	" 25 " " 100 " " 8 "
Plot one acre, sow 3 bushels.	

For large lawns, where turf has become bare through constant use, it is only necessary to sow fresh seed at the rate of one to two bushels to an acre. On such lawns it is well to use our Lawn Dressing, which can be raked in.

HOW TO MAKE A LAWN.

The ground ought to be carefully prepared during the winter, by draining if found requisite, and digging to the depth of six to twelve inches, according to the nature of the soil. The land should then be leveled and raked to remove stones, etc., and then made firm with a heavy iron roller. When the natural soil is too stony, a supply of good mould should be spread over it to a depth of two or three inches. In March or April, before sowing the seed, the ground ought to be thoroughly cleaned and made perfectly level with the iron roller and as the subsequent appearance of the lawn depends in a great measure on this part of the preparation, it is of the utmost importance it should be well done. The ground should then be evenly raked and the seeds sown. April and September are the best months for sowing. The seed should be sown on a calm day, at the rate of four bushels to the acre.

After the sowing has been accomplished, the ground should be again rolled, and as soon as the young plants have attained the height of two or three inches, the whole plot should be carefully gone over with a sharp scythe, and from the months of April to October it should be mown every ten days. Mowing machines are excellent after a comparatively close turf is established; but for the first six months' sowing the scythe should be used in preference to the machine. **Frequent mowing and rolling are indispensable to maintain the turf in good order.** By adopting these means a close green sward will be obtained in a short time.

For lawns requiring improvement, and on croquet grounds, where the turf has become bare through constant use, it is only necessary to sow fresh seed at the rate of one or two bushels to the acre, either in the Spring or Fall, using a small tooth rake and rolling afterwards. A slight dressing of manure, late in the Fall, will often be found beneficial in encouraging the growth of finer kinds of grasses, and helps to produce a close growing turf.

MEADOW AND PASTURE MIXTURES

The formation of permanent and productive meadows and pastures is of great value to farmers, and has been given thorough study by numerous experts, resulting in formulas that will give good results under the varying conditions of our climate.

It is a well known fact that a heavier and more prolonged growth is produced by a mixture of many sorts of grasses than by only one or two. Some sorts do best on high dry soil, while others prefer plenty of moisture. Some mature so early and others so late that there is no time in the season when one sort or another is not at its best. Grass seed may be sown either early in spring or in fall, from September to the middle of October in this latitude. Below we give mixtures that we are confident will give good results.

MEADOW MIXTURE FOR ONE ACRE

No. 1. On Good Land, neither Too Dry or Too Wet

Price \$3.00 per bushel of 20 lbs. Sow 2 bushels to the acre.

No. 2. For High and Dry Land.

Price \$3.50 per bushel of 20 lbs. Sow 2 bushels to the acre.

No. 3. On Wet Land.

Price \$3.00 per bushel of 20 lbs. Sow 2 bushels to the acre.

PASTURE MIXTURE FOR ONE ACRE

No. 4. On Good Land, neither Too Wet or Too Dry.

Price \$3.50 per bushel of 20 lbs. Sow 2 bushels to the acre.

No. 5. On Dry Land.

Price \$4.00 per bushel of 20 lbs. Sow 2 bushels to the acre.

No. 6 On Wet Land.

Price \$3.50 per bushel of 20 lbs. Sow 2 bushels to the acre.

CLOVERS.

(Subject to variation in Price.)

Red Clover, Medium (<i>Trifolium pratense</i>). Price variable, 60 lbs. to bushel.	} Market Price
Red Clover, Large or Pea Vine. Price variable.....	
White Clover, (<i>Trifolium repens</i>).....	
Alfalfa or Lucerne, requires a deep, rich soil, and in such will produce several crops every season. Fifteen pounds to the acre.....	
Alsike or Swedish (<i>Trifolium hybridum</i>). Ten pounds to the acre.....	
Crimson or Italian (<i>Trifolium incarnatum</i>), sown in Autumn, it furnishes an early fodder, and is excellent for soiling. Twenty pounds to the acre. Price variable.....	
Bokhara Clover (<i>Melilotus alba</i>), affords excellent feed for bees, it is a valuable soiling plant; lasts two years. Ten pounds to the acre.....	}
Yellow Trefoil (<i>Medicago lupulina</i>) Hop clover. Fifteen pounds to the acre.....	

GRASS SEED.

These Prices are Subject to Variation.

