TESTED SEEDS

IMPLEMENTS

POULTRY SUPPLIES

ESTABLISHED 1835

1914

PATERSON, N.J.

SPECIAL NOTICE

WE make a specialty of supplying the best strains of seeds that can be produced. We are always on the alert for a better strain, and if we find it we spare no expense in securing seed stock of it.

We handle absolutely nothing that we do not believe to be the best obtainable. We do not claim to compete in prices with irresponsible parties, whose sole effort is to secure the lowest priced seeds, regardless of quality; such seeds are not cheap, but dear at any price. The first cost of seeds is insignificant, compared with time and labor that must be expended upon a growing crop. Quality is our first consideration, and the prices we offer are as low as first-class seeds can be sold for. We buy direct from the growers and from the locality best adapted for raising all of the different varieties.

TERMS OF GUARANTEE The seeds offered in this catalogue have been carefully grown, selected, cleaned and tested for germination, and we believe them to be first class in every respect, but we cannot guarantee the crop as too many conditions enter into it, therefore we give no warranty, expressed or implied, as to description, purity, productiveness, or any other matter of any seeds, bulbs or plants we send out, and we will not be in any way responsible for the crop. If the purchaser does not accept the goods on these terms they are to be returned at once, and if the money has been paid for them it will be refunded.

MUZZY BROS.

1835 - 1914

Muzzy Brothers

A HOUSE that, during the seventy-nine years it has been in business, has clung firmly to its original idea of supplying seeds of the highest grade only, gaining thereby the confidence and loyal friendship of a steadily increasing number of both amateur and professional gardeners.

This is our 79th Annual Catalogue. It contains lists of the very choice seeds, bulbs, roots and some other things that we have to offer for 1914. You can make up your order from its pages with entire confidence in the exceptional quality of the products we are offering.

Our catalogues have always received a considerable amount of study. The cultural directions and descriptions in them are concise and to the point.

Years of research have been devoted to seeds, and we have eliminated quite a number of once well-known varieties that have been superseded by incomparably better sorts. If you had your mind set upon buying one particular kind of corn, for instance, and fail to find it listed herein, you may rest assured that something far better has taken its place.

We would suggest that your order be made up as soon after the receipt of this catalogue as possible. It will help us to ship promptly, and it will help you by giving you your goods just when you want them. Placing orders late sometimes makes delays unavoidable. But we have the facilities for handling a vast amount of business, and your orders will receive the promptest attention regardless of when they come.

If there is any information you want that is not given in this catalogue, write us about it. We will give all inquiries our careful attention.

May we have the pleasure of filling your order?

MUZZY BROS.

Novelties and Specialties

For 1914

Arlington White Spine, 55 days—A strain of White Spine which has gained great renown among both Truck and Market Gardeners

Cucumber

Arlington White Spine, 55 days.—So very superior in every particular to the ordinary stock of White Spine as not to be classed with it either in quality or price.

Vine a strong grower, foliage broad-leaved, deep green, close-jointed; does not sunburn. Blooms at every joint and sets fruit at every bloom, consequently very prolific. Fruit three inches long for Gherkins can be gathered in 45 days. Large fruit for slicing can be pul'ed off in eight weeks.

Price 15c oz. 30 c $\frac{1}{4}$ lb. \$1.00 lb.

Onion

Prize Taker, 90 days.—A mammoth yellow globe, similar to the huge Spanish Onions exhibited at fruit stands in Autumn. Does well in light, sandy soils. Very large producer. A variety which will succeed under conditions where other sorts fail, consequently highly recommended for the Southern States. Will make large Onions from seed in localities where others fail.

Price 20c oz. 50c $\frac{1}{4}$ lb. \$1.50 lb.

Yellow Globe Prize Taker, 90 days

Sterling Potato

The Sterling is a white potato, something like the Green Mountain but not quite so long, the skin a little more creamy than the mountain; it is a heavy yielder, very smooth and a good potato. Withstands blight to an excellent degree. These have been planted in this section for the last three years and have shown an immense yield, notwithstanding the failure of most of the other varieties of potatoes. A strong grower, vines large and Deep Green. We would recommend this potato for a medium late yield.

Price per Barrel \$3.75

MUSHROOM SPAWN

Llane de Champignon Seta Champignonbrut

CULTURE.—Mushrooms may be grown in cellars, under benches of greenhouses, or in sheds, wherever the temperature of 50 degrees can be kept up through the winter. The beds should be made from November to February, according to the time the Mushrooms are wanted, and it requires about two months for them to begin bearing. Secure fresh horse-manure, free from straw and litter, and mix an equal bulk of loam from an old pasture with it. Keep this under cover, taking care to turn it every day to prevent heating, until the pile is large enough to make a bed the required size. Three to 4 feet wide, 8 inches deep and any length desired are the proper proportions for a bed, but these may be varied. Prepare the mixture of loam and manure, making the bed in layers, and pounding down each with the back of the spade. Leave this to heat through for a few days, and as soon as the heat subsides to 90 degrees, make holes in the bed about a foot apart each way, and about one inch deep, into which put pieces of the spawn 2 or 3 inches in diameter; fill up the holes with the compost, and at the expiration of a week or ten days the spawn will have thoroughly diffused itself through the bed. Spread a layer of fresh soil over the heap to the depth of 2 inches and cover with 3 or 4 inches of hay, straw or litter. Examine the bed often to see that it does not get dry. Take special care, however, when water is given, that it be at a temperature of about 100 degrees.

From our experience with English, French and American Spawn, we find there is an important difference between them. If the manure in the bed is in proper condition, the French Spawn will take hold and grow fully as well as the other two; but, if the bed is not in the right state, it will often rot. The American and English Spawns, on the contrary, after starting a little, will remain in a comparatively dormant state for a long time without losing their vitality. It is well to keep these points in mind in ordering spawn. The French Spawn should be slightly moistened by sprinkling with water for two or three days before planting.

	Per brick	10 bricks	100 bricks
American Spawn. In bricks	\$0 20	\$1 80	\$16 00
English Spawn. In bricks	15	1 30	12 00

The Harvester Pea

A Medium Early Large Podded Pea

The Harvester grew a fifteen to eighteen inch vine last year, but this season on very strong soil grew two feet in height. It is a double podded pea, bearing at the top of the vine and pods are very large, containing from six to ten peas. Pods and vine are dark green in color, and the vine exceptionally sturdy, having six to twelve pods to the plant. We know of no heavier cropper, nor a pea more delicious in flavor.

Our averages for the past three years which is as long as we have grown The Harvester, are as follows:

1911	Sutton's Excelsior	averaged 2.47	to 1
1911	Harvester Excelsior	averaged 13.5	
1912	Sutton's Excelsior	averaged 3.3	to 1
1912	Harvester Excelsior	averaged 6.2	to 1
1913	Sutton's Excelsior	averaged 4.34	to 1
1913	Harvester Excelsior	averaged 7.3	to 1

The following is a copy of a letter received from a market gardener to whom we gave the sample in the spring. "The new pea you sent us last spring for trial is the finest pea I ever saw grown. It grows two feet tall and full of fine pods. It has an excellent flavor and is early. I would advise all market gardeners to grow this pea. I think it should be named 'King of All Peas.' "

Price, 1 qt. 60, 4 qts. \$2.00.

MAURETANIA PEA

Extra Early.

First best type but larger seed and better pods. This is a fine early pea, can be sown earlier than the wrinkled sort. Very prolific.

50c qt. 4 qts. \$1.75

MUZZY BROTHERS

ANNUAL SEED CATALOGUE

For 1914

PRICES SUBJECT TO CHANGE.

Muzzy Brothers give no warranty, express or implied, as to the description, quality, productiveness or any other matter of any seeds, bulbs or plants they send out, and they will not be in any way responsible for the crop. If the purchaser does not accept the goods on these terms, they are at once to be returned.

ARTICHOKE

German, Artichocke; French, Artichaut; Spanish Albachofa.

	Per oz.	¼ lb.	Per lb.
French Globe	\$0 30	\$0 85	\$3 00

The Seeds should be sown early in the spring, in drills an inch and a half deep, and one foot apart. The next spring transplant to permanent beds, in rows or hills three feet apart and two feet between the plants. Plant in a deep rich, moist loam, and the plants should be protected in winter by a covering of leaves or coarse manure. A bed will continue bearing for several years. German, Spargel; French, Asperge; Spanish, Esparrago.

Jerusalem Artichoke, Tubers	qt. 25cts.

" Palmetto, 2 yrs..	50	90	6 00
" Columbia 2 yrs.	50	90	6 00
" Argentieul, 2 yrs.	50	90	6 00

Sow the seeds early in spring, in drills 15 inches apart, and about a dozen to the foot in the drill; keep the soil mellow and free from weeds during the summer, and in the succeeding spring transplant to permanent beds which should be done in the following manner as described by a cultivator of Oyster Bay Asparagus.

Plant on sandy soil. To grow Asparagus in perfection, the soil need not necessarily be richer than it must be to produce a good crop of corn. Some experiments have shown that by heavily manuring the crop cannot be made permanently greater than by moderate dressings. It is not desirable to plant them out very early; more plants will fail to grow than when the planting is deferred until the soil is dry and warm.

In planting for private use; set out in rows two feet apart, and allow twelve inches in the row. Set the plants at least six inches below the surface. For market on a large scale, set four feet apart one way and two the other which will allow the use of a horse and cultivator to keep the weeds under.

ASPARAGUS.

BEANS

German, Gartenbohne; French, Fève de Marais; Spanish, Hava.

English or Broad.

	Per pt.	Per qt.
Broad Windsor	\$0 15	\$0 30
Sword Long Pod	15	30

This class is very hardy and should be planted as soon as the soil is in good state in the spring. Plant four inches apart, and two inches deep in drills four feet apart. To insure well filled pods, pinch off the tops as the lower pods begin to set.

Dwarf Green Podded Snap Beans.

Valentine Black, long round, green, solid pod, very early, per qt. 35; ½ pk., \$1.25; pk. \$2.00; bu. \$7.00.

Valentine, Giant Stringless, about seven days later than extra Early Valentine. Slightly curved pod, brittle and stringless; a strong grower and good yielder, per qt. 35c; ½ pk. \$1.25; pk. \$2.00; bu. \$7.00.

Valentine, Early. Productive, tender and of excellent flavor, per qt. 30c; ½ pk., \$1.00; pk., \$1.75; bu. \$6.00.

Horticultural Dwarf Late, productive, broad flat stringless pods, per qt. 35c; ½ pk., \$1.25; pk., \$2.00; bu., \$7.00.

Muzzy's Stringless Green Pod, the best stringless bean grown. Ten days to two weeks earlier than the Valentine; pods full and fleshy, extremely crisp and absolutely stringless. Very productive, per qt., 30c; ½ pk., \$1.10; per pk., \$1.90; per bu. \$6.50.

Early Mohawk, very productive and of good quality, per qt., 30c; per ½ pk., \$1.00; per pk., \$1.75; per bu. \$6.00.

Long Yellow Six-Weeks, early, excellent variety for general crop, per qt., 30c; per ½ pk., \$1.00; per pk. \$1.75; per bu., \$6.00.

Extra Early Refugee, similar to late Refugee, pods two weeks earlier, per qt., 30c.; per ½ pk., \$1.10; per pk. \$1.90; per bu., \$6.50.

Refugee or Thousand to One, very early and prolific. The pods are round and full, stringless and of fine quality, per qt., 30c; per ½ pk., \$1.10; pk., \$1.90; per bu. \$6.50.

Burpee's Bush Lima, beans are large as Large Lima, stout growth, branches vigorously, bearing 50 to 200 large pods well filled with very large beans, 18 to 20 inches, per qt. 45c; ½ pk., \$1.50; per pk., \$2.50; per bu., \$9.00.

Burpee's Improved Bush Lima, an improved strain of B.B. L., much larger pods and beans, enormously productive, extra early, per qt. 50c; ½ pk., \$1.65; per pk., \$2.75; per bu., \$10.00.

Fordhook Bush Lima, per qt., 60c; per ½ pk., \$2.00; per pk. \$3.25; per bu., \$12.00.

White Marrowfat grown for sale in the dry state, per qt., 25c; per ½ pk., 85c; per pk. \$1.25; per bu. \$4.50.

Long White Kidney, excellent as a shell bean, green or ripe, per qt., 25c; per ½ pk., 85c; per pk., \$1.50; per bu. \$5.50.

Dwarf Wax Varieties.

Refugee Wax, Stringless, good for early or late, immense yielder, per qt., 35c; per ½ pk., \$1.25; per pk., \$2.00; per bu. \$7.00.

Golden Eyed Wax, very early, prolific, free from rust, per qt., 30c; per ½ pk., \$1.10; per pk., \$1.90; per bu., \$6.50.

Round Pod Kidney Wax, same as Wardell's only flat pods, per qt., 35c; per ½ pk., \$1.25; per pk., \$2.25; per bu., \$8.00.

Wardell's Kidney Wax, extra early, long flat pods, very productive, per qt., 40c; per ½ pk., \$1.50; per pk., \$2.50; per bu., \$10.00.

BLACK VALENTINE

BEANS—Dwarf Wax Varieties, Continued.

Black Wax or Butter Improved, very early and prolific. The pods are round, full, stringless; of very fine quality, per qt., 35c; per ½ pk., \$1.25; per pk., \$2.00; per bu., \$7.00.

Davis' White Wax, beans pure white pods, yellow, flat, tender, rich, per qt., 35c; per ½ pk., \$1.25; per pk., \$2.00; per bu., \$7.00.

Golden Wax. This valuable variety is about ten days earlier than the Black Wax, pods large, long semi-round, brittle, stringless, per qt., 35c; per ½ pk., \$1.25; per pk., \$2.00; per bu., \$7.00.

Yosemite Mammoth Wax, the largest pods of all wax varieties, per qt., 35c; per ½ pk., \$1.25; per pk., \$2.25; per bu. \$8.00.

	Per qt.	½ pk.	pk.	bu.
Hodson Wax , very large, tender, pods stringless, very productive	\$0 35	\$1 25	\$2 00	\$7 00
White Wax , stringless, round pods, beans pure white, strong grower	35	1 25	2 25	8 00

BEANS, Pole or Running Varieties.

Challenger Lima . Potato variety, five and six a pod	30	1 25	2 25	8 00
King of Garden Lima . Vigorous in growth and immensely productive, pods large, numerous and well filled and beans of an enormous size, Generally grown for main crop	35	1 25	2 25	8 00
New Early Jersey . Very early	35	1 25	2 25	8 00
Large White Lima . A greatly esteemed variety	35	1 25	2 25	8 00
Kentucky Wonder, or Homestead Extra Early . Pods long tender and good flavor, very productive	35	1 25	2 25	8 00
New Lazy Wife . Long green pods, good quality, white beans	35	1 25	2 25	8 00
Dutch Case Knife . A very productive variety, one of the earliest	35	1 25	2 00	7 00
Horticultural or Speckled Cranberry . A popular variety for private use, equally serviceable in the green state or when shelled	30	1 10	1 90	6 50
Scarlet Runner . Beautiful scarlet flowers; for ornamental and table use	50			
Black Wax . Pods long thick and fleshy, pale yellow color, waxy appearance, very productive and tender, excellent as a snap or shell-ed green	35	1 25	2 00	7 00
Early Golden Cluster . Bright yellow pods, stringless, in clusters	45	1 50	2 50	9 00
Yard Long, French . Pods sometimes grow from 2 to 3 ft. long, are very slender like a pipe stem, should be grown on pea brush. Pkg. 10 cents.				

Sow Bush sorts in drills about two feet apart, and drop the beans about three inches apart in the drill, cover two inches or less for a succession, sow at intervals of two weeks. Lima beans should not be planted until settled weather; make rich hills, four feet apart each way set a pole eight or ten feet high in each; press the beans into the soil eye down, six or eight to each pole, and when they are well up, thin out to four.

A quart of Limas is sufficient for 75 to 80 hills, and a quart of Bush Beans will sow a row 100 long.

BEETS

German, Runkelrub; French, Bour-rache; Spanish, Remolacha.

Detroit Dark Red. A splendid beet for market or home use, of a deep color, tender and of delicate flavor. Per oz. 15c; ¼ lb. 40c; lb. \$1.50.

Dark Red Egyptian Crosby's. The earliest beet in cultivation, color deep crimson; of excellent quality. Per oz. 15c; ¼ lb. 40c; lb. \$1.50.

DETROIT DARK RED BEET.

BEETS—Continued.

	Per oz.	¼ lb.	Per lb.
Extra Early Eclipse. Very early good size.	15	35	1 25
Early Flat Bassano. Chiefly valuable for its earliness	10	30	1 00
Early Blood Turnip. Standard early sort; an excellent	15	35	1 25
Edmands. Market garden variety, uniform shape, dark	15	35	1 25
Dewing's Blood Turnip. Of fine form and flavor	15	40	1 50
Long Smooth Blood Red. An excellent late variety	10	20	60
Swiss Chard. Used for its leaves, which are cooked as spinach	10	30	1 00

MANGEL-WURZEL AND SUGAR.

