Important to Purchasers

A glance down one of our arbors which serve to give protection from the sun to such partial shade-loving plants as specimen Box, Bay-trees, Hollies, Andromedas, Rhododendrons, Mahonias, etc. These attractive plants at once suggest beautiful gardening possibilities.

PRICES — NOTE CAREFULLY. *Single rate prices* are for less than five of a kind.

Ten-rate prices are for five or more and less than twenty-five of a kind.

Hundred-rate prices are for twenty-five or more and less than 250 of a kind.

Thousand-rate prices are for 250 or more of a kind.

We cannot agree to fill small orders for a few of a kind for less than single rates, as it oftentimes takes one over many acres of ground to fill a single order, and the proportionate expense of digging and packing orders must be taken into account.

SPECIAL DISCOUNTS ON TREES AND PLANTS. To those who send us orders for less than five of a kind, shipped at the same time, amounting to the following:

Orders amounting to \$10.00, a discount of 5%	} FROM SINGLE RATE PRICES.
Orders amounting to \$30.00, a discount of 10%	
Orders amounting to \$50.00, a discount of 15%	
Orders amounting to \$75.00, a discount of 20%	
Orders amounting to \$100.00, a discount of 25%	

Special discounts on larger orders. Send us list for estimates.

These discounts apply to Trees and other Plants only, and not to grass seed, fertilizers, etc.

Trees and Plants individually selected at our nurseries or special quotations will be charged for according to quoted price *without discounts*.

TERMS. Cash in advance from unknown parties who do not furnish satisfactory reference. We send invoice at time of shipment of order, and should any error be noticed on receipt of goods notify us immediately and we will do all in our power to rectify it.

HOW ORDERS ARE SHIPPED. We ship all large trees and other bulky orders, which are to go outside the city, by freight, unless otherwise requested. Medium sized orders can be shipped by express to advantage; this is especially advisable where immediate arrival is desired. All orders are delivered free to local freight, express companies and in the city. We are not liable for delays by forwarding parties. If stock is not promptly received notify us and we will trace.

PACKING. We make no charge for packing *excepting when stock is purchased at hundred-rate prices or in case of large bulky stock, or where we ship with carefully preserved balls of earth, etc.*, which necessitates devoting more time and packing material than is usual. In such instances a charge covering cost is made.

HOW TO REACH US. Our nursery and office are located at EDGEWOOD, Edgewood Avenue, just beyond Edgewood Park. The Edgewood Avenue cars direct to the nursery from the Railroad Station, and by transfer from transfer points. Parties autoing, driving or wheeling to the nursery will find West Chapel Street the best route, turning to the right at either Central or Alden Avenue.

EARLY ORDERS. To one familiar with the rush at the packing season, it must be obvious that it is impossible to fill an order requiring much time in its preparation on short notice without doing an injustice to others who have their orders previously booked. In fairness to all, we have adopted the practice of filling orders in the rotation received, unless orders are received far enough ahead of the packing season, with instructions to ship at a given date, so that we can arrange a special shipping date. So we again say—*place your order as far in advance of shipping as you possibly can*, stating when you would like stock sent.

TRANSPLANTING DIRECTIONS. This pamphlet we are pleased to send on inquiry.

THE ELM CITY NURSERY COMPANY,
EDGEWOOD, Edgewood Avenue, NEW HAVEN, CONN.

Nursery Department.

Pussy Willows. When the silvery pussies burst from their brown winter shells and defy the frosty nights we are certain that spring time is not far away.

We grow and supply the best grade of nursery stock the market affords. Our facilities are very complete, every department being under efficient management. That our methods are meeting with popular favor is evidenced by the rapid growth our business enjoys. By purchasing from our Nurseries you are guaranteed *High Quality* stock. It is grown under most favorable conditions, dug and packed by skilled and careful workmen. Our nursery stock can be depended on to produce maximum results when planted under favorable conditions. The Nurseries are open to the public every day of the year, but positively no business will be transacted Sunday.

Landscape Department.

Where best results are anticipated in Landscape and other Gardening work, experience is a most important factor. Our landscape department is under well equipped and expert management. We are glad to offer suggestions and submit sketches for plantings without charge

to intending purchasers, but where landscape problems require special visits, plans, specifications, etc., a charge is made to cover expenses, etc. We will be pleased to take up this matter more fully with those who are interested.

Gardening Department.

We maintain a force of competent gardeners who can execute gardening work in a thorough and practical manner. Pruning and otherwise caring for established trees, vines, etc., is a special feature of our work, and one that an owner can afford to put into experienced hands only. Many trees whose worth cannot be counted in dollars, which are perishing from neglect, can be restored to health and given a new lease of life if given proper treatment.

