BULBS

**For Forcing and for Outdoor
Planting**

— DEALERS IN —

REQUISITES FOR THE FARM, GARDEN
AND LAWN. EVERYTHING FOR THE

POULTRY KEEPER

Hyacinths

These are the most popular among the Bulbous Roots, and may be cultivated in a successful manner in various ways.

Garden Culture—The soil should be as carefully prepared as for pot culture. Place the bulbs three to four inches deep and six to ten inches apart, with a little sand under and above them. At the approach of winter cover with stable litter or any other light substance, removing same in the spring.

Culture in Pots—Place the bulb in a four or five-inch pot, in a compost composed of two parts fine rich loam and one part sand, covering the top of the bulb. Water well and place in cool, dark cellar or room until they are grown two or three inches, then bring them in the light, in warm room, out of the sun's rays. Keep well watered, and shower when ready to bloom.

Culture in Glasses—The bulbs should be so placed that only the base of each touches the water; then place them in a cool, dark room until they have made four or five

inches of root, after which expose them to the light and air in a warm room, **but not in the sun**. The water should be changed as it becomes impure. It is very beneficial to water with a fine syringe over the head of the Hyacinths after the flower spike begins to show. If this is done frequently the bloom will swell out and expand much better.

Choice Named Hyacinths

Selected bulbs, producing finest spikes, especially recommended for pot and glass culture. All varieties 12c. each; \$1.25 per dozen.

SINGLE RED.

Baron Van Thuyll. Pale rose, large spike.
Fabriola. Pink, carmine striped.
General Pelessier. Scarlet, fine truss.
Gertrude. Rosy pink, large truss.
Gigantea. Rose and blush, very large spike.
Lord Macaulay. Rose carmine.
Monsieur Hoboken. Dark rose.
Norma. Pale, waxy pink.
Robert Steiger. Bright crimson.
Sultan's Favorite. Blush pink, carmine striped.
Von Schiller. Pink, crimson striped.

DOUBLE RED.

Bouquet Tendre. Bright red, fine truss.
Lord Wellington. Finest double pink, immense bells.
Prince of Orange. Deep rose, large, beautiful spike; semi-double.

SINGLE WHITE.

Alba Maxima. Pure white.
Baron Van Thuyll. Pure white, large compact spike.

Grandeur a'Merveille. Creamy white, large.

Grand Vedette. Pure white, large bells.

La Franchise. Waxy white, extra.

La Grandess. Pure white, large bells, extra large spike.

Madam Van der Hoop. Pure white, large bells.

Mont Blanc. Pure white, large.

Paix de l'Europe. Pure white, long bells.

Pavilion Blanc. Pure white, large bells.

Queen Victoria. Pure white.

DOUBLE WHITE.

Bouquet Royal. Pure white, yellow centre.

Flevo. Purest double white, large bells, compact spike.

Non Plus Ultra. Blush white, violet centre.

SINGLE BLUE.

Baron Van Thuyll. Dark blue.

Charles Dickens. Pale blue, large truss.

Czar Peter. Porcelain blue, very large spike.

Choice Named Hyacinths—Continued

SINGLE BLUE—Continued.

Grand Lilas. Lilac blue, large flowers.
 Grand Maitre. Deep porcelain blue, large spike.
 King of the Blues. Rich, dark blue, extra large spike.
 Leonidas. Bright blue, one of the finest.
 La Peyrouse. Porcelain.
 Marie. Purple, large spike.
 Peineman. Light blue, large bells.
 Queen of the Blues. Light blue.
 William I. Dark blue, early.

DOUBLE BLUE.

Blocksborg. Light blue, one of the finest
 Lord Wellington. Dark blue.
 Rembrandt. Light blue.
 Van Speyk. Light blue.

SINGLE YELLOW.

Herman. Orange yellow.
 Ida. Pure yellow, large spike, extra fine.
 King of the Yellows. Bright yellow, large bells.

DOUBLE YELLOW.

