SUPERIOR FERTILIZERS

For the Lawn, Garden or Farm

PRICES NET F. O. B. SHIPPING POINT

CANADA UNLEACHED HARD-WOOD ASHES

(ANDORRA BRAND)

Are a complete fertilizer, replenishing worn-out soils, and, for the lawn or pasture, are economical and valuable. For the lawn, they are easy to handle, produce no offensive odors, are not unsightly, and, quickly leaching into the soil, the chemical properties are at once available for plant food.

Our ashes are selected only from the hard-wood districts of Canada, are carefully screened, and put in convenient packages. Apply at the rate of 1,000 to 1,500 lbs. per acre for top-dressing, or 2,000 to 2,500 lbs. for new lawns.

50-lb. bag	100-lb. bag	Ton (2,000 lbs.)	Cars, 15 to 20 tons in bulk
\$1 00	\$1 50	\$20 00	At special prices

PREPARED LIME

Where soils, from constant applications of manure, are sour and need a fertilizer to sweeten them, lime is a valuable agent. It quickly puts the soil in condition to assimilate plant-food. It frees the potash, phosphoric acid and nitrogen already in the soil, and turns the nitrogen into the rich nitrates valuable for plant use.

Our prepared lime is fresh from the kilns, clean, well burnt, thoroughly decarbonized and especially prepared, so that it will go three times as far as the lump lime generally used, and is fine enough to run through a drill. Use 500 lbs. per acre.

100-lb. bag	Ton	Cars, 12 to 25 tons
\$1 25	\$12 00	\$10 per ton.

POTASH AND PREPARED LIME

Where potash is needed in addition to lime, this preparation will be found valuable. It contains 4% actual potash, equal to 8% of sulphate of potash, the prepared lime being used as a filler, and makes a valuable top-dresser for lawn, pasture, or grass lands. Apply at the rate of 500 lbs. per acre.

100-lb. bag	Ton	Cars, 12 to 25 tons
\$1 50	\$14 00	\$12 00 per ton.

PEAT

We have on hand a stock of carefully selected peat, suitable for potting or planting Rhododendrons and shrubs that need such soil. Sack of about 100 lbs., \$1.25. In sacks, \$20 per ton.

PURE GROUND BONE

A brand of excellent quality. Analysis on request.

200-lb. bag	Ton	Cars, 15 to 30 tons
\$3 50	\$32 00	Special price.

ANDORRA NURSERIES

Chestnut Hill, Philadelphia, Pa.

OUR NURSERIES are extensive, covering a thousand acres of which over six hundred are planted with trees and shrubs. They are easy of access, as Chestnut Hill is the terminus of branches of the Pennsylvania and the Philadelphia & Reading railroads, and the Chestnut Hill (City Line) trolley runs from the stations to within three minutes' walk of the Nurseries.

QUALITY.—The trees and shrubs offered are grown in open, unsheltered ground, in a very exposed situation, which insures their hardiness, and on soil admirably adapted for forming robust plants having an abundance of roots. Special attention is called to the fact that our stock is grown a good distance apart in the rows, insuring heavier trees and shrubs than are generally offered.

SHIPPING SEASON opens about March 1 in the spring and August 15 in the fall.

INSPECTION AND FUMIGATION.—Our stock is regularly inspected and certificate will be sent with each shipment. Stock will be fumigated when requested or when the State laws require it.

TERMS AND CONDITIONS

ORDERS.—All orders are accepted subject to the following terms and conditions. Write plainly and give explicit directions as to address and mode of shipment.

STOCK SELECTED by customers at the Nurseries will be charged according to the value of the trees chosen.

QUANTITY.—Lots of 5 and 50 will be furnished at the 10 and 100 rates respectively.

PRICES given in this list are for the goods at the Nurseries exclusive of freight or packing.