We can refer to many satisfied clients who have approved our planting plans, procured their stock from us and employed us to carry out the work. Genuine economy is many times gained by having all the work incidental to the carrying out of a landscape problem under one contract.

Gardens have a perennial charm where a wealth of choice flowers, fascinating in form, color and fragrance are combined with appropriate garden accessories.

Roots of Plants.

We seldom hear much said about the root system of a tree or plant; in fact, if the top of the plant looks shape-ly, little is thought of it otherwise by the usual buyer; but the fact is, its root system is an all important feature in its economy. If a plant is to be transplanted successfully it is of great importance that its roots have been suitably trained, and this applies especially to the larger trees and all ever-greens. Appreciating this, we regularly root prune our trees, with the result that the stock we send out is in the best of condition, both under and above ground, for successful transplanting.

Double Pink Flowering Plum.

JUST why our nursery stock gives better results than most others is, after all, very simple. We know how to grow good stock; we have favorable soil to grow it in; we dig all orders with great care; we pack and ship with equal care.

Trees are living things and cannot be handled in a careless and ignorant manner and live. This not only applies to the nursery, but to the planter as well.

Weeping Willow. A well-known and most effective tree.

"The trees and shrubs set last fall made a fine growth. I shall always recommend your stock."

"We thank you for the excellent stock furnished."

"The herbaceous plants, including Paeonies, ordered of you last fall came in good order."

The above illustration shows a handsome White Pine (Pinus Strobus) about 12 feet high, with ball of earth carefully secured with burlaps, just dug from a nearby block of fine specimens. We have a splendid lot of specimen evergreens, which have been so frequently transplanted that large balls of earth can be taken up with each tree. Immediate effects can be gained by using these specimen trees.

Choice and Rare Evergreens.

Evergreens are a specialty with us and our collection includes many rare and beautiful specimens as well as a large stock of the more common sorts. We are fortunate in having soil conditions very favorable for their development, both of top and root. We transplant and root prune all our evergreens frequently, which practically insures their successful transplanting, even of the larger specimens.

How to Ship Evergreens.

We recommend hauling by teams when delivery is within economical distance. Small orders to distant points can be boxed for shipping by freight or express, but where a number of specimen trees are to be sent, we advise shipping in bulk in car lots; this saves the cost of boxing and insures their arrival without injury. We gladly advise, if requested, the shipping method we recommend for individual shipments.

Prices of Evergreens.

See following pages for prices of the usual sizes. The prices of specimens will vary with each plant, as they vary greatly in individual merit. It is desirable to visit the Nursery and make a personal selection, but where this is not practicable, we will gladly make selections for a customer.

Weeping Norway Spruce. No end of attractive effects can be procured with this evergreen.

Evergreen Trees.

We have followed the popular arrangement in making up this list; the botanical names you will also find alphabetically arranged.

Broad Leaved Evergreen Shrubs.

Rhododendrons produce most charming effects when planted in liberal masses.

Rhododendron Everstianum.

Rhododendron Everstianum. This does not necessarily mean frequent watering.

THE great beauty of the broad leaved evergreens makes them most valuable for gardening purposes. Many are among our most spectacular and gorgeous flowering shrubs, while their broad, attractive leaves show out most effectively during the portions of the year when many trees and plants are without foliage.

There is practically no end of the charming results that can be gained by the liberal use of this class of plants. Groupings generally give most attractive effects and the plants themselves do much better when planted this way.

Good, fertile loam should always be used in preparing for this class of plants. Sufficient water should be supplied at least until they become well established so that they will not suffer from dryness. This does not necessarily mean frequent watering.

Flower Clusters.

Rose-Bay (Rhododendron Maximum.)

This native broad-leaf strictly hardy evergreen affords splendid opportunity for no end of charming effects. In large public parks and private estates they can be used by thousands, and even within the more restricted area of the usual city lot many chances for their liberal use are sure to arise. This beautiful Rhododendron is not only perfectly hardy but thrives luxuriantly even in the shady corner and under trees, and in June is a mass of lovely soft pink flowers similar in color to our well-known mountain laurel. It will develop into a nice individual specimen, but is most happy and effective when planted in generous masses. The illustration on this page shows a very effective planting made by us three years ago for Mr. John Edward Heaton, of New Haven, Conn., requiring three carloads, and with practically no loss. Our stock is collected high up on the table lands of the Allegheny Mountains in Pennsylvania, where it is so very cold and exposed to such severe weather conditions that even the native trees are dwarfed in growth. Certainly Rhododendrons that can thrive under such conditions will thrive almost anywhere.

