Fall 1912

Gurney Seed & Nursery Company

Yankton, South Dakota

A great many varieties of trees, seeds, plants and cuttings can be planted to advantage in the fall; in fact by planting small grain such as winter wheat, rye, etc., you escape about two weeks of the dangers of hail, wind, rust, etc., the coming summer and can harvest your crop nearly two weeks ahead of the spring planted grain. In nursery stock, cuttings and most of the small fruit and forest trees, are equally as well, if not better planted out in the fall than in the spring. Other stock can be buried and kept until spring, in the very best of condition and you will have it on hand when you wish to plant in the spring. Your orders will be appreciated and given the best of attention. On fall seeds,

that is seeds for fall planting, we will make shipment on day of receipt of order. In South Dakota there is an exceptionally low express rate, in fact the express rates in South Dakota are lower than any other state in the union. We can ship seeds and nursery stock to you by express at practically the same rate as freight; this applies to South Dakota only, consequently any goods shipped from here will reach any part of the state, within thirty-six hours after leaving here.

We would advise shipments to go by express.

Respectfully yours,

GURNEY SEED & NURSERY CO.

GENERAL INFORMATION ABOUT ORDERING

We guarantee the safe arrival of all money sent to us by bank draft, express or postoffice money order, or personal check. We accept postage stamps to the amount of \$1.00 or less, currency or coin in any amount, but do not guarantee its safe arrival. If you wish to send your personal check for convenience, we are always pleased to receive it.

We guarantee the safe arrival to the shipping point given by you, of all goods shipped by us.

We require cash before shipment, or where one-third of the amount is remitted with the order, we will ship C. O. D. for the balance.

At the prices given in the catalogue we deliver all goods to the express or railroad company in Yankton, no charge for bags or boxes.

WARRANTEE—We wish it to be distinctly understood that although we continue to take all possible pains to supply only unadulterated seed plants, etc., we still give no warranty, express or implied, as to description, quality, productiveness, or any other matter of any of the seeds, plants, or bulbs that we send out, and will not be in any way responsible for the crop. Every order received for articles named in this catalog will be executed on these conditions only. On receipt of any seeds or nursery stock, examine and test them carefully, and if not satisfactory return any seeds to us at our expense within ten days after receipt of the goods, your money together with the transportation charges will be refunded. Make report on nursery stock immediately on its arrival.

Hyacinths in Box.

PREMIUMS AND GIFTS

Something Good—Free With Every Order

Write to the Secretary of your State Fair for their premium list. If you do not have a premium list, pack the goods carefully that you wish to exhibit and send them to the Secretary of the State Fair, express prepaid, always placing the name of each article on each article and your name and address on the package. Write the Secretary that you wish to compete for Gurney Seed and Nursery Company's Special Premiums. Make a list of the items sent for competition. He will enter them as well as though you were there.

Do not forget or neglect to compete for these premiums. They are worth your while.

Conditions of below premiums are: The articles competing must be grown from Gurney Seed and Nursery Company's Seed purchased direct from us or from dealers handling our Seed in the year 1912 and exhibited by the grower. We authorize the Secretaries of all State Fairs in the United States and District Fairs in Canada to offer the following cash premiums:

10 Ears Uncle Sam No. 4, Corn	\$3.00
10 Ears Minnesota No. 13 Corn	3.00
10 Ears Wisconsin No. 7 Corn.....	3.00
10 Ears Gurney's Hybrid Model Dent....	3.00
10 Ears Reid's Yellow Dent.....	3.00
10 Ears Gurney's Early Golden Sweet Corn	3.00
10 Best Gurney's Gold Lump Carrot.....	3.00
5 Best Earlibell Tomato.....	3.00
5 Best Gurney's White Harvest Potatoes	3.00
3 Best San Jose Largest Carrot.....	3.00
1 Best Improved Cole's Early Watermelon	3.00
1 Best Gurney's Early Ballhead Cabbage	3.00
3 Best White Seeded Muskmelon.....	3.00
2 Best Davis Perfect Cucumber.....	3.00
3 Best Enid Muskmelon.....	3.00
Best quart pickled Gurney's Everbearing	
Rustproof Wax Beans	3.00
10 Ostrich Plume Asters.....	3.00
10 Single Dahlias	3.00

Best Peck Kherson Oats	\$3.00
Best Peck Odebrucker Oats.....	3.00
Largest Pumpkin	3.00
Largest Sakurajima Radish	3.00
Largest Patagonia Squash	3.00
Largest Sweetheart Watermelon	3.00
Best collection of fruit grown and exhibit-	
ed by one party	10.00

See list of states at foot of this page.

