THORBURN'S
1913 BULBS ESTABLISHED
1802

Grass Seed for Autumn Sowing

Autumn sowing is recommended from the latter part of August to the middle of September, so that the young grass may become well rooted before winter sets in.

The Thorburn Lawn Grass

Many of the finest lawns in America were produced from this mixture. It is composed of permanent grasses that make a finer and thicker turf the older they become, and yet give a rich greensward in three or four weeks from the time of sowing. (The ordinary Central Park Lawn Grass Seed as usually sold is not to be compared with this superior mixture.) It should be sown at the rate of 4 to 5 bushels to the acre. Per pt. 15 cts., qt. 25 cts., 2 qts. 45 cts., $\frac{1}{2}$ pk. 75 cts., pk. \$1.20, bus. of 15 lbs. \$4.

Thorburn's Grass Mixture for Shady Spots on Lawns

A mixture of grasses that thrive in shaded situations under trees, or close to walks where there is little sun. Per qt. 40 cts., 2 qts. 70 cts., $\frac{1}{2}$ pk. \$1.25, pk. \$2, bus. of 22 lbs. \$7.

Thorburn's Grass Mixture for Terraces

A mixture of fine stoloniferous grasses peculiarly adapted to terraces. Per qt. 35 cts., 2 qts. 60 cts., $\frac{1}{2}$ pk. \$1, pk. \$1.75, bus. of 20 lbs. \$6.

Also Permanent Grass Seed for Golf-Links, Tennis-Courts, Polo-Grounds, etc.

We have devoted much attention to the seeding and preservation of golf-links, tennis-courts and polo-grounds, and offer the following mixtures, which have been used on most of the finest links, etc., in this country with very satisfactory results.

Tennis-Court Mixture

A mixture of extra-fine grasses peculiarly adapted to tennis-courts. This mixture will make a firm, green and lasting turf of the finest texture, that will improve with trampling. Per qt. 35 cts., 2 qts. 60 cts., $\frac{1}{2}$ pk. \$1, pk. \$1.75, bus. of 20 lbs. \$6.

Grass Mixture for Railroad Banks, etc.

A mixture of grasses with long, interlacing, matting roots that will bind steep embankments, gravelly or sandy slopes, etc., preventing washouts by rain-storms and covering them with permanently green turf. Per qt. 30 cts., 2 qts. 50 cts., $\frac{1}{2}$ pk. 80 cts., pk. \$1.25, bus. of 18 lbs. \$4.50.

Thorburn's Special Lawn Grass Mixture

This extra-choice mixture contains a large proportion of the finer and more expensive species, such as Rhode Island Bent, Crested Dog's-Tail, Creeping Bent, in extra-heavy samples, bringing the weight up to 20 lbs. per bushel, and producing a turf of the closest and finest texture possible. Per qt. 30 cts., 2 qts. 55 cts., $\frac{1}{2}$ pk. 90 cts., pk. \$1.60, bus. of 20 lbs. \$5.50.

Thorburn's Lawn-Restoring Grass Seed

A mixture of grasses that will take firm hold and grow quickly on hard, worn-out or burned spots. Some **Lawn-restoring Grass Seed** should be sown before every summer rain on thin places. Per qt. 35c., 2 qts. 60c., $\frac{1}{2}$ pk. \$1, pk. \$1.75, bus. of 20 lbs. \$6.

Thorburn's Lawn Grass for the South

A mixture of grasses that stand extremes of heat and drought, and that are, therefore, peculiarly adapted to southern lawns. Per qt. 35 cts., 2 qts. 60 cts., $\frac{1}{2}$ pk. \$1, pk. \$1.75, bus. of 20 lbs. \$6.50.

Fair-Green or Golf-Links Mixture

For the grounds in general. Per bus. of 20 lbs. \$4.

Putting-Green Mixture

A mixture of extra-fine grasses that will make a close firm, green and lasting turf, which will improve with trampling. Per qt. 40 cts., 2 qts. 70 cts., $\frac{1}{2}$ pk. \$1.25, pk. \$2, bus. of 24 lbs. \$7.

Polo-Grounds Mixture

A mixture of fine-leaved and deep-rooting grasses, forming a strong and lasting turf that will stand hard usage. Per bus. of 20 lbs. \$4.

J. M. THORBURN & Co.

Catalogue of Bulbs and Flowering Roots for Fall Planting

MANY of our most beautiful flowers are produced from bulbs, and they may be grown indoors in the winter months, when flowers are most appreciated. By successive plantings a constant supply of blooms can be had from December until May. The finest outdoor displays of the early spring months are also from bulbs planted in the autumn. The cultural directions found under the respective headings are worthy of careful attention.

Our bulbs are all selected, coming from the best growers, and should not be confounded with the cheap "case" bulbs sent to this country on speculation, and often sold at auction and otherwise, at very low prices.

NAME AND ADDRESS. *We often receive orders with either the name or the address of the sender omitted. As we can do nothing with such orders, the customer thinks his order is being neglected. We therefore beg our correspondents to be careful to write on each order their name and full address.*

ORDERS should be sent as soon as possible after receipt of this Catalogue. *The bulbs will be shipped in proper time for planting. They are ready from August to November, according to the time of ripening and the country from which they come. Orders received earliest are surest of being filled in full. If left too late, the supply of some of the varieties may be exhausted.*

The prices quoted do *not* include transportation charges, which are extra. In stipulating amounts to be sent for postage, it is understood to apply to the United States only.

