BULLETIN No. 605

Contribution from the Forest Service
HENRY S. GRAVES, Forester

Washington, D. C.

PROFESSIONAL PAPER

February 27, 1918

LUMBER USED IN THE MANUFACTURE OF WOODEN PRODUCTS.

By J. C. NELLIS, *Forest Examiner.*

The importance of the wood-working industries among the manufacturing industries of the country is indicated by the fact that lumber-working plants, of all classes, consume annually 24½ billion feet of wood. This is about 60 per cent of the annual lumber production of approximately 40 billion feet. The material is mostly lumber, but includes comparatively small quantities of veneer, bolts, and dimension stock.

This report presents statistics showing the average annual consumption of wood by the wood-working industries in the United States. The basic data were secured by a series of State wood-using industry studies. Those for the more important States have been published separately. Although the State studies were begun in 1909 and were not completed until 1913, a period of 12 months was made the basis for the statistics for each State, and the final figures for the whole country here presented are therefore a very good average of the demand of each industry and the demand for each kind of wood.

Lumber usually is remanufactured to a greater or less extent before use, and in this report the product of the sawmill is not considered. However, planing mills operated in connection with sawmills manufacture large quantities of flooring, ceiling, siding, finish and other patterns which really are finished products, and such material accordingly is covered by the statistics.

About 40 per cent of the annual lumber cut is not worked by planing mills or factories into finished products. About one-fifth of this (in normal times) is exported, while the rest is used in general building and rough construction. Though all construction lumber requires cutting to length to make it fit into place, this industry was not considered by the studies, which canvassed only the wood-working factories. All imported woods used by factories are included in the statistics.

The wood-using studies were intended to supplement the annual reports on the consumption of wood for lath, shingles, cooperage, veneer, pulp, distillation, poles, and ties, and these industries therefore are not covered in this report.

In the case of Louisiana, Arkansas, Minnesota, Montana, Idaho, Washington, and Oregon, the basis for compiling the figures for planing-mill products differs from the general plan of including only planing-mill patterns, in that nearly all dressed lumber, surfaced on from one to four sides, is also included in the figures for these States.

Figure 1 shows graphically the comparative amounts used by each important industry in each State.

Figure 2 shows graphically the comparative amounts of each important wood used in each State.

Table 1 gives detailed figures by industries and shows the amount of each kind of wood used by each industry.

The scope of the statistics for the industries with titles that are not entirely descriptive is as follows: Planing-mill products cover standard patterns such as flooring, ceiling, and siding made in large quantities by planing mills in lumber-producing regions, while sash, doors, blinds, and millwork usually are made in millwork plants in the consuming regions. However, considerable quantities of doors and door stock are made in the Pacific Coast States. Boxes and crates cover all kinds of packing boxes and crates made of lumber or veneer, and also fruit and vegetable packages and baskets. Car construction covers wooden construction in all types of railroad and electric cars, as well as in locomotives and mine cars. Furniture includes household and office furniture, except chairs, kitchen furniture, and fixtures in business buildings. Vehicles take in horse vehicles, automobiles, bicycles, pushcarts, and wheelbarrows. Wood-ware and novelties embrace a thousand or more articles, such as kitchen utensils, wooden dishes, butter and cheese packages, measures, pails, wooden novelties of all kinds, ladders, and supplies for dairymen, poulterers, and apiarists. Fixtures are such as show cases, counters, bars, and lodge and church furnishings. Shade and map rollers include also curtain and rug poles and venetian blinds. Machine construction means wooden construction in machinery of all kinds. Shoe lasts, pegs, and shanks are boot and shoe findings. Four-sevenths of the wood used for professional and scientific instruments went for pencils, the rest for artists', photographers', and draftsmen's instruments, rules, and scientific apparatus. Billiard and pool tables, as well as gymnasium goods and all outdoor sporting goods, come under sporting and athletic goods. Mine equipment includes ventilating apparatus, brattices, breaker equipment, slope rollers, and sprags. Dowels are small rods used in fastening together furniture, fixtures, and doors. Under playground equipment come lawn swings and porch furniture.

The kinds of wood are classified according to rather broad commercial practice. The classification is practically the same as that used in the lumber census bulletins; figures on the several species of each family or group are combined under the common name.

Oak, maple, spruce, hemlock, birch, hickory, basswood, ash, elm, cedar,¹ willow, locust, and eucalyptus each covers its different species.

Yellow pine includes the southern yellow pines, North Carolina pines, and minor eastern yellow pines. Western yellow pine is listed separately; trade names for it are western pine, western soft pine, and California white pine.

White pine covers both northern and western (Idaho) white pine as well as Norway pine and jack pine.

Cottonwood takes in the cottonwoods, aspen (or popple), and balm of Gilead.

Tupelo includes cotton gum (called tupelo commercially), black gum, and water gum.

Larch includes western larch and eastern tamarack.

Mahogany covers all woods sold in this country as such.