	Per 10 lbs.	Per lb.
Blue Grass Kentucky , (<i>Poa pratensis</i> ,) extra clean; does well on light dry soils; recommended for permanent pasture; it requires two or three years to form a good sod, and does not arrive at its perfection as a pasture grass until it is much older; valuable in mixtures for lawn.....	\$2 25	\$0 25
Creeping Bent Grass, Florin , (<i>Agrostis stolonifera</i> ,) used by many for lawns, well adapted to most places.....	3 25	35
Crested Dogtail , (<i>Cynosurus cristatus</i> ,) good for permanent pasture for sheep, is productive and early, suffers but little from dry weather, and is one of the best grasses for lawns. 25 lbs. to the acre.....		50
Hard Fescue , (<i>Festuca duriuscula</i> ,) admirable pasture grass of fine quality, thrives well in dry situations. 30 lbs. to the acre.....	2 50	27
Meadow Fescue , (<i>Festuca pratensis</i> ,) this is excellent for hay when sown with other grasses, such as Orchard Grass and Timothy, and is also considered one of the best grasses for permanent pasture on a great variety of soils. 40 lbs. to the acre.....		28
Sheep's Fescue , (<i>Festuca ovina</i> ,) does well in high dry and open pastures, is of short, dense growth, and valuable in lawn mixtures. 30 lbs. to the acre.....	2 65	28
Meadow Foxtail , (<i>Alopecurus pratensis</i> ,) regarded as one of the most desirable grasses for permanent pasture, being early and rapid growth, 25 lbs. to the acre.....	4 00	45
Meadow Soft Grass , (<i>Holcus lanotus</i> ,) will grow with little or no care in any soil; it is chiefly cultivated where the better grass will not grow. 3 bu. to the acre; 7 lbs to bushel.....	2 25	25
Orchard Grass , (<i>Dactylis glomerata</i> ,) is one of the most desirable of all pasture grasses, coming early in the Spring and remaining later in the Autumn than any other, 3 bu. to the acre.....	2 50	27
Red Top Grass , (<i>Agrostis vulgaris</i> ,) good permanent grass, excellent for lawns, pastures, etc., and sowing with Timothy and Red Clover for cutting for hay. Sack 50 lbs., \$3.00; per bushel of 14 lbs. \$1 00.....		
Fancy Red Top Grass , cleaned like Timothy; free from chaff.....	2 20	25
Rhode Island Bent Grass (<i>Agrostis canina</i> .) best of all grasses for lawn where only one variety is used.....	3 25	35
Rye Grass English , (<i>Lolium perenne</i> ,) Probably one of the most important and valuable of the cultivated grasses: is naturally adapted to almost any soil; matures early, and is very productive, but contains less nutrition than Orchard Grass.....	1 50	20
Rye Grass Italian , (<i>Lolium Italicum</i> .) This ripens much sooner than the English Rye Grass and is greatly preferred by cattle, and greedily eaten by them, either in a green or dry state.....	1 20	15
Sweet Vernal Grass , (<i>Anthoxanthum odoratum</i> ,) is not valuable when sown alone, but when sown with other grasses, it becomes so because of its early growth. It also yields a delightful odor when cured for hay. 10 lbs. to the acre, mixed with other grass annuals.....	2 50	25
Tall Meadow Oat Grass , (<i>Avena elatior</i> ,) very valuable for pasture on account of its early and luxuriant growth. It shoots up very quickly after being cut, and produces a thick crop of aftermath, which also makes it valuable as a soiling crop. It has been lately in demand and is much valued in the South.....	3 00	35
Timothy, Herd's Grass , (<i>Phleum pratense</i> .) As a crop to cut for hay, this is probably unsurpassed. It thrives best on moist, peaty or loamy soils, and is not suited to light or sandy soils, although on such it can with care, be made to produce fair crops. Price according to market. 45 lbs. to bushel.....	Market Price	
Rough Stalked Meadow Grass , (<i>Poa trivallis</i> ,) produces a constant supply of highly nutritious herbage, particularly on dry soils; one of the most valuable for laying down pastures and meadows on soils either moist or moderately dry. 14 lbs. to the bushel; 20 lbs. to the acre.....	3 50	40
Wood Meadow Grass , (<i>Poa nemoralis</i> .) This grass grows well both on shady and exposed situations. 30 lbs. to the acre.....		80
Yellow Oat Grass , (<i>Avena flavescens</i> ,) good for dry pastures and meadows. Is much relished by sheep.....		1 10
Golden or German Millet . This variety is a heavier cropper than the Hungarian Grass, and needs, a longer season and stiffer soil. Grows from three to five feet high, stands up well, is easily cured, gives general satisfaction. Three pecks to the acre. Per bushel of 48 lbs. Market Price.		

GRASS SEED—Continued.

Hungarian Grass, a valuable forage plant, succeeds well on dry, light soil; withstands the drought remarkably, remaining green when all other vegetation is parched up, and if its development is arrested by dry weather, the least rain will restore it to vigor. Sow broadcast. Three pecks to the acre. Per bushel of 48 lbs., -----

Market Price.

GRAINS.

All grains are selected expressly for seed, and are strictly pure and true to name.

SPRING WHEAT, 60 lb. Bushel.

Mashatchewan Fife -----

China Spring, chaff bearded variety, and a general favorite -----

Mediterranean Spring. This variety has been grown with great success for a number of years in some sections of New England, and is very highly recommended, is bearded, yields well and the kernels are larger than those of other Spring varieties -----

White Russian. This variety, recently introduced, has proved very valuable in many localities in the Northwestern States. Straw of good length, strong, does not lodge. It is not inclined to rust. Heads of large size and well filled with plump kernels weighing 6 to 62 lbs. to the bushel. Has produced 40 to 50 bushels to the acre -----

Market Price

WINTER WHEAT, 60 lb. Bushel.

Jones' Winter Fife, surpassing all other varieties in hardiness and productiveness -----

Golden Cross, has the yield of the Clawson, with flower of the Mediterranean -----

Clawson, also known as the Seneca. This is a beardless white wheat with red chaff. It proves early and hardy, has a stiff straw, yields larger crops than any other -----

Fultz. A beardless amber variety, grown largely in some sections of Pennsylvania and with very satisfactory results. It is very hardy and productive, and the straw is of medium length and very strong; makes excellent flour -----

Red Mediterranean (American). This is the imported variety fully acclimated and is a standard wheat. The heads are bearded and well filled. It succeeds well in nearly all localities and ripens early -----

Market Price

OATS, 32 lb. Bushel,

Swedish, heavy and bright color -----

Washington, very popular and standing well until fully ripe -----

Probsteier, very productive and heavy. The straw is very strong; No. 32 -----

Scotch, one of the leading varieties -----

Welcome -----

MUZZY BROS.' "SURE" SUPER PHOSPHATE

FOR POTATOES.