Please address all orders and remittances to

Hyacinths **THESE BULBS ARE READY FOR DELIVERY IN SEPTEMBER**

The *Hyacinth* is one of the most popular and beautiful spring-flowering plants for indoor and outdoor decoration. By careful management in keeping up a succession, it may be had in flower from the beginning of winter to the end of May. For a spring display in the open ground it is unexcelled. Brilliant effects can be obtained by massing different colors in varieties that grow about the same height, and bloom at the same time. We furnish very large numbers for this purpose to public parks and cemeteries, and we shall be pleased to recommend to anyone suitable sorts, when desired.

OUTSIDE CULTURE. In this section, October is the month to plant *Hyacinths* outside. They succeed best in a light soil and a sunny situation. If the soil is naturally heavy, some sand should be mixed with it, and if the beds have been occupied with other plants throughout the summer, some well-rotted cow manure should be added. The soil should be well dug to a depth of 14 inches, and raised from 2 to 4 inches above the level of the walk. The bulbs should be planted evenly, about 6 inches deep to the bottom of the bulb, and from 6 to 7 inches apart; if planted at uneven depths they will not bloom at the same time, but irregularly. Care must be taken not to press the earth too firmly around and over the bulbs. Some successful gardeners follow the plan of setting each bulb in a handful of clean sand, which insures proper drainage. After the ground has been frozen in early winter, cover with a few inches of dry litter, evergreen boughs or coarse manure. If this covering be applied before freezing weather, it renders the bulbs liable to the predations of field-mice which may burrow in it.

CULTURE IN POTS. For growing in pots, large, selected, named varieties should be used. They should be potted singly in 5-inch or 6-inch pots. Three bulbs in a 7-inch pot are very effective. The best potting compost is fibrous loam and manure in about equal parts, with some river sand intermixed. The pots should be filled lightly, and the bulb pressed into the soil so that its base is firmly fixed. About one-third of the bulb should remain above the soil. The pots should then be buried in the open ground to the depth of 6 inches, and left there for five or six weeks, until they are well filled with roots. They may then be taken into the house, where the warmth will soon bring them into flower. Where a succession is desired, it is best to pot at intervals from September till the end of November. Plenty of water should be applied, and manure-water is beneficial after the flower-spikes appear.

CULTURE IN GLASSES. Single varieties are better adapted for culture in glasses than double ones. The bulb should be placed so that the base is just in contact with the water. Soft rain-water should be used, and a little charcoal might be placed in it to keep it pure. The glasses should be kept in a cool, dark closet for ten or twelve days, until roots are formed, and then exposed to the light and air as much as possible. Do not place them near gaslight. In very cold weather the glasses should be removed from the window, as the bulbs cannot stand frost. The water should never be allowed to freeze, and it should be changed every two or three days.

Persons unacquainted with the different varieties will do well to leave the selection to us, only specifying in their order whether bulbs are wanted for pot, glass or garden culture.

We invite special attention to the assortments of Named *Hyacinths* of our selection offered on page 4, and to the *Hyacinth Glasses* which are quoted at the end of the Catalogue.

The names of our *Hyacinths* and *Tulips* are those given to them by the originators in Holland, and they are not sold under fancy names manufactured in this country.

Select Named Dutch Hyacinths

N. B. Our Select Named Hyacinths are the cream of the Holland Nurseries—and are called top-roots—under their original names. For forcing in pots or for outdoor beds they far surpass the class of Bulbs usually sold.

The single-flowered varieties are generally more effective and better for forcing than the double ones. They also, as a rule, succeed better in glasses. The double varieties are distinguished by an asterisk (*) and those of them that do well for forcing in water by two asterisks (**).

Mixed Dutch Hyacinths in Separate Colors**LARGEST BULBS. SUITABLE EITHER FOR FORCING OR BEDDING**

Our Mixed Hyacinths should not be confounded with the small-sized, low-priced mixtures often sold. Our bulbs are all of the largest size. Being furnished in so many separate colors, splendid bedding effects may be produced with them. They are also admirably adapted for forcing in the greenhouse for winter cut-flowers.

Italian Hyacinths

Grown largely by florists for cutting. The flowers are single, very graceful and fragrant, and produced abundantly. They are hardier than the Romans, and may be planted outside in the fall for flowers for early spring cutting.

French Roman Hyacinths

Extensively used by florists for forcing cut-flowers. For this purpose they are the best and most popular of bulbs. The flowers are delightfully fragrant, and each bulb will throw up from three to four spikes. For forcing, three or four bulbs are generally planted in a suitable pot, in good soil (as recommended for other varieties). The pots must be kept in a cool and dark place until they fill with roots, when the flower-spikes can be rapidly developed by exposure to light and moderate heat. They are very easily grown and extremely early, and by making successive plantings they may be had in flower all through the winter. The blue Roman Hyacinths flower from one to two weeks later than the white variety.

Miniature Hyacinths

These are also known as “Dutch Roman” and “Pan Hyacinths.” They are very suitable for growing in groups in pots or earthen pans. We offer them in separate colors, and also mixed, as follows:

Pure White, Bright Red, Light Blue and Dark Blue. 5 cts. each, 40 cts. per doz., \$2.50 per 100.

Mixed Colors. 5 cts. each, 40 cts. per doz., \$2.50 per 100.

