CABLE ADDRESS: MAY, ST. PAUL.

SOME FACTS

. . . ABOUT THE . . .

SEED TRADE.

May's Seeds vs. Commission Seeds.

Commission Seeds are sent out year after year, one season going East, the next they are sent North or West, making the rounds year after year until at last even those that retain their germinating qualities for three or four years become utterly worthless. Our seeds are sold outright at very low prices.

Cost and Profit.

Most houses that send out seed on commission allow a commission of 40 per cent on seed sold. In other words, a merchant pays the commission house 3 cents for every 5 cent packet he sells. We sell our packets at 1½ cents each, or \$15 per 1,000, giving our merchant a profit of 3½ cents, and he also has the satisfaction of knowing that the seed he is handling is fresh.

Not only is there a vast difference between seed that is placed on commission and that which is sold outright, but the merchant can readily see the large profit in buying May's seeds outright, there being between 100 and 200 percent profit to the merchant, whereas, in handling commission seeds he will only make between 25 and 40 per cent.

...SPECIAL NOTICE...

The Seeds we offer, are of the very best quality
and the prices herein quoted are as low as what

GOOD SEEDS

can be purchased for. It is generally
known that unfavorable condi-
tions at home and abroad
have seriously reduced
the supply of many
varieties of seeds,
in consequence
prices are
somewhat
higher.

Economy in Buying Seeds is Extravagance.

The Best is Always the Cheapest.

Inferior Seeds are Dear at Any Price.

Not bound by these prices for any definite time or quantity, and subject to advance without notice.

Prices herein quoted are F. O. B. St. Paul, Minn.; Chicago, Ill.; Cincinnati, Ohio; Buffalo, N. Y., or Kansas City, Mo., and Detroit, Mich. Bags, boxes and barrels, to insure safe transportation, are charged for at cost.

Terms, June 1, 1901, without regard to date of purchase, or a discount of one per cent per month for unexpired time when paid before maturity.

Grass seeds, potatoes, field seeds, onion sets and sunflower, net cash, without any time or discount whatever.

NOTICE.—It must be distinctly understood that L. L. May & Co. give no warranty, express or implied, as to name, kind, description, quality, quantity, productiveness or any other matter connected with the goods they sell, and they will not be in any way responsible for the loss or failure of crop. The success of a crop is dependent upon so many contingencies, as condition of soil and climate, mode of planting, etc., that we cannot warrant our seeds or hold ourselves responsible for any loss or damage arising from any failure thereof. If the purchaser does not accept the goods on these terms, they must be returned to us at once.

IMPORTANT

Some of our customers in the extreme East and South claim that while our prices, considering the high grade of our stocks, compare with any house in America, but on account of high rates of freight they have been compelled to purchase nearer home. To overcome this, if you entrust your order to us, your freight shall not exceed what you would be required to pay if you purchased your goods in your own town. In ordering please state what point you desire us to equalize the rate of freight with.

GENERAL LIST OF GARDEN SEEDS OF CROP 1900.

Perfectly fresh and all showing a high test of germination.

A telegraphic cipher is attached to each article, which will enable orders to be sent by wire at a small expense. In dispatching use the word freight, express or mail, to designate how to ship. For example, "Freight hundred bisk," means ship by freight one hundred pounds beet, May's Early Blood Turnip Improved.

Note.—In ordering by mail please do not use it, only in cases when you order by telegraph. Kindly bear this in mind as it will save us an endless amount of work, also prevent delay in the executing of your order.

Rust Proof Golden Wax Bean.

RUST PROOF GOLDEN WAX.

This valuable variety is attracting considerable attention among the bean growers of this country on account of its being rust proof. It is positively proof against that most destructive enemy of all beans, the rust. It has been tested thoroughly in all sections, and grown side by side for several years with other wax beans, all of them more or less affected by rust, many of them completely ruined, and this variety has remained entirely free from it. Another most desirable feature about this splendid bean is that it is always crisp, tender and of the most delicious flavor. The pods are long, nearly straight, broad, flat and of a rich golden yellow.

CORN—YELLOW DENT.**THE GREAT WHITE CAP YELLOW DENT.—A Corn for Thin Soils and Drouth-Stricken Sections.**

Introduced several years ago by one of the leading corn growers of America, who writes as follows regarding this variety: "It combines more solid merit than any corn ever introduced, being suitable for all climates and soils, and yet grows large size, maturing quite early. The ears grow as large as the well-known Leaming, and is from seven to ten days earlier, and on thin, poor soils will yield 30 per cent more corn than that variety. Its great merit lies in the fact that it is as natural a yielder as weeds, grows strong, rank and thick and will produce more good corn on poor soils than any variety now in cultivation." After growing the different varieties of merit, S. H. Todd, of Huron Co., Ohio, the largest breeder of Chester White Hogs in the world, says that White Cap Yellow Dent beats all other varieties, yielding immense crops of corn. It makes more bone and muscle than any other corn. Mr. Todd took \$2,175 at the World's Fair on his hogs, and is a large grower of corn, and his recommendation of this variety is honest and reliable. Grown in a section with over 60 other varieties it outyielded all other kinds and withstood the drouth where all other sorts fail. None of it was fired and no dead tassels could be seen, while on Leaming, Huron and Golden Beauty, and some other early sorts, dead tassels could be found, caused by the hot, burning sun. White Cap Yellow Dent will be appreciated by those living in drouth stricken districts, and by farmers who have poor, thin soil on their farms. The tip ends of the grain are white and the inside yellow, making a most beautiful corn.