Nearly every farmer grows Potatoes, and consequently is, with the trucker and market gardener, interested in buying that fertilizer which for the least cash outlay, will bring him the best returns; as it is no longer a question, but an actual fact, that with a Potato Manure made from first class material, like our "SWIFT-SURE," SUPER-PHOSPHATE FOR POTATOES, you can grow a larger crop of Potatoes than you can with barnyard manure, and have them smoother, free from imperfections and of more uniform size.

NITRATE OF SODA

A fertilizer for all crops. It is very quick in action, and hastens maturity of crops fully two weeks. Being extremely soluble, it should not be applied until the crops are above the ground, when 100 pounds per acre should be sown, mixed with wood ashes. Does not exhaust the land.

5 lbs., 35c.; 10 lbs., 50c.; 25 lbs., \$1.25; 50 lbs., \$2.00. Bags trifle over 200 lbs., \$3.25 per 100 lbs.

We carry in stock also Acid Phosphate, Sulphate of Potash and Muriate of Potash.

PURE PULVERIZED SHEEP MANURE

A pure, natural and nutritious manure. Immediate and lasting in effect. Excellent for mixing with the soil of the greenhouse plants. In the vegetable garden it promotes a rapid, steady growth until maturity. It makes a rich Liquid Manure.

Quantity Required. For garden and field crops, 1 to 2 tons per acre— $\frac{1}{2}$ before plowing the balance before harrowing. For top-dressing grass, use 1 ton per acre in fall or early spring.

Price, 100 lb. bag, \$2.00; per ton of 2,000 lbs., \$30.00; in packages of 2 lbs., 15c.; 10 lbs., 50c.

Cultivation of Flower Seeds.

HARDY ANNUALS.

Successive sowing may be made from March to the end of September: March, April and May are the best months for general Summer display; June and July for Autumn blooming, and August and September for Spring flowering. The soil should be carefully prepared by being finely pulverized and made light and rich.

Sow thinly; cover with a very thin coat of fine dry earth—the smallest seeds needing but a mere dusting to cover them—and from the first keep the plants thinned sufficiently to prevent overcrowding, which weakens them and produces poor blooms.

HALF HARDY AND TENDER ANNUALS.

These include some of the most beautiful and varied of our Summer flowers, among which may be mentioned Aster, Balsam, Ten-Weeks' Stocks, Phlox, Drummondii and Double Zinnia, which in form, size and brilliancy of flowers, and their great diversity of color, are now brought to a high state of perfection.

Sow from the beginning of March to June; when sown in March and early part of April, sow thinly in well-drained pots, pans or boxes; place in the greenhouse or a frame where there is a mild heat, or in the absence of these a sunny window in the house will do; cover the seeds lightly, press down the soil firmly and give a gentle watering with a fine rose watering pot.

Separate the plants when large enough to handle, and firmly plant out in May, as soon as the weather is sufficiently warm where intended to flower. The seed can be sown in the open ground in May and June.

SALVIA SPLENDENS

DOUBLE ZINNIA

HARDY BIENNIALS AND PERENNIALS.

These can be grown at all seasons of the year in the open garden without protection, and may therefore be placed among the most useful of our flowering plants; their variety is almost endless, producing almost every form of flower and shade of color.

The seed may be sown from May to October, but the best time is in May and June. Select for sowing a shady, moist situation, and in order to secure fine, strong plants, sow thinly, and as soon as large enough transplant in showery weather to nursery beds, and finally plant out in October and November, those sown in Autumn are best planted out in March in April, where intended to flower. Many Perennials, if sown early and treated as Annuals will flower the first season. The Pansy, Petunia, China Pink and its several splendid varieties, and many others, do better as Annuals than Perennials.

Half Hardy Biennials and Perennials may be raised and treated in the same way as recommended for Half Hardy Annuals.

CULTIVATION OF FLOWER SEEDS—Continued.

ANNUALS FOR WINTER BLOOMING.

Many Annuals are very desirable for the greenhouse for Winter blooming; these should be sown in July or August. The most important are Browallia, Candytuft, German Stocks, Lobelia, Mignonette, Schizanthus, Sweet Alyssum and Dwarf Nasturtiums. Many varieties as well as the above may be sown in the Fall and Winter for blooming early in the Spring, such as Acroclinium, Ageratum, Antirrhinum, Apple-scented Geranium, China Pinks, Dinathus, Mimulus, Myosotis, Pansy, Petunias, Phlox Drummondii, Salpiglossis, Salvia, Verbena Vinca and others.

GENERAL LIST OF FLOWER SEEDS

Abbreviations and Signs used in the following list.

- A. Annual, refers to those plants that last but one season, and must be raised annually.
 B. Biennial, raised one year, bloom and die the next.
 P. Perennial, lasts two or more seasons.
 h. Hardy, as those that may be grown at all seasons in open air, without protection.
 hh. Half hardy, require the protection of a frame pit, or handlight till May, when they may be transferred to the open garden.
 t. Tender, require to be raised and grown under glass, and will only do in the open air in July, August and September.
 cl. Climbing; as Cypress Vine, Morning Glory, etc.
 spr. Spreading or trailing as Verbena.
 g. Greenhouse, those plants which require to be grown under glass.
 s. Shrubs, plants of a shrubby or bushy habit.