If ordered by mail, add 10 cts. per dozen, or 50 cts. per 100 for postage

French Roman Hyacinths

Tulips

READY FOR DELIVERY IN SEPTEMBER

For beauty of form and brilliancy of coloring, Tulips are unequalled. For bedding they are the most popular and effective of all hardy bulbous plants. In our descriptions we give the color and average height to which they grow, so that purchasers may select suitable sorts for forming display beds in design. The most gorgeous effects can be produced by harmonious massing of contrasting colors. For pot culture and forcing for winter cut-flowers they are also invaluable.

CULTURE.—The cultural directions given for hyacinths, on page 2, are equally applicable to Tulips, except that the bulbs, being smaller, must not be planted quite so deep. Four inches to the bottom of the bulb is deep enough, and a distance of 5 or 6 inches between the bulbs is sufficient. They may be planted in October and November before the ground freezes. A little sand around each bulb is generally recommended, but in light, sandy soil this may be dispensed with. For pot culture, a compost of two parts loam to one part light manure, with some sand intermixed, is suitable. From three to five bulbs, according to size, in a 5-inch pot, are very effective. The pots should be buried until the bulbs are well rooted, in the manner recommended for hyacinths. Most of the varieties named below are equally well adapted for pot culture or the open ground.

Parrot Tulips

Six of a kind at dozen rate, 25 of a kind at 100 rate

For outdoor cultivation. The petals of these have feathered edges, and, in addition to other colors, combine shades of green—a peculiarity confined to this class. The flowers are very singular and picturesque, of large size and brilliant colors, and form very effective groups for the flower-border. To get the best results they must have the full effect of the sun. *Very late flowering.*

If ordered by mail, add 6 cts. per dozen or 35 cts. per 100 for postage

Narcissus

NARCISSUS ARE READY FOR DELIVERY IN SEPTEMBER

Narcissus are among the most popular and largely grown of spring-flowering bulbs, and deservedly, too. Their exquisite grace, beauty and charm of habit have been immortalized in the poetry of all times. No garden should be without them.

They are all of the easiest cultivation, thriving in almost any soil and situation, and they may be left alone for several years after once being planted. They do best, however, in a deep and somewhat stiff soil, and in a partially shaded position. They are well adapted for planting by the sides of streams, lakes or ponds, and in mixed flower or shrubbery borders. They are also suitable for naturalizing in the grass, by the side of woodland walks, or in open spaces between trees and shrubs.

For growing in pots they require about the same treatment as hyacinths, three or four bulbs in a 5-inch pot. Some of the varieties are grown in large numbers by florists for winter cut-flowers. With the exception of the Polyanthus section, they are all perfectly hardy.

Single Narcissus, or Daffodils

If ordered by mail, add 12 cts. per dozen or 45 cts. per 100 for postage

Jonquils

Lilium Harrisii

Lilies

For stateliness of habit, beauty of form and variety of coloring, the Lily is without a rival among bulbous plants. Many of the species are delightfully fragrant. Though they may nearly all be called hardy, it is well to protect them against frost in winter by a covering of ashes or litter. They are easily grown and require little care. With the exception of *L. candidum* and *L. tigrinum*, which prefer a deep, rich loam, they all do best in a light, well-drained soil. Some peat or leaf-mold may be used to advantage. *L. auratum* cannot bear manure but thrives in ordinary light soil. They all prefer a partial shade, and the taller sorts must have protection from high winds. Many of the stronger-growing kinds are well adapted for planting among shrubs. Most of them make splendid conservatory plants. For pot culture, a compost of loam and peat in equal parts, with the addition of some sand, is recommended.

Lilium Harrisii and Lilium candidum ready in August; others not until November.

Lilium Harrisii (Bermuda Easter Lily) BULBS NOW READY

The Bermuda Easter Lily is perhaps the finest and most popular of winter-blooming plants. The large, handsome, pure white, trumpet-shaped flowers are very sweet-scented and of great substance, lasting a long time after cutting. Its stately and graceful habit renders it a perfect pot-plant for table or window decoration. It gets its popular name from the fact that it is so largely used for church decoration at Easter. It is easily grown and can be forced into flower in a remarkably short time. It requires rich soil but without manure. It is also well adapted to garden culture, but in this latitude the bulbs should have a good covering of ashes or litter to protect them over winter.

If ordered by mail, add from 10 to 20 cts. per dozen for postage, according to size

Lillium auratum

Lily-of-the-Valley

tirely and place in a sunny window in a cool room. **10 cts. each, \$1 per doz.**

Lily-of-the-Valley

(*Convallaria majalis*)

READY IN NOVEMBER AND DECEMBER

One of the most beautiful and admired spring-flowering plants, and universally sought for its neat and chaste outline and delicate odor. The growth is close, dwarf, and compact, and the plant is hardy and permanent. It is now a most popular plant for forcing, which is easily done by planting the pips in pots, from 6 to 12 in. each, watering freely, keeping in a cold cellar, and starting from week to week, to keep up a succession. They generally flower in three or four weeks after planting. They require a considerable amount of heat to start them. They may also be planted in moss fiber in vases.

Clumps. Fine, large clumps, with many flowering pips on each. Fine for planting outside in shaded positions and for naturalizing by the side of streams or wood walks. 30 cts. each, \$3 per doz., \$20 per 100.

Pips for Forcing. 50 cts. per bundle of 25, \$1.75 per 100, \$15 per 1,000.

