SEEDS
AND
IMPLEMENTS

62.57

136 MAIN STREET

PATERSON, N. J.

ESTABLISHED 1835

SPECIAL NOTICE

WE make a specialty of supplying the best strains of seeds that can be produced. We are always on the alert for a better strain, and if we find it we spare no expense in securing seed stock of it.

We handle absolutely nothing that we do not believe to be the best obtainable. We do not claim to compete in prices with irresponsible parties, whose sole effort is to secure the lowest priced seeds, regardless of quality; such seeds are not cheap, but dear at any price. The first cost of seeds is insignificant, compared with time and labor that must be expended upon a growing crop. Quality is our first consideration, and the prices we offer are as low as first-class seeds can be sold for. We buy direct from the grower and from the locality best adapted for raising all of the different varieties.

TERMS OF GUARANTEE:- The seeds offered in this catalogue have been carefully grown, selected, cleaned and tested for germination, and we believe them to be first class in every respect, but we cannot guarantee the crop as too many conditions enter into it, therefore we give no warranty, expressed or implied, as to description, purity, productiveness, or any other matter of any seeds, bulbs or plants we send out, and we will not be in any way responsible for the crop. If the purchaser does not accept the goods on these terms they are to be returned at once, and if the money has been paid for them it will be refunded.

MUZZY BROS.

MUZZY BROTHERS NOVELTIES AND SPECIALTIES FOR 1913

EXTRA EARLY MAYFLOWER CORN

Extra Early Mayflower Sweet Corn is the earliest of all the Extra Early Sweet Corn: has a large 8 or 10 rowed ear, well filled from tip to butt of the ear with large luscious kernels; in point of productiveness outyield two to one any of the Extra Early varieties. For the market gardeners this is one of the most valuable novelties placed on the market in many years. Price 10 cts. Package, 30 cts. Pt. 50 cts. Qt.

CUCUMBER---"PERFECTION RIDGE"

(OUR OWN RAISING.)

This, as will be seen by the accompanying illustration, is a greatly improved ridge variety. It has been obtained by crossing Japanese Pole with Telegraph, and fortunately it inherits most of the good qualities of both parents. It is vigorous in growth, free in setting, and has the flavor of the Telegraph Cucumber. The fruits are a pleasing green, moderately spined and handsome in shape, and vary from 12 to 15 inches in length. They are produced with the freedom characteristic of the Japanese Polo Cucumber, but have the length and symmetry of the Telegraph.

Price 15c Pkg.

NASTURTITIUM

Nasturtium: (Spencer, David Burpee) New. One of our this years novelties which we can strongly recommend. Its very peculiar wavy emerald green foliage is different from any known variety, (something like the flowers of Germania pansies). The plants grow very compact, and the fine velvety, purple scarlet flowers borne on long steels come out extremely workingly upon the magnificent foliage. For bordering purposes the most magnificent sort. From seed comes so to say, fully true. Very recommendable.

PRICE 10 cts. PACKAGE

PANSY

Pansy. English, Finest, First Quality, Extra, exceedingly fine mixture of colors, not only contain-

ing the so-called faced variety, but completed by self-colored ones, as black, white, yellow, etc., giving on a whole a remarkably fine display of colors.

PRICE 10 cts. PACKAGE

Nasturtium: We have imported direct from Holland some new varieties of Nasturtium, both tall and dwarf, in the separate colors, and ivy leaved varieties.

Ivy Leaved: Dark Leaved, Fiery scarlet, lacinated flowers. (Tall) Price 25 cts. an oz., 10 cts. a package.

Queen: A new mixed variety, containing several new hybrids of the Queen Type, of about 6 or 7 new colors. (Tall) Price 25 cts. oz., 10 cts. package.

Empress of India: Brilliant, Dark Scarlet, of Dwarfish growth, extra dark leaved, 5 cts. package.

MUZZY BROTHERS

ANNUAL SEED CATALOGUE

FOR 1913

PRICES SUBJECT TO CHANGE.

Muzzy Brothers give no warranty, express or implied, as to the description, quality, productiveness or any other matter of any seeds, bulbs or plants they send out, and they will not be in any way responsible for the crop. If the purchaser does not accept the goods on these terms, they are at once to be returned.

ARTICHOKE

German, Artichoke; French, Artichaut; Spanish, Albachofa.

	Per oz.	¼ lb.	Per lb.
French Globe	\$0 30	\$0 85	\$3 00
The Seeds should be sown early in the spring, in drills an inch and a half deep, and one foot apart. The next spring transplant to permanent beds, in rows or hills three feet apart and two feet between the plants. Plant in a deep rich, moist loam, and the plants should be protected in winter by a covering of leaves or coarse manure. A bed will continue bearing for several years.			
Jerusalem Artichoke, Tubers.....			qt. 25cts.

ASPARAGUS

German, Spargel; French, Asperge; Spanish, Esparrago.

	Per oz.	¼ lb.	Per lb.
Columbia, producing pure white shoots	\$ 10	\$0 25	\$0 75
Conover's Colossal...	10	20	50
Palmetto, a light green variety.	10	20	50
	Per 100	Per 1000	
Roots Colossal, 2 yrs.	\$0 90	\$6 00	
" Palmetto, 2 yrs.	90	6 00	
" Columbia, 2 yrs.	90	6 00	
" Argentieul, 2 yrs.	90	6 00	

Sow the seeds early in spring, in drills 15 inches apart, and about a dozen to the foot in the drill; keep the soil mellow and free from weeds during the summer, and in the succeeding spring transplant to permanent beds which should be done in the following manner as described by a cultivator of Oyster Bay Asparagus.

Plant on sandy soil. To grow Asparagus in perfection, the soil need not necessarily be richer than it must be to produce a good crop of Corn. Some experiments have shown that by heavily manuring the crop cannot be made permanently greater than by moderate dressings. It is not desirable to plant them out very early; more plants will fail to grow than when the planting is deferred until the soil is dry and warm.

In planting for private use; set out in rows two feet apart, and allow twelve inches in the row. Set the plants at least six inches below the surface. For market on a large scale, set four feet apart one way and two the other which will allow the use of a horse and cultivator to keep the weeds under.

ASPARAGUS.

BLACK VALENTINE.

BEANS

German, Gartenbohne; French, Fève de Marais; Panish, Hava.

English or Broad.

	Per pt.	Per qt.
Broad Windsor.....	\$0 15	\$0 30
Sword Long Pod.....	15	30

This class is very hardy and should be planted as soon as the soil is in good state in the spring. Plant four inches apart, and two inches deep in drills four feet apart. To insure well filled pods, pinch off the tops as the lower pods begin to set.

Dwarf Green Podded Snap Beans.

	Per qt.	½ pk.	pk.	bu.
Valentine Black, long round, green, solid pod, very early..	\$0 30	\$0 85	\$1 50	\$5 00
Valentine, Giant Stringless, about seven days later than extra Early Valentine. Slightly curved pod, brittle and stringless; a strong grower and good yielder	30	1 00	1 75	6 00
Valentine, Early. Productive, tender and of excellent flavor.	25	85	1 50	5 00
Livingstone's Round Pod. Six Weeks Bean.	30	85	1 50	5 00
Muzzy's Stringless Green Pod, the best stringless bean grown. Ten days to two weeks earlier than the Valentine: pods full and fleshy,	30	1 00	1 75	6 00

extremely crisp and absolutely stringless. Very productive	30	1 00	1 75	6 00
Early Mohawk, very productive and of good quality.	25	85	1 50	5 00
Long Yellow Six-Weeks, early, excellent variety for general crop.....	25	85	1 50	5 00
Fulmers Forcing, fine dwarf forcing variety.....	1-2 pt.			50
Extra Early Refugee, similar to late Refugee, pods two weeks earlier....	25	85	1 50	5 00
Refugee or Thousand to One, very early and prolific. The pods are round and full, stringless and of fine quality.	25	85	1 50	5 00
Burpee's Bush Lima, beans are large as Large Pole Lima, stout growth, branches vigorously, bearing 50 to 1200 large pods well filled with very large beans.....	35	1 25	2 00	7 00
Burpee's Improved Bush Lima, an improved strain of B. B. L., much larger pods and beans, enormously productive, extra early	50	1 65	2 75	10 00
Long White Kidney, excellent as a shell bean, green or ripe.....	25	85	1 50	5 50
Fordhook Bush Lima.....	50	1 65	2 75	10 00
White Marrowfat grown for sale in the dry state.	25	85	1 25	4 50
Golden Refugee, pods round and light color.....	30	1 00	1 75	6 00

Dwarf Wax Varieties.

Refugee Wax, Stringless, good for early or late, immense yielder.....	30	1 00	1 75	6 00
Golden Eyed Wax, very early, prolific, free from rust.	30	1 00	1 75	6 50
Round Pod Kidney Wax, same as Wardell's, only round pod.....	35	1 25	2 00	7 00
Wardell's Kidney Wax, extra early, long flat pods, very productive....	30	1 00	1 75	6 00
Black Wax or Butter Improved, very early and prolific. The pods are round, full, stringless; of very fine quality.....	30	1 00	1 75	6 00
Davis' White Wax, beans pure white pods, yellow, flat, tender, rich....	30	1 00	1 75	6 00
Golden Wax. This valuable variety is about ten days earlier than the Black Wax, pods large, long semi-round, brittle, stringless	30	1 00	1 75	6 50
Yosemite Mammoth Wax, the largest pods of all wax varieties	35	1 25	2 25	8 00

BEANS—Dwarf Wax Varieties, Continued.

	Per qt.	½ pk.	pk.	bu.
Hudson Wax, very large, tender, pods stringless, very productive....	\$0 30	\$1 25	\$2 00	\$7 00
White Wax, stringless, round pods, beans pure white, strong grower	50			

BEANS, Pole or Running Varieties.

Challenger Lima. Potato variety, five and six a pod	30	1 00	2 00	7 50
King of Garden Lima. Vigorous in growth and immensely productive, pods large, numerous and well filled and beans of an enormous size, Generally grown for main crop.....	30	1 00	2 00	7 00
New Early Jersey. Very early.....	30	1 00	2 00	7 50
Dutch White Lima. A greatly esteemed variety.	30	1 00	2 00	7 50
Kentucky Wonder, or Old Homestead Extra Early. Pods long tender and good flavor, very productive.....	30	1 10	1 90	6 50
New Lazy Wife. Long green pods, good quality, white beans.....	35	1 25	2 00	7 00
Dutch Case Knife. A very productive variety, one of the earliest....	30	1 00	1 75	6 00
Horticultural or Speckled Cranberry. A popular variety for private use, equally serviceable in the green state or when shelled.....	35	1 25	2 00	7 00
Scarlet Runner. Beautiful scarlet flowers; for ornamental and table use.	30			
Black Wax. Pods long thick and fleshy, pale yellow color, waxy appearance, very productive and tender, excellent as a snap or shell-ed green.	35	1 25	2 00	7 50
Early Golden Cluster. Bright yellow pods, strigless, in clusters	45	1 50	2 50	9 00
Yard Long, French. Pods sometimes grow from 2 to 3 ft. long, are very slender like a pipe stem, should be grown on pea brush. Pkg. 10 cents. Very scarce.				

Sow Bush sorts in drills about two feet apart, and drop the beans about three inches apart in the drill; cover two inches or less for a succession, sow at intervals of two weeks. Lima beans should not be planted until settled weather; make rich hills, four feet apart each way set a pole eight or ten feet high in each; press the beans into the soil eye down, six or eight to each pole, and when they are well up, thin out to four.

A quart of Limas is sufficient for 75 or 80 hills, and a quart of Bush Beans will sow a row 100 long.

BEETS

German, Runkelrub; French, Bour-rache; Spanish, Remolacha.

Detroit Dark Red. A splendid beet for market or home use, of a deep color, tender and of delicate flavor. Per oz. 15c; ¼ lb. 40c; lb. \$1.50.

Dark Red Egyptian Crosby's. The earliest beet in cultivation, color deep crimson; of excellent quality. Per oz. 15c, ¼ lb. 40c, lb. \$1.50.

DETROIT DARK RED BEET.

	Per oz.	¼ lb.	Per lb.
Extra Early Eclipse. Very early good size.....	15	40	1 50
Early Flat Bassano. Chiefly valuable for its earliness.	15	40	1 50
Early Blood Turnip. Standard early sort, an excellent.	15	40	1 50
Edmands. Market garden variety, uniform shape, dark	15	40	1 50
Dewing's Blood Turnip. Of fine form and flavor.	15	40	1 50
Long Smooth Blood Red. An excellent late variety.	10	30	80
Swiss Chard. Used for its leaves, which are cooked as spinach.....	10	30	1 00

BEETS—Continued.

MANGEL-WURZEL AND SUGAR.

Varieties used for feeding stock. Sow 6 lbs. per acre.

	Per oz.	¼ lb.	lb.
Mammoth Red Mangel-Wurzel. Producing roots of mammoth size, very regular, and with a small top. 10 lbs. and over 25c lb.	\$0 10	\$0 15	\$0 50
Yellow Globe Mangel-Wurzel. Roots very large and globular. 10 lbs. 25c lb.	10	15	50
Long Yellow Mangel-Wurzel. Good for general crop. 10 lbs. 25c lb.	10	15	50
Golden Tankard Mangel-Wurzel. A new and very valuable variety of fine form and sweet flavor, bright yellow in color, when cut it shows interior ring, similar to most varieties of garden beet. 10 lbs. 30c lb.	10	15	50
White Silesian Sugar Beet. Extensively grown for feeding stock and manufacture of sugar	10	20	60
Vilmorin's Improved Sugar Beet. An improved variety	10	20	60
Lane's Improved Sugar Beet. Improved variety of the French Sugar Beet, obtained by careful selection in this country. 10 lb. 25c lb.	10	20	60

A rich, deep open soil is the best suited to the culture of Beets. Fresh manure is undesirable but land that has been well manured the previous year is highly suitable. For an early supply sow in the spring as soon as the ground becomes fit to work, in drills about one foot apart and two inches deep. For main crop sow the first week in May, and for winter use sow in June. When the plants have obtained three or four leaves, thin out, so that they may stand eight or nine inches apart. Keep free from weeds by hand weeding and hoeing. Those intended for winter use may be taken up in October, and stored in dry sand in the cellar or outhouse. Before storing, leaves and fibers must be cut off, but care must be taken not to bruise the main root.

BORAGE

German, Borritsch; French, Bourrache; Spanish, Berraja.

