Two Apple Trees Yield More Profit Than an Acre Of Corn.

INDEXED.

Winfield

THE "Man from Missouri" always likes to be shown.
All keen fruit-growers are like him.

You cannot read these letters and fail to see that our customers are getting unusual service. Here are letters received in the past few weeks from planters in widely different sections—yet everyone has found Moncrief trees the best they ever planted. Why not insure the success of your orchard by planting Moncrief Trees?

Gets Prize Stock

Please send me a new catalog. The old one is nearly worn out. The trees you sent me came O. K. and were certainly prize stock.—J. O. Phelon, Worcester, Mass.

Says Our Method Is Best

I have had quite a number of papers and books about trees, but your system of getting scions from annual bearing trees that furnish quantity and quality of fruit is the best I ever heard of.—Clarence W. Anderson, Cowley, Wyo.

Best In Twelve Years Of Planting

In my twelve years of cherry planting, your trees were the best lot I have ever had. By this I mean the BEST. I have no equivocations to accompany this statement and make no exceptions. I also want to say that they were the best packed lot of trees I ever had.—C. A. Swope, Argentine, Kansas.

Success With Catalpas

The Catalpas you sent sure were fine and arrived in good condition. Over 99 per cent set out leaves and have lost none since except by accident. Expect to order another lot next season. Thanking you for the care with which you handled my order and the generous treatment I have received from you.—W. W. Gui, Burdick, Kan.

His Neighbors Want Our Trees

I have shown the samples you sent me to a couple of my neighbors with the result that they both have asked me to increase my order to cover their wants.

...Later:—Your trees are highly satisfactory to both myself and neighbors who ordered with me. I think the Stayman and Delicious are the best I ever saw.—E. G. Sharp, Rogers, Ark.

Pleased With Fine Root System

The 200 Elberta peach trees which I ordered from you arrived today. I am much pleased with the good, stout, stock and the large fine root system.—H. L. Tear, Baldwin, Ga.

Delighted With Our Rome Beauties

Trees received in fine condition. Could not have asked for any better stock. The Rome Beauties in particular were very fine. Of the hundreds of trees planted here this spring, yours were the best of the lot.—Joseph Annable, Skyland Heights, Cal.

All That Can Be Asked

Your trees are all that can be asked. I have never seen nicer cleaner, better-rooted stock. I like your idea of "pedigreed stock." It is so perfectly in line with nature that I do not see how good stock can be grown in any other way. Your prices are O. K. also.—C. E. Evans, Cotter, Ark.

Tells His Neighbors To Order From Us

I was very much pleased with the trees you shipped me. Some of my neighbors informed me they wanted to plant some trees and I advised them very strongly not to buy from agents, but get the trees from you, as I had the utmost confidence in your house and never saw nicer trees.—H. K. Fox, Richmond, Va.

Shows All His Neighbors

The Stayman Winesap to hand and planted today. I have hailed every passerby and called them in to show them the prize you sent me, and I shall continue to call attention to them as long as anybody interested will listen to me. To say that I am pleased does not begin to express my feelings. I hope to be able to send you a more profitable order before the end of this planting season.—Frank C. Allen, Tularosa, N. M.

Money-Saving Offers For April

You will find something in these next pages that can't help but interest you, whether it's a back lot you have or a thousand acres.

Let's get right down to business. You are a fruit-grower. You may have a place for more trees this spring. Here are some real, live money saving offers for April, the biggest planting month of the year.

More than that. Here's a check for \$1.00 payable to you, if you order this spring. Cash it today. It's good until May 1st but don't wait until that date.

Hundreds of our customers will tell you that Moncrief trees are the best you can plant. At these prices, you can't afford to plant any other kind under any circumstances.

Good trees are the smallest first expense in an orchard yet count for the most at harvest time. Moncrief Pedigreed trees are budded from the most vigorous and heavy bearing orchards which guarantees every tree genuine. The stock offered here is strictly No. 1 in quality, the culls go to the brush pile.

Even if growing things are starting in leaf, don't think it is too late to plant. We guarantee to deliver in perfect dormant condition. If, on receipt of trees, you don't find everything entirely satisfactory to you, let us know and your money will be promptly refunded.

The Cream of Good Apples

Have you tried to buy apples since January—good apples, like Stayman, Jonathan and Rome Beauty? If so, you found the price from \$2.00 to \$4.00 a bushel. Are you getting some of this money? Ten acres of apples are good for a clear profit of \$1000 a year. Good ten acre crops have sold for several times that amount. A 20-acre apple orchard properly handled always brings more profit than a 160-acre hay, grain and stock farm. Here's the cream of the list. If you haven't a good apple orchard, start one this year at a big saving in cost.