Above prices do not include cost of transportation

Chinese Sacred Lily

(The Water Fairy Flower)

READY IN SEPTEMBER

If ordered by mail, add 5 cts. each, or 25 cts. per doz. for postage

A variety of the Polyanthus Narcissus, imported from China. The bulbs should be placed from three to six in a bowl or glass dish of water which has been partly filled with pebbles, some of which place over the bulbs so as to prevent them from floating. The water should be tepid and changed every two days. Submerge the bulbs entirely

Amaryllis READY IN OCTOBER

Cost of transportation not included in prices quoted

Extremely ornamental greenhouse plants, with large, fragrant, beautiful colored flowers. The most suitable soil is good loam, with one-fourth part of leaf-mold, or pulverized manure, and some sand. Good drainage is very important. The growing season is from early spring until about September, when the plants should be kept cool and allowed to rest until February. They require plenty of sunshine, but in the flowering season a light shading tends to preserve the blossoms longer. Frequent disturbance of the roots is to be avoided. Established bulbs in large pots should have a top-dressing each year when starting, and manure-water during the growing season.

Belladonna major. Violet and white; flowers in large umbels; fragrant. 20c. ea., \$2 per doz.

Josephine (Gigantea). Very fine scarlet; flowering in immense umbels; these are extra-sized bulbs. \$5 each.

Lady of the Palace. Brilliant red, changing at the center to green tinted white. 75 cts. each, \$7.50 per doz.

Lutea (Sternbergia). Hardy, autumn-flowering; bright yellow, crocus-like flowers. 10 cts. each, \$1 per doz., \$4 per 100.

Hippeastrum Johnsonii (Spice Lily). Beautiful flowers; crimson, striped white; large bulbs. 60 cts. each, \$6 per doz.

Hippeastrum, Mixed Hybrids. 60 cts. each, \$6 per doz.

Hippeastrum, Empress of India Seedlings, 70 cts. each, \$7 per doz.

Vallota purpurea (Scarborough Lily). 25 cts. each, \$2.50 per doz.

Anemone, or Windflower

Very ornamental hardy perennials, producing beautifully colored flowers in spring and summer. They do best in rich soil and in a sheltered and well-drained position. Plant in autumn. May also be grown in pots or forced in frames for early flowers.

If ordered by mail, add 15 cts. per 100 for postage

Brodiaea READY IN SEPTEMBER

If ordered by mail, add 3 cts. per doz., or 15c. per 100 for postage

Pretty bulbous plants from the Pacific Coast. They have narrow, grassy leaves, slender stems and umbels of lily-like flowers. For forcing or outdoor culture. Do best in rich, sandy loam. If grown in pots, a compost of loam, leaf-mold and sand is best. All are hardy except Coccinea, which should have some protection and partial shade.

	Each	Doz.	100
Coccinea (Floral Firecracker). Rich blood-crimson, tipped white.....	\$0 07	\$0 60	\$3 50

“ All Sorts	05	35	2 00

Crocus

Crocus

For pots and borders. A universal favorite, being one of the earliest flowers seen in the spring. They are neat, dwarf and compact in growth, and the blooms are of bright colors. If planted closely—say 2 inches apart—and 3 inches deep, they make a very pretty display immediately after the snow goes off in the spring. Do not disturb for several years. Should be largely planted in the grass on lawns. They will flower very early in spring before mowing. The effect is beautiful. For flowering in pots, baskets, etc., they should be plunged in the open ground for three weeks after planting, precisely in the same manner as directed for hyacinths.

If ordered by mail, add 3c. per doz., or 15c. per 100 for postage

	Doz.	100	1,000

Not less than one dozen of a sort sold

Hybrid Named Crocus

Remarkable for richness of color and immense size. These varieties are best for forming letters or designs on lawns, for which purpose they may be planted without disturbing the grass, by the use of a dibble or narrow trowel. Flowers are produced very early and, mowing later on will not seriously injure the bulbs.

If ordered by mail, add 5 cts. per dozen, or 25 cts. per 100 for postage

Crown Imperials

(*Fritillaria imperialis*)

READY IN SEPTEMBER

A stately growing plant, with dark green foliage and flowers of all intermediate shades between yellow and crimson; effective for centers of beds; hardy and permanent, and not so generally planted as they should be. Their flowers are produced quite early in spring and are very ornamental and decorative in the center of a bed of other bulbous plants. The old, dull red variety, while handsome, does not give anything like the effect that the newer sorts do. The double varieties are especially conspicuous and desirable in every respect. They are all the better for being planted in good, rich, well-drained soil; the flowers will be larger and of finer coloring, as well as more enduring.

If ordered by mail, add 3 cts. each for postage

	Each	Doz.
Aurora. Red.....	\$0 20	\$2 00
Crown on Crown. Red.....	20	2 00
Single Red.	15	1 50

Maximus, Red.	40	4 00
Fine Mixed Varieties. per 100, \$10...	15	1 50

Crown Imperial

Crinum

Splendid, large-flowering bulbs, closely allied to the amaryllis. The most suitable soil is a compost of turfy loam, cow-manure and some sand. They should be grown in large pots or tubs, about three-fourths of the bulb being out of the soil. In late fall they should be removed to a coolhouse and allowed to rest until new leaves begin to appear in February. The bulbs should receive a top-dressing each year when starting, and manure-water during the growing season. They may be placed outside when warm weather begins, and will flower all through the summer, making splendid lawn or veranda plants.