Goethe. Light yellow, large spike.

Finest Mixed Hyacinths for Bedding, Forcing, &c.

These are all sound flowering bulbs, and comprise different shades of the various colors; they are unexcelled for use when an effective display is wanted in the open air, and superior to those of cheap mixtures, sometimes offered for outdoor planting.

Early Roman Hyacinths

This beautiful variety is extensively used for forcing and house culture. They may be had in flower by Christmas, when their fragrant flowers are most valuable for bouquets; by successive planting and keeping in a cool place they may be had throughout the winter. Each bulb throws out several flower spikes or trusses of pure white, fragrant flowers.

Single Early Tulips

The Tulips, of all bulbous flowers, are the most popular and the finest. Like Hyacinths, they are set out in the open ground, or planted in pots, and are managed in the same manner. The roots should be planted in October or early in November, three inches deep and four to six inches apart.

Varieties marked "A" are the earliest, those marked "B" next, and those marked "C" are the latest. The figures indicate the height in inches.

Single Early Mixed Tulips

P. S. Co.'s Special Mixture. This mixture contains all the best varieties of Tulips which flower simultaneously and grow about the same height; for bedding out this special mixture is unsurpassed. For size and quality of bulbs and variety of colors this mixture has no superior. Per doz., 25c.; per 100, \$1.75; per 1,000, \$15.00.

Fine Mixed, as imported. Per doz., 15c.; per 100, \$1.00.

Our Bulbs

are imported direct from the best growers in France and Holland, We sell only the highest quality at the lowest prices.

Double Tulips

These come in bloom later than the single tulips, and are valuable for bedding purposes, as they preserve their beauty for a long time. They are also easily grown in pots for house culture, with the same cultural directions as hyacinths.

Isabella. Rosy pink, white shaded	30	2 25	
Picotee. (Maiden's Blush.) Pure white, edged pink; reflexed	30	2 00	

Our Bulbs are all selected and produced by the best growers.

Narcissus or Daffodils

The Narcissus has more points of real merit than any other hardy plant, and until recently the possibilities of this family have not been brought out. The florists now use these in large quantities. They are equally well adapted for the conservatory, sitting room or flower-garden, so that however limited the collection of plants may be, if there is not in it a fair proportion of this delightful flower it will be deficient of a most essential ornament.

Most of the varieties are perfectly hardy, and need not be disturbed oftener than once in three or four years. They grow well in any ordinary garden soil, and may be planted in groups and lines about three inches deep.

Single Narcissus

	Each.	Doz.
Albicans (White Spanish Daffodil). Pure white trumpet, one of the best....	\$ 05	\$ 50
Ard Righ (Irish King.) Large and early, trumpet and petals rich yellow....	05	50

Mixed Polyanthus Narcissus. \$1.75 per 100	03	30

Chinese Sacred Lily

A variety of Polyanthus Narcissus bearing an abundance of deliciously fragrant pure white flowers, with a lemon or orange centre. It is of the easiest culture. Use shallow dishes about three inches deep, into which put about one inch of gravel; on this set the bulbs and keep the dish full of water. It is not absolutely necessary to keep the bulbs in the dark, but if kept shaded until the leaves begin to grow better results may be obtained. **True Chinese Grown Variety.** Price 10c. each; \$1.00 per dozen.

Jonquils

A species of the Narcissus, perfectly spring. They are also very desirable for winter blooming. The flowers are a rich golden yellow and very fragrant.

	Doz.	100
Double. Fine, deep yellow, very fragrant	\$ 40	\$3 00
Single. Rich, yellow, very fragrant	15	75
Campernelles. Single yellow large flowered, fine for forcing	20	1 00
Rugilosus. The largest flowering Jonquil, pure yellow and very fragrant	25	1 50

Our Special Mixed Tulips cannot be equaled

Crocus

One of the earliest spring flowers, producing dense masses of rich colored blossoms. Plant the bulbs two or three inches deep in a moderate rich, sandy loam. They may remain in the ground undisturbed for several years.