To compete for this special fruit premium it is not necessary that the trees should be purchased from us.

For the best collection of Vegetables...\$20.00
Conditions of this \$20 premium are: All items exhibited must be grown exclusively from Gurney seed and must win the societies regular premium for best display of vegetables. There will be no Exceptions to these rules.

Conditions of all above premiums are, they must be grown from Seed purchased from Gurney Seed & Nursery Company or from dealers handling our Seed in year 1912, and exhibited by the grower.

With each order for \$2.00 worth of bulbs you may select 40 cents worth additional bulbs which will be sent you absolutely free with your order.

WINTER WHEAT.

Has it ever occurred to you that your crops of Spring Wheat are not always money makers? Does the yield justify you in continuing the use of your land and labor for this crop? You want to grow Wheat, but in order to do so, it must be made to pay. Your yields of from 5 to 12 bushels will not pay expenses. If you can double or treble your yield, you will make money growing Wheat. Why not do it by planting Winter Wheat? Winter Wheat made as high as 35 bushels per acre in Yankton County in 1911, this from ordinary uncleaned, ungraded seed, the crop of 1912 will be better. For the last 15 years there has not been a poor crop of Winter Wheat in this section of the state. In the same time there has not been a general paying crop of Spring Wheat. Plant Winter Wheat and escape two weeks of Rust Danger, Hails, Winds and Bugs. Plant Winter Wheat and make your harvest extend over a longer period. It comes early, when help is plenty and cheaper.

Turkish Red—Per bushel \$1.65; 5 bushels for \$7.50; 10 bushels \$14.00; bags free.

FALL RYE.

Few of our readers realize the value of Fall Rye as a money maker. It will not only out-yield most other grains, but it furnishes an abundance of the very best fall and early spring pasture. It shortens the winter feeding season at least one month, both in fall and spring, and will then produce a fine, marketable crop.

Our Fall Rye is all cleaned and graded with a Clipper Mill. This insures you the very best seed obtainable. Sow from six pecks to two bushels per acre. Price, per bushel, \$1.25. Bags free.

MISCELLANEOUS**DRY BEANS FOR COOKING.**

Better than canned, and much cheaper. We have grown for us each year in California a large quantity of both large and small Limas, and in Michigan the genuine Navy. These are all hand picked and every bean a good one to cook. It will pay you to add a quantity of these to your order. Bags free.

Large Limas, very fancy, per lb., 10c; 25 lbs., \$2.25.

Bush, Lima, very fancy, per lb., 10c; 25 lbs., \$2.25.

White Navy, very fancy, per lb., 5c; 50 lbs., \$2.10.

Onion Sets, Egyptian.—These should be planted in the fall. The best for early spring use as green onions. They remain in the ground and increase from year to year, perfectly hardy anywhere. Every family should have a bed of these. Per lb., 20c; 10 lbs. \$1.50; 20 lbs., \$2.50.

Bird Seed.—Per lb., 8c.

Caraway Seed, for flavoring or seasoning, per lb., 20c.

Celery, for flavoring or seasoning, per lb., 25c.

Dill, for seasoning, per lb., 35c.

Parsley, for seasoning, per lb., 40c.

Pumpkin Seed, used for medicine, per lb., 25c.

Pop Corn, old, best for popping, shelled, per lb., 6c.

Winter Radish.—Sow now. Pkt., 5c.; oz., 10c; ¼ lb., 20c; 1 lb., 70c.

Winter Spinach.—Sow now. Oz., 5c; ¼ lb., 15c; 1 lb., 40c.

CLOVER AND GRASS SEED FOR FALL SOWING.