Import Orders.

Through our acquaintance with the European and Japanese markets and intimate business connections with the best foreign houses, we are in a specially favorable position to make importations for parties requiring foreign nursery stock. We will be glad to make special quotations and give other information.

Charming grounds brimming with the wealth of good things that fill the eye with delight are the kind of gardens quite worth striving for. Equally beautiful gardens to the one here illustrated can be produced within a year's time at a cost that can be very moderate. Such accessories as pergolas, fountains, garden seats, etc., can be so constructed that the cost is very small or if taste and pocketbook so decide the styles of these, garden features can be made very elaborate.

Strong, 2 years.	.35	2.50	20.00
Similar to Paniculata, and a good companion for it. Its growth, however, is not quite as tall and it blooms several weeks earlier.

Many a building wall and pillar is much enhanced in beauty by the judicious use of vines. These showing conspicuously in this illustration are the Boston Ivy or Ampelopsis Tricuspidata and Crimson Rambler Rose.

Many people of refinement are spending thought, time and money now-a-days in their gardens. It is quite evident that we are awakening to the possibilities of beauty out-of-doors. The garden offers a field for the play of the imagination and in its development no end of fascinating and healthful recreation. Similar attractive treatments to the one here illustrated can be worked out within even limited restrictions. In this instance the vines on the arbors are grapes, conspicuous in the foreground are spikes of Larkspurs, Shasta Daisies and Achillea, all hardy perennial plants.

Our native Trumpet Creeper. Really one of the most desirable of our hardy vines and especially attractive during July and August. Its long tube-like flowers prove to be favorite feeding grounds for the little ruby-throat humming bird.

Clematis Paniculata or *Sweet Japan Clematis*. No vine is to-day more popular than this, and justly so. Its usefulness is not confined to the porch or arbor. It is most effectively trained on fences, walls, etc. It is of value to know that cattle will not browse on its foliage. If you wonder why, taste of the leaf some time. This special immunity makes it especially valuable for covering fences.

Hardy Herbaceous Plants

For Autumn Planting.

Japan Anemone,
"Whirlwind."

PLANTS whose roots are hardy and remain alive from year to year and whose tops die annually to the ground are classified under this heading. It includes such splendid garden plants as Pæonies, Iris, Larkspurs, etc. The great ease with which these plants can be grown and their great variety of color and form and season of bloom makes them indispensable for the garden. Of late years, there has been a steadily increasing demand for this class of plants as well as a great improvement in the varieties, so that they now make an important feature in the business of many nurserymen. We are making them a specialty at the nursery, growing them in large quantities out in the open fields under the most favorable conditions. The classification is the one adopted by Prof. L. H. Bailey in the *Cyclopedia of American Horticulture*.

Description of height at flowering season and time of blossoming, general color of bloom, and very brief descriptions only are attempted in this abridged list.

In arranging this list, we have used the popular or common names as far as seemed consistent.

Alphabetical List.

ACHILLEA, see Yarrow.

ACONITUM, see Monkshood.

ADAM'S NEEDLE, see Lilies.

***AEGOPODIUM PODAGRARIA VARIEGATA**. One foot. Splendid for covering the ground under trees. Will grow anywhere, even in shady places.

Queen of Whites. Large, creamy white.

Rhoda. Delicate shade of silver pink.

Sunset. Bright golden bronze.

CLEMATIS RECTA. 2 to 4 feet. June. Pure white.

COLUMBINE ROCKY MOUNTAIN BLUE (*Aquilegia Coerulea*). The beautiful western species with the long spurs.

COLUMBINE ROCKY MOUNTAIN YELLOW (*A. Chrysantha*). Similar to preceding other than color.

Hardy Chrysanthemums. The kinds which live out-of-doors and bloom without the protection of glass houses.

COLUMBINE ROCKY MOUNTAIN WHITE (*A. Chrysantha Alba*). White form of preceding.

COLUMBINE EUROPEAN WHITE (*A. Vulgaris*).

A beautiful type of purest white.

CONE-FLOWER, (Purple), see *Fchinacea*.

CONVALLARIA MAJALIS, see *Lily-of-the-Valley*.

CORAL-BELLS, see *Heuchera*.

***COREOPSIS LANCEOLATA** (Tickseed). 2 to 3 feet. June to October.

One of the best golden yellow flowers for the garden. Star-like blooms produced on wiry stems. Excellent for cut flowers.

***COREOPSIS ROSEA**. 8 to 12 inches. July to September. Rosy-pink, yellow center. Dark green cut leaf foliage, interesting foreground plant.

