THE ILLINOIS ROSE—*Rosa Setigera*

Native of Illinois, hardier, better foliage, and positively the finest and most satisfactory rose that you can plant. Nature has selected the Illinois rose for our trying conditions of climate; proven its value for thousands of years. The ideal rose for foundation, trellis, arbor and border planting. Plant Illinois rose and be happy. Further description and price, see page 26.

THE PRAIRIE STYLE OF LAND- SCAPE GARDENING

Something Better than the Gaudy, Conventional and Imitative Style

There is only one right way to plant a place, to make it really unique and beautiful. Adapt the principles of "Local Color."

Our people, climate, soil and surroundings are altogether different from any other section of the world, and our plantings to be artistic and represent us, must develop the charm and beauties we have at hand, and not imitate some little Japanese garden or a formal European planting as inappropriate as a bull in a china shop.

The highest possible motive in Landscape Gardening is to restore and intensify ones own native landscape. You can do it, no matter where you live nor how much you can spend.

The time has now passed, in the middle west, when one with any conception of the beautiful or appreciation of things worth while in life is willing to forego the pleasures and benefits of trees, shrubs and flowers around the home .

How and What to Plant.

Our native trees, shrubs and flowers are always best where they can be used. If possible, they should form 60 to 80 per cent of our planting. On the limestone soils of the corn lands it may be necessary to utilize certain lime loving plants that have been introduced and adapted themselves to our needs.

You will find lists of plants in this catalog suited to different uses and locations, including what native plants are now in the trade and foreign plants suited to their respective uses.

We wish to acknowledge our indebtedness to the work being done by Dr. Wilhelm Miller of the University of Illinois, and for his assistance in securing many of the illustrations we are using of native shrubs.

The Illinois Experiment Station is publishing a circular, No. 170 on the "Illinois Way of Beautifying the Farm" that will be well worth your while to secure. It is profusely illustrated with a hundred fine photos. You will have to promise, however, to do some planting before this booklet will be sent free. For particulars address Dr. Wilhelm Miller, Urbana, Ill., University of Illinois.

We will take pleasure in assisting you to the right selection of plants for your planting. We are prepared to do all kinds of Landscape Gardening, furnish full plans and specifications and supply you plants in any quantity of the highest quality.

AUGUSTINE & CO.,

Nurserymen,

Established in 1867.

COVER ILLUSTRATION

Our Cover Illustration is taken from a photograph of a Bird Garden in the heart of Chicago, and is an excellent illustration of what can be easily and economically accomplished, with a good selection of shrubbery under the most trying conditions, and on a small lot.

Here is restfulness, beauty, quiet and opportunity to enjoy nature, even though the surroundings are artificial in the extreme.

Where advantage is not taken of shrubbery and flowers in the home grounds, much of the charm and pleasure of home life will be missed. Such plantings are not only valuable from the commercial standpoint, but they are accomplished easily, and with little expense. It is a pleasure to see the wonderful awakening along these lines, taking place here in the middle west.

FLOWERING SHRUBS

No lawn or yard, whether large or small is either complete, attractive or homelike without a certain amount of flowering shrubs.

Properly arranged they in no way encroach upon the lawn. They not only add beauty and adornment but at the same time can be used as screens to cover unsightly objects or fences, and break the foundation line of the house. They are indispensable, besides lending a cheerful, homelike effect. A few dollars spent in shrubs will often add more value to a property than hundreds of dollars spent in other ways.

Following each name is the height the variety attains, together with the time of blossoming.

*Prefacing a variety means a native to Illinois.

ALTHAEA, OR ROSE OF SHARON, (*Hibiscus Syriacus*.)

Seven to Ten Feet. August to October

A valuable late summer blooming shrub. We have the finest budded sorts in both double and single flowers. Colors white, blue, rose red and purple mixed.

Price

2 to 3 feet, each 25c per ten..... 2.00

ARALIA

Spinosa—Devil's Club.—6 to 8 Feet.—A strong growing rugged plant with large, decidedly tropical looking leaves. Branches thickly covered with long spines. Flowers appear in large masses, white, changing to great clusters of small black berries in the fall. A picturesque plant.

Pentaphylla—4 to 6 Feet—Valuable for its excellent, bright foliage. Branches covered with short thorns, though not nearly so pronounced as the above.

Price

	Each	Ten
Spinosa, 18 to 24 inches.....	25	2.00
4 to 6 feet.....	45	4.00
Pentaphylla, 16 to 20 inches.....	30	2.50

BARBERRY (*Berberis*)

The Barberries compose some of our most valuable foreign shrubs. They are not only beautiful for foliage and flower, but the bright red fruit remaining throughout the winter, adds another rare charm. They are valuable for informal hedge but should not be trimmed.

BARBERRY—Continued

Red Fruited, (Vulgaris) 5 to 6 Feet—Foliage bright green, yellow blossoms in May, densely covered with red fruit, hanging on till late winter.

Purple Leaved, (Vulgaris, Atropurpurea)—Five Feet—Similar to the red fruited except purple foliage. The blossoms in early May with purple back ground of leaves, are as handsome as any plant of its season.

Thunberg's or Japanese (Thunbergii)—Four Feet—the finest of all the Barberries, grows in compact form, spiny stems, foliage fine and dense, changing to brilliant red in fall, the clusters of red berries hanging on all winter. Much used for hedge and borders. Considered by many to be the most valuable foreign shrub grown. Not only because of its beauty, but is also adapted to so many uses together with perfect hardiness. For dense, low growing foundation planting, there is nothing better, and as an informal ornamental hedge it has no equal.

Price**Red Fruited and Purple Leaved**

BUCK THORN—Rhamnus

Catharticus, a fine vigorous shrub with excellent dark green foliage, white blossoms followed by small black berries. One of the very best hardy hedge plants. Hedges of 50 years are still in fine condition here at Normal. Stands severe pruning.

Frangula, similar to the above though a little more vigorous in growth, and more refined, more rare than Catharticus. 18 to 24 inch size only.

CORNUS STOLONIFERA
The Best Native Dogwood

CURRANT—Flowering (Ribes Aureum)*Six Feet.**

The golden flowering currant, blooms in April and May, followed by large black berries, fragrant and showy, thrives everywhere, in any soil, red leaves in autumn. An excellent shrub for massing in background in poor soil.

Price

18 to 24 inches, each 15c; per ten.....	1.25
2 to 3 feet, each 25c; per ten.....	2.00
3 to 4 feet, each 30; per ten.....	2.50

DOGWOOD, (Cornus)

Siberian or Red Barked, (Siberica Alba)—Eight Feet—Brilliant scarlet bark, fine for winter effect and showy summer shrub.

***Stolonifera—**The finest native red barked dogwood, perfectly hardy and one of the best.

***Stolonifera, Var. Flaviramea—**Yellow branched Dogwood—A form of native Stolonifera dogwood with golden yellow branches; very effective for contrasts with the red barked varieties, a handsome and valuable shrub.

***Florida—**The white flowered dogwood, attains the height of small tree 15 to 20 feet. A profusion of white blossoms in May, followed in the fall by red berries and brilliant foliage. Probably the handsomest and most popular native shrub in America. It does not attain perfection, however, in lime soils. If you will take just a little pains to plant the Cornus Florida in sand, with a heavy layer of partially rotted oak leaves under the sand and 3 or 4 inches of the same leaves over the sand that covers the roots and every three or four years dig the dirt away from the top of the roots, and fill in with a new layer of partially rotted oak leaves again, you can grow this most gorgeous native plant to perfection. This treatment is of course not necessary except in lime soils.

***Paniculata—**Gray Dogwood—Another of our native dogwoods, refined foliage, free blooming, with white fruits in the fall; very desirable.

Sanguinea—The old fashioned crimson barked dogwood, an excellent variety.

Mascula, Cornelian Cherry—Another good form of red barked dogwood. Blossoms before leaves appear followed by red edible berries.

Price**Paniculata, Siberian, Stolonifera, Mascula and Sanguinea**

DEUTZIA**Three to Four Feet**

Our assortment of Deutzia comprise some of the most beautiful summer flowering shrubs we have, perfectly hardy. Their charming bell shaped flowers borne in profusion in May and June make them valuable for either massing or single specimens.

*—Native of Illinois.

- Crenata**—In both double, white and rose color, gives a wealth of bloom in May and June.
- Gracillis**—A dwarf growing variety, completely covered with small white blossoms in June. One of the best. *Deutzia Gracillis* is especially suited for facing the border or foundation planting; refined in foliage and blossom, bushy growth, but always low.
- Pride of Rochester**—A very popular sort, pure white double, large blossom and cluster. May and June.
- Lemoine**—Single white—Not quite as heavy a grower as *Crenata*, but refined, and blossoms in profusion.

CORNUS FLORIDA
The Flowering Dogwood, the Most Beautiful Native Shrub, or Small Tree.

ELDER Ten Feet

Golden Elder— (*Sambucus Aurea*)—A brilliant golden leaved variety, very useful for contrasts and striking effects, quite popular. Can supply in large quantities up to 3 to 4 feet.

Cut Leaved— (*Sambucus Laciniata*)—The fern-like foliage, and drooping habit make it a valuable and artistic shrub. Always attracts attention.

***Canadensis—**Native black berried elder, great masses of white bloom, followed by black berries in fall. 18 to 24 inches, and 2 to 3 feet.

***Racemosa—**Blossoms profusely, but its great charm lies in its masses of red berries ripening in July. 18 to 24 inches only.

Variegated— (*Sambucus Variegata*)—A very pretty and distinct variety, leaves green with white edges. 18 inches only.

Golden, 3 to 4 feet.....	.25	2.25

EUONYMUS—(Strawberry or Spindle Tree)

***Americana, Atropurpureus—**Burning bush, or strawberry tree, 7 to 8 feet, probably the finest variety grown. Foliage hangs on late in the fall, changing to brilliant colors and bright crimson fruits borne in great profusion.

Europaeus—7 to 8 Feet—The well known strawberry tree, or burning bush, the fruits borne in great profusion, and their red color making them very attractive during late fall and winter.

	Price	
	Each	Ten
3 to 4 feet.....	.30	2.50
4 to 5 feet.....	.35	3.00

GOLDEN BELL, (*Forsythia*) Six to Seven Feet.

The Golden Bell, the first flowers of spring, with their brilliant color, that bloom before the buds of other shrubs have swelled, are great favorites. One of the best European plants for our use.

Intermedia, as the name implies about half upright in growth, a profuse bloomer, and very desirable.

Suspensa—A profuse bloomer and an attractive charming plant, with its long slender drooping branches.

Viridissima—Dark green, and upright habit of growth, also a profuse bloomer.

	Price	
	Each	Ten
18 to 24 inches.....	.25	2.00
2 to 3 feet.....	.35	3.00

*FALSE INDIGO (*Amorpha Fruticosa*) Four to Six Feet

Another excellent native shrub, covered with great quantities of spikes of indigo colored flowers. Much used for massing.

*—Native of Illinois.

	Price	Each	Ten
2 to 3 feet.....		.20	1.75

***HAZEL**

***Corylus Americana**—This native hazel is an excellent shrub with good foliage. It bears the well known hazel nut in profusion, especially when planted in the border and cared for. The commonly sold European varieties are poor in foliage, not hardy, and the fruit is worthless.