Alfalfa.—The ground over the alfalfa growing belt, in the northwest is in better condition for planting alfalfa, than it has been for several years, consequently we advise the planting of alfalfa during the first twenty days of August. If you are going to plant it on stubble ground in the extreme north, we would advise that you disc the stubble ground previous to planting. Then sow the seed with a press drill if you have it; if not, broadcast and drag it in well afterwards. The stubble that is left after this treatment will be sort of a protection against winter killing, as it will hold more or less of the snow. Get your ground in good condition, sow the seed this fall, and you will not be bothered with weeds. Consequently you will get a much better stand, and a much stronger plant, than if planted in the spring with competition with the weeds. The seed we are offering is strictly Dakota grown. Price \$22.00 per 100 lbs.

Medium Red Clover.—Lb., 35c; Bu., \$15.00.

Alsike or Swedish Clover.—Lb., 35c; Bu. \$14.50.

Alsike and Timothy.—Lb., 30c.; 100 lbs., \$16.00.

Bokarah or Sweet Clover.—Lb., 35c.; 100 lbs. \$23.00.

Bromus Inermis.—Lb., 25c.; 100 lbs., \$13.00.

Kentucky Blue Grass.—Lb., 40c; 100 lbs.; \$25.00.

Red Top.—Lb., 30c.; 100 lbs., \$19.00.

Timothy.—Lb., 30c.; 100 lbs., \$14.00.

Lawn Grass.—Lb., 45c.; 10 lbs., \$3.75.

Permanent Pasture.—Lb., 30c.; 100 lbs., \$16.50.

Rape, Dwarf Essex.—Lb., 20c.; 10 lbs., \$1.20; 100 lbs., \$9.00.

Tree Seeds.—A great many people purchase tree seeds out of season and are unable to make a success of growing them. If they were purchased at the right time and planted at the right time, you can grow them equally as well as the experienced nurseryman. Most tree seeds have to be planted in the fall, or at least stratified; that is, mixed with damp sand in the fall and allowed to freeze in the winter. It is much better we find to plant them out where they belong, or where you want them to grow in the nursery row in the fall, and at

one year old or two years at the latest transplant them where you want them to grow permanently. In this way you can make your own groves and wind breaks at a much less price than by purchasing the tree themselves. There is no reason why you should not grow black walnut, butter nut, Russian Olive, Ash, Box Elder, and numerous other forest trees from the seed. We can furnish you these seed in the Dakota grown kind and ship them to you at the proper time this fall, with full instructions for planting and care. The expense to you is much less than to purchase the trees. Though of course it will delay you one year in the making of your grove or wind break.

Red Oak.— $\frac{1}{2}$ lb., 25c.; 1 lb., 45c.

Oak Burr.— $\frac{1}{2}$ lb., 20c.; 1 lb., 40c.

Russian Olive.— $\frac{1}{2}$ lb., 30c.; 1 lb., 50c.

Black Walnut.—Pk. 50c.; bu., \$1.50.

Butter Nut.—Pk., 75c.; bu., \$2.20.

Hazelnut.—Lb., 45c.

Box Elder.—Lb., 40c.

Ash.—Lb., 40c.

Black Locust.—Oz., 10c.; $\frac{1}{2}$ lb., 60c; lb., 90c.

Honey Locust.— $\frac{1}{2}$ lb., 30c; lb., 50c.

Some of the Reasons Why You Should Purchase Nursery Stock for Fall Shipment:

In the fall, we, and all other nurseries have about one tenth as many orders for fall shipment as for spring shipment. For this reason we can give each order more of our personal attention than we can in the spring time with ten times the additional business. Generally the planter has less to do in the fall, and he also has the added advantage of having his stock that he cannot plant where it is to remain permanently on hand in the spring so that he can plant it at any time he chooses and the weather is right for planting. He does not have to wait for the stock to come to him in the spring and it never can be shipped to you in the spring on just the day that you want it. A great many items of nursery stock can be planted out in the fall equally as well if not better than in the spring. The list of nursery stock that can be planted equally as well in the fall, if not better than in the spring, is as follows: Currant, gooseberries, horseradish, asparagus, all kinds of forest trees in the small sizes, all kinds of cuttings of trees, nearly all tree seed including ash, box elder, Russian olive, black walnut and butternut, acorns, hickory nuts and hazel nuts and nearly all of the flowering shrubs. These can be planted where you wish to have them permanently and by mulching properly in the fall they will come through the winter equally as well as though planted in the spring, and the seeds, cuttings and other forest trees are much better planted in the fall than in the spring. All other items named are equally as well if planted in the fall. All other nursery stock except evergreens and strawberry plants should be purchased for fall shipment and taken care of as per the instructions which we will send you on receipt of your order. They are very easily taken care of and you have