	Per oz.	¼ lb.	lb.
Borage , used as a pot herb; also as a salad, or can be boiled, and also for garnishing, but chiefly required for claret cups and other cooling drinks. Bees are very partial to the flower.	\$0 10	\$0 30	\$0 90

BROCCOLI

German, Spragel Kohl; French, Chou Brocoli; Spanish, Brocoli.

	Per oz.	½ lb.	lb.
Early White , heads medium size, compact, creamy white color, most certain to head	\$0 25	\$0 75	\$2 50
Purple Cape , differing from the preceding color, greenish purple.	35	1 15	4 00
White Cape	40	1 25	4 00
Mammoth White	35	1 00	3 50

A favorite European vegetable, nearly allied to the Cauliflower, but more hardy and surer to head; the seeds should be sown in this district in the early part of May, and transplanted in June; farther south the sowing should be delayed until June or July, and the transplanting accordingly from August to October. In parts of the country where the thermometer does not fall below 20 or 25 degrees, broccoli may be had in perfection from November until March. It succeeds best in a moist and rather cool atmosphere.

BRUSSELS SPROUTS

German, Sprossen-Kohl; French, Chou de Bruxells; Spanish, Breza de Brusels.

Improved Seed, (French) half dwarf, oz. 20c, ¼ lb. 60c, lb. \$2.00.

Dalkeith Dwarf Improved, a variety producing compact sprouts of excellent quality, oz. 20c, ¼ lb. 60c, lb. \$2.00.

A tender, delicious vegetable. The plant grows two or three feet high, and produces from the sides of the stalks numerous little sprouts, one or two inches in diameter, resembling cabbage. The leaves which look like a Savoy should be broken down in the fall, to give the little cabbages room to grow. They are very tender and sweet after early frosts. Sow early in hot-beds, or in seed-beds in May transplant and cultivate the cabbage.

CABBAGE

German, Kopfkohl; French, Chou; Spanish, Berza de pepollo

DANISH BALL HEAD CABBAGE

	Per oz.	$\frac{1}{4}$ lb.	lb.
All Seasons , fine variety, for second early or late growing good size	\$0 20	\$0 60	\$2 00
Early Jersey Wakefield . The leading variety for market, very early of medium size, good quality, sure to head	30	85	3 00
Early Flat Dutch . This is one of the best early cabbages in cultivation	20	60	2 00
Early Summer . A valuable early sort resembling the Early Flat Dutch	20	60	2 00
Early Winnigstadt . Heads large, one of the best for general use	20	60	2 00
Fottler's Improved Brunswick . This is a very fine second early variety	25	75	2 25
Henderson's Succession . A second early or late variety, a sure header: seeds sown in March produce large heads in June	25	85	2 50
MUZZY EXTRA AMAGAR DANISH BALL-HEAD . Large, round, solid sweet and crisp, sure header	30	85	3 00
Large Late Drumhead . An excellent fall and winter variety, grows to a large size	25	75	2 50
Large Late Flat Dutch . The most popular variety for late cultivation	20	60	2 00
Red Stone Head . Used almost exclusively for picking	40	1 25	4 00
Drumhead Savoy (American) . The largest heading sort, of excellent flavor	25	75	2 50
MUZZY IMPROVED AMAGAR DANISH ROUND HEAD . Short stemmed, two weeks earlier than Ball Head	35	1 00	3 00

For very early use plant in the autumn from 10th to 25th, September, in a seed bed, and protect in cold frames during the winter, being careful to set them down to the first leaf. Transplant in the following spring, as the soil will admit. For autumn and winter use, plant in seed-bed in May and early part of June, and when six inches high transplant into rich soil, two feet apart each way for the early varieties, and three by two and a half feet for the large winter varieties. To secure the best results, the soil should not be too dry, but should be thoroughly enriched, and the crop should be hoed at least once in ten days. Sow in hot bed early in spring, seed of the early kind for a second crop: also the late varieties for winter use.

CARROT—Continued.

The Carrot, like other root crops, delights in a sandy loam, deeply tilled. It should never be sown on newly manured ground as forked roots are sure to be the result. It is best to sow on ground that has been well manured the previous year for some other crop such as Celery, Potatoes, Onions or Peas, but avoid such crop as Cabbage and Turnips, or any of the tap rooted sections. For early or main crops sow the latter part of April; for later crops, they may be shown any time until the beginning of June. Sow in rows about 15 inches apart and half an inch deep, thinning out to three or four inches between the plants.

CELERIAC**TURNIP ROOTED CELERY**

German, Knob-Celeri;
French, Celeri Rave.

Erfurt. For soups, oz. 15c
¼ lb. 50c, lb. \$1.75.

Giant Prague. For soups etc. When sliced and cooked makes good winter salad. Oz. 15c, ¼ lb. 50c, lb. \$1.75.

Apple. Small foliage, oz. 15c, ¼ lb. 50c, lb. \$1.75.

Large Early Dwarf Erfurt. The earliest and best of all varieties.....	25	2	25

DENMARK SPECIAL LARGE.

Lenormand's Short-Stemmed. A late variety, producing very large well-formed heads of superior quality. Pkt. 10c, oz. 50; ¼ lb. \$1.75, lb. \$6.00.

Algiers. Popular late variety, sure to head, excellent for market. Pkt. 10c, oz. 60c, ¼ lb. \$2.00, lb. \$7.00.

Early London. Pkt. 5c, oz. 30c, ¼ lb. 85c, lb. \$3.00.

DENMARK. Special Large Late. Very fine variety, large white compact heads, necessary that distance between plants be greater than other varieties. Pkt. 20c, oz. \$1.75.

Cauliflower delights in rich, moist soil and in dry seasons should be abundantly watered. The seeds may be sown in September and wintered over in the same manner as described for early cabbage. Where this is not practicable, it may be had nearly as well by sowing the seed in the hot-bed in January or February and transplanting the plants at two or three inches apart in boxes, or in the soil of another hot-bed, until such time as they are safe to be planted in

CAULIFLOWER—Continued.

the open ground, which in this latitude, is usually from the 15th of March to the 10th of April. If properly hardened off, they are seldom injured by being planted out too early.

CELERY

German, Celeri; French, Celerei; Spanish, Apih.

Boston Market. An excellent dwarf, growing white variety	20	60	2 00
Covent Garden Rose. Pink variety, good flavor.	25	75	2 50
Celery Seed for Flavoring.....	05	10	35

The seeds may be sown in the open ground in April, as soon as the ground can be nicely worked. Sow about half an inch deep, and be careful to firmly press the soil over the seed; this should be done by treading over the rows with the feet after sowing; this prevents the air drying up the seed, which thereby loses its vitality and fails to germinate. Many valuable crops are annually lost by inattention to this important particular. After the seed is up, keep carefully clear of weeds until the time of planting June and July; the crops may be shorn off once or twice before planting; this makes them "stocky" and they suffer less in being transplanted. After the ground has been well prepared, plant in rows from three to four feet apart, according to the variety, setting the plants about six inches apart and pressing the soil firmly about the roots.

CHERVIL

German, Bisenlauch; French, Cerfeuil; Spanish Cerafolio.

	Per oz.	¼ lb.	lb.
Curled	\$0 10	\$0 30	\$1 00
Common or Tuber-			
ous Rooted.	10	30	85

The young leaves are used in soups and salads. Sow thinly in May, in drills half an inch deep, one foot apart,

CELERY.

CHICORY

Water Cress 30 90 3 25

Are excellent for small salads; the leaves, while young have a warm, pungent taste. They can be used alone or mixed with Lettuce, Mustard, or other salad plants. Sow thickly at frequent intervals for succession, and treat in the same manner as Mustard.

CORN SALAD OR FETTICUS

German, Ackersalat; French, Mache; Spanish, Macha Valeneanilla.

CORN SALAD

	Per oz.	¼ lb.	1 lb.
Large Seeded	10	\$0 20	\$0 60
Lettuce Leaved	10	30	85
Small Seeded	10	25	75

Corn Salad, Feticus or Lambs Lettuce is used to a considerable extent as a salad. It is sown on the first opening of spring in rows one foot apart and is fit for use in six to eight weeks from the time of sowing. If wanted to come out early in spring, it is sown in September, covered up with straw or hay as soon as cold weather sets in and is wintered over the same way as Spinach.

CORN---Sweet

German, Zucker Welshkorn; French, Maise de Sucre; Spanish, Maiz de Azucar.

COUNTRY GENTLEMAN SWEET CORN.

CORN—Continued.

Black Mexican. One of the sweetest varieties.			25	75	1 25	4 50

GENERAL CROP AND LATE.

Stowell's Evergreen. A late variety, of excellent quality, remaining longer in the green state than any other; general crop	05	4 00	25	75	1 25	4 00
Hickox Improved. A new variety of superior excellence is 12 rowed, straight and handsome; a superior market kind; general crop	05	4 00	25	75	1 25	4 00
Mammoth Sugar. A late variety of large size, very sweet and immensely productive. A leading variety.	05	4 00	25	75	1 25	4 00
Country Gentleman. The sweetest and most tender of all sweet corn, late crop.	05	4 00	25	75	1 25	4 50
Moonachi or Sugar. Tender, sweet and productive; general crop	05	4 00	25	85	1 50	4 50
Sweet Fodder. For ensilage.			20	50	80	2 50

Sweet corn may be either sown in rows, four and a half feet apart, and the seeds planted at about eight inches in rows, or planted in the hills, at distances of three or four feet each way according to the variety grown, or the richness of the soil in which it is planted. The taller the variety or the richer the soil, the greater should be the distances apart. The first plantings in this vicinity are made about the middle of May, and successive planting every two or three weeks until the first week in July. In more southern latitudes planting is begun a month earlier and continues a month later.

FIELD CORN.

	Qt. shelled	Per 100 ear	Bush- shelled
Mastodon Dent. Very early strong growing.	\$0 20	\$3 00	\$2 50

CUCUMBERS

German, Gurken; French, Concombre; Spanish, Pepino.

Perfection Ridge, New, Extra Long. See Novelties. 15c Pkg.

	Per oz.	¼ lb.	lb.
Cumberland. The best pickling sort yet introduced, very handsome and productive, flesh fine but very crisp and tender.	\$0 15	\$0 30	\$1 00
Fordhook Pickling. Prolific, medium size, skin thick.	10	25	80
Davis Perfect. For forcing or outdoors, long and straight, valuable for slicing.	15	30	1 00
Cool and Crisp. Very prolific; good for pickling and productive.	15	30	1 00
Thorburn's Everbearing. Small size; very early.	10	25	80
Japanese Climbing. Can be trained on trellis, or grown on the ground. Skin smooth, dark green; flesh pure white, crisp and mild flavor.	15	30	1 00
Nichols Medium Green. A valuable and handsome variety, in shape between White Spine and Long Green, an excellent sort for pickles and useful for forcing. Very prolific, fruit straight and smooth, color dark green fresh, tender and crisp.	15	30	1 00
Improved Early White Spine. The best table variety; grows uniformly straight and smooth; dark green; and tender and excellent flavored.	15	30	1 00
Peerless White Spine. A new variety of the preceding; average length 10 inches; full at both ends; deep green, holding color until mature.	15	30	1 00
Tailby's Hybrid. A cross between the Early White Spine and the English Frame variety, combining the hardiness of the first with the beauty and size of the latter.	15	30	1 00
Early Green Cluster. A short, prickly, slender variety, bearing in clusters near the root. It is a great bearer.	10	25	80
Early Short Green. The standard for pickling, medium size, straight and handsome. It makes a beautiful pickle that keeps well.	10	25	80
Long Green. A very excellent variety; a good bearer; about a foot in length rather pointed at both ends; dark green, firm and crisp.	15	30	1 00
Green Prolific Pickling. Very prolific; and said by those who have tested it equally desirable as a market Cucumber.	15	30	1 00
West Indian Gherkin or Burr. A very small oval shaped prickly variety. It is grown exclusively for pickling, and should always be pickled when young and tender.	20	50	1 50

DAVIS PERFECT CUCUMBER.

in November, December or January, according to the time they are wanted for market.

Cucumbers succeed best in warm, most, rich loamy ground. They should not be planted in the open air until there is a prospect of settled warm weather. Plant in hills about four feet apart each way. The hills should be previously prepared by mixing thoroughly with the soil in each a shovelful of well rotted manure. When all danger from insects is past, thin out the plants, leaving three or four of the strongest to each hill. **English Frame Cucumber**—Per pkt. 25c. **Improved Sion House, Telegraph, Giant of Arnstadt, Duke of Edinburgh, Gen. Grant, Long Gun, Crater's Tender and True, Swan Neck, Blue Gown.**

These varieties are for growing in hot-beds, or in hot-houses, particularly constructed for forcing, so that a supply can be furnished during the winter months, at which time the price are very remunerative. Sow seeds

DANDELION

German, Pardelblume; French, Pisse en-lit; Spanish, Armagon.

	Per oz.	$\frac{1}{4}$ lb.	lb.
Thick Leaved	\$0 35	\$1 00	3 50
Best French	10	30	1 00
Montmagny	35	1 00	3 50

The Dandelion is much used for spring salads and resembles Endive. Sow the seed in May or June in drills half an inch deep and 12 inches apart. The plants will be ready for use the following spring.

DANDELION

ENDIVE OR CHICKORY

German, Endevien; French, Chicoree; Spanish, Endivia.

	Per oz.	$\frac{1}{4}$ lb.	lb.
Green Curled Winter. Very hardy; leaves dark green, tender and crisp.....	\$0 15	\$0 30	\$1 00
Broad-Leaved Batavian. (Escarolle), chiefly used in soups and stews; requires to be tied up for blanching.....	15	30	1 00
Early White Curled. (Self-blanching), the best variety; grows to large size: very large and tender.....	25	65	2 00

ENDIVE

Moss Curled Early Summer. Used for

salads as winter varieties.....

Witloff or French Endive.

New.....

Endive is one of the best salads for fall and winter use. Sow for an early supply about the middle of April. As it is used mostly in the fall months, the main sowings are made in June and July, from which plantations are formed at one foot apart each way in August and September. It requires no special soil or manure, and after planting, is kept clear of weeds until the plant has attained its full size, when the process of blanching begins. This is affected by covering up the plants as they grow, with slats or boards, which serves the purpose of excluding the air and light.

EGG PLANT

German, Eier Pflanz; French, Aubergine; Spanish Bereinfena.