Varieties used for feeding stock. Sow 6 lbs. per acre.

	Per oz.	¼ lb.	lb.
Mammoth Red Mangel-Wurzel. Producing roots of mammoth size, very regular, and with a small top. 10 lbs. and over 25c lb	\$0 10	\$0 15	\$0 40
Yellow Globe Mangel-Wurzel. Roots very large and globular. 10 lbs. 25c lb.	10	15	40
Long Yellow Mangel-Wurzel. Good for general crop. 10 lbs. 25c lb.	10	15	50
Golden Tankard Mangel-Wurzel. A new and very valuable variety of fine form and sweet flavor, bright yellow in color, when cut it shows interior ring, similar to most varieties of garden beet. 10 lbs. 30c lb.	10	15	50
White Silesian Sugar Beet. Extensively grown for feeding stock and manufacture of sugar	10	15	40
Wilmorin's Improved Sugar Beet. An improved variety	10	15	40
Lane's Improved Sugar Beet. Improved variety of the French Sugar Beet, obtained by careful selection in this country. 10 lb. 25c lb.	10	15	40

A rich, deep open soil is the best suited to the culture of Beets. Fresh manure is undesirable but land that has been well manured the previous year is highly suitable. For an early supply sow in the spring as soon as the ground becomes fit to work, in drills about one foot apart and two inches deep. For main crop sow the first week in May, and for winter use sow in June. When the plants have obtained three or four leaves, thin out, so that they may stand eight or nine inches apart. Keep free from weeds by hand weeding and hoeing. Those intended for winter use may be taken up in October, and stored in dry sand in the cellar or outhouse. Before storing, leaves and fibers must be cut off, but care must be taken not to bruise the main root.

BORAGE

German, Borritsch; French, Bourrache; Spanish, Berraja.

	Per oz.	¼ lb.	lb.
Borage, used as a pot herb; also as a salad, or can be boiled, and also for garnishing, but chiefly required for claret cups and other cooling drinks. Bees are very partial to the flower	\$0 10	\$0 25	\$0 75

BROCCOLI

German, Spragel Kohl; French, Chou Brocoli, Spanish Brocoli.

	Per oz.	½ lb.	lb.
Early White, heads medium size, compact, creamy white color, most certain to head	\$0 30	\$0 85	\$3 00
Purple Cape, differing from the preceding color, greenish purple	35	1 00	3 50
White Cape	35	1 00	3 50
Mammoth White	35	1 00	3 50

A favorite European vegetable, nearly allied to the Cauliflower, but more hardy and surer to head; the seeds should be sown in this district in the early part of May and transplanted in June; farther south the sowing should be delayed until June or July, and the transplanting accordingly from August to October. In parts of the country where the thermometer does not fall below 20 or 30 degrees, broccoli may be had in perfection from November until March. It succeeds best in a moist and rather cool atmosphere.

BRUSSELS SPROUTS

German, Sprossen-Kohl; French, Chou de Bruxells; Spanish, Breza de Brussels.

Improved Seed, (French) half dwarf, oz.
40c, $\frac{1}{4}$ lb. \$1.15, lb. \$4.00.

Dalkeith Dwarf Improved, a variety producing compact sprouts of excellent quality, oz. 15c, $\frac{1}{4}$ lb. 35c, lb. \$1.25.

A tender, delicious vegetable. The plant grows two or three feet high, and produced from the sides of the stalks numerous little sprouts, one or two inches in diameter, resembling cabbage. The leaves which look like a Savoy should be broken down in the fall, to give the little cabbages room to grow. They are very tender and sweet after early frosts. Sow early in hot-beds, or in seed-beds in May transplant and cultivate the cabbage.

CABBAGE

German, Kopfkohl; French, Chou; Spanish, Berza de pepollo

Per oz. $\frac{1}{4}$ lb. lb.

All Seasons , fine variety, for second early or late growing good size	\$0 20	\$0 60	\$2 00
Early Jersey Wakefield . The leading variety for market, very early of medium size, good quality, sure to head.....	30	85	3 00
Early Flat Dutch . This is one of the best early cabbages in cultivation.....	20	60	2 00
Early Summer . A valuable early sort resembling the Early Flat Dutch	30	85	3 00
Early Winnigstadt . Heads large, one of the best for general use	20	40	1 50
Fottler's Improved Brunswick . This is a very fine second early variety	25	75	2 25
Henderson's Succession . A second early or late variety, a sure header; seeds sown in March produce large heads in June	35	1 00	3 50
Muzzy Extra Amagar Danish Ball-Head . Large, round, solid sweet and crisp, sure header	25	75	2 50
Large Late Drumhead . An excellent fall and winter variety, grows to a large size	25	75	2 50
Large Late Flat Dutch . The most popular variety for late cultivation.....	20	60	2 00
Red Stone Head . Used almost exclusively for picking	30	85	3 00
Drumhead Savoy (American) . The largest heading sort, of excellent flavor	25	75	2 50
Muzzy Improved Amagar Danish Round Head . Short stemmed, two weeks earlier than Ball Head	25	75	2 50

For very early use plant in the autumn from 10th to 25th, September, in a seed bed, and protect in cold frames during the winter, being careful to set them down to the first leaf. Transplant in the following spring, as the soil will admit. For autumn and winter use, plant in seed-bed in May and early part of June, and when six inches high transplant into rich soil, two feet apart each way for the early varieties, and three by two and a half feet for the large winter varieties. To secure the best results, the soil should not be too dry, but should be thoroughly enriched, and the crop should be hoed at least once in ten days. Sow in hot bed early in spring, seed of the early kind for a second crop; also the late varieties for winter use.

CARROT

German, Moehren; French, Carotte; Spanish.

The Carrot, like other root crops, delights in a sandy loam, deeply tilled. It should never be sown on newly manured ground as forked roots are sure to be the result. It is best to sow on ground that has been well manured the previous year for some other crop such as Celery, Potatoes, Onions or Peas, but avoid such crop as Cabbage and Turnips, or any of the tap rooted sections. For early or main crops sow the latter part of April; for later crops, they may be sown any time until the beginning of June. Sow in rows about 15 inches apart and half an inch deep, thinning out to three or four inches between the plants.

Early French Forcing. The earliest variety, valuable for forcing; root small and of fine flavor, oz. 20c, $\frac{1}{4}$ lb. 60c, lb. \$2.00.

Early Round Parisian. Small for frames or open ground, oz. 20c, $\frac{1}{4}$ lb. 60c, lb. \$2.00.

Early Scarlet Horn. Old and favorite sort, much esteemed for early summer, oz. 15c, $\frac{1}{4}$ lb. 30c, lb. \$1.00.

Half Long Danvers. A variety intermediate in size and period of maturity between the preceding and the Dong Orange, oz. 15c, $\frac{1}{4}$ lb. 35c, lb. \$1.25.

Half Long Stump Rotted Chantenay. Like Nantes, broader shoulder, oz. 20c, $\frac{1}{4}$ lb. 60c, lb. \$2.00.

Half Long Rubicon Finest Carrot in existence, oz. 15c, $\frac{1}{4}$ lb. 40c, lb. \$1.50.

Half Long Stump Guarandé or Oxheart, oz. 15c, $\frac{1}{4}$ lb. 35c, lb. \$1.25.

Half Long Stump Nantes, oz. 15c, $\frac{1}{4}$ lb. 40c, lb. \$1.50.

Carentan. A new early variety without core. It is an excellent sort for forcing, or used as an early kind of planting in the open ground.

Long Orange Improved. Roots of large size, equally adapted for garden or farm culture

Large White Belgian. Grown almost exclusively for stock

DANVERS CARROT.

CAULIFLOWER

German, Blumen-Kohl; French, Chou-fleur; Spanish, Coliflor.

Extra Early Dwarf Erfurt. Short stem; fine. Pkt. 25c, oz. \$4.00.

Extra Early Paris. This is one of the earliest and best varieties, heads large, white and compact, of fine quality. Pkt. 10c, oz. 50c, $\frac{1}{4}$ lb. \$1.75, lb. \$6.00.

Early Snowball. Admirably for forcing, very solid, pure white heads. Pkt. 25c, oz. \$2.00.

Large Early Dwarf Erfurt. The earliest and best of all varieties. Pkt. 25c, oz. \$2.25.

Lenormand's Short-Stemmed. A late variety, producing very large well-formed heads of Superior quality. Pkt. 10c, oz. 50c, $\frac{1}{4}$ lb. \$1.75, lb. \$6.00.

Algiers. Popular late variety, sure to head, excellent for market. Pkt. 10c, oz. 50c, $\frac{1}{4}$ lb. \$1.85, lb. \$7.00.

Early London. Pkt. 5c, oz. 30c, $\frac{1}{4}$ lb. 85c, lb. \$3.00.

DENMARK SPECIAL LARGE.

CAULIFLOWER—Continued

DENMARK. Special Large Late. Very fine variety, large white compact heads, necessary between plants be greater than other varieties. Pkt. 20c, oz. \$1.50, lb. \$5.50.

Cauliflower delights in rich, moist soil and in dry seasons should be abundantly watered. The seeds may be sown in September and wintered over in the same manner as described for early cabbage. Where this is not practicable, it may be had nearly as well by sowing the seed in the hot-bed in January or February and transplanting the plants at two or three inches apart in boxes, or in the soil of another hot-bed, until such time as they are safe to be planted in the open ground, which in this latitude, is usually from the 15th of March to the 10th of April. If properly hardened off, they are seldom injured by being planted out too early.

CELERY

German, Celeri; French, Celerei; Spanish, Apih.

Thorburn's Fin de Siecle	30	85	3 00

25c, ¼ lb. 75c, lb. \$2.50.

The seeds may be sown in the open ground in April, as soon as the ground can be nicely worked. Sow about half an inch deep, and be careful to firmly press the soil over the seed; this should be done by treading over the rows with the feet after sowing; this prevents the air drying up the seed, which thereby loses its vitality and fails to germinate. Many valuable crops are annually lost by inattention to this important particular. After the seed is up, keep carefully clear of weeds until the time of planting June and July; the crops may be shorn off once or twice before planting; this make them "stocky" and they suffer less in being transplanted. After the ground has been well prepared, plant in rows from three to four feet apart, according to the variety, setting the plants about six inches apart and pressing the soil firmly about the roots.

Large Seeded	10	\$0 20	\$0 60
Lettuce Leaved	10	25	85
Small Seeded	10	20	60

Corn Salad, Fetticus or Lambs Lettuce is used to a considerable extent as a salad. It is sown on the first opening of spring in rows one foot apart and is fit for use in six to eight weeks from the time of sowing. If wanted to come out early in spring, it is sown in September, cover up with straw or hay as soon as cold weather sets in and is wintered over the same way as Spinach.

Sweet Fodder. For ensilage			20	50	80	2 50

Sweet corn may be either sown in rows, four and a half feet apart, and the seeds planted at about eight inches in rows, or planted in the hills at distances of three or four feet each way according to the variety grown, or the richness of the soil in which it is planted. The taller the variety or the richer the soil, the greater should be the distances apart. The first plantings in this vicinity are made about the middle of May, and successive planting every two or three weeks until the first week in July. In more Southern latitudes planting is begun a month earlier and continues a month later.

Best French	10	30	1 00
Montmagny	35	1 00	3 50

The Dandelion is much used for spring salads and resembles Endive. Sow the seed in May or June in drills half an inch deep and 12 inches apart. The plants will be ready for use the following spring.

DANDELION

ENDIVE OR CHICKORY

German, Endevien; French, Chicoree; Spanish, Endivia.

	Per oz.	$\frac{1}{4}$ lb.	lb.
Green Curled Winter. Very hardy; leaves dark green, tender and crisp	\$0 15	\$0 35	1 25
Broad Leaved Batavian. (Escarolle), chiefly used in soups and stews; requires to be tied up for blanching	15	35	1 25
Early White Curled. (Self-blanching), the best variety; grows to large size; very large and tender	25	65	2 00

ENDIVE

Moss Curled Early Summer. Used for salads as winter varieties

15 35 1 25

Witloff or French Endive. New ...

20 40 1 50

Endive is one of the best salads for fall and winter use. Sow for an early supply about the middle of April. As it is used mostly in the fall months, the main sowings are made in June and July, from which plantations are formed at one foot apart each way in August and September. It requires no special soil or manure, and after planting, is kept clear of weeds until the plant has attained its full size, when the process of blanching begins. This is affected by covering up the plants as they grow, with slats or boards, which serves the purpose of excluding the air and light.

EGG PLANT

German, Eier Pflanz; French, Aubergine; Spanish Bereinfiena.

	Per oz.	$\frac{1}{4}$ lb.	lb.
Pearl White. Very fine grain and well flavored	\$0 25	\$0 75	\$2 50
New York Improved. Superior market variety of large size and fine variety	40	1 25	4 00
Black Beauty Tendage. Earlier than New York Improved and as large, purplish black ...	40	1 25	4 50
Early Dwarf Purple. Medium size	30	85	3 00
Black Pekin. A fine variety, bearing large round, deep purple fruits, fine, grand and of superior quality	35	1 00	3 50

The Egg Plant is a tender vegetable, and must not be planted out until the weather is warm and settled. Sow early in spring in hot-beds, or if they are not convenient, sufficient plants may be raised for a small garden by sowing a few seeds in common flower pots or in boxes in the house. Plant out early in June from two to three feet apart.

NEW YORK EGG PLANT

KALE

German, Blatter-Kohl; French, Chou Vert; Spanish, Breton.

Siberian German Green or "Sproute." This variety is extensively used for early greens for which it is sown in the fall in rows one foot apart and treated in the same manner as Spinach; it is ready for use in early spring. Sowing can also be made in spring10 .25 .75

Dwarf Green Curled Scotch. Beautifully fringed dwarf growing kind, with bright green leaves10 .30 1.00

Tall Green Curled Scotch. Tall growing, very hardy variety, leaves a bright green, beautifully curled.10 .30 1.00

Dwarf Brown German Curled10 .30 1.00

Kale may be grown in almost any soil, but the richer it is the more abundant the product. Sow early in the spring, in prepared beds, covering the seeds thinly and evenly; transplant in June and treat in the same manner as for cabbage. Of all the cabbage tribe this is the most tender and delicate and would be much more extensively grown than it is, if its excellent qualities were generally known. The varieties are all extremely hardy, and are best when touched by frost.

KALE

KOHL-RABI

German, Kohl-Rabi; French, Chou Rave; Spanish, Colinabo.

Per oz. ¼ lb. lb.

Early White Vienna. Flesh white and tender; best market sort; good for table use\$0 15 \$0 50 \$1 50

Early Purple Vienna. Differing from the above in color, which is of a bluish purple 15 50 1 50

Large White or Green. Large ball, not so fine, but more productive ... 10 35 1 25

Kohl-Rabi or Turnip stemmed cabbage, is a vegetable that is not so much cultivated as it deserves to be. The stem above the ground swells into a bulb, somewhat resembling a turnip: this again is covered with leaves. The edible part is the bulb, which is dressed and served like turnip, and is very delicate and tender when young. It is very hardy, withstands severe drought, and is a good keeper. Cultivate the same as cabbage, but in hoeing be careful not to throw dirt into the heart of the plant, or the bulb cannot form.

KOHL-RABI

LEEK

German, Lauch; French, Poireau;
Spanish, Puerro.

Per oz. $\frac{1}{4}$ lb. lb.

Large American Flag.

The kind mostly
grown for market ..\$0 20 \$0 50 \$1 75

Large Careten. A large
growing French var-
iety of excellent qual-
ity

20 50 1 75

Large Rouen. Very
large and fine

20 50 1 75

The Leek is very hardy and easily cultivated; it succeeds best in a light, but well enriched soil. Sow as early in the spring as practicable, in drills one inch deep and one foot apart. When six or eight inches high they may be transplanted in rows ten inches apart each way, as deep as possible; that the neck, being covered, may be blanched. If fine leaks are desired, the ground can hardly be made too rich.

LEEK

SEA KALE

German, Seekohl; French, Crambe Maritime;
Spanish, Berton de Mar.

Sea-Kale Seeds. Very much like Celery, Per
oz. 20c. $\frac{1}{4}$ lb. 60c. lb. \$2.00.

Cultivate for its blanched shoots, which are cooked in the same way as Asparagus. A supply may be had all winter by planting the roots closely in warm cellar before frost. Sow one inch deep in drills two feet apart; thin out to six inches, and the next spring plant in hills three feet apart, three plants in each.

LETTUCE

German, Laitick; French, Laitue; Spanish, Lechuga.

For early crop, the seed may be sown in the open ground in September, and transplanted to coldframes as soon as large enough to handle. In dry, sheltered spots, by covering up with leaves late in the season. Lettuce plants may be saved over Winter without glass covering. The plants for setting out in Spring are also sown in coldframes in February, and in hotbeds in March, and by careful covering up at night make plants to set out in April.