Those Biennials, and Perennials marked with an (*) will bloom the first year if sown early.

NAME.	Hardness and Duration.	Height in Feet.	Color.	Price per Packet.	OBSERVATIONS.

AMMONIATED FLOWER FOOD

A dressing made expressly for plants grown in house, garden or conservatory. Clean, odorless and producing early and abundant blossoms of rich and brilliant color, and healthy, luxuriant plants free from vermin.

This Ammoniated food was the first odorless chemical preparation made and sold in this country. It is made expressly for flowers grown in the house, garden, or conservatory, and contains the same plant food as stable dressing, but in a cleaner and more soluble form.

Price 15 cents per package

ROSEBUSHES, BULBS, ETC.

Hardy Roses. Two year old, Holland grown, our own Importation. We carry the largest assortment of **Rosebushes** in the state. Both hardy and ever blooming we append a partial list of the varieties we carry in stock for immediate delivery—they will produce a full crop of blooms the first summer.

American Beauty. Rich, rosy-crimson. Very large.

White American Beauty. Very large, pure snow white.

Baroness Rothschild. Bright, rosy pink. Immense size.

Crimson Rambler. Immense cluster bright red flower—very quick grower and hardy.

White Rambler. Same as Crimson, cut, with pure white blooms, hardy.

Yellow Rambler. Yellow blooms in big clusters; hardy.

Genl. Jack. Large brilliant, bloodred blooms. Fine bloomer.

Giant of Battles. Rich shade of rosy-crimson.

Glorie de Dijon. Free blooming climber. Tea scented flowers of creamy white tinged with salmon and pink.

La France Pink. One of the sweetest and most beautiful roses grown. Large, silvery pink. Blooms till frost.

La France Red. Large blooms of brilliant rose pink almost crimson.

La France White. Same as above two, but blooms are pure white. Very free bloomer.

Kaiserine Aug. Victoria. One of the best blooming, largest and sweetest white roses grown.

Marechal Neil. Large, clear yellow. Ever bloomer.

Magna Charta. Rosy crimson. Large buds and blooms.

Mrs. John Laing. Clear shining pink, beautifully shaded.

Merville de Lyon. Ivory white flushed with carmine.

Mons. Boncenne. Dark, velvety crimson. Very large.

Perle de Lyon. Deep golden. Ever bloomer.

Paul Neyron. Dark rose, very large and fragrant.

15c. each, 2 for 25c.

Tuberoses. One of the most delightfully fragrant and beautiful of the summer flowering bulbs. By skilful management a succession of flowers may be obtained all the year round. For early flowers they can be started in February or March in the greenhouse or hotbed; and for a succession they can be planted at intervals as late as July. For flowering in the open border plant about the middle of May or as soon as the ground becomes warm. 1c. and 2c. each.

TEA ROSES.

GLADIOLUS.

TUBE ROSE.

Gladiolus, Extra Fine Mixed. With a view to supplying a high grade mixture at moderate prices we have had grown for us by Gladiolus specialists good quantities of some of the choicest named kinds for this mixture, and shall use with them some of Child's hybrids and other best mixtures which will insure a large variety of shades and colors. This is truly a banner strain. Price 3c. each; 30c. dozen.

Dahlias. Our Dahlia roots are exceptionally fine this year, being Southern grown, and true to name and color. We carry a large assortment of colors. 10c. each.

Caladium Esculentum. Elephant's ears. One of the most effective and easily grown plants for the lawn or flower border. Will thrive in any ordinary garden soil, but to get best results plant in rich soil and give plenty of water. 5c., 10c., 15c. each.

Paeonies. No other plant flowering at the same season can vie with the Paeony for beauty. They are perfectly hardy, requiring no protection whatever are not troubled with insects or disease, and once planted take care of themselves. Price 20c. each.

Weeder—7½ feet wide, 35 adjustable spring steel teeth.....	7 98

No. 24—One-horse, Cuts 10 Inches, Weight 50 lbs..... \$5 48
It has Clevis that permits horse to walk in furrow. An excellent Plow. Low in price. Chilled Iron. Landside chilled on bottom; is very strong and convenient.

THE BEST PLOW.

This is the best one-horse convertible Plow ever sold for the use of market gardeners and farmers generally. By changing the Moldboards and Shears that come with the plow, the purchaser actually has four plows in one. Price, complete..... \$4 98

No. 1½ Moldboard and Share makes a large one-horse Plow.

The No. 2½ Moldboard and Share making a medium sized one-horse Plow, a cabbage Moldboard and Share making a complete Cabbage Plow, and by using the Plow without the Moldboard with the small Share bolted to the standard, makes a superior Plow for working among cabbage, strawberries, etc.

MITCHELL POTATO DIGGER AND SHOVEL PLOW COMBINED.

Price with wings only.....	\$5 00
" " Potato Digger.....	6 00
" " Wing and Potato Digger-attachment.....	7 98

This implement should be in the hands of every practical farmer, doing its work easily and in the most perfect manner. By the changing of one bolt it may be converted into a Shovel Plow or Potato Digger. The fingers are adjustable, being held in position by the plow point. Thus in case of breakage, a new part may be inserted without the expense of a whole new head. The fingers, points and wings are of steel, rendering it light, strong and durable.