	Per oz.	$\frac{1}{4}$ oz.	lb.
Pearl White. Very fine grain and well flavored.....	\$0 30	\$0 85	\$3 00
New York Improved. Superior market variety of large size and fine variety.....	40	1 25	4 00
Black Beauty Tendage. Earlier than New York Improved and as large, purplish black.....	40	1 25	4 50
Early Dwarf Purple. Medium size.....	35	1 00	3 50
Black Pekin. A fine variety, bearing large round, deep purple fruits, fine grand and of superior quality.....	35	1 00	3 50

The Egg Plant is a tender vegetable, and must not be planted out until the weather is warm and settled. Sow early in spring in hotbeds, or if they are not convenient, sufficient plants may be raised for a small garden by sewing a few seeds in common flower pots or in boxes in the house. Plant out early in June from two to three feet apart.

NEW YORK EGG PLANT

KALE

German, Blatter-Kohl; French, Chou Vert; Spanish, Breton.

Per oz. $\frac{1}{4}$ lb. lb.

Siberian German Green or "Sprouts." This Variety is extensively used for early greens for which it is sown in the fall in rows one foot apart and treated in the same manner as Spinach; it is ready for use in early spring. Sowing can also be made in spring. .10 .20 .60

Dwarf Green Curled Scotch. Beautifully fringed dwarf growing kind, with bright green leaves. .10 .30 .90

Tall Green Curled Scotch. Tall growing, very hardy variety, leaves a bright green, beautifully curled. .10 .30 .90

Dwarf Brown German Curled .10 .30 .90

Kale may be grown in almost any soil, but the richer it is the more abundant the product. Sow early in the spring, in prepared beds, covering the seeds thinly and evenly; transplant in June and treat in the same manner as for cabbage. Of all the cabbage tribe this is the most tender and delicate and would be much more extensively grown than it is, if its excellent qualities were generally known. The varieties are all extremely hardy, and are best when touched by frost.

KALE

KOHL-RABI

German, Kohl-Rabi; French, Chou Rave; Spanish, Colinabo.

Per oz. $\frac{1}{4}$ lb. lb.

Early White Vienna. Flesh white and tender; best market sort; good for table use. \$ 0 20 \$ 0 60 \$ 1 75

Early Purple Vienna. Differing from the above in color, which is of a bluish purple. 20 60 2 00

Large White or Green. Large ball, not so fine, but more productive. 10 35 1 00

KOHL-RABI

Kohl-Rabi or Turnip stemmed cabbage, is a vegetable that is not so much cultivated as it deserves to be. The stem above the ground swells into a bulb, somewhat resembling a turnip; this again is covered with leaves. The edible part is the bulb, which is dressed and served like turnip, and is very delicate and tender when young. It is very hardy, withstands severe drought, and is a good keeper. Cultivate the same as cabbage, but in hoeing be careful not to throw dirt into the heart of the plant, or the bulb cannot form.

LEEK

German, Lauch; French, Poireau;
Spanish, Puerro.

Per oz. $\frac{1}{4}$ lb. lb.

Large American Flag.

The kind mostly
grown for market.... \$0 20 \$0 60 \$2 00

Large Careten. A large
growing French var-
iety of excellent qual-
ity..... 20 65 2 25

Large Rouen. Very
large and fine..... 20 65 2 25

The Leek is very hardy and easily culti-
vated; it succeeds best in a light, but well
enriched soil. Sow as early in the spring as
practicable, in drills one inch deep and one
foot apart. When six or eight inches high
they may be transplanted in rows ten inches
apart each way, as deep as possible; the
neck, being covered, may be blanched. If
fine leaks are desired, the ground can hard-
ly be made too rich.

SEA KALE

German, Seekohl; French, Crambe Maritime; Spanish, Berton de Mar.

Sea-Kale Seeds. Very much like Celery..... Per oz. 20c. $\frac{1}{4}$ lb. 60c. lb. \$2 00

Cultivate for its blanched shoots, which are cooked in the same way as Asparagus. A supply
may be had all winter by planting the roots closely in warm cellar before frost. Sow one inch
deep in drills two feet apart; thin out to six inches, and the next spring plant in hills three feet
apart, three plants in each.

CARROT

German, Moehren; French, Carrotte; Spanish.

Per oz. $\frac{1}{4}$ lb. lb.

Early French Forcing. The earliest variety, valuable for forcing; root small and of fine flavor.....	\$0 30	\$0 35	\$0 85

Selected Buttercup. Yellow, solid heads for outdoor forcing	20	50	1 50
Big Boston. Similar to Boston Market, double this size.	20	50	1 50
Early Curled Simpson. Very early and an excellent sort for forcing; is largely grown by the market gardeners.....	15	35	1 25
American Gathering. Twisted and curled leaves, fine for early or late....	10	30	90
Deacon. This magnificent Lettuce stands hot weather beter than any other Butter variety. Large, firm heads of creamy white and rich flavor.....	15	35	1 00
Denver Market. For forcing or open ground; large solid heads.....	15	35	1 00
Tennis Ball. (Black seeded), well formed heads hardy and crisp, one of the earliest of heading varieties.....	15	35	1 25
Tennis Ball, or Boston. (White seeded), grows very compact, white and crisp, one of the best for forcing or the open ground	15	35	1 25
Salamander Head. Fine compact head, resists heat.	15	35	1 25
Black-Seeded Butter. Fine market strain.....	15	35	1 25
Large White Cabbage. Excellent for summer; heads of good size.....	15	35	1 25
Black Seeded Simpson. Stands the summer well.....	15	35	1 25
Gray Seeded Butter. One of the best large heads.....	15	35	1 25
Shotwell's Brown Head. Large and handsome; heads hardy; standing summer heat without injury.....	20	50	1 50
Boston Market. Large solid heads, very fine for forcing, and of fine flavor.	15	35	1 25

ROMAINE OR COS VARIETIES.

Trianon Cos. The best of the Cos variety.....	20	50	1 50
White Paris Cos (Romaine). Sow early; tie up to blanch	15	35	1 25
Golden Yellow Cos. Long standing, large solid heads, crisp and tender.....	20	60	2 00

Lettuce is the most popular of all salads. Boiled, is quite equal to Spinach; and it is also sometimes used in soups. It is easy of cultivation, but likes a good rich soil. For early use, sow Simpson and Tennis Ball under glass in February and March and transplant as soon as the ground can be worked. Later sowings may be made in the open ground for successions as long as the weather permits; thin out well or the plants will be weak, and set in rows two feet apart and eight inches between the plants. The best early plants are obtained by sowing in the open ground in September, and transplanting to cold frames the latter part of October, being wintered over in the same manner as early Cabbage. Lettuce requires good ground and abundant moisture,

MELON, MUSK

German, Melone; French, Meion; Spanish, Melon Muscatel.

	Per oz.	$\frac{1}{4}$ lb.	lb.
POLLOCK. One of the perfect shape, netted Rockyford strain	\$0 15	\$0 35	\$1 25

Montréal Market. Green flesh, very thick; fine flavor	15	35	1 25
Long Yellow Cantalope. Yellow flesh, suitable for the market.....	15	35	1 25
Baltimore Market. Oblong; orange flesh.....	15	35	1 00
Jennie Lind. A very early kind, of small size, but delicious flavor.....	15	35	1 00
White Japan. Size medium and nearly round; skin cream white and very thin; flesh pale green, early and sweet.....	20	60	2 00
Rocky Ford. Very sweet; spicy flavored, small and oblong, most popular sort.	10	30	1 00

HACKENSACK MUSK MELON.

Melons thrive best in a moderately enriched live soil: the hills should be six feet apart each way. Previous to planting incorporate well with the soil in each hill a couple of shovelfuls of thoroughly rotted manure: plant twelve or fifteen seeds in each hill early in May, and when well up, thin out three or four of the most promising. Pinch off the leading shoots as the growth becomes too luxuriant, and if the fruit sets too numerously thin out when young, which will increase the size of those remaining, and cause them to ripen quicker.

MELON, WATER

German, Wassermelone; French, Melon d' Eau; Spanish, Zaudia.

	Per oz.	$\frac{1}{4}$ lb.	lb.
Tom Watson. Long and 8 to 10 in. diameter. Thin rind, crisp flesh, fine flavor.	\$0 10	\$0 25	\$0 75
Kolb's Gem. Nearly round, dark green.....	10	25	75
Seminole. A new early variety. Long strippedsort.....	10	25	75
Pride of Georgia. Dark green, oval in shape; crisp and sweet; very large	10	25	75
Mountain Sweet. One of the very best for culture; color dark green; and rind thin; flesh scarlet; solid, very sweet and delicious	10	25	75
Black Spanish. Shape round, rather small; skin dark green, flesh red, sweet, rich	10	25	75
Phinney's Early. Fresh deep red, of a very superior quality; a valuable early market variety	10	25	75
Cuban Queen. Solid and heavy.....	10	25	75
Ice Cream. (White seeded), fruit of medium size, nearly round; skin pale green; rind thin; flesh scarlet, solid crisp, excellent.	10	25	75

MELON, WATER—Continued.

	Per oz.	¼ lb.	lb.
Rattlesnake. Very large, striped, red flesh variety.	\$0 10	0 25	\$0 75
Mammoth Iron Clad. Long and large; thin skin deep red flesh.	10	25	75

IRON CLAD.

The "Boss" Oblong; dark green. 10 25 75

Citron. (Red seeded), round handsome fruit of small size and used in the making of sweetmeats and preserves. 10 25 75

Citron. (Green Seeded), used for preserves. 10 25 75

Plant in hills directed for Muskmelons, giving them more room, as their vines extend much farther. If they are wanted of a large size, three or four melons to each plant will be sufficient, and when only one is allowed to grow from each plant they will grow to an immense size.

MUSHROOMS

German, Chimpignoubrut; French, Champignon; Spanish, Hongo.

Imported English Spawn.	per brick 15c	10 bricks \$1 00	100 bricks \$9 00
Imported French Spawn.	30c per lb.	10 lbs.	\$2 50
American Spawn Bricks.	per brick 19c	10 bricks \$1 60	100 bricks \$12 00

Mushrooms should be grown either in a building especially erected for the purpose or some shed, stable or cellar, where the temperature of from 40 to 60 degrees can be kept up in winter. To every barrow load of fresh horse droppings add about the same weight of loam or soil of any kind that has not been manured. Turn the heap every day, so that it is not allowed to heat violently, until you have quantity enough to form a bed of dimensions required. Be careful that your heap is under cover, so that it cannot possibly get wet. The most convenient size is from three to four feet long and eight inches deep.

Prepare the mixture of loam and manure, making the bed in layers, and pounding down each with the back of a spade. Leave this to heat through for a few days, and as soon as the heat subsides to 90 degrees, make holes in the bed about a foot apart each way into which put pieces of spawn two or three inches in diameter; fill up the holes with the compact and at the expiration of a week or ten days the spawn will have thoroughly diffused itself through the bed. Now spread a layer of fresh soil over the heap to the depth of two inches, firm it down moderately and cover with three or four inches of hay or straw. Examine the bed often to see that it does not get dry. When water is given it should be at a temperature of about 100 degrees.

MUSHROOMS.

MUSTARD

German, Senf; French, Moutarde; Spanish, Mostaga.

	Per oz.	¼ lb.	lb.
White London. Best of salads.	\$0 05	\$0 10	\$0 25
Black. Used for cooking and salad.	05	10	25

Mustard in the green state is a refreshing salad, mixed with Cress, Lettuce, or other salad plants. It is necessary to make frequent sowing of it, as it should be cut and used in a very young state, even before the first rough leaf appears. The seed should be sown thickly in light soil, the surface of which should be made very smooth. The seed should be pressed into the soil with the back of a clean spade.

NASTURTIIUM

German, Nastrutian; French, Capusine; Spanish, Maranuela.

	Per oz.	¼ lb.	lb.
Tall Scarlet.	\$0 15	\$0 40	\$1 25
Tall Yellow.	15	40	1 25
Tall Nasturtium, Mixed.	10	20	60
Dwarf Nasturtium, Mixed.	10	25	75

NASTURTIUM—Continued.

Cultivate both for use and ornament; the green seed pods preserved in vinegar make an excellent pickle. The young leaves are also useful in salads. Its scarlet and orange-colored flowers which appear freely all summer, add a charm to the garden.

ONION

German, Zweibel; French, Oignon; Spanish, Cebolia.

ONION.

	Per oz.	¼ lb.	lb.
Early Red Flat. About ten days earlier than the Large Red, and note quite so large	\$0 20	\$0 55	\$1 75
Large Red Wethersfield. The staple variety of the Eastern onion growers; of large size, deep in color, a good keeper.	15	40	1 25

White Portugal or Silver Skin. A handsome onion of mild flavor; extensively grown for picking.....	20	60	2 00
Southport Red Globe. Similar to the large Red in flavor and color, but quite distinct in form, being nearly globular.....	20	60	1 75
Southport White Globe. Form nearly ovoid symmetrical, keeps well, is an excellent variety	30	80	2 50
Southport Yellow Globe. Same as above, except in color.....	20	60	1 75
White Flat Bermuda. Very early.....	75		
Red Flat Bermuda. Very early.....	35	1 00	3 50

ITALIAN VARIETIES.

Adriatic Barletta. White, new variety, fully two weeks earlier than the Queen.	20	60	2 00
Early Queen. Excellent variety, very early, a good keeper and mild flavor white.	20	60	2 00
Giant Rocca. A splendid large variety from Naples, of globular shape, bright brown skin and delicate flavor.....	20	60	2 00

The onion thrives best in a rather strong, deep, rich loamy soil, and unlike most vegetables succeeds well when cultivated on the same ground for successive years. The ground should be deeply trenched and manured the previous autumn, and laid up in ridges during the winter to soften. As early in the spring as the ground is in working order, commence operations by leveling the ground with a rake, and tread firmly; sow thinly in drills about a quarter of an inch deep and one foot apart; cover with fine soil and press down with the back of a spade or a light roller. When the young plants are strong enough, thin gradually so that they stand three or four inches apart.

ONION SETS

OKRA OR GUMBO

German, Essbarer Safran; French, Gomo; Spanish, Quibombo.

LONG GREEN OKRA.