There are more fine points combined in this corn than any other in cultivation. 1st, it is as natural a yielder as weeds; 2d, it yields large crops on poor, thin soils; 3d, the ears are large, handsome and well filled; 4th, it is sure to mature in from 90 to 95 days; 5th, it husks easily and shells easily; 6th, it always commands a higher price in the market; 7th, it will grow more bushels on poor, thin land than any other kinds in the world; 8th, it stands the drouth better than 60 other varieties tested in the same county; 9th, it has a large number of rows on the cob, making it a heavy yielder; 10th, it will out-shell and out-yield the famous Leaming corn. The sales on this variety increase each year, showing that it is giving perfect satisfaction wherever grown. We cannot too highly recommend it to our patrons. **Price, per bu. 90c.**

The New Spring Wheat. MINNESOTA NO. 163.

Last spring we received through Prof. Hays, of the Agricultural Department at St. Anthony Park, Minn., 10 bushels of this variety, and planted same with tolerable fair results as to yield, and notwithstanding the unfavorable season in the section of this state where it was cultivated. From our observations and trials we feel our State Experimental Station has certainly introduced a variety which is destined to be of great value in all spring wheat producing sections. Certainly great credit is due Prof. Hays for his untiring efforts in the manner in which he has so successfully carried and nursed this very promising variety, and the methods he has adopted in disseminating among our farmers a sort with so many good qualifications. While this wheat is not altogether brought to that state of perfection desired by Prof. Hays, we ask our patrons to fully peruse the history and note the many advantages this new wheat possesses.

SEED CIRCULAR NO. 1.**Minnesota Experimental Station, St. Anthony Park, Minn., March 28, 1899.
A Certified Variety of Wheat, Minnesota No. 163.**

This circular is sent out with a new wheat named Minnesota No. 163 (Minn. No. 163), which was originated under a system of rigid selection. Its parent variety, Minn. No. 168 (Glyndon 811), is thought to be a variety of Red Fife wheat, though its name was lost by the burning of the station building in 1890. This parent wheat was grown at Warren, Marshall County, Minn., in 1890; at Glyndon, Clay County, Minn., in 1891; and at Power, Richland County, N. Dak., in 1892. At the last named place 400 kernels were planted in hills 12 in. x 18 in. apart, one grain in a hill. Plant 2001 yielded 15.4 grams of fine wheat. This being the heaviest yielder among the 400 plants it was chosen as the mother plant of this new variety.

In 1893, 100 of the hardest seeds from this parent were planted at the College Farm, Fargo, N. Dak. (centgener 14301). After securing the best plants with which to continue the breeding experiments, and after discarding several of the poorest plants, the grain from the remaining plants of the plot was harvested in bulk. In 1894 this seed was planted in a small plot on University Farm, St. Anthony Park, Minn., and was increased so that in 1895 there was sufficient seed for a one-twentieth acre plot. In 1897 it was in the variety tests at University Farm, at Northwest Farm, Crookston, and at College Farm, Fargo, N. Dak. Owing to excessive rains in the Red River Valley just before harvest time, the conditions were so lacking in uniformity that the records of yields at Fargo and Crookston in 1897 have not been used in making up the average yields. In 1898, this wheat was in the variety tests at University Farm; at Northwest Farm, Crookston; at Northeast Farm, Grand Rapids; at College Farm, Fargo, N. Dak.; at College Farm, Brookings, S. Dak., and at College Farm, Ames, Iowa. The yields at these experiment stations of Minn. No. 163 are compared with the yields of the best two wheats secured in early efforts at finding superior varieties; viz.: Powers' Fife (Minn. No. 66) and Bolton's Blue Stem (Minn. No. 146).

Shows a greater yield than the other Varieties, Grades Equally as well, Percentage of Rust a great deal Lower and not near as Liable to Lodge, being a more Robust and Stronger Grower.

The Gluten test of flour being greater than the other varieties. The Baker's Sponge Test, all being in favor of Minnesota No. 163.

Price, per bu. \$1.50.

THE FAMOUS HOLLANDER CABBAGE.

Without exception the best late cabbage ever offered the gardeners of America. It is a wonderfully hardy, strong, vigorous grower, enduring both frost and drought, and producing the most perfect, solid, round heads in seasons when other varieties fail completely. For market gardeners and large cabbage growers Hollander is unequalled, its keeping qualities being superior to any other variety. A head of Hollander, when properly trimmed for marketing, will weigh fully one-quarter more than any other cabbage of the same size. Some strains are listed as "Ball Head," "Emperor," and "Export," but none of these can equal our selected stock of true Hollander. It has proven to be the most valuable late cabbage ever introduced for shippers. Our illustration gives a good representation of this cabbage. Experience in our own grounds proves that it is without an equal for large cabbage growers, and we have been very particular in saving seed which is certain to produce the very finest results.

