Terms and Conditions

Terms.—*Cash before shipment*, unless special agreement has been made for other terms of payment, or previous credit has been established with us. *No deviations from this rule.* Digging, packing, and boxes free on all orders accompanied with remittance in full.

Shipping Seasons.—In spring our shipping season varies some, but generally begins about April 1st and continues to June 1st. Some varieties of evergreens may be safely shipped as late as June 15th. We ship evergreens from Aug. 15th to Oct. 15th, besides in spring. Deciduous trees from Oct. 15th to Nov. 15th and again in spring. All stock is dug fresh just before shipment, and packed in best quality live Sphagnum moss. Some seasons we can commence digging trees as early as March 15th.

Our Responsibility for delivery ceases when delivery is made by us to transportation company. We guarantee stock to be full count and true to name and in healthy, growing condition when delivered to transportation company. This guarantee, however shall in no case make us liable for more than the original invoice value of the stock. Under no circumstances will goods be shipped subject to approval or rejection on arrival.

Shipments to points on railroads where there is no station agent must be prepaid and in such cases the amount of freight must therefore be included, and so stated in the remittance for order.

Shipping Directions.—State distinctly whether you want the goods sent by freight or express, and tell us what railroad to ship by if you have a preference. Write your name *plainly*—and give name of freight or express office if different from postoffice.

Packing Free except on less than car lots of large trees for Park or Street Planting, when cash is received with the order; otherwise we make a charge to cover the cost of packing and boxes.

Special Prices given on very large orders. 50 of any one variety and size sold at 100 rates, and 500 of any one variety and size at 1,000 rates. No order accepted for less than one dollar.

Please do not order 12 in. trees at the price of 8 to 12 in., nor 18 in. trees at the price of 12 to 18 in. Price of 12 in. trees will be midway between that of 8 to 12 in. and 12 to 18 in., and the same rule will apply in all cases where one exact size is ordered at variance with the sizes given in this list.

Our Illustrations. We would impress upon the readers of this little catalogue and price list, the fact that each and every illustration therein shows trees that were bought from us, and that the printing plates are made direct from photographs taken expressly for us, either by or under direction of the owner of the grounds. There is positively no deception about any of our illustrations.

PRICES.—The prices in this catalogue supersede all previous quotations and are subject to change without notice.

CLAIMS.—For deductions will receive consideration only when made within six days after receipt of goods.

CAUTION.—All quotations are subject to stock being unsold when order is received and to injury to stock from causes over which we have no control.

INSPECTION.—Our nurseries are annually inspected by the State Entomologist and we hold his certificate that our stock is free from injurious insects or contagious diseases.

We take great pleasure in presenting our forty-seventh annual price list of Ornamental trees. Our stock is all perfectly hardy, for it must be in order to survive this cold climate. It is adapted to a wide range of climate and will thrive equally well in the South as in the North. Our trees are full of life and vigor and represent the best that the North can produce.

To large Planters: We grow a large assortment of Evergreen and Deciduous trees and in some of the standard varieties, are prepared to furnish small trees in very large quantities. We would be pleased to figure with parties who intend to plant in large quantities.

To the Retail Trade: Our assortment includes all the standard varieties of Evergreens and Ornamentals. We earnestly solicit correspondence from parties who desire to make small plantings of either Ornamental or Fruit trees.

To the Wholesale Trade: We especially solicit the wholesale trade. Our trade discount is liberal and we cater especially to nurserymen and dealers. Special prices will be made on car load lots.

Each fall we collect large quantities of Evergreen tree seeds from the native forests of the north and northwest, clean them up ourselves, and therefore can guarantee to those wanting fresh and pure tree seeds, the best to be had. Our list of tree seeds is usually issued late in the Fall of each year.

Millions of trees are now being planted every year for Forestry purposes, and the planters for such purposes usually buy in very large quantities. To these we will say that it will be a pleasure to us to quote them special prices on their requirements, provided their needs can be supplied from the varieties that we raise and offer for sale.