	Price	Each	Ten
2 to 3 feet.....		.25	2.00

HYDRANGEA

***Aborescens**—Our native Hydrangea, bloom of fair quality, hardy, and good foliage.

***CORYLUS AMERICANA**
The Hazel Nut Has Beautiful Foliage

Arborescens Sterilis.—Six Feet—Sometimes called "Hills of Snow," a new variety of decided merit, similar in many respects to *Paniculata*, but commences to bloom in June and lasts till September, flowers finally changing from pure white to green. New and rare.

Paniculata Grandiflora—6 Feet—Undoubtedly the most popular shrub grown. The flowers come in late summer and last till heavy frost. They are borne in great panicles, changing from pure white to rose and bronze. Can be trained in bush or tree form.

Price

KERRIA, JAPONICA, (Globe flower)

Flora Plena—2 to 4 Feet—Double yellow. One of the most beautiful and attractive shrubs from Japan. Wood and leaves a brilliant green, flowers double, yellow, rose form, blooms early in April, continuing till frost. A perfect gem.

Argentea Variegata—Blossoms similar to the above, leaves a bright green edged with white. A slender dwarfish grower, rather tender.

Rhodotypos Kerrioides—3 to 5 Feet—Single white, flowers in May, very ornamental. The foliage of this plant is exceptionally fine, and as an all round shrub is undoubtedly the best of the *Kerrias*. This plant has taken as kindly to its new home as the Japanese barberry, and for border and foundation planting, is equalled by few. The shining black seed pods which remain all winter, add another feature of value.

Price

	Each	Ten
Flora Plena, 18 to 24 inches.....	.25	2.00

LESPEDEZA (Bush Clover)

Bicolor—A half perennial in this latitude, the top sometimes being injured by the winter. However, it makes a rapid recovery,

and bears a great profusion of sweet pea shaped flowers during the summer. The blossoms are born in drooping clusters in such quantities as to bend the branches. Another excellent Japanese plant.

Price

	Each	Ten
2 to 3 feet.....	.25	2.00
3 to 4 feet.....	.35	3.00

LILAC (Syringa)

Since the introduction of the new French varieties of budded lilacs the lilac has become more popular than ever. They now compose some of the grandest shrubs we have. The budded varieties do not sucker and blossom while quite young. If you have not grown these newer sorts of lilac, you have missed something. They are so perfectly hardy and of easy culture. The varieties we grow are valuable for cut flowers, remaining fresh a long time and are very profitable commercially.

Common Purple, Vulgaris, and Common White, Vulgaris Alba—The old fashioned garden sorts.

Persian Purple—Probably the most popular of all lilacs. Great loose panicles of delightfully fragrant flowers that cover nearly the entire bush. A beautiful plant for its foliage as well, which is refined and graceful.

Alfonse Lavalle—Double, immense, panicles, blue lilac.

Belle de Nancy—Double, very large clusters, brilliant satiny rose with white center, having a delightful perfume. Superb.

Charles X.—Single. A strong, vigorous grower, having excellent bright foliage. Large trusses, rather loose, red, tinged purple.

Frau Damman—Single, great trusses, of medium sized flowers, pure white.

Josikaea—Hungarian Lilac—Single. A very fine, distinct variety, forming a small tree. Beautiful purple clusters in June, after all other lilacs are done blooming.

La Tour d' Auvergne, Double—Very large blossoms, violet purple. A profuse bloomer, and very fine.

Madame Lemoine—A superb double white.

Princess Alexandra—Single, large panicles, one of the finest whites.

Pres. Grevy, Double—The flowers and panicles are very large, color, a delicate blue. A distinct and most charming variety.

Rhotomagensis—Rouen Lilac, Single—A distinct hybrid, and one of the finest, with great panicles of rosy red flowers.

Souvenir De Ludwig Spaeth—Single, long panicles, large flowers, dark, purplish red, one of the best.

2 to 3 feet.....	.40	3.50
3 to 4 feet.....	.50	4.00

PRIVET, (Ligustrum)**Five to Six Feet**

The dark green rich foliage of the privets make them valuable as individual specimens or for foliage effect. They make the finest formal hedge of any plant grown. Blossoms are fragrant, attractive, resembling the lilac.

We have ceased to grow California Privet. It is not hardy in Illinois, neither will the European, *Vulgaris*, give satisfaction.

Amurensis, (North)—The best for hedge in the north, has stood twenty degrees below zero, upright growth.

Siberica—This is a comparatively new Privet, which we believe will become the most popular variety for hedge where hardiness is essential. Is absolutely hardy, beautiful rich green foliage and strong grower. We have only a limited supply, and offer it for the first time this year.

Regels—A grand hardy variety that has a weeping habit at ends of branches, make beautiful specimen plants. This is one of the best shrubs for border and foundation planting, splendid foliage, drooping branches, delicate lilac-like blossoms followed by great quantities of small blue berries that remain all winter.

VIBURNUM LANTANA
One of the Finest Snowballs.

SNOW BALL, (*Viburnum*)

Common Snow Ball (*Viburnum Opulus Sterilis*)—10 feet—The snow balls have always been admired. No shrub is better known, blossoming in May and June.

***Cranberry, High Bush—(*Viburnum Opulus*)**—7 Feet—A most valuable shrub, thrives everywhere. The profuse flat clusters of white flowers change to beautiful red berries, similar to the common cranberry, and hang on all winter. Foliage turns yellow and scarlet in autumn. There is no more valuable shrub grown and it being a native adds still further certainty of success.

****Viburnum Dentatum*—Arrow Wood**—Splendid variety of Snow Ball, tall growers, native shrubs, flowering in profusion, June. Greenish white, followed by quantities of fruit deep blue in color, especially valuable for massing and border planting. 2 to 3 feet, each 30c; per ten, 2.50.

THE DAINTY BRIDAL WREATH, SPIREA VAN HOUTTEI Japanese, (*Viburnum Plicatum*)—6 to 7 Feet—A new variety from Japan, superior to the common in foliage and flower, blooms later and lasts longer than the common. More dwarfish and compact, more difficult to grow.

****Prunifolium***—Better known under the name of Black Haw. One of the most charming tall growing shrubs of our Illinois woods, foliage changing to brilliant colors in fall. Fruit large, black, hanging in great clusters throughout the winter, edible. Excellent for borders and massing. 2 to 3 feet 25c; per ten, \$2.25.

Wayfaring Tree, (*Viburnum Lantana*)—Large dense heads of white flowers followed by bright red berries, gradually changing to darker color. The foliage is heavy, leaves thick, dark green

*—Native of Illinois.

changing to rich purple in the fall. One of the handsomest strong growing shrubs we have, although *V. Lantana* is not a native, it is a lime loving plant and few plants are as thoroughly successful as this.

SPIREAS, (Meadow Sweet).

Of all the summer blooming shrubs, probably none are more used than the Spireas, some of the varieties giving bloom from early spring till frost. Taken as a whole, for foliage, refinement and profuse blooming, they are one of the most valuable classes of plants grown.

Anthony Waterer, Bumalda—3 Feet—Crimson, profuse bloomer, flowers all summer.

Billardii—Commences to bloom in June and lasts till September. Beautiful pink spikes in profusion. An old time favorite.

Callosa Alba—2 Feet—Pure white, with beautiful masses of flowers all summer.

***Opulifolia**—4 to 6 Feet—The best native spirea and one of the strongest and healthiest of the list. The large flat clusters of pure white blossoms in June, together with excellent foliage make it one of the most charming of the group.

***Opulifolia Aurea**—The Golden Leaved Spirea—Identical to the above except the leaves have a golden tinge.

Reevesiana—Beautiful white flowers in early spring.

Thunbergii—3 Feet—The fine, delicate, slender leaves and branches of the Thunbergii, with its profuse blossoms in early May makes it especially valuable for planting at base of the taller shrubs—one of the best.

Van Houttei, Bridal Wreath—3 to 4 Feet—The most popular of the Spireas, when in bloom in May and June, one of the most charming shrubs in existence. The drooping branches are a mass of white bloom to the tips, foliage also very pretty and refined, although this is a European variety it is so well known in America and does so well in every soil and climate, that it deserves to be, as it is, the most popular of all flowering shrubs.

SYRINGA, (Philadelphus)

Coronarius—Mock Orange—5 to 7 Feet—These deliciously fragrant old fashioned shrubs are as popular as ever. The great

***SPIREA OPULIFOLIA**
The Best Native Spirea.

clusters of snow white blossoms fill the air with perfume during June.

Grande-florus—Similar to Coronarius, except two to three weeks later, blossoms are much larger, and without odor. A grand variety and very popular.

Avalanche—More slender and graceful than the above. The long arching of branches almost covered their entire length with a profusion of snow white flowers.

Zeyheri—A hybrid of Coronarius, more spreading, branches drooping somewhat, flowers large. A very attractive and charming shrub.

SUMACH, (Rhus)

If the Sumach were not a native plant, but had been discovered in China or Japan, and especially if it were a little more difficult to grow and cost more, its great value as an ornamental plant would probably be better appreciated.

Here is a class of plants covering every requirement, from the refinement of the Aromatica and the Copalina, to the strong rugged and brilliant Typhina. Natives, that make our prairies glorious in the fall with their wonderful colors. Carry their foliage as few plants do and yet because they have been common in the past, we have neglected them.

Now turn back and look at the cover of this catalogue again. Any one who has a conception of beauty above hogs and corn who will just imagine the wonderful blending of colors, the quiet peaceful charm of this little bird garden in the heart of Chicago will get some idea of what the Sumach will do when properly handled.

It is time we got awake to some of the beauties we have at hand. If our Sumachs only grew on inaccessible mountain peaks, people would be breaking their necks every day trying to get them.

I am glad Dr. Miller has renamed the Dwarf Copalina, the **ILLINOIS SUMACH.** A. M. AUGUSTINE.

***Aromatica**—3 to 5 Feet—Flowers yellow on short spikes appearing before the foliage, leaves bright and shining, exhaling a strong pleasant and spicy odor. The fruits are coral red. A splendid shrub for shady situations and for border planting. Thrives in any soil.

***Copalina**—The **ILLINOIS SUMACH**—Dwarfish, though specimens will attain considerable height if not trimmed back.

Foliage a brilliant glossy green. Small greenish flowers in dense panicles at end of branches, and the latest of the Sumachs to bloom. Make beautiful specimen plants or excellent for massing. The crimson fruits and brilliant foliage in autumn give a wonderful wealth of color.

***Cotinus, Smoke Tree or Purple Fringe**—6 to 10 Feet—Bears great clusters of delicate purplish colored flowers in the early summer, that give the appearance of smoke. A strong vigorous grower with good green foliage, suitable for the border or screening.

*—Native of Illinois.

***Glabra—Smooth Sumach**—Another excellent native variety with smoother bark. Has the same characteristic brilliant foliage and fruits in autumn.

Typhina —Staghorn—8 to 10 Feet—Named for its peculiar growth of branches which resemble a stag's horn in angular growth. Has the brilliant fruits and foliage in autumn, a strong vigorous grower.

Typhina Laciniata—Fern Leaved—This is probably the most distinct of all Sumachs, a sport of the typical Typhina. Foliage deeply cut, resembling fern leaves. Has a decided tropical look, resembling in some respects a tree fern. No plant we

RHUS COPALINA

"If our Sumachs grew only on inaccessible mountain peaks, people would be breaking their necks every day to get them."

have, has attracted more attention. Fruits brilliant crimson, and leaves change to red and gold in the fall.

