DIRECT TO THE PLANTER

Northern Spy Apples

The Main Street Nurseries

ALTON E. RANDALL

Dansville, N. Y.

RETAIL ONLY

Appreciation and Thanks

WE APPRECIATE, to the fullest extent, the trade that comes to us, and we embrace this opportunity of expressing sincere thanks to our many patrons and friends. We solicit your continued patronage. While our business is still small it has doubled each year since the start; we believe this has been accomplished by our endeavor to give our patrons honest goods at honest prices. Our earnest and untiring endeavor to supply the best possible at the very lowest price, (consistent with the quality) to our customers has been amply rewarded as is evident by the increasing business each year. In preparing this catalog we have described truthfully the various trees and their fruits. We have tried to abstain from making any rash promise or extravagant descriptions.

A Few Don'ts

Don't fail to order early, as the first orders received, receive first attention. Stock is complete. Lots of time for packing and you get your trees in better condition.

Don't forget that this little catalog is our only salesman with only a one-cent stamp to reach you. No agents with high salary and big commission to make off the planter.

Don't you know that the express companies charge 20% less on trees than on other packages? For this reason trees in lots of 100 or less should go by express when possible.

Don't fail to send personal check if you wish to and without any exchange. If your check is good at home it is good with me.

Don't be afraid to ask questions. Your letter asking for information about trees will receive the same careful attention that it would should it have contained an order for trees.

Don't forget about our free trees. We always give two extra trees with your order if you will enclose names of fifteen property owners who may become customers of ours. We also endeavor to put in extra trees enough to pay railroad charges.

Prices are for cash with order. We deliver goods to railroad company carefully packed and in good condition, after which our responsibility ceases. No charge for boxes, packing or hauling to railroad station.

Special Notice

Should you receive the second copy of our catalog we will appreciate it very much if you will hand it to a neighbor who is interested in fruit culture.

Free Trees

With your order, however small, send the names and addresses of 15 or more property owners who might become customers of our trees and I will include in your order 2 extra good apple trees.

No. 892

STATE OF NEW YORK, DEPARTMENT OF AGRICULTURE

Certificate of Inspection of Nursery Stock.—This is to certify that the stock in the nursery of Alton E. Randall of Dansville, County of Livingston, State of New York, was duly examined in compliance with the provisions of Section 305 of the Agricultural Law, and was found to be apparently free from any contagious or infectious disease or diseases, or the San Jose scale or other dangerously injurious insect pest, or pests. This certificate expires Sept. 5, 1914.

Dated, Albany, N. Y., September 18, 1913.

CALVIN J. HUSON, Commissioner of Agriculture

Winter Sorts

BALDWIN—The old stand-by, the kind your neighbor has. Large, bright red, crisp, juicy and of rich flavor. One of the most profitable apples grown for home use as well as for market Dec. to April

BEN DAVIS—A large, handsome striped apple, good shipper; tree very hardy, vigorous and productive; a late keeper, highly esteemed in the West and Southwest.

FAMEUSE (OR SNOW)—Medium size. roundish; deep crimson; flesh snowy white; tender juicy, of high flavor. A good dessert kind; fine for market purpose Nov. to Jan.

GANO—Originated in Missouri Form conical, good size and smooth; deep red, shaded on sunny side to mahogany; very attractive; flesh pale yellow, fine grained, tender, pleasant, mild sub-acid; is a good shipper and keeper; tree healthy, vigorous and hardy. An annual and prolific bearer. February to May

GRIMES GOLDEN—Large size. Rich golden yellow; of highest quality. Tree hardy, vigorous and very productive. Jan to April.

GOLDEN RUSSET—Medium, dull russet, crisp, juicy.

HUBBARDSTON NONSUCH—Large; striped yellow and red; of the highest quality. Tree hardy, vigorous, and a good bearer. One of the best to plant for commercial purposes. Nov. to Jan.