	Each	Doz.
Giganteum, Giant White. Immense bulbs; large white flowers; bloom all summer; very fragrant. Water plentifully while growing.....		\$2 00
Amabile, Giant Pink. Extra-large, bright pink, with white stripe; splendid flower; enormous bulbs. This and the Giant White are unsurpassed for growing in tubs, blooming profusely outside all summer.....		2 00
Kirkii. Large umbels of beautiful pure white flowers, with purple stripe in center of each petal.....		75
Powellii. It produces long stems, bearing at the top five to eight large, dark rose, bell-shaped flowers 3 to 4 inches long.....		25
Powellii album. Pure white.....		50

Above prices do not include transportation charges

Cyclamen

MOST OF THEM READY IN NOVEMBER

When well grown, it is difficult to find a more useful plant than this for greenhouse, room and window decorations. The various species produce flowers varying from deep red to pure white and of much elegance of form in flower and plant. The soil best suited to them is a fresh, turfy loam, with a fourth to a fifth of well-rotted horse manure, to which add some clean sand if the soil is heavy. Plant so as to leave the top of the bulb just below the surface. Given the proper conditions the Cyclamen is remarkably easy to grow. (We offer seed of our superb strain of *C. giganteum* at the end of this catalogue.)

If ordered by mail, add 8 cts. per dozen or postage

	Each	Doz.
Coum. Crimson; round-leaved.....	\$0 15	\$1 50

Eremurus READY IN SEPTEMBER

Noble bulbous plants from northern India. They thrive admirably in deep, rich, sandy loam with the addition of well-decayed cow manure. They need plenty of water in the flowering period, but require good drainage. When well established they should not be disturbed, as the roots are extremely brittle. The surface soil above the roots should be kept clean by hand-weeding and enriched by occasional applications of old manure, leaf-mold and a little sand well mixed. Autumn planting is desirable, and the crown should be covered with a mound of ashes over winter, or with a box with a water-tight top and filled with dry leaves. Protect the stems from frost when coming into flower in spring.

	Each	Doz.
Himalaicus. Beautiful white flowers on racemes 4 to 8 feet high. Blooms in May and June.....	\$0 85	8 50
Robustus. Rosy lilac flowers on racemes 6 to 10 feet high, flowering in June.....	1	10
Mixed Seedlings. White, Cream, and Rose.....		50

Erythronium (*Dog's-Tooth Violets*)

READY IN SEPTEMBER

Very ornamental, hardy, bulbous plants of neat and dwarf habit. They succeed in almost any light soil, but prefer a mixture of loam and peat. They should be planted in groups, and do well in a sheltered position on rockeries, or in mixed flower or shrubbery borders.

If ordered by mail, add 3 cts. per dozen or 15 cts. per 100 for postage

Fritillaria imperialis. See Crown Imperials, page 17.

Gladioli primulinus hybrids (see page 19)

Freesia

The justly popular Freesias are greatly prized for the delightful fragrance of their delicately colored flowers, which, when cut, will remain in good condition for a long time in water. They are easily grown or forced in good, loamy soil, with an admixture of leaf-mold and sand, in a frame or greenhouse, and are excellent for window culture in winter. For the information of all not acquainted with these bulbs, we may say that they are quite small, but produce large blooms in comparison to their size.

If ordered by mail, add 3 cts. per dozen, or 15 cts. per 100 for postage

Freesia refracta alba. The body of the flower is a pure white, with lower segments spotted lemon-yellow. Their fragrance is remarkable and very lasting.

Mammoth-size bulbs. 35 cts. per doz., \$2 per 100, \$15 per 1,000.

First-size bulbs. 25 cts. per doz., \$1.50 per 100, and \$12 per 1,000.

Second-size Bulbs. 20 cts. per doz., \$1.25 per 100, \$9 per 1,000.

Freesia, "Purity." Magnificent, glistening pure white flowers of large size, borne on strong lengthy stems, each truss bearing eight to ten buds, five to six of which are frequently open at the same time. 35 cts. per doz., \$2 per 100, \$15 per 1,000.

Freesia refracta, Red. 25 cts. per doz., \$1.50 per 100, \$12 per 1,000.

Freesia Leichtlinii major. Creamy white, shading to yellow, with orange blotch; distinct. 40 cts. per doz., \$2.25 per 100.

COPYRIGHT 1903 BY J. M. THORBURN & CO.

Gladiolus

READY IN NOVEMBER

The following varieties are the sorts generally to be had at this season of the year, and they are usually planted in pots in autumn, and require to be kept in a warm room or greenhouse. Some varieties are successfully forced.

The Primulinus Hybrids, for spring planting, will be in by November. These form a family of bulbs of rare beauty and of most exquisite tints and shades; and, from the time of year during which these bloom, and the long continuance of their flowers in perfection, they become one of the greatest ornaments of the garden at a season when flowers of vivid tints are scarce. They are valuable for bedding.

Named varieties will be found in our General Catalogue, published January 1.

If ordered by mail, add 5 cts. per dozen, or 30 cts. per 100 for postage

Gloxinias

READY IN NOVEMBER

Gloxinias are among the most beautiful of greenhouse plants, being remarkable for the intensity and variety of their colorings and the exquisite manner in which they are often blotched, mottled, penciled and blended. The plants are extremely floriferous, and, by making successive pottings, they may be had in bloom the greater part of the year. They thrive best in a soil composed of leaf-mold and peat in equal parts, with a little sand added. When growing, plenty of water should be supplied, but it should always be tepid. The bulbs we offer are large, and of erect-flowering strain:

Planting of Japan Iris

Iris (*Fleur-de-lis*)

READY IN OCTOBER AND NOVEMBER, EXCEPT JAPAN IRIS, WHICH WILL NOT BE READY UNTIL JANUARY AND INTO SPRING

Iris, the Greek name for the rainbow, was applied to this flower in allusion to the manner in which many beautiful colors are blended together. Irises are of easy culture. They do best in a light, rich, sandy soil, and in a sunny situation. With the exception of *Moræa Pavonia*, all varieties are hardy. Good drainage is important. The varieties of *Iris Kämpferi*, from Japan, are remarkable for the beauty of their colors and their stateliness of habit. Some of these send up 10 to 12 flower-spikes 3 feet high, each bearing 2 to 4 enormous blossoms measuring 8 to 10 inches across. These require a liberal supply of water when growing.