The quality of our SEEDS cannot be improved upon. We receive them fresh from our growing stations every season, and from the fact that our seeds are sold outright (not consigned) it places us in a position to know what amount we need every season to supply the demand. A glance through our warehouses after each season would convince the buyer that the following season he would receive fresh stock, as our stock is cleaned out after a season's business.

Is it reasonable to imagine that a purchaser can obtain fresh seed from a commission concern, or, in other words, a firm that places seed out on commission? Instead of the commission merchant destroying the seeds as they contend, they are, after being returned to them, put in new packets and the probabilities are that you receive the same seeds as you handled and returned the previous season.

It is undoubtedly your desire to hold and satisfy your trade in everything you handle. To satisfy them in seeds buy MAY'S.

To cast bad reflections on your entire line, handle Commission Seeds.

MUSK MELON—Continued. **ROCKY FORD NETTED GEM.**

Many carloads of this variety have been shipped in the last two years from the growers of Rocky Ford, Colorado, from which the name is derived, to all our large cities, and no muskmelon ever sold so readily and brought such high prices as Rocky Ford. The fruits resemble the old Netted Gem, but are more oval in shape, skin green, slightly ribbed and heavily netted. The flesh is a light green in color, thick, ripening clear to the rind, with a very small seed cavity, very sweet and of luscious flavor. It is one of the earliest melons, and exceedingly prolific.

The Rocky Ford has become one of the most popular melons, and it is unquestionably one of the best for market gardeners and shippers, as well as for the home garden. Tel. Code My 30c. lb.

THREE LEADING WATER MELONS.

ICE CREAM, or PEERLESS.—An excellent variety for home use on account of its rich scarlet flesh, which is solid, tender and remarkably sweet. Vines vigorous, hardy and productive. The melons are of medium size and lightly marked. Per lb. 18c.

CUBAN QUEEN.—Grows to a large size, and, as will be seen by the illustrations, is globular or oval in shape. The skin is very handsome, being striped with light and dark shades of green. Flesh is rich red, crisp, juicy and sugary. Per 1 lb. 18c.

MAY'S ICE KING.—The best flavored variety ever introduced. The melon for all sections. The best shipper and most productive variety ever offered. Grows to a good size, skin not thick, but exceedingly tough, and will stand almost any amount of rough usage, and therefore valuable for the large growers. The meat is a rich scarlet, tender, sweet and juicy. J. D. Cory, the great melon grower of the West, says: "Too much cannot be claimed for it. It is the finest melon out of over 20 varieties that I grew last year. Another large grower says: "It beats any melon I have ever grown. Besides being of the finest quality, it is enormously productive, outyielding Kolb Gem three to one." Note—We are headquarters for the true strain of Ice King, being the introducers. It is a melon that will please you. Give it a trial, and get the seed direct from us. Per lb. 25c.

MUSHROOM SPAWN.

Mushrooms may be grown in cellars, under benches, of greenhouses, or in sheds, wherever the temperature of 50 or 60 degrees can be kept up through the winter. The bed should be made from November to February, according to the time the Mushrooms are wanted, and it requires about two months for them to begin bearing. Secure fresh horse manure, free from straw and litter, and mix an equal bulk of loam from an old pasture with it. Keep this under cover, taking care to turn it every day to prevent heating until the pile is large enough to make a bed of the required size. Three or four feet wide, eight inches deep and any length desired, are the proper proportions for a bed; these may be varied. Prepare the mixture of loam and manure, making the bed in layers, and pounding down each with the back of the spade. Leave this to heat through for a few days, and as soon as the heat subsides to 90 degrees, make holes in the bed about a foot apart each way, into which put pieces of the spawn two or three inches in diameter, fill up the holes with the compost and at the expiration of a week or ten days the spawn will have thoroughly diffused itself through the bed. Spread a layer of fresh soil over the heap to a depth of two inches, and cover with three or four inches of hay, straw or litter. Examine the bed often to see that it does not get dry. When water is given it should be at a temperature of about 100 degrees.

YELLOW GLOBE DANVERS—(Selected.) This, Red Wethersfield and Red Wonder are the three onions for market gardeners; immensely productive and good keepers. Large size, globe-shaped, small neck, fine flavor, mild and early. Our seed is of the highest germinating quality. Crops of 700 and 800 bushels per acre are raised from the seed.

Our Onion Seed is all of crop 1900, thoroughly tested, and of the very finest quality. We handle no inferior seed.

Hollow Crown—Roots oblong, ending somewhat abruptly, with a small tap root; grows mostly below the surface; has a very smooth, clean skin and is easily distinguished by the leaves arising from a cavity on the top of crown of the root.