JONATHAN—Medium size; deep red and yellow; flesh tender, juicy and rich. Tree a moderate grower but good bearer. One of the best sorts for home use or for commercial purposes. Nov. to March

KING—The king of them all; the old reliable. Handsome, striped red, of the largest size. Quality good. Tree hardy, vigorous and very productive. From November to March.

McINTOSH RED—Large; flesh white, tender and juicy; a very popular kind; sub-acid. November to February.

NORTHERN SPY—Large, roundish, striped red; flesh tender and juicy; rich and very high flavored. A good keeper and profitable for planting. Jan. to June.

ROME BEAUTY—Large, yellow and bright red. Flesh yellow, tender and juicy. Bears heavy annual crops and is an excellent commercial sort, Dec. to March.

RAMBO—Medium size; streaked and mottled yellow and red; tender, juicy, mild flavored. Tree a vigorous grower and good bearer. Widely cultivated, an esteemed old variety. Autumn in the South. October to January in the North.

R. I GREENING—The best of the green winter sorts and very well known. Good cooking kind, good keeper and very valuable for commercial planting. Nov. to March.

SPITZENBERG—A very popular apple, covering a large area; fair size, deep red; good keeper. Valuable to plant for commercial purposes Nov. to April

STAYMAN'S WINESAP—The best of the Wine ap family without any exception, although a seedling of Winesap it is much larger, better and more productive than any other variety. Tree a strong grower Decem-ber to April.

SUTTON BEAUTY.—We have a few fine specimens of Sutton Beauty. Fruit is large, handsome, striped with crimson; flesh white, tender and sub-acid.

WALBRIDGE—Medium size, striped with red; handsome and of excellent quality; vigorous growers and productive; very hardy and considered of great value in the North and Northwest March to June.

WOLF RIVER—Very large, greenish yellow covered with crimson. Tender, spicy sub-acid. One of the finest apples grown, for the market it has few equals Season Jan. to March

WINTER BANANA—Fruit large, size perfect in form, golden yellow and beautifully shaded and marbled with bright crimson red, fine grained, sub-acid. Rich in flavor and of the highest quality. A good keeper, tree is a remarkably strong grower and on account of its great hardiness will thrive in any climate. Its early bearing habit is something unusual as it often bears at one and two years old while in the nursery rows. November to January

WAGENER—Medium to large, deep red in the sun, flesh firm, sub acid and rich. Very productive; bears young. Dec. to May.

WINESAP—Medium size, dark red, sub-acid, excellent. Tree a moderate grower and abundant bearer. A favored market variety in the west. Season Dec. to May.

STARK—One of the best all purpose apples grown. Large, roundish, golden green, shaded with dark and light red, flesh yellowish, juicy, mild and sub-acid. Early and annual bearer and a very valuable commercial sort. Season Jan. to May.

YORK IMPERIAL Medium size, whitish shaded with crimson, flesh firm, crisp, juicy, pleasant, mild sub acid. Tree very vigorous grower and a good bearer. One of the most valuable for commercial orchards. Nov. to March.

PEWAUKEE—Medium size, yellow splash-
ed with red, tree vigorous and hardy. Jan. to June.

MAMMOTH BLACK TWIG—One of the most profitable of all apples. Like the famous Winesap but a better grower. A good keeper. Nov. to March.

TALMANS SWEET—Medium size, pale yellow, slightly tinged with red, flesh firm, rich and sweet, most valuable cooking apple, good market sort. Season Nov. to April.

Summer and Autumn Varieties of Apples

Summer

EARLY HARVEST—Size medium to large; rich, of fine flavor. One of the old standard sorts. Ripen in August.

GOLDEN SWEET—Very large; fine flavor. Tree a good grower and very productive. Aug to Sept.

RED ASTRACHAN—Large, roundish; deep crimson; good quality; good cooker. Tree very hardy and can be depended upon for full crop. August.

