EVERGREEN TREES AND SHRUBS

I invite particular attention to my large blocks of Arbor Vitae, White Pine, Retinospora, and to my collection of Thujas.

In addition to our plan of root pruning and transplanting, most of our evergreens are sheared yearly with the effect of producing dense, perfect specimens.

All evergreens sold at 50c. or more will be dug with ball of earth and the roots of each burlapped separately.

HARDY HERBACEOUS PERENNIALS

I have a special contract with one of the most careful growers in the country, permitting me to make very favorable prices upon a large assortment. Quotations cheerfully furnished. Send a list of wants for estimates.

All of my Evergreens are transplanted at frequent intervals, and in addition are re-janned yearly in August.

It is my custom to give ample room in the Nursery rows to allow for the development of such individual trees, so that nearly all of my stock can be best described as "specimens."

An increasing trade is showing its appreciation of nursery service, courteous treatment, and choice stock carefully handled.