CORONILLA, see *Crown Vetch*.

***CROWN VETCH** (*Coronilla Varia*). June to August. A rampant creeper, with handsome globular heads of showy bright pink to white sweet pea-shaped flowers; a useful plant for the border and especially for covering banks, for the rocky and for naturalizing along the roadside.

CREeping JENNY, see *Lysimachia Nummularia*.

***DAISY SHASTA** (Burbank's) (*Chrysanthemum Leucanthemum Hybridum*). June to August. 1 to 2 feet. Ray-flowers are of the purest glistening white, center golden yellow, bloom about four inches in diameter.

DAY-LILY, see *Lilies*.

DELPHINIUM, see *Larkspur*.

***DESMODIUM PENDULIFOLIUM** (Pea-Shrub). September and October.

While it is a true herbaceous plant the growth is so full and shrub-like that by Fall it has made a bushy plant from 3 to 5 feet high. Covered with wine red, pea-shaped bloom, which makes it very attractive. It is effective planted in masses where it has room to develop, grouped with shrubs or in the herbaceous border. A few large clumps at 75c. each, smaller sizes same prices as other herbaceous plants.

DIANTHUS, see *pinks*.

***DICENTRA EXIMIA**. 1 to 2 feet. May to September. Pink.

A beautiful Bleeding Heart of dwarf habit, producing graceful spikes of pendant blooms and very graceful foliage.

***DICENTRA SPECTABILIS** (Bleeding Heart). 2 to 3 feet. May and June. Rose and white.

An old favorite. Very desirable. Keeps well as a cut flower.

Double Hollyhocks.

*German Iris (Iris Germanica) (Fleur-de-Lis.)

German Iris.

These splendid garden plants have been favorites for years and are so hardy and easily grown and produce such a bountiful display of beautiful flowers that they can be considered one of the most important of our garden plants. They are of easiest culture, requiring no special treatment, and will remain for years, even enduring neglect, and produce regularly each year their fine display of blooms.

VARIETIES.

AURIOLE. Late, medium dwarf, very similar to Sans Souci in form and color, beautifully penciled deep velvety purple.

BLUE-BIRD. Medium to tall and quite early, full, incurved, of a clear deep blue color.

BRIDESMAID. Medium to tall, mid-season; very full and incurved, light rosy blue, changing to deeper blue on the margins, which are exquisitely penciled.

CANDICANS. Mid-season and medium size of growth; very little incurved and of the clearest pale blue; freely veined with splashes of pure white. Very distinct.

CELESTE. Mid-season to late; clear pale blue, shaded darker, large fine form.

DR. THEMENT. Mid-season to late, medium to low; rosy-red; base white, changing to deep rosy-red veined deeper red.

EDITH COOK. Medium to low grower, mid-season to late, of strong vigorous habit; of the clearest deep yellow, freely splashed rosy purple.

ERNEST BERNOT. Early to mid-season, medium to tall, very free bloomer; delicate orange exquisitely suffused rosy purple.

GARFIELD. Tall, medium to late, light blue, changing to rosy lilac on margins; light beard.

JACKMANII. Tall and late, robust, of splendid habit; old gold, changing to a rich yellow buff beautifully suffused and shaded with deep rosy tints.

LA VALETTE. Tall late, good full form, very full, incurved; general color, clear pale blue suffused with rosy tints.

MAD. CHEREAU. Late and tall, of beautiful and unique form; pale blue and penciled with darker blue on margin.

MAD. MODESTE. Medium to late. Incurving, pale blue splashed and margined purple.

PALLADA. Very late and tall. Resembles the early Florentine in its full large form. Color rich blue, being suffused with velvety royal purple.

POND POINT. Tall, very vigorous, very large and handsome, clearest deep blue.

QUEEN OF GYPSIES. Tall and late, rich old gold, delicately suffused and penciled with rosy lilac; with beautiful pencilings of a deeper hue.

QUEEN OF MAY (Maximosata). Medium to late, tall, perfect form, clearest rose slightly buff at base, shading into clear rose-veined with darker rosy-red.

SANS SOUCI. Medium to late season, clearest intense yellow, incurved, russet veining.

SILVER KING. Similar if not the same as Florentine.

The earliest of the tall large type, of ideal full form,

and when first unfolding is of the softest pale blue, white at maturity.

WALNERI. Mid-season and medium grower, clear light blue suffused with royal purple.

Nothing in our nursery is more beautiful than the German Iris during their period of bloom.

From photo showing freedom of bloom of the Iris Pumila Hybrids. Taken at our nursery May 10th.

*Iris Pumila (Hybrids.)