YELLOW TRANSPARENT—Earliest of all; pale yellow; flesh tender, juicy, sub-acid. Tree a vigorous and hardy grower. One of the earliest fruiting varieties known, often fruiting in the nursery rows at one and two years old.

FALL PIPPIN—Very large, yellow, tender, juicy and of rich flavor. One of the best October and November.

GRAVENSTEIN—Large to very large; striped red and yellow; tender, juicy and high flavored. One of the best of all fall apples. Tree a vigorous grower; very productive; a good market apple. Sept. to Oct.

MAIDEN BLUSH—Large; pale yellow with red cheeks; flesh very tender. Tree a good bearer; a good commercial kind. Sept. to Oct.

DUCHESS of OLDENBURG—Of Russian origin. Large size; roundish; streaked with red and yellow; flesh whitish, very juicy, flav-
or sub-acid. Tree vigorous grower. Very hardy, early and abundant grower. Ripens in August and September. One of the most profitable commercial sorts grown.

WEALTHY—Medium size; round, smooth and deep red; juicy; sub-acid and of good quality. Very hardy, good grower and productive. One of the best market kinds for late fall or early winter. Oct. to Jan.

Crab Apples

GENERAL GRANT Large yellow, striped with dark red; quite mild, sub acid. 35c. each 6 to 7 ft.

HYSLOP—Almost as large as Early Strawberry apple; deep crimson; popular on account

of its large size, beauty and hardness. Keeps well into the winter.

TRANSCENDENT—Large, yellow striped, juicy, crisp; one of the best of crabs; bears young and produces large annual crops. Each 35c. 6 to 7 ft.

Standard Pears

All Budded Trees on Whole Roots of Imported French Pear Seedlings.

We bud all our pears instead of grafting. We believe we get thereby a better root system. Grown in this manner they transplant easily and give good results. They need careful pruning and spraying, but amply repay for this labor in fairer and more salable fruit. They like clay land and thrive best there, but will succeed in any garden soil.

The following prices for all varieties of pears, all two year stock unless otherwise specified.

	Each	Ten	Hundred
No. 1 5 to 7 ft	30c	\$2.80	\$25.00
No. 2 4 1 2 to 6	25c	2.25	20 00
No. 3 4 to 5 ft	20c	1.80	15.00
No. 4 3 to 4 ft	12c	1.20	10.00
No. 1 1 yr. 3 ft and up	25c	2 25	20 00

BARTLETT—The Standard of all pears. Large size, often with a beautiful blush. Very buttery, juicy and highly flavored. Tree a strong grower, bearing early and abundantly. Very popular. Aug to Sept.

FLEMISH BEAUTY—The fine old pear is still one of the hardiest and most generally successful over a wide range of country, producing annually large crops of handsome fruit of exceptionally fine quality. Sept. and Oct.

CLAPP'S FAVORITE—Large yellow, with red cheeks. A splendid pear. Should be picked ten days before ripening on tree. Excellent sort. August and September.

LAWRENCE—About medium; yellow, thickly dotted; with a very fine, rich flavor; one of the best. Tree a moderate grower and very productive. Dec to Jan.

WORDEN SECKEL—Originated in Oswego County, N. Y. It is a seedling of the Seckel, and is equally as good in quality as that variety and more juicy, with an aroma equally as rich and inviting, while in size, color, form and appearance it is decidedly superior. The color is yellow, with light red on the sunny side. The tree is very hardy and an enormous bearer, and the fruit is ripe just after the Seckel. All lovers of good pears have trees of this variety.

HOWELL—Large, light waxen yellow, with a fine red cheek; handsome, rich, sweet, melting; perfumed, aromatic flavor. Tree an up-

right, free grower, an early and profuse bearer. Very hardy and valuable. Sept. and Oct.

WILDER—Handsome, melting, sweet, pleasant and of the best quality for an early pear; one of the best keeping early pears.

SECKEL—The little pickle pears so much sought for by every housewife for fall pickling; very sweet, juicy and of high flavor. Sept. and Oct.

