NEW TOMATO.

WHITE'S EXCELSIOR. "The vines are of a dark green, grow rapidly and to a great size, bear a heavier crop than any other variety and continues bearing until killed by frost. The fruit is dark or purple red, very large, set in great clusters, and retain their size until the last end of the season. The seed cavity is small, the skin is tough, will bear long shipments.

THE "IRON AGE" DOUBLE WHEEL HOE.

At a glance one can see the great usefulness of this tool. The garden or farm is incomplete without one of these tools. In cultivating onions, beets, turnips, radishes, etc., it is invaluable; saves hours of hard labor, and does the work better than several men could do it in the same time. One great advantage which the double wheel hoe possesses is that it can be made into a practical single wheel hoe in a moment's time. An axle is sent with every double wheel hoe for this purpose. The wheels are 16 inches high, enabling the wheel hoe to run easy and without yielding to the depressions of the soil as a low wheel will do. The frames being made of tubing coupled to malleable castings gives great strength together with lightness. All the tools shown in the cut go with the machine for the price, \$6.00.