*SNOW BERRY (Symphoricarpos)

Four to Five Feet

There is probably no plant that will continue to do its part to beautify the surroundings under adverse conditions better than the Snowberries, and when winter comes their beauty is even enhanced with their drooping branches loaded with bright berries.

***Racemosus, White Snowberry**—Beautiful in foliage, flowering in clusters through the summer and followed by quantities of large white berries. Very effective.

***Vulgaris, Coral Berry, Indian Currant**—Similar to the above except the blossoms are followed by small purplish red berries. Valuable for shady places and trying situations.

TAMARISK, (Tamarix.)

African, Gallica and Indica—8 to 10 Feet—Beautiful shrubs with feathery asparagus like foliage, pinkish white blossoms in June and July, decidedly picturesque. If frequently cut back, they make a vigorous new growth of delicate refined foliage suitable for planting close to steps or near the house.

*—Native of Illinois,

***WITCH HAZEL**

***Hamamelis Virginica**—A native shrub, excellent foliage, flowers yellow, late in fall, just before leaves fall.

The Witch Hazel is not only a good shrub for the border, doing well under adverse conditions and in shade, but the peculiar time of blossoming and its strange method of scattering seeds make it very interesting as well.

HARDY VINES

*BITTER SWEET, STAFF VINE, (*Celastrus Scandens*.)

One of the best of our native vines, a strong twining grower, beautiful foliage, and in the fall covered with orange red berries. For covering trellis work, old tree stumps, etc., the Bitter Sweet is an excellent vine. The great profusion of brilliant fruits lasting well through the winter give it a distinctive charm.

Price

	Each	Ten
Strong plants	.25	2.00

CLEMATIS

Montana—One of the newer varieties of Clematis from China, hardy. White anemone like blossoms frequently appearing in April and lasting about a month.

Japanese Paniculata—Deservedly one of the most popular vines grown. Is rapid growing, dense foliage of brilliant green. In September is completely covered with a profusion of dainty star shaped, white blossoms that are deliciously fragrant.

***Virgin's Bower, Virginiana**—The popular native sort, large leaves, robust grower, blossoms a month earlier than Paniculata and similar to it. An old time favorite.

CLEMATIS PANICULATA

*—Native of Illinois.

LARGE FLOWERING CLEMATIS

Admired by all and very popular, strong field grown plants

Jackmani—Large showy purple single the best.

Henryi—Large single white, the best large white.

CLEMATIS VIRGINIANA
The Charming Virgin's Bower

DUTCHMAN'S PIPE—(Aristolochia Sipho)

A very striking and handsome climber, native of America. The leaves are 10 to 12 inches in diameter, and curious brownish colored, pipe shaped flowers. Perfectly hardy.

Price

Each 50, per 10..... 4.50

EUONYMUS RADICANS

An exceedingly ornamental evergreen climber, with small rich green foliage. Bears a quantity of pink berries that turn scarlet as they open. Clings readily to tree trunks and rough walls. ,

Price

Each 25c, per 10..... 2.00

***WILD GRAPE**

There is no twining vine that makes a more vigorous, rapid growth than the Wild Grape, for covering fences, trellises, porches, etc. It is unexcelled by any vine, native or foreign. Strong plants, each 20c; per ten, \$1.75.

HONEYSUCKLES, (Lonicera.)

Still remain favorites and as popular as ever. Excellent for covering porches, trellis or fences.

Hall's Japan, Halliana—Almost an evergreen, and a very popular variety. The fragrant white and yellow blossoms borne in profusion all summer.

Monthly Fragrant, Belgica—A beautiful type, bearing flowers all summer.

***Scarlet Trumpet, Sempervirens**—Sometimes called the coral honeysuckle. A handsome vine, large showy leaves, long scarlet flowers, borne in profusion all summer. There are few vines or shrubs having the rich green foliage, the profusion of bloom, the delicious odor or the vigorous growth of this and the following native honeysuckle.

***Yellow Trumpet**—Identical to Scarlet Trumpet except the blossoms are yellow. One of the best of the honeysuckles.

Price

Field grown, strong two year vines

IVY, (Ampelopsis.)

Boston Ivy, Ampelopsis Veitchi—A most popular and beautiful vine for covering stone or brick building, clinging tenaciously, beautiful shades of green in summer, changing to crimson and gold in autumn.

***Virginia Creeper or Woodbine, Ampelopsis Quinquefolia**—Twining in habit. Clings to trees and walls, very pretty for trellises and natural effects. Leaves turn crimson in autumn. One of the good native vines.

***Ampelopsis Englemanni**—Resembles Ampelopsis Quinquefolia, except that it clings to walls much better. It is one of the finest Ivies we have. The brilliant coloring of the leaves in Autumn, together with perfect hardiness, makes it a very valuable climber for the covering of brick or stone walls. Where hardiness is necessary the Englemanni will be found much superior to Veitchi.

*—Native of Illinois.

ROSES**NATIVE ROSES**

Our roses are all strong, dormant field grown plants, far superior to stock grown under glass.

***The Illinois Rose—The Prairie Rose—Rosa Setigera**—The only native climbing rose of America, blossoms pink, single, in July after other roses have passed; beautiful foliage, absolutely hardy, freest from disease or insects. The stems turn red in winter, which together with quantities of crimson fruits, produce a charming winter effect. The most satisfactory climbing rose you can plant.

***Rosa Blanda—Meadow Rose**—Bush form, but otherwise very similar to the Illinois Rose. Sometimes reaches 5 to 6 feet, and during June and July covered with a profusion of delicate pink flowers 2 inches across; brilliant fruits in fall and winter.

***Rosa Lucida**—A shrub style rose, a native of excellent, brilliant green foliage, very few if any suckers, pink or white blooms, single, in profusion during June and July. Stems brownish red in winter and brilliant red fruits remaining plump all winter. A splendid plant for the border.

Price**Native Roses****Each****Ten**

-----------------------------	-----	------

CLIMBING ROSES

The New Blue Rose—Veilchenblau—The greatest novelty ever introduced in roses. Rose growers have tried for centuries to produce a blue rose, and at last it has come. Perfectly hardy, a vigorous climber, and excellent foliage. Borne in great clusters similar to Crimson Rambler, but a delicate Corn Flower Blue.

***Baltimore Belle**—Hybrid of the Illinois Rose. A strong climber, blossoms very double, carmine rose tint. Foliage good, flowers produced in great profusion, later than the Ramblers.

*—Native of Illinois.

Crimson Rambler—Although not an old rose, has become very popular and well known. The deep crimson flowers are produced in profusion, in great clusters and remain for about two weeks, strong growing, excellent for pillar or porch.

Dorothy Perkins—Of more recent introduction than the Crimson Rambler and in our opinion the best of the type ever introduced. Awarded the prize by the National Rose Society of England as the best climbing rose. Plant makes the most vigorous growth of any climber, foliage leathery and beautiful light green, blossoms a delicate shell pink, double, fragrant, and borne in great clusters, completely covering the plant. Perfectly hardy.

White Dorothy—Identical to Dorothy Perkins in every way except blossoms are pure white.

ROSA SETIGERA—The Illinois Rose

Excelsa, or Crimson Dorothy, New—A rose that will undoubtedly supercede the Crimson Rambler. Has the vigorous growth, hardiness and excellent foliage of the Dorothy Perkins, just as free blooming. The blossoms appearing in great clusters, but a brilliant crimson and holding their color better and longer.

Flower of Fairfield—A new rose, an ever-blooming Crimson Rambler, hardy and promises to be very valuable.

Lady Gay—A most charming rose and strong grower, perfectly hardy. Blossoms are a delicate cherry pink, gradually changing to a lighter shade. One of the best climbers.

Multiflora—A charming species, introduced from Japan more than a century ago, but only recently brought to notice. It is exceedingly free-blooming, and towards the end of June the plant is covered with great clusters of small white, single, sweetly fragrant flowers, in which the golden colored anthers make a charming contrast with the snowy-white petals. It is extremely hardy and grows rapidly.

***Prairie Queen**—This is probably the best known of all the old fashioned climbers. A large rose, borne in great abundance, very double, globular, color a brilliant pink. A hybrid of the Illinois rose, consequently very hardy and of fine foliage.

Seven Sisters—An old garden favorite, giving a profusion of crimson bloom, changing to white in different shades.

Sweet Briar—**Rubignosa**—The genuine old sweet briar, famous in

ROSA BLANDA—Native and a Beauty

poetry and song. Strong grower, good foliage, which exhales a delightful fragrance in damp weather and when crushed.

DWARF ROSES

Baby Rambler, Crimson—Valuable for outside and inside planting, very similar to the Crimson Rambler in habit of blooming, plants are a continuous mass of bloom from early spring till frost, a great bedding rose.

Baby Dorothy—This new rose deserves as much praise as the Dorothy Perkins. Beyond question the handsomest of the baby, or dwarf type, a delicate shell pink, with beautiful pointed buds and planted in our trial grounds this past summer,

ROSA LUCIDA—A Native of Great Merit

there was not a day from early May till frost that a single plant did not carry from 25 to 100 blooms. As a bedding plant we doubt if it has an equal. Perfectly hardy. We have a fine stock of splendid plants, imported from Europe.

THE ILLINOIS ROSE—Used in Foundation Planting.

HYBRID PERPETUAL AND MISCELLANEOUS ROSES.

General Jacqueminot—Brilliant scarlet-crimson, an old favorite and one of the best known roses in cultivation; does well everywhere.

- Hermosa**—An old garden favorite, bright, double pink and always in bloom.
- Killarney**—A beautiful pink rose, profuse bloomer all summer. Give slight protection in winter.
- Kaiserin Augusta Victoria**—Pure white, with cream center, splendid outdoor bloomer, slight protection.
- LaFrance**—A well known free blooming silver pink rose, very fragrant, slight protection.
- Madam Plantier**—A pure white rose, blooming in great profusion, and much used for cemeteries and lawns. Perfectly hardy. An old favorite.
- Madam Chas. Wood**—A hardy, free blooming, double, deep red rose, a good old standby.
- Moss—Pink**—There is no bud more delicate than the pink moss absolutely hardy, free blooming.
- Paul Neyron**—Dark pink, full double, the largest of all roses, and a universal garden favorite, hardy.
- Persian Yellow**—The old favorite hardy yellow rose, blooms early in the spring. The first of all roses to bloom.
- Rugosa, Japanese Rose**—This rose is deservedly very popular, used as a shrub it is fine. The foliage is refined and charming all summer, the blossoms are large, single, produced throughout the summer, followed by large crimson fruits, perfectly hardy and one of the most beautiful shrubs grown. For a rose hedge it has no equal. We grow these roses by the thousand and can supply smaller plants in quantity suitable for hedge.

HARDY HERBACEOUS PERENNIALS

There is probably no class of plants that has grown so rapidly into popularity of recent years as the hardy perennials. Why these old fashioned flowers that our grandmothers prized so highly have for a time been neglected, is hard to say, but be that as it may, they are being appreciated now as never before.

They are perfectly hardy, of the easiest culture, and by selection, beautiful flowers suitable for the garden or cut flowers can be had with but little expense or trouble from early spring till after frost.

The Perennial Garden or Border is indispensable to the home like grounds.

We shall be pleased to assist you in making selections, or assist you to plan the border or formal garden. We have in our gardens over 500 varieties of perennials, practically everything of value in this climate. Some varieties that are valuable elsewhere are worthless in the Mississippi Valley.