SHELDON—Another grand pear of sterling worth; a good cropper, russet and red. Medium to large. Tree a fine grower and very productive. Season October.

KIEFFER—This very hardy winter pear stands at the head of the list of winter pears. We have a good stock of 2 year old trees to offer. While the flavor is not of the best you are sure of a crop each year, and for canning and preserving it has no equal. The tree is a very thrifty grower; bears young. Keeps well until spring.

Dwarf Pears.

DWARF PEARS—Pears are dwarfed by budding on quince stock and should be planted deeper so as to cover the union of quince and pear. Dwarf pears bear earlier than Standard and hence are more valuable for garden and orchard planting. Dwarfs do not live as long as Standards. Some dwarf pear orchards that are still bearing large crops, are 30 to 40 years old. The leader of all dwarf pears is the Duchess d'Angouleme. Other varieties are Kieffer, the great winter pear, Louise Bonne, Koonce, Wilder and Tyson. All trees are 3 to 4 feet, 30c each, 10 for \$2 50.

Quinces

CHAMPION—A large late sort that produces good and constant crops. One of the best 2-year-old, 5 to 7 feet, 30c each.

ORANGE—The best of the older varieties. More extensively cultivated than the other kinds. Ripens in October. Fruit very large.

2-year-old tree, 4 to 5 feet 30c each, 10 for \$2.50.

BOURGEAT—A French variety. Very productive, healthy and thrifty. The fruit is very large, smooth golden yellow, of the best quality. Ripens just after the orange, 2-year-old, 5 to 6 feet, 30c.

Japan Variety of Plums

All Budded Trees on Whole Roots of Imported French Myrobalan Plum Seedlings.

The Plum likes strong land, but succeeds on dark soils and almost any soil that is made rich. For the best results it requires thorough and high cultivation. It needs spraying to insure against leaf diseases and the trees need to be jarred to protect them from the curculio.

	Each	Ten	Hundred
No. 1 5 to 7 ft.....	30c	\$2 75	\$22 00
No. 2 4½ to 6 ft.....	25c	2.25	18 00
No. 3 4 to 5 ft.....	20c	1.85	14 00
No. 4 3 to 4 ft.....	14c	1.00	8 00
1 yr. 3 ft and up.....	25c	2.25	18.00

ABUNDANCE—Fruit large. Tree rapid grower and healthy. Comes into bearing remarkably young and yields abundantly. Fruit often needs thinning out. Color amber with markings of red; juicy, sweet and of good quality when well ripened. A good keeper; a fine plum for commercial purposes. Season August.

BURBANK(Japan sort)—One of Luther Burbank's creations. Unsurpassed for beauty and productiveness as well as hardiness of tree. Fruit large, oval, often with a slight neck, skin reddish purple, flesh yellow, somewhat coarse, but juicy and good. Its beauty as a market plum is unsurpassed.

RED JUNE (Jap.)—The great early market plum; medium to large, deep red with beautiful bloom; very showy; flesh light lemon yellow; very firm, slightly sub-acid, half cling with small stone, reliability of tree, size and beauty of fruit. Its early ripening and long keeping qualities make this plum the most sought for

of any of the Japan varieties with the possible exception of the Burbank. Season August.

WICKSON While this is the largest of the Japan varieties our stock is the smallest and can offer only a limited amount. The color of the Wickson is bright cheery red, pit small, a good keeper and fine for shipping. Ripens in September.

European Varieties.

LOMBARD—This old and well known variety hardly needs an introduction, however, we will say, size medium, violet red, juicy, pleasant and good. The tree grows well in almost any soil and climate, producing large crops where all the other varieties fail. The fruit often needs thinning out to save the trees from breaking down from its load of fruit.

BRADSHAW—One of the largest plums grown, very fine and early, dark violet, red, juicy and good, tree an erect and vigorous grower, valuable as a market plum. Every garden should have one or more of this great show plum. It is truly a prize winner.