Magnum Bonum—A most excellent variety introduced from Europe. The roots are oblong and grow mostly below the surface. The flesh is simply delicious, being solid, tender and very sweet. If you want the best parsnip that can be secured, don't fail to try this variety.

May's Fern Leaved—A most valuable plant, both for table decoration and mixed with dwarf ornamental foliage plants in the flower garden. Per lb., 35c.

RUBY KING.

Ruby King—An exceedingly handsome variety of enormous size, often measuring six inches in length and nine inches in circumference. Unlike other kinds, as the flavor is very mild, and it can be sliced and eaten with salt and vinegar like tomatoes and cucumbers. Price, \$1.25 per lb.

MAY'S FERN LEAVED PARSLEY.

GOVERNMENT REPORT.

It is gratifying to us to be able to submit the report of Mr. G. H. Hicks, the U. S. Government expert who has charge of the pure seed investigation at Washington, D. C.

Out of the entire order of over one million packets supplied the Department, Mr. Hicks' report shows

99²⁹/₁₀₀ per cent Pure Seed.

which is a marvelous showing and a record we believe unequalled in the history of the American seed trade. The balance, 71-100 per cent impurity, consisted almost entirely of chaff, which is merely the hulls of some varieties of seeds wearing away, and in no way injures their germinating qualities.

May's "King of the Field."

This is a greatly improved field variety which is particularly desirable for stock feeding. It attains a good size, the flesh is fine grained, a rich yellow and of splendid quality. It is a wonderfully productive sort, our selected seed giving about fifty per cent larger yield per acre than any other stock feeding pumpkin we have ever grown. Per lb. 30c.

The Cincinnati Market Radish.

The tops of this new Radish are very small and may stand much closer in the rows than Wood's Early Frame or Long Scarlet without danger of running to seed. They grow straight and smooth and from 6 to 7 inches long. The flesh is very tender, crisp and delicious, never becoming pithy or hollow. The skin is very thin and is of an attractive, bright scarlet color.

MAY'S SUPERIOR RADISH SEEDS.

EARLY SCARLET GLOBE.—A quick growing variety having small tops and is regarded by many gardeners as one of the best extra early varieties. (Color deep scarlet, flesh solid, crisp and tender. Per 100 lbs. 30c., per lb. 35c.)

EARLY SCARLET TURNIP, WHITE TIP.—A handsome radish that is particularly desirable for outdoor culture. The radishes are turnip-shaped, of a scarlet shade, with a distinct white tip. Per 100 lbs. 30c., per lb. 32c.

WHITE BOX.—An extra early white radish that is largely grown in the neighborhood of the large Eastern cities by market gardeners and said to be a most excellent sort for forcing. Per 100 lbs. 32c., per lb. 35c.

EXTRA EARLY CARMINE.—Undoubtedly a most valuable variety for forcing and for general use. Tests show that it has been known to mature in 20 days. As will be seen by our illustration, it is olive shaped. Per 100 lbs. 35c., per lb. 40c.

FRENCH BREAKFAST.—Our illustration gives a good representation of this variety. It grows quickly and is a good forcing sort. Color, scarlet, tipped with white. Per 100 lbs. 28c., per lb. 30c.

CHARTER.—We consider this the best radish of its shape that has ever been introduced. It grows rapidly, attaining a large size in about 4 weeks from sowing the seed, and fit for use at any stage of growth. The color is crimson, deepening to a pink, and shaded to white at the end. Per 100 lbs. 32c., per lb. 35c.

WHITE OLIVE SHAPED.—A good variety for forcing, for early planting out of doors. Skin and flesh pure white. See illustration. Per 100 lbs. 28c., per lb. 30c.

WOOD'S EARLY FRAME.—Largely used for forcing purposes and is a handsome long radish of a bright scarlet color. Flesh solid and of excellent quality. Per 100 lbs. 32c., per lb. 35c.

WHITE STRASBURG.—A splendid summer radish, growing to a large size and can be used at any stage of growth. The flesh is tender, crisp and of excellent quality. Per 100 lbs. 32c., per lb. 35c.

A TOMATO THAT NO GARDENER SHOULD BE WITHOUT.
Hundreds of testimonials from all parts of the United States.

The earliest tomato ever offered. Leads all others by nearly ten days. Tested with Earliest of All, Atlantic Prize and nearly every known kind claiming earliness, it beat them by nearly ten days. It is equally desirable for both market and home use on account of its rich red color, never fading to attract attention wherever displayed, and always bringing the highest prices in the market. The tomatoes are a good size, smooth, solid, and of the best flavor. It's the only first-class extra early variety for general use we have ever grown, and we hope none of our patrons who desire an extra early tomato will fail to give First of All a trial this season. H. G. DeGraw, Creamery, Ia., writes: "Your First of All is by far the earliest and best tomato I ever raised." J. L. Hinds, Missouri, writes: "May's First of All leads every other variety I ever tried by over a week in earliness." Don't fail to include it when ordering.