Golden Yellow Cos. Long-standing; solid; golden yellow. Pkt. 5 cts., oz. 20 cts., $\frac{1}{4}$ lb. 50 cts., lb. \$1.50.

Shotwell's Brown Head. Large and handsome; heads hardy; standing summer heat without injury	20	50	1 50
Boston Market. Large solid heads, very fine for forcing, and of fine flavor.	15	35	1 25

ROMAINE OR COS VARIETIES.

Trianon Cos. The best of the Cos variety	20	50	1 50
White Paris Cos (Romaine). Sow early; tie up to blanch	25	50	1 50
Golden Yellow Cos. Long standing, large solid heads, crisp and tender	20	50	1 50

Lettuce is the most popular of all salads. Boiled, is quite equal to Spinach; and it is also sometimes used in soups. It is easy of cultivation, but likes a good rich soil. For early use, sow Simpson and Tennis Ball under glass in February and March and transplant as soon as the ground can be worked. Later sowings may be made in the open ground for successions as long as the weather permits; thin out well or the plants will be weak, and set in rows two feet apart and eight inches between the plants. The best early plants are obtained by sowing in the open ground in September, and transplanting to cold frames the latter part of October, being wintered over in the same manner as early Cabbage. Lettuce requires good ground and abundant moisture.

MELON, MUSK

German, Melone; French, Melon; Spanish, Melon Muscatel.

POLLOCK. One of the perfect shape, netted Rockyford strain	\$0 15	\$0 35	\$1 25

Hackensack. Variety of Green Citron, well known among the New York market gardeners, grows to a very large size, productive, exquisite flavor	15	35	1 25
Montreal Market. Green flesh, very thick; fine flavor	15	35	1 25
Long Yellow Cantalope. Yellow flesh, suitable for the market	15	35	1 00
Baltimore Market. Oblong; orange flesh	15	35	1 00
Jennie Lind. A very early kind, of small size, but delicious flavor	15	35	1 00
White Japan. Size medium and nearly round; skin cream white and very thin; flesh pale green, early and sweet	20	60	2 00
Rocky Ford. Very sweet; spicy flavored, small and oblong, most popular sort	15	35	1 00

HACKENSACK MUSK MELON

Melons thrive best in a moderately enriched live soil; the hills should be six feet apart each way. Previous to planting incorporate well with the soil in each hill a couple of shovelfuls of thoroughly rotted manure; plant twelve or fifteen seeds in each hill early in May, and when well up, thin out three or four of the most promising. Pinch off the leading shoots as the growth becomes too luxuriant, and if the fruit sets too numerously thin out when young, which will increase the size of those remaining, and cause them to ripen quicker.

MELON, WATER

German, Wassermelone; French, Melon d' Eau; Spanish, Zaudia.

	Per oz.	$\frac{1}{4}$ lb.	lb.
Tom Watson. Long and 8 to 10 in. diameter. Thin rind, crisp flesh, fine flavor	\$0 10	\$0 25	\$0 75
Kolb's Gem. Nearly round, dark green	10	25	75
Seminole. A new early variety. Long Striped sort	10	25	75
Pride of Georgia. Dark green, oval in shape; crisp and sweet; very large	10	25	75
Mountain Sweet. One of the very best for culture; color dark green; and rind thin; flesh scarlet; solid, very sweet and delicious	10	25	75
Black Spanish. Shape round, rather small; skin dark green, flesh red, sweet, rich	10	25	75
Phinney's Early. Flesh deep red, of a very superior quality; a valuable early market variety	10	25	75
Cuban Queen. Solid and heavy	10	25	75
Ice Cream. (White seeded), fruit of medium size, nearly round; skin pale green; rind thin; flesh scarlet, solid crisp, excellent	10	25	75

MELON, WATER—Continued.

	Per oz.	¼ lb.	lb.
Rattlesnake. Very large, striped, red flesh variety	\$0 10	\$0 25	\$0 75
Mammoth Iron Clad. Long and large; thin skin deep red flesh	10	25	75

IRON CLAD

The "Boss" Oblong; dark green

Citron. (Red seeded), round handsome fruit of small size and used in the making of sweetmeats and preserves	10	25	75
---	----	----	----

Citron. (Green Seeded), used for preserves

Plant in hills directed for Muskmelons, giving them more room, as their vines extend much farther. If they are wanted of a large size, three or four melons to each plant will be sufficient, and when only one is allowed to grow from each plant they will grow to an immense size.

MUSHROOMS

German, Chimpignoubrut; French, Champignon; Spanish, Hongo.			
Imported English Spawn	per brick .15c	10 bricks \$1.30	100 bricks \$12.00
Imported French Spawn		30c per lb.	10 lbs. \$2 50
American Spawn Bricks	per brick 20c	10 bricks \$1.80	100 bricks \$16.00

Mushrooms should be grown either in a building especially erected for the purpose or some shed, stable or cellar, where the temperature of from 40 to 60 degrees can be kept up in winter. To every barrow load of fresh horse droppings add about the same weight of loam or soil of any kind that has not been manured. Turn the heap every day, so that it is not allowed to heat violently, until you have quantity enough to form a bed of dimensions required. Be careful that your heap is under cover, so that it cannot possibly get wet. The most convenient size is from three to four feet long and eight inches deep.

Prepare the mixture of loam and manure, making the bed in layers, and pounding down each with the back of a spade. Leave this to heat through for a few days, and as soon as the heat subsides to .90 degrees, make holes in the bed about a foot apart each way into which put pieces of spawn two or three inches in diameter; fill up the holes with the compact and at the expiration of a week or ten days the spawn will have thoroughly diffused itself through the bed. Now spread a layer of fresh soil over the heap to the depth of two inches, firm it down moderately and cover with three or four inches of hay or straw. Examine the bed often to see that it does not get dry. When water is given it should be at a temperature of about 100 degrees.

MUSHROOMS

MUSTARD

German, Senf; French; Moutarde; Spanish, Mostaga.

	Per oz.	¼ lb.	lb.
White London. Best of salads	\$0 05	\$0 10	\$0 25
Black. Used for cooking and salad	05	10	25

Mustard in the green state is a refreshing salad, mixed with Cress, Lettuce, or other salad plants. It is necessary to make frequent sowing of it, as it should be cut and used in a very young state, even before the first rough leaf appears. The seed should be sown thickly in light soil, the surface of which should be made very smooth. The seed should be pressed into the soil with the back of a clean spade.

NASTURTIUM

German, Nastrutian; French, Capusine; Spanish, Maranuela.

	Per oz.	¼ lb.	lb.
Tall Scarlet	\$0 15	\$0 35	\$1 00
Tall Yellow	15	35	1 00
Tall Nasturtium, Mixed	10	20	60
Dwarf Nasturtium, Mixed	10	25	75

NASTURTIUM—Continued

Cultivate both for use and ornament; the green seed pods preserved in vinegar make an excellent pickle. The young leaves are also useful in salads. Its scarlet and orange-colored flowers which appear freely all summer, add a charm to the garden.

ONION

German, Zweibel,; French, Oignon; Spanish, Cebolia. —

ONION.

	Per oz.	¼ lb.	lb.
Early Red Flat. About ten days earlier than the Large Red, and note quite so large	\$0 15	\$0 40	\$1 25
Large Red Wethersfield. The staple variety of the Eastern onion growers; of large size, deep in color, a good keeper	20	50	1 40
Yellow Globe Danvers. An excellent variety, mild flavor and very productive; ripens early and a good keeper	20	50	1 50
Prizetaker or Early Globe Spanish. Immense size	20	50	1 50
White Portugal or Silver Skin. A handsome onion of mild flavor; extensively grown for pickling	20	60	2 00
Southport Red Globe. Similar to the large Red in flavor and color, but quite distinct in form, being nearly globular	15	40	1 25
Southport White Globe. Form nearly ovoid symmetrical, keeps well, is an excellent variety	30	80	2 50
Southport Yellow Globe. Same as above, except in color	20	50	1 50
White Flat Bermuda. Very early	30	80	2 50
Red Flat Bermuda. Very early	30	80	2 50

ITALIAN VARIETIES.

Adriatic Barletta. White, new variety, fully two weeks earlier than the Queen	20	60	2 00
Early Queen. Excellent variety, very early, a good keeper and mild flavor white	20	60	2 00
Giant Rocca. A splendid large variety from Naples, of globular shape, bright brown skin and delicate flavor	20	50	1 50

The onion thrives best in a rather strong, deep, rich loamy soil, and unlike most vegetables succeeds well when cultivated on the same ground for successive years. The ground should be deeply trenched and manured the previous autumn, and laid up in ridges during the winter to soften. As early in the spring as the ground is in working order, commence operations by leveling the ground with a rake, and tread firmly; sow thinly in drills about a quarter of an inch deep and one foot apart; cover with fine soil and press down with the back of a spade or a light roller. When the young plants are strong enough, thin gradually so that they stand three or four inches apart.

ONION SETS

	qt.	½ pk.	pk.	bu.
White Onion Sets	25	\$0 75	\$1 25	\$4 00
Yellow Onion Sets	20	60	1 00	3 50

OKRA OR GUMBO

German, Essbarer Safran; French, Gomo; Spanish, Quibombo.

LONG GREEN OKRA.

Per oz. ¼ lb. lb.

Improved Dwarf White. Long slender pods, very productive, only 14 in. high	\$0 10	\$0 20	\$0 50
Dwarf Green. Early and productive	10	20	50
Long Green. Fine long pods, very good	10	20	50

The pods in a young state are used in soups, sauces and stews, and are very wholesome and nutritious. It is the easiest culture and grows freely, bearing abundantly when grown in ordinary garden soil. It is sown at the usual time of all tender vegetables in drills two inches deep, setting the plants from two to three feet apart.

PARSNIPS

German, Pastinake; French, Panals; Spanish, Chirivia.

Per oz. ¼ lb. lb.

Guernsey or Cup. Leading variety	\$0 10	\$0 20	\$0 50
Long Smooth or Hollow Crown.			
Long roots	10	20	50
Early Round	10	20	60

They succeed best in a deep rich soil that has been well manured the previous season, as manure freshly applied tends to the production of forked and ill-shaped roots. Sow the seed early in spring in drills eighteen inches apart in the garden, and three feet apart in the field, thin the plants to six inches in the drill.

PARSLEY

German, Petersilie; French, Persil; Spanish, Perjil.

Per oz. ¼ lb. lb.

Extra Double Curled. A fine dwarf variety excellent for garnishing	\$0 10	\$0 30	\$1 00
Fern Leaves. The most beautiful form of parsley, resembling crested fern or moss in its growth	15	35	1 25
Plain Leaves. Hardier than the curled variety	10	30	1 00
Moss Curled	10	30	1 00
Hamburg, or Rooted. Edible roots	10	30	1 00

Should be sown very early in the spring in beds or in lines, and the seeds which are somewhat slow to vegetate should be previously soaked 24 hours in warm water. The soil should be kept free from weeds, which should be extracted by the hand, so as to avoid disturbance of the seed when about to germinate. As soon as the plants are large enough they should be thinned out so as to stand five or six inches apart.

PEAS

German, Erbsen; French, Pois; Spanish, Guisantes.
Extra Early Varieties

Per qt. ½ pk. pk.

Harvester. Medium Early. Large double podded. Heavy cropper. See Novelties	\$0 60	4 pts.	\$2 00
Gradus or Prosperity. Earliest wrinkled Pea grown. Can be sown early as the round sorts. Large peas and pods, splendid flavor. Requires no sticks, reaching only 36 inches in ordinary good soil. Height, 3 feet....	\$0 45	\$1 50	\$2 50
Thomas Laxton. A cross between Gradus and one of the extra early sorts. Ripens within a day or two of the earliest round varieties; very productive. The pods are large and contain 7 or 8 large, wrinkled Peas of the finest flavor	40	1 35	2 25

PEAS—Continued.

	Per.	qt.	½ pk.	pk.
Mauretania. Extra Early, First and Best Type. Larger Seed and better Pods (See Novelties.)	50	\$1 75	\$3 00	
Nott's Excelsior. Extra dwarf wrinkled, pods larger than American Wonder, 1 foot.	35	\$1 25	\$2 00	
American Wonder. Earliest wrinkled variety, 11-2 feet	30	1 00	1 75	
Alaska. Very early and retain their color well, height 2½ feet	30	1 00	1 75	
First and Best. One of the best extra early Peas. An improved strain of the Extra Early Market, height, 2½ feet	30	1 00	1 75	
Little Gem. A dwarf green wrinkled Market, very prolific, of superior flavor, and a first early, 1½ feet.	30	1 00	1 75	
Premium Gem. A fine flavored dwarf, wrinkled variety; good cropper and fine quality. Height 18 inches	30	1 00	1 75	
SECOND EARLY VARIETIES.				
Heroine Medium Early. Green wrinkled, height 2½ feet.	30	1 00	1 75	
Everbearing, good size pea long pod, height 2½ feet.	30	1 00	1 75	
McLean's Advancer. Early green wrinkled varieties, delicious flavor, height 2½ feet	30	1 00	1 75	
Pride of the Market. Very large pods, green peas, sow thin, height 2 feet	30	1 00	1 75	
Yorkshire Hero, or Dwarf Champion	25	85	1 50	
Abundance. 18 inches high, 6 to 8 peas in a pod, large and wrinkled.	30	1 00	1 75	
Dwarf Telephone. Same quality and productiveness as Telephone excepting the vines grow 2 feet high, pods are large and filled with immense peas of excellent flavor and very sweet	35	1 25	2 00

GENERAL CROP.

Prince Edward. An Extraordinary cropper, large pods, fine quality, 4 feet.	50	1 75	3 00
Champion of England. A popular wrinkled variety of delicious flavor; profuse bearer. Peas are very large, tender, height 5 feet.	30	1 00	1 75
Telephone. This is the best pea for general crop, both for home and market use. Immediately productive and of finest quality. Vines very strong, averaging 18 to 20 large pods per stalk, 4 feet	35	1 25	2 00
Stratagem. Mammoth pods, well filled, height 1½ feet	35	1 25	2 00
Black-Eyed Marrowfat. Grown for market, hardy, productive, 3ft. bu.	25	80	1 25
Mammoth Gray Sugar. Edible pods, a fine flavored variety; can be used in green state like string beans. Height 5 feet	50	1 75	3 00
Dwarf, Sugar. Edible pods	45	1 50	2 50

Peas come earlier to maturity in light soil. For general crop a deep rich loam, or strong loam inclining to clay is best. For early crops decomposed leaves or leaf mould should be used, or if the soil is very poor, strong manure may be employed. For general crop a good dressing should be applied, and for the dwarf growing kinds the soil can hardly be too rich. When grown as a market crop, peas are not staked, but sown in single rows, two or three inches deep, two or three feet apart according to the variety. When grown in small quantities for private use,

PEAS—Continued.

they are sown in double rows six or eight inches apart, and the rows three feet apart, the tall varieties staked up by bush. For an early crop, sow as soon as the ground can be worked, and make repeated sowings every two weeks for succession. A quart is sufficient for a row of about eighty feet.

PEPPER

German, Pfeffer; French, Piment; Spanish, Pimento.

PEPPERS.

	Per oz.	$\frac{1}{4}$ lb.	lb.
Ruby King. Very large; bright red	\$0 30	\$0 85	\$3 00
Sweet Spanish. One of the largest. Best for salads, very hot	20	65	2 25
Large Bell or Bull Nose. An early variety of mild flavor	20	60	2 00
Sweet Mountain or Mammoth. Of large size, best for mangoes	25	75	2 50
Chinese Giant. Double the size of Ruby King. This is the largest and finest mild Red Pepper. Flesh is thick and unusually mild. Productive bearer	35	1 00	3 50
Long Red Cayenne. Used for Pepper, sauces very pungent	20	60	2 00
Golden Queen Mammoth. Large, golden, yellow, early	25	75	2 50
Chili. Very piquant and prolific, fruit conical, bright scarlet	20	60	2 00
Golden Dawn Mango. This is a remarkably prolific Pepper of the Bell class of a magnificent golden color	20	65	2 25
Hot Mango Pepper. Very Hot, best for Pepper Sauce and Pickling	25	75	2 50

The Pepper or Capsicum is valuable for its seasoning qualities, as well as for pickling. Sow early in heat and transplant when the weather is warm and settled, or sow in warm situation in the garden about the middle of May. Plants should be set a foot and a half apart.

POTATOES

German, Kartoffel; French, Pomme de Terre; Spanish, Petata.

Houlton Stirling (see novelties).

Houlton Hebron. White skin, the most popular variety in cultivation

Houlton Rose. The standard variety

Houlton Early Queen. Early and productive

Houlton Green Mountain. Late variety, good keeper, white and mealy....

Houlton Irish Cobbler. Very early, round white

Houlton Boree. Extra early production, white flesh

Houlton Bagley

Houlton Delaware

application

POTATOES—Continued

HOULTON MAINE POTATOES

PUMPKIN

German, Kuerbis; French, Gource; Spanish, Calabaz a Tetanera

CHEESE PUMPKIN.