GERMAN PRUNE—The best of all prunes. Medium in size, purple and blue; juicy, rich and fine; tree a good grower and very productive; ripens in September; sells for high price on market because of its high quality.

SHROPSHIRE DAMSON—An English variety of great merit for preserving. Larger and much more desirable than the common Damson. Tree a vigorous grower; free from curculio. Very hardy and an abundant bearer. Season October.

GEUII—This is a new variety originating in New York state; color, dark purple; flesh firm; sub acid and of large size

SHIPPER'S PRIDE Large and handsome; dark purple, quality fine, juicy and sweet; excellent for canning and a splendid market sort. Sept.

NIAGARA—Unsurpassed for beauty and productiveness as well as great hardness of tree, with foliage so perfect as to contribute in an essential degree to its health. Fruit large, oval, often with a slight neck; skin reddish purple; flesh yellow, juicy and good. Its beauty as a market sort is unsurpassed.

REINE CLAUDE—Large; greenish yellow, spotted with red; firm, juicy, sugary, of fine quality; very productive. September.

YELLOW EGG—A large and beautiful egg-shaped yellow plum. A little coarse but excellent for cooking. Very productive. End of August.

YORK STATE PRUNE—This Prune originated here in Dansville, is much larger than either the German or Italian Prune, of same color and shape.

Cherries

	Each	Ten	Hundred
No. 1 5 to 6 ft.	28c	\$2.35	\$22 00
No. 2 4½ to 6 ft.	25c	2.00	18.00
No. 3 4 to 5 ft.	20c	1.75	15 00
No. 4 3 to 4 ft.	15c	1 20	10.00
1 yr. 3 ft. and up.	18c	1,60	15 00

Sour Cherries

MONTMORENCY—A beautiful large red cherry, much larger and firmer than the Early Richmond and fully 10 days later in ripening. Being extraordinarily prolific and very hardy it can be recommended as a variety of great value. Valuable for canning and preserving.

OSTHEIME—A very hardy cherry, originated in Russia. It has been tested by our severe winters of the north and has been found perfectly hardy. Fruit large, roundish and oval; skin red, dark at ripening; flesh liver colored, tender and juicy, like the Duke, almost sweet.

OLIVET—Large, skin dark red; tender, rich, vinous, with mild sub-acid flavor, sure cropper. Ripens in June,

WRAGG—Large, liver color, juicy and rich. July. 30 cents each, 10 for \$2.50.

EARLY RICHMOND—A standard sort of sour cherry well known to every grower of fruit. Very popular and valuable for cooking purpose. Tree very hardy, fruits very young, often while in the nursery rows at 2 years old. Stands the coldest winters. Ripens in June.

DYEHOUSE A hardy and valuable cherry. The earliest cherry of fine quality. Often bears at 2 years old. A good fruiter, has the smallest pit of any cherry grown. For tart pies and especially for canning it has no superior among cherries.

ENGLISH MORELLO Without doubt one of the most valuable of this class. Tree short grower, but very hardy, standing any climate.

Sweet Cherries

BING—This valuable new black cherry succeeds everywhere. Tree very thrifty and upright grower, very hardy and productive, flesh very solid, flavor of the highest quality, a fine shipping and market variety. It is one of the most delicious sweet cherries. This valuable cherry should be followed by Lambert, which is later in ripening. Both are grand cherries. July.

LAMBERT—A fine, sweet variety, originating in Oregon, and one of the largest of all cherries, dark purple red, turning almost jet black when ripe. Flesh firm, rich, juicy, tree rugged, strong grower and an enormous bearer. The growing of the sweet cherry is a great industry only fairly well begun. There is an enormous market for the fresh fruit and when canned or preserved the markets of the world are open to the producer. Late July.

NAPOLEON BIGARREAU—Known in the west as Royal Ann. Very large, pale yellow with red cheek; firm, juicy and sweet. Tree good grower; very vigorous and bears enormous crops. Valuable for canning. Season last of July.