Superb Collection of Large-Flowered Japan Iris (Iris Kämpferi)

READY IN JANUARY AND INTO SPRING

We are importing from Japan a large supply of the following twenty of the best of these magnificent Irises, which excel in size, perfection of form and richness of color. These are most valuable for cut-flowers and table decoration—as handsome as orchids. Flowers should be cut in the early morning or after sunset. The roots come in large clumps. *The descriptions given are those furnished us by the growers in Japan.* May be ordered by numbers.

25 cts. each, \$2.50 per doz., \$16 per 100. Transportation charges extra

13 Boteki-no-Koe. Pure white, heavily veined lavender, with pale primrose blotches; standards wine-color, lighter toward edges, stigmas lavender. Three large petals. Striking. 26 Date-dogu. Rich claret-red, yellow blotches. Three petals. 89 Fuyoho. Large; pure white, yellow blotches; three very large petals. 31 Gei-Sho-Ui. Claret-red, veined white; standards shaded lavender, darker toward the edges, yellow blotches.	4 Ho-o-jo (Ho-o-castle). Ruby-crimson, primrose blotches; standards white and lavender. 37 Katsuraotoko. White, veined lavender; standards white, suffused with lavender, darker toward the edges, pale yellow blotches. Six petals. 15 Momiji-no-Taki. Ruby-red, yellow blotches; standards white, spotted toward edges pale wine-color. Six petals. 30 Noboro-Ryu. Intense Tyrian blue, with yellow blotches; standards white, edged violet.

Large-Flowered Japan Iris, continued

- 9 **Ran.** Royal purple, edged lavender, with large primrose blotches; standards wine-red, white at base. Six petals; large and distinct.
- 34 **Sassa-no-Koe.** White, veined wine-red and blotched yellow; standards lavender, running to purple at edges. Three petals.
- 20 **Senjo-To.** Light wine-color, spotted and shaded to dark red toward the edges of the petals, suffused with white, yellow blotches; standards shading to purple.
- 40 **Shiguremomiji.** Blush-pink, darker toward edges, splashed wine-red; stigmas lavender, primrose blotches. Three petals.
- 21 **Shikainami.** Light blue, shading to dark blue edges, white-veined, yellow blotches; standards shaded lavender, with dark edges. Six petals.
- 6 **Shippo** (Cloisone). Rich Tyrian blue, edged purple and veined white, yellow blotches; standards white and wine-color. Large flowers.
- 14 **Shiraga.** Deep purple, heavily veined white; standards lavender, darker toward edges, yellow blotches. Large flowers. Six petals.
- 17 **Suibijin.** Claret-red, darker toward edges; standards white, veined and edged pale wine-color; stigmas wine-color; three petals.
- 44 **Ujigawa.** Rich, vinous purple; standards blush-pink; stigmas lavender, radiating to purple edges, canary-yellow blotches. Three immense petals.
- 50 **Ushio-no-Iro.** Violet, veined white; standards white, edged sky-blue, yellow blotches. Seven or 8 petals.
- 7 **Yamato-Nishiki.** Pale lavender, running to purple on outside of petals, blotched and flaked dark purple, large primrose blotches. Immense flower. Three petals.
- 8 **Yodokuruma.** Pale wine-color, veined darker, large, orange blotches; standards very erect. Gigantic blooms. Three petals.

Spanish Iris (Iris Hispanica)

Not less than one dozen of a kind at dozen rate

Very profitable for florists, who are planting them largely for cut-flowers. Plant in beds in the open as soon as received in the autumn, and protect during the winter months. In the beginning of April cover the beds with glass, so as to have the flowers ready for cutting in May.

If ordered by mail, add 5 cts. per dozen, or 30 cts. per 100 for postage

Ixias READY IN OCTOBER

The Named Hybrid Ixias are so beautiful and rich in tints that no lover of flowers should be without them. They are equally adapted for pots or the open ground, exceedingly free-flowering, and invaluable for cutting. If planted out, they require rather more covering during winter than hyacinths. In pots their culture is the same as that usually recommended for other bulbs. By reason of their curious forms and strange coloring, the Ixias attract much attention.

If ordered by mail, add 3 cts. per dozen, or 15 cts. per 100 for postage

	Each	Doz.	100
Ambassador. Carmine-violet.....	3 for 10c...	\$0 30	\$1 50

Lachenalia READY IN SEPTEMBER

Very pretty, spring-flowering, greenhouse bulbous plants of elegant habit and with brightly colored flowers. They should be grown in pots, four to six bulbs in a 5-inch pot, in a compost of two parts loam, two parts leaf-mold and one part each of peat, sand and well-rotted cow manure. Apply but little water until growth is somewhat advanced, but give more freely as the foliage develops; give them plenty of light and air and keep near the glass to insure sturdy growth. Lachenalias are also excellent subjects for hanging baskets.