Choice Named Large Flowering Crocus

These are composed of all the best and most beautiful varieties, and are remarkable for richness of color and the immense size of their flowers.

	Doz.	100
Albion. Extra fine and striped.....	\$ 12	\$ 75
Carolina Chisholm. Large, pure white..	12	75
David Rizzio. Large, dark purple.....	12	75
Mont Blanc. Finest of all whites.....	12	75
Madame Mina. Light blue	12	75
Sir Walter Scott. White, striped lilac..	12	75
Baron Bruno. Bright purple	12	75
Non Plus Ultra. Purple, with white tip.	12	75
Prince Albert. Large brilliant purple..	12	75
Queen Victoria. Pure white	12	75
Large Yellow. Pure golden yellow.....	12	75
Mammoth Yellow	15	1 00

Chionodoxa (Glory of the Snow)

One of the most beautiful spring flowering plants in cultivation—flowering early in the season with the Snowdrops—thoroughly hardy, and will thrive well in any soil. Excellent for pot culture.

	Doz.	100
Luciliae. Flowers blue, shading to white in the center.....	\$ 20	\$ 1 25
Sardensis. Beautiful deep blue flower.....	20	1 50
Gigantea. Distinct variety, very large flowers, of a beautiful, soft sky blue with white center	25	1 50

Freesia

The Freesia is one of the most popular bulbs for winter flowers. The flowers are tube-shaped, pure white, blotched with yellow on the lower petals. It is very graceful and fragrant, and is valuable as a cut flower, the spike remaining fresh a long time in water.

Should be potted early, 6 to 8 bulbs in a 4-inch pot; use good soil, of a sandy texture, water well at first, then sparingly, until beginning to grow rapidly; afterwards water freely and place in a sunny position.

Refracta Alba. Extra large bulbs.....25c. doz.; \$1.50 per 100

Iris

An old favorite, too well known to need any description. All the varieties are beautiful and very effective in the garden. They are of easy culture, thriving in any good garden soil.

	Doz.	100
English. Finest mixed. Large handsome flowers	\$ 25	\$ 1 25
Germanica. (German.) Finest mixed, all colors	60	
Hispanica. (Spanish.) Flowers smaller than the English. Splendid mixed	12	75
Pavonia. (Peacock.) White, blue spotted, pot culture	35	

Lily of the Valley

One of the most beautiful and admired spring flowering plants. It is quite hardy and thrives best in shady places, such as beside a wall or under trees. Plant thickly together, two to four inches deep, in rich soil and do not disturb unless they increase too much. It may be planted indoors, the same as Snowdrops, in baskets of moss, or boxes and vases, the best time being in November and December.

Convallaria Majalis. Selected pips, for forcing and pot culture. 25c. per doz.; \$1.50 per 100.

Lilies

They should be planted as a general rule, in autumn, and not less than six inches deep. They succeed well in any good soil, with a little sand under and above them and will flower to great perfection if protected during winter by a covering of litter or leaves. They should remain undisturbed in the soil two or three years. Each. Doz.

Auratum. Flowers pure white, studded with crimson spots, with a golden stripe through the center of each petal	\$ 15	\$1 50
Candidum. (Easter Lily.) One of the best known and most popular garden lilies; flowers pure white and very fragrant	10	1 00
Harrisii. (Bermuda Easter Lily.) White trumpet-shaped flowers, fully six inches long and quite numerous: 1st Size Bulbs	20	2 00
Lancifolium Album. Pure white	25	2 50
Lancifolium Rubrum. Shaded red, with crimson spots	15	1 50
Lancifolium Roseum. Shaded rose, with rose spots	15	1 50
Longiflorum. Snow white, trumpet-shaped; one of the best for forcing and garden culture; perfectly hardy, large bulbs	15	1 50

Oxalis

A class of small bulbous plants of great beauty, both in foliage and in bloom; suitable for growing in baskets, pots, etc. Plant in good rich soil, five or six bulbs in a pot.

