Growing and Keeping Dahlias

CULTURAL NOTES.

Select a well drained location where dahlias will get the full benefit of the sun most of the day. Avoid planting near any building or thick hedge. Any good garden soil will grow fine dahlias if a liberal amount of fertilizer is used and thoroughly spaded into the soil. Set roots three feet apart and four inches deep. Lay roots on their sides with growing shoot up. Cultivate frequently when plants are above ground until they begin to bloom. Give deep cultivation at first, but as plants get well grown just have top soil loosened up so as not to crust. Dahlias, well cultivated, will require no watering. Do not plant too early, as nothing is gained by so doing. May 1st to 15th is plenty early. If bothered by cut worms, make a collar from some thick paper, such as tarred paper, and place around plants. Cut paper three inches wide, and ten to twelve inches long, form collar, and place around plants one and one-half inches below, and one and one-half inches above ground.

Some use a small handful of slaked lime around each plant as soon as it comes through the ground, for cut worms, with good results. This is also a plant-food and an infallible remedy for sour soil. Stake securely as a protection against the wind.

HOW TO KEEP DAHLIA ROOTS.

When dahlia tops are destroyed by frost, cut stocks off close to ground. Lift clumps the first warm sunny day and allow them to dry in sun. When thoroughly dry, store them in the cellar and cover with dry earth or sand. Be sure both roots and sand are perfectly dry before covering. If no cellar is convenient, place them in box or barrel, and pack with sand. Place them in ground deep enough to be sure frost won't damage them. Dig them when time to plant, and divide the roots before planting.

When dividing roots use a strong sharp knife and cut down through the stalk to break the clumps apart. It will then be found easier to separate each root, leaving one or two growing eyes to each. These will generally be found where root joins the stalk.

General Information

STRONG FIELD-GROWN ROOTS.

When ordering dahlias it is best to get field-grown roots if possible. This is the easiest way to grow dahlias and give the best results. My stocks consists of field-grown roots only. Every roct sent out is guaranteed to be a sound-growing root that will bloom true to name. Customers will please notify me if roots are not as guaranteed. Order early.

ORDERS DELIVERED FREE.

All roots delivered free at prices quoted in catalogue. Customers wishing roots sent by express at their expense will receive larger roots and enough extra different varieties to more than cover extra cost to them. All orders acknowledged when received. Roots delivered when ready to plant, about May 1st, unless otherwise ordered.

SUBSTITUTING.

When any variety ordered is sold out, customers will be notified, and if no substitute is wanted money will be returned.

REMITTANCES.

Please send money when ordering by Post Office money order or registered letter. Small amounts will be accepted in U. S. one and two cent stamps.

WHEN ORDERING

Be sure to write your name and address very plain. This is important, as it wil save a lot of trouble.

FREE ROOTS.

When ordering, if customers will send me a few names and addresses of friends interested in flower gardening, so that I can send them my catalogue, I will remember them with some choice varieties for their kindness.

CACTUS DAHLIAS—

J. H. JACKSON, see page six.

This class of recent introduction is distinct from all others. Flowers are very loosely and irregularly formed, greatly resembling the chrysanthemum. Petals are long and tubular, some being nearly straight, some gracefully incurved, while others are very oddly curled and twisted. In no other class will such a wonderful combination of colors be found as in the cactus. In the following pages will be found the latest and best standard varieties.

Please use Order Sheet when ordering.

DECORATIVE DAHLIAS

DELICE, see page nine

This class of dahlias is becoming more popular each year. They are large, handsome flowers, with long, straight stems, making them fine for decorative and cut-flower purposes. The style of flowers in this class varies, the petals of some being broad and flat, some long and curved, and others beautifully quilled, but all perfectly double.

PEONY FLOWERED DAHLIAS

GEISHA

see page thirteen

The peony flowered or art dahlia, as it is sometimes called, is a comparatively new class which has attracted a great deal of attention in the last few years and is becoming very popular. The flowers, which are semi-double, bloom very freely. They are of immense size and are borne on long, straight stems, making them fine for cutting. List of the finest of these beautiful artistic flowers on page following.

Please use Order Sheet when ordering.

PAEONY FLOWERED DAHLIAS, con

Andrew Carnegie. Clear salmon pink with bronze shading; center very prominent and rounded; petals are somewhat flat, making it a distinct shape25c

Bertha Von Suttner. In form similar to "H. Hornsveld," an elegant twisted petal. The immense flower always carried erect; color beautiful salmon shaded yellow.....25c

Caesar. New canary-yellow, well-formed flower, borne on long stems; fine for cutting.....30c

Canary Girl. The color is a delicate canary-yellow, one of the newest novelties in Paeony flowered dahlias25c