Darnell's Patent Furrower and Marker

In presenting the numerous merits of this invaluable little implement we would be glad to draw a comparison with another of its kind, but we have seen or heard of nothing but the ordinary scratch sleds which make a mere mark as a guide for the plow which follows, thus increasing the work instead of lessening it.

We have a genial ever-borrowing neighbor, however, with whom we might compare notes, and we will just bring him forward with his plow which he is inclined to think is good enough yet. We think you will not fail to notice the difference.

We ride while he walks.

We bring into requisition the services of our boy, if busy ourselves,

while nothing short of a man, and a good one, too, can handle the plow.

We open two furrows while he opens one in clean ground, and do it better.

THE EDDY IMPROVED MARKER

These Markers have chilled Shoes or Runners with steel wings bolted on, and may be easily replaced when worn. Frames made of seasoned oak, firmly braced and bolted together, arranged with holes permitting the adjustment of the shoes to any width desired. Gauge is adjustable and swings to either side. It will save time enough to pay for it in one season, also improve the looks of your fields. Price.....\$11 00

EDDY'S NO. 10 DISK HOE AND COVER

The Eddy Disc Hoe and Coverer have 20 inch steel Discs, adjustable handles and are invaluable for covering and ridging all kinds of row crops. Adjustable in every way it is one of the best implements on the market.

Price.....\$10 00

ACME ASPARAGUS BUNCHER

A greatly improved pattern with knife guide and adjustable head piece for regulating the length of the bunch. This is the latest pattern, 1907 patent. Price.....\$1 90

"Planet Jr." Farm and Garden Tools

The new "Planet Jr." Catalogue is the handsomest, best and most instructive book ever issued on a similar subject. Full of little points that bring profit. Full of true and handsome illustrations. We mail it free to any address on application.

Remember, "Planet Jr." machines are the recognized standards throughout the world, and are guaranteed by the manufacturers.

"Planet Jr." No. 3 Hill and Drill Seeder Price \$10 00

Opens the furrows, sows any kind of garden seed accurately in drills or hills, covers, rolls down and marks out the next row—all in one operation. Does six men's work quicker, better, and far cheaper than old-style back-breaking gardening methods. Saves seed and insures a bigger, better yield. Be modern. Use Planet Jr. Seeders, cultivators and wheel hoes, because they are made by a practical farmer and manufacturer who knows what is needed to lighten your labor.

"Planet Jr." No. 4 COMBINED SEED DRILL SINGLE WHEEL HOE, CULTIVATOR AND PLOW

Price complete \$10 50
"Hill and Drill Seeder only 8 50

This admirable tool combines in a single convenient implement a capital hill dropping seeder, a perfect drill seeder, a single wheel hoe, a cultivator, and a plow. It holds two quarts and as a seeder sows in continuous rows or drops in hills at five different distances. It is thrown out of gear by simply raising the handles. The index is accurate, simply and easily set. The drill is detached and the tool frame substituted

by removing but one bolt. It then becomes a single wheel hoe, garden plow or cultivator. It is useful almost every day of the season, at every stage of garden work. With this one implement the small farmer can do practically all the work in his small crops.

"PLANET JR." No. 12 Double Wheel Hoe, Cultivator and Plow.

This perfected wheel hoe is invaluable for use in all small crops. Its variety of work is almost incredible. Changes and adjustments of the tools are made with the greatest quickness. It has 11-inch wheels, which can be set at four different distances apart; the frame is malleable, with ample room for tool adjustment and can be set three different heights. The handles are adjustable at any height, and, being attached to the arch, are undisturbed in making changes of adjustment in frame, wheels or tools. The arch is of stiff steel, unusually high; the quick change frame permits the tools to be changed without removing the nuts. All the blades are of tempered and polished steel.

PRICE \$6.50

Planet Jr. No. 13 Double Wheel Hoe Price \$4.50

This tool is the No. 12 with 6-inch hoes only, these being the tools that are used by everybody. Any or all of the tools shown with No. 12 may be added at any time.

Planet Jr. No 17 Single Wheel Hoe. Cultivator and Plow, Price \$4.75

For easy gardening, and at the same time clean and perfect gardening, the kind that will make your garden the talk of the neighborhood and cause your face to glow with honest pride, nothing is quite the equal of this No. 17 Single Wheel Hoe. It is suited to all kinds of garden cultivation and all garden crops. You can do more and better hoeing with it in one day than you can do in three days with a hand hoe. The No. 17 has a pair of 6-inch hoes, a plow and a set of cultivator teeth, an outfit sufficient for most garden work.

Get More Out of Your Garden

Use the Planet Jr. Combination Garden Tools, and you'll do better work, save two-thirds your time, and get better crops. There's nothing like a Planet Jr. for profitable gardening or farming. Made by a practical farmer and experienced manufacturer. Fully guaranteed.

Planet Jr. No. 18 Single Wheel Hoe. Price \$3.50 Net.

This tool has the same frame and handles as No. 16 but has one pair of 6-inch hoes only—the tools that are most constantly used throughout the season. All the other tools can be added as needed.

Planet Jr. No. 7 Horse Hoe and Cultivator. Price \$7.98

Probably no other cultivating machine is so widely known as the Planet Jr. Combined Horse Hoe and Cultivator, for it is in use throughout the civilized world. It is so strongly built as to withstand incredible strain, yet it is light and easy to handle. You can do almost anything you want with it in the garden or field. It opens and closes furrows, hoes right up to the plants without danger of injuring, throws dirt to and from the row and throws back from centre again. You can set the hoes at any angle or reverse altogether, cultivate to any depth desired, and adjust for any width. Every part is perfected to make the tool acceptable to the intelligent farmer who knows the best is always the cheapest.