the great advantage of having your nursery stock on hand to plant any time that the weather conditions are right and you have the time to plant it. With the completion of our new nursery packing and storage house 64x100 feet, made of concrete and frame gives us with our previous facilities, the best of any nursery in the northwest for handling nursery stock and we are offering you the use of these facilities for getting out your trees and plants. The prices at which we are offering nursery stock in this catalog should induce you to place an order with us. We will make shipment at the proper time and give you full instructions for caring for the goods.

We refer you to the big catalog for varieties and descriptions. If you do not have one send card for it.

Bulbs for Fall Planting.—For a very small money outlay you can make your home beautiful. Fall planted bulbs generally bloom about as early in the spring as the frost is out of the ground. The brilliant colors of the tulip, the more sober color of the crocus, hyacinth and etc., makes the early spring months the most pleasant of any. The bulbs which we name below must be planted in the fall. They will not bloom if planted at any other time. They are perfectly hardy with us here at YANKTON, and are hardy in practically all of the territory covered by this catalog. We wish to have you remember one thing in ordering bulbs from us; you receive from us nothing but the first size. A great many catalogs list bulbs possibly at a lower price than we do, but they fill your order with a second or even a lower grade of bulbs, and it is generally the second year after planting before you have flowers. By getting the first size bulbs just such as we are offering here, and such as we will send you, you will have the best flowers from them the next season after planting. This is worth a great deal to you and you should order from us and avoid the disappointment of waiting an additional year for your flowers. They should be planted in beds, Tulip bulbs should be planted about 6 inches apart each way, and the result will be surprising. They come up very early in the spring, just as soon as the frost is out of the ground, and bloom at the first opportunity. The same is true of the Hyacinth. The Crocus should be planted closer together and they bloom even earlier than the tulip. Instructions for planting all kinds of bulbs will be sent with each order of bulbs.

Price List of First Size Select Tulip.

Single Named Varieties.—Each, 5 cents; per dozen, 30 cents; 100 \$2.20.

Single Rainbow Mixture.—Each 3 cents; per dozen, 25 cents; 100 \$1.75.

Double Named Varieties.—Each, 5 cents; per dozen, 30 cents; 100 \$2.00.

Double Rainbow Mixture.—Each, 3 cents; per dozen, 25 cents; 100 \$1.75.

Gurney's Select Tulips.—Tulips are extremely hardy and of easy culture. Flowering freely in either sunny or shady situations, developing their handsomest showy flowers even in

the smallest most confined town garden. By making a selection of single and double tulips, a most brilliant display of colors may be maintained in the garden from about the middle of April until the end of May. In gardens where the flower beds must be kept gay from the earliest dawn of spring, plant between the tulips, snow drops and crocus. These flower first and when out of bloom the leaves form a charming green ground work for the bright flowers of the tulips. When the tulips are out of bloom the beds may be filled with annuals, pansies, verbenas, and flowers of this class without disturbing the tulip bulbs, giving you a continuous flower bed from about the first of April until the snow comes. Do not make the mistake of planting one, or a dozen, but at our very low prices buy 100. Plant lots of them, you will never regret it.

Early Single Tulips.

(1) **Bacchus.**—Deep crimson, stained with yellow in the center, flowers sharply pointed. Height 12 inches.

(1) **Belle Alliance.**—Crimson scarlet with yellow center, height 11 inches.

(1) **Cottage Maid.**—Lovely rose pink shading to cream white. 11 inches.

(2) **Couleur-Cardinal.**—Intense crimson, shaded with plum on the exterior, yellow center. Height 13 inches. A grand tulip.

(1) **Crimson King.**—Crimson, height 14 inches. Bold irregular.

(2) **Duchess Deparma.**—Large orange red with margin of deep yellow suffused with rose on the outer petal, height 15 inches.

(1) **Kaizer-Kroon.**—Crimson scarlet, edged with bright yellow, height 16 inches.

(2) **L-Immaculae.**—Pure white, height 10 inches.