	Per oz.	¼ lb.	lb.
Improved Dwarf White. Long slender pods, very productive, only 14 in. high.....	\$0 10	\$0 20	\$0 50
Dwarf Green. Early and productive.	10	20	50
Long Green. Fine long pods, very good	10	20	50

The pods in a young state are used in soups, sauces and stews, and are very wholesome and nutritious. It is the easiest culture and grows freely, bearing abundantly when grown in ordinary garden soil. It is sown at the usual time of all tender vegetables in drills two inches deep, setting the plants from two to three feet apart.

PARSNIPS

German, Pastinake; French, Panals; Spanish, Chirivia.

	Per oz.	¼ lb.	lb.
Guernsey or Cup. Leading variety.	\$0 10	\$0 20	\$0 70
Long Smooth or Hollow Crown. Long roots	10	20	70
Early Round	15	35	90

They succeed best in a deep rich soil that has been well manured the previous season, as manure freshly applied tends to the production of forked and ill-shaped roots. Sow the seed early in spring in drills eighteen inches apart in the garden, and three feet apart in the field, thin the plants to six inches in the drill.

PARSLEY

German, Petersilie; French, Persil; Spanish, Perjil.

	Per oz.	¼ oz.	lb.
Extra Double Curled. A fine dwarf variety excellent for garnishing.....	\$0 20	\$0 50	\$1 50
Fern Leaves. The most beautiful form of parsley, resembling crested fern or moss in its growth.....	20	60	2 00
Plain Leaves. Hardier than the curled variety.....	20	60	2 00
Moss Curled.	15	35	1 00
Hamburg, or Rooted. Edible roots.....	20	50	1 50

Should be sown very early in the spring in beds or in lines, and the seeds which are somewhat slow to vegetate should be previously soaked 24 hours in warm water. The soil should be kept free from weeds, which should be extracted by the hand, so as to avoid disturbance of the seed when about to germinate. . As soon as the plants are large enough they should be thinned out so as to stand five or six inches apart.

PEAS

German, Erbsen; French, Pois; Spanish, Guisantes.

EXTRA EARLY VARIETIES.

	Per qt.	½ pk.	pk.
Primo. Very early, cross between Gradus and Early William. Pods same as Gradus but with this advantage, much more prolific and harder. 15c pkt.			
Gradus or Prosperity. Earliest wrinkled Pea grown. Can be sown early as the round sorts. Large Peas and pods, splendid flavor. Requires no sticks reaching only 36 inches in ordinary good soil. Height, 3 feet....	\$0 50	\$1 75	\$3 00

Champion of England. A popular wrinkled variety of delicious flavor; profuse bearer. Peas are very large, tender, height 5 feet.....	35	1 25	2 25
Telephone. This is the best pea for general crop, both for home and market use. Immediately productive and of finest quality. Vines very strong, averaging 18 to 20 large pods per stalk, 4 feet.	45	1 50	2 50
Stratagem. Mammoth pods, well filled, height 1½ feet	45	1 50	2 50
Black-Eyed Marrowfat. Grown for market, hardy, productive, 3 ft. bu. \$5.00	25	85	1 50
White Marrowfat. An old favorite sort for market, 4 ft. Per bu. \$5.00...	25	85	1 50
Mammoth Gray Sugar. Edible pods, a fine flavored variety; can be used in the green state like string beans. Height 5 feet.....	50 pint	90 quart	
Dwarf, Sugar. Edible pods.....	35 pint	60 quart	

	Per qt.	½ pk.	pk.
Nott's Excelsior. Extra dwarf wrinkled, pods larger than American Wonder, 1 foot.....	\$0 50	\$1 75	\$2 75
American Wonder. Earliest wrinkled variety, 1½ feet	35	1 25	2 00
Alaska. Very early and retain their color well, height 2½ feet	35	1 25	2 00
First and Best. One of the best extra early Peas. An improved strain of the Extra Early Market, height 2½ feet	35	1 25	2 00
Little Gem. A dwarf green wrinkled Market, very prolific, of superior flavor, and a first early, 1½ feet.....	40	1 25	2 25
Premium Gem. A fine flavored dwarf, wrinkled variety; good cropper and fine quality. Height 18 inches	40	1 25	2 25

SECOND EARLY VARIETIES.

Heroine Medium Early. Green wrinkled, height 2½ feet	35	1 25	2 00
Everbearing, good size pea, long pod, height 2½ feet	35	1 25	2 00
McLean's Advancer. Early green wrinkled varieties, delicious flavor, height 2½ feet	35	1 25	2 00

Peas come earlier to maturity in light soil. For general crop a deep rich loam, or strong loam inclining to clay is best. For early crops decomposed leaves or leaf mould should be used, or if the soil is very poor, strong manure may be employed. For general crop a good dressing should be applied, and for the dwarf growing kinds the soil can hardly be too rich. When grown as a market crop, peas are not staked, but sown in single rows, two or three inches deep, two or three feet apart according to the variety. When grown in small quantities for private

PEAS—Continued.

use, they are sown in double rows six or eight inches apart, and the rows three feet apart, the tall varieties staked up by bush. For an early crop, sow as soon as the ground can be worked, and make repeated sowings every two weeks for succession. A quart is sufficient for a row of about eighty feet.

PEPPER

German, Pfeffer; French, Piment; Spanish, Pimiento.

PEPPERS.

	Per oz.	¼ lb.	lb.
Ruby King. Very large; bright red.....	\$0 30	\$0 85	\$3 00
Sweet Spanish. One of the largest. Best for salads, very hot.....	20	65	2 25
Large Bell or Bull Nose. An early variety of mild flavor	20	60	2 00
Sweet Mountain or Mammoth. Of large size, best for mangoes.....	25	75	2 50
Chinese Giant. Double the size of Ruby King. This is the largest and finest mild Red Pepper. Flesh is thick and unusually mild. Productive bearer.	40	1 25	4 00
Long Red Cayenne. Used for Pepper, sauces very pungent	20	60	2 00
Golden Queen Mammoth. Large, golden, yellow, early	20	65	2 25
Chili. Very piquant and prolific, fruit conical, bright scarlet	20	60	2 00
Golden Dawn Mango. This is a remarkably prolific Pepper of the Bell class of a magnificent golden color.....	25	75	2 50

The Pepper or Capsicum is valuable for its seasoning qualities, as well as for pickling. Sow early in heat and transplant when the weather is warm and settled, or sow in warm situation in the garden about the middle of May. Plants should be set a foot and a half apart.

POTATOES

German, Kartoffel; French, Pomme de Terre; Spanish, Petata.

Houlton Hebron. White skin, the most popular varitey in cultivation..	}	Prices on application.
Houlton Rose. The standard variety.....		
Houlton Early Queen. Early and productive.....		
Houlton Green Mountain. Late variety, good keeper, white and mealy....		
Houlton Irish Cobbler. Very early, round white.		
Houlton Boree. Extra early production, white flesh.		
Houlton Bagley.		
Houlton Delaware.		

POTATOES—Continued

HOULTON MAINE POTATOES

PUMPKIN

German, Kuerbis; French, Gource; Spanish, Calabaz a Tetanera

CHEESE PUMPKIN

	Per oz.	¼ lb.	lb.
Calhoun. Flesh woederfully thick, fine grained.....	10	25	60
Large Cheese. The best variety, hardy and productive	10	20	30
Connecticut Field. Very productive, largely grown for feeding stock 20c. per quart, \$3.00 per bushel....	10	15	40
Mammoth King. Grows to an immeuse size.....	15	40	1 25
Early Sugar. Fruits medium size, of excellent keeping quality. Flesh very sweet	10	20	50
Cushaw. Salmon color, crookee neck.....	10	25	75
Tennessee Sweet Potato. Bell shaped, thick, white flesh, nothing finer for pies	10	25	75

These are usually planted in fields of Corn or Potatoes, but may be profitably raised in fields by themselves. Sow in May; in hills eight feet apart.

RHUBARB

German, Rabarber; French, Rhuperbe; Spanish, Ruibarbo.

	Per oz.	¼ lb.	lb.
Linnaeus. Early, large and tender.....	\$0 20	\$0 50	\$1 50
Victoria. Very large, later than Linnaeus.....	15	40	1 25
Roots (Victona)	10c. each	\$1 00	doz.

Sow early in spring, in drills a foot apart, thinning out to about the same distance apart in the rows when a few inches high. In fall or following spring, transplant into deep, rich soil, about three feet apart each way.

RADISH

German, Retting; French, Radis; Spanish, Robanitos.

	Per oz.	¼ lb.	lb.
Vick's Scarlet Globe. New, very fine.....	\$0 10	\$0 20	\$0 60
Early Scarlet Turnip. The standard variety, of quick growth, mild and crisp when young.....	10	20	50
Early Scarlet Turnip. Forcing variety, maturing in three weeks.....	10	20	60
Early Scarlet Turnip. White tipped, a beautiful new early kind, round in shape; color scarlet, tipped with white, a favorite for market gardeners.....	10	20	50
Market gardeners price..... 10 lbs. at 40c lb.			
Early Scarlet Turnip. White tip, forcing.....	10	20	60
Olive Shape Deep Scarlet.....	10	20	60
French Breakfast. Of quick growth, very mild and tender, of oval form, color scarlet, tipped with white.....	10	20	60
Long Scarlet. One of the leading market kinds.....	10	20	60
Rose China Winter. Flesh firm and piquant; excellent for winter use..	10	25	75
White Summer Turnip. A summer variety of mild flavor.....	10	20	60
Yellow Summer Turnip. Grows to a large size.....	10	20	60

Black Spanish Winter. Long, one of the hardiest and best for winter use..	10	20	60
Black Spanish Winter. Round.....	15	35	1 00
Giant Stuttgart. Summer favorite, German sort....	10	20	60
California Mammoth White. A giant white fleshed Fall Radish.....	10	25	75
White Spanish. Long, rather milder than the black....	10	25	75
White Strasburg. Very large, German sort.....	10	20	60
White Vienna or Lady Finger. Crisp and tender in summer.....	10	20	60

There are two classes of Radishes, those for Spring and Summer use, which are small and arrive quickly at maturity, and with proper care can be kept all winter. The summer radishes should be used while young and tender; if allowed to grow too long they become tough and stringy; they thrive best in high rich soil. For a successful supply, sow from the middle of March until September, at intervals of two or three weeks. For an early supply they may be shown on a mild hotbed in February. The winter varieties may be sown from the latter part of July to the middle of September.

SPINACH

German, Spinat; French, Spinard; Spanish, Espinaca.

Special price on lots of 10 to 25 lbs.

	Per oz.	¼ lb.	lb.
Long Standing, Round Leaved.....	\$0 10	\$0 15	\$0 35
Flander's Round Leaved. The variety commonly grown, good for spring or fall sowing.....	10	15	35
Large Viroflay. A new variety, with leaves much larger and thicker than the old variety.....	10	15	35

SPINACH—Continued

	Per oz.	¼ lb.	lb.
Victoria, New. Dark green color, sow early.....	\$0 10	\$0 15	\$0 35
Bloomsdale Savoy Leaved. A large, curled, thick leaved variety, the market gardner's favorite....	10	15	35
Prickly. Prickly seeded, with triangular arrow-shaped leaves	10	15	35
New Zealand. Produces leaves in great abundance throughout the summer, should be raised in heat and transplanted three feet apart each way into light rich soil	10	30	80

Sow in fall for spring use, in drills a foot apart, thinning out the plants to three inches apart in the rows. Spinach is very hardy and does not require protection except in very exposed places, where a covering of straw or leaves is useful. For summer use sow as early as possible in spring, and at frequent intervals, during the season for succession.

SALSIFY, OR OYSTER PLANT

German, Bocksbart; French, Salsifis; Spanish, Salsifi.

	Per oz.	¼ lb.	lb.
Long White French	\$0 20	\$0 50	\$1 50
Mammoth Sandwich Island	15	40	1 25

This very nutritious vegetable requires the same cultivation as Carrots or Parsnips. It is quite hardy and the roots may remain in the ground all winters; a quantity can be taken up and packed in earth or sand, and stored away for use when needed. It makes a fine soup, like the oyster. It is also half-boiled, grated fine, made into small balls, dipped into butter, and fried.

SALSIFY.

SQUASH

German, Garten Kuerbise; French, Courage; Spanish, Buetera.

	Per oz.	¼ lb.	lb.
Mammoth Summer Crookneck. Twice size of Summer Crookneck.....	\$0 10	\$0 25	\$0 80
Fordhook Squash. Bright, yellow, good keeper	10	25	75
Early Golden Bush Scalloped. True bush growth producing fruit ready for use early in the summer.....	10	25	75
Early White Bush Scalloped. A white variety of the above.....	10	25	75
Summer Crookneck. Early, productive and of good quality.....	10	25	75
Boston Marrow. A very valuable medium early variety, an excellent keeper and of superior quality..	10	25	75
Hubbard. The best Winter Squash, fine grained, dry, keeps well and is of excellent flavor	15	30	1 00

SQUASH—Continued.

	Per oz.	¼ lb.	1 lb.
Mammoth Chili. Grows to a large size, often weighing two hundred pounds Excellent for stock.....	\$0 15	\$0 40	\$1 25
Vegetable Marrow. A favorite English sort, skin greenish yellow, flesh white, soft and rich flavor.....	15	40	1 25

Squashes are divided into two classes, Summer and Winter. The Summer varieties come into use about midsummer, and are eaten when the rind and flesh are young and tender. The Winter varieties are left on the vines until they are thoroughly ripe, gathered in the Fall, and stored away for Winter use. If well ripened and kept in a good cellar, they can be preserved until May. Prepare hill for the seeds by incorporating two or three shovelfuls of well rotted manure with the soil, for each hill. For the bush varieties, from three to four feet each way, and for the running sorts from six to eight feet. Eight or ten seeds should be sown to each hill, thinning out after they have attained their rough leaves, leaving three or four of the strongest plants.

SWISS CHARD.

SWISS CHARD OR SILVER BEET

This is a Beet producing leaves leaves only, of a quality superior to those of the ordinary Beet, and excellent greens. Cultivate about the same as spinach, by sowing in early spring in drills about a foot apart. Oz. 10c, ¼ lb. 30c, 1 lb. \$1.00.

TOBACCO

Connecticut Seed Leaf. This variety is best adapted to the climate of the Northern and Middle States. Per oz. 25c, ¼ lb. 75c, 1 lb. \$2.50.

Havana. Imported Seed, Vuelto de Abbajo. Per oz. 40c, ¼ lb. \$1.25, 1 lb. \$4.00.

TOMATO

German. Liebesapfel; French. Tomote; Spanish, Tomata.