PLANET JR. NO. 9 HORSE HOE

AND CULTIVATOR. PRICE \$7.25

This Admirable Tool is identical with No. 7, except that it has a piano wheel instead of the lever wheel. It has the high frame, patented hollow steel standards, patent lever Star wheel, patent lever expander, and new hollow steel wheel arms.

New No. 14 Planet Jr. Double-Wheel

Disc-Hoe, Cultivator and Plow

Has three adjustable discs on each side, a pair of new-idea pronged cultivator teeth that run shallow next the row, steels for plowing, furrowing and covering, and a pair of leaf lifters.

PRICE, COMPLETE, \$8.00 NET

No. 38 Planet Jr. Single-Wheel Disc-Hoe

Cultivator and Plow

Is a handy tool for quick thorough garden cultivation. The new style cultivator teeth run shallow next the row, and the leaf-lifter prevents injury to plants. Discs are adjustable for desired depth, and throw to or from the row.

PRICE, COMPLETE, \$7.00 NET

STEEL HOE AND CULTIVATOR

This is our new Steel Hoe and Cultivator, which we are putting on the market for the first time this year.

It has an expanded lever with an adjustable wheel. Will find it a first class tool at low price.....\$4.98

Planet Jr. Twelve-Tooth Harrow, Cultivator and Pulverizer

Price	\$8 50
Less Pulverizer	6 90
Less Wheel and Pulverizer	5 70

Gardeners cultivate better than formerly. It has been found to pay best. The farmer or gardener is most likely to cultivate best who has the tool best adapted to his purposes. With the Twelve-Tooth Harrow here shown you go as deep or shallow as you like, come up close to the row without injuring plants, cut out all the weeds, stir the soil and mellow and fine it as with a garden rake. You widen and narrow as you please between 12 and 32 inches. It's a

special favorite with strawberry growers, market gardeners and truckers.

FIRE FLY GARDEN PLOW

PRICE \$2.25

EXCELSIOR DOUBLE WHEEL HOES

KEYSTONE ADJUSTABLE WEEDER

Keystone Adjustable Weeder, expands to 7 feet. Best weeder made, every one guaranteed. Try one, it will increase your crops.

THE EMPIRE CLOSED END HARROW

The U-bars, channels, oscillating bars and teeth are made of high carbon steel, precluding all possibility of bending. The channels, being placed at the ends of the U-bars, prevent them from catching on obstructions as is frequently the case with the open end harrow. Strong and well made but carrying no superfluous weight. Corner braces, oscillating castings and lever castings of malleable iron. Made in 60 tooth sections, and with 5-8 teeth.

THE FAIRFIELD LAWN SWING

Easily leads all others in the market for the following reasons:

First: Because it is built upon the best mechanical principles—and thus combines the maximum of strength with the minimum of weight, and weds safety to durability.

Its notable lightness makes it easy to handle, while a scientific construction renders it remarkably easy to to operate, and secures to it a peculiarly attractive and pleasing appearance,

'Tis "Fair" to claim that nothing now in the "field," equals the

INSECTICIDES AND REMEDIES FOR PLANT DISEASES

FARMOGERM

seeds injurious to vegetation. Price, 1 lb. box, 15c.; 2 lb. box, 25c.
Standard Fly and Germ Killer. It is a thorough disinfectant and germicide. Protects horses and cows from the torture of flies. The **Lightning Insect Exterminator No. 1** discharges the preparation in a fine, broad spray without waste and using but very little. Fifty cows can be sprayed in a few moments, 60c. per gallon.
Pratt's Scalecide will positively destroy all soft-bodied, sucking insects, including all forms of the dreadful "Scale." It is simple, cheap, easily applied and wonderfully effective. Endorsed by government experiment stations, agricultural schools and thousands of fruit growers.

Sulphur, Powdered. A remedy for insects of all kinds, both by itself and in combination with other remedies. Market rates.

Hammond's Slug Shot is an insecticide for the destruction of Potato and Rose Bugs, and all Lice, Worms or Caterpillars upon Melons, Egg, Cucumber, Cotton, Tobacco and Cabbage plants, Tomatoes, Currants, Fruit or Ornamental Trees, Grape Vines, Shrubs and Flowering Plants. 5 lb. pkg., 25c.

Strictly pure Paris Green. Market price.

Double Ground Land Plaster, per 100 lb. bag.....50c

SULPHO-TOBACCO SOAP

A Wonderful and Inexpensive Insecticide

Sulpho-Tobacco Soap is a powerful agent for the destruction of all bugs and insects. One or two applications will rid plants of the pests. Full directions with each cake.

Destroys cabbage-, squash- and potato-bugs, currant-worms, lice, green-fly, mealy bug, red spider, etc. Sure death to all plant insects indoors and out-of-doors. Of special value for spraying shrubs, fruit-trees and vines.

3-oz. Cake makes 1½ gallons prepared solution. 10 cents.
 Mailed, postpaid, for 13 cents.

8-oz. Cake makes 4 gallons prepared solution. 20 cents.
 Mailed, postpaid, for 28 cents.

10-lb. Cake makes 80 gallons prepared solution. By Express, \$3.00.