Arkansas Black A large beautiful dark red apple, pays well. Our trees are grown from a heavy producing orchard in Colorado. The fruit from this orchard captured the first prize at the National Horticultural Congress at Council Bluffs, Iowa.

Grimes Golden The best and most widely planted yellow apple. Always brings top prices, and a favorite among fruit growers. The tree is very hardy, blooms late, and bears young.

Jonathan For many years the standard among apples. Medium size, bright, dashing red. Tree is long-lived, productive and will bear several money-making crops before many other varieties come into bearing. Jonathan never disappoints.

Mammoth Black Twig Extra large, dark red apple. Excellent quality and keeps until apples come again. Well known and planted in many apple sections. One of the best commercial sorts for the East. Tree is vigorous and healthy, bears early, and yielding big crops every year. Don't fail to include this variety.

Northern Spy Fine large, bright red and yellow apple. A rich, crisp, spicy apple, splendid quality. One of the hardiest, blooms late and escapes spring frost. Always sells for highest prices. Excellent keeper.

Stayman The largest and best of the Winesap family, and one of the "two best" apples. Very productive and a great drouth resister. Bears young and can always be depended upon every favorable year. You can always count on getting an extra price for Stayman.

McIntoshRed A beautiful deep crimson apple, with crisp white flesh. Ranks high in quality and is demanded by people who pay high prices for fancy fruit. Irresistible to those who once taste it. Becoming more popular each year.

Wealthy A large showy, brilliant red, fall or early winter apple. Splendid quality—a fine keeper and in demand on every market. Bears extremely young and is very productive and long-lived. One of the finest for cooking.

April Prices on All Above Varieties

	each	10	100
1-year, 2 to 3 feet,	\$0.08	\$0.60	\$4.00
1-year, 3 to 4 feet,	.12	.90	6.00
1-year, 4 to 5 feet,	.15	1.30	10.00
2-year, 3 to 5 feet,	.15	1.30	10.00

Extra Special on Rome Beauty and York Imperial

Rome Beauty A large handsome late winter apple shaded and striped with red. Orchardists in nearly every apple section are planting more Rome Beauty. Begins bearing very young. If you plant Moncrief's Rome Beauty, you'll start picking apples the second or third year after planting. Blooms late and bears tremendous crops every year. An excellent keeper and commands good prices on every market.

York Imperial Among the best of commercial varieties. A bright red apple striped with dark red. Firm, crisp and good quality. Unusually productive and bears every year. Flourishes in almost every soil and should find a place in every orchard. Very profitable throughout the Middle West. It always makes money for the grower.

	each	10	100
1-year, 2 to 3 feet,	\$0.06	\$0.40	\$3.00
1-year, 3 to 4 feet,	.10	.60	4.00
1-year, 4 to 5 feet, select	.12	1.00	8.00
2-year, 4 to 6 feet, select	.15	1.20	10.00

NOTE—Ten rate allowed on 10 or more trees of one variety; 100 rate on 30 or more trees of one variety.

Cherry

Good cherry trees are scarce and high this year. We offer you choice lot of 2 year old trees, 4 to 5 feet, extra stocky, well rooted, nicely branched, first class A No. 1 trees. You can't get better trees than these at any price. Order quick. Any of the following varieties: English Morello, Wragg, Montmorency, Black Tartarian, and Bing.

	each	10	100
Cherry, above varieties, only, 2 yr. 4-5 ft.	\$0.24	\$2.10	\$18.00
Cherry, above varieties, only, 1 yr. 3-5 ft.	.20	1.80	16.00

We also offer a limited number of Early Richmond and Montmorency in a smaller grade as follows. These are fine sturdy little trees, and will please you.

	each	10	100
Montmorency and Ely. Richmond, 1 yr, 2-3 ft.	\$0.15	\$1.20	\$10.00

Roses

Extra heavy 2-year-old, field grown, the kind that usually sell for 50c to \$1.00 each.

Crimson Rambler, the most popular climber, each, 20c
 Blue Rambler, the famous blue rose, each, 15c
 General Jack, the finest hardy red rose, each, 25c.

Keiffer and Bartlett Pear

Keiffer The greatest money-maker for the farmer and fruit-grower. Large, rich, golden yellow. Few pears are more attractive when properly ripened. Always a ready seller. Tree a vigorous grower, early bearer, and most resistant to blight. When you see these trees you'll say they are the best you ever saw.