NOTICE. We have a surplus of both Sweet and Sour Cherries and would be pleased to quote you special price on lots of 5000 or more. All sizes. All varieties. Fresh dug, true to name. Well graded. Write at once for special wholesale prices.

BLACK TARTARIAN—This fine old variety produces immense crops of very large purplish black fruit of mild, sweet, high flavor. Every garden should have one of these fine cherry trees in its collection. Ripens last of June till into July. Customers wishing some of these fine sweet cherry trees should order early as supply is limited.

WINDSOR—Large, liver colored, flesh remarkably firm and of fine quality. Tree hardy and very prolific. Exceedingly valuable as a late commercial variety. Ripens last of July.

YELLOW SPANISH—This is one of the highest flavored Sweet Cherries grown. Fruit large, yellow and bright red, juicy, rich and high flavored. Ripens in June.

GOV. WOOD—Very large, rich, light yellow with red cheek; juicy and sweet. Tree a vigorous grower. Very productive. One of the best for orchard planting. Season June and July.

MAY DUKE—Large, red, juicy and rich, an old excellent variety. Tree very vigorous and productive; ripens middle of June; sub acid

Peaches

	Each	Ten	Hundred
No. 1 4 to 6 ft	20c	\$1.50	\$12.00
No. 2 3 to 4 ft	15c	1.25	8 00
No. 3 2 to 3 ft	12c	.90	5.00

Of all the fruits grown none will show the profits that your peach trees will show. They bear young, a sure cropper, the trees being small, you can plant from 135 to 150 trees per acre. There is always a good market for peaches. Randall's peach trees "Fit the Labels" You cannot make a mistake in planting our trees. Years of experience and a disposition to deal fair with you eliminates all the risk. We offer you a select list of peach trees believing this sufficient to meet every demand of the planter.

CRAWFORD EARLY—A magnificent, large, yellow peach of high quality; tree vigorous and very productive. Its fine size; beauty and productiveness make it one of the most popular sorts. No other variety has been so extensively planted.

CRAWFORD "Late"—Very large, productive and good; yellow with dull, red cheeks; flesh yellow.

MOUNTAIN ROSE—Medium size, red and white; a very showy, good quality, good commercial sort.

CHAMPION—Large, white and red, rich and juicy, hardy and productive; ripe in Aug. first-class commercial sort.

FITZGERALD—Large, yellow and red. One of the most dependable of all the peaches.

ELBERTA—Large, yellow and red; handsome and good quality; tree very hardy; crop to be depended on; the peach that is shipped to your place by the car load and sold at fancy prices; the best peach for orchard planting.

CROSBY—Medium size, bright yellow; striped with carmine. Flesh light yellow, of good quality. Tree one of the hardiest peach trees grown.

OLD MIXON FREE—Large, red and white. One of the best peaches grown, an old standard sort. A very valuable commercial sort.

SMOCKS—Large, yellow and red; bright yellow flesh. Valuable for market and canning. Last of September.

CHAIR'S CHOICE—Large, yellow. One of the finest of late sorts.

ADDITIONAL KINDS—Stump, Wheatland, Reeves' Favorite, Wonderful, Mayflower.

We believe this to be the best collection of peach trees offered by any firm. We consider it safer for our customers to plant the old standard sorts which have stood the test.

A large stock of peaches allows us to make very low prices on the above.

Ornamentals

Roses

CRIMSON RAMBLER---The very popular rose which takes the lead for honors in all the climbing kinds. For trellises nothing equals the Crimson Rambler; its large clusters of bright red roses lasting a long time. Large, two-year-old vines 25c each, 5 for \$1.00.

BLUE ROSE---The Wonderful New Blue Rose, originated in Germany. A genuine Blue Rose, flowered with us this season and comes fully up to the originator's description. 2 year-old plants, 30c each.