Free with every order, "The Window Garden," a booklet by Eben E. Rexford, giving valuable information on the cultivation of plants and the extermination of insects.

BORDEAUX MIXTURE OR FUNGIROID

For all fungous diseases, such as mildew, and the various rots of the grape. Full directions on label. Dry, 1 lb. box, 20c; 5 lbs. and over at 18c per lb; 50 lbs. for \$7; liquid, 1 qt., 35c; 1 gal., 1.00.

ROSE NICOTINE

Most powerful insect and Parasite Destroyer known. Guaranteed to kill Insects, Lice on Flowers, Plants, Fruits, Trees, Vegetables, Human Body, Dogs, Cats, Fowls, Earth Worms, Ants, also any House bugs or Vermin.

PUMP NO 25

PRICE \$6.98

used for spraying fruit trees, etc. The operator is enabled to keep a constant pressure of 50 to 100 pounds at the nozzle with very ordinary exertion. Will throw a solid stream 50 feet, or make a fine spray by adjustment of the nozzle. When spraying, a fine jet at the bottom keeps the solution thoroughly stirred. Price \$3.50. See cut.

"Fruitall," Spray Pump. "Fruitall" Spray Pump is made on the same general lines as the famous "Pomona": it is, however, lighter and of smaller capacity. All working parts, including plunger, gland, valves, valve seats and strainer are made of bronze. Regularly fitted with wing agitator similar to one used on "Pomona," and which has proven to be the best type. Not made for side of barrel. Price, with hose complete, no barrel, \$12.00.

"Premier" Brass Bucket Pump

"Premier" is arranged with suction and discharge hose and spray nozzle. With this nozzle a solid stream may be thrown, or a fine spray. Pump has brass cylinder, plunger and rod. It is particularly adapted for washing windows and wagons, spraying plants in conservatories, greenhouses, etc. Its weight is only eight pounds.

Price, with 2½ feet ¾ inch suction and 3 feet 3-8 inch discharge hose, "Seneca" Spray Nozzle and Strainer, \$5.98.

LIGHTNING ALL BRASS SPRAY PUMP

This spray pump is constructed entirely of brass, so it is not affected by the arsinates

PRICE \$3.50

LIGHTNING BARREL SPRAY PUMP NO. 25

This pump has great capacity, and will throw a continuous stream, or any sized spray desired, by the use of our graduating nozzle. The air is compressed into the air chamber, thereby giving an unbroken stream, and making it the most rapid spraying pump made. The agitator thoroughly stirs the liquids and prevents the same from settling. It is adapted for all kinds of spraying, whitewashing, etc. Price, \$6.98. (See cut.)

GLASS TANK SPRAYER

A general utility sprayer, adapted to all liquid Disinfecting and Poison Preparations for Orchard, Field and Garden, as well as for use on Cattle, Horses, Sheep, Swine and Poultry.

Capacity One Qt.

Price 65 cents.

1908 Pattern.

CHAMPION DRY POWDER GUN

For applying dry Paris Green, Hellebore, etc., to plants and trees, the powder being evenly distributed

over a wide space with the least possible waste. The quantity may be regulated as desired.

PRICE \$7.00.

"LIGHTNING" WHITEWASH SPRAYER

This is the only Spray Pump that will properly spray whitewash without clogging. It is constructed of heavy galvanized iron, with brass tops and valves. Large air chambers and ball valves, the pressure maintaining a continuous stream or spray not affected by the upward stroke. Can also be used for washing windows, buggies and sprinkling lawns, flowers, etc. Galvanized iron, \$2.25, brass, 2.75.

The Lowell Fountain Compressed Air Sprayer.
One pumping will expel entire contents of tank and is sufficient to spray 2,000 plants. Spraying nozzle may be reversed to spray under side of bushes and plants. The Automatic Thumb Lever Valve is at all times under complete control of operator—hence none of the solution is wasted. It saves its cost in making a given amount of compound do so much more work. An Adjustable Shoulder Strap and Tree Attachment with suitable couplings for orchard and tree spraying, furnished with each machine. Aluminum finish. Capacity 3 Gallons. Price \$4.98.

The "Lowell" Blow Powder Sprayer is fitted with a Ball Valve which is positive in its action, preventing any powder being drawn back into the pump—thus insuring at all times a perfect working machine. Adapted to Paris Green, Slug Shot, Bug Finish, Lice Powder and all Dry Powder Disinfectants and Poisons. Aluminum finish. **Caution:**—Powder must be thoroughly dry. Price 50c.

HIGH GRADE Poultry and Pigeon Supplies

A Line of Poultry Feeds for Systematic Feeding

The great need of poultrymen is for a dependable main ration, which shall be the basis of all feeding—something which, with necessary changes for age of fowls, may be used continuously from the beginning to the end of the feeding operations.

The line of poultry feeds hereafter given is believed to furnish the base for the best system for scientific feeding of poultry that is available.

RELIABLE
POULTRY
JOURNAL
COPYRIGHT

The "SUN" Chick Starter A Baby Chick Feed

This is the food to start chicks right. In size and in contents it is adapted to the wants of chicks for the first twenty days.

It contains the elements of growth and it is a food the chicks can digest.

50 lb. bag at \$1.50. 100 lb Bag at \$2.75

"CRESCENT" Chick Feed For the Growing Stage

The Crescent Chick Feed is designed to take the little chicks where the "Starter" leaves off, at about the age of twenty days, and carry them through to the end of the eighth week.