	Per oz.	½ lb.	1 lb.
Atlantic Prize. Extra early, smooth, bright red, good size	\$0 25	\$0 75	\$2 50
Earlina, Extra Early. Bright red, smooth. It is claimed to be one of the earliest introduced, very productive.....	30	85	3 00
Coreless Livingston's. Almont round, bright red, ripens all over at once, exceptionally free from green core.....	30	85	3 00
Livingston's Honor Bright. Solid, long keeping qualities	25	75	2 50
Imperial. Very smooth, bright red color, good size	25	75	2 50
New Buckeye State. Large size, similar to Livingstone's Beauty, little darker in color.....	30	85	3 00
Thorburn's Terra Cotta. A cross between the Stone Peach and Ponderosa	60		
Ponderosa. Very large and solid.....	35	1 00	3 75
New Stone. Large and smooth.....	25	75	2 50
Livingston's Perfection. Very early, round, smooth, tough skin, brilliant; solid and rich flavor; ripening thoroughly. A favorite market variety..	25	75	2 50
Ignotum. Early, large and smooth.....	25	75	2 50
Livingston's Beauty. Large dark crimson, thick skin	25	75	2 50
Dwarf Champion. Resembles Acme, early.....	25	75	2 25
Acme. A beautiful variety. Fruit of medium size, form perfect and very smooth. Ripens all over and through at the same time. This variety seems to possess all the good qualities that can be desired in a tomato	25	75	2 50

TOMATO—Continued.

	Per oz.	¼ lb.	lb.
Trophy. (Selected). The leading variety for general cultivation, and when property grown will give satisfaction. The seed we offer is carefully selected from pure stock.....	20	65	2 25
Golden Queen. A first class large, smooth, pure yellow Tomato. Fine bearer and of excellent flavor.....	25	75	2 50
Yellow Plum. Used principally for pickling.....	25	75	2 50
Red Pear Shape. Used principally for preserving and pickling.....	30	85	2 00
Red Currant for Preserves.....	30	85	3 00
Yellow Cherry. Similar to above, except in color.	25	75	2 50

NEW STONE TOMATO.

The seed should be sown in a hotbed about the first week in March, in drills five inches apart and half an inch deep. When the plants are about two inches high, they should be set out four or five inches apart in another hotbed, or removed into small pots, allowing a single plant to a pot. About the middle of May the plants may be set in the open ground, at a distance of three to four feet apart in hills in which a good shovelful of rotted manure has been mixed.

TURNIP

German, Rube; French, Navet; Spanish, Nabo.

	Per oz.	¼ lb.	lb.
Milan. (Purple top), the earliest of all.....	\$0 15	\$0 30	\$1 00
Purple Top Munich. One of the earliest varieties.	10	20	60
Early White Flat Dutch. An early garden variety of medium variety size..	10	20	60
Red Top Strap Leaf. This and the preceding are the best two kinds for Spring sowing and for garden culture.....	10	20	60
Red Top White Globe. Very desirable, extensively grown for market.....	10	20	60
White Egg. A new variety, beautifully shape; excellent table turnip.....	10	20	60
Yellow Globe. One of the best for general crop, either for table use or stock.	10	25	75
Yellow Stone. A good globe-shaped turnip, similar to the above.....	10	20	60
Golden Ball. A table Turnip of quick growth, and unsurpassed quality..	10	20	60
Long White or Cow Horn. One of the best field Turnips, flesh fine grained	10	25	75
Yellow Aberdeen. Hardy and productive, largegrown for farm purposes..	10	20	60
Large White Norfolk. Globe-shaped variety, one of the best for stock..	10	20	60
Pomeranium White Globe. Very fine, white Globe variety, round and thick.	10	20	60
German Tetlow. Small, early, fine grade sugary.	10	25	80

TURNIPS—Continued

RUTA BAGAS

American Improved Purple Top.

The leading variety, of fine quality, valuable both for the table and for feeding stock. Per oz. 10c, $\frac{1}{4}$ lb. 20c, lb. 60c.

Carter's Imperial Royal Swede.

An English variety, highly recommended as producing enormous crops. Per oz. 10c, $\frac{1}{4}$ lb. 20c, lb. 60c.

White or Sweet German.

A large solid variety. Per oz. 10c, $\frac{1}{4}$ lb. 20c, lb. 50c.

L a i n g ' s . Improved, globe-shaped, with small top and tap root. Per oz. 10c, $\frac{1}{4}$ lb. 20c, lb. 60c.

For spring crop commence sowing early varieties as soon as the ground can be worked, in drills fourteen inches apart; thin out the plants to five or six inches apart. Keep clear from weeds, and when the bottoms begin to enlarge, brush away the earth from about the roots the depth of an inch or more, and give them a light dressing, of wood ashes. This is the surest mode of

PURPLE TOP STRAP TURNIP

obtaining fair and smooth Spring Turnips in old gardens where they are almost certain to grow wormy if the earth is allowed to remain in contact with the roots. It is important to get them started very early so that they may have time to grow a sufficient size before very hot weather, when they will soon become tough and strong. For the Fall and main crops, sow from the middle of July to the last of August in drills as directed for the Spring sowing. In the field, Turnips are more generally sown broadcast though much larger crops are obtained by drill culture.

SWEET POT AND MEDICINAL HERB SEEDS

Herbs are valuable for culinary and medicinal purposes, but they do not always receive the attention which they deserve. They are easily grown, and when preserved by drying are ready for use at any season of the year. Sow in Spring as soon as the weather is warm, and thin out as the plants grow up.

	Per oz.
Anise (<i>Pimpinella anisum</i>), an annual, cultivated for its seeds and its leaves, which are used for garnishing and for seasoning.....	\$0 10
Balm (<i>Melissa officinalis</i>), a hardy perennial, used for making balm tea and balm wine ..	25
Basil, Sweet (<i>Ocimum basilicum</i>). This is a tender annual, cultivated for its leaves, which are much used for flavoring soups and sauces	15
Bene (<i>Sesamum orientale</i>).....	10
Borage (<i>Borage officinalis</i>), hardy annual, some times used a sa pot herb, and also for garnishing, but chiefly for claret cup and other cooling drinks. Bees are very partial to the flowers.....	10
Caraway (<i>Carum cauri</i>), hardy biennial, cultivated for its seeds, which are largely used in various kinds of confectionery and for giving flavor to liquors.....	10
Catnip (<i>Nepeta cataria</i>), perennial.....	35
Coriander (<i>Coraindram salivum</i>), an annual, raised for its seeds, which are used by confectioners, and sometimes to disguise the taste of medicine	10
Dill (<i>Anethum graveolens</i>), annual, the leaves are used in soups and sauces; and the seeds are sometimes added to pickle cucumbers to heighten their flavor. Medicinally they are good for flatulence and colic in infants.....	10
Fennel (<i>Anethum foeniculum</i>), hardy perennial, leaves used for garnishing, and in the preparation of various fish sauces.....	10
Horehound (<i>Marribium vulgare</i>), hardy perennial, principally used for medicinal purposes	20
Hyssop (<i>Hyssopus officinalis</i>), hardy perennial, the leafy tops and flowers are used for making hyssop tea.....	15

SWEET POT AND MEDICINAL HERB SEEDS—Continued

	Per oz.

Plot 50 feet by 100 feet, use 50 pounds.....	Price 1 75
Plot One-quarter acre, use 100 pounds.....	Price 3 00

HOW TO MAKE A LAWN

The ground ought to be carefully prepared during the winter, by draining if found requisite, and digging to the depth of six to twelve inches, according to the nature of the soil. The land should then be leveled and raked to remove stones, etc., and then made firm with a heavy iron roller. When the natural soil is too stony, a supply of good mould should be spread over it to a depth of two or three inches. In March or April, before sowing the seed, the ground ought to be thoroughly cleaned and made perfectly level with the iron roller and as the subsequent appearance of the lawn depends in a great measure on this part of the preparation, it is of the most importance it should be well done. The ground should then be evenly raked and the seeds sown. April and September are the best months for sowing. The seed should be sown on a calm day, at the rate of four bushels to the acre.

After the sowing has been accomplished, the ground should be again rolled, and as soon as the young plants have attained the height of two or three inches, the whole plot should be carefully gone over with a sharp scythe, and from the months of April to October it should be mown every ten days. Mowing machines are excellent after a comparatively close turf is established; but for the first six months' sowing the scythe should be used in preference to the machine. Frequent mowing and rolling are indispensable to maintain the turf in good order. By adopting these means a close green sward will be obtained in a short time.

For lawns requiring improvement, and on croquet grounds, where the turf has become bare through constant use, it is only necessary to sow fresh seed at the rate of one or two bushels to the acre, either in the Spring or Fall, using a small tooth cake and rolling afterwards. A slight dressing of manure late in the Fall, will often be found beneficial in encouraging the growth of finer kinds of grasses, and helps to produce a close growing turf.

MEADOW AND PASTURE MIXTURES

The formation of permanent and productive meadows and pastures is of great value to farmers, and has been given thorough study by numerous experts, resulting in formulas that will give good results under the varying conditions of our climate.

It is a well known fact that a heavier and more prolonged growth is produced by a mixture of many sorts of grasses than by only one or two. Some sorts do best on high dry soil, while others prefer plenty of moisture. Some mature so early and others so late that there is no time in the season when one sort or another is not at its best. Grass seed may be sown either early in spring or in fall, from September to the middle of October in this latitude. Below we give mixtures that we are confident will give good results.

MEADOW MIXTURE FOR ONE ACRE

No. 1. On Good Land, Neither Too Dry or Too Wet

Price \$4.00 per bushel of 20 lbs. Sow 2 bushels to the acre.

No. 2. For High and Dry Land

Price \$4.50 per bushel of 20 lbs. Sow 2 bushels to the acre.

No. 3. On Wet Land

Price \$4.00 per bushel of 20 lbs. Sow 2 bushels to the acre.

PASTURE MIXTURE FOR ONE ACRE

No. 4. On Good Land. Neither Too Wet or Too Dry

Price \$4.25 per bushel of 20 lbs. Sow 2 bushels to the acre.

No. 5. On Dry Land

Price \$4.25 per bushel of 20 lbs. Sow 2 bushels to the acre.

No. 6. On Wet Land

Price \$4.25 per bushel of 20 lbs. Sow 2 bushels to the acre.

CLOVERS

(Subject to Variation in Price).

Red Clover. Medium (<i>Trifolium pratense</i>). Price variable, 60 lbs. to bushel.	} Market Price.
Red Clover, Large or Pea Vine. Price variable.....	
White Clover. (<i>Trifolium repens</i>).....	
Alfalfa or Lucerne. Requires a deep, rich soil, and in such will produce several crops every season. Fifteen pounds to the acre.....	
Alsike or Swedish (<i>Trifolium hybridum</i>). Ten pounds to the acre	
Crimson or Italian (<i>Trifolium incarnatum</i>), sown in Autumn, it furnishes an early fodder and is excellent for soiling. Twenty pounds to the acre. Price variable.....	
Bokhara Clover (<i>Melilotus alba</i>), affords excellent feed for bees; it is a valuable soiling plant; lasts two years. Ten pounds to the acre	
Yellow Trefoil (<i>Medicago lupina</i>) Hop clover. Fifteen pounds to the acre.....	

GRASS SEED

These Prices are Subject to Variation.

	Per 10 lbs.	Per lb.
Blue Grass Kentucky (<i>Poa pratensis</i>), extra clean; does well on light dry soils; recommended for permanent pasture; it requires two or three years to form a good sod, and does not arrive at its perfection as a pasture grass until it is much older; valuable in mixtures for lawn; 14 lb. bushel	\$2 25	\$0 25
Creeping Bent Grass, Florin (<i>Agrostis stolonifera</i>), used for lawns, well adapted to most places.....	3 75	40
Crested Dogtail (<i>Cynosurus cristatus</i>), good for permanent pasture for sheep, is productive and early, suffers but little from dry weather, and is one of the best grasses for lawns. 25 lbs. to the acre	3 25	35

GRASS SEED—Continued

	Per 10 lbs.	1 lb.
Hard Fescue (<i>Festuca duriuscula</i>), admirable pasture grass of fine quality, thrives well in dry situations. 30 lbs. to the acre	\$2 50	\$0 27
Meadow Fescue (<i>Festuca pratensis</i>), this is excellent for hay when sown with other grasses, such as Orchard Grass and Timothy, and is also considered one of the best grasses for permanent pasture on a great variety of soils. 40 lbs. to the acre	2 25	25
Sheep's Fescue (<i>Festuca ovina</i>), does well in high dry and open pastures, is of short, dense growth, and valuable in lawn mixtures. 30 lbs. to the acre	2 75	30
Meadow Foxtail (<i>Alopecurus pratensis</i>), regarded as one of the most desirable grasses for permanent pasture, being early and rapid growth. 25 lbs. to the acre	3 25	35
Meadow Soft Grass (<i>Holcus lanatus</i>), will grow with little or no care in any soil; it is chiefly cultivated where the better grass will not grow. 3 bu. to the acre; 7 lbs. to bushel	1 60	18
Orchard Grass (<i>Dactylis glomerata</i>), is one of the most desirable of all pasture grasses, coming early in the Spring and remaining later in the Autumn than any other. 3 bu. to the acre. 14 lb. bu	2 25	25
Red Top Grass (<i>Agrostis vulgaris</i>), good permanent grass, excellent for lawns, pastures, etc., and sowing with Timothy and Red Clover for cutting for hay. Sack 50 lbs., \$4.00; per bushel of 14 lbs., \$1.50		
Fancy Red Top Grass , cleaned like Timothy; free from chaff	2 00	25
Rhode Island Bent Grass (<i>Agrostis canina</i>), best of all grasses for lawn where only one variety is used	3 50	37
Rye Grass English (<i>Lolium perenne</i>). Probably one of the most important and valuable of the cultivated grasses; is naturally adapted to almost any soil; matures early, and is very productive, but contains less nutrition than Orchard Grass	1 50	20
Rye Grass Italian (<i>Lolium Italicum</i>). This ripens much sooner than the English Rye Grass, and is greatly preferred by cattle, and greedily eaten by them, either in a green or dry state	1 25	15
Sweet Vernal Grass (<i>Anthoxanthum odoratum</i>), is not valuable when sown alone, but when sown with other grasses, it becomes so because of its early growth. It also yields a delightful odor when cured for hay. 10 lbs. to the acre, mixed with other grass annuals	7 50	80
Tall Meadow Oat Grass (<i>Avena elatior</i>), very valuable for pasture on account of its early and luxuriant growth. It shoots up very quickly after being cut, and produces a thick crop of aftermath, which also makes it valuable as a soiling crop. It has been lately in demand and is much valued in the South	2 40	26
Timothy, Herd's Grass (<i>Phleum pratense</i>). As a crop to cut for hay, this is probably unsurpassed. It thrives best on moist, peaty or loamy soils, and is not suited to light or sandy soils, although on such it can with care, be made to produce fair crops. Price according to market, 45 lbs. to bu.	Market Price	
Rough Stalked Meadow Grass (<i>Poa trivialis</i>), produces a constant supply of highly nutritious herbage, particularly on dry soils; one of the most valuable for laying down pastures and meadows on soils either moist or moderately dry. 14 lbs. to the bushel; 20 lbs. to the acre	5 00	55
Wood Meadow Grass (<i>Poa nemoralis</i>). This grass grows well both on shady and exposed situations. 30 lbs. to the acre	5 00	55
Yellow Oat Grass (<i>Avena flavescens</i>), good for dry pastures and meadows. Is much relished by sheep		1 25
Golden or German Millet . This variety is a heavier cropper than the Hungarian Grass, and needs a longer season and stiffer soil. Grows from three to five feet high, stands up well, is easily cured; gives general satisfaction. Three pecks to the acre. Per bushel of 48 lbs.	1 75 bushel	
Hungarian Grass . A valuable forage plant, succeeds well on dry, light soil; withstands the drought remarkably, remaining green when all other vegetation is parched up, and if its development is arrested by dry weather, the least rain will restore it to vigor. Sow broadcast. Three to the acre. Per bushel of 48 lbs.	1 50 bushel	

GRAINS

All grains are selected expressly for seed, and are strictly pure and true to name.