Alba, white	doz.	\$ 25
Bowellii, large bright rosy red	doz.	25
Hirta Rosea, rose	doz.	25
Cernua, single yellow	doz.	25
Cernua, double yellow	doz.	50
Versicolor, red, violet and white	doz.	25
Mixed, all colors	doz.	25
Buttercup, bright buttercup yellow	doz.	35

Scilla

Early flowering bulbs, one of the best spring flowers for edging, massing, etc. **Siberica,** one of the best varieties for edging and beds, producing small flowers of richest metallic blue; very dwarf and hardy.....per doz., 20c.; \$1.25 per 100

Snowdrops

They grow well in any soil, and should remain undisturbed for two or three years. Plant about two inches deep in lines, but if planted in clumps they produce a very pleasing effect. Doz. 100

Elwesii. Single (Giant Snowdrops). Fine large flowers	\$ 15	\$ 75
Double Flowering, extra fine bulbs	25	1 75

Spirea

Used extensively by florists for forcing in the greenhouse for winter flowering. It is also one of the best hardy herbaceous plants and should be in every garden. The long feather-like spikes of small, pure white flowers are very useful and highly esteemed for bouquets.

Spirea Japonica. Strong clumps, 10c. each; \$1.00 per doz.

Spirea Compacta Multiflora, a dwarf compact-growing variety. 15c. each; \$1.50 per doz.

Spirea Japonica

WE SELL ONLY
High Grade Seeds
 FOR THE FARM, GARDEN, LAWN
 AND GREENHOUSE.

Park Lawn Grass

Mixture for Lawns, Tennis Courts, Croquet Grounds

There is nothing more beautiful and pleasing to the eye than a well-kept lawn, with its close, velvety turf. To insure this the principal object is to use good seed. For this purpose we recommend our "Park" Lawn Grass Mixture, which is composed of dwarf and close growing grasses, and adapted to produce a fine, velvety lawn. The seed may be sown either in spring or fall. Four bushels of seed are required per acre Per qt., 20c.; 4 qts., 60c.; pk., \$1.00; bushel, \$3.50.

Mixture for Shady Places

On nearly all lawns there are unsightly bare spots under the shade of trees, which many think cannot be covered with grass. Such is not the case, for by a liberal application of our "Shady Mixture" you can have a beautiful lawn. The Grasses used in this mixture are only those well adapted for growing in shade. If the soil should be "sour," which is frequently the case, use an application of slaked lime at the rate of one bushel to each thousand square feet. Qt., 30c.; 4 qts., \$1.00; pk., \$1.50.

IT PAYS TO SPRAY FOR

❖ SAN JOSE SCALE ❖

GOOD SPRAYING IS THE FRUIT GROWERS' BEST INSURANCE.

"SCALECIDE"

PAYS ONE-HALF THE PREMIUM.

"SCALECIDE" is a petroleum oil from which the heavy lubricating and light inflammable oils have been removed, combined with certain vegetable oils, and chemically treated so as to mix instantly and to all practical purposes permanently, with cold water, making a white, milky solution. It is more than an emulsion because the oil globule is broken up, allowing it to spread further, therefore its economy in use. "SCALECIDE" is the nearest approach to a pure petroleum soap that has ever been made, but because of its oily appearance it is called a "soluble oil." This was tested out and tried by a number of the most careful fruit-growers, before it was put on the market for the first time in the Winter and Spring of 1905. "SCALECIDE" is more efficient, more economi-

cal and easier to apply than any known remedy for the San Jose Scale. It is shipped all over the world and the sun to-day never sets on orchards sprayed with "SCALECIDE," and where best known "SCALECIDE" is to-day "the standard" of the soluble or miscible oils.