50 lb Bag at \$1.33. 100 lb Bag at \$2.50

DEVELOPING FOOD

A special food for properly maturing young chicks after they are weaned from Chick Food up to the time for feeding scratching food and laying food. Developing food is dry grain and may be fed from hoppers, but better results may be had by scattering broadcast.

50 lb bag at \$1.33. 100 lb bag at \$2.50

LAYING FOOD

A ground food ready for the mash made up of carefully selected materials that will greatly increase the production of eggs. The use of this food will greatly increase the profits of the poultry raiser and cannot be too highly recommended.

50 lb Bag at \$1.30. 100 lb Bag at \$2.25

"QUEEN" Poultry Mash a Poultry Need

The mash with many poultrymen enters largely into the feeding plan.

The theory is that it is easily digested, warms up the fowl's system, causes the blood to circulate properly and thus gives health, strength and good feeling. It is a select mixture of ground feeds made from choicest, sound, sweet, wholesome grain. It contains absolutely nothing but what is of real value and is at the same time a growing and a health food, a molting food and an egg-producer.

50 lb. Bag at \$1.33. 100 lb. Bag at 2.25

SCRATCH FOOD

For Grown fowls, Suitable at all Seasons.

A carefully selected mixed balanced ration of grains, cracked and whole seeds, etc., adapted to the vigorous growth of fowls and production of eggs. Scratching food should be scattered in the litter the first thing in the morning and at noon, late in the afternoon feed all the mash food they will clean up.

50 lb. Bag at \$1.15 100 lb. Bag at \$2.25

BEEF SCRAP

Standard Meat Food for Poultry of all Ages. High Protein Beef Scraps is an especially valuable meat food for poultry and gives very satisfactory results. Any kind of Beef Scraps will not answer. Poor Beef scours the birds and often injures them, when the first is used the results are uniformly good. Do not fail to buy your supply from a reliable source.

100 lb. Bag at \$3.00.

PRATT'S POULTRY FOOD.

A specially prepared and highly nutritious food, used at all the principal shows all over the world. The most successful food for all kinds of poultry.

1 lb. at 10c, 25lb. at 7c 100 lbs. \$5.50

MUZZY "PIGEON FEED" A SQUAB DEVELOPER

Right feeding of pigeons is considered something of a problem. Most raisers do not understand either the pigeon or its feeding as well as they do poultry. The true fancier, the man who raises birds for their beauty, for the show, for the pleasure their is in it, or for sporting, finds in our Pigeon Feed a combination suited to his needs.

50 lb. Bag \$1.50. 100 lb. at \$2.50

CHARCOAL

Prepared expressly for poultry, absolutely pure, essential to health of fowls and aids to digestion. We carry three grades;

- No. 2, Fine, for use on mash mixtures;
- No. 1, Medium, for small chicks;
- No. 0, Coarse, for fowls.

CUT ALFALFA CLOVER.

A Poultry Food that aids digestion and assists in the assimilation of grain foods. thereby giving better results at lower cost. Among green foods, Alfalfa stands at the top. Mealed Alfalfa is a boon to poultryman. It is used in a mash for small chicks as well as to mature fowls. If more of this meal was fed to young chicks there would be less mortality.

5 lbs. 15c. 10 lbs. 52c. 25 lbs. 60c. 50 lbs. 1.10
100 lbs. \$1.90.

CUT RED CLOVER

Cut Clover has become the standard green food for winter egg production. It is used and recommended by every poultry expert and well-known practical poultryman in Amercia.

Writers on poultry topics endorse it as a necessity, especially during the long winter months when the fowls are unable to obtain a substitute for the bulky green food which is so plentiful during the summer season in the shape of grass clover and vegetables.

HUMPHREY NO. 1

No. 1—Hand Power. Capacity, 10 to 200 hens. Weight, 120 pounds. Price, \$12.00.

Humphrey Open Hopper Bone Cutter

The Humphrey Bone Cutter does better work because

It takes a large bone without any preliminary cutting with an axe, as it is necessary in many types of bone cutters;

It turns more easily;

It cuts more rapidly;

It does not break or get out of repair; and

It is easily kept clean.

The construction is extremely simple yet strong and effective. The Humphrey has an always open hopper and is entirely free from springs, screws and split nuts. It works with direct action and is freest from friction of all bone cutters.

BOSTON HOP- PER RAT PROOF

These Hoppers are absolutely automatic and positive in their action. They cannot clog; they do not waste. They are made of galvanized iron with swinging grid (mesh) and hold from $\frac{1}{2}$ peck to $\frac{1}{2}$ bushel respectively, and will last a lifetime. Feed is always accessible and in sight. They save labor and grain (money).

Have Healthy Hens

There's no money in the other kind. And thousands of poultry men have proved that egg-producing, healthy hens are merely a matter of regularly giving them

Pratts.

POULTRY REGULATOR

(For 37 years called Pratts Poultry Food)

It will surely do for you what it has done for thousands of others. There is nothing like it to carry the hens through the moulting period. It promptly cures all poultry diseases, prevents contagion and keeps big chicks, little chicks and laying hens in a healthy, vigorous condition the year round. A trial will convince you what thousands have learned by experience—that Pratts Poultry Regulator is the greatest money saver and profit producer on the market. Costs less than 1 cent a month per hen, and positively guaranteed.

Don't confuse Pratts with the ordinary stock regulators and tonics. If your dealer does not carry it, write to us and we will see that you are supplied at once.