(1) **Ophir-d-Or.**—Canary yellow, very sweet scented. Height 13 inches. The very best single yellow tulip. Height 13 inches. The best single tulip for bedding.

(2) **Thomas Moore.**—Bright orange, very handsome and effective. Height 16 inches.

(1) **Jagt Van Delft.**—Pure white, the very best of the white varieties of tulips. Height 10 inches.

(1) **Fred Moore.**—Bright orange shaded with scarlet. Very handsome and effective. Height 17 inches.

(1) **Joost Von Delft.**—Rosy red, more or less flanked with white and suffused with delicate rose on the outside. Height 12 inches.

Rainbow Mixture.—Single early tulip. Most mixed tulips are of the light variety. We have made a special mixture of these, using the dark as well as the light, making the best mixtures of any offered on the market and at very low prices.

Early Double Tulips.—The double tulips are not generally as satisfactory as the white but are wanted in a great many cases and we have selected the very best of all of the double tulips, giving the most perfect flowers and of the best colors.

(2) **LaBlazon.**—Bluish pink. This tulip resembles the water lily, *Nymphia Odorata* and is really as good as the very best of the single besides being double. It lasts much longer than any of the other varieties after coming in bloom. Height 13 inches.

(2) **Purple Crowned.**—Dark purple. Height 14 inches.

(2) **Rex Ruborium.**—Bright scarlet, height 12 inches.

(2) **Rubra Maxima.**—Dazzling scarlet, splendid bedding variety. Height 12 inches.

(3) **Yellow Rose.**—Rich yellow, very fragrant. Height 12 inches.

Rainbow Mixture Double Tulip.—We have made the same mixture in the double tulip that we have in the single, giving all of the best double varieties and a much better collection than you receive when buying mixed tulips. The varieties of single and double tulips marked (1) generally begin to flower about the twentieth of April. The variety marked (2) about the first of May.

GURNEY'S NAMED DUTCH HYACINTHS.

Strictly Selected First Size Bulbs.

Directions for house culture for winter blooming in boxes, pans or flower pots. The soil should be good, rich sandy loam made richer with well decayed cow manure. New pots should be well soaked in water before using. In potting barely cover the bulb, and let the soil be three-quarters of an inch below the rim of the pot to allow for watering; press dirt well around bulb, give one good watering, then place out doors in shade and cover six inches of straw or any mulch that will prevent evaporation, remove to cellar or warm closet about Nov. 15th, and keep there until about two inches high, then place them where you can best enjoy a beautiful lot of flowers. From the time they are taken from outdoors they require lots of water.

Out-Door Culture for Spring Blooming. Stir the soil at least one foot deep, work in well decayed cow manure; plant bulbs about 7 inches apart each way and cover four inches deep with soil, then mulch with straw or other matter at least six inches deep; do not be afraid of getting on too much, leave this on until about April 15, then remove; if these directions are followed you will be amply repaid.

PRICE LIST OF HYACINTHS.

	Each.	Dozen.	100
Double Named Varieties, first size bulbs.....	8c	90c	\$6.00
Single Named Varieties, first size bulbs.....	8c	90c	6.00
Double Unnamed, colors separate, first size.....	7c	80c	5.00
Single Unnamed, colors separate, first size.....	7c	80c	5.00

Double Named Hyacinths.

Alida Catharine, dark rose; Bouquet Royal, dark, center rose; Boquet Tendre, dark red, early; Princesse Royale, bright red; Albion, dark purple blue; Blocksberg, light blue; General Antinck, violet blue; Lord Wellington, lilac striped; Pasquin, dark center, porcelain; Anna Marie, white, purple center; Latour d'Auvergne, early, white; LaVirginity, white, red center; Jaune Supreme, yellow, very large.

Single Named Hyacinths.

Amy, very dark red; Belle Quirine, bright red; Charles Dickens, dark rose; Gigantea, pink, extra good; Maria Theresia, rose striped; Roi Des Belges, bright scarlet; Baron Van Thuyll, bright blue; Bleu Mourant, dark blue; Grand Maitre porcelain; Regulus, porcelain; Willem I, very dark blue; Blanchard, pure white, very large; Elfride, rose white, large bells; Semiramis, creamy white; Voltaire, extra pale blush; Herman, orange yellow, large bells; Heroine, yellow, green tips, Ida, bright primrose; L'unique, dark violet, large bells.