PACKING.—All goods are thoroughly packed, thus avoiding risk, if delayed in transit. **Packing charges are made at actual cost.**

FORWARDING.—Shipments will be forwarded exactly as directed; but when without instructions, we will use our best judgment and forward by shortest and safest route. We recommend all herbaceous plants be shipped by express.

RISK.—All goods are at purchaser's risk after they are delivered to the forwarding companies and we receive their receipt for the shipment in good condition.

CLAIMS for damage while in transit must be made to the delivering company. Have delivering agent note the damaged condition on the freight bill and present your claim through him promptly.

GUARANTEE AND CLAIMS.—All goods are guaranteed true to name, full count, up to grade, and in good condition when shipped. Any plant proving untrue to name will be replaced. Claims to receive consideration must be made within five days after receipt of goods. **We give no guarantee of the life of stock.**

TERMS, CASH WITH ORDER, except to persons who satisfy us as to their responsibility.

EVERGREEN TREES

For many years we have made a specialty of growing Evergreen Trees. Our Nursery soils are particularly well adapted to the formation of the fine fibrous feeding roots, and, at the same time, the soil is of such a consistency that our frequently transplanted trees, with their masses of fiber, retain the soil in compact balls when the trees are lifted for transplanting, and they do this without the soil packing hard as is often the case when evergreens are lifted from heavy clay land.

We want to especially emphasize the importance of the transplanted tree and the frequency with which our evergreens are transplanted in the Nursery. In no other way can the proper system of fibrous roots be obtained, and they are the all-important item when transplanting the trees you purchase, to secure a satisfactory growth.

JUNIPERS—No specie of Evergreens is more widely distributed, more hardy under unusual conditions, or more useful as a class, either for formal or informal plantings, than the Junipers. Their range of growths, from the tall columnar forms to the flat trailing sorts, makes them useful for a great variety of purposes.

THE BLUE COLORADO SPRUCE—A noble tree from the Rocky Mountains and one of the most valuable when used as a specimen in ornamental plantings, as it gives a very distinct color note in any situation. It is of good growth, branches stiff and close and foliage of an exceedingly rich, silvery blue. Our stock is grafted from the choicest specimens.

TSUGA—Hemlock. Of the American Evergreens there are none that hold a higher place in plantings than the Hemlocks, particularly the variety needed in the North, botanically known as *Tsuga Canadensis*, and locally as Canadian Hemlock, or simply as Hemlock. This tree grows well in all locations, when planted in groups either on hills or in the valleys; in land that is fair or in moist land, providing it is of a texture that permits drainage. It is a tree that is not very partial to its surroundings, and will grow in the shade equally as well as in the sunlight.

The Hemlock is a rapid grower with rich, dark green foliage. It is of graceful, straight habit, and very desirable for screens, mass plantings for ornamental effect, single specimens and for trimmed hedges.

Rhododendrons at Andorra.

RHODODENDRONS

HYBRID VARIETIES—ANDORRA-GROWN

Our offering of Rhododendrons consists of many thousand plants, in fifty varieties, and in a range of sizes from one to five feet. These are acclimated—*Andorra-grown* stock—in the hardiest varieties. They are grown in open, unsheltered ground, with northern exposure, and the wind-swept hills of Andorra are not kind to anything of a tender nature, so that you may depend upon Andorra-grown Rhododendrons being of the hardiest, and supplied with excellent balls of fibrous roots.

Specimen Norway Maples in Wide Rows.

DECIDUOUS TREES

Large trees have been in demand for many years as purchasers wish quick results. In a great measure the difficulty has been to secure a large tree that would grow as satisfactorily as those of smaller size, the difficulty having been that the Nurseries did not transplant their trees as they came to a larger size, and, therefore, failed to have them supplied with fibrous feeding roots when they were sent out.

Appreciating the demand for a perfect tree in a large size we have for years devoted great care and large sums of money transplanting trees in unusually large nursery grades, and our customers can depend absolutely upon receiving, with any of the large sizes offered in this list, a root system which makes it practical and desirable to secure the large sizes and get immediate results.