Achillea—Yarrow—12 to 18 inches

The Pearl—Blooms in profusion all summer, and the pure white flowers are excellent for cutting. One of the finest bedding plants we have. Perfectly hardy. Price, each 10c; per ten, 90c.

Millefolium Roseum—The flowers are a beautiful pink, and the fine feathery foliage makes it very attractive. Blooms all summer. Price: each 15c; per ten, \$1.50.

Aegyptica—Identical to *Millefolium Roseum* except flowers are a bright yellow. Price: each 20c; per ten, \$1.50.

Adams Needle, or Spanish Bayonet. **Yucca Filamentosa**—An evergreen, tropical looking plant, resembling the century plant somewhat. Large, white waxy, bell-shaped blossoms borne on branches from a tall central spike six feet high. A very showy and valuable plant. Price: each 10c; per ten, \$1.25.

WHAT IS MORE BEAUTIFUL THAN A WELL CHOSEN
PERENNIAL BORDER

Anemone Canadian—(Pennsylvanica)—The only Anemone we have found that is perfectly hardy here. A profuse bloomer, star like flowers of pure white, from early June till August. Makes fine clumps. Each 15c; per ten, \$1.25.

Aquilegia—Columbine—An old favorite and the new long spurred

varieties are very fine. Assorted varieties, each 15c; per ten, \$1.25

Aster—Michaelmas Daisies—One of the grand fall flowers, remain in blossom a long time, very profuse bloomers. Good for cutting. **Novae Anglaie**—Four feet. Large purple, each 15c; per ten \$1.25.

Tartaricus—Three to four feet. Mauve, very large blossoms, strong grower, later than the above, excellent. Price, each 20s; per ten, \$1.50.

Laevis—Light heliotrope, three feet, large flower. Each 20c; per ten, \$1.50.

COREOPSIS LANCEOLATA

Paniculata—A beautiful white, three feet. Each 20c; per ten, \$1.50.

Bocconia Cordata—(Plume Poppy)—Six feet. Large silver green leaves, resembling fig leaves, making it very ornamental for foliage effect. Large panicles of blossoms, light cream color, in August. A bold, striking plant. Each 15c; per ten, \$1.25.

Caryopteris Mastacanthus—**Blue Spirea**—Two feet.

If there is a more valuable plant than this in the border or massing, for Illinois conditions we have yet to see it. Here it is a hardy perennial, but further south the branches are not injured by the cold. From the first of September till cut down by the frost the plant is a solid mass of rich lavender blue flowers. The blossoms are delicate and refined, and by their profusion are very showy. They remain in blossom a long time and come at a season when flowers are scarce. Two year plants, each, 25c; per ten, \$2.00

Chrysanthemum—**Golden Queen**—We have in our gardens 18 varieties of hardy Chrysanthemum, this large flower pompom is by far the queen of the lot. Early and profuse in bloom and probably the finest late fall blooming plant you can plant. Price, strong field grown plants, each 30c; per ten, \$2.50

Clematis—**Recta**—The Recta makes a bush some 2 feet in height, and in May and June completely covered with white scented blossoms, similar to Clematis Paniculata, fine for cut flowers. Price each, 30c; per ten, \$2.50.

Coreopsis—**Tickseed**.

If you like brilliant yellow flowers plant coreopsis. Bloom in greatest profusion all summer, long stems, excellent for cutting and decoration.

Lanceolata—One of the most popular border plants grown. Two feet. Each 10c; per ten, 90c.

Dianthus Barbatus—(Sweet William)

Holborn Glory Strain—This strain with its wealth of colors is undoubtedly the finest strain of this old garden favorite. Each 10c; per ten, 90c.

Daisy, Shasta. (18 inches).

This is probably the most valuable plant for this part of the country that Luther Burbank has given us. Large, beautiful daisies four inches across in great profusion all summer. We have the California, Alaska and Westralia. We have tested plants from a number of the principal growers, and can not find any reason yet for giving any distinguishing names. Each, 15c; per ten, \$1.25.

SHASTA DAISY

Delphinium—**Hardy Larkspur**—Belladonna, the best and finest variety of Larkspur, blooming continuously throughout the summer, clear turquoise blue. Price, each 25c; per ten, \$2.00.

Giant Daisies, Pyrethrum Uliginosum—Two to three feet. Large daisy like flowers, white with yellow center, with long stems in

- August and September. One of the few valuable late white flowers. Excellent for cutting. Each 15c; per ten, \$1.25.
- Gaillardia, Blanket Flower**—18 inches. **Kelways**—The finest strain of this wonderful bedding plant. Petals orange tipped with red base. Valuable for cut flowers and blooms continuously from early spring till frost. Probably there is no perennial equal to the Gaillardia for Illinois. Each 15c; per ten \$1.25.
- Golden Glow**—See **Rudbeckia**.
- Day Lily**—**Hemerocallis Kewanso**—Two feet. The well known Golden day lily, blooms in July and August. An old favorite and deserving. Each, 10c; per ten, 80c.
We have in limited quantities 10 other varieties of *Hemerocallis*, 15c to 50c each.
- Helianthus**—**Hardy Sunflowers**.
Mollis Grandiflorus—Medium size, single, five feet. Each 10c; per ten, 90c.
Orgyalis—Small, single flowers in great profusion, odd and very handsome in flower and leaf. Each 15c; per ten, \$1.25.
- Heliopsis**—Ten feet—Similar to sunflower.
Pitcherina—Single small flowers and **Sparsifolia**, larger single. Each 15c; per ten, \$1.25.
- Lychnis Chalcedonica**—**Ragged Robin**—An old time garden flower, suitable for cutting, all summer. Crimson. Each 10c; per ten, 90c.
- Pinks**—**Hardy**—**Her Majesty**, pure white, double, the finest white and one of the most beautiful garden flowers. All summer. Each 15c; per ten, \$1.25.
- Mrs. Augustine**—This is one of the most charming pink we have ever seen. It was found some years ago in an old garden here at Normal. A brilliant crimson, blooms profusely from early spring till frost. Resembles a high class carnation more than any hardy pink. Does as well indoors as out. A most refined and valuable flower. Perfectly hardy, supply limited, but we hope to be able to fill all orders this year. Last year the demand was double our supply. Each 50c; per ten, \$4.50.
- Physostegia**—**American Heather**—Three feet.
Virginica—Tall spikes of pink flowers, profuse bloomer and an old time favorite. Fine for cutting.
Virginica Alba—Same as the above, but white. Price: each 10c; per ten, 90c.
- Phlox**—Of all the hardy flowers there is nothing except the peonies to compare with the newer strains of hardy phlox. By selection a continuous supply of bloom can be had from early summer till frost. With their wealth of color they are probably the most valuable of all decorative perennials. We have in stock one of the largest and most desirable assortments possible to collect. We herewith list only a few, but can supply in a limited way 100 of the best garden sorts.
- Coquelicot**—Pure scarlet, deep carmine eye. One of the brightest.
- F. Y. Von Lassburg**—Immense trusses of pure white, tall growing. Large individual flowers.
- Flora Horning**—Immense blossoms, outer edge of petals white with a crimson eye. The most handsome phlox grown.
- Jeanne de Arc**—Pure white, blossoms medium size, but trusses very large. Very fine and showy.
- Hermine**—Very dwarf and compact, pure white, fine.
- Mrs. A. Baker**—Free flowering, light crimson.
- Miss Linguard**—The earliest of all. Pure white, profuse bloomer and considered by many the finest of all phloxes.
- Tapis Blanc**—A new rare dwarf, white. In our opinion the

finest grown. Immense pure white blossoms in large solid panicles.

Each 15c; per ten, \$1.25; except Tapis Blanc and Flora Horn-
ing, add 10c each per plant to these prices.

Mixed varieties all colors not named, strong plants, each 10c;
per ten, 90c; per 100, \$8.00.

Rudbeckia—Brilliant Cone Flower.

Lanceolata—The well known Golden Glow. Each 10c; per ten
75c.

Newmani—Black Eyed Daisy—Two feet. One of the showiest
of all the hardy flowers. Profuse bloomer from July till frost.
Large yellow daisy-like flowers with dark brown center. Fine
for cutting and last a long time. Each 15c; per ten, \$1.25.

Paeonia, Peonies—Undoubtedly one of the finest of all hardy garden
flowers, succeeding everywhere, and excellent for cut flowers.
We are giving a great deal of attention to peonies, and are
growing 150 varieties, including the best of the Japanese, Euro-

DIANTHUS BARBATUS
The Old Fashioned Sweet William in all Colors

pean and American varieties, many of these deliciously fragrant. We catalog only a few sorts and will be glad to correspond with persons interested.

Lily of the Valley—These delicate sweet scented lilies, coming in the month of May, well deserve their popularity. Clumps, each 15c; per ten, \$1.00.

Salvia Greggii—A new perennial salvia which is expected to take the place of the Annual Crimson varieties. Claimed to be perfectly hardy, and covered all summer with a profusion of spikes of brilliant crimson bloom, something long desired. Limited stock of pot grown plants only this year. Price each 40c.

Tritoma—Pfitzerii—Flame Flower—Or Red Hot Poker. This new type of tritoma is more like a stalk of flame than anything else. Throws up a stalk two feet tall, surmounted by a great mass of flaming crimson and orange colored flowers, from early September till frost, making the grandest show imaginable. Price, each 20c; per ten, \$1.75.

Vinca Minor—Periwinkle—Myrtle, a trailing evergreen, with delicate little blue flowers, much used in cemeteries and for shady locations. Price each, 15c; per ten, \$1.25

Grasses—Ornamental.

Phalaris—Arundinacea Variegata—A low growing, variegated ribbon grass. Very useful for bordering beds and walks. One of the most popular grasses. Clumps, each 10c; per ten 90c.

Mailing size apple trees are strong, one year old trees, about 2½ to 3 feet in height.

APPLES—Summer

- Red Astrachan**—Large, beautiful deep crimson. Sub-acid.
Early Harvest—Medium, pale yellow, tender, juicy.
Duchess of Oldenburg—Good size, yellow, streaked red, juicy, rich, sub-acid, productive, one of the best.
Yellow Transparent—Early white, tender, juicy, sprightly, subacid, medium size. Sometimes trees blight.
Benoni—Medium, yellow, streaked with red, productive, juicy, rich.
Red June—Medium, early, an old favorite.
Rohes Favorite—A strong growing, handsome, early summer apple. Flesh a little coarse, but good quality, and an excellent apple. A good new sort.

Autumn

- Yellow Horse**—Large, yellow, does exceptionally well in Southern Illinois and southern states, an excellent all purpose apple.
Maiden's Blush—Large, beautiful blush cheek, sub-acid.
Fameuse (Snow)—Medium, deep crimson, flesh white, of best quality, hardy.
Wealthy—Medium to large, red, sub-acid, hardy and productive, none better.
Autumn Strawberry—Medium size, striped, highest quality, juicy, yields well.
Fall Pippin—Large, somewhat oblong, good quality, keeps till December.
Chenango Strawberry—Large, oblong, yellow, striped red, very handsome and high quality, productive.