If ordered by mail, add 5 cts. per dozen for postage

	Each	Doz.
Luteola. Pale yellow flowers flushed with green.....	\$0 20	\$2 00
Nelsoni. Rich golden yellow; very fine.....	40	4 00
Pendula. Very handsome, large and showy species, with broad foliage and rich red flowers tipped with black.....	30	3 00
Quadricolor. Bright green, red and yellow flowers.....	30	3 00
Tricolor. Red, yellow and green.....	40	4 00

Montbretia READY IN NOVEMBER

Hardy, summer-flowering bulbous plants that are becoming more popular every year. Their brightly colored flowers are borne on long, graceful spikes in the greatest profusion, and they are most valuable for cutting and general decorative purposes. They should be planted in groups and left undisturbed. Ordinary garden soil and a sunny position suit them. The following are the handsomest and most distinct varieties.

If ordered by mail, add 5 cts. per dozen, or 30 cts. per 100 for postage

	Each	Doz.	100

Muscari

Commonly called Grape, Nutmeg, Feathered, etc., Hyacinths

Very pretty hardy bulbous plants, well adapted for mixed borders and for naturalizing in sunny spots among short grass. They succeed in almost any soil and situation and require little care. Also suitable for growing in pots in the house, five or six bulbs in a pot.

If ordered by mail, add 5 cts. per dozen, or 30 cts. per 100 for postage

Nerine READY IN OCTOBER AND NOVEMBER

Very beautiful greenhouse bulbous plants succeeding best in pots in light soil—say a compost of loam, leaf-mold and sand. Frequent repotting is not advisable, but an annual top-dressing of new soil before the flowering season is recommended. During the growing season they succeed best in a frame with some bottom heat. After the leaves die, they should be kept quite dry in a cool place until they begin to grow again.

If ordered by mail, add 4 cts. each for postage

	Each
Flexuosa. Bright crimson-scarlet, tinged with orange.....	\$1 50
Fothergilli major. A magnificent plant for house or conservatory. Intense shining scarlet. By artificial light the crystalline cells of the petals sparkle like jewels. Flowers freely.....	1 50
Sarniensis (True Guernsey Lily). Flowers brilliant crimson, in large clusters. The best-known sort.....	50
Undulata. Rosy carmine, edged white; very handsome.....	90

Oxalis READY IN SEPTEMBER

A very pleasing class of small bulbs, producing vast quantities of brilliant flowers during the autumn and winter months; they are especially desirable for planting in hanging baskets. They are easily grown in a sandy soil, seven or eight bulbs in a 4- or 5-inch pot. Pot in September, and remove indoors early in October; keep in moderate temperature.

If ordered by mail, add 3 cts. per dozen, or 15 cts. per 100 for postage

Muscari

Oxalis, continued

	Each	Doz.	100

Paeonies

 READY IN OCTOBER

The old-fashioned double Paeonies are too well known to require description. Their popularity is due to their great merits—their easy culture, the handsome appearance of the plant, and the brilliant and striking effect of their massive, finely formed, richly colored flowers. Among hardy herbaceous perennials, the Chinese Paeonies rank about first for lawn or flower-border or shrubbery decoration. They are all hardy. We offer only strong, flowering roots, **with not less than three eyes.**

If ordered by mail, add 5 cts. each for postage

Herbaceous Chinese Paeonies, continued

Ranunculus READY IN SEPTEMBER

The main soil for these should be loam or clay, with a good dressing of rotted manure and leaf-mold; if heavy, add a little sand. The soil should be well drained, cool, deep, rich and moist. Plant late in the autumn, claws downward, from 4 to 6 inches apart and 3 inches deep, covering with fine, pulverized soil.

If ordered by mail, add 3 cts. per dozen or 15 cts. per 100 for postage

Richardia (Calla)

READY IN OCTOBER AND NOVEMBER

Tall-growing, bulbous perennials of graceful habit, and handsome foliage and flowers. They are easily cultivated in pots, requiring only rich soil and plenty of water. A compost of one part good loam and one part cow-manure is recommended. It is a good plan to plant them out in the garden each summer, in rich, well-manured soil, giving them plenty of water, taking them up and carefully repotting in September.

If ordered by mail, add 3 cts. each or 20 cts. per dozen for postage

	Each	Doz.	100
White Calla, or Lily of the Nile (<i>Calla æthiopica</i>). Large, white, trumpet-shaped flowers of great substance. One of the most popular ornamental house and greenhouse plants.

ELLIOTTIANA, Yellow, Spotted Leaf. Dark green leaves, spotted silvery white.....	30	3 00

Snowdrops

Scilla READY IN SEPTEMBER

S. Peruviana requires slight protection; all the others are quite hardy, and may remain in the ground several years. The effect in early spring of the intensely rich blue, early-flowering Scilla, contrasting with the snow-white of the snowdrop and the varied hues of the crocus, is very striking; most valuable for permanent edging, or planted in bunches of a dozen or so.

If ordered by mail, add 5 cts. per dozen for postage, except *Peruviana*, for which add 2 cts. each

	Each	Doz.	100

Peruviana alba (White Cuban Lily).....	\$0 20	2 00	
cœrulea (Blue Cuban Lily).....	20	2 00	

Snowdrops (*Galanthus nivalis*)

READY IN SEPTEMBER

Perhaps no spring flower is a more general favorite than the Snowdrop. The earliest flowering of its varieties is the common single sort, which is also very graceful and beautiful, commencing to bloom before the snow is fairly off the ground in spring. This is succeeded by the double-flowered variety, with its elegant drooping, snow-white blossoms. Should be planted 2 to 3 inches deep in a shady location.