	Per oz.	¼ lb.	lb.
Calhoun. Flesh wonderfully thick, fine grained	10	20	60
Large Cheese. The best variety, hardy and productive	10	20	50
Connecticut Field. Very productive, largely grown for feeding stock 20c. per quart, \$3.00 per bushel ...	10	15	40
Mammoth King. Grows to an immense size	15	40	1 25
Early Sugar. Fruits medium size, of excellent keeping quality. Flesh very sweet	10	20	50
Cushaw. Salmon color,, crooked neck	10	25	75
Tennessee Sweet Potato. Bell shaped, thick, white flesh, nothing finer for pies	10	25	75

These are usually planted in fields of Corn or Potatoes, but may be profitably raised in fields by themselves. Sow in May; in hills eight feet apart. •

RHUBARB

German, Rabarber; French, Rhuperbe; Spanish, Ruibarbo.

	Per oz.	¼ lb.	lb.
Linnaeus. Early, large and tender	\$0 15	\$0 40	\$1 25
Victoria. Very large, later than Linnaeus	10	35	1 00
Roots (Victoria)	10c. each	\$1 00	doz.

Sow early in spring, in drills a foot apart, thinning out to about the same distance apart in the rows when a few inches high. In fall or following Spring, transplant into deep, rich soil, about three feet apart each way.

RADISH

German, Retting; French, Radis; Spanish, Robanitos.

	Per oz.	$\frac{1}{4}$ lb.	lb.
Vick's Scarlet Globe. New, very fine	\$0 10	\$0 20	\$0 60
Early Scarlet Turnip. The standard variety, of quick growth, mild and crisp when young	10	20	50
Early Scarlet Turnip. Forcing variety, maturing in three weeks	10	20	60
Early Scarlet Turnip. White tipped, a beautiful new early kind, round in shape; color scarlet, tipped with white, a favorite for market gardeners	10	20	50
Market gardeners price	10 lbs. at 40c lb.		
Early Scarlet Turnip. White tip, forcing	10	20	60
Olive Shape Deep Scarlet	10	20	60
French Breakfast. Of quick growth, very mild and tender, of oval form; color, scarlet, tipped with white	10	20	60
Long Scarlet. One of the leading market kinds	10	20	50
Rose China Winter. Flesh firm and piquant; excellent for winter use	10	20	60
White Summer Turnip. A summer variety of mild flavor	10	20	60
Yellow Summer Turnip. Grows to a large size	10	20	60

Black Spanish Winter. Long, one of the hardest and best for winter use.	10	20	60
Half Long Black Spanish. Very fine strain	10	20	60
Black Spanish Winter. Round.	10	25	75
Giant Stuttgart. Summer favorite, German sort ..	10	20	60
California Mammoth White. A giant white fleshed Fall Radish	10	25	75
White Spanish. Long, rather milder than the black.	10	25	75
White Strasburg. Very large, German sort	10	20	60
White Vienna or Lady Finger. Crisp and tender in summer	10	20	60
Icicle. Long, pure white, suitable for forcing	10	20	60

There are two classes of Radishes, those for Spring and Summer use, which are small and arrive quickly at maturity, and with proper care can be kept all winter. The summer radishes should be used while young and tender; if allowed to grow too long they become tough and stringy; they thrive best in high rich soil. For a successful supply, sow from the middle of March until September, at intervals of two or three weeks. For an early supply they may be sown on a mild hotbed in February. The winter varieties may be sown from the latter part of July to the middle of September.

SPINACH

German, Spinat; French, Spinard; Spanish, Espinaca.

Special price on lots of 10 to 25 lbs.

	Per oz.	$\frac{1}{4}$ lb.	lb.
Long Standing, Round Leaved	\$0 10	\$0 15	\$0 35
Flander's Round Leaved. The variety commonly grown, good for spring or fall sowing	10	15	35
Large Viroflay. A new variety, with leaves much larger and thicker than the old variety	10	15	35

SPINACH—Continued.

	Per oz.	¼ lb.	lb.
Victoria, New. Dark green color, sow early	\$0 10	\$0 15	\$0 35
Bloodsdales Savoy Leaved. A large, curled, thick leaved variety, the market gardner's favorite ...	10	15	35
Prickly. Prickly seeded, with triangular arrow-shaped leaves	10	15	35
New Zealand. Produces leaves in great abundance throughout the summer, should be raised in heat and transplanted three feet apart each way into light rich soil	10	25	75

Sow in fall for spring use, in drills a foot apart, thinning out the plants to three inches apart in the rows. Spinach is very hardy and does not require protection except in very exposed places, where a covering of straw or leaves is useful. For summer use sow as early as possible in spring, and at frequent intervals, during the season for succession.

SALSIFY, OR OYSTER PLANT

German, Bocksbart; French, Salsifis; Spanish, Salsifi.

	Per oz.	¼ lb.	lb.
Long White French	\$0 20	\$0 50	\$1 50
Mammoth Sandwich Island	15	40	1 25

This very nutritious vegetable requires the same cultivation as Carrots or Parsnips. It is quite hardy and the roots may remain in the ground all winter; a quantity can be taken up and packed in earth or sand, and stored away for use when needed. It makes a fine soup, like the oyster. It is also half-boiled, grated fine, made into small balls, dipped into butter, and fried.

SALSIFY.

SQUASH

German, Garten Kuerbise, French, Courage; Spanish, Bueter

	Per oz.	¼ lb.	lb.
Mammoth Summer Crookneck. Twice size of Summer Crookneck	\$0 10	\$0 25	\$0 75
Fordhook Squash. Bright, yellow good keeper	10	25	75
Early Golden Bush Scalloped. True bush growth producing fruit ready for use early in the summer	10	25	75
Early White Bush Scalloped. A white variety of the above	10	25	75
Summer Crookneck. Early, productive and of good quality	10	25	75
Boston Marrow. A very valuable medium early variety, an excellent keeper and of superior quality	10	25	75
Hubbard. The best Winter Squash, fine grained, dry, keeps well and is of excellent flavor	10	30	1 00

Per oz. ¼ lb. lb.

Mammoth Chili. Grows to a large size, often weighing two hundred pounds Excellent for stock	\$0 10	\$0 30	\$1 00
Vegetable Marrow. A favorite English sort, skin greenish yellow, flesh white, soft and rich flavor	10	30	1 00

SQUASH—Continued.

Squashes are divided into two classes, Summer and Winter. The Summer varieties come into use about midsummer, and are eaten when the rind and flesh are young and tender. The Winter varieties are left on the vines until they are thoroughly ripe, gathered in the Fall, and stored away for Winter use. If well ripened and kept in a good cellar, they can be preserved until May. Prepare hill for the seeds by incorporating two or three shovelfuls of well rotted manure with the soil, for each hill. For the bush varieties, from three to four feet each way, and for the running sorts from six to eight feet. Eight or ten seeds should be sown to each hill, thinning out after they have attained their rough leaves, leaving three or four of the strongest plants.

SWEET CHARD OR SILVER BEET.

SWISS CHARD.

This is a Beet producing leaves only of a quality superior to those of the ordinary Beet, and excellent greens. Cultivate about the same as spinach, by sowing in early spring in drills about a foot apart.

Giant Lucullus. Large, crinkled leaves; tender and of fine flavor; dark green; pure white ribs. Pkg. 5 cts., oz. 10c, $\frac{1}{4}$ lb., 25c, lb. 75c.

TOBACCO

Connecticut Seed Leaf. This variety is best adapted to the climate of the Northern and Middle States. Per oz. 25c, $\frac{1}{4}$ lb. 75c, lb. \$2.50.

Havana. Imported Seed, Vuelto de Abbajo. Per oz. 40c, $\frac{1}{4}$ lb. \$1.25, lb. \$4.00.

TOMATO

German, Liebesapfel; French, Tomôte; Spanish, Tomata.

	Per oz.	$\frac{1}{4}$ lb.	lb.
June Pink. A very early market sort, smooth, medium size, bright pink	\$0 25	\$0 80	\$2 75
Earlina, Extra Early. Bright red, smooth. It is claimed to be one of the earliest introduced, very productive	25	75	2 50
Favorite. Large, smooth, productive, very solid and of fine flavor. A good shipper	20	65	2 25
Imperial. Very smooth, bright red color, good size	25	75	2 50
Trucker's Favorite. Large, smooth and very regular in form, purplish red, solid	25	75	2 50
Thorburn's Terra Cotta. A cross between the Stone Peach and Ponderosa..	40	1 25	4 00
Ponderosa. Very large and solid	35	1 00	3 50

Livingston's Perfection. Very early, round, smooth, tough skin, brilliant; solid and rich flavor; ripening thoroughly. A favorite market variety..	20	60	2 00
Ignotum. Early, large and smooth	25	75	2 50
Livingston's Beauty. Large dark crimson, thick skin	20	65	2 25
Dwarf Champion. Resembles Acme, early	25	75	2 50
Acme. A beautiful variety. Fruit of medium size, form perfect and very smooth. Ripens all over and through at the same time. This variety seems to possess all the good qualities that can be desired in a tomato..	20	65	2 25
Matchless. Extra large, smooth and handsome; bright red; very solid. Plant of vigorous growth and prolific	20	60	2 00

TOMATO—Continued.

	Per oz.	$\frac{1}{4}$ lb.	lb.
Trophy. (Selected). The leading variety for general cultivation, and when properly grown will give satisfaction. The seed we offer is carefully selected from pure stock	\$0 25	\$0 75	\$2 50
Golden Queen. A first class large, smooth, pure yellow Tomato. Fine bearer and of excellent flavor	25	75	2 50
Yellow Plum. Used principally for pickling	25	75	2 50
Red Pear Shape. Used principally for preserving and pickling	25	75	2 50
Red Currant for Preserves	25	75	2 50
Yellow Cherry. Similar to above, except in color	25	75	2 50

EARLIANA TOMATO.

The seed should be sown in a hotbed about the first week in March, in drills five inches apart and half an inch deep. When the plants are about two inches high, they should be set out four or five inches apart in another hotbed, or removed into small pots, allowing a single plant to a pot. About the middle of May the plants may be set in the open ground, at a distance of three to four feet apart in hills in which a good shovelful of rotted manure has been mixed.

TURNIP

German, Rube; French, Navet; Spanish, Nabo.

	Per oz.	$\frac{1}{4}$ lb.	lb.
Milan. (Purple top), the earliest of all	\$0 15	\$0 35	\$1 25
Purple Top Munich. One of the earliest varieties	10	20	60

Yellow Aberdeen. Hardy and productive, large grown for farm purposes..	10	20	50
Large White Norfolk. Globe-shaped variety, one of the best for stock ...	10	20	50
Pomeranium White Globe. Very fine, white Globe variety, round and thick.	10	20	60
German Teltow. Small early fine grade, sugary	10	20	60

TURNIPS—Continued

RUTA BAGAS

PURPLE TOP STRAP TURNIP

an inch or more and give them a light dressing, of wood ashes. This is the surest mode of obtaining fair and smooth Spring Turnips in old gardens where they are almost certain to grow wormy if the earth is allowed to remain in contact with the roots. It is important to get them started very early so that they may have time to grow a sufficient size before very hot weather, when they will soon become tough and strong. For the Fall and main crops, sow from the middle of July to the last of August in drills as directed for the Spring sowing. In the field, Turnips are more generally sown broadcast though much larger crops are obtained by drill culture.

American Improved Purple Top.

The leading variety, of fine quality, valuable both for the table and for feeding stock. Per oz. 10c, $\frac{1}{4}$ lb. 20c, lb. 50c.

Carter's Imperial Royal Swede.

An English variety, highly recommended as producing enormous crops. Per oz. 10c, $\frac{1}{4}$ lb. 20c, lb. 50c.

White or Sweet German.

A large solid variety. Per oz. 10c, $\frac{1}{4}$ lb. 20c, lb. 50c.

Laing's Improved, globe-shaped,

with small top and tap root. Per oz. 10c, $\frac{1}{4}$ lb. 20c, lb. 50c.

For spring crop commence sowing early varieties as soon as the ground can be worked, in drills fourteen inches apart; thin out the plants to five or six inches apart. Keep clear from weeds, and when the bottoms begin to enlarge, brush away the earth from about the roots the depth of

SWEET POT AND MEDICAL HERB SEEDS

Herbs are valuable for culinary and medicinal purposes, but they do not always receive the attention which they deserve. They are easily grown, and when preserved by drying are ready for use at any season of the year. Sow in Spring as soon as the weather is warm, and thin out as the plants grow up.

Per oz.

Anise (<i>Pimpinella anisum</i>), an annual, cultivated for its seeds and its leaves, which are used for garnishing and for seasoning	\$0 10
Balm (<i>Melissa officinalis</i>), a hardy perennial, used for making balm tea and balm wine ...	20
Basil, Sweet (<i>Ocimum basilicum</i>). This is a tender annual, cultivated for its leaves, which are much used for flavoring soups and sauces.....	10
Bene (<i>Sesamum orientale</i>)	10
Borage (<i>Borage officinalis</i>), hardy annual, some times used as a pot herb, and also for garnishing, but chiefly for claret cup and other cooling drinks. Bees are very partial to the flowers	10
Caraway (<i>Carum cauri</i>), hardy biennial, cultivated for its seeds, which are largely used in various kinds of confectionery and for giving flavor to liquors	10
Catnip (<i>Nepeta cataria</i>), perennial	30
Coriander (<i>Coriandrum salivum</i>), an annual, raised for its seeds, which are used by confectioners, and sometimes to disguise the taste of medicine	10
Dill (<i>Anethum graveolens</i>), annual, the leaves are used in soups and sauces, and the seeds are sometimes added to pickle cucumbers to heighten their flavor. Medicinally they are good for flatulence and colic in infants 75c lb	10
Fenel (<i>Anethum foeniculum</i>), hardy perennial, leaves used for garnishing, and in the preparation of various fish sauces	10
Horehound (<i>Marrubium vulgare</i>), hardy perennial, principally used for medicinal purposes ..	15
Hyssop (<i>Hyssopus officinalis</i>), hardy perennial, the leafy tops and flowers are used for making hyssop tea	15

SWEET POT AND MEDICINAL HERB SEEDS—Continued

	Per oz.
Lavender (<i>Lavandula spica</i>), a popular aromatic herb	15
Majorum, Sweet (<i>Origanum Majorana</i>), for seasoning	15

Wormwood (<i>Antemesia abietnium</i>), used for medicinal purposes; it is also beneficial to poultry and should be planted in poultry grounds	20

MUZZY BROTHERS' CELEBRATED LAWN GRASS

	1 qt.	2 qt.	4 qt.	8 qt.	1 bu.
Muzzy Bros.' Fine Mixed Lawn Grass. Composed of a mix- ture of the finest grasses; sow four to five bushels per acre..	\$0 20	\$0 35	\$0 65	\$1 25	\$4 00
Muzzy Bros.' Special Lawn Mixture. This extra choice mix- ture contains a large proportion of the finer and more ex- pensive species of grasses, in extra heavy samples, producing a turf of the closest and finest texture possible	25	45	85	1 50	5 00
Muzzy Bros.' Shady Lawn Mixture. A mixture of grasses that thrive in shady situations, under trees, or close to walls where there is little sun	30	60	1 00	1 75	6 00

QUANTITIES TO BE USED.

Plot 20 feet by 20 feet, sow 1 quart.

Plot 25 feet by 50 feet, sow 4 quarts.

Plot 25 feet by 25 feet, sow 2 quarts.

Plot 25 feet by 100 feet, sow 8 quarts.

Plot one acre, sow 3 bushels.

For large lawns, where turf has become bare through constant use, it is only necessary to sow fresh seed at the rate of one to two bushels to an acre. On such lawns it is well to use our Lawn Dressing, which can be raked in.

MUZZY BROS.' LAWN GRASS, TOP DRESSING, ODORLESS

QUANTITY REQUIRED OF OUR CELEBRATED LAWN DRESSING

Plot 20 feet by 25 feet, use 5 pounds	Price \$0 25
Plot 20 feet by 50 feet, use 10 pounds	Price \$0 40
Plot 25 feet by 100 feet, use 25 pounds	Price \$0 90
Plot 50 feet by 100 feet, use 50 pounds	Price \$1 75
Plot One-quarter acre, use 100 pounds	Price \$3 00

HOW TO MAKE A LAWN

The ground ought to be carefully prepared during the winter, by draining if found requisite, and digging to the depth of six to twelve inches, according to the nature of the soil. The land should then be leveled and raked to remove stones, etc., and then made firm with a heavy iron roller. When the natural soil is too stony, a supply of good mould should be spread over it to a depth of two or three inches. In March or April, before sowing the seed, the ground ought to be thoroughly cleaned and made perfectly level with the iron roller and as the subsequent appearance of the lawn depends in a great measure on this part of the preparation, it is of the most importance it should be well done. The ground should then be evenly raked and the seeds sown. April and September are the best months for sowing. The seed should be sown on a calm day, at the rate of four bushels to the acre.