Sold at Market Prices

SPRING WHEAT, 60 lb. Bushel

- Saschatewan Fife**
China Spring. Chaff bearded variety, and a general favorite.
Mediterranean Spring. This variety has been grown with great success for a number of years in some sections of New England, and is very highly recommended, is bearded, yields well and the kernels are larger than those of other Spring varieties.
White Russian. This variety, recently introduced, has proved very valuable in many localities in the Northwestern States. Straw of good length, strong, does not lodge. It is not inclined to rust. Heads of large size and well filled with plump kernels weighing 60 to 63 lbs. to the bushel. Has produced 40 to 50 bushels to the acre.

WINTER WHEAT, 60 lb. Bushel

- Jones' Winter Five.** Surpassing all other varieties in hardiness and productiveness.
Golden Cross. Has the yield of the Clawson, with flower of the Mediterranean.
Clawson. Also known as the Seneca. This is a beardless white wheat with red chaff. It proves early and hardy, has a stiff straw, yields larger crops than any other.
Fultz. A beardless amber variety, grown largely in some sections of Pennsylvania and with very satisfactory results. It is very hardy and productive, and the straw is of medium length and very strong; makes excellent flour.
Red Mediterranean. (American). This is the imported variety fully acclimated and is a standard wheat. The heads are bearded and well filled. It succeeds well in nearly all localities and ripens early.

OATS, 32 lb. bushel.

- SWEDISH or WASHINGTON.** Very popular and standing well until fully ripe.
Probsteirer. Very productive and heavy. The straw is very strong: No. 32.
Scotch. One of the leading varieties.
Welcome.

RYE 56lb. Bushel.

Spring and Winter Rye.

SPRING BARLEY, 48 lb. Bushel

Vermont Champion (two rowed).

BUCKWHEAT, 48 lb. Bushel.

Silver Hull. This variety is a great improvement on the common Buckwheat. Sown at the same time it will continue to bloom longer, matures a few days sooner, and yields nearly or quite double under the same conditions.

JAPANESE BUCKWHEAT

Yields twice or three times as much as Silver Hull and ripens a week earlier.

HIGH GRADE FERTILIZERS

MUZZY BROS.' SWIFT "SURE" PHOSPHATE

FOR GENERAL CROPS, BEST FERTILIZER EVER MANUFACTURED

Stands ahead of anything in the market in Analysis, selling Price and Results. The Great Satisfaction this Fertilizer has given our customers, being so universal, enables us to recommend it as the Leading Artificial Manure in the Market.

GUARANTEED ANALYSIS

Nitrogen	2.46 to 3.28 per cent.	Total Phos. Acid	10 to 11 per cent.
Equal to Ammonia	3 to 4 per cent.	Potash Actual	6 to 8 per cent.
Available Phos. Acid	8 to 10 per cent.	Equal to Sulp. Potash..	11.09 to 12.94 per cent.
Insoluble Phos. Acid.....	1 to 2 per cent.	Ton. (12 bags) \$35.00	per bag (167 lbs.) \$3.25

MUZZY BROS.' SWIFT "SURE" SUPER PHOSPHATE

FOR POTATOES

Nearly every farmer grows Potatoes, and consequently is, with the trucker and market gardener, interested in buying that fertilizer which for the least cash outlay, will bring him the best returns; as it is no longer a question, but an actual fact, that with a Potato. Manure made from first class material, like our "SWIFT-SURE" SUPER PHOSPHATE FOR POTATOES, you can grow a larger crop of potatoes than you can with barnyard manure, and have them smoother, free from imperfections and of more uniform size.

GUARANTEED ANALYSIS

Nitrogen	2.46 to 3.28 per cent.	Total Phos. Acid	8 to 11 per cent.
Equal to Ammonia	2 to 4 per cent.	Potash Actual	7 to 8 per cent.
Available Phos. Acid.....	8 to 10 per cent.	Equal to Sulp. Potash..	12.94 to 14.79 per cent.
Insoluble Phos. Acid	1 to 2 per cent.	Ton (12 bags) \$35.00;	per bag (167 lbs.) \$3.25

MUZZY BROS.' SPECIAL FERTILIZER

Nitrogen	1.65 to 2.47 per cent.	Insoluble Phos. Acid	1 to 2 per cent.
Equal to Ammonia.....	2 to 3 per cent.	Potash Actual	4 to 5 per cent.
Available Phos. Acid.....	8 to 10 per cent.	Equal to Sulp. Potash...	7.40 to 9.25 per cent.

PURE PULVERIZED SHEEP MANURE

A pure, natural and nutritious manure. Immediate and lasting in effect. Excellent for mixing with the soil of the greenhouse plants. In the vegetable garden it promotes a rapid, steady growth until maturity. It makes a rich Liquid Manure.

Quantity Required. For garden and field crops. 1 to 2 tons per acre— half before plowing, the balance before harrowing. For top dressing grass, use 1 ton per acre in fall or early spring.

Price, 100 lb. bag, \$2.00; per ton of 2,000 lbs. \$30.00; in packages of 2 lbs. 15; 10 lbs. 40c.

NITRATE OF SODA

A fertilizer for all crops. It is very quick in action, and hastens maturity of crops fully two weeks. Being extremely soluble, it should not be applied until the crops are above the ground when 100 pounds per acre should be sown, mixed with wood ashes. Does not exhaust the land.

5 lbs. 35c; 10 lbs. 50c; 25 lbs. \$1.25; 50 lb. \$2.00. Bags trifle over 200 lbs. \$3.50 per 100 lbs.

HIGH GRADE FERTILIZERS—Continued.**MURIATE OF POTASH**

50 per cent. Actual Potash.

One of the Best Fertilizers for Grass, Wheat, Rye, Oats, Barley, etc. Used with Nitrate of Soda Ground Bone, Acid Phosphate would furnish sufficient available for an increase in yield by 50 per cent. Price, \$3.25 per 100 lbs. \$5.50 Bag of 200 lbs.

ACID PHOSPHATE

14 to 16 per cent. Available Phosphoric Acid.

This is one of our Fertilizers which is used in the largest quantity in most of our mixtures as a base. Price, \$1.25 for 100 lbs. \$2.25 Bag of 200 lbs.

KAINIT

12 per cent. Annual Potash.

Used mostly where a small amount of Potash is required, is recommended as a good preventive of Grub's Worms. Price, \$1.15 for 100 lbs. \$1.90 Bag of 200 lbs.

GENERAL LIST OF FLOWER SEEDS**HARDY ANNUALS**

Successive sowing may be made from March to the end of September; March, April and May are the best months for general summer display; June and July for Autumn blooming, and August and September for Spring flowering. The soil should be carefully prepared by being finely pulverized and made light and rich.

Sow thinly; cover with a very thin coat of fine dry earth the smallest seeds needing but a mere dusting to cover them—and from the first keep the plants thinned sufficiently to prevent overcrowding, which weakens them and produces poor blooms.

HALF HARDY AND TENDER ANNUALS

These include some of the most beautiful and varied of our Summer flowers, among which may be mentioned Aster, Balsam, Ten-Weeks' Stocks, Phlox, Drummondii and Double Zinnia, which in form, size and brilliancy of flowers, and their great diversity of color, are now brought to a high state of perfection.

Sow from the beginning of March to June; when sown in March and early part of April, sow thinly in well-drained pots, pans or boxes; place in the greenhouse or a frame where there is a mild heat, or in the absence of these a sunny window in the house will do; cover the seeds lightly, press down the soil firmly and give a gentle watering with a fine rose watering pot.

Separate the plants when large enough to handle, and firmly plant out in May, as soon as the weather is sufficiently warm where intended to flower. The seed can be sown in the open ground in May and June.

HARDY BIENNIALS AND PERENNIALS

These can be grown at all seasons of the year in the open garden without protection, and may therefore be placed among the most useful of our flowering plants; their variety is almost endless, producing almost every form of flower and shade of color.

The seed may be sown from May to October, but the best time is May and June. Select for sowing a shady, moist situation, and in order to secure fine, strong plants, sow thinly, and as soon as large enough transplant in showery weather to nursery beds, and finally plant out in October and November; those sown in Autumn are best planted out in March or April, when intended to flower. Many Perennials, if sown early and treated as Annuals will flower

GENERAL LIST OF FLOWER SEEDS—Continued.

the first season. The Pansy, Petunia, China Pink, and its several splendid varieties, and many others, do better as Annuals than Perennials.

Half Hardy Biennials and Perennials may be raised and treated in the same way as recommended for Half Hardy Annuals.

ANNUALS FOR WINTER BLOOMING

Many Annuals are very desirable for the greenhouse for Winter blooming; these should be sown in July or August. The most important are Browallia, Candy Tuft, German Stocks, Lobelia, Mignonette, Schizanthus, Sweet Alyssum and Dwarf Nasturtiums. Many varieties as well as the above may be sown in the Fall and Winter for blooming early in the Spring, such as Acroclinium, Ageratum, Antirrhinum, Apple-scented Geranium, China Pinks, Dianthus, Mimulus, Myosotis, Pansy, Petunias, Phlox Drummondii, Salpiglossis, Verbena Vinca and others.

Abbreviations and Signs Used in the following List

A.	Annuals, refers to those plants that last but one season, and must be raised annually.	t.	Tender, require to be raised and grown under glass, and will only do in the open air in July, August and September.
B.	Biennial, raised one year, bloom and die the next.	cl	Climbing; as Cypress Vine, Morning Glory, etc.
P.	Perennial, lasts two or more seasons.	spr.	Spreading or trailing as Verbena.
h.	Hardy, are those that may be grown at all seasons in open air, without protection.	g.	Greenhouse, those plants which require to be grown under glass.
hh.	Half hardy, require the protection of a frame pit, or handlight till May, when they may be transferred to the open garden.	s.	Shrubs, plants of a shrubby or bushy habit.

Those Biennials and Perennials marked with a(*) will bloom the first year is sown early.

AMMONIATED FLOWER FOOD

A dressing made expressly for plants grown in the house, garden or conservatory. Clean, odorless and producing early and abundant blossoms of rich and brilliant color, and healthy, luxuriant plants free from vermin.

This Ammoniated food was the first odorless chemical preparation made and sold in this country. It is made expressly for flowers grown in the house, garden or conservatory, and contains the same plant food as stable dressing, but in a cleaner and more soluble form.

Price 15 cents per package.

ROSEBUSHES, BULBS ETC.

Hardy Roses. Two year old, Holland grown, our own importation. We carry the largest assortment of Rosebushes in the state. Both hardy and ever blooming we append a partial list of the varieties we carry in stock for immediate delivery—they will produce a full crop of blooms the first summer.

American Beauty. Rich, rosy-rimson. Very large.

F. D. Druschki, White American Beauty. Very large, pure snow white.

Baroness Rothschild. Bright, rosy pink. Immense size.

Crimson Rambler. Immense cluster bright red flower—very quick grower and hardy.

Thalia, White Rambler. Same as Crimson, cut with pure white blooms, hardy.

Aglaya, Yellow Rambler. Yellow blooms in big clusters, hardy.

Euphrosine, Pink Rambler.

Gen'l. Jack. Large, brilliant blood red blooms. Fine Bloomer.

Killarney Pink. Extra fine.

La France Pink. One of the sweetest and most beautiful roses grown. Large, silvery pink. Blooms till frost.

La France Red. Large blooms of brilliant rose pink almost crimson.

La France White. Same as above two, but blooms are pure white. Very fine bloomer.

Marechal Neil. Large, clear yellow. Ever bloomer.

Magna Charta. Rosy rimson. Large buds and blooms.

Mrs. John Laing. Clear shining pink, beautifully shaded.

P. des Blanches.

U. Brunner. Cherry red.

Perle de Lyon. Deep golden. Ever bloomer.

Paul Neyron. Dark rose, very large and fragrant.

Price 15c each.

Tube Roses. One of the most delightfully fragrant and beautiful of the summer flowering bulbs. By skillful management a succession of flowers may be obtained all the year around. For early flowers they can be started in February or March in the greenhouse or hotbed; and for a succession they can be planted at intervals as late as July. For flowering in the open border, plant about the middle of May or as soon as the ground becomes warm. 1c and 2c each.

TUBE ROSE.

Gladiolus, Extra Fine Mixed. With a view to so supplying a high grade mixture at moderate prices we have had grown for us by Gladiolus specialists good quantities of some of the choicest named kinds for this mixture, and shall use with them some of Child's hybrids and other best mixtures which will insure a large variety of shades and colors. This is truly a banner strain. Price 3c each; 25c dozen.

Dahlias. Our Dahlia roots are exceptionally fine this year, being Southern grown, and true to name and color. We carry a large assortment of colors. 10c each.