If ordered by mail, add 3 cts. per dozen or 15 cts. per 100 for postage

Single-flowering Snowdrops. 20 cts. per doz., \$1 per 100, \$7 per 1,000.
Double-flowering Snowdrops. 25c. per doz., \$1.50 per 100, \$13 per 1,000.
Giant Snowdrops of Asia Minor (*Galanthus Elwesii*). Extra-size bulbs, 30 cts. per doz., \$1.75 per 100, \$12 per 1,000.

Spiraea, or Astilbe READY IN NOVEMBER

Transportation charges extra

Tall, graceful, branching, herbaceous perennials, thriving in rich soil and damp positions. Those we list are extensively used for forcing for winter decorative purposes, for which they are eminently adapted, either as cut-flowers or in pots for window and table decoration. They should be potted when received and buried outside till they begin to form roots. They may then be taken in and forced as required. They require abundance of water.

Japonica (Hoteia). Excellent pot-plant for winter-blooming. Large, branching panicles of pure white feathery flowers; fine for cutting. Clumps for forcing or outdoor planting. 15 cts. each, \$1.25 per doz., \$6 per 100.

Japonica compacta multiflora. The neat, compact habit and profusion of large, handsome, pure white flowers make it a most elegant pot-plant. 15 cts. each, \$1.50 per doz., \$8 per 100.

Astilboides floribunda. Very large, pure white plumes; neat habit; very abundant bloomer. 15 cts. each, \$1.25 per doz., \$6 per 100.

Palmata. Crimson; strong clumps. 20 cts. each, \$1.75 per doz., \$10 per 100.

Aruncus. Handsome plant with large plumes of pure white flowers. 20 cts. each, \$1.75 per doz., \$10 per 100.

Astilbe Arendsi, Ceres. Bright rosy lilac; very fine. 30 cts. each, \$3 per doz., \$20 per 100.

GLADSTONE. A hybrid *Spiraea* with beautiful, snow-white plumes borne on strong stems 1½ feet long, standing erect above the foliage. The plant is perfectly symmetrical in shape, the foliage very handsome and the flowers exquisitely fragrant. Fine forcer. 20 cts. each, \$1.75 per doz., \$10 per 100.

WASHINGTON. A splendid decorative plant, producing extra-large flowers. Strong grower; fine for forcing. 16 cts. each, \$1.60 per doz., \$9 per 100.

QUEEN ALEXANDRA, PINK. A splendid pink variety, in habit similar to the well-known Gladstone, but flowering two weeks later. It is a very free bloomer and bears its flowers well above the strong, dark green foliage.

When forced it must be shaded, as soon as it starts to color. It is a splendid outdoor plant, being as hardy as the old *Spiraea japonica*. Its color will not fade even in the brightest weather. 25 cts. each, \$2 per doz., \$12 per 100.

Transportation charges NOT included in above prices

Spiraea

Trillium (American Wood-Lily, or Indian Shamrock)

Hardy herbaceous perennials succeeding best in a deep, well-drained soil and in a somewhat shady situation. They require plenty of water during the summer. All are natives of North America, and are known by various common names in different localities. They have violently emetic roots.

If ordered by mail, add 5 cts. per dozen or 30 cts. per 100 for postage

	Each	Doz.	100
Erectum . Dark purple; erect habit.....	\$0 10	\$0 75	\$5 00
Grandiflorum ("Giant American Wood-Lily," or "Wake-Robin"). Large, white flowers, changing to rose; quite hardy, and easily grown in shaded positions.....	07	60	3 50
Ovatum . White, changing to rose.....	10	75	5 00
Sessile californicum . A strong plant, 1 ft. high, with the separate leaves 5½ inches long by 4½ inches wide and the petals 3¼ inches long. Flowers pure white with purple centers; very fragrant.....	12	1 00	6 00
" rubra . Same as Californicum with narrow petals; deep maroon-purple to reddish purple.....	12	1 00	6 00
" Snow Queen . Flowers pure white with creamy centers and with broad petals.....	12	1 00	6 00

Tuberoses READY IN DECEMBER

The purity of color and rich perfume of the Tuberose are well known in this latitude. May 1 is early enough to plant in the open ground, but the bulbs may be started in pots much earlier if desired. They do best in a rich, warm soil and a sunny situation. Cut off about a quarter of an inch from the bottom of the bulb before planting, and set so that the top will be one inch below the surface of the soil.

If ordered by mail, add 3 cts. each or 15 cts. per dozen for postage

	Each	Doz.	100
Dwarf Double Pearl . Dwarf habit; large, fine flowers of great substance... per 1,000, \$12..	\$0 05	\$0 40	\$2 00
Albino . Purest white; single flowers.....	08	50	3 00
Variegated-Leaf . Foliage striped white and green; single white flowers.....	06	50	3 00

Miscellaneous Bulbs and Roots

Those marked with an asterisk (*) will not be ready till October or November
Transportation charges extra

*Zephyranthus <i>Atamasco</i> . Pure white.....	10	1 00	6 00
“ <i>candida</i> . White, greenish base.....		50	3 00

Hardy Annual and Perennial Flower Seeds

FOR AUTUMN SOWING

Many varieties of flower seeds, **Annals** as well as **Biennials** and **Perennials**, may be sown in the open ground in the autumn. We give here a list of such as will succeed in this latitude and southward. The plants from autumn-sown seed become larger and more robust, flowering earlier and more numerous than if sown in the spring.
