BULLETIN NO. 5

U. S. Department of Agriculture

SURPLUS STOCK

—FROM—

The Huntsville Wholesale Nurseries

HUNTSVILLE, ALA.

Shipments from St. Louis, Mo.,

—AT—

ONE DAY'S NOTICE

WE have for the past thirty-one years offered in assorted lots in St. Louis in Spring such stock as we had in surplus. Herein is a schedule of what we now have in St. Louis for immediate shipment. The stock is exclusively of our own growing at Huntsville, Alabama, fresh dug this Spring, packed in the best manner and warranted in fine condition. Everything is fine of the grade, with full fibrous roots, and not culled, as we adhere to a strict system of grading.

BELOW THE BLIZZARD LINE

Everything is bright, green and fresh—sound to the tips. Nearly all the sorts offered are standard sorts, such as most nurserymen can use in assortment with their own growing. Orders should be sent in as soon as possible, but the stock need not be shipped until wanted, as we are prepared to hold it in good condition. We have nothing for sale not offered in this list.

It will be noticed by some of our correspondents that we have refused orders the past season for several articles listed. Our fear of overselling and some countermands are responsible for this. We ask attention to the small-sized trees offered for transplanting into nursery rows. All of the small trees, as well as the large ones, are nicely rooted, and everything is young, smooth and bright.

We can refer to nurserymen who have bought of us in every State and Territory. We can give satisfaction, and guarantee it for these shipments.

TERMS: Cash with order, or 30 to 60 days from date of shipment to responsible, prompt-paying parties. In box lots the price of boxes is included, but the price of boxes on orders from the nurseries is extra.

For convenience in telegraphing a cipher is given. The cipher word stands for one box only in cases where there are more than one in the same assortment.

Address W. F. HEIKES, Manager,
Huntsville, Ala.

Huntsville, Ala., March 28, 1911.

Heikes--Huntsville--Trees.

Address W. F. HEIKES, Manager, Huntsville, Ala. We will not have a representative in St. Louis this Spring. All letters and telegrams should be addressed to W. F. Heikes, Manager, Huntsville, Ala. We have arranged with the Cold Storage House in St. Louis where our stock is stored to ship promptly everything upon our orders, which we will make by telegraph when quick shipments are desired.

Use the Nurserymen's Telegraphic Code in telegraphing, Any one not in possession of a copy will be supplied upon application.

ASSORTED LOTS

We offer the following assortments in box lots at low prices to insure quick sales. We do not open or repack anything. The stock is of the same quality as that sent out by us heretofore. Each box contains an assortment as shown. In ordering one or more boxes, should the particular lots desired be sold, state what substitution will be allowed. The prices quoted include the cost of boxes and freight from Huntsville to St. Louis. When the postoffice address and the railroad station differ, always give explicit marks for the boxes when writing.

PERFECT DORMANT CONDITION.

Our stock is in perfect dormant condition, and we are prepared to keep it so until the end of the season, as everything is now in cold storage.

INSPECTOR'S CERTIFICATE

Our card with Inspector's Certificate is placed on all boxes and packages. Any one ordering from a State where more than this is required should inform us in ample time to comply with the law. Should any one desire this card removed before shipping, it should be stated in the order.

FREQUENT BULLETINS

We shall issue Bulletins from Huntsville frequently during March and April. Any one failing to receive them regularly will please write for copies.

FREEZING WEATHER

There is always more or less danger of trees being caught en route in freezing weather in Spring. We pack in such a manner that should the contents of the boxes freeze solid on the way to our customers the trees will receive no injury if the frost is allowed time to come out before the trees are removed from the boxes. The trees should be taken from the boxes as soon as frost is out, or should there be no frost in the boxes when received, the trees should be removed from the boxes immediately upon arrival. We practice in this respect what the experience of many years has taught us. If our customers will follow these rules and notify us of the condition of the trees at once when taken from the boxes we will guarantee good condition. Notice should be sent to us at once by telegraph, at our expense, if there is any cause of complaint or should the trees be refused, stating reasons. The trees will be considered accepted if removed from the boxes in which they are packed.

TERMS AND CONDITIONS

For further terms and conditions concerning risk of transportation, claims etc-, see our regular Price List.

Box Lots in Cold Storage in St. Louis

No Charge for Drayage

PEACH TREES--One Year. On Peach.

ROSES==Field Grown. Budded.

We have ceased to grow Roses at Biloxi, as we find we can produce a much stronger, healthier plant at Huntsville. Those grown here, both root and top, are as fine as can be grown anywhere. We have a large stock this year and are making prices low to help introduce the Huntsville grown.

BUDDED ROSES—We have ceased the propagation of Roses on own roots.

The No. 1 plants will have three or more branches and will be cut back to 18 to 24 inches. The roots are very fine. We make a grade of Roses called No. 1 $\frac{1}{2}$. This grade is made up of plants just under No. 1, such as do not have the required number of branches or slightly under weight and height, and make a very nice grade for mailing.

The plants under No. 1 $\frac{1}{2}$ we class as No. 2. We recommend them for transplanting.