Caladium Esculentum. Elephant's ears. One of the most effective and easily grown plants for the lawn or flower border. Will thrive in any ordinary garden soil, but to get the best results plant in rich soil and give plenty of water. 5c, 10c, 15c each.

Paeonies. No other plant flowering at the same season can vie with the Paeony for beauty. They are perfectly hardy, requiring no protection whatever are not troubled with insects or disease, and once planted take care of themselves. Price 20c each.

TEA ROSES.

GLADIOLUS

DAHLIAS

HYACINTHS.

NARCISSUS.

BULBS—Continued.

Cannas. Extra strong roots 5c each.

No. 115x—Swivel, Ligh Two Horse, Charcoal Iron Beam, Full Rigged with Colter and Adjustable Clevis.....	\$13 98
No. 21—Swivel, One Horse, Cast Moldboard, Wood Beam.....	7 98
Weeder—7½ feet wide, adjustable spring steel teeth.....	7 98

No. 24—One Horse, Cuts 10 Inches, Weight 50 lbs.\$ 5 48

It has Clevis that permits horse to walk in furrow. An excellent Plow. Low in price, Chilled Iron. Landside chilled on bottom; is very strong and convenient.

THE BEST PLOW

This is the best one horse convertible Plow ever sold for the use of market gardeners and farmers generally. By changing the Moldboards and Shears that come with the Plow, the purchaser actually has four plows in one. Price complete.....\$4 98

No. 1½ Moldboard and Share makes a large one horse Plow.

No. 2½ Moldboard and Share making a medium sized one horse Plow, a cabbage Moldboard and Share making a complete Cabbage Plow, and by using the Plow without the moldboard with the small Share bolted to the standard, makes a superior Plow for working among cabbage, strawberries, etc.

MITCHELL POTATO DIGGER AND SHOVEL PLOW COMBINED

Price with wings only.....	\$5 00
“ “ Potato Digger.....	6 00
“ “ Wing and Potato Digger attachment.....	7 98

This implement should be in the hands of every practical farmer, doing its work easily and in the most perfect manner. By the changing of one bolt it may be converted into a **Shovel Plow or Potato Digger**. The fingers are adjustable, being held in position by the plow point. Thus in case of breakage, a new part may be inserted without the expense of a whole new head. The fingers, points and wings are of steel, rendering it light strong and durable.

Darnell' Patent Furrower and Marker

In presenting the numerous merits of this invaluable little implement we would be glad to draw a comparison with another of its kind, but we have seen or heard of nothing but the ordinary scratch sleds which make a mere mark as a guide for the plow which follows, thus increasing the work instead of lessening it.

We have a genial ever borrowing neighbor, however, with whom we might compare notes, and we will just bring him forward with his plow which he is inclined to think is good enough yet. We think you will not fail to notice the difference.

We ride while he walks.

We bring into requisition the services of our boy, if busy ourselves, while nothing short of a man, and a good one, too, can handle the plow.

We open two furrows while he opens one in clean ground, and do it better.

Price \$18.00

THE EDDY IMPROVED MARKER

These Markers have chilled Shoes of Runners with steel wings bolted on, and may be easily replaced when worn. Frames made of seasoned oak firmly braced and bolted together, arranged with holes permitting the adjustment of the shoe to any width desired. Gauge is adjustable and swing to either side. It will save time enough to pay for it in one season also improve the looks of your fields. Price.....\$11.00

EDDY'S NO. 10 DISC HOE AND COVERER

The Eddy Disc Hoe and Coverer have 20 inch steel Discs, adjustable handles and are invaluable for covering and ridging all kinds of row crops. Adjustable in every way it is one of the best implements on the market.

Price . \$10.00

ACME ASPARAGUS BUNCHER

A greatly improved pattern with knife guide and adjustable head piece for regulating the length of the bunch. This is the latest pattern, 1907 patent.

Price . . \$1.75

Planet Jr. Garden Tools

The Planet Jr. Wheel Hoes are the greatest cultivating tools in the world for every grower of garden crops from drilled seed. They do more and do it better and easier than can possibly be done in any other way. The frame is steel.

No. 12 Double Wheel Hoe

NO. 12 DOUBLE WHEEL HOE, CULTIVATOR AND PLOW.

Weight 34 lbs. Price \$6.50.
Steel Frame

The hoes are the most valuable of all the wheel hoe attachments; are oil tempered and polished. Use 6-inch hoes for rows 12 inches and upwards.

The plows are invaluable; use them with points together for opening furrows for manure, seed, etc.; then exchange sides for covering; use them also for plowing away from or toward the crop, both sides at once.

The cultivating teeth for deep or shallow work, and for marking out.

NO. 13 DOUBLE WHEEL HOE.

Price, \$4.50. Weight, 29 lbs.

This tool is the No. 12, with 6-inch hoes only, these being the tools that are most generally useful. Any or all of the other tools shown with No. 12 may be added at any time.

NO. 16 PLANET JR. SINGLE WHEEL HOE, CULTIVATOR, RAKE AND PLOW

Price \$5.35. Weight 25 lb.

The handles are adjustable in height. The frame is steel, convenient and strong with quick change device by which to exchange the tools without removing the nuts.

All our wheel hoe tools are of a special pattern, carefully tested by practical men; no others are offered compare with them. All the steel parts are high carbon steel, oil tempered finely formed, finished and polished and work to a charm.

NO. 17 PLANET JR. SINGLE WHEEL HOE

Price, \$4.75. Weight, 23 lbs.

You can do more and better hoeing with it in one day than you can do in three days with a hand hoe. The No. 17 has a pair of 6-inch hoes, a plow and a set of cultivator teeth, an outfit sufficient for most garden work.

NO. 18 SINGLE WHEEL HOE.

Price, \$3.50. Weight, 20 lbs.

This tool has one pair of 6-inch hoes only—the tools that are most constantly useful throughout the season. Other tools can be added as needed.

No. 13 Double Wheel Hoe

No. 16 Planet Jr. Single Wheel Hoe

No. 17 Planet Jr. Single Wheel Hoe

FIRE FLY GARDEN PLOW, PRICE \$2.25.

THIS TOOL IS EXCEEDINGLY USEFUL to owners of

small gardens. It will throw a furrow four to six inches wide and one to three inches deep, and deeper by going twice. Furrows for manure or seeds can be opened and covered. In cultivating, plow away, weed the row and plow back again. This tool will enable a busy man to do in his spare minutes nearly all the work of a family garden. Chicken raisers find it of great advantage in plowing up their scratching yards.

Planet Jr. Garden Tools

The new "PLANET JR." Catalogue is the handsomest, best and most instructive book ever issued on a similar subject. Full of little points that bring profit. Full of true and handsome illustrations. We mail it free to any address on application.

Price, Complete, \$10.50. Weight, 53 lbs.
As a Seeder Only, \$8.50. Holds $2\frac{1}{2}$ Quarts of seed

No. 4 Planet Jr. Combined Hill and Drill Seeder, Wheel Hoe, Cultivator and Plow

This tool combines, in a single convenient implement, a capital hill-dropping seeder, a continuous row seeder, an admirable single wheel hoe, an excellent furrower, a capital wheel cultivator and a rapid and efficient wheel garden plow. In a word, with a great variety of tools, excellent in design and quality, it is without an equal for easy adjustment, lightness, strength and beauty. It is a practical, every day, time, labor and money saver.

Price \$10.00. 15-inch Steel Driving Wheel. Holds 3 Quarts of Seed. Weight, packed, 48 lbs.

A favorite among union growers, market gardeners and seedsmen.

No. 3 Planet Jr. Hill and Drill Seeder.

The hill dropping is simple and reliable; making hills either 4, 6, 8, 12 or 24 inches apart.

Changes of distance between hills may be made in less than a minute, by substituting one gauge wheel for another.

The Index.—The thickness of seed is regulated by an accurate index with brass screw indicator; it contains the names of the important seeds, and is carefully graduated both for hills and drills. In plain view at the top of handle.

STEEL HOE AND CULTIVATOR

This is our new Steel Hoe and Cultivator. It has an expanding lever with an adjustable wheel. Will find it a first class tool at low price. \$4.98.

Planet Jr. Garden Tools

We offer these tools as the highest type of their class. They have a great variety of attachments which adapt the implements to a large variety of work, and there is scarcely any work of which they are not capable.

No. 7 Planet Jr. Horse Hoe and Cultivator

7 PLANET JR. HORSE HOE AND CULTIVATOR.

Price, \$7.93. Weight, packed, 77 lbs.

No other cultivating machine is so widely known as the Planet Jr. Combined Horse Hoe and Cultivator, for it is in use throughout the civilized world. It is so strongly built as to withstand incredible strain, yet it is light and easy to handle. It opens and closes furrows, hoes right up to the plants without danger of injuring, throws dirt to or from the row and throws back from centre again.

No. 9 Planet Jr. Horse Hoe and Cultivator

NO. 9 PLANET PR. HORSE HOE AND CULTIVATOR

Price, \$7.25. Weight, packed, 70 lbs.

This admirable tool is identical with No. 7, except that it has a plain wheel instead of lever wheel. It has the high frame, patented hollow steel standards, patent Star wheel patent lever expander, and hollow steel wheel arms.

Every part is perfected to make the tool acceptable to the intelligent farmer who knows the best is always the cheapest.

Planet Jr. Twelve Tooth Harrow, Cultivator and Pulverizer

PLANET JR. TWELVE-TOOTH HARROW, CULTIVATOR AND PULVERIZER.

Complete, \$8.50. Weight, packed, 73 lbs.

Without Pulverizer, \$6.90.

Without Pulverizer or Wheel, \$5.70.

Gardeners cultivate better than formerly. It has been found to pay best. With the Twelve-Tooth Harrow you go as deep or shallow as you like, come up close to row without injuring plants, cut out all the weeds, stir the soil and mellow and fine it as with a garden rake. You widen and narrow as you pleas between 12 and 32 inches. It is a special favorite with strawberry growers, market gardeners and truckers.

Horse Hoe Plow Attachment.

THE HORSE HOE PLOW ATTACHMENT is intended particularly for the small farmer who wants a combined plow, hoe, cultivator, furrower and ridger for one horse. With this combination he can plow his ground in the spring by going twice in the furrow and then care for his crops during the whole cultivating season.

It cuts a furrow six to eight inches wide and two to four inches deep. The wheel should always be used. The plow fits Nos. 4, 7, 8 and 9 Horse Hoes and Cultivators. Price \$4.00.

The Gem Seed Potato Cutter

24 Inches

Long

8 Inches

Wide

Weight, 8 lbs.

Cutter Will Last
a Lifetime.

Can You Afford
to be
Without One

The GEM SEED POTATO CUTTER shown herewith has all the essential features necessary to a first-class tool. It will cut any size potato in pieces uniform to size, thereby insuring more accurate planting when power planter is used. The operator, to get the best results, will pick up the tuber, look for seed or blossom end, passing it over the knife on upper side of pressure lever, thus removing the cause of so many empty potato hills in your potato patch. Then according to size of potato, place it on knives so that when lever is pushed down it will be cut into either two, four or six; or if a very large one, split it and cut each half into as many pieces as its size will require. From six to eight bushels can be cut with it in an hour. The saving in time alone will more than pay for this cutter the first season it is used.

PRICE \$8.98

THE "I AM IT" CIDER MILL.

A combined Mill and Press with geared cylinder, and adjustable concave, so that grinding can be done, as desired either course or fine. It will grind apples at the rate of one-half bushel per minute. It is a Self Feed—you need not poke the apples to the grinding disc.

Insecticides and Remedies for Plant Diseases

Lemon Oil-Insecticide. This well known article is in general use all over the country for destroying Scale, Mealy Bug, Greenfly or Alphis-Ant-Thrip-Caterpillar, etc. on Rose Bushes, Palms, Rubber Plants, etc. Dilute with water 30 to 50 parts.

Half pt. 25c., pt. 40c., qt. 75c., half gal. \$1.25, gal. \$2.00

White Hellebore. An excellent remedy against currant worms, rose slugs, caterpillar, etc. Can be used either dry or in water, 15c. per lb.

Whale Oil Soap. One of the most effective agents used for destroying scale, bug, plant, lice and all other insects, injurious to vegetation.

Price 1 lb. box, 15c. 2 lb. box 25c.

Standard Fly and Germ Killer. It is a thorough disinfectant and germicide. Protects horses and cows from the torture of flies. The **Lightning Insect Exterminator No. 1** discharges the preparation in a fine, broad spray, without waste and using but very little. Fifty cows can be sprayed in a few minutes.

60c. per gallon.

Pratt's Scalecide. It will positively destroy all soft-bodied, sucking insects, including all forms of the dreadful "Scale." It is simple, cheap, easily applied and wonderfully effective. Endorsed by government experiment stations, agricultural schools and thousands of fruit growers.

Arsenate of Lead for Potato Bugs

Its great advantages are that it adheres well to the foliage and spraying does not have to be repeated, as it does not readily wash off by rain. 1 lb. 20 cent.

BUG DEATH

We want you to try this really wonderful preparation. Is absolutely harmless. Give it a square deal. You have nothing to lose, and in the light of the experience of others, just this to gain—**larger crops, better quality, more money in your pocket.**

Pat. Mar. 16 & Nov. 9, 1897

Kills all bugs and worms that chew the leaves and foliage.

Is absolute Harmless. The birds may "peck" it from the leaves, the honey-bees take it from the flowers, hens and domestic animals eat stalks, leaves and vines where BUG DEATH has been used WITHOUT any ill effects.

May be used dry or in solution.

Price 1 lb. 15c., 3 lbs. 35c., 5 lbs. 50c.,
12½ lbs. \$1.00 100 lbs. \$7.50

BORDEAUX MIXTURE OR FUNGIROID — For all fungous diseases, such as mildew and the various rots of the grape. Full directions on label. Dry, 1 lb. box 25c. 5 lb. and over at 20c. per lb., 50 lbs. for \$7.00; liquid, 1 qt. 35c., 1 gal. \$1.00.

1 lb. 10c., 3 lbs. 25c.

Sulphur, Powdered- A remedy for insects of all kinds, both by itself and in combination with other remedies. Market rates.

Hammond's Slug Shot- An insecticide for the destruction of Potato and Rose bugs, and all Lice, Worms or caterpillars upon Melons, Egg, Cucumber, Cotton, Tobacco and Cabbage plants, Tomato Currants, Fruit or Ornamental Trees, Grape Vines, Shrubs and Flowering plants. 5 lb. pkg. 30c.