BABY RAMBLER---The introducers of this wonderful little rose claim large clusters of crimson roses from early spring till frost. We have fine specimens in our yard that bloomed every day from May 1st till frost came. Can also be taken up in fall and will bloom all winter in the house; will bloom every day of the year indoors. 25c each, 5 for \$1.00.

OTHER ROSES---Dorothy Perkins, Queen of Prairie Rose Lucinda, Blanch Moreau. 30c each.

Shrubs

HYDRANGEA---This shrub or small tree is covered with masses of large white flowers when other shrubs are out of bloom. 40c each.

Vines

CLEMATIS JACKMANNI---This is perhaps the best known of the fine perpetual Clematis and should have credit for the great popularity now attending this family of beautiful climbers. The plant is a free grower and an abundant and successful bloomer producing large flowers of violet-purple. The Jackmanni kind has no superiors and few equals. Blooms from July to October. 35c each.

3 Concord Grape Vines for 25 one cent stamps by postpaid mail

We are quoting very low price on Carolina Poplar.

Ornamental Trees

MAPLE---Norway Maple, large, handsome tree with perfect round head; very hardy. 6 to 8 ft., 60c each; 8 to 10 ft., 75c each.

MAPLE SILVER---More rapid growing than the Norway; excellent for lawn or driveways. 6 to 8 ft., 60c each; 8 to 10 ft., 75c each.

MAPLE (JAPAN)---Purple leaved; very beautiful. 4 to 6 ft., \$1.00 each.

MAPLE---Sugar or Rock. This is a beautiful shade tree and is especially valuable for street planting. It is rather a slow grower but is always beautiful, and never more so than in the fall, when its leaves are changing to yellow and scarlet. 8. to 10 ft., 75c each.

PRUNUS PISSARDI---A purple leaved plum. Is a small purple leaved tree that retains its color more perfectly than any other of the purple-leaved varieties. It is very desirable and ornamental. Nice size trees 40c each.

POPLAR---Carolina Poplar, a magnificent tree for quick shade, either for street planting, lawn or screens. It has broad, rich foliage and can be pruned back to any desired shape; grows anywhere and quicker than any other known sort. 4 to 6 ft., 20c each; 6 to 8 ft., 25c each; 8 to 10 ft., 30c each.

HORSE CHESTNUT---A large, handsome tree, free from all disease and insects. It is covered with an abundance of white flowers in May. Very attractive. 4 to 6 ft., 60c each.

CATALPA---Very rapid growing tree, produces large flowers early in spring. A very beautiful shade tree. 4 to 6 ft., 20c each; 6 to 8 ft., 40c each.

EUROPEAN WHITE BIRCH---One of the most beautiful trees on the lawn; the trunk of pure white, long, graceful branches; one of the best. 5 to 8 ft., 75c each.

LILAC WHITE PERSIAN---Produces a large abundance of large white flowers. 25c each.

LILAC PURPLE---Large, double flowers; very hardy grower. 25c each.

ELM, CAMPERDOWN---This forms one of the most picturesque drooping trees. The foliage is very dense making a perfect arbor. 75c ea.

MOUNTAIN ASH---A beautiful tree, with straggling weeping branches; makes a fine tree for the lawn. 75c each.

TEA'S WEEPING RUSSIAN MULBERRY---A weeping variety of the very best sort. It withstands extreme heat and cold; a strong grower and makes a very showy appearance. 75c each.

KILMARNOCK WEEPING WILLOW---Grafted on a straight stem at the height of 5 to 6 ft., this forms without any trimming an exceedingly graceful tree with perfect umbrella head; unique and beautiful in form; a vigorous, luxuriant grower, thriving in all soils. Not hardy in northern latitudes. 75c each.

HEMLOCK, AMERICAN---Large, fine specimens, 8 to 10 ft., \$1.50; 4 to 6 ft., 75c each.

ELM (AMERICAN WHITE)---A grand shade tree of sterling worth, either for street or lawn. 8 to 10 ft., 75c each.