After the sowing has been accomplished, the ground should be again rolled, and as soon as the young plants have attained the height of two or three inches, the whole plot should be carefully gone over with a sharp scythe, and from the months of April to October it should be mown every ten days. Mowing machines are excellent after a comparatively close turf is established; but for the first six months' sowing the scythe should be used in preference to the machine. **Frequent mowing and rolling are indispensable to maintain the turf in good order.** By adopting these means a close green sward will be obtained in a short time.

For lawns requiring improvement, and on croquet grounds, where the turf has become bare through constant use, it is only necessary to sow fresh seed at the rate of one or two bushels to the acre, either in the Spring or Fall, using a small tooth rake and rolling afterwards. A slight dressing of manure late in the Fall, will often be found beneficial in encouraging the growth of finer grasses, and helps to produce a close growing turf.

MEADOW AND PASTURE MIXTURES

The formation of permanent and productive meadows and pastures is of great value to farmers, and has been given thorough study by numerous experts, resulting in formulas that will give good results under the varying conditions of our climate.

It is a well known fact that a heavier and more prolonged growth is produced by a mixture of many sorts of grasses than by only one or two. Some sorts do best on high, dry soil, while others prefer plenty of moisture. Some mature so early and others so late that there is no time in the season when one sort or another is not at its best. Grass seed may be sown either early in spring or fall, from September to the middle of October in this latitude. Below we give mixtures that we are confident will give good results.

MEADOW MIXTURE FOR ONE ACRE

No. 1. On Good Land, Neither Too Dry nor Too Wet

Price \$4.00 per bushel of 20 lbs. Sow 2 bushels to the acre.

No. 2. For High and Dry Land

Price \$4.50 per bushel of 20 lbs. Sow 2 bushels to the acre.

No. 3. On Wet Land

Price \$4.00 per bushel of 20 lbs. Sow 2 bushels to the acre.

PASTURE MIXTURE FOR ONE ACRE

No. 4. On Good Land. Neither Too Wet nor Too Dry.

Price \$4.25 per bushel of 20 lbs. Sow 2 bushels to the acre.

No. 5. On Dry Land

Price \$4.25 per bushel of 20 lbs. Sow 2 bushels to the acre.

No. 6. On Wet Land

Price \$4.25 per bushel of 20 lbs. Sow 2 bushels to the acre.

CLOVERS

(Subject to Variation in Price).

Red Clover. Medium (<i>Trifolium pratense</i>). Price variable, 60 lbs. to bushel.	} Market Price.
Red Clover, Large or Pea Vine. Price variable	
White Clover. (<i>Trifolium repens</i>)	
Alfalfa or Lucerne. Requires a deep rich soil, and in such will produce several crops every season. Fifteen pounds to the acre	
Alsike or Swedish (<i>Trifolium hybridum</i>). Ten pounds to the acre	
Crimson or Italian (<i>Trifolium incarnatum</i>), sown in Autumn, it furnishes an early fodder and is excellent for soiling. Twenty pounds to the acre. Price variable	
Bokhara Clover (<i>Melilotus alba</i>), affords excellent feed for bees; it is valuable soiling plant; lasts two years. Ten pounds to the acre ..	}
Yellow Trefoil (<i>Medicago lupina</i>) Hop clover. Fifteen pounds to the acre	

GRASS SEEDS

These Prices are Subject to Variation.

	Per 10 lbs.	Per lb.
Blue Grass Kentucky (<i>Poa pratensis</i>), extra clean; does well on light dry soils; recommended for permanent pasture; it requires two or three years to form a good sod, and does not arrive at its perfection as a pasture grass until it is much older; valuable in mixtures for lawn. 14 lb bushel ...	\$2 25	\$0 25
Creeping Bent Grass, Florin (<i>Agrostis stolonifera</i>), used for lawns, well adapted to most places	4 50	50
Crested Dogtail (<i>Cynosurus cristatus</i>), good for permanent pasture for sheep, is productive and early, suffers but little from dry weather, and is one of the best grasses for lawns, 25 lbs. to the acre	2 75	30

GRASS SEED—Continued

	Per 10 lbs.	1 lb.
Hard Fescue (<i>Festuca duruiscula</i>), admirable pasture grass of fine quality, thrives well in dry situations. 30 lbs. to the acre	\$3 00	\$0 35
Meadow Fescue (<i>Festuca pratensis</i>), this is excellent for hay when sown with other grasses, such as Orchard Grass and Timothy, and is also considered one of the best grasses for permanent pasture on a great variety of soils. 40 lbs. to the acre	2 00	25
Sheep's Fescue (<i>Festuca ovina</i>), does well in high, dry and open pastures, is of short, dense growth, and valuable in lawn mixtures. 30 lbs to the acre.	3 00	35
Meadow Foxtail (<i>Alopecurus pratensis</i>), regarded as one of the most desirable grasses for permanent pasture, being early and rapid growth. 25 lbs. to the acre	3 75	40
Meadow Soft Grass (<i>Holcus lanatus</i>), will grow with little or no care in any soil; it is chiefly cultivated where the better grass will not grow. 3 bu. to the acre; 7 lbs. to bushel	1 75	20
Orchard Grass (<i>Dactylis glomerata</i>), is one of the most desirable of all pasture grasses, coming early in the Spring and remaining later in the Autumn than any other. 3 bu. to the acre. 14 lb. bu.	2 25	25
Red Top Grass (<i>Agrostis vulgaris</i>), good permanent grass, excellent for lawns, pastures, etc., and sowing with Timothy and Red Clover for cutting for hay. Sack 50 lbs., \$4.00; per bushel of 14 lbs., \$1.50	3 75	40
Fancy Red Top Grass , cleaned like Timothy; free from chaff	3 75	40
Rhode Island Bent Grass (<i>Agrostis canina</i>), best of all grasses for lawn where only one variety is used	3 75	40
Rye Grass English (<i>Lolium perenne</i>). Probably one of the most important and valuable of the cultivated grasses; is naturally adapted to almost any soil; matures early, and is very productive, but contains less nutrition than Orchard Grass	1 25	15
Rye Grass Italian (<i>Lolium Italicum</i>). This ripens much sooner than the English Rye Grass, and is greatly preferred by cattle, and greedily eaten by them, either in a green or dry state	1 25	15
Sweet Vernal Grass (<i>Anthoxanthum odoratum</i>), is not valuable when sown alone, but when sown with other grasses, it becomes so because of its early growth. It also yields a delightful odor when cured for hay. 10 lbs. to the acre, mixed with other grass annuals	4 50	50
Tall Meadow Oat Grass (<i>Phleum pratense</i>). As a crop to cut for hay, this is of its early and luxuriant growth. It shoots up very quickly after being cut, and produces a thick crop of aftermath, which also makes it valuable as a soiling crop. It has been lately in demand and is much valued in the South	2 40	26
Timothy, Herd's Grass (<i>Phleum pratense</i>). As a crop to cut for hay, this is probably unsurpassed. It thrives best on moist, peaty or loamy soils, and is not suited to light or sandy soils, although on such it can with care, be made to produce fair crops. Price according to market, 45 lbs. to bu....	Market Price	
Rough Stalked Meadow Grass (<i>Poa trivialis</i>), produces a constant supply of highly nutritious herbage, particularly on dry soils; one of the most valuable for laying down pastures and meadows on soils either moist or moderately dry. 14 lbs. to the bushel; 20 lbs. to the acre	4 50	50
Wood Meadow Grass (<i>Poa nemoralis</i>). This grass grows well both on shady and exposed situations. 30 lbs. to the acre	3 75	40
Yellow Oat Grass (<i>Avena flavescens</i>), good for dry pastures and meadows. Is much relished by sheep		1 00
Golden or German Millet . This variety is a heavier cropper than the Hungarian Grass, and needs a longer season and stiffer soil. Grows from three to five feet high, stands up well, is easily cured; gives general satisfaction. Three pecks to the acre. Per bushel of 48 lbs	Market Price	
Hungarian Grass . A valuable forage plant, succeeds well on dry, light soil; withstands the drought remarkably, remaining green when all other vegetation is parched up, and if its development is arrested by dry weather, the least rain will restore it to vigor. Sow broadcast. Three to the acre. Per bushel of 48 lbs	Market Price	

GRAINS

All grains are selected expressly for seed, and are strictly pure and true to name.

Sold at Market Prices.

SPRING WHEAT, 60 lb. Bushel

Saschatewan Fife

China Spring. Chaff bearded variety, and a general favorite.

Mediterranean Spring This variety has been grown with great success for a number of years in some sections of New England, and is very highly recommended, is bearded, yields well and the kernels are larger than those of other Spring varieties.

White Russian. This variety, recently introduced, has proved very valuable in many localities in the Northwestern States. Straw of good length, strong, does not lodge. It is not inclined to rust. Heads of large size and well filled with plump kernels weighing 60 to 63 lbs. to the bushel. Has produced 40 to 50 bushels to the acre.

WINTER WHEAT, 60 lb. Bushel.

Jones' Winter Five. Surpassing all other varieties in hardiness and productiveness.

Golden Cross. Has the yield of the Clawson, with flower of the Mediterranean.

Clawson. Also known as the Seneca. This is a beardless white wheat with red chaff. It proves early and hardy, has a stiff straw, yields larger crops than any other.

Fultz. A beardless amber variety, grown largely in some sections of Pennsylvania and with very satisfactory results. It is very hardy and productive, and the straw is of medium length and very strong; makes excellent flour.

Red Mediterranean. (American). This is the imported variety fully acclimated and is a standard wheat. The heads are bearded and well filled. It succeeds well in nearly all localities and ripens early.

OATS, 32 lb. bushel.

SWEDISH or WASHINGTON. Very popular and standing well until fully ripe.

Probsteiner. Very productive and heavy. The straw is very strong: No. 32.

Scotch. One of the leading varieties.

Welcome.

RYE 56 lb. Bushel. Spring and Winter Rye

SPRING BARLEY, 48 lb. Bushel

Vermont Champion (two rowed).

BUCKWHEAT, 48 lb. Bushel.

Silver Hull. This variety is a great improvement on the common Buckwheat. Sown at the same time it will continue to bloom longer, matures a few days sooner, and yields nearly or quite double under the same conditions.

JAPANESE BUCKWHEAT

Yields twice or three times as much as Silver Hull and ripens a week earlier.

MISCELLANEOUS SEEDS, ETC.

Cow Peas. For Fodder

Kaffir Corn or Sorghum.

Canada Field Peas

Winter Vetches

Spring Vetches

Flax. Very Clean.

Per qt. 20c; bu. \$4.00

Per lb. 15c; 100 lb. \$7.00

HIGH GRADE FERTILIZERS

MUZZY BROS.' SWIFT "SURE" PHOSPHATE

FOR GENERAL CROPS, BEST FERTILIZER EVER MANUFACTURED

Stands ahead of anything in the market in Analysis, selling Price and Results. The Great Satisfaction this Fertilizer has given our customers, being so universal, enables us to recommend it as the Leading Artificial Manure in the Market.

GUARANTEED ANALYSIS

Nitrogen	2.46 to 3.28 per cent.	Total Phos. Acid	10 to 11 per cent.
Equal to Ammonia	3 to 4 per cent.	Potash Actual	6 to 8 per cent.
Available Phos. Acid	8 to 10 per cent.	Equal to Sulp. Potash ..	11.09 to 12.94 per cent.
Insoluble Phos. Acid	1 to 2 per cent.	Ton. (12 bags) \$35.00 per bag (167 lbs.)	\$3.25

MUZZY BROS.' SWIFT "SURE" SUPER PHOSPHATE

FOR POTATOES

Nearly every farmer grows Potatoes, and consequently is, with the trucker and market gardener, interested in buying that fertilizer which for the least cash outlay, will bring him the best returns; as it is no longer a question, but an actual fact, that with a Potato. Manure made from first class material, like our "SWIFT-SURE" SUPER PHOSPHATE FOR POTATOES, you can grow a larger crop of potatoes than you can with barnyard manure, and have them smoother, free from imperfections and of more uniform size.

GUARANTEED ANALYSIS

Nitrogen	2.46 to 3.28 per cent.	Total Phos. Acid	8 to 11 per cent.
Equal to ammonia	2 to 4 per cent.	Potash Actual	7 to 8 per cent.
Available Phos. Acid	8 to 10 per cent.	Equal to Sulp. Potash ..	12.94 to 14.79 per cent.
Insoluble Phos. Acid	1 to 2 per cent.	Ton (12 bags) \$35.00; per bag (167 lbs.)	\$2.75

MUZZY BROS.' SPECIAL FERTILIZER

Nitrogen	1.65 to 2.47 per cent.	Insoluble Phos. Acid	1 to 2 per cent.
Equal to Ammonia	2 to 3 per cent.	Potash Actual	4 to 5 per cent.
Available Phos. Acid	8 to 10 per cent.	Equal to Sulp. Potash ..	7.40 to 9.25 per cent.
Total Phos. Acid	9 to 11 per cent.	Ton (12 bags) \$30.00; per bag (167 lbs.)	\$2.75

FINE GROUND BONE for Lawns

AN EFFICIENT AND PERMANENT DRESSING FOR LAWNS; ODORLESS

GUARANTEED ANALYSIS

4 to 5 per cent. Ammonia.	45 per cent. Bone Phosphate of Lime.	
5-pound bag for space 20x 25 feet		\$0 25
10-pound bag for space 20x 50 feet		40
25-pound bag for space 25x100 feet		90
50-pound bag for space 50x100 feet		1 75
100-pound bag for space 1/4 acre		2 75

PURE PULVERIZED SHEEP MANURE

A pure, natural and nutritious manure. Immediate and lasting in effect. Excellent for mixing with the soil of the greenhouse plants. In the vegetable garden it promotes a rapid, steady growth until maturity. It makes a rich Liquid Manure.

Quantity Required. For garden and field crops. 1 to 2 tons per acre—half before plowing, the balance before harrowing. For top dressing grass; use 1 ton per acre in fall or early spring.

Price, 100 lb. bag, \$2.00; per ton of 2,000 lbs. \$30.00; in packages of 2 lbs. 15; 10 lbs. 40c.

NITRATE OF SODA

A fertilizer for all crops. It is very quick in action, and hastens maturity of crops fully two weeks. Being extremely soluble, it should not be applied until the crops are above the ground when 100 pounds per acre should be sown, mixed with wood ashes. Does not exhaust the land.

5 lbs. 35c; 10 lbs. 50c; 25 lbs. \$1.25; 50 lbs. \$2.00. Bags trifle over 200 lbs. \$3.50 per 100 lbs.

MURIATE OF POTASH

50 per cent. Actual Potash.

One of the Best Fertilizers for Grass, Wheat, Rye, Oats, Barley, etc. Used with Nitrate of Soda Ground Bone, Acid Phosphate would furnish sufficient available for an increase in yield by 50 per cent. Price, \$3.25 per 100 lbs. \$5.50 Bag of 200 lbs.

HIGH GRADE FERTILIZERS—Continued.**ACID PHOSPHATE**

14 to 16 per cent. Available Phosphoric Acid.

This is one of our Fertilizers which is used in the largest quantity in most of our mixtures as a base. Price, \$1.25 for 100 lbs. \$2.25 Bag of 200 lbs.

KAINIT

12 per cent. Annual Potash.

Used mostly where a small amount of Potash is required, is recommended as a good preventive of Grub's Worms. Price, \$1.15 for 100 lbs. \$1.90 Bag of 200 lbs.

GENERAL LIST OF FLOWER SEEDS**HARDY ANNUALS**

Successive sowing may be made from March to the end of September; March, April and May are the best months for general summer display; June and July for Autumn blooming, and August and September for Spring flowering. The soil should be carefully prepared by being finely pulverized and made light and rich.

Sow thinly; cover with a very thin coat of fine dry earth the smallest seeds needing but a mere dusting to cover them—and from the first keep the plants thinned sufficiently to prevent overcrowding, which weakens them and produces poor blooms.

HALF HARDY AND TENDER ANNUALS.

These include some of the most beautiful and varied of our Summer flowers, among which may be mentioned Aster, Balsam, Ten-Weeks' Stacks, Phlox, Drummondii and Double Zinnia, which in form, size and brilliancy of flowers, and their great diversity of color, are now brought to a high state of perfection.

Sow from the beginning of March to June; when sown in March and early part of April, sow thinly in well drained pots, pans or boxes; place in the greenhouse or a frame where there is a mild heat, or in the absence of these a sunny window in the house will do; cover the seeds lightly, press down the soil firmly and give a gentle watering with a fine rose watering pot.

Separate the plants when large enough to handle, and firmly plant out in May, as soon as the weather is sufficiently warm where intended to flower. The seed can be sown in the open ground in May and June.

HARDY BIENNIALS AND PERENNIALS.

These can be grown at all seasons of the year in the open garden without protection, and may therefore be placed among the most useful of our flowering plants; their variety is almost endless, producing almost every form of flower and shade of color.