Winter

- Aiken's Red**—Originated in the Northwest, an excellent apple of high quality, medium size, abundant yielder.
Arkansas Black—Large, dark red, strong grower, high quality.
Ben Davis—Large, handsome, striped, valuable commercially, long keeper.
Baldwin—Large, bright red, crisp, juicy, rich, adapted to the east.
Dominie—Similar to Rambo, but long keeper and better, flat, medium size, high quality, prodigious, early bearer, juicy.
Gano, or Improved Ben Davis—Beautiful deep red, excellent.
Grimes Golden—Good size, yellow, of highest quality, very productive.
Ingram—A seedling of the Janet, which it resembles somewhat, but larger, higher colored, and finer quality.
Jonathan—Medium to large, red, highest quality, one of the best.
Mann—A large greenish yellow apple that originated in Illinois. Good quality, long keeper, hardy and free bearing.
Minkler—Large, red, solid, productive, hardy, but a little slow to bear.

- Milam**—An old variety highly prized by some, medium, red, handsome, productive, good quality.
- Mammoth Black Twig**—Large, dark red, vigorous, good quality.
- Northwest Greening**—Large, hardy, yellow, long keeper.
- Pewaukee**—Large, mottled red, hardy, productive, good quality.
- Rambo**—Medium, good quality, greenish, an old variety.
- Rawles Janet**—Medium to small, long keeper, productive, good quality.
- Rome Beauty**—Large, yellow, shaded red, sub-acid.
- Salome**—An apple that is becoming very popular. Reddish stripes over greenish yellow body, very high quality, and for the North and Northwest especially valuable on account of extreme hardness and prolific bearing. Long keeper.
- Stayman's Winesap**—Larger and an improvement on Winesap.
- Stark**—Large, striped light and red, juicy, mild sub-acid.
- Talman Sweet**—Medium, yellow and red, rich.
- Walbridge**—Medium, striped red, hardy, good quality.
- Wine Sap**—Medium, dark red, crisp, sub-acid, an old standard.
- Willow Twig**—Large, striped red, hardy, heavy yielder, extra long keeper, valuable commercially and for home use.
- York Imperial**—Medium to large, flattened, yellow, shaded red, high quality.

CRAB APPLES

Price Same as Apples.

- Transcendent**—Productive, bright red, good, September.
- Florence**—Large, productive, becoming very popular. October.
- Hyslop**—Large, deep red, beautiful, good. October—November.
- Martha**—One of the best, yellow, fine quality, enormous yielder.

- Alexander, Alexis, and J. L. Budd**—These are quite distinct from the European varieties, hardier, and will produce fruit when other apricots fail. They are early bearers and productive.

CHERRIES

- Compass**—A hybrid of the cherry and plum, half cherry, half plum, hardy, prolific and valuable, bears young.

This new fruit has attracted a great deal of attention, and is becoming very popular. Trees are somewhat dwarfish in growth and quite ornamental, bearing enormous quantities of fruit. Also valuable in the far north where it is perfectly hardy.

- Early Richmond**—Medium size, dark red, juicy, rich, sub-acid. The old standard, nothing better. June.
- May Duke**—Large, early, dark red, delicious, not a sure bearer, but a fine cherry, best of the Duke type.

- Montmorency, O.**—Larger than Early Richmond, two weeks later, productive and next best to Early Richmond. June-July.
- Northwest**—A valuable new variety, ripens before Early Richmond, but hangs on later, becoming almost black. Does not bear quite as well as Early Richmond.
- Ostheim**—Hardy, productive, large, dark, red fruit, dwarfish growth valuable, quite late. July-August.

A BRANCH OF COMPASS CHERRY

MULBERRIES

- Russian**—A very hardy and strong grower, leaves suitable for feeding silk worms, fruit medium in size, varying from black to white, very sweet. The hardy Mulberry. If you want something new and up to date in an ornamental hedge, try the Russian Mulberry. Treat it just as you would privet.
- Russian Weeping**—See weeping trees.
- Downing Everbearing**—Very large fruit, black, sweet, rich, high quality.

PEACHES

We make a specialty of growing peach trees in large quantities. We have a large stock of beautiful, well-rooted trees in perfect condition, of all the leading sorts. There is probably no one fruit that has given so much returns as the peach for the past five years in Central Illinois, some trees having produced from \$5.00 to \$7.00 worth of fruit per year. We shall be pleased to correspond with those desiring larger quantities than quoted.

SPECIAL NEW VARIETIES**Sill**

This new peach originated here at Normal and is a cross between Elberta and Mixon. The tree is an ideal commercial grower, being stocky, and vigorous, and very large dark green leaves.

SILL PEACH

The fruit in appearance resembles Elberta, averaging nine inches in circumference, with a little more red and a higher color generally, very large and remarkably uniform size and perfect fruit. A perfect free stone. In quality the Sill is superior to Elberta, the flesh is more solid, finer grained and a better keeper. Ripening a week to ten days after Elberta.

On September 3, we sent samples of the Sill to J. H. Hale of South Glastonbury, Conn., the best authority and largest grower of peaches in the United States. October 10, he wrote, "Yours of September 3 and the seedling peach came promptly by mail. I tested two of them and found them of fine texture and of about the same quality as Elberta. The other two specimens I left on top of my desk through the entire month of September and they were still sound at the end of the month, although greatly shriveled. On the 9th of October I threw them away and they were perfectly sound. This would indicate it has good keeping qualities. I shall now watch my tree here with great interest."

After watching and testing the Sill peach for the past seven years, we believe it is destined to become one of the great commercial peaches of this country. Horticulturists who have been watching the Sill for the past few years, pronounced it beyond question the most promising peach ever grown in Central Illinois. The demand for the Sill has been very heavy but we hope to be able to fill all orders this year.

Quaker

Some ten years ago, Col. Milton L. Haney, of this place, while visiting in the northwest portion of Iowa, had his attention attracted to a remarkably hardy peach seedling growing in a Quaker settlement, this variety being the only one that would stand the extreme cold of that section. He brought us some buds from which we grew a few trees. These we tested and placed in a number of places and have grown the Quaker here at Normal. The Quaker has stood the test of hardiness, having borne several years when every other peach bud in this section was killed. The fruit is not as large as some, but large enough for every purpose, and of very good quality. The trees usually set too much fruit, and for best results should be severely thinned. Where hardiness in tree and bud is of principal value, we recommend it very highly.

MAYFLOWER PEACH

Mayflower

This new peach is claimed to be the earliest ripening peach ever introduced. Is yellow fleshed, with beautiful red cheek, and excellent quality, being a much better keeper and shipper than other early sorts. Although we have not yet fruited the Mayflower, we feel safe in recommending it on account of the strong endorsements it has received.

STANDARD VARIETIES

- Alexander**—Medium, greenish white, nearly covered with beautiful red, sweet, juicy, rich, early. July.
- Admiral Dewey**—New, medium to large, one of the earliest, hardy and productive, highly recommended. July.
- Beer's Smock**—Large, yellow flesh, prolific, a good commercial sort, last of September.
- Bokara**—Very hardy, abundant bearer, medium size, fair quality, middle of September.
- Belle**—(Belle of Georgia)—Very large, skin white with red cheek, flesh white, firm and of excellent flavor. Tree a rapid grower, very prolific, fine shipper. Ripens with Crawford's Early.
- Champion**—A large, handsome early variety, creamy white, with red cheek, sweet, rich and juicy. Hardy and productive. The best and hardiest white peach. August.
- Crawford's Early**—A magnificent large yellow peach of good quality. Early in September.
- Crawford's Late**—A superb, large yellow peach. One of the best. Last of September.
- Carman**—Large, resembles Elberta in shape; color creamy, white or pale yellow, with deep blush; skin very tough, flesh tender, fine flavor and quite juicy; one of the hardiest. Ripens two or three weeks before Elberta. The best of its season.
- Engle's Mammoth**—Large, yellow; resembles late Crawford. More productive. September.
- Elberta**—Large, yellow, with red cheek; flesh yellow, firm, juicy. Exceedingly prolific, sure bearer and hardy. The leading market variety. Follows Early Crawford.
- Emma**—Similar to Elberta, but two weeks later.
- Foster**—Large, deep orange red, flesh yellow; very rich and juicy. Last of August.
- Fitzgerald**—An improved Early Crawford, equaling it in size, quality and color, hardy, large bright yellow with red cheek. August-September.
- Greensboro**—The largest and most beautifully colored of all the early varieties. Double the size of Alexander, ripening a few days later. Flesh white and juicy, and good. July.
- Gen. Lee**—A cling of good size and quality, fine for preserving. September.
- Hill's Chili**—Medium dull yellow. Extra hardy and productive. Last September.
- Heath Cling**—Very large, flesh white, juicy and melting. Good keeper and shipper. The best white flesh cling. October.
- Lemon Cling**—Large, yellow, lemon shape, red cheek. September.
- Mountain Rose**—Large, red, flesh white, juicy, hardy and one of the best. August.
- Old Mixon Free**—Large, pale yellow, deep red cheek, flesh white, tender and rich. September.
- Smock**—One of the old standard yellow peaches, delicious quality and excellent in every way. A little later than Elberta.
- Stump the World**—Medium to large, white flesh with a bright red cheek. Same season as Elberta.
- Triumph**—Ripens with Alexander, a few days after Sneed. The earliest yellow flesh peach, good size, handsome and fair quality vigorous grower.
- Waddell**—Medium size to large, hardy and abundant bearer, flesh white, with red cheek, a good shipper for an early variety, ripens with Carman.

SUDDUTH PEAR

The Sudduth Pear took first premium for pears at the LaCrosse Inter-State Fair of Wisconsin for 1911, and again in 1912.

The Original Sudduth Pear Tree is now 93 years old, and although every one of the original limbs has been broken off by heavy loads of fruit and storms of late years, yet it promises to round out a century of most remarkable history.

Nearly a hundred years and never failed a single season to bear a good crop, often as high as eighty bushels.

Never a blighted branch.

As hardy as an Oak, and, until broken, as handsome in form and foliage as a Sugar Maple.

The trunk of the tree is more than 10 feet in circumference, and looks as clean and healthy as a ten year old tree.

The fruit is classed as medium in size, excellent in quality and ripens from the middle to the latter part of October.

The fruit is almost seedless, unless the blossoms are highly fertilized by other varieties of pear near by. There is no woody or gritty substance in the core, but meat all the way through with no tough covering of the seeds, hence it is an excellent dessert fruit and without question the most valuable canning or preserving pear known, the peculiar formation of the fruit making it as easy to peel by machinery as an apple, with no core to remove.

The seed of the original Sudduth Pear Tree was brought from Xenia, Ohio, by Thos. Constant when he came west to Illinois, and was planted in the spring of 1820, before grafted fruits could be obtained. This seed was planted on Thos. Constant's farm that he entered from the Government, a year previous to the time Illinois was admitted to the Union as a State. Sixty-five years ago 9 grafts were made of the Sudduth, and planted on nearby farms, and later other grafts were made and planted. These grafts, as well as the younger trees, propagated of late years, have all the characteristics of the Original Sudduth Pear Tree; in growth, hardiness, and fruits, as well as the habit of annual bearing and entire freedom from blight and disease.

We first had our attention called to the Sudduth Pear about 20 years ago by Mr. Titus Sudduth, who owned the farm on which the original tree stood, having purchased it from Judge Logan, Abraham Lincoln's law partner, in 1862. Mr. Sudduth had known the tree since 1835, and fearing that something would happen to destroy the tree, got us to make some grafts from it.