Special Mention.

PEACHES.

THE MAYFLOWER—Introduced by Mr. J. Van Lindley. Pomona. N. C. The earliest of all peaches. Ripens here May 19th to June 5th, depending upon the season. Mr. Lindley has tested this variety in his orchard for the past four years. It is remarkable peach and red all over. Will supersede Victor and Sneed.

ARP BEAUTY is next in season and next in value to Mayflower. Comes in just before and laps over into the season of Greensboro. It is quite distinct from any variety that we know and will prove a very valuable sort for commercial orchards as well as for family orchards. It is the most showy and by far the best in quality of any peach of its season. The flesh is of a rich, inviting yellow color; the skin a pleasing shade of yellow, very attractively painted and mottled with bright crimson. It is very prolific, has large flowers and is one of the hardiest in tree, bud and bloom. Freestone, but the flesh, like that of all exceptionally early freestone peaches, clings more or less to the seed. In size it is about the same as Yellow St. John.

APEX—Ripens at the same time as Alexander, to which it is far superior in size, color and flavor. Size large, color of skin yellow, with a mottled red cheek. Flesh yellow and of good quality—one of the best early market varieties. Freestone, but, like all extra early peaches, the flesh clings to the stone.

DR. BURTON—Very similar to Mamie Ross in vigor, certainty and abundance of bearing; has large flowers. Much superior to Mamie Ross and ripens about one week earlier. It is a perfect freestone, of rather larger size than Mamie Ross, of same shape, with smaller seed, much firmer and more color, and quality of the finest; the best and handsomest peach of its season.

GOLDFINCH (Ea. Elberta)—This is a seedling of Elberta, of very much the same characteristics, but ripening about a week earlier.

MUNSON'S CLING. A selected seedling of Elberta, among hundreds grown from select seed. Equally as large as Elberta, more spherical, with a short beak. Firm, yellow flesh of the finest quality. Surface mostly covered with bright red, very handsome. An immensely superior quality to Chilow. Ripens with Elberta.

MUNSON'S FREE. Selected variety among several hundred Elberta seedlings grown from selected seed. The fruit is larger than Elberta; more highly colored, more oblong and of better quality; flesh yellow. More prolific and hardy in bearing. Ripens about a week later than Elberta. Very firm; fine for shipping.

REX. A seedling of Elberta, ripening about a month later. This variety in size, color of skin and flesh is very much like Elberta.

TIEBOUT—Free, largest size, rich orange color, with dark red cheek, flesh of the finest quality, firm, buttery; a splendid shipper, seed small. About two weeks later than Elberta.

DULCE—The same description of the Tiebout, but ripening a month later.

OCTOBEL (Bell's October). Large, rich, yellow, red cheek; freestone; of finest quality.

LOVELL—Leads all other clear yellow freestones in the Pacific Coast; medium to large. First week in August.

MUIR—Very sweet and firm, yellow, with sometimes a faint blush. Large, very free, pit quite small. Most popular drying and canning variety on the Pacific Coast. August.

PHILLIPS' CLING—Large; yellow; flesh firm; clear yellow, Preferred by canners. Early September.

ORANGE CLING—Very large; yellow with a dark crimson cheek. Early August. Cling.

TUSKENA (Tuscan)—Very large; yellow. Middle of July.

We recommend the following varieties as a splendid assortment of varieties for a succession in both the commercial and home orchard. They are named in the order of ripening and cover the season from the middle of May to the middle of October: Mayflower, Arp Beauty, Apex, Greensboro, Dr. Burton, Mamie Ross, Carman, Hiley, Goldfinch, Champion, Belle of Ga., Elberta, Munson Free, Old Mixon Free, Lemon Cling, Crawford's Late, Beer's Smock, Rex, Tibout, Fox Seedling, Krummel's Late, Salway, Dulce, Henrietta, Octobel, Stinson's.

Offerings for Fall of 1911 and Spring of 1912.

We will have our usual large stock of Pears, Apples, Plums, Cherries, Peaches, Roses and Grafted Pecans for sale for the Fall of 1911 and Spring of 1912.

Nurserymen who operate through agents or who buy to sell at wholesale will profit by corresponding with us now. We will make prices upon a basis that will be mutually advantageous. We are willing to share profits and are likely to be more liberal early in the season than later.

While our stock in everything we grow is large, it is especially so in Apples, Kieffer Pears, one and two years, Peaches, one year and June Budded, and Roses.

We do not buy to sell again, so you need have no fear of getting heeled in stock, and you can depend upon getting trees fresh dug and of standard grades.

The indications are that the coming year will be one of continued prosperity for nurserymen. Those who have bought of us heretofore will do so again with the assurance that our stock will give perfect satisfaction to their customers on delivery.

We believe we have the best organized force of laborers in the United States. Most of our men have been with us for many years. Because of this advantage we are enabled to do an extensive business with more exactness and expedition than many concerns which have a far smaller production.

**Huntsville Wholesale Nurseries,
W. F. Heikes, Manager,
Huntsville, Ala.**