Mrs. G. W. Davis, Humboldt, Neb., writes: "Last season I had seven kinds of tomatoes and your 'First of All' was the only one that ripened. No one else here had any so early, and I sold mine for \$3.20 per bushel." It is the earliest variety I have ever grown, and beat N. P. Carl, Vinton, Ia., writes: "I highly recommend your 'First of All.' It is the earliest variety I have ever grown, and beat the Acme by over two weeks. I cannot get along without First of All."

Miss K. Kreiss, Evans City, Pa., writes: "We are greatly pleased with 'First of All.' It is the earliest variety we have ever had here." We cannot use the space that would be necessary to publish the hundreds of testimonials received from those who have grown May's "First of All," but the few we give above will certainly convince any one that it is the earliest tomato ever introduced.

EXTRA EARLY CHAMPION

ROMANIAN WHITE GLOBE

WHITE EGG

PURPLE TOP GLOBE

EXTRA EARLY MILAN

MARY'S WHITE PERFECTION

EXTRA EARLY CHAMPION—Without exception the finest flavored and best keeping extra early variety that can be secured for home gardens. It grows quickly. The flesh is pure white, solid, tender and sweet. The bulbs are of handsome appearance, being rather flattened, of a white color, with a shading of purple at the top. Its fine appearance makes it a splendid sort for marketing. Per 100 lbs. 25c, per lb. 30c.

WHITE PERFECTION.—A most excellent white, large, flat-shaped turnip for general use. It grows quickly and the flesh is of mild flavor and excellent quality. During the past two or three years we have sold thousands of packets of this splendid turnip. It is a great market turnip and one that is certain to give satisfaction for home use. Per 100 lbs. 25c, per lb. 30c.

RED OR PURPLE TOP STRAP LEAF.—Tops small, bulb mostly above ground, of medium size and flat. Skin white below the surface, and clear, bright purple above. Flesh white, sugary and remarkably well flavored. Very early, hardy and prolific. The leading standard, purely American variety. Per lb. 18c.

COWHORN.—Extensively grown in many of the Southern states. It is enormous, a pure white variety with the exception of a shade of green at the top, and, as will be seen by illustration, is long and carrot-like in formation, grows about one-half out of the ground and is generally slightly crooked. The flesh is solid, of good flavor, and considered very desirable for fall or early winter use. Per lb. 25c.

PURPLE TOP WHITE GLOBE.—This turnip we do not hesitate to recommend highly to the attention of all of our customers, as it is certainly an acquisition, particularly to all those who prefer a round turnip to a flat one. Of very rapid growth, it matures large-sized, globular-shaped turnips in a remarkably short time. The flesh is pure white. Owing to its rapid maturing qualities, it is always of a pleasant and agreeable flavor. On account of its shape will yield far greater bulk than Red Top Strap Leaf, flat, offered above, and consequently it is really a more profitable variety. It is a good keeper, excellent for winter use, and its attractive and handsome shape always makes it a most excellent selling variety. Per lb. 18c.

FOR SHEEP FOOD.

CULTURE OF RAPE.

It can be sown in drills far enough apart to cultivate, or broadcast. If sown in drills but 7 lbs. per acre is necessary. The best way is to sow it broadcast on very clean soil, or to sow it with your spring grain at the rate of 15 lbs. per acre. After the grain is removed it will grow rapidly, and form excellent pasture. If sown without cover of grain it matures more quickly and furnishes pasture sooner. In sowing

cover it but one inch deep. It is a great soil enricher, and as it is cheap it would not be amiss to sow in all fields where you intend to plow under in fall, as Rape plowed under enriches the soil quickly.

Dwarf Essex Rape. The best forage plant for the sheep growers of America. It is highly recommended by Professor Shaw, of the Minnesota Experimental Station, and many other leading authorities on stock feeding. It has yielded ten tons of green forage per acre, and has twice the feeding value of green clover. Sheep, swine, cattle and poultry eat it readily, but it is particularly desirable for sheep, on account of its fattening qualities. Rape will do well on almost any soil, but give best results on corn land.

Prof. Shaw says: "On 54 acres of rape, after winter rye had been removed, 537 sheep and lambs were fattened thereon, and 18 steers fed for 59 days. The lowest average gain on lambs fed on rape alone was seven to eight pounds per month. Sow it like corn, or broadcast." \$6.50 per 100 lbs.

**BROMUS
INERMIS**

BROMUS INERMIS or

BROME GRASS.

The wonderful Russian Forage Grass.

DESCRIPTION—It originated in Russia, and is recommended on account of the manner in which it has stood on the Hungary plains, where the dry, sterile nature of the country and the long continued droughts make so many plants succumb. This Bromus, however, stands well, and has been known for thirty years to stand when such robust crops as Alfalfa have been destroyed. It gives a luxuriant crop, particularly on fresh sandy loam soil, and where the climate is warm. It is found that animals eat it greedily, whether in the green or dry state, so that it can be mown or saved for winter use. The seed is sown in the early spring. It is also useful in filling up gaps where alfalfa or clover crops have failed. It will stand under favorable conditions for twelve years, and give as much food in one month as alfalfa gives in three months. Price, \$15.00 per 100 lbs., choice.