This is a new race of charming Iris, intermediate between the early Pumila and Germanica, in time of blooming and size of flower. The range of color is marvelous. By planting these new hybrids freely the Iris blooming season can be extended several weeks, as they begin blooming as early as May 1st, continuing up to the time the German Iris begin. They are perfectly hardy and will endure cheerfully no end of hardships. The following varieties are all very beautiful.

ATROVIOLEACEA. 6 to 10 inches. Medium dwarf, early to mid-season. Violet mauve to maroon red, paling to light on the margin.

BRIDE. 12 to 15 inches. Mid-season. Clear ivory white, veined with green and yellow.

BRIDESMAID. 10 to 15 inches. Clear white, slightly splashed with light blue, veined with yellow and green.

CYANEA. 6 to 10 inches. Deep-velvety blue, painted with white veinings.

EBURNEA. 6 to 15 inches. Palest cream to white, slightly dashed with pale blue, paling to white.

EXCELSA. 8 to 12 inches. Clearest deep yellow, with slight maroon splashings beautifully veined.

FAIRY. 10 to 15 inches. Pale blue to white, freely splashed with varying shades of blue from faint to the deepest blue.

FLORIDA. 12 to 15 inches. Clear lemon yellow, slightly splashed with blue, beautifully veined deep yellow.

FORMOSA. 6 to 12 inches. Royal blue to deepest velvety royal purple, orange at base.

LUSTRA. 8 to 12 inches. Clear royal purple, paling to blue on margins.

LUTEA. 10 to 15 inches. Mid-season. Clear yellow to deeper yellow splashed with attractive markings of blue and maroon.

ROYAL. 12 to 15 inches. Deepest clear blue, paling on margins.

*Japanese Iris.

(Iris Kaempferi or Laevigata.)

This splendid type of Iris is one of the most important of our strictly hardy permanent garden plants. For effective habit and gorgeous display of color it stands alone at its blossoming season, which is June 20th to July 20th.

The plants form strong clumps of effective narrow flag-like foliage, one to three feet high. The flower stems are slender and graceful, lifting the flower heads well above the foliage.

VARIETIES.

BLUE JAY. Late, medium tall, vigorous, very large, splendid form; deep yellow at base, changing to a soft azure blue.

DINAH. Mid-season, very tall, medium to large, double, deep blue suffused with royal purple.

FRANCELLA. Early medium tall, medium size, segments uniform size and broad, almost white at base, changing to deep rose at margins, effective.

KATHRYN. Early, tall and vigorous; broad, pale blue, beautifully veined royal purple.

KUMO-NO-SHO. Double, mid-season, tall, good size, white at base, freely veined rose, which suffuses the segment at the outer margin.

KUMO-NO-NYE. Late, double, splendid form, richest velvety royal blue, suffused slightly with royal purple, brilliant yellow throat.

OSHOKUN. Double, early, very tall and branching, flower large and showy, segments rich blue penciled deeper blue with white radiating lines.

PYRAMID. Early to late, very strong grower and free bloomer, of largest size and splendid form, segments light blue at base, to deep blue on margins, suffused with royal purple.

PURITY. Early, medium size, of the purest waxy white.

ROSY-MORN. Mid-season, tall and graceful, white at base, shading to deep rose.

URC-IN. Double, mid-season, tall and much branched, flower large, pale blue white, changing to rich clear blue.

***IRIS PSEUDACORUS.** 3 to 5 feet. June. Very robust, flowers of medium size, intense clear, deep yellow.

***IRIS SIBERICA.** 2 to 3 feet. June. Robust growers, foliage somewhat like the Japan Iris. Flowers borne on slender stems, well up above the foliage; color, clear rich blue. Flowers are somewhat larger than our native field Iris. In bloom with the late German Iris. Very desirable and especially so for naturalizing.

***IRIS SIBERICA ALBA.** Similar to preceding but white.

***IRIS SIBERICA FL. PL.** Double form. Blooms late with the Japan Iris.

***IRIS SIBERICA VAR. ORIENTALIS.** 2 to 3 feet. June. A beautiful Iris of the most vivid velvety deep blue, of medium size and blooming with great freedom.

IRIS GERMANICA, see page 46.

IRIS KAEMPFERI, see page 47.

Pyramid Japanese Iris, Purity, wonderfully varied in color and form.

Lilies (Hardy Garden.)

The family of lilies includes some of our most beautiful garden flowers and fortunately some of the most beautiful of them are perfectly hardy. They are many of them of easiest culture and even the less easy ones to succeed with, bountifully repay for any extra attention they may exact.

Speciosum Lilies.