The beautiful growth, hardiness and early bearing of these grafts was what first opened our eyes to its value. We then went down to Williamsville, Sangamon Co., Illinois, to see the tree, and talked with all the old settlers in that vicinity, and came to the only conclusion possible, that the Sudduth Pear, though up to that time overlooked, was undoubtedly the most valuable and wonderful variety of fruit we had ever known. We immediately took steps to control all the wood of the then existing trees with the intention of propagating it, and determined to have the name trademarked and registered, also to send out each tree with its registered trademark in the form of a lead seal attached to every tree sold. This was done to protect the public from unscrupulous tree men, who, we knew would soon sell Sudduth Pears without authority, and attempt to substitute an inferior or cheaper tree.

Send for our 34 page illustrated history of the Sudduth Pear, the most interesting history of any fruit ever introduced. Free for the asking.

None genuine without our lead seal attached by a copper wire.

WHY THE SUDDUTH PEAR HAS BECOME FAMOUS

The Sudduth Pear has been highly indorsed by more prominent fruit men than any new fruit ever introduced.

A number of pears called blight proof have come, are gone, and forgotten, but the Sudduth Pear has withstood the blight for nearly a century.

As handsome in form as a hard maple.

Hardy in the far north.

Does well in the south.

Attains great size.

Very long lived

Bears abundantly

Bears annually

Fruit of highest quality

The greatest canning pear known

The Sudduth Pear has a History that is a History, extending over a period of ninety years, free for the asking.

Price of Sudduth Pear.

Five to seven feet, first class trees.

\$1.50 for a single tree; \$6.00 for five; \$1.00 each for ten or more trees. Mailing size, prepaid, same price.

OTHER VARIETIES OF PEARS

Bartlett—Large, buttery, juicy and high flavored, very popular where blight is not too bad. August and September.

Flemish Beauty—Large, juicy and rich, hardy and moderately free from blight. September—October.

Garber—A Japanese Hybrid, earlier and larger than Keiffer, and of better quality, though not as long a keeper. Plant with Keiffer as a fertilizer. Quite free from blight.

Keiffer—Large size and handsome, with remarkable keeping qualities, though not of the highest quality, is excellent for culinary purposes, and one of the most profitable and sure bearers. Plant either Garber, Mikado or Duchess Dwarf with it for fertilizer. Quite free from blight. September to January.

Sheldon—Medium size, yellow with red cheek, a splendid pear though a little coarse and reasonably free from blight, hardy and abundant bearer..

Seckle—A small russet pear of the highest quality. September—October..

Lincoln—Introduced by us twenty years ago, originated at Lincoln, Illinois. For many years we sent it out under our seal. A large, yellow, sweet, juicy pear of high quality, resembling Bartlett but not as subject to blight and of higher quality. We received a bronze medal for Lincoln pears at the Buffalo Exposition.

PLUMS

Wilson

The Wilson plum came to us among a lot of seedlings from Iowa about 15 years ago, and was planted in our experimental orchard. It came into bearing quite early and from the first attracted attention on account of the superior quality of the fruit.

The fruit is very large for a native sort, flesh solid and meaty, quality rich, sweet, with no bitter taste to skin. Color a bright red, with a touch of yellow on lower side, form slightly oval, and ripens a little after the Wild Goose.

As we further tested the Wilson, we found that it was not only a superior fruit but a very heavy bearer and in the eleven years we have fruited it, we have gotten nine good crops, one slight crop and one failure, caused by a heavy freeze in May that killed all the fruit in the orchard.

We have gotten from the Wilson at least 4 bushels of fruit to one of any other variety.

While every variety tested has been seriously affected with both Curculio and Rot, we have never found a wormy plum in the Wilson, nor has the fruit ever been attacked by the Rot.

So far as this section of the country is concerned, at least, we unhesitatingly place the Wilson at the top of the list, both for home use and commercial purposes.

The Three Best Japanese Varieties

Abundance—One of the best known Japanese varieties, hardy and productive, fruit large, yellow, overlaid with red. Good. August.

Burbank—Another Japanese variety, ripening two weeks after. Abundance, larger and heavy bearer, ships well, tree sprawling, vigorous grower, good, August.

Red June—The best Japanese plum to ripen before Abundance, medium size, cherry red, good quality, heavy bearer, one of the best and most profitable, very free from rot.

Improved Native Plums.

De Soto—Medium, bright red, very hardy, an abundant and sure yielder, profitable. September.

America—A new hardy native plum, red, of large size and good quality. September.

Miner—An old standard native plum, large, juicy, sweet, reddish cast with yellow dots, a splendid plum, sometimes overlooked for newer varieties not nearly so good. September.

Wolf—Large, free stone, fine as a dessert, very popular and hardy. August.

Wild Goose—Fruit medium to large, dark red, and a standard commercial sort, sure bearer and excellent quality. July.

Milton—Similar to Wild Goose, larger, very hardy and a splendid variety, originated in Iowa, earlier than Wild Goose,

Chas. Downing—Another Iowa plum that has done splendidly, red and yellow, of excellent quality. Three weeks later than Milton.

European Plums

Damson—Small blue plums that are enormous yielders and much sought after for canning and preserving. September.

Lombard—A well known large blue plum, very hardy and abundant bearer, quality good. September.

Shipper's Pride—Resembles Lombard in color and quality, is much esteemed on account of its market qualities.

QUINCE

Champion—A prolific and heavy bearer, more oval in shape than Orange, long keeper, quality fine, late.

Orange (Apple)—Fruit large, bright yellow, excellent flavor.

Meech's Prolific—Strong grower, very productive, fruit large, orange color and very fragrant. Excellent.

Rea—A seedling of the Orange of same color and shape but larger.

Price	Each	Ten

BLACKBERRIES

Snyder—The hardiest and best all purpose blackberry. We introduced it to the west over thirty years ago and it still holds its place at the top of the list for hardiness, yield and quality.

Ey. Harvest—Very valuable where it is not too cold, needs protection in the north. Two weeks earlier than Snyder and fruit not quite so large. Solid and a good shipper.

La Grange—A new hardy blackberry, said to be of Russian origin, a vigorous grower, canes measuring 12 to 14 feet if not trimmed. Later and larger than Snyder, and a heavy yielder, free from rust and disease; highly recommended and a remarkably promising new berry. Stock limited.

Price

By mail prepaid add 2c extra per plant.

DEWBERRIES

Lucretia—A low growing or trailing blackberry, larger and juicier than blackberries, perfectly hardy, fruit ripens ten days before blackberries and is often one and one half inches long and one inch in diameter. Mulch to keep berries off the ground, an enormous yielder, and no fruit garden is complete without them.

	Each	10	100	1000
Price	.06	.50	4.00	

RASPBERRIES

Columbian, (Purple)—This variety has given the best results of its class here, fruit purplish red, enormous size berries, and strongest growing canes of any variety. A wonderful producer.

Cumberland (Black)—Fruit is larger than any other black cap, quality excellent, a firm berry, jet black, splendid shipper, very desirable for market or home use, being very vigorous and productive.

Gregg (Black)—A well known standard commercial sort, fruit very large, solid, enormous yielder, a very reliable sort.

Kansas (Black)—A well known standard sort, much used by commercial growers, an enormous producer, fruit large and high quality. None better.

Cuthbert (Red)—Undoubtedly the best of the reds, strong grower, fruit large, firm, high quality and very prolific, extensively planted for home use and market.

King (Red)—This is a comparatively new red berry, but we have fruited it quite heavily on our grounds for the past three years, and we like it better than any red raspberry we ever grew, fruit very large, solid, and covers a long season. Quality is the best.

Plum Farmer, (Black)—Of recent introduction, and one of the most promising berries ever introduced. Fruit borne in great abundance, large, excellent quality.

ST. REGIS, EVERBEARING (Red)—The latest thing in raspberries. Although we have not had it long enough to venture a positive opinion this new berry is claimed to be a most wonderful berry, being a true everbearer, yielding throughout the summer an abundance of fruit, of the highest quality. Is reasonably ever-bearing with us and heavy yielder. Our customers speak very highly of St. Regis and it is certain to become very popular. Our stock is genuine, from the originator. The above is what we said of the St. Regis last year. Another season has proven it of more value than we expected. The fall crop was quite heavy, and in some nearby places it did even better than with us.

JUNE BERRIES—Dwarf.

Service, or Shadberry—These valuable garden berries are being used more and more, very similar to blue or huckle berries, borne in profusion, very fine for serving fresh or canning. Succeed everywhere.

Each 20c; per 10..... 1.50

CURRENTS

One of the easiest to grow and one of the most valuable fruits of the garden.

Perfection—A new variety, recently introduced, and well named, Perfection. Hardy, abundant bearer, highest quality, fruit as large or larger than Fay's. Pronounced by experimental stations and leading horticulturists everywhere, the finest red currant ever introduced. Has taken more medals and awards than any other currant.

Black Naples—A very strong, vigorous grower, probably the best of the black currants, prolific and large fruit.

Cherry—Well named, berries very large, bunches short, plant vigorous and productive, a standard and hard to beat.

Red Dutch—An old variety and still very popular, and though not as large as some, the quality and yield make up for that, hardy vigorous, excellent.

London Market—A bright red currant, long bunches, good size, and a splendid currant. Much used for commercial planting.

Fay's Prolific—One of the largest currants grown. Bunches medium length, quality very fine, an excellent market sort.

Red Cross—With us the Red Cross has thus far proven superior to every other variety except Perfection in yield, size, quality and hardiness, as well as vigor of growth. You will make no mistake in planting the Red Cross.

White Grape—A very large golden white currant, sweet, fine flavor, fine for table use, very thrifty and vigorous, the best white currant.

GOOSEBERRIES

One of the most valuable commercial fruits grown

Downing—A native variety, large, pale green, handsome, and fine quality, free from mildew, bush a vigorous grower and heavy yielder.

Houghton—Smaller than Downing, pale red when ripe, of highest quality, and an enormous yielder, free from mildew, one of the best. Will yield more fruit to the plant than any other variety, excellent for canning.

Industry—Plants imported, a very large berry, excellent flavor and less subject to mildew than most foreign varieties.

Price

By mail, prepaid, 2c extra per plant.

	Each	10	100

GRAPES

There is scarcely a yard so small, either in country or city, that room for one to a dozen or more grapevines cannot be found. They do admirably trained up to the side of any building, or along the garden fences, occupying but little room and furnishing an abundance of the healthiest of fruit. Make the soil mellow, and plant the vines somewhat deeper than they stood in the nursery. Plant about 8 feet apart, by the fence or building. For vineyards, make rows 8 feet apart, 6 to 10 feet in rows.

MOORE'S EARLY GRAPE

Price

By mail, prepaid, 2c extra per plant.
Strong, 2 year plants.

Worden, Black	.12	1.00	8.00
Woodruff, Large, Red	.20	1.75	15.00

Black

Concord—The well known standard variety, succeeds wherever grapes will grow.

Moore's Early—Bunch large, berry large round, with heavy bloom, vine exceedingly hardy. Its earliness makes it desirable for an early market. Its hardiness particularly adapts it to Canada and northern portions of the United States; succeeds admirably in the south. The early grape.

Worden—A splendid grape of the Concord type, large, better quality, and earlier. Vine vigorous; hardy and productive.

Ives—Bunch long, compact, medium size berry and bunch, hardy, abundant yielder, quality medium, a little foxy, excellent for culinary purposes.

Red or Amber

Brighton—Bunch large, well formed; berries above medium to large round, excellent flavor and quality; one of the earliest in ripening.

Delaware—Bunches small, compact, shouldered; berries rather small round; skin thin, light red; flesh very juicy, sweet, spicy and delicious.