PACKET SEEDS VEGETABLE AND FLOWER.

MAY'S NEW MODEL SEED CABINET

The Handsomest Display Seed Cabinet Ever Offered.

200 TO 300 PER CENT PROFIT.

THIS SEED CABINET Is put up in three different sizes, containing 500, 750 or 1,000 varieties so customers may readily select just such packets as they desire. This valuable feature not only attracts attention to the seeds, but also overcomes the objection to the old style flat seed box which compels a merchant to look over almost the entire box if any particular sort is wanted. In addition to this, it is in such compact form that it occupies but little space on the counter, or, if preferred, may be hung on the wall. The selection of seeds are such as we have found by years of experience to be the most salable.

We have lists made up of the varieties these cases contain for the extreme south and north and central parts of the United States, which will be mailed on application.

All our packets are handsomely lithographed in several colors, containing illustrations, variety, description and cultural directions, printed both in English and Spanish.

ANOTHER GREAT ADVANTAGE OVER COMMISSION SEEDS.

In case you sell out of any variety or varieties during the season, same can be reordered from us by mail at a cost of 1½ cents per packet and 8 cents per pound for postage (50 or 60 packets to the pound). These will be charged to your account, payable June 1st, 1901.

.....Petunia, Rose Pink.
.....Sweet Peas, Eckford's.
.....Verbena, May's Mammoth.
.....Verbena, Bride White.
.....Verbena, Fireball Red.

SPECIAL NOTICE.

All perishable varieties of Vegetable Seed sold at prices herein mentioned which are carried over by our customers this coming year will be replaced free of charge next season. This applies to all Vegetable Seed packets, whether sold in boxes or otherwise.

For the guidance of our customers, below will be found a Vitality list, and if you have on hand purchased from us in former years any varieties running beyond the date of vitality, we will replace the same free of charge this season on notification.

VITALITY OF SEEDS.

The following schedule gives the length of time that seeds will grow freely. It is true that some varieties will even keep longer than the period mentioned, but their strength will be greatly impaired. Parsley and corn salad will grow more freely the second year than the first; and cucumbers, melons and squashes produce larger crops from seeds two years old than from the new, from the fact that they make less growth of vine and set their blossoms more freely.

Seeds of all kinds should be kept in a dry situation and in sacks in preference to barrels.

	Years.		Years.
Artichoke	3	Leek	2

THE VERY CREAM OF THE SWEET PEAS.

The varieties of Sweet Peas have become so numerous it is often difficult for amateurs as well as seedsmen to form a satisfactory idea and make a selection which really embraces the more desirable sorts. Many are alike, or nearly so. We have only included in our list this year the very best sorts of the older introduction and have added only the very best varieties of all the newer sorts, making our list the most complete up-to-date collection of Sweet Peas ever offered. Not less than one pound of any sort at these prices.

All 5c. per oz. except where noted.

	Per Lb.
Alba Magnifica, pure white.....	\$0.25
America, bright cardinal and white striped.....	.20

Primrose Cupid, light primrose yellow.....	.35
Beauty Cupid, rose, wings almost white.....	.40
Alice Eckford's cupid, cream, wings white.....	.30

The Money Maker for the Merchant

DEALERS' ORDER NO. 1.

300 PER CENT PROFIT.

With our DEALERS' ORDER NO. 1, a merchant is in a position to supply either BULK or PACKET SEEDS to his customers and make an enormous profit.

The Commission Seed Firms put up 10-cent packages of Peas, Beans and Corn, which usually contain about $\frac{1}{2}$ pint. With the assortment which we send out a dealer can give a FULL PINT of Corn, Peas and Beans for 10 and 15 cents, and make FROM 300 TO 400 PER CENT PROFIT instead of only 40 per cent as given by Commission Seed Firms.

While with Beets, Turnips, Radish, Cucumber, Lettuce, etc., he can give $\frac{1}{2}$ oz. for 5 cents, and make from 200 to 400 per cent profit, or if he prefers, put the above sorts in packets, at the rate of 50 to 60 packets to the pound, and make from 500 to 800 per cent profit.

We will supply regular blank manilla seed bags (such as we use for our mail order trade) at 75 cents per 1,000, and all the dealer has to do is to write name of variety sold.

The profit shown on order blank is estimated at our regular Ounce and Pint Retail Catalogue price, and as you will notice, shows a net profit of \$50.40 on an expenditure of only \$20.00 and Seeds not to be paid for until June 1st, after date of shipment, which gives an opportunity to sell out before making any payment at all.

IN REALITY A MERCHANT IS DOING BUSINESS WITHOUT ANY INVESTMENT AND HANDLING GOODS THAT PAY HIM FROM 200 to 400 PER CENT PROFIT.

	Wholesale Price.	Total Amount Retail.
1 Peck Beans—Green Podded	\$0.90.....Retail	15c. a pint..... \$2.40

	<hr/> \$20.00	<hr/> \$70.40

All seeds, with the exception of Peas, Beans and Corn, put up in tin cans with lithographed labels without additional charge.