The seed may be sown from May to October, but the best time is May and June. Select for sowing a shady, moist situation, and in order to secure the strong plants, sow thinly, and as soon as large enough transplant in showery weather to nursery beds, and finally plant out in October and November; those sown in Autumn are best planted out in March or April, when intended to flower. Many Perennials, is sown early and treated as Annuals will flower the first season. The Pansy, Petunia, China Pink, and its several splendid varieties, and many others, do better as Annuals than Perennials.

Half Hardy Biennials and Perennials may be raised and treated in the same way as recommended for Half Hardy Annuals.

ANNUALS FOR WINTER BLOOMING.

Many Annuals are very desirable for the greenhouse for Winter blooming; these should be sown in July or August. The most important are Browallia, Candy Tuft, German Stocks, Lobelia, Mignonette, Schizanthus, Sweet Alyssum and Dwarf Nasturtiums. Many varieties as well as the above may be sown in the Fall and Winter for blooming early in the Spring, such as Acroclinium, Ageratum, Antirrhinum, Apple-scented Geranium, China Pinks, Dianthus, Mimulus, Myosotis, Pansy, Petunias, Phlox Drummondii, Salpiglossis, Verbena Vinca and others.

GENERAL LIST OF FLOWER SEEDS Continued

- A. Annuals, refers to those plants that last but one season, and must be raised annually.
- B. Biennial, raised one year, bloom and die the next.
- P. Perennial, last two or more seasons.
- h. Hardy, are those that may be grown at all seasons in open air, without protection.
- hh. Half hardy, require the protection of a frame pit, or handlight till May, when they may be transferred to the open garden.
- t. Tender, require to be raised and grown under glass, and will only do in the open air in July, August and September.
- cl. Climbing; as Cypress Vine, Morning Glory, etc.
- spr. Spreading or trailing as Verbena.
- g. Greenhouse, those plants which require to be grown under glass.
- s. Shrubs, plants of a shrubbery or bushy habit.

Those Biennials and Perennials marked with a (*) will bloom the first year if sown early.

ROSEBUSHES, BULBS ETC.

Hardy Roses. Two year old Holland grown, our own Importation. We carry the largest assortment of Rosebushes in the state. Both hardy and ever blooming we append a partial list of the varieties we carry in stock for immediate delivery—they will produce a full crop of blooms the first summer.

American Beauty. Rich, rosy-crimson. Very large.

F. D. Druschki, White American Beauty. Very large, pure snow white.

Baroness Rothschild. Bright, rosy pink. Immense size

Crimson Rambler. Immense cluster bright red flower—very quick grower and hardy.

Thalia, White Rambler. Same as Crimson, cut with pure white blooms, hardy.

Aglaya, Yellow Rambler. Yellow blooms in big clusters, hardy.

Euphrosine, Pink Rambler.

Gen'l Jack. Large, brilliant blood red blooms. Fine Bloomer.

Killarney Pink. Extra fine.

La France Pink. One of the sweetest and most beautiful roses grown. Large, silvery pink. Blooms till frost.

La France Red. Large blooms of brilliant rose pink almost crimson.

Marechal Neil. Large, clear yellow. Ever bloomer.

Magna Charta. Rosy crimson. Large buds and blooms.

P. des Blanches.

U. Brunner. Cherry red.

Perle de Lyon. Deep golden. Ever bloomer.

Paul Neyron. Dark rose, very large and fragrant.

Violet Blue.

Persian Yellow.

Price, 15c each.

Tube Roses. One of the most delightfully fragrant and beautiful of the summer flowering bulbs. By skillful management a succession of flowers may be obtained all the year around. For early flowers they can be obtained all the year around. For greenhouse or hotbed; and for a succession they can be planted at intervals as late as July. For flowering in the open border, plant about the middle of May or as soon as the ground becomes warm. 1c and 2c each.

Gladiolus, Extra Fine Mixed. With a view to so supplying a high grade mixture at moderate prices we have had grown for us by Gladiolus specialists good quantities of some of the choicest named kinds for this mixture, and shall use with them some of Child's hybrids and other best mixtures which will insure a large variety of shades and colors. This is truly a banner strain. Price 3c each; 25c dozen.

Dahlias. Our Dahlia roots are exceptionally fine this year, being Southern grown, and true to name and color. We carry a large assortment of colors. 10c each.

Caladium Esculentum. Elephant's ears. One of the most effective and easily grown plants for the lawn or flower border. Will thrive in any ordinary garden soil, but to get the best results plant in rich soil and give plenty of water. 5c 10c, 15c each.

Peonies. No other plant flowering at the same season can vie with the Peony for beauty. They are perfectly hardy, requiring no protection whatever; are not troubled with insects or disease, and once planted take care of themselves. Price 15c each.

GLADIOLUS

TUBE ROSE.

DAHLIAS

HYACINTHS.

NARCISSUS.

Tulips, Keyserkroon. Red and yellow.
 Tulips, Cottage Maid. Pink.

Being pioneers in the
 Bulb line for over fifty
 years we are in a position
 to give you the best value
 for the least money. It is
 poor economy buying un-
 reliable Bulbs, for it's sim-
 ply love's labor lost. We
 want to gain your confi-
 dence, and if once gained,
 we assure you we will re-
 tain it and give you what
 you ask for without sub-
 stituting.

Scolly Rubber Sprinklers. .40c, 65c and 1.00. Flowers and Clothes Sprinkler 35 cents.

Ornamental Fences and Gates

Our Ornamental Fences are exclusive in design, and embody many highly meritorious features not to be found in those of any other manufacture.

Our fabrics are made by cabling horizontal wires and inserting, at regular spaces, heavy upright or picket-wires which are corrugated either at intervals or continuously to engage the cabled line-wires, reversing the twist of the cable on each picket—thereby causing the cables to become firmly seated in the corrugations of the uprights, thus forming an immovable joint, and providing for contraction and expansion. Will not unravel when cut.

PRICE LIST.

36 inches high10c lineal foot.

42 inches high12c lineal foot.

PERFECTION FLOWER-BED GUARD AND LAWN BORDER

A neat, artistic, and inexpensive fabric for the protection of flower beds. Also much used for lawn and curbway border. Can be readily taken up and used from year to year, cut off to length required, and the ends hooked together when set. No posts are required to hold it in place, as the picket ends are left projecting for insertion in the ground. Uprights are of No. 9 and cables of No. 13 heavily galvanized wire.

Made in two heights:

16 inches high, 6 cents per lineal foot; 22 inches high, 8 cents per lineal foot.

ORNAMENTAL WALK GATES

Cyclone Ornamental Gates are made to match any of our styles of fabric. Frames are of high grade steel tubing, with fittings of high-grade malleable iron and wrought steel. Same style as above we quote: 36 in. high, opening 36 in. \$2.49; 42 in. high, opening 36 in., \$2.49.

Poultry and Pigeon Supplies

FEEDS OF QUALITY

The "SUN" Chick Starter

A Baby Chick Food

This is the food to start chicks right. In size and in contents it is adapted to the wants of chicks for the first twenty days.

It contains the elements of growth and it is a food the chicks can digest.

5 lbs. Bag at 20c, 10 lb. Bag at 35c, 25 lb. Bag at 75c, 50 lb. Bag at \$1.50, 100 lb. Bag at \$2.75.

"CRESCENT" Chick Feed for the Growth Stage.

A standard mixture of re-cleaned Cracked Grains, Seeds and Hulled Oats. The proportions are similar to the "Sun Brand," but a trifle coarser, especially to meet the requirements of the older chicks, although used by many from the beginning.

5 lbs. at 15c, 10 lbs. at 30c, 25 lbs. at 75c, 50 lbs. at \$1.38, 100 lbs. at \$2.50.

DEVELOPING FOOD.

A special food for properly maturing young chicks after they are weaned from Chick Food up to the time for feeding scratching food and laying food. Developing food is dry grain and may be fed from hoppers, but better results may be had by scattering broadcast.

5 lb. Bag at 20c, 10 lb. Bag at 35c, 25 lb. Bag at 75c, 50 lb. Bag at \$1.38, 100 lb. Bag at \$2.50.

Always Ready No Waste No Dirt

Our trade-mark brands of Poultry, Chick and Pigeon Feeds represent strictly high-grade mixtures—manufactured from Sweet, Sound Cracked Grains and Seeds—scientifically proportioned and in sizes best adapted for Feeding, carefully sifted and re-cleaned. No pains are spared to produce Feeds of the greatest value—best quality and uniform grade—the standard of which is maintained at all times.

Notice—Prices affixed to the different varieties appended are subject to change without notice.

"QUEEN" Poultry Mash a Poultry Food

Contains Alfalfa Meal

Proportions changed to meet Requirements of Different seasons, also beef scraps and oil cake. A selected mixture of Ground feeds, manufactured from the choicest sound, sweet and wholesome Grain. It is carefully prepared and contains ingredients in proper proportions essential to the health and growth of the fowl, a health food, a molting food and an egg producer.

5 lbs. at 20c, 10 lbs. at 35c, 25 lbs. at 75c, 50 lbs. at \$1.38, 100 lbs. at \$2.50.

SCRATCH FOOD

For Grown Fowls.

Suitable at all Seasons.

A carefully selected mixed balanced ration of grains, cracked and whole seeds, etc., adapted to the vigorous growth of fowls and production of eggs. Scratching food should be scattered in the litter the first thing in the morning and at noon; late in the afternoon feed all the mash food they will clean up.

5 lbs. 15c, 10 lbs. 30c, 25 lbs. 65c, 50 lbs. \$1.10, 100 lbs. \$2.00

BEEF SCRAP.

Standard Meat Food for Poultry of all Ages.

High Protein Beef Scraps is an especially valuable meat food for poultry and gives very satisfactory results. Any kind of Beef Scraps will not answer. Poor beef scours the birds and often injures them, when the first is used the results are uniformly good. Do not fail to buy your supply from a reliable source.

5 lbs. 25c, 10 lbs. 40c, 25 lbs. \$1.00, 50 lbs. \$1.90, 100 lbs. \$3.50.

LAYING FOOD.

Egg Mash.

Invaluable as a Supplementary Feed for Winter Laying—15 per cent Meat Scraps and Oil Meal—16 to 18 per cent Protein. Can be "Dry" hopper fed or moistened.

5 lb. Bag at 20c, 10 lb. Bag at 35c, 25 lb. Bag at 75c, 50 lb. Bag at \$1.38, 100 lb. Bag at \$2.50.

SPRATT'S FOULTRY FOOD

A specially prepared and highly nutritious food. Used at all the principal shows all over the world. The most successful food for all kinds of poultry.

1 lb. at 10c; 25 lbs. at 75c; 100 lbs. at \$5.50.

MUZZY "PIGEON FEED" A SQUAB DEVELOPER

Right feeding of pigeons is considered something of a problem. Most raisers do not understand either the pigeon or its feeding as well as they do poultry. The true fancier, the man who raises birds for their beauty, for the show, for the pleasure there is in it, or for sporting, finds in our Pigeon Feed a combination suited to his needs.

5 lbs. 20c; 10 lbs. 35c, 25 lbs. 75c, 50 lbs. \$1.38, 100 lbs. \$2.50.

CHARCOAL

Prepared expressly for poultry, absolutely pure, essential to health of fowls and aids to digestion. We carry three grades:

No. 2. Fine, for use on mash mixtures.

No. 1 Medium, for small chicks

No. 0 Coarse, for fowls.

5 lbs. 15c. 10 lbs. 25c. 25 lbs. 65c.
50 lb. \$1.00; 100 lbs. \$1.90.

GROUND BONE, Fine and Granulated.

Ground Bone is made from the Dry Bone, and contains Phosphates, Lime and Protien and is especially valued as an egg producer.

5 lbs. 25c. 10 lbs. 40c. 25 lbs. 88c.
50 lbs. 150. 100 lbs. \$2.75.

CUT ALFALFA CLOVER.

A Poultry Food that aids digestion and assists in the assimilation of grain foods, thereby giving better results at lower cost. Among green foods, Alfalfa stands at the top. Mealed Alfalfa is a boon to poultrymen. It is used in a mash for small chicks as well as to mature fowls. If more of this meal was fed to young chicks there would be less mortality.

5 lbs. 15c. 10 lbs. 25c. 25 lbs. 60c.
50 lbs. \$1.10 100 lbs. \$1.90.

CUT RED CLOVER

Cut Clover has become the standard green food for winter egg production. It is used and recommended by every poultry expert and well-known practical poultryman in America.

Writers on poultry topics endorse it as a necessity, especially during the long winter months when the fowls are unable to obtain a substitute for the bulky green food which is so plentiful during the summer season in the shape of grass clover and vegetables.

5 lbs., 15c. 10 lbs. 30c. 25 lbs. 75c.
50 lbs. \$1.25. 100 lbs. \$2.25.

CRUSHED OYSTER SHELLS.

It is needless for us to enlarge on the value of oyster shells for poultry. Every poultryman realizes their importance as an egg maker and general promoter of good health.

1 lb. 1c, 5 lbs. 5c, 25 lbs. 25c. 100 lbs. 60c.

CRYSTAL GRIT.

We supply 4 sizes of Grit. No. 4 for Brooder Chicks; No. 3 for Pigeons; No. 2 for half-grown Chicks; No. 1 for Hens, Turkeys, Ducks and Geese.

1 lb. 2c, 5 lbs. 10c, 25 lbs. 35c, 100 lbs. 50c.

FOUST'S HEALTH GRIT.

1 lb. 5c, 5 lbs. 15c, 10 lbs. 30c, 25 lbs. 75c, 100 lbs. \$2.00.

SEEDS AND GRAINS.

We carry a full line of the following: Wheat, Barley, Millet, Hemp, Sunflower, Kaffer Corn, Canadian Peas, Cracked Rice, Linseed Meal, Canary Seed and Mixed Bird Seed, Buckwheat, Rye, etc.

GRIT AND SHELL BOX.

Sanitary grit and shell boxes make a material saving on grit and oyster shells, ground bone, charcoal or poultry foods. They are practical self feeding boxes made of heavy galvanized iron.

50 cents each.

Sanitary Dry Feed Box, 75c.

1-2-3 POULTRY FEEDER.

For feeding Dry Mash, Scraps, Grit, Oyster Shells, Charcoal or any poultry feed. The separator can be arranged so as you can have one, two or three compartments. When used for one kind of feed take out the separator; for two kinds put separator in one end; when used for three kinds, say scraps, shells, and grit, put separator in the middle and you have three separate compartments. Price, 75c.

Caponizing Requisites

GAPE WORM EXTRACTOR.

The use of this instrument is so simple that a few moment's practice will give almost all information needed. The wires being flexible, may be made smaller or larger by bending to suit any age fowl.

Full directions with each instrument.

Price, 25 cents.

PILLING FRENCH POULTRY

KILLING KNIFE.

Every Poultry raiser should have one of our killing knives. They are made of a finely tempered instrument steel, with nicked handle; will last a life time. Sent postpaid on receipt of 50 cents. Don't wait! Send for it now.

RELIABLE SPRING LEVER POULTRY

PUNCH.

If you keep a record of your chicks, of the different breeds, hatches, strains, etc., there is no better, quicker, or easier way than by using our latest invention.

Price, 25 cents.

PHILADELPHIA

Chick Marker

ZERO LAMP.

With seamless founts drawn in one piece and galvanized after drawing.
7-inch by 2 3-4, No. 2 burner and chimney, 75c.
7-inch by 2 3-4, No. 3 burner and chimney, 98c.

Zero Incubator and Brooder Lamp, \$1.00 each.

PILLING CAPONIZING SETS.

The Farmer Mi	Caponizing Set	\$6.00
The Farmer's	Caponizing Set	3.00
The Philadelphia	Caponizing Set	2.75
The Plain	Caponizing Set	1.50

Full instruction for use with each set.

HIGH GRADE TESTED THERMOMETERS.

The best incubator or brooder manufactured,

is worthless unless the thermometer used therein is accurate. Hundreds of hatches in incubators fail because of inferior thermometers, and large numbers of chickens are killed in brooders owing to defective or worthless thermometers.

The thermometers here listed are thoroughly tested before they are shipped.

Incubator Thermometer, each 50 cts.

Brooder Thermometers, each 40 cents.

INCUBATOR HYGROMETER

These Hygrometers should be used by every one who runs an incubator. They regulate the moisture as accurately as the heat which overcomes the trouble so many people have of chicks "dead in the shell."

Price each, \$1.50.

CONNOR'S POULTRY DEVICES

OAT SPROUTER.

This Sprouter makes it possible to have plenty of green feed in winter which has proven to be the best and cheapest feed for hens and growing chicks, so if eggs are wanted in winter, feed Sprouted oats. This Sprouter is 'll metal, the frame is made of wrought iron and having only three legs allows it to stand steady on any floor, the shelves are made of one piece of angle iron shaped to fit pans and the pans are also made from one piece of black sheet iron, pressed into shape and galvanized after made, insuring it against rust, a very essential feature in an Oat Sprouter. This Sprouter takes up very little room and can be set in the kitchen or dining room and not mar the effect.