Chinese Sacred Lily: Called by the Chinese Joe Flower—flower of the God's—water fairy flower. This lily which we import from Northern China is prized for the abundance of its flowers and its marveiously rapid growth. The flowers are white with yellow cup and very fragrant. A fair proportion of the bulbs produce double flowers, but they are supposed to be single. Each bulb produces several flower spikes bearing many flowers.

Directions. Plant only in the house in bowls or jardineers filled with pebbles and water. Will grow about twenty inches high and bloom forty days from planting. Keep in window in sunshine by day and center of room by night as frost spoils the flower spikes. For a succession of fine flowers plant every ten days; extra large bulbs, each 15 cents; per dozen, \$1.35.

Jonquils: Always prized for the graceful sweet scented flowers they produce in May. For indoor plant three to six bulbs in four or five inch pot. For outdoors treat the same as hyacinths, but cover only with three inches of dirt then mulch heavily. Single jonquils, rich, full, yellow, each 2 cents; per dozen 20 cents; 100 \$1.10. Double Jonquils, rich yellow, small, very fragrant; each, 3 cents; per dozen, 25 cents; 100, \$1.50.

Tube Rose: For indoor planting in fall and outdoors in spring. This valuable sweet scented flower is too well known to need description. For early flowering pot the bulbs as soon as received. For success keep dry or pot at once for root growth and keep in temperature of about fifty degrees. When wanted move to living room. For outdoor planting, plant in any ordinary garden soil early in the spring. They will commence flowering about July 1st, and continue for some time.

Dwarf Excelsior Pearl: Grows about 24 inches high and blooms early, bearing pure white, double very large sweet scented flowers. Each, 5 cents; per dozen, 50 cents.

Crocus: The earliest flower of spring and occupies a permanent place in every garden, planted as an edging in triple line, of one or more colors, the effect is striking. No spring display surpasses that of broad wavy lands of gold and yellow, bright purple or snow white crocus. Cloth of Silver, per dozen, 15 cents; 100 75 cents. Albino, striped white, dozen 15 cents; 100 75 cents. Purpurea Grandiflora, per dozen, 15 cents; 100 75 cents.

Narcissus or Daffodils: Produce large heads of sweet scented flowers and are especially adapted for winter flowering in pots. The culture is the same as for Hyacinths. For flower beds and borders, they produce a charming effect.

Gloriosus: Perinth white, cup glowing orange yellow. Very showy and early. Each 5 cents; per dozen, 50 cents; per 100 \$4.00.

Grand Soliei D-or Perianth yellow, cup orange yellow. Early and very showy. Each, 5 cents; per dozen, 50 cents; per 100 \$4.00.

Lotus-Alba: Double white. Very beautiful. Each, 5 cents; per dozen, 50 cents; per 100 \$4.00.

Foman: Double yellow. Prized for early flowers. Each, 5 cents; per dozen, 50 cents; per 100 \$4.00.

Orange Phoenix: White and yellow. Each, 5 cents; per dozen, 50 cents; per 100 \$4.00.

Von Sion: Very best old fashioned yellow. Very hardy for outdoor planting and bloom freely in the house. Each, 5 cents; per dozen, 50 cents; 100 \$4.00.

IRISES.

These may be called the "Orchids" of the flower garden, their blossoms competing in richness and variety of color with the choicest and most beautiful Orchids. They should be extensively planted and will bloom freely from early April until August. Our collection consists of over 100 of the choicest named varieties of the hardiest kinds, that will give the most flowers for the longest season. The Iris thrives in any ordinary garden soil, should be planted as soon as received, plant where they are to remain permanently, cover about 2-inches deep and mulch for first season as for Hyacinths. Order at least 100 of these: let us make up your list, giving you the best blooming over the longest period.

Iris Siberiaca—Hardest of all Iris, very strong, free grower, adapting themselves to any soil; producing large quantities of flowers under the most adverse conditions from June to August. Each, 15c.

German Iris. Each, 15c.

Honorabilis—Fine, yellow uppers, with lower petals of maroon. Each, 15c.