***ADAM'S THREAD AND NEEDLE** (*Yucca Filamentosa*). One of the most valuable plants in cultivation for general garden and landscape planting. Its dagger-like foliage, which is evergreen, forms an attractive clump of foliage from which appear, in July and August, tall and stately spikes 3 to 6 feet high, bearing large panicles of white lilies, which are most picturesque and decorative.

BLACKBERRY LILY (*Belemcanda Chinnensis*). 2 to 3 feet. June and July. Yellow.

DAY LILIES (*Funkia*). These charming garden lilies are very useful in the hardy border, as a foreground to shrubbery groups and about the foundations of buildings, etc. Their clusters of heart-shaped leaves and graceful flower heads showing effectively. They thrive well in partial shade, as well as in full sunshine. The following varieties are all very desirable:

***FORTUNES DAY LILY**. 2 to 3 ft. July. Rare type. Large, glaucous, heart-shaped leaves, pale lilac.

***LANCE-LEAF DAY LILY**. 1 to 2 feet. August to October. Small glossy foliage. Blue.

***LANCE-LEAF** (White Margin). Similar to above, excepting the white margin, which makes the leaves very ornamental.

***OVATE-LEAF DAY LILY**. 2 to 2½ feet. July to September. Larger foliage than the preceding and flower stems taller. Pale lavender.

***SIEBOLD'S DAY LILY**. 1 to 2 feet. July and August. Another beautiful sort with silvery blue tint to foliage. Flowers pale lilac.

***VARIEGATED DAY LILY** (*Undulata*). 8 to 12 inches. July and August. A very popular variety; leaves variegated white and green.

***WHITE DAY LILY** (*Subcordata*). 1 to 2 feet. July and August. Large light green leaves, flowers purest white.

CORAL LILY (Siberian) (*L. Tenuifolium*). One of the most delicate and charming species. 1 to 2 feet high, with one to fifteen or more nodding rich scarlet flowers.

ELEGANS LILY (*L. Elegans*). These hardy lilies are very showy and of easiest culture, producing, during the early summer, their brilliant flowers very freely. The following are all attractive varieties:

VAR. **AURORA**. Deep rich orange, suffused scarlet.

VAR. **BICOLOR**. Bright red flushed orange, very showy and large.

VAR. **LEONARD JOERG**. Rich apricot spotted; very fine.

VAR. **PAINTED CHIEF**. Bright flame color.

VAR. **ROBUSTA**. Magnificent large flower; orange spotted black.

VAR. **SANGUINEUM**. Very rich dark red with few spots.

VAR. **WALLACEI**. One of the smaller and later forms; a very reliable one for general use.

GOLDEN-BANDED LILY (*L. Auratum*). This is a most popular lily. No species ever had so much general favor. Flowers white, with a central golden band and numerous deep purple spots. Height, 2 to 6 feet. July and August.

HANSON'S LILY (*L. Maculatum*). Attains a height of 3 feet. Flowers reddish orange, six to ten in a cluster; petals thick and durable. A rare Japanese lily.

MADONNA LILY (*L. Candidum*). Handsome, large, fragrant, pure white flowers. Easy of culture; does best when left undisturbed after planting. August and September are the best months to plant.

SPECIOSUM LILY, WHITE (*L. Speciosum Album*). One of the best garden lilies; purest white. Very hardy.

Elegans Lily.

The above Hardy Herbaceous Plants are offered in three sizes, as follows, unless otherwise noted. The very heavy field clumps can only be supplied in the sorts marked with a * to the left.

- SPECIOSUM LILY, RED** (*L. Speciosum Rubrum*). One of the most showy of lilies of medium height, and not difficult to grow in any good garden soil. Like the preceding other than color, which is rosy red, beautifully marked with deeper red. *November delivery.*
- TIGER LILY VAR. SPLENDENS** (*L. Tigrinum*). This is improved Tiger Lily and a most beautiful lily for general use.
- TIGER LILY** (Double). Similar to above other than the flowers, which are quite double. Very desirable.
- TORCH LILY** (*Kniphofia Aloidess*). 2 to 3 feet. August to October. Orange and scarlet. Known as the Red Hot Poker. A desirable border plant.
- TURK'S CAP LILY** (*L. Superbum*). This native lily is one of the finest and most hardy of all lilies. It often attains a height of 6 feet, and produces a large number of flowers. Its flowers are bright orange in color with dark spots.

Yellow Garden Lilies (*Hemerocallis*.)