WE SUPPLY AT A SMALL COST

SEED CATALOGUES FOR MERCHANTS.

Covers handsomely lithographed in colors. A 32-page illustrated book.

**Only the Merchant's Name and Address Appears
on these Catalogues.**

To assist our customers in building up their seed business, we will have printed in time for the coming season's trade several hundred thousand illustrated catalogues of thirty-two pages each. These catalogues will be about 8x10 inches in size and contain complete cultural directions of the different kinds of vegetable seeds, rules for time of sowing seeds in different sections, a table of weights and measures and descriptions of standard varieties of Vegetable, Flower and Field Seeds, etc., and some new and valuable seed specialties which will be found salable in various parts of the United States and Canada, together with the regular retail prices as usually quoted by large Mail Order Seed Firms, which shows a large profit for dealers. The covers will be beautifully lithographed in colors and no name but that of the merchant will appear on same.

A TRADE WINNER FOR DEALERS.

Every season thousands of Seed Catalogues are distributed by large Mail Order Seed Houses, going into every town in the U. S. and taking hundreds of dollars' worth of orders from merchants who could easily retain this trade if they only had a catalogue to distribute in their immediate locality. That is exactly what this catalogue is gotten up for, and it will not only bring a large amount of seed business, but also attract attention to their other lines and prove the best advertisement among the farmers that a merchant could possibly obtain.

WE SELL THESE CATALOGUES AT LESS THAN COST.

To those ordering our seeds we furnish the catalogues at less than they actually cost us, as we realize it is certain to increase their seed trade and this means larger orders to us during the season from our customers. We furnish 500 catalogues complete with dealers name and address, for \$5.00, or as many more as they require, at the same rate. It would cost a merchant at least that much for 500 two-page circulars, and probably more. We give them an illustrated thirty-two page book with a colored cover, at a cost to them of only one cent each. No wide awake up-to-date dealer can afford to overlook such an offer if he is anxious to increase his general trade, as it is by far the cheapest advertisement that can be secured. It is certain to attract attention and bring business which could not be obtained in any other way. As these catalogues can be mailed at a cost of only one cent each, a merchant can select the names of probable buyers among the farmers and gardeners within a radius of twenty-five to fifty miles and send them a catalogue, securing many orders in this way, which otherwise would go to some Mail Order Seed firm.

Price, \$10.00 per Thousand Catalogues.

NOTICE—No order will be accepted for less than 200.

WE PUT UP SEEDS IN WEAVEL, MOTH AND MOUSE PROOF

SEALED AIR TIGHT... TIN CANS

Keeps the seeds clean. Insures highest germination. A perfect plan for the protection of seeds that no merchant can afford to overlook.

An Entirely New Departure in the Seed Trade.

Costs a Little More But Will Save Their Price Ten Times Over During a Season By Keeping the Seed Fresh, Pure and Free From Destroying Insects, Worms, etc.

It is an acknowledged fact that seeds put up in this way will keep fresh and retain their highest germination longer than when put up in any other style. All cans are labeled with a lithographed colored illustration of the contents, so no mistake can possibly be made by a merchant when filling a customer's order. The seeds are kept free from dust and dirt of all kinds, thus presenting a clean appearance at all times, which is a decided advantage, as every merchant knows who has been handling seeds packed in common paper bags.

As a protection for the seeds against destroying insects, worms of all kinds, weavils or mice, this plan is simply invaluable.

At the close of the seed season these cans may be stored away in a very small space and the seed be kept in the best possible condition until required for another year's trade.

The seeds are put up in the following sized cans, 1, 2, 4, 5 and 10 pounds, at the additional cost named below, on the different sized cans and varieties of seeds:

Beets, Mangels, Corn Salad, Endive, Parsnip, Squash, Pumpkin, Tomato, Salsify as follows: 1 lb. can, 6c.; 2 lb. can, 7c. Cabbage, Cauliflower, Celery, Collards, Kale, Kohl Rabi, Mustard, Radish, Turnip, Broccoli, as follows: 1 lb. can, 2c.; 2 lb. can, 5c.; 4 lb. can, 6c.; 5 lb. can, 7c.; 10 lb. can, 11c. Carrot, Cucumber, Lettuce, Egg Plant, Musk Melon, Water Melon, Onion, Okra, Parsley, Pepper, Spinach, Leek, as follows: 1 lb. can, 5c.; 2 lb. can, 6c.; 5 lb. can, 8c.

THE WONDERFUL NEW OAT SCOTTISH CHIEF.

We obtained this variety last season direct from Glasgow, where it has been grown in the Highlands of Scotland for many years. At our Mayfield Farms the past season it proved to be the best variety out of some 40 tested. The straw is exceedingly strong and wiry, enabling it to hold up its enormous heads of grain without breaking or lodging in the least. Enormous yields of 150 bushels per acre are common with the Scotch farmers. The berry is very large and plump weighing very heavy, of a pure white color. It is the heaviest yielding variety we know of and is possessed of so many good qualities that we unhesitatingly recommend it to our farmer friends as the best variety ever introduced in America. Price per bu. \$1.35.