Measurements are given as follows: Height is taken before digging, from the surface of the ground to the top branches, where they round off to form the top; diameter of stem, or caliper, is taken 6 inches above the ground, above the collar. Measurements are expressed thus: 10 to 12 ft. (height), $2\frac{1}{2}$ to $2\frac{3}{4}$ in. (caliper).

The Red-flowered Dogwood offered here are a handsome lot, having been grown well apart in the Nursery and frequently transplanted, so that they are now perfect, symmetrical specimens, which will lift with their entire root system. The Red-flowering Dogwood is one of the most beautiful of ornamental trees, being a distinct contrast to the native white Dogwood in its spring bloom and retaining all the desirable characteristics of the parent plant; the hardiness, rich fall-coloring foliage and brilliant fruit.

BECHTEL'S DOUBLE FLOWERING CRAB APPLE.

One of the most ornamental of recent introductions and a flowering Apple deserving of a place in every garden. Planted as a specimen or in the border with other strong-growing shrubs, it makes an ideal tree. It is of good growth with dark, rather glossy, foliage and beautiful double flowers of delicate blush, or shell-pink color and highly fragrant.

DECIDUOUS SHRUBS

As the public are requiring larger specimen Shrubs from year to year, our stocks are grown in wide rows, the individual shrubs set well apart in the row, as by this method we secure a substantial bush in proportion to its height and one which carries its branches and foliage close to the ground.

3 to 3½ ft.♦..	3 50	32 50	

Special attention is called to the above varieties of Ilex Sieboldi, Red and White Fruited. Among our plants with brilliant Fall and Winter Fruits, these varieties stand out prominently. The Red-fruited type has a berry as brilliant as Ilex verticillata and carried in much greater mass. The White-fruited sort, while not quite so prolific in fruiting, has an ivory-white berry quite distinct from other Fall fruiting shrubs.

Madame Charles Worth, rosy carmine.			
Madame Georges Bruant, double white.			
Mrs. Antony Waterer, deep crimson.			

HARDY HERBACEOUS PLANTS

Size of Plants. We aim to send out only extra-strong plants of the different sorts—plants that will give a fair return of bloom the first season. These cost but little more than the small plants so widely offered, and our customers find it more satisfactory to use Andorra-grown stock, which gives results. It has been well said, "The lowest prices are not always the cheapest, as cheapness does not consist in what you pay, but in what you get for what you pay."

	Each	10	100
ACHILLEA eupatorium (Fern-leaved Yarrow). All summer. 4 to 5 ft.....	\$0 15	\$1 25	
filipendulina (Noble Yarrow), July Golden Yellow. 2 ft.....	15	1 25	\$10 00

<i>Baldwini</i> . August to October. Purple. 4 ft.	25	2 00	

	Each	10	100
VERONICA longifolia , var. rosea (Speedwell). July to October. Rose. 1½ ft.	\$0 25	\$1 50	
longifolia , var. subsessilis . August to November. Deep blue. 1½ to 2 ft.	25	2 00	\$15 00
rupestris (Rock Speedwell). June and July. Blue Spreading.	25	1 50	10 00
spicata . June to September. Bright blue. 1½ ft.	25	1 50	10 00
Virginica . August to September. White. 4 ft.	25	1 50	10 00
VINCA minor (Periwinkle). May. Bright blue. Spreading	25	1 50	10 00
VIOLA pedata , var. bicolor (Bird's-foot Violet). May. Purple and White. 4 in.	25	1 50	12 50
cornuta , var. Admiration . May to October. Purple. 10 in.	25	1 25	
Cornuta , var. Lutea splendens . Rich yellow. May to October. 10 in.	25	1 25	
Cornuta , var. Papilio . Violet blue. May to October. 10 in.	25	1 25	
Cornuta , var. White Perfection . Pure white. May to October. 10 in.	25	1 25	