These beautiful and fragrant golden lilies are of easiest culture, succeeding in almost any garden soil. They are remarkably free from the enemies that so unfortunately beset so many of our garden favorites. By a selection from the following list, these beautiful lilies can be had in flower from May to August. The leaf growth starts very early in the spring, adding a pleasing light green to the border where they are used. This growth quickly shoots up into a graceful clump of flowing rich green foliage, which lends its attraction to the garden border. Springing from this growth graceful flower spikes appear, liberally supplied with flowers and buds for several weeks. The color is from soft lemon to richest apricot yellow and deep orange, varying with the variety. Fragrance delightful. No other one class of strictly hardy garden lilies can be depended on to do more towards delightful permanent garden effects. Plant these lilies in the early fall and an abundance of flowers will follow the following blooming season.

Yellow Garden Lilies, *Hemerocallis*.

VARIETIES OF YELLOW GARDEN LILIES. (See illustration).

AURANTIACA VAR. MAJOR (*Hemerocallis*). Orange yellow, new and rare. 50c. each). 2 to 2½ feet. June and July. Large and rich.

***EARLY LEMON LILY** (*H. Minor*). 1 to 2 feet. Early June. Striking lemon yellow, fragrant.

***EARLY YELLOW LILY** (*H. Dumortierii*). 1 to 1½ feet. June. Deep yellow and fragrant, quite dwarf and makes a splendid foreground plant.

***LEMON LILY** (*H. Flava*). 2 to 3 feet. June and July. Clear lemon yellow; fragrant. This old garden lily is a great favorite.

***MIDDENDORF'S LILY** (*H. Middendorffiana*). 1 to 2 feet. June to July. Deep golden yellow.

***ORANGE MAN LILY** (*H. Orange Man*). 1 to 2 feet. July and August. Rich deep orange; very beautiful.

***ORANGE LILY** (*H. Fulva*). 2 to 4 feet. July and August. This grand old lily is now much in demand. It is splendid for naturalizing in large masses. Large quantities at special prices for naturalizing along drives, etc.

ORANGE LILY VAR. KWANSO. Rich orange red; semi-double; very effective and desirable.

ORANGE LILY VAR. VARIEGATA. A form of the orange lily with variegated green and white foliage, which forms a very striking effect.

***THUNBERG'S LEMON LILY** (*H. Thunbergii*). Late blooming Lemon Lily. 2 to 3 feet. July and August. Fragrant and very desirable. Rich lemon yellow.

***LILY OF THE VALLEY** (*Convallaria Majalis*). A popular favorite and once planted increases in beauty for many years. Pips (single crowns), each 5c.; per 10, 45c.; per 100, \$4.00. Clumps of roots, see price below.

"I am highly pleased with the trees and can recommend your firm to anybody, and I am doing so. All trees are doing well."

"The *Hydrangea Alba Grandiflora* bloomed forth all through July, thirty-two large white flowers from nine separate stalks. The stalks are gradually gaining sturdiness sufficient to bear up the immense flowers."

"The trees arrived in good condition and are a fine looking lot."

Paeonies (Herbaceous.)

Paeonia Festiva Maxima, a magnificent white, see description below.

The Paeony is to-day without a rival as a hardy garden favorite, and quite naturally so, as no other hardy garden plant thrives with as little special care and produces as fine a display of gorgeous blooms. The great diversity of color and form which can now be obtained in the new and improved varieties very much increases their value.

Selected List of Varieties.

ROSES--Choice Hardy Garden.

R OSES FOR GARDENS are a specialty at the nursery, our sales amounting to many thousands annually. The plants are strong, field-grown bushes, large enough to make a sturdy growth and produce a profusion of bloom right away. This grade of plants is very popular with our customers.

Our roses should not be confounded with the department store articles often offered. Our roses are all selected strong field-grown dormant plants dug fresh from the open ground and securely packed for each order.

The love of roses is universal and fortunate it is that the most beautiful ones live out of doors and thrive in ordinary gardens. Be liberal with the fertilizer in preparing your rose gardens; they will return many fold in the way of luxuriance and profusion of blooms.

Frau Karl Druschki, a charming white rose.

If in doubt as to the varieties of roses wanted for any special purpose we will be glad to assist in making selections for you.

Garden Hybrid Roses. Strictly Hardy.

This class of roses blooms profusely in June and at intervals throughout the Summer and Fall. The popular hardy garden roses mostly belong to this class and are always satisfactory.

Do not allow roses to suffer from want of plenty of fertilizer, as they are gross feeders, and only when they have plenty to feed on can they be expected to produce best results.

Anne De Diesbach. (Syn. Glory of France). Carmine, a beautiful shade; very large. A superior garden sort; fragrant.