HIGHLAND BEAUTY OATS.

This is another Scottish variety imported by us last season and offered now for the first time. It is a very strong vigorous grower withstanding drought remarkably well under any and all circumstances. It grows to a medium height and produces immense heads of pure white heavy oats. While at Mayfield farm it did not show as large a yield as Scottish Chief, still reports of 100 to 150 bushels per acre are not uncommon with Scottish farmers. We believe it to be one of the best oats introduced in America and earnestly urge our patrons to give it a thorough trial along with Scottish Chief and in future you will sow no other than these varieties. Price per bu. \$1.35.

...The Lightning'...

Guaranteed to Sow from 50 to 80 Acres per Day (either Horse-back or Foot), of Clover, Timothy, Millet, Flax and all Seeds of same nature.

A Seed Sower for
Only 80c.

DIRECTIONS FOR USING:

When you spread the seed 40 feet, set the gauge in the first joint (stub), on the fifth notch (counting from the edge), for sowing one bushel of Clover or Timothy to eight or ten acres, then put the largest section of the three on the stub, and continue in same order. Shove them on and solid; then put the bag under your left arm, with the strap over the right shoulder, start by swinging the tube in a horizontal position from the right to left, and a few minutes practice will make you a perfect sower. Care should be taken not to lower the tube on the sides when in motion, and to use clean seed.

USEFUL TABLE OF WEIGHTS AND MEASURES.

CLOVER AND GRASS SEEDS.

Weight per Bushel.	Quantity used to Sow. One Acre. Pounds.	Weight per Bushel.	Quantity used to Sow. One Acre. Pounds.

TRADE MARK.

A combination of the most patent insecticides and most soluble plant food. When you order seeds, if you have not tried Hammond Slug Shot order a five or ten pound package and use it as per directions given with each package. Not prepaid. Price, per pound, 6 cents. Price, per 100 pounds, \$5.00.

PLANET JR. GARDEN TOOLS FOR 1901.

"PLANET JR." No. 1:

**COMBINED SEED DRILL,
CULTIVATOR, RAKE
AND PLOW.**

with attachments, packed weight 31 lbs. Price \$5.55.

No. 16. Single Wheel Hoe, cultivator, rake and plow, with attachments. Packed weight 26 lbs. Price \$4.70.

No. 17. Single Wheel Hoe, with attachments, packed weight 23 lbs. Price \$4.05.

No. 18. Single Wheel Hoe, with attachments, packed weight 19 lbs. Price \$2.75.

Nos. 15, 16, 17 and 18 are all the same model, the only difference is in the equipment.

We carry a complete line of Planet Jr. goods, and would be pleased to name prices

on anything not shown on this list, we can also supply all Extras or attachments needed. Write for Planet Jr. catalogue.

Triumph Corn Planter, with Pumpkin Seed Attachment for only \$1.15,

Since the introduction of this implement the sales have been something enormous, and the demand increases each season. It is a planter which cannot be too highly recommended, and must not be compared with some of the cheap sorts that are on the market at the present time, offered at prices about the same as this.

No. 1. Combined Drill Seeder and Wheel Hoe, cultivator, rake and plow, packed weight, 46 lbs. Price \$8 10.

No. 4. Hill and Drill Seeder and Single Wheel Hoe, cultivator, rake and plow packed weight, 54 lbs.

Price \$9.35

No. 11. Double Wheel Hoe, cultivator, rake and plow, packed weight 39 lbs.

Price \$7.25

No. 12. Double Wheel Hoe, (with attachments), packed weight 31 lbs. Price \$5.55

No. 13. Double Wheel Hoe, (with Hoes only) packed weight 26 lbs. Price \$3.85

No. 15. Single Wheel Hoe, cultivator, rake and plow.

IMPROVED CAHOON SEED SOWER \$3.25

THE NEW CYCLONE SEEDER \$1.90

WE HAVE

“SEEDS TO BURN”

Is the Cry of some of our would be competitors who sell on the “Cremation Plan.” This is awful, why it’s worse than “Commission Seeds,” or just as bad. The old time, worn out “cremation plan” is the greatest farce in the seed business. No seed firm in the world is going to burn up their packet seed just for fun. Some one has got to pay for it, and it’s the honest storekeeper, *every time*. If you have ever handled seeds on the “cremation plan” you are probably aware that each packet costs you about 2½ cents (ours 1½ cents) so you are paying dearly for the privilege of having some one come around and burn a few packets.

Every wide awake dealer has given this plan up long ago, and we mention it simply because our Price List may reach some merchant who has not stopped to think what a lot of money he was presenting to the “cremation seed firm” every year—money which really belongs to the dealer.

MAY'S SEED SPECIALTIES.

Market Gardener Beet,
Extra Early Danish Cauliflower,
Hollander Cabbage,
Solid South Cabbage,
Northwest Premier Pea,
Table Queen Carrot,
All Cream Lettuce,