FERNS

- ADIANTUM pedatum** (Maidenhair Fern). 1 to 2 ft. Moist, shaded positions.
- ASPIDIUM acrostichoides** (Christmas Fern). 1 to 2 ft. Evergreen. Dry or moist soils in shady places.
- Felix-mas** (Male Fern). 2 ft. Semi-shaded positions, dry or moist soils.
- Goldianum**. 2 to 4 ft. Semi-shaded positions, dry or moist soils.
- marginale**. Evergreen. 1 to 2 ft. Shaded positions, dry or moist soils.
- ASPLENIUM Filix-fœmina** (Lady Fern). 2 to 3 ft. Open or shaded positions, in moist or dry soils.
- BOTRYCHIUM Virginianum** (Moonwort). 6 to 12 in. Shaded positions, moist or dry soils.
- DICKSONIA punctilobula** (Boulder Fern). 2 to 3 ft. For open positions; forms large plantations.
- ONOCLEA sensibilis** (Sensitive Fern). 1 to 2 ft. For open planting and wet soils.
- Struthiopteris** (Ostrich Fern). 2 to 4 ft. For open positions, dry or moist soils.
- OSMUNDA gracilis** (Flowering Fern). 2 to 4 ft. Open or shaded positions, and moist soils.
- Claytoniana**. 2 to 5 ft. For open plantings, dry or moist soils.
- cinnamomea** (Cinnamon Fern). 2 to 5 ft. For open or shaded positions, in wet soils.
- WOODSIA obtusa**. 6 to 12 in. Shady places, in moist soil.
- WOODWARDIA angustifolia** (Chain Fern). 1 ft. Open or shaded positions, in moist soils.
- The above varieties, 25 cts. each, \$2 per 10, \$15 per 100.
- The above, 15 varieties, \$3.50, or 100 in 5 varieties, our selection, \$13.50.

TREES AND SHRUBS FOR HEDGES

We shall be pleased to name special prices for plants in large quantity for hedging purposes. Prices per hundred are given on pages indicated.

EVERGREEN TREES

The following are only a few of the varieties that may be used for the purpose, but the list covers the most popular. We ask particular attention to the Hemlock, *Tsuga Canadensis*, which is one of the most popular and at the same time one of the most satisfactory evergreens for hedging purposes.

	PAGE		PAGE
<i>Picea excelsa</i>	8	<i>Thuya occidentalis</i>	13
<i>Retinospora plumosa</i>	11	<i>Thuya occidentalis Wareana</i> ..	14
<i>Retinospora plumosa aurea</i>	11	<i>Tsuga Canadensis</i>	14

DECIDUOUS TREES

A few of the most desirable trees adapted for close planting for hedges are as follows. We call particular attention to the Cockspur Thorn, *Cratægus Crus-galli*, which makes a magnificent defensive hedge. Strong growth, beautiful foliage and adaptability to trimming place it in the front rank of trees for hedges.

	PAGE		PAGE
<i>Carpinus Americana</i>	26	<i>Cratægus Cordata</i>	28
<i>Carpinus Betulus</i>	26	<i>Cratægus Oxyacantha</i>	28
<i>Cratægus Crus-galli</i>	28	<i>Fagus sylvatica</i>	28

EVERGREEN SHRUBS

There is no doubt that the Boxwood stands first among evergreen shrubs for hedge purposes. The plants we are offering are home-grown, therefore thoroughly acclimated, and will give excellent results. They should not be compared with the freshly imported Box upon which you have to take the risk until it is acclimated.