White fir includes the botanical white fir as well as grand and silver (amabilis) fir; the other minor firs, noble, red, and alpine fir, usually sold as white fir, are listed separately.

All other kinds of wood listed are single species except that cypress, sycamore, cherry, dogwood, magnolia (cucumber, of the magnolia family, is shown separately), and buckeye are family names, but only one species of each is used commercially. Redwood sometimes includes lumber from the bigtree. The red-gum tree yields both commercial red and sap gum and both are covered herein by red gum.

¹ Spanish cedar is listed separately.

FIG. 1.—The annual consumption of wood by the

wood manufacturing industries (by industries).

FIG. 2.—The annual consumption of wood by the

**PUBLICATIONS OF THE UNITED STATES DEPARTMENT OF AGRICULTURE
RELATING TO THE SUBJECT OF THIS BULLETIN.**

AVAILABLE FOR FREE DISTRIBUTION.

Utilization and Management of Lodge-Pole Pine in the Rocky Mountains. (Department Bulletin 234.)

Production of Lumber, Lath, and Shingles in 1915 and Lumber in 1914. (Department Bulletin 506.)

Basket Willow Culture. (Farmers' Bulletin 622.)

Care and Improvement of the Woodlot. (Farmers' Bulletin 711.)

Measuring and Marketing Woodlot Products. (Farmers' Bulletin 715.)

The Preservative Treatment of Farm Timbers. (Farmers' Bulletin 744.)

Paper Birch in the Northwest 1909. (Forestry Circular 163.)

**FOR SALE BY THE SUPERINTENDENT OF DOCUMENTS, GOVERNMENT PRINTING
OFFICE.**

Uses of Commercial Woods of United States; Beech, Birches, Maples. (Department Bulletin 12.) Price, 10 cents.

Rocky Mountain Mine Timbers. (Department Bulletin 77.) Price, 5 cents.

Southern Cypress. (Department Bulletin 272.) Price, 20 cents.

Shortleaf Pine, Its Economic Importance and Forest Management. (Department Bulletin 308.) Price, 15 cents.

Willows, Their Growth, Use, and Importance. (Department Bulletin 316.) Price, 50 cents.

Ground-Wood Pulp, Cooked and Uncooked Spruce, and Substitutes. (Department Bulletin 343.) Price, 50 cents.

True Mahogany. (Department Bulletin 474.) Price, 5 cents.

Primer of Forestry; Part II, Practical Forestry. (Farmers' Bulletin 358.) Price, 5 cents.

Uses for Chestnut Timber Killed by Bark Disease. (Farmers' Bulletin 582.) Price, 5 cents.

The Woodsman's Handbook. (Forestry Bulletin 36.) Price, 25 cents.

Loblolly Pine, Eastern Texas, Cross-Ties. (Forestry Bulletin 64.) Price, 5 cents.

California Tanbark Oak. (Forestry Bulletin 75.) Price, 15 cents.

Wood Preservation in the United States. (Forestry Bulletin 78.) Price, 10 cents.

Properties and Uses of Douglas Fir; Part I, Mechanical Properties; Part II, Commercial Uses. (Forestry Bulletin 88.) Price, 15 cents.

Uses of Commercial Woods of the United States: I, Cedars, Cypresses, and Sequoias. (Forestry Bulletin 95.) Price, 10 cents.

Uses of Commercial Woods of the United States, Pines. (Forestry Bulletin 99.) Price, 15 cents.

Wood Using Industries and National Forests of Arkansas. (Forestry Bulletin 106.) Price, 5 cents.

Tests of Structural Timbers. (Forestry Bulletin 108.) Price, 20 cents.

Black Walnut (*Juglans Nigra*). (Forestry Circular 88.) Price, 5 cents.

Chestnut Oak in the Southern Appalachians. (Forestry Circular 135.) Price, 5 cents.

Tests of Woods for Vehicles, Implements, Etc. (Forestry Circular 142.) Price, 5 cents.

Practical Results in Basket Willow Culture. (Forestry Circular 148.) Price, 5 cents.

The Preservative Treatment of Loblolly Pine Cross-Arms. (Forestry Circular 151.) Price, 5 cents.

Properties and Uses of the Southern Pines. (Forestry Circular 164.) Price, 5 cents.

Commercial Importance of the White Mountain Forests. (Forestry Circular 168.) Price, 5 cents.

Wooden and Fiber Boxes. (Forestry Circular 177.) Price, 5 cents.

Lumber Saved by Using Odd Lengths. (Forestry Circular 180.) Price, 5 cents.

Colombian Mahogany: Its Characteristics and Its Use as a Substitute for True Mahogany. (Forestry Circular 185.) Price, 5 cents.

Manufacture and Utilization of Hickory. (Forestry Circular 187.) Price, 5 cents.

Greenheart. (Forestry Circular 211.) Price, 5 cents.

Circassian Walnut. (Forestry Circular 212.) Price, 5 cents.