Strictly Pure Paris Green-
Market price,

Double Ground Land Plaster-
Per 100 lb. bag 60c.

Sulpho Tobacco Soap 10c. & 20c.

The **ACRE-AN-HOUR SIFTER** is for applying dry insecticide with economy, being constructed in such a way that there is no wasting of material. When a small plant is to be treated, it can be regulated so that there is no surplus mixture thrown away. When large plants are treated the Sifter is opened up to any satisfactory dimension required. The work may be accomplished **as fast as a man can walk**, being easy to operate, and with care will last for years. The cost compared with others implements used for the purpose, taking in consideration the result obtained is insignificant. We can honestly recommend to you an **ARCE-AN-HOUR SIFTER**. Price 50c.

THE "**LOWELL**" BLOW POWDER SPRAYER is fitted with a Ball Valve which is positive in its action, preventing any powder being drawn back into the pump—thus insuring at all times a perfect working machine. Ad, apted to Paris Green, Slug Shot-Bug Finish, Lice Powder and all Dry Powder Disinfectants and Poisons. Aluminum finish. CAUTION:—Powder must bethoroughly dry. Price 60c,

LOWELL GRAND SPRAYER FOR LIQUID

DESCRIPTION

Tapered cylinder reservoir, 4 inch bottom, 3 inch top, 1½ inch pump cylinder, 20 inches long. Plunger rod bright steel. Plunger our special make. Two brass solution or spray tubes. One inch zinc can screw for filling. Strong and durable in construction. Each sprayer is tested for leaks and perfect spray. Capacity of tank one quart. Aluminum finish. Galv. Steel 45c.

LOWELL CONTINUOUS SPRAYER

The Lowell Continuous Sprayer, as the name implies' is so constructed that it not only sprays on the downward stroke of plunger but also when it is drawn back, thus causing a continuous mist-like sprav.

Brass Lacquered \$1.00

THE **LOWELL FOUNTAIN COMPRESSED AIR SPRAYER**. One pumping will expel entre contents of tank and is sufficient to spray 2,000 plants. Spraying nozzle may be reversed to spray under side of bushes and plants. AutomaticThumbLeverValve is at all times under complete control of operator, hence none of the solution is wasted. It saves its cost in making a given amount of compound do so much more work. An Adjustable Shouler Strap and Tree Attachment with suitable coupling for orchard and tree spraying, furnished with each machine. Aluminum finish. Capacity 3 gallons. Price \$4.98

"LIGHTNING" WHITEWASH SPRAYER

This is the only Spray Pump that will properly spray whitewash without clogging. It is constructed of heavy galvanized iron, with brass tops and valves. Large air chambers and ball valves, the pressure maintaining a continuous stream or spray not affected by the upward stroke. Can also be used for washing windows, buggies and sprinkling lawns, flowers, etc.

Poultry and Pigeon Supplies

To All Interested in Poultry Raising:

SUCCESS and profit in poultry raising require care and attention, which is as necessary here as in any other industry.

Some of the largest and most prosperous poultry plants have started on a very small scale and gradually built up to a very profitable business.

Proper feeding, with a variety of feeds, a constant supply of shell, grit, charcoal, bone, etc., together with clean, comfortable poultry houses, are necessary essentials for healthy and profitable conditions.

Notice—Prices affixed to the different varieties appended are subject to **change** without notice.

"QUEEN" Poultry Mash a Poultry Food.

The mash with many poultrymen enters largely, into the feeding plan.

The "SUN" Chick Starter A Baby Chick Food

This is the food to start chicks right. In size and in contents it is adapted to the wants of chicks for the first twenty days.

It contains the elements of growth and it is a food the chicks can digest.

50 lb. Bag at \$1.38 100 lb. Bag at \$2.50

The theory is that it is easily digested warms up the fowls system causes the blood to circulate properly and thus gives health, strength and good feeling. It is a select mixture of ground feeds made from choicest, sound, sweet, wholesome grain. It contains absolutely nothing but what is of real value and is at the same time a growing and a health food, a molting food and an egg producer.

50 lb. bag. at \$1.25 100 lb. bag at \$2.25

"CRESCENT" Chick Feed for the Growth Stage.

The Crescent Chick Feed is designed to take the little chicks where the "Starter" leaves off, at about the age of twenty days, and carry them through to the end of the eighth week.

50 lb. Bag at \$1.25
100 lb. Bag at \$2.25

SCRATCH FOOD For Grown Fowls.

Suitable at all Seasons.

A carefully selected mixed balanced ration of grains, cracked and whole seeds, etc., adapted to the vigorous growth of fowls and production of eggs. Scratching food should be scattered in the litter the first thing in the morning and at noon; late in the afternoon feed all the mash food they will clean up.

50 lb. bag at \$1.00 100 lb. bag at \$1.85.

DEVELOPING FOOD

A special food for properly maturing young chicks after they are weaned from Chick Food up to the time for feeding scratching food and laying food. Developing food is dry grain and may be fed from hoppers, but better results may be had by scattering broadcast.

50 lb. bag \$1.25. 100 lb. bag at \$2.25

LAYING FOOD.

A ground food ready for the mash made up of carefully selected materials that will greatly increase the production of eggs. The use of this food will greatly increase the profits of the poultry raiser and cannot be too highly recommended.

50 lb. bag at \$1.25 100 lb. bag at \$2.25

BEEF SCRAP.

Standard Meat Food for Poultry of all Ages.

High Protein Beef Scraps is an especially valuable meat food for poultry and gives very satisfactory results. Any kind of Beef Scraps will not answer. Poor Beef scours the birds and often injures them, when the first is used the results are uniformly good. Do not fail to buy your supply from a reliable source.

50 lb. Bag at \$1.75.

100 lb. at \$3.25

PRATT'S POULTRY FOOD

A specially prepared and highly nutritious food. Used at all the principal shows all over the world. The most successful food for all kinds of poultry.

1 lb. at 10c; 25 lb. at 7c; 100 lbs. \$5.50

MUZZY "PIGEON FEED" A SQUAB DEVELOPER

Right feeding of pigeons is considered something of a problem. Most raisers do not understand either the pigeon or its feeding as well as they do poultry. The true fancier, the man raises birds for their beauty, for the show, for the pleasure there is in it, or for sporting, finds in our Pigeon Feed a combination suited to his needs.

50c lb. Bag \$1.38

100 lb. at \$2.50

CHARCOAL.

Prepared expressly for poultry, absolutely pure, essential to health of fowls and aids to digestion. We carry three grades:

No. 2. Fine, for use on mash mixtures.

No. 1. Medium, for small chicks.

No. 0. Coarse, for fowls.

5 lbs. 15c. 10 lbs 25c. 25 lbs. 60c.

50 lb. \$1.00; 100 lbs. \$1.90.

GROUND BONE, Fine and Granulated.

Ground Bone is made from the Dry Bone and contains Phosphates, Lime and Protien and is especially valued as an egg producer.

5 lb. 25c; 10 lbs. 40c; 25 lbs. 88c; 100 lb. \$2.50.

CUT ALFALFA CLOVER.

A Poultry Food that aids digestion and assists in the assimilation of grain foods, thereby giving better results at lower cost. Among green foods, Alfalfa stands at the top. Mealed Alfalfa is a boon to poultrymen. It is used in a mash for small chicks as well as to mature fowls. If more of this meal was fed to young chicks there would be less mortality.

5 lbs. 15c. 10 lbs. 25c. 25 lbs. 80c.

10 lbs. \$1.00. 100 lbs. \$1.90.

CUT RED CLOVER.

Cut Clover has become the standard green food for winter egg production. It is used and recommended by every poultry expert and well-known practical poultryman in America.

Writers on poultry topics endorse it as a necessity, especially during the long winter months when the fowls are unable to obtain a substitute for the bulky green food which is so plentiful during the summer season in the shape of grass clover and vegetables.

5 lbs., 15c. 10 lbs. 30c. 25 lbs. 75c.

50 lbs. \$1.25. 100 lbs. \$2.25.

CRUSHED OYSTER SHELLS.

It is needless for us to enlarge on the value of oyster shells for poultry. Every poultryman realizes their importance as an egg maker and general promoter of good health.

1 lb. 1c, 5 lbs. 5c, 25 lbs. 25c, 100 lbs. 65c.

CRYSTAL GRIT.

We supply 4 sizes of Grit. No. 4 for Brooder Chicks; No. 3 for Pigeons; No. 2 for half-grown Chicks; No. 1 for Hens, Turkeys, Ducks and Geese.

1 lb. 2c, 5 lbs. 10c, 25 lbs. 35c, 100 lbs. 70c.

FOUST'S HEALTH GRIT.

1 lb. 3c, 5 lbs. 15c, 10 lbs. 30c, 25 lbs. 75c, 100 lbs. \$2.00.

SEEDS AND GRAINS.

We carry a full line of the following: Wheat, Barley, Millet, Hemp, Sunflower, Kaffir Corn, Canadian Peas, Cracked Rice, Linseed Meal, Canary Seed and Mixed Bird Seed. Buckwheat, Rye, etc.

GRIT AND SHELL BOX.

Sanitary grit and shell boxes make a material saving on grit and oyster shells, ground bone, charcoal or poultry foods. They are practical self feeding boxes made of heavy galvanized iron.

50 cents each.

Sanitary Dry Feed Box,
75c

1-2-3 POULTRY FEEDER.

For feeding Dry Mash, Scraps, Grit, Oyster Shells, Charcoal or any poultry feed. The separator can be arranged so as you can have one, two or three compartments. When used for one kind of feed take out the separator; for two kinds put separator in one end; when used for three kinds, say scraps, shells, and grit, put separator in the middle and you have three separate compartments. Price, 75c.

Caponizing Requisites.

GAPE WORM EXTRACTOR

The use of this instrument is so simple that a few moments practise will give almost all information needed. The wires being flexible, may be made smaller or larger by bending to suit any age fowl.

Full directions with each instrument.

Price, 25 cents.

PILLING FRENCH POULTRY KILLING KNIFE

Every Poultry raiser should have one of our killing knives. They are made of a finely tempered instrument steel, with nickled handle; will last a life time. Sent post-paid on receipt of 50 cents. Don't wait!

Send for it now.

RELIABLE SPRING LEVER POULTRY PUNCH

If you keep a record of your chicks, of the different breeds, hatches, strains, etc., there is no better, quicker, or easier way than by using our latest invention.

HIGH GRADE TESTED THERMOMETERS

The best incubator or brooder manufactured, is worthless unless the thermometer used there is accurate. Hundreds of hatches in incubators fail because of inferior thermometers, and large numbers of chickens are killed in brooders owing to defective or worthless thermometers.

The thermometers here listed are thoroughly tested before they are shipped.

Incubator Thermometer, each 50 cts.

Brooder Thermometers, each 40 cts.

Incubator Hygrometer

These Hygrometers should be used by every one who runs a incubator. They regulate the moisture as accurately as the heat which overcomes the trouble so many people have of chicks "dead in the shell"

Price each, \$1.50.

VEGETABLE AND ROOT CUTTER.

This handy invention is used for cutting up green food of different kinds, for poultry, sheep, and cattle. It is a practical success. It is very easy to operate, cuts rapidly. It will cut all kinds of roots, including beets, turnips, etc., also cabbage and other similar vegetables. Green food prepared can be mixed with the soft food that is fed to fowls, and and used in this way, there will be no waste

whatever. Green food is essential to the health of the fowls during the winter and insures an increased egg yield. The accompanying cut shows the Reliable Vegetable Cutter all complete, ready for operation... Price \$3.98

METALLIC EGG TESTER.

We manufacture what is probably the neatest and surest metallic egg tester on the market. It consists of a metal lamp chimney and tubular projection. Is made in two parts so the tubular projection can be removed and chimney used separately, 25c.

WIRE CHICKEN NESTS.

These nests are strongly made from heavy Japanned Steel Wire. They are intended to fasten to the wall with screw hooks, there is no room on them for

lodgment of life, vermin of any kind, easy to keep clean and far superior to wooden boxes.

Price each, 15c per dozen...\$1.50

PIGEON NESTS

Should be used by every pigeon fancier. Made of red clay, with heavy bottom to prevent upsetting. Size about 9 inches in diameter.

Price 10c each. \$1.00 per dozen.

IMPROVED CHAMPION LEG BANDS ALUMINUM.

This is a well known band, is one of the best on the market; is light and strong, being held by a double lock, is impossible to come off.

15c per dozen; 25 for 20c; 50 for 35c; 100 for 60c.

CYPHERS INCUBATORS are built to hatch and to last. With proper care—the same care you would give a valuable piece of household furniture—a standard Cyphers will last an ordinary lifetime. They are guaranteed by us to last ten years without repairs. We make this guarantee because they have lasted much longer than this—and are still doing first-class work.

The No. 0 and No. 1 size incubators are not equipped with the nursery drawers, for the reason that they are not required in these smaller-sized machines, and the drop-bottom is omitted for the same reason. These two smaller-sized machines contain all other improvements, including the new metal-cap, banded heaters, the latest-improved thermostats, the removable top diaphragms, the inclined egg trays, and the split lower diaphragms.

The No. 2, 244-egg capacity and the No. 3, 390-egg capacity, latest-pattern Standard Cyphers Incubators are furnished with two nursery drawers. The drawers occupy the nursery space underneath the egg trays and are reached through solid wooden doors, located below the glass-panel door that opens into the upper portion of the hatching chamber where the egg trays are situated.

The No. 3 size incubator are supplied with extra ventilating tubes, by means of which these large machines may be used with maximum results for hatching both hen eggs and duck eggs.

CYPHERS OUTDOOR BROODERS.

Large Illustrated Catalogue of Cyphers Incubators, Brooders, etc. Furnished on Application.

SOLE AGENTS FOR
BUCKEYE INCUBATORS

The Standard of Perfection in
 Artificial Incubation

In designing our 1913 Buckeye incubators we have not departed from the methods and principles of incubation that we have found so extraordinarily successful for twenty-two years, but we have so perfected this system that we are now hatching a large percentage of eggs that have heretofore been generally considered as unhatchable.

For twenty-two years our aim has been to build a perfect hatching device that could be depended upon to produce the same uniform results regardless of surrounding conditions—and so simple that it could be operated with the same degree of success by the beginner as it would produce in the hands of an experienced poultry raiser.