Baby Rambler. The rose hybridists certainly made a remarkable happy combination when they succeeded in creating this wonderful new rose. Imagine a bushy rose just right for the flower garden or a pot plant as to size with all the beauty of color and great clusters of the *crimson rambler* and add to this that it will bloom constantly all summer. Perfect in form and color.

Prices of All Roses.

Very strong field grown	Each, \$0.50	Per 10, \$4.50	Per 100, \$30.00
Medium grade, field grown	Each, .30	Per 10, 2.75	Per 100, 20.00

Charming arbor effects can be gained by using the Rambler Roses; the Dorothy Perkins and Lady Gay in soft clear pinks lend themselves most happily to this use. Rambler Roses are also most happy when trained on fences and about the house walls; in fact, they are adaptable to so many uses which add attractively to the grounds that they really are of first importance in picturesque garden making.

Garden Hybrid Roses—Continued.

- Baron De Bonstetten.** Rich velvety maroon; large, full. A splendid sort.
- Clio.** Flowers large, of fine globular form, flesh color, shaded in the center with rosy pink; growth vigorous.

Fruit Department.

*Red Astrachan.
A favorite early
red apple.*

FRUIT growing on a commercial scale is one of the country's profitable industries. No part of our great country offers a better opportunity to grow high flavored and beautiful appearing fruits than New England. In the same way the home acre, yes, even the small city garden can be made to return crops of fruits well worth all the labor they required. There is also the genuine pleasure and delight many of us get and more would if they only knew what they are missing, in watching trees grow. One's interest is kept at the top notch from the blossoming time, when fruit trees are bowers of floral grace and beauty, until the ripening colors appear and in the full maturity we have the actual luscious fruits of our watchfulness and care, not only beautiful, but sure to delight the palate and contribute to the true economy of the household.

Dwarf Fruit Trees.

These interesting dwarf trees have commercial possibilities, but it is to the amateur and home gardener that they appeal especially. Practically every garden offers opportunities for their successful culture. Where too limited areas are available to make ordinary fruit trees practicable these dwarf forms are most acceptable. They can be planted along the garden fence or walls, on either side of the garden paths and can be made to add an additional feature to many a flower garden border. Training them flat or to special forms is popular with many; others prefer to keep them in natural shaped trees, only in miniature. Dwarf trees fruit freely, often after the second year, bearing abundantly fruits of the largest size and finest quality. (*See illustration*).

DWARF FRUIT TREES, by F. A. Waugh, is a valuable book on this subject which we recommend. Price 50 cents. With order for dwarf fruit trees amounting to \$10.00 we will be pleased to include a copy of this book without extra charge.

Beautiful lawns form an important feature of practically all well kept grounds. Lawns reach their highest perfections when contrasting with effective groupings of shrubs and trees.

Edgewood Lawn Grass Seed Mixture.

Is made up of re-cleaned seed of highest quality and composed of a number of varieties, which, sown together, make an ideal mixture both for quick and permanent results. This *Edgewood Mixture* is sold by weight only—never in bulk. Note instructions for sowing with each package, for much less quantity is required than with usual grass seed mixtures on the market. Use one pound for 200 square feet, and 150 to 200 lbs. to acre.

Price.

Per lb., 25 cents; 3 lbs., 65 cents; 5 lbs., \$1.00; 10 lbs., \$1.85; 15 lbs., \$2.75; 25 lbs., \$4. 50 lbs., \$8.25; 100 lbs., \$16.00.

Pulverized Sheep Manure.

BOTH first cost, economy and ease of applying are too important factors to disregard in the handling of fertilizers. In Pulverized Sheep Manure we have nature's own way and in a most convenient form for handling. It is just as it comes from the stockyard pens, only it is thoroughly dried and put through pulverizing machines. If you have never used Pulverized Sheep Manure, you will be agreeably astonished with the results.

Apply on the lawns in the autumn and a deep green growth will quickly follow, which will remain throughout the season under favorable conditions. For applying at time of seeding down new lawns, nothing will give better results. For lawns apply on the surface broadcast 100 pounds to the 1,000 square feet; for the garden, two or three times this amount, depending upon the soil. Two or three tons to acre.

Prices of Pulverized Sheep Manure.

In bags, 100 or more pounds and less than 500, per lb., 2c.

In bags, 500 or more pounds and less than 2,000, per lb., 1½c.

In bags, 2,000 lbs. (ton), \$25.00; five tons, \$115.00, F. O. B., New Haven, Conn.

Car lots, in bag or bulk, 15 to 20 tons, f. o. b. your station, prices promptly quoted.

Five ton lots or less delivered from our own warehouse here at New Haven, Conn. Car lots shipped direct from stockyards.