	PAGE		PAGE
<i>Azalea amoena</i>	15	<i>Ilex crenata microphylla</i>	18
<i>Buxus sempervirens</i>	16	<i>Mahonia aquifolia</i>	18
<i>Buxus sempervirens suffruticosa</i>	17	<i>Mahonia Japonica</i>	18

DECIDUOUS SHRUBS

Of the following the *Berberis Thunbergii* will make the lowest and closest hedge. Next would be the *Ligustrum Regelianum*, but both of these sorts will carry their branches and foliage right down to the ground. Of the other varieties the *Ligustrums* lend themselves readily to shearing for formal hedges, while the *Hibiscus* should be planted where the freer growing hedge is desired and the other sorts should be used where free-growing, untrimmed hedges are wanted.

	PAGE		PAGE
<i>Acanthopanax spinosa</i>	38	<i>Hibiscus Syriacus</i>	42
<i>Berberis Thunbergii</i> and vul- garis	38	<i>Ligustrum Ibota, Regelianum</i> ..	43
<i>Elæagnus longipes</i>	41	<i>Ligustrum ovalifolium, vulgare</i>	44
<i>Forsythia Viridissima</i>	42	<i>Lopicea Tartarica</i>	44
		<i>Rhamnus cathartica</i>	46

INDEX

The following very complete Index will serve for a ready reference to the Trees, Shrubs and Plants, not only by their Botanical names but by the Common or Local names as well.

This list comprises a collection of over 300 species, and nearly 2,000 varieties, to which might be added our large lists of Paeonies, Iris, Chrysanthemums and Phloxes, bringing the total to nearly 3,000 varieties. From this vast array of plant material you may select almost everything required for a complete planting.

In addition to the items given in this list, we have many varieties of Trees, Shrubs and Plants in small quantities, quantities too small to offer in a general list, but covering a *stock quite large enough to supply your wants*, and, therefore, if you do not find in this list the particular item you require, write us about it.

Our Catalogues

A NEW BOOKLET FOR 1914, "DISTINCTIVE TREES AND PLANTS."

This is a selected list of Trees, Shrubs and Plants of distinct merit, selected from our varied stocks to meet the needs of those who may not be sufficiently familiar with trees and plants to select readily from the offerings in our larger lists.

THE ANDORRA HANDBOOK.

This complete descriptive list will be supplied for 50 cents, which will be credited upon the first purchase amounting to \$5.

ANDORRA'S HANDBOOK will serve as a standard guide, containing conservative descriptions of a vast list of trees and plants, with hints on planting, pruning and caring for them. Illustrated and fully indexed.

A CALENDAR OF HARDY PERENNIALS.

With special lists of Iris, Phlox, Peonies and Chrysanthemums. This booklet gives a choice list of Perennials, and shows in tabulated form their height, color and months of bloom; invaluable to lovers of herbaceous plants.

PLANTING INSTRUCTIONS.

This does not aim to cover every point that may arise, but it gives the principles in such a way that any one, by following its directions, can secure the best results.

OUR SEMI-ANNUAL PRICE LIST.

Owing to our large output, and the changes in sizes of stock by reason of each season's growth, frequent revisions of the **PRICE LIST** are necessary to keep customers thoroughly posted on the stock we offer. You are always sure your order will be filled if you find the items in the **CURRENT SEASON'S PRICE LIST**.

The Andorra Way

is to grow, train and frequently transplant Trees and Shrubs so that unequalled specimens are produced which give quick, satisfactory effects.

"Transplanting" is replanting or root-pruning for the purpose of preparing the trees for the purchaser who does the final planting. The Andorra Way does it so frequently and so skillfully that larger and better developed specimens can be satisfactorily used for immediate and mature results. (Ordinary nursery transplanting is not "The Andorra Way").

Many desirable trees, seldom prospering under ordinary handling, succeed readily by The Andorra Way. Superb Tulip trees, robust Lindens, quick growing Pin Oaks, and sturdy Norway Maples, are here in transplanted large sizes, to make landscapes of beauty in months rather than in years.

The best shrubs admirably supplement the best deciduous trees in the Andorra Way. To see them all at the nursery, any time in the year, is worth while. Write if you cannot come. Our experience and unmatched stock are at your command.