No. 1—200 to 225	Hen size 7	Pans 16x17	\$4.50
No. 2—125 to 150	Hen size 7	Pans 11x16	3.75
No. 3—75 to 100	Hen size 7	Pans 10x14	3.25
No. 4—25 to 50	Hen size 4	Pans 10x14	2.25

Can add more pans at an additional cost of 50c. per pan. Directions for using with Sprouter.

JUST THE THING FOR DRY MASH,

BEEF-SCRAPS, GRIT, CHAR-COAL AND OYSTER SHELL

Depth of pan prevents waste, and being hung under hopper to legs with 2 small links of chain and small bolts allows pan to shake just enough to prevent clogging and the delivery of feed can be regulated by adjusting nut on bolts. Can be set any where in or outdoors, and being round will accommodate more at one feeding than any open hopper of same capacity, that has to be hung against the wall.

	Capacity	Weight	Height	Price
No. 1	10 qts.	5 lbs.	20 in.	\$1.00
No. 2	8 qts.	4½ lbs.	18 in.	.80
No. 3	6 qts.	4 lbs.	16 in.	.65

Will make these feeders in any size up to 20 qts. at an additional cost of 10c. per quart

At these low prices these feeders will pay for themselves in a very short time by saving the amount formerly wasted in open hopper feeding.

A top filled Fountain on legs, up out of the dirt, with double walls, top, side and bottom, keeping waer cool in summer, and as near non freezing as any without artificial heat, and at a very small cost, the user can have a heater under pan and avoid freezing in severe winter weather, but by putting warm water in the fount in the morning, the weather has to be very severe for it to freeze during the day. All parts being separate makes it easy to clean. The bottom of reservoir being up and not fastened to pan, makes a double bottom. The upper part of top grooved and projecting, gives ventilation, and keeps dirt from falling in pan, hence cooler, less cleaning, and more sanitary than others. When taken off stand makes an ideal Fount for little chicks, and by using a pudding pan on stand the user has a splendid wet mash feeder, or a pan up out of the dirt for any other use, making a two in one article.

	Capacity	Weight	Height	Price
No. 1	4 qts.	7 lbs.	16 in.	\$1.00
No. 2	8 qts.	9 lbs.	20 in.	1.50

GEM FOLDING EGG TESTER

A tester consisting of pasteboard and a strip of mirror. The tester has been in common use for years, is very popular and fills a longfelt want for something accurate and cheap. Price 50c.

THE NORWICH AUTOMATIC AIR-LOCK FOUNTAIN

SANITARY NON-FREEZING

How to supply water to the poultry house during the winter months has been one of the problems which has confronted the poultrymen for years, for there is nothing more discouraging than to fill the drinking vessels, with all the accompanying discomforts of carrying water in cold weather, and then have the fountains freeze almost before we finish the task, and it has been the experience of many poultrymen that their birds have been without water for most of the day in consequence.

One filling of the oil tank will keep the apparatus burning day and night for two weeks, and it is but necessary to trim the wick occasionally, for the blaze is so small the wick crusting is a very slight matter. To accomplish the cleaning of the wick, the base is fitted with a slide, through which it may be attended without removing the reservoir, while the regulation for a high or low flame is accomplished from the outside of the burner by means of the wheel, as shown.

Made in one size only—5 gallons capacity.

Price—Complete with Burner Base\$3.00
Without Burner Base 2.00

KEYSTONE FOUNTAINS

INSURE SAFE EGG DELIVERY

No. 6\$0 90
No. 8 1 00
No. 12 1 25

THE EUREKA EGG CASE

Herewith is illustrated the Eureka Egg Case, which is the most durable of any egg case in the market. It has five strong points namely:

1st—It is strongly constructed.

2nd—It has Patent Handles.

3rd—It has little Daisy Hinges, allowing the cover to fall close to the back.

4th—It has Snap Fasteners.

5th—Its Fillers are first-class and have no equal.

If you are shipping eggs it costs less in the end than any other

Size	Case with Fillers	Size	Case with Fillers
9 dozen	\$1.00	15 dozen	\$1.25
12 dozen	 1.10	30 dozen	 1.50

PAPER EGG BOXES

Just the thing for your family egg trade, they ship knocked down can easily be set up. Extra heavy, 1 doz. size 15c. dozen.

90c. for 100. In 1000 lots \$6.50. Regular 1 doz. size 12c. per dozen, 80c per 100 and \$6.00 per 1000.

We carry a good wood box of good pine stock and Egg Spring Holder. Best thing made for shipping. Also new Egg containers for Parcel Post shipments. Write for prices.

METALLIC EGG TESTER.

We manufacture what is probably the neatest and surest metallic egg tester on the market. It consists of a metal lamp chimney and tubular projection. Is made in two parts so the tubular projection can be removed and chimney used separately, 25c.

WIRE CHICKEN NESTS

These nests are strongly made from heavy Japanned Steel Wire. They are intended to fasten to the wall with screw hooks, there is no room on them for lodgment of life, vermin of any kind, easy to keep clean and far superior to wooden boxes.

Price each, 15c per dozen \$1.50

PIGEON NESTS

Should be used by every pigeon fancier. Made of clay, with heavy bottom to prevent upsetting. Size about 9 inches in diameter.

Price 10c each. \$1.00 per dozen.

INDURATED FIBRE

Fills a long felt want for all squab breeders. Wood gets filthy and vermin laden in a very short time.

Iron or earthenware is cold and bad for the birds. Indurated Fibre is lighter than wood, will not warp or break, has a red finish (not polished), which makes it easy to clean. Impervious to vermin or moisture and is a non-conductor of either heat or cold. A money saver, and will increase the hatch. Sanitary, handsome, practically indestructible and cheap. Has hole in bottom for screw to hold nest firm and steady. Price 15c each, \$1.50 per dozen.

IMPROVED CHAMPION LEG BANDS ALUMINUM.

This is a well known band, is one of the best on the market; is light and strong, being held by a double lock, is impossible to come off.

15c per dozen; 25 for 20c; 50 for 35c; 100 for 60c.

SUPERIOR LEG BANDS.

Made from spring wire aluminum tag. Price 15c per dozen; 60c per 100.

Bands for Marking Pigeons.

Black, White, Blue, Pink, Amber and Ruby.

Mark each hen for her pen, so that you know where she belongs at a glance.

Mark your old hens to distinguish them from the pullets so that you can catch the right one to kill at the first grab.

Price 25 cents per dozen. \$1.50 per 100.

ADJUSTABLE CLINCH POULTRY BANDS.

Made of Aluminum.

For pigeons, small chickens and Bantams, use small size. For male Leghorns, female Wyandotts, Orpingtons, Plymouth Rocks and smaller birds down to Bantams, use middle size; for male Wyandotts, Orpingtons and Rocks large size will be right. The medium size band will meet the wants of most poultry raisers and if not otherwise ordered this size will be sent.

Prices: 12 bands, 15c, 25 bands, 20c, 50 bands, 35c, 75 bands, 50c, 100 bands, 65c.

MOE'S SELF-LOCKING LEG BAND

MOE'S SELF LOCKING

NEST EGGS

ANTISEPTIC NEST EGGS.

Kills Lice and Mites in Nests and on Fowl's body where they congregate and worry the layers. No trouble to use. Simply put them in the nest.

5c each, 6 for 25c.

Lime Nest Eggs, 3c each, 25c a dozen.
No-Odor.—One of the best nest eggs to use.

PORCELAIN NEST EGGS.

These eggs are made of first class flint and do not break and will last indefinitely.

Price 2c. each, 3 for 5c. Doz. 18c.

WHITEWASH SPRAYER

This is the only spray pump that properly sprays whitewash without clogging. It is constructed of heavy galvanized iron with brass tops and valves. Large air chamber and ball valves, the pressure maintains a continuous stream or spray not affected by the upward stroke.

Galvanized Iron, \$2.25,

Brass. \$2.75.

STANDARD FLY AND GERM KILLER

Protects Horses and Cattle from the Torture of Flies.

FLY KILLER OIL

75c a gallon

Standard Fly and Germ Killer is a liquid preparation to be sprayed on cows, horses, hogs, sheep and poultry. It is a disinfectant and germicide.

There is nothing that worries a cow, and retards the flow of milk so much as to be pestered and tortured with whole swarms of flies on hot summer days, and especially so at milking time. There is nothing quite so trying as to milk a cow when bothered with flies. Between kicking, switching her tail and throwing her head—it is, to say the least, an annoying and difficult task.

It is a well known and generally recognized fact that cows protected from flies give more milk and require less feed to keep up milk and fat. Many diseases among cows no doubt are caused by fly bites, and germs carried by them.

To the dairyman, Standard Fly and Germ Killer means a greater flow of milk, less sickness among cattle and greater comfort to both man and beast.

SOLE AGENTS

O. K. POULTRY LITTER

A deodorizer, absorbent disinfectant, sonomical and labor saving scratching Litter, it is imported and is especially adapted as a litter in Scratching Pens and for catching droppings under perches. It absorbs all moisture from the droppings and they quickly dry up. It absorbs the ammonia and poisonous gases.

Lice will not live in it. It is the best Nest material because it is soft and pliable and will not harbor lice. By following directions you need only clean your pens once in three to six months, thus saving much time and labor.

PRICE

1 lb 3c 5 lb 15c 10 lb 25c 25 lb 65c 50 lb \$1.00 Bale 175 lbs \$2.25

We herewith offer a number of reasons which will induce the poultry man to use the Litter.

First—The health of the birds, as vermin will not breed in it.

Second—Its lasting qualities, which when used at the proper depth, is six months.

Third—The labor saved, as you absolutely have to do no cleaning during six months.

Fourth—The sweetness of the coops as O. K. prevents all odors.

Fifth—The cost of disinfectants. You can do away with this last item.

Sixth—The fertilizing qualities. When through with O. K. in the coops, it makes the finest fertilizer that can be produced, as it absorbs all the fertilizing qualities of the manure, and holds same until used.

Seventh—The birds do not eat it and become cropbound as they do with other litters.

Eighth—The birds do not injure themselves when alighting from the roosts. It is like alighting on a feather bed.

Ninth—It is fire-proof, that is, it will not take fire from a lighted cigarette, match or paper.

FEED AND DRINKING CUPS.

Galvanized. Especially Suitable for Exhibition Coops.

DOG CAKES

Bone Shaped

Actual Puppy Size

Maltoid Milk Bone is a complete food in itself and is the only Perfect Food for all breeds, the quality of which is recognized by all Dogs through their keen sense of smell to the degree that they will leave any other Dog biscuits placed side by side. We stake our reputation with you on this.

The Bone Shape is tremendously attractive to the Dogs. They will handle it exactly as a Bone, holding it between their paws, and they will gnaw at it, thus benefiting the teeth and gums, increasing the flow of saliva and aiding digestion. For these reasons it should be fed dry and unbroken.

Metallic Brood Coop and Hover

The Reliable Metallic Brood Coop and Hover has many advantages; it is easily cleaned.

All joints are made of slip seams so as the coop can be taken apart and put together easily and made tight enough so that there will be no leakage whatever.

There are two doors. The Inside Door is made of small wire screen which can be opened any distance and fastened to any place you want it.

The Outside Door is hinged at the top so that it can be raised and make a storm shelter over the opening keeping out the rain or snow and making a sun shade over the door so that the sun can not shine in.

This Door is held up by a hook and when closed is fastened tightly, so tight, that even a mouse can not enter.

THEY ARE POSITIVELY RAT-PROOF

Each end has five ventilators with shelters over each so rain can not blow in. The top is made so that it can be raised from the back to let extra air in on warm days.

These Coops are made by experienced people who have had an opportunity to learn from experience what is most needed for a SUCCESSFUL COOP. Size 24 in. long, 18 inches wide, 14 inches high,

Price, \$1.50 each.

"Surety Cushion" Egg Box

The "Surety Cushion" Egg Box is your best guaranty for the safe delivery of eggs by parcel post at the lowest cost. Simple in construction, it can be assembled by anyone very quickly and when properly put together is the strongest and most scientifically constructed egg carrier on the market. The cushion effect is as complete as if the eggs were wrapped in cotton. The "Surety Cushion" Egg Box eliminates all vulnerable points of contact without the intervention of such agencies as corrugated paper, tissue paper, excelsior, etc.

This is just the egg carrier that you have long sought. It is the realization of the poultry man's dream of the parcel post. The "Surety Cushion" Egg Box is simple, safe and strong, and cheap enough to be practicable for daily use.

SOLE AGENTS FOR

Genuine Standard Cypher Incubators

Guaranteed to be the Best Hatchers of the Largest Percentages of Strong, Vigorous, Healthy Chicks. Beginners Obtain Success with Them on First Trials. Every Machine is Warranted.

MADE IN FOUR SIZES

No. 0 Incubator—Capacity, about 70 Hens Eggs, 56 Duck Eggs	\$15.00
No. 1 Incubator—Capacity, about 144 Hens Eggs, 112 Duck Eggs	22.00
No. 2 Incubator—Capacity, about 244 Hens Eggs, 200 Duck Eggs	32.00
No. 3 Incubator—Capacity, about 390 Hens Eggs, 300 Duck Eggs	38.00

CYPHERS INCUBATORS are built to hatch and to last. With proper care—the same care you would give a valuable piece of household furniture—a standard Cyphers will last an ordinary lifetime. They are guaranteed by us to last ten years without repairs. We make this guarantee because they have lasted much longer than this—and are still doing first-class work.

The No. 0 and No. 1 size incubators are not equipped with the nursery drawers, for the reason that they are not required in these smaller-sized machines, and the drop-bottom is omitted for the same reason. These two smaller-sized machines contain all other improvements, including the new metal-cap, banded heaters, the latest-improved thermostats, the removable top diaphragms, the inclined egg trays, and the split lower diaphragms.

CYPHERS PORTABLE HOVER.

Shows the Cyphers Company Portable Hover in use on Floor of Poultry House. Chicks at all times are on a level with the surrounding floor. Price \$8.50.

The No. 2, 244-egg capacity and the No. 3, 390-egg capacity, latest-pattern Standard Cyphers Incubators are furnished with two nursery drawers. The drawers occupy the nursery space underneath the egg trays and are reached through solid wooden doors, located below the glass-panel door that opens into the upper portion of the hatching chamber where the egg trays are situated.

The No. 3 size Incubators are supplied with extra ventilating tubes, by means of which these large machines may be used with maximum results for hatching both hen eggs and duck eggs.

SOLE AGENTS FOR
BUCKEYE INCUBATORS

The Standard of Perfection in Artificial Incubation

In designing our 1914 Buckeye incubators we have not departed from the methods and principles of incubation that we have found so extraordinarily successful for twenty-two years, but we have so perfected this system that we are now hatching a large percentage of eggs that have heretofore been generally considered as unhatchable.

For twenty-two years our aim has been to build a perfect hatching device that could be depended upon to produce the same uniform results regardless of surrounding conditions—and so simple that it could be operated with the same degree of success by the beginner as it would produce in the hands of an experienced poultry raiser.

No. 24—One Horse, Cuts 10 inches, Weight 50 lbs \$ 5 48

It has Clevis that permits horse to walk in furrow. An excellent Plow. Low in price, Chilled Iron. Landslide chilled on bottom; is very strong and convenient.

THE BEST PLOW.

This is the best one horse convertible Plow ever sold for the use of market gardeners and farmers generally. By changing the Moldboards and Shears that come with the Plow, the purchaser actually has four plows in one. Price complete

No. 1½ Moldboard and Share makes a large one horse Plow. \$4 98

No. 2½ Moldboard and Share making a medium sized one horse Plow, a cabbage Moldboard and Share making a complete Cabbage Plow, and by using the Plow without the moldboard with the small Share bolted to the standard, makes a superior Plow for working among cabbage, strawberries, etc.

MITCHELL POTATO DIGGER AND SHOVEL PLOW COMBINED.

Price with wings only	\$5 00
Price with Potato Digger	6 00
Price with Wing and Potato Digger attachment	7 98

This implement should be in the hands of every practical farmer, doing its work easily and in the most perfect manner. By the changing of one bolt it may be converted into a Shovel Plow or Potato Digger. The fingers are adjustable, being held in position by the plow point. Thus in case of breakage, a new part may be inserted without the expense of a whole new head. The fingers, points and wings are of steel, rendering it light strong and durable.

Darnell's Patent Furrower and Marker

In presenting the numerous merits of this invaluable little implement we would be glad to draw a comparison with another of its kind, but we have seen or heard of nothing but the ordinary scratch sleds which made a mere mark as a guide for the plow which follows, thus increasing the work instead of lessening it.

We have a genial everborrowing neighbor, however, with whom we might compare notes, and we will just bring him forward with his plow which he is inclined to think is good enough yet. We think you will not fail to notice the difference.

We ride while he walks. We bring into requisition the services of our boy, if busy ourselves, while nothing short of a man, and a good one, too, can handle the plow.

We open two furrows while he opens one in clean ground, and do it better.