Bartlett A general favorite for both home and commercial orchard. Fruit is golden yellow, of finest quality. Bears young and abundantly. The trees we offer you are a beautiful lot, especially the larger grade.

	each	10	100
1-year, 4 to 5 feet,	\$0.22	\$1.80	\$16.00
1-year, 3 to 4 feet,	.15	1.20	10.00

Special Assortments

These are real bargains. In filling your order for these assortments we will select only those varieties that are adapted to your section. Selections to be made by us in all cases. We make these offers in order to get our best varieties in the hands of every fruit-grower. Two or more varieties in each assortment.

Hottes Elberta—The Queen of Yellow Peaches

This grand peach was discovered by our Mr. Moncrief in his personal search among several hundred thousand bearing Elberta trees in the million dollar peach district of Colorado. This parent tree was found loaded down, every peach an extra size, rounder than ordinary Elberta, smaller seeds, much sweeter flesh, and in color a rich golden yellow, overlaid with brilliant shades of red.

The Hottes Elberta should be the leading peach in every orchard where peaches can be grown. Its hardiness, earliness of bearing, huge size, delicious flavor, and unsurpassed color have given it the leading place among profit makers. We want you to see for yourself how good it really is. Don't delay your order because the supply won't last long at these prices. All sold but this grade.

Read This Before Ordering

You may select as many of these offers as you wish. Get your neighbors to join with you and make up a club order. Remember the check enclosed will be received as cash on any order amounting to \$10.00 or more.

The special prices quoted in this circular are F. O. B. Winfield, the customer paying freight or express charges. 100 rate allowed on 30 or more trees of one kind. Nursery stock takes special low rates by both freight and express. The new parcel post rates now apply to trees not larger than 2 to 3 feet. This size will be sent postpaid at 3c per tree extra.

These special offers hold good only until April 30th, 1914. Be sure and mail your order before that date. The sooner your order reaches us the better we can fill it. Don't forget our guarantee—**your money back if not satisfied**. You don't take the slightest risk as we guarantee everything to reach you in perfect condition. This stock will go fast. If you want quick service, **wire**.

Winfield Nurseries, J. Moncrief, Pres. Winfield, Kan.

One Acre Planted to Speciosa Catalpa This Year
Will Pay You \$300 in Five Years

\$50 to \$75 an acre—not one year—but every year for the next fifty and more to come—with a crop that needs practically no attention; that will grow under almost any condition anywhere in the corn belt. A goldmine for overflow land. Make those waste acres go to work.

Speciosa Catalpa makes fence posts in four years—poles in six. Posts are sound after 25 years use. Lumber equal to Oak. C. W. Delker made \$500 an acre in Catalpa farming on his Kansas plantation, in just eight years. This photograph shows just one year's growth in our own big Kansas Plantation.

Hundreds of farmers are making big profits and planting bigger groves. Every farm should have its own post and timber supply—an acre or two—perhaps five or twenty.

To convince every farmer and land owner of the big profits to be made in Catalpa Growins, we make this special offer for April.

Speciosa Catalpa, 8-12 inch, extra heavy, per 100, \$0.45.

Japan Blood Dwarf—The Marvel Among Peaches What It Will Do In Your Orchard

Nearly a bushel a tree the second year after planting. That's what hundreds of growers have often done with Japan Blood Dwarf. And what fruit! A beautiful red in color, flesh firm, juicy, delicious and tender, and when fully ripe, a deep berry red clear to pit. As a shipper and keeper, it has no superior among early free-stones. Ripens early in the season, just before Triumph, when good peaches are scarce. It's fine appearance and delicious flavor always bring big prices. One of the most desirable of all varieties for table use and a splendid canner.

2 Year Japan Blood Dwarf Bearing 62 Peaches

After watching and testing the peach for a number of years over a wide area, we believe it's the best of all early peaches grown.

It is a dwarf grower and has proven itself the youngest bearing peach in existence. It always bears splendidly the second year, a single tree often maturing a bushel. R. M. Williams of Winfield, Kansas, reported one tree that bore 123 peaches the second year after planting.

For the home yard, it is the ideal peach. Being a dwarf grower, it doesn't

take up much room, and is of excellent shape. An acre in Japan Blood Dwarf will prove one of the quickest paying and most profitable investments you have ever made. Plant 16 feet apart and 170 trees to the acre.

Last year we sold out February first and we had to disappoint many customers. Our stock is limited, so don't delay. The man who plants now will reap the big profits.

	each	10	100
3-4 feet	.35	3.00	25.00
2-3 feet	.25	2.20	20.00
1-2 feet	.20	1.80	15.00

You can obtain Genuine Pedigreed Japan Blood Dwarf only from J. Moncrief Winfield Nurseries, Winfield, Kans.