"SCALECIDE" should be used when the trees are dormant or not growing. The best time is in the Fall as soon as the leaves are off the trees, for the scale is in its least resistant condition and therefore more successfully attacked. The old and gravid scale will die before breeding season the next year. The scale gets in its most destructive work in the Winter, as many trees apparently healthy in the Fall are dead when spraying time comes in the Spring if unsprayed.

MYERS' O. K. SPRAY PUMP

For Hot, Cold or Any Kind of Mixture. Has Mechanical Agitator, Solid Brass Ram Plunger, Ground Bevel Valve and Seat

This pump is designed for ordinary orchard use, and, as will be seen by the cut, can be readily attached to any size of barrel in a minute's time; for that reason we sell it either with or without the barrel. The cylinder is what is known as a ram plunger, made of solid brass tube with closed end, which passes through a circular hemp packing, which adapts it either for hot or cold mixtures. It has a brass valve seat. The pump is fitted with leads for hose, but no hose is furnished at price printed.

Another special feature of this pump is that by removing two bolts the valves can be readily taken out and repaired. The air chamber is made of $2\frac{1}{2}$ inch steel tube. The handle is wrought steel, so as to enable the operator to get up a pressure of 200 pounds or more if necessary.

We can furnish any length of hose desired at market prices.

Price of pump without barrel, \$12.00

THE AUTO-SPRAY

Made of either brass or galvanized steel.

This sprayer has nozzles, stop cock and fittings turned from solid brass, with deep cut threads, 3-ply rubber hose. The pump and valve are entirely of brass where they come in contact with the solution. All cast-iron parts are malleable iron. The carrying straps are made of 8-ply halter web. It is fitted with an improved valve and take-out and put-in sleeve, thus preventing damage or accident to the plunger and packing. In the brass machine there is absolutely nothing that can corrode or rust.

What the Auto-Spray Will Do

A few strokes of plunger in air chamber will compress enough air to discharge the entire contents and make a continuous spray for nine minutes. This means that the "Auto-Spray" can be charged in fifteen seconds, when it will work uninterruptedly long enough to spray a quarter-acre of potatoes. The spray can be made to flow fast or slow by merely turning the cock of the nozzle, and it will throw either a cloudlike shower or a solid stream.

Prices

"Auto-Spray," No. 1, galvanized tank ...	\$4.50
"Auto-Spray," No. 1, brass tank	6.75
Extension pipe, brass, two-foot length ...	.45

The Perfect Success Spray Pump

Price \$4.50

This pump is furnished with the improved combination foot rest bucket clamp and bail holder.

The outfit is a most excellent one for ordinary use in the garden, vineyard or orchard and for washing windows, or the application of whitewash.

The combination bucket clamp and foot rest enables the operator to have the pump and bucket clamped together as one outfit with the bail standing upright.

It has a large air chamber and throws a continuous stream either in a spray or solid. It is provided with a Bordeaux Nozzle and four feet discharge hose.

Deming Simplex Barrel Spray Pump

Price with 12½ ft. Hose, Nozzle and Pole Connection, \$10.75

The outfit shown in the accompanying cut makes a first-class orchard sprayer at a low cost. It has an adjustable base to fit the top or side of any barrel, in which the pump rests. The air chamber is large, insuring a constant stream.

The working parts are made of brass and the pump is provided with the best agitator on the market.

The cylinder being brass lined, the piston rod brass cased and the plunger and valve solid brass.

The discharge is provided with a Y connection, a tight cap being furnished for use in case but one section of hose is used.

Acme Sprayers

These little sprayers have met with a large sale since their introduction. They are needed by every poultryman and farmer, and should be in every household.

Great advantage is derived by the use of these sprayers in exterminating potato bugs, tobacco, corn, tomato and currant worms, and all plant insects; also in killing lice in poultry houses. They are used extensively on horses, cattle and swine, and for spraying clothes, carpets, cigar wrappers, etc., in fact, wherever a sprayer is needed. These sprayers are light, strong, compact and well made. Each is tested with an automatic spray pump before it leaves the factory. Each, tin, 50 cents.