Price \$18.00.

THE EDDY IMPROVED MARKER

These Markers have chilled Shoes of Runners with steel wings bolted on, and may be easily replaced when worn. Frames made of seasoned oak firmly braced and bolted together, arranged with holes permitting the adjustment of the shoe to any width desired. Gauge is adjustable and swings to either side. It will save time enough to pay for it in one season also improve the looks of your field. Price\$11.00

EDDY'S NO. 10 DISC HOE AND COVERER

The Eddy Disc Hoe and Coverer have 20-inch steel Discs, adjustable handles and are invaluable for covering and ridging all kinds of row crops. Adjustable in every way it is one of the best implements on the market.

Price ...\$10.00

ACME ASPARAGUS BUNCHER.

A greatly improved pattern with knife guide and adjustable head piece for regulating the length of the bunch. This is the latest pattern, 1907 patent.

Planet Jr. Garden Tools

The Planet Jr. Wheel Hoes are the greatest cultivating tools in the world for every grower of garden crops from drilled seed. They do more and do it better and easier than can possibly be done in any other way. The frame is steel.

"PLANET JR." No. 12 NO. 12 DOUBLE WHEEL HOE, CULTIVATOR AND PLOW.

Double Wheel Hoe,
Cultivator
and Plow.

Weight 34 lbs. Price \$6.50
Steel Frame.

No. 12 Double Wheel Hoe

The hoes are the most valuable of all the wheel hoe attachments; are oil tempered and polished. Use 6-inch hoes for rows 12 inches and upwards.

The plows are invaluable; use them with points together for opening furrows for manure, seed, etc.; then exchange sides for covering; use them also for plowing away from or toward the crop, both sides at once.

The cultivating teeth for deep or shallow work, and for marking out.

NO. 13 DOUBLE WHEEL HOE.

Price, \$4.50. Weight, 29 lbs.

This tool is the No. 12, with 6-inch hoes only, these being the tools that are most generally useful. Any or all of the other tools shown with No. 12 may be added at any time.

NO. 16 PLANET JR. SINGLE WHEEL HOE, CULTIVATOR, RAKE AND PLOW.

Price \$5.35. Weight 25 lb.

The handles are adjustable in height. The frame is steel, convenient and strong with quick change device by which to exchange the tools without removing the nuts.

All our wheel hoe tools are of a special pattern, carefully tested by practical men; no others that are offered compare with them. All the steel parts are high carbon steel, oil tempered finely formed, finished and polished and work to a charm.

NO. 17 PLANET JR., SINGLE WHEEL HOE.

Price, \$4.75. Weight, 23 lbs.

You can do more and better hoeing with it in one day than you can do in three days with a hand hoe. The No. 17 has a pair of 6-inch hoes, a plow and a set of cultivator teeth, an outfit sufficient for most garden work.

NO. 18 SINGLE WHEEL HOE.

Price, \$3.50. Weight, 20 lbs.

This tool has one pair of 6-inch hoes only—the tools that are most constantly useful throughout the season. Other tools can be added as needed.

FIRE FLY PLOW Price \$2.25

THIS TOOL IS EXCEEDINGLY USEFUL to owners of small gardens. It will throw a furrow four to six inches wide and one to three inches deep, and deeper by going twice. Furrows for manure or seeds can be opened and covered. In cultivating, plow away, weed the row and plow back again. This tool will enable a busy man to do in his spare minutes nearly all the work of a family garden. Chicken raisers find it of great advantage in plowing up their scratching yards. Price \$2.25.

No. 13 Double Wheel Hoe

No. 16 Planet Jr. Single Wheel Hoe

No. 17 Planet Jr. Single Wheel Hoe

FIRE FLY PLOW

Planet Jr. Garden Tools

The new "PLANET JR." Catalogue is the handsomest, best and most instructive book ever issued on a similar subject. Full of little points that bring profit. Full of true and handsome illustrations. We mail it free to any address on application.

No. 4 Planet Jr. Combined Hill and Drill Seeder, Wheel Hoe, Cultivator and Plow.

This tool combines, in a single convenient implement, a capital hill-dropping seeder, a continuous row seeder, an admirable single wheel hoe, an excellent furrower, a capital wheel cultivator and a rapid and efficient wheel garden plow. In a word, with a great variety of tools, excellent in design and quality, it is without an equal for easy adjustment, lightness, strength and beauty. It is a practical, every day, time, labor and money saver.

Price, Complete, \$10.50.. Weight, 53 lbs.
As a Seeder Only, 8.50. Holds $2\frac{1}{2}$ Quarts of Seed

No. 3 Planet Jr. Hill and Drill Seeder

The hill dropping is simple and reliable; making hills either 4, 6, 8, 12 or 24 inches apart.

Changes of distance between hills may be made in less than a minute, by substituting one gauge wheel for another.

The Index.—The thickness of seed is regulated by an accurate index with brass screw indicator; it contains the names of the important seeds, and is carefully graduated both for hills and drills. In plain view at the top of handle.

Price \$10.00. 15-inch Steel Driving Wheel. Holds 3 quarts of Seed. Weight, packed, 48 lbs.

A favorite among union growers, market gardeners and seedsmen.

Steel Horse Hoe and Cultivator

This is our new Steel Hoe and Cultivator. It has an expanding lever with an adjustable wheel. Will find it a first class tool at low price. \$4.98.

Special Horse Hoe and Cultivator Complete \$4.50, with expanding Lever and 3 extra Shoes.

Planet Jr. Garden Tools

We offer these tools as the highest type of their class. They have a great variety of attachments which adapt the implements to a large variety of work, and there is scarcely any work of which they are not capable.

No. 7 Planet Jr. Horse Hoe and Cultivator back from centre again.

7 PLANET JR. HORSE HOE AND CULTIVATOR.

Price, \$7.98.

Weight, packed, 77 lbs.

No other cultivating machine is so widely known as the Planet Jr. Combined Horse Hoe and Cultivator, for it is in use throughout the civilized world. It is so strongly built as to withstand incredible strain, yet it is light and easy to handle. It opens and closes furrows, hoes right up to the plants without danger of injuring, throws dirt to or from the row and throws

NO. 9 PLANET JR. HORSE HOE AND CULTIVATOR

Price, \$7.25.

Weight, packed, 70 lbs.

This admirable tool is identical with No. 7, except that it has a plain wheel instead of lever wheel. It has the high frame, patented hollow steel standards, patent Star wheel patent lever expander, and hollow steel wheel arms.

Every part is perfected to make the tool acceptable to the intelligent farmer who knows the best is always the cheapest.

No. 9 Planet Jr. Horse Hoe and Cultivator

PLANET JR. TWELVE-TOOTH HARROW, CULTIVATOR AND PULVERIZER.

Complete, \$8.50.

Weight, packed, 73 lbs.

Gardeners cultivate better than formerly. It has been found to pay best. With the Twelve-Tooth Harrow you go as deep or shallow as you like, come up close to row without injuring plants, cut out all the weeds, stir the soil and mellow and fine it as with a garden rake. You widen and narrow as you please between 12 and 32 inches. It is a special favorite with strawberry growers, market gardeners and truckers.

Without Pulverizer or Wheel, \$5.70.

Without Pulverizer, \$6.90.

THE HORSE HOE PLOW ATTACHMENT is intended particularly for the small farmer who wants a combined plow, hoe, cultivator, furrower and ridger for one horse. With this combination he can plow his ground in the spring by going twice in the furrow and then care for his crops during the whole cultivating season.

It cuts a furrow six to eight inches wide and two to four inches deep. The wheel should always be used. The plow fits Nos. 4, 7, 8 and 9 Horse Hoes and Cultivators. Price \$4.00.

Horse Hoe Plow Attachment.

The Gem Seed Potato Cutter

24 Inches
Long
8 Inches
Wide
Weight, 8 lbs.

Cutter Will Last
a Lifetime.

Can You Afford
to be
Without One

The GEM SEED POTATO CUTTER shown herewith has all the essential features necessary to a first-class tool. It will cut any size potato in pieces uniform in size, thereby insuring more accurate planting when power planter is used. The operator, to get the best results, will pick up the tuber, look for seed or blossom end, passing it over the knife on upper side of pressure lever, thus removing the cause of so many empty potato hills in your potato patch. Then according to size of potato, place it on knives so that when lever is pushed down it will be cut into either two, four or six; or if a very large one, split it and cut each half into as many pieces as its size will require. From six to eight bushels can be cut with it in an hour. The saving in time alone will more than pay for this cutter the first season it is used.

PRICE, \$2.50

PRICE, \$8.98

THE "I AM IT" CIDER MILL.

A combined Mill and Press with geared cylinder, and adjustable concave, so that grinding can be done, as desired either coarse or fine. It will grind apples at the rate of one-half bushel per minute. It is a Self Feed—you need not poke the apples to the grinding disc.

Price \$8.98

Keystone Adjustable Weeder, expands to 7 feet. Best Weeder made, every one guaranteed. Try one, it will increase your crops.

OHIO SPIKE TOOTH HARROW - 60 Teeth

The U-bars, channels, oscillating bars and teeth, are made of high carbon steel, precluding all possibility of bending. The channels, being placed at the ends of the U-bars, prevent them from catching on obstructions as is frequently the case with the open end harrow. Strong and well made but carrying no superfluous weight. Corner braces, oscillating castings and lever castings of malleable iron. Made in one 30 tooth section, and with 5-8 teeth, \$6.50, or in Two 30 tooth sections, with 5-8 teeth \$11.98.

Insecticides and Remedies for Plant Diseases

Lemon Oil-Insecticide. This well known article is in general use all over the country for destroying Scale, Mealy Bug, Greenfly or Alphis-Ant-Thrip-Caterpillar, etc. on Rose Bushes, Palms, Rubber Plants, etc. Dilute with water 30 to 50 parts.

Half pt. 25c., pt. 40c., qt. 75c., half gal. \$1.25, gal. \$2.00.

White Hellebore. An excellent remedy against currant worms, rose slugs, caterpillar, etc. Can be used either dry or in water, 20c per lb.

Whale Oil Soap. One of the most effective agents used for destroying scale, bug, plant, lice and all other insects, injurious to vegetation.

Price 1 lb. box, 15c. 2 lb. box 25c.

INSECTICIDES AND REMIDIES FOR PLANT DISEASES, Continued.

Standard Fly and Germ Killer. It is a thorough disinfectant and germicide. Protects horses and cows from the torture of flies. The **Lightning Insect Exterminator No. 1** discharges the preparation in a fine, broad spray, without waste and using but very little. Fifty cows can be sprayed in a few minutes. 75c per gallon.

Pratt's Scalecide. It will positively destroy all soft-bodied, sucking insects, including all forms of the dreadful "Scale." It is simple, cheap, easily applied and wonderfully effective. Endorsed by government experiment stations, agricultural schools and thousands of fruit growers.

ARSENATE OF LEAD FOR POTATO BUGS

Its great advantages are that it adheres well to the foliage and spraying does not have to be repeated, as it does not readily wash off by rain. 1 lb. 20c.

BUG DEATH

We want you to try this really wonderful preparation. Is absolutely harmless. Give it a square deal. You have nothing to lose, and in the light of the experience of others, just this to gain—larger crops, better quality, more money in your pocket.

Kills all bugs and worms that chew the leaves and foliage.

Is absolutely harmless. The birds may "peck" it from the leaves, the honey-bees take it from the flowers, hens and domestic animals eat stalks, leaves and vines where **BUG DEATH** has been used **WITHOUT** any ill effects.

May be used dry or in solution.

Price 1 lb. 15c., 3 lbs. 35c., 5 lbs. 50c.,
12½ lbs. \$1.00 100 lbs. \$7.50

Pat. Mar. 16 & Nov. 9, 1897

Sulphur, Powdered—A remedy for insects of all kinds, both by itself and in combination with other remedies. Market rates.

Hammond's Slug Shot—An insecticide for the destruction of Potato and Rose bugs, and all Lice, Worms or caterpillars upon Melons, Egg, Cucumber, Cotton, Tobacco and Cab-bog plants, Tomato Currants, Fruit or Ornamental Trees, Grape Vines, Shrubs and Flowering plants. 5 lb. pkg. 30c.

Strictly Pure Paris Green—
Market price,

Double Ground Land Plaster—
Per 100 lb. bag 60c.

Sulpho Tobacco Soap 10c. & 20c.

BORDEAUX MIXTURE OR FUNGIROID—For all fungous diseases, such as mildew and the various rots of the grape. Full directions on label. Dry, 1 lb. box 25c. 5 lb. and over at 20c per lb., 50 lbs. for \$7.00; liquid, 1 qt. 35c., 1 gal. \$1.00.

ROSE NICOTINE—Most powerful Insect and Parasite Destroyer known. Guaranteed to kill Insects, Lice on Flowers, Plants, Fruits, Trees, Vegetables, Human Body, Dogs, Cats, Fowls, Earth Worms, Ants, also any House Bug or Vermin. 15c lb.

The **ACRE-AN-HOUR SIFTER** is for applying dry insecticide with economy, being constructed in such a way that there is no wasting of material. When a small plant is to be treated, it can be regulated so that there is no surplus mixture thrown away. When large plants are treated the Sifter is opened up to any satisfactory dimension required. The work may be accomplished as fast as a man can walk, being easy to operate, and with care will last for years. The cost compared with other implements used for the purpose, taking in consideration the result obtained is insignificant. We can honestly recommend to you an **ARCE-AN-HOUR SIFTER**. Price 50c.

THE "LOWELL" BLOW POWDER SPRAYER is fitted with a Ball Valve which is positive in its action, preventing any powder being drawn back into the pump—thus insuring at all times a perfect working machine. Adapted to Paris Green, Slug Shot-Bug Finish, Lice Powder and all Dry Powder Disinfectants and Poisons. Aluminum finish.

CAUTION:—Powder must be thoroughly dry. Price 60c.

LOWELL GRAND SPRAYER FOR LIQUID

DESCRIPTION.

Tapered cylinder reservoir, 4 inch bottom, 3 inch top, 1½ inch pump cylinder, 20 inches long. Plunger rod bright steel. Plunger our special-make. Two brass solution or spray tubes. One inch zinc can screw for filling. Strong and durable in construction. Each sprayer is tested for leaks and perfect spray. Capacity of tank one quart. Aluminum finish, Galvanized Steel 45c.

LOWELL CONTINUOUS SPRAYER

The Lowell Continuous Sprayer, as the name implies is so constructed that it not only sprays on the downward stroke of plunger but also when it is drawn back, thus causing a continuous mist-like spray.

Brass Lacquered \$1.00.

THE LOWELL FOUNTAIN COMPRESSED AIR SPRAYER.

One pumping will expel entire contents of tank and is sufficient to spray 2,000 plants. Spraying nozzle may be reversed to spray under side of bushes and plants. Automatic Thumb Lever Valve is at all times under complete control of operator, hence none of the solution is wasted. It saves its cost in making a given amount of compound do so much more work. An Adjustable Shoulder Strap and Tree Attachment with suitable coupling for orchard and tree spraying, furnished with each machine. Aluminum finish. Capacity 3 gallons. Price \$4.98.

BROWNS AUTO SPRAY NO. 1

The Auto-Spray No. 1 is the standard of all compressed air sprayers. It is the strongest and most simple in its working parts of any similar machine. Self operating. Two pumpings of a few strokes on the plunger will discharge the contents under high and constant pressure. After pumping, the operator has only to direct the spray.

Uses. For spraying trees, shrubs, vines, field crops, in the greenhouse, poultry house. For applying disinfectants and cattle-fly oils. Will handle all solutions, including whitewash and cold water paint.

Price, \$4.50.

TREE GUARDS

Made 6 feet high of heavily galvanized wire, in 9, 12 and 15 inch diameters.

Ready for setting up by clasping the hooked ends. Furnished with spiral spring, which attaches to tree and prevents rubbing or bruising of the bark. Protects without shading or otherwise injuring the tree.

Price 9 x 12, 98c

THE MEEKER SMOOTHING HARROW

Perfect Harrow and a Perfect Land Roller Combined.

This harrow has become a great favorite among all classes of farmers and market gardeners in all parts of the country.

It has two sets (four) of rollers containing 58 steel disks.

These disks grind all lumps and save the work of raking, and also mash small stone below the surface better than any field roller, leaving the land smooth and level.

The disks of one roller work between those of the other, preventing clogging in damp soil. The board in the center is set at an angle, is adjusted up or down and serves as a leveler.

Regular size, 6 ft. 8 in. by 6 ft. 58 x 8 in. disks, \$18.00. Weight, 200 lbs.

"LIGHTNING" WHITEWASH SPRAYER

This is the only Spray Pump that will properly spray whitewash without clogging. It is constructed of heavy galvanized iron, with brass tops and valves. Large air chambers and ball valves, the pressure maintaining a continuous stream or spray not affected by the upward stroke. Can also be used for washing windows, buggies and sprinkling lawns, flowers, etc.

Galvanized iron \$2.25.

Brass \$2.75.