Woodruff—A handsome, profitable sort, vine vigorous, productive; iron-clad constitution. Bunch and berry large, attractive; ripens early; fair quality, long keeper, good shipper.

White

Goethe—Greenish yellow, red tinge, berry large, bunch medium, abundant, excellent flavor, tender and sweet; an excellent hardy grape.

Moore's Diamond—A leading early white grape, ripening before Moore's Early. White, with rich yellow tinge; juicy, few seeds, almost free from pulp, excellent quality; above medium size, adheres freely to stem. Vine like Concord in growth, hardiness and foliage. Fine variety for both market and home garden.

Golden Pocklington—Bunch and berries large, when fully ripe a light golden yellow; juicy, tender, sweet, with little pulp. Vine thoroughly hardy, strong grower, free from mildew; productive. One of the most satisfactory white varieties.

Niagara—This white grape is justly regarded as one of the very best known; very fine quality for a table grape; very prolific, hardy and of fine flavor. Fruit keeps well, if carefully handled; one of our favorite sorts.

STRAWBERRIES

Strawberries will succeed in any soil that is suited to ordinary garden or farm crops. There is nothing that will give more returns or greater enjoyment for a little trouble than strawberries, and every family can have a good supply all through the season at less expense than buying a few poor berries now and then at the market.

Varieties marked (P.) have an imperfect blossom and must have a variety not so marked planted by them for fertilizer.

3-W.—This is a chance seedling strawberry found growing along the railroad a few years ago. We have fruited the 3-W for 3 years on our grounds, and it has been tested by many of the leading berry growers in this and adjoining states. The ber-

ries are very large and uniform in shape, it has a perfect blossom, needing no other berry for fertilizer. It is a rich red all the way through, very solid, holding up well and making an excellent shipper. Quality excellent, and sweet.

Commence to bear early, and continues clear through the season, holding up well in size and quality. The 3-W is one of the heaviest yielders we have ever seen, setting enormous crops that ripen up perfectly.

The 3-W took the silver medal at the St. Louis Exposition, after having been shipped 500 miles and were on the exhibition tables for 10 days, as hard a test as could have been given. One plant has given as much as a quart of berries at a picking. The plants are the strongest growers, with the largest roots we have ever seen, with heavy long fruit stems nearly as large as a lead pencil. The 3-W is highly endorsed by the Illinois Experiment stations, in some instances far exceeding all other varieties.

Brandywine—A fine, large, late, handsome, productive berry of excellent quality, regular, conical form; dark glossy red, extending to the center. Plant healthy and vigorous, abundant producer. An extra good sort for all purposes.

Gandy—A reliable late variety, berries bright crimson, very uniform in size and shape, large and firm, plants vigorous and healthy.

Senator Dunlap—A well tested, wonderfully productive variety, one of the safe sort to plant everywhere. Has taken a high place among the prominent standard sorts. Plant resembles Warfield, rampant runner, should be restricted in its production of plants; fully equal to Crescent and Warfield in its ability to succeed under all circumstances. Fruit good size, regular form, beautiful bright red, glossy, firm, splendid keeper and shipper, excellent quality, one of the best for canning. Ripens early and continues a long time. It stands at the head in its wonderful ability to ripen a good crop under almost any condition of drouth or neglect. The best.

Warfield (P)—Its great beauty, firmness, earliness, good flavor, productiveness and vigor make it exceedingly popular. Ripens with Crescent, and is superseding that variety for a reliable market sort.

Strawberries must be shipped either by express or mail.

NUT TREES

Japanese Walnuts—From Japan, of great value. Trees make beautiful shade trees and commence bearing quite young, good crops of delicious nuts, resemble butter nuts in size and shape, but with thinner shells; perfectly hardy and desirable. Certain to become one of our popular trees.

Almonds—Hard Shell—A very ornamental tree and bears plump rich nuts. Will do well wherever the peach does well. The shell is harder than the soft shell but quality just as good. Valuable.

Price

	Each	10	100
Almonds, hard shell, 4 to 6 feet.....	.35	3.00	
Walnuts, Japan, 2 to 3 feet.....	.25	2.25	20.00

PERSIMMONS

*The American Persimmon is hardy in Central Illinois. The top may kill back a little while young, but they make handsome trees as they grow older, yielding quantities of delicious fruit. Well worth planting.

SHADE AND ORNAMENTAL TREES

We have a very complete assortment of shade trees and give descriptions of those varieties not so generally known. Our trees are all nursery grown transplanted stock with good roots.

***Birch—American and European White**—The most charming and graceful shade trees grown.

Price

	Each	Ten
8 to 10 feet	.75	6.00
6 to 8 feet	.50	4.50
5 to 7 feet	.40	3.50

For Cut Leaved Weeping Birch, see weeping tree.

Beech—Purple Leaved, or Copper Beech—The copper beech is one of the most striking foliage trees grown. Purple leaves in summer, changing to a copper brown in fall. Make fine specimen trees.

Price

Imported, 5 to 7 feet, each.....	1.50
----------------------------------	------

Buckeye—See Horse Chestnut.

***Catalpa Speciosa**—We grow large quantities of these, and gather the seed ourselves from genuine Speciosa trees. Makes a beautiful flowering tree, upright growth and large round leaves. The genuine Speciosa Catalpa is very rapid in growth, and without question is the most valuable hardy timber tree that we can grow. Planted very extensively for railroad ties and posts. The most durable of any timber known for that purpose. Makes a fine finishing lumber. Our stock is genuine hardy Speciosa. We have a large quantity of very fine small seedlings.

*—Native of Illinois.

4 to 5 feet.....	.50	4.00
3 to 4 feet.....	.40	3.00

Larch—European Larch—The European larch is much hardier in this climate than the American, making a much handsomer tree. There is probably no more beautiful tree than the larch, with its fine feathery foliage. They are very rapid growers and are not planted nearly as much as they should be. They are excellent for wind breaks, besides making fine individual specimens.

Price

	Each	10
2 to 3 feet	.25	2.00
3 to 4 feet	.30	2.50
4 to 6 feet	.40	3.00

*—Native of Illinois.

***Linden—American and European, Basswood**—Splendid trees, quick growing, and the sweet blossoms in June attract the bees.

	Price	Each	10
6 to 8 feet		.60	5.00
5 to 7 feet		.40	3.00
3 to 4 feet		.20	1.50

***Maple—Box Elder**—One of the hardiest trees grown.

	Price	Each	10
8 to 10 feet		.40	3.00
6 to 8 feet		.30	2.00
5 to 7 feet		.15	1.25

California Maple—A form of box elder considered a little more ornamental than the common box elder.

	Price	Each	10
6 to 8 feet		.45	3.50
5 to 7 feet		.35	3.00

***Soft or Silver Maple**—Very quick growers and a popular tree.

	Price	Each	10
8 to 10 feet		.30	2.50
6 to 8 feet		.20	1.75
5 to 7 feet		.15	1.25
4 to 5 feet		.10	.80

***Hard or Sugar Maple**—Same price as Norway maple, grows taller and not so dense as Norway.

Norway Maple—Similar to the Sugar or Hard Maple, more rapid in growth, and more uniform in shape. A magnificent shade and street tree.

	Price	Each	10
4 to 6 feet		.40	3.50
6 to 8 feet		.60	5.00
8 to 10 feet		.90	8.00

Maple Schwedleri,—Red leaved maple. Identical to Norway, except the leaves are blood red in spring, changing to a coppery bronze later. Our stock we import and grow several years before selling. Price, double that of Norway.

***Weirs Cut Leaved Maple**—A form of soft maple with handsome finely cut leaves, a very ornamental and desirable tree.

	Price	Each	10
10 to 12 feet		1.00	8.50
8 to 10 feet		.80	7.00
6 to 8 feet		.60	5.00

***Mountain Ash—American and European Mountain Ash**—The finely cut foliage of the mountain ash together with their clusters of blossoms in the early summer, and great quantities of brilliant orange colored berries in the fall make them a very ornamental and pleasing tree for the yard.

	Price	Each	10
8 to 10 feet		.50	4.50
6 to 8 feet		.40	3.50
4 to 6 feet		.25	2.00

Mulberry—Russian (See Fruits)—Since ornamental hedges are becoming so popular the Russian Mulberry will be much used for this purpose. It makes an excellent hardy hedge which can be trimmed to any desired shape. For price of Mulberries see page 40.

Weeping Russian—See Weeping Trees.

OAK

The oaks we offer are the varieties that do best under Illinois conditions, and grow readily in either lime or acid soils.

*—Native of Illinois.

***Burr Oak**—One of the strongest rugged types of the oak family, yielding very large acorns in abundance. Trees rapid growers and very handsome.

	Price	Each	Ten
6 to 8 feet, 1¼ inch.....		.65	6.00

***Red Oak**—A large native tree with deeply cut, bright green leaves, foliage changing to purple in the fall.

	Price	Each	Ten
6 to 8 feet.....		.65	5.50

***Pin Oak**—The handsomest and most refined of all the oaks. Trees are rapid growers, making beautiful symmetrical heads.

	Price	Each	Ten
4 to 6 feet.....		.35	3.00

***Poplar**—**Carolina Poplar**—The most rapid grower of all shade trees and much in demand. Valuable for quick and temporary shade in street or yard. It seems to be fashionable for some people to denounce the Carolina Poplar. Still there are more of these trees sold probably than any other shade tree. They are a valuable tree if properly used. Plant them for quick shade interspersed with other kinds for permanent shade. Then cut them out when they crowd.

	Price	Each	10
16 to 20 feet, 3 to 4 in. diameter.....		1.50	12.50
14 to 16 feet, 2 1-2 to 3 in. diameter.....		1.00	9.00
12 to 14 feet, 2 to 2 1-2 in. diameter.....		.70	6.00
10 to 12 feet, 1 3-4 to 2 inch stems		.55	5.00
10 to 12 feet, 1 1-4 to 1 3-4 inch stems		.45	4.00
8 to 10 feet		.35	3.00
6 to 8 feet		.25	2.00

Special prices on large quantities.

Van Gerts, or Golden—A typical poplar similar in style of growth to the Carolina Poplar, but grows more slowly and has golden leaves.

	Price	Each	10
4 to 6 feet, branched.....		.60	5.00
3 to 4 feet, branched.....		.40	3.50

Volga Poplar—One of the newer varieties of poplar, which grows similar to the Carolina, more trim and a a handsomer tree, foliage more refined.

	Price	Each	10
10 to 12 feet		.80	7.00
8 to 10 feet		.60	5.00
7 to 8 feet		.40	3.50

Bo'leana Poplar—An upright silver leaved poplar grows tall and slender similar to the Lombardy poplar and much more satisfactory than the Lombardy where that style is desired.

	Price	Each	10
8 to 10 feet		.75	6.50
6 to 8 feet		.60	5.00

Plum—**Prunus Pissardi**—**Purple leaved plum**—Very ornamental, deep purple foliage, a striking and handsome tree.

	Price	Each	10
4 to 6 feet		.30	2.50

***Red Bud, or Judas Tree**—A dwarfish growing tree which blossoms very early in spring before the leaves appear. The trees in blossom are a solid mass of flaming red, very striking and ornamental.

	Price	Each	10
4 to 6 feet		.50	4.00
3 to 5 feet		.40	3.00

*—Native of Illinois.

***Sycamore**—A valuable native tree, much used for street planting and shade. Its light colored bark making a pleasing contrast.