Mad Cherean—Very delicate and distinct; white edged blue. Each, 15c.

Queen of Gypsies—Lilac, blended with pink and white. Each 15c.

Parkmani—Upright; pure lemon falls; white veined purple. Each, 15c.

Fragrans—Very free flowering; white. Each 15c.

CUTTINGS

Cuttings.—The cuttings properly handled are the most economical and probably the best way to make a grove or wind break. Nearly all, if not all, cuttings should be planted in the fall where you want them permanently and if planted as per instructions which will be sent you with each order, you will have no trouble in securing practically a perfect stand and at the end of the first year they will often measure eight to ten feet high. Some will not make this growth, but a good many of them will. The Carolina and Norway Poplar being the fastest growers of anything we offer, and we would advise that you order liberally of these. The price per thousand is very low and they must be planted in the fall to make success. Other cuttings of other kinds of trees should be planted in the fall also.

	Per 100	Per 1000

No flies on stock if you spray with Conkey's Fly-Knocker. Doesn't injure animal, or taint milk. No shrink in milk flow or loss of butter-fat. Money back if not satisfied. Prices: Qt. 35c, 2 qts. 60c, 1 gallon \$1.00.

All Conkey Remedies Sold on Money Back Guarantee

Send a Postal for the Big Catalogue. It is Free and We Want You To Have It.

THE "CLIPPER GRAIN AND SEED CLEANERS"

The Best Made

Cleans and Grades Anything from Corn to Timothy Seed

Twelve screens. Screens for all kinds of grain and seed, including special corn grading perforated zinc screens.

New Flax screens, the kind that cleans quantity.

Capacity—Forty bushels market wheat per hour. Twelve bushels clover seed per hour. No other will handle near this quantity.

"Now, whatsoever a man soweth that shall he also reap."—Galations, chapter 6, verse 7. If you sow weed seed you are bound to reap weeds. Take them out with a Clipper.

Every "Clipper Mill" is guaranteed, both as to material and workmanship, and is also guaranteed to excel all other seed and grain cleaners on the market.

It is guaranteed by the manufacturers, and that guaranty is reinforced by our guaranty.

This Cleaner is unequalled for cleaning all classes of grain or seeds, such as wheat, corn, oats, barley, rye, beans, peas, buckwheat, kaffir corn, cane seed, millet, clover, alfalfa, timothy, mustard, flax, etc., and is suitable for farm or general use. Unlike other mills, the "Clipper" cleans all classes of seed and grain thoroughly in one operation, without any

waste, and leaves no tailings to be rehandled. Effectual separation of plantain from clover seed is accomplished, removing all imperfect and foreign seed, as well as cleaning the perfect seed. It will also separate cockle from wheat, pepper grass or tongue grass from timothy, kale and mustard from flax, and make any other separation that, from its nature, is not impossible.

It is the best hand mill made for grading seed corn. We furnish special screens for grading seed corn for Edge Drop Planter.

It is a well known fact that there is no work done on the farm that brings such large returns as thoroughly preparing the grain and seed by recleaning and grading for planting. This insures an even stand of strong, healthy plants, insuring a larger yield of a higher grade. This is the method that has been followed for years by the leading growers of fancy seed wheat and other seed stock. The Clipper cleaner is especially adapted to this kind of work on account of its ability to separate the small, also the light, dead seed or grain, from the perfect seed or grain.

Other manufacturers depend entirely upon screens for this work, and with unsatisfactory results. Clipper screens all straw and foreign matter from the grain before it enters the air shaft, and our "Vertical Blast" does the rest.

Our screens are so arranged as to be in plain view and of easy access to the operator while machines is in operation.

To anyone desirous of obtaining a first-class, inexpensive and durable mill, for general use, the above facts should dictate the purchase of the Clipper.

The No. 1 Clipper cleaner is the best all-around farm mill made. Give it a trial and you will use no other. Indorsed and used by State and Government Experimental Stations and 90 per cent of the seed houses of the world.

Announcement Extraordinary.

This mill sells everywhere without the corn-grading screens for \$25.00. With the corn-graders for \$30.00 We will deliver this mill

at your nearest railroad station, freight paid, and including the corn-grading screens, for \$25.00.

Clipper Cleaners Clean all Seed and Make Clean Fields.