	Price	Each	10
6 to 8 feet		.35	3.00
5 to 7 feet		.25	2.00
4 to 5 feet		.15	1.25

***Tulip Tree**—*Liriodendron Tulipifera*—In the early summer the delightful fragrant blossoms of the Tulip tree lasting several weeks together with its strong upright growth and beautiful dark green foliage make this one of the grandest of our native trees. We have a large stock of splendid trees.

8 to 10 feet	.45	4.00
6 to 8 feet	.30	2.50

Willow—*Cromwell* or *Cabra*—The well known and prized pussy willow so attractive in early spring.

	Price	Each	10
5 to 7 feet		.30	2.50
3 to 5 feet		.20	1.50

Golden—The brilliant golden bark and beautiful foliage make this a decidedly attractive tree in both summer and winter.

	Price	Each	10
3 to 4 feet		.25	2.00
2 to 3 feet		.20	1.50

NAPOLEON WEEPING WILLOW, THE FINEST IN ITS CLASS

*—Native of Illinois.

WEEPING TREES

Cut Leaved Weeping Birch—Forty feet—As a specimen tree for the lawn with its fine feathery foliage and drooping habit together with its clean white bark, makes this a very popular tree.

	Price	Each	10
5 to 7 feet		.80	7.50

Russian Mulberry—Eight feet—These trees are not only ornamental but bear large quantities of fruit that is much liked by the birds as well as most people. A very distinct tree, with its long slender branches that sweep the ground. Can be trained over a seat or wall and makes a beautiful effect.

	Price	Each	10
2 year heads		1.25	10.00

Willow.

Kilmarnock—Eight feet—These trees are grafted about 6 or 7 feet high and the trailing branches reach to the ground. Unique little trees for special purposes.

	Price	Each	10
2 year heads		.75	6.00

Napoleon—Forty feet—This variety came to us from a neighbor, Father Sherman, who received it direct from Napoleon's grave on the Island of St. Helena, through a missionary friend returning from Africa. Probably no trees in the world were ever more famous than these weeping willows. Perfectly hardy, and the long streamers often 20 feet in length and no larger than a lead pencil, make them one of the most picturesque and striking trees grown.

	Price	Each	10
6 to 8 feet		.75	6.00
5 to 6 feet		.60	5.00
4 to 5 feet		.45	4.00

EVERGREENS

The secret of transplanting evergreens successfully lies in never allowing the roots to become the least bit dry. A few minutes exposure to wind or sun, will dry up the small fibrous roots changing the sap to a hard resinous substance, and no amount of care and attention will ever make them grow after this happens.

They can be shipped around the world with safety however, if they are not allowed to ever become dried. We dig evergreens when so ordered with a ball of earth attached to the roots, and burlap them in this way at an extra charge of 10c each. We use every precaution in digging and handling evergreens to keep them always moist.

All two and three times transplanted

***Aborvitae—American**—Flat leaved ornamental, suitable also for hedge.

	Price	Each	10
12 to 18 inches		.20	1.50
18 to 24 inches		.30	2.50
2 to 3 feet		.40	3.50

Pyramidal—Grows in a perfect pyramidal form. A beautiful variety.

	Price	Each	10
18 to 24 inches		.50	4.00

*—Native of Illinois.

Austrian Pine—Strong growing, rather coarse, long heavy needles one of the best.

	Price	Each	10
18 to 24 inches		.30	2.50
2 to 3 feet		.40	3.50
3 to 4 feet		.50	4.50

Scotch Pine—Similar to Austrian but more compact, a splendid hardy tree.

	Price	Each	10
12 to 18 inches		.20	1.50
18 to 24 inches		.30	2.50
2 to 3 feet		.40	3.50
3 to 4 feet		.50	4.50
4 to 5 feet		.60	5.50

***White Pine**—One of the most graceful and refined of all the tall growing evergreens, one of the finest evergreens for this trying climate.

	Price	Each	Ten
12 to 18 inches.....		.25	2.00
18 to 24 inches.....		.35	2.50
2 to 3 feet.....		.45	4.00
3 to 4 feet.....		.60	5.00

Jack Pine—A handsome, very rapid growing hardy pine, that does well under conditions where other evergreens will not grow.

	Price	Each	10
18 to 24 inches		.25	2.25
2 to 3 feet		.35	3.00
3 to 4 feet		.45	4.00

Mugho or Dwarf Mountain Pine—A picturesque pine, never grows higher than a few feet but spreads out over large area. Strong plants about 14 to 18 inches high.

Price, 75c each, per 10	6.50
-------------------------------	------

Mahonia Aquifolia—See shrubs

Larch—See ornamental trees.

Spruce, Norway—The well known spruce, much used as windbreak.

	Price	Each	10	100
12 to 18 inches		.25	1.75	12.50
18 to 24 inches		.30	2.50	18.00

***White**—This is a native of America and holds its foliage better than Norway, finer needles and a better plant.

ANNOUNCEMENT

Guarantee of Genuineness—We exercise the greatest care to have all stock pure and true to label, and we hold ourselves in readiness at all times to replace the stock that may prove untrue to label, or refund the money paid, when promptly notified, but it is mutually understood, and agreed, between ourselves and the purchaser, that our guarantee of genuineness shall in no case make us liable for any sum greater than that originally received for said trees or plants.

Responsibility—Our responsibility extends only to those purchasing direct from us. We are employing no agents to sell general nursery stock.

Prices—Prices herein given are subject to change without notice. Five will be furnished at 10 rate; fifty at 100 rate; 500 at 1,000 rates.

Claims—For shortage, damage in transportation, or otherwise we must be notified at once in order that same may be adjusted while details are fresh in mind.

Terms of Payment—Cash with order unless otherwise arranged. Remit by New York, Chicago, or St. Louis draft; Postoffice or Express Money Order, made payable to Augustine & Co., or by Registered Letter. Goods will be sent C.O.D. when one-half the amount is sent with the order.

Substituting—Unless order is marked, no substitution, should the supply of a variety be exhausted which will occasionally occur in all establishments, especially when the packing season is about over, it is our custom to substitute a sort, giving correct name, of equal or better value than the variety ordered, and when such is not in stock the number will be left unfilled and the money returned.

*—Native of Illinois.

Packing—At the prices quoted no charge will be made for packing, baling or boxing, nor for delivery to the Carriers at freight depots or express offices.

Shipping—After delivering goods to the forwarders in perfect condition our control ceases, also our responsibility. When explicit directions are not given as to route and manner in which goods are to be shipped we use our best judgment in selecting a route, but in no case can we be responsible for losses thereby. But all orders lost or spoiled in transit we refill free. The Illinois Central, Chicago & Alton, Lake Erie & Western, and Big Four railroads, radiating as they do in ten different directions, and making direct connections with nearly every important trunk line in the country, afford the very best shipping facilities. Small packages should be shipped by express. The expense of shipping by express, on medium sized orders is seldom more than by freight, and often less.

The Spring Packing Season—Begins about March 1, and continues through April and into May. The fall season begins about October 1, and continues until cold weather sets in. We can ship by express to Southern points any time during the winter months.

Shipping by Mail.—We have had so many orders and inquiries for stock to be sent by mail that we make a special mailing price on all kinds of trees and plants that can be shipped by mail.

The new Parcel Post law does not apply to plants, except that we can now send eleven pounds instead of four as heretofore. The special rate in force in past years, one cent per two ounces, or eight cents per pound, is cheaper in most cases than the present Parcel Post rate.

Ordering—Order early by all means. There are many advantages to be gained by ordering early, besides the discounts. Nothing is to be gained by ordering late and then early orders find full stock. Please use order sheet. Write name plainly; give Postoffice, County and State, be particular to state how the goods are to be shipped, whether by mail, freight or express, and give route. Keep a copy of the order and check off the trees, plants, etc., when they arrive.

DISCOUNTS

Allowed on all Orders Amounting to \$5.00 or Over.

8 per cent on orders placed during February.

5 per cent on orders placed during March.

Cash must accompany order for the full amount when discounts are allowed. The discount we allow is usually more than enough to pay the cost of freight, and saves us expense in bookkeeping.

FREEDOM FROM DISEASE.

Of great Value to the Planter, is the fact that we have our nurseries and surrounding grounds examined each year by the department of Entomology at Champaign, and a certificate of health accompanies every shipment we make. No San Jose scale or other injurious pest or disease has ever been discovered in our nurseries.

Yours very truly,

AUGUSTINE & CO.

Normal, Illinois.

WHAT TO DO WHEN YOUR PLANTS COME

As soon as you receive the stock it should be unpacked, and the roots puddled. If the trees are dried or shriveled in the least, place them in water at once, allowing them to be completely covered for twelve to twenty-four hours. In case you should not want to plant out as soon as unpacked, heel-in in moist soil, never allowing the roots to become dry or failure will likely result.

Remove all broken or extra long roots, with a sharp knife, cutting from below outwards. One-year old peaches and apple trees should be cut back to a naked stem, but do not cut off buds next to body. Two-year old trees should have their branches cut back at least half their length, the lower shorter than those above.

Care should be taken to have ground thoroughly plowed and subsoiled to a depth of at least fifteen inches. The holes should be sufficiently broad and deep so that the roots can be straightened to their natural position without cramping. Two inches or more of fresh surface dirt should be placed in the bottom of the hole in which to bed the roots; set the tree two or three inches deeper than it stood in the nursery row, allowing it to lean a considerable to the southwest; fill in among the roots with mellow soil and pack down firmly with the foot. When the hole is about half full, if the ground is dry, pour in enough water to thoroughly moisten the earth, fill the hole with dirt, pressing firmly, especially around the stem. Leave the surface smooth and mellow and keep well pulverized during the growing season. Never pour water on top of the ground, but dig trenches around the tree or insert a tile, about fifteen inches from the tree, slanting towards the roots, and fill with water every evening until the ground is thoroughly saturated below the roots. Partial surface watering during a dry spell does more injury to young transplanted stock than good. We strongly advise mulching for winter protection. Be sure to loosen the wire label before planting.

AUGUSTINE & CO., Normal, Ill.

Distance for Planting .

	Feet apart
Standard Apples.....	18 to 30
Standard Pears and Cherries.....	16 to 20
Dwarf Pears and Cherries.....	10 to 12
Peaches and Plums	16 to 20
Apricots, Nectarines, etc.....	12 to 18
Buckthorn, Privet, and Barberry for hedge....	6 to 12 inches

	Rows Apart	Plants Apart
Blackberries	6 to 9 ft.....	2 to 3 ft.
Raspberries	6 to 7 ft.....	2 ft
Strawberries.....	3 ft.....	1 to 1½ ft
Currants	5 ft.....	4 ft
Gooseberries	5 ft.....	4 ft

Number of Trees or Plants Required per Acre at the Following Distances

3 by 3 ft.....	4,800 trees or plants..	12 by 12 ft.....	302 trees or plants
4 by 4 ft.....	2,722 trees or plants..	15 by 15 ft.....	193 trees or plants
5 by 5 ft.....	1,741 trees or plants..	18 by 18 ft.....	134 trees or plants
6 by 6 ft.....	1,210 trees or plants..	20 by 24 ft.....	108 trees or plants
8 by 8 ft.....	680 trees or plants..	25 by 25 ft.....	69 trees or plants
10 by 10 ft....	435 trees or plants..	30 by 30 ft.....	48 trees or plants

Multiply the distance in feet between the rows by the distance in feet between the plants; divide 43560 by this product, and the quotient is the number of plants that can be planted to the acre.
