SEEDS
BULBS:

1868
1901

HARDWARE | IMPLEMENTS,
DRAIN TILE, TIN SHOP, ETC.

Ebeling's Danish Cabbage.

The greatest shipper and keeper on the market. We have a very fine stock of this celebrated seed which is imported direct from the grower in Denmark for our trade. I have had this same strain for years. There is none equal to it.

Price, \$3.00 per lb.

SOME FACTS ABOUT

Ebeling's Telephone Peas.

G. G. Hitchings of South Onondaga, the largest and most successful pea grower in this section, says this about our improved strain of Telephone Peas: "I can honestly say that your strain of Telephone Peas have the *most vigorous vines*. *Are true to name*, and are fine yielders" The year previous Mr Hitchings said: "I picked two hundred and five bushels from a single picking from one acre." We have the same stock of Telephone Peas to offer this year."

PRICE, \$4.25.

DANISH BALL HEAD CABBAGE.

EBELING'S SNOWBALL CAULIFLOWER.

This is the choicest strain of seed obtainable and is grown for us in the best cauliflower growing section in the world. We have had this strain for years and our stock has just been received from our grower abroad

PRICE, \$3.00 PER OUNCE.

For a fine field of our celery, grown by Dixon Bros. see page 4.

AMERICAN STEEL WOVEN WIRE FENCING.

Strong, Efficient, Durable, Economical. All that the Farmer requires of his Fences.

We are sole agents for this celebrated fencing. Best and cheapest and far ahead of any fencing you can put up. It is "*The Fence That Fences*" and "*Once Up, Stays Up*." See page 57.

HARDWARE DEPARTMENT.

We have recently enlarged our business by adding an increased line of fine Hardware. This was done in response to the constant and increasing demand for Hardware, and you will now be able to secure everything in Farmers', Mechanics' and Builders' Hardware from a clean fresh stock at prices that will be reasonable. We ask your patronage.

1868—THIRTY-THIRD YEAR—1901.

For thirty-three years this house has been located in the same block, having been established in 1868 by Mr. A. D. Perry. We are pleased to announce that never before have we been better able to meet the requirements of our trade than at the present time. **This firm is the only strictly seed-house in Central New York.** Importing the finest and choicest varieties of **Flower and Garden Seeds**—as well as dealing in all the more common sorts of field and garden seeds, implements, drain tile, hardware, etc., and which this catalogue will more fully explain.

SEEDS.—Our stock of Seeds for 1901 have been most carefully selected—the best only being used for our trade. Our best possible care, skill and attention is devoted to this our special line of business.

HARDWARE.—In response to the constant and increasing demand we have added a large line of Farmers, Mechanics and Builders **HARDWARE** and Glass to our store.

Your patronage is earnestly solicited.

We herewith present our Thirteenth Annual Illustrated Catalogue containing a list of Seeds and things necessary for the Farm, Garden, Lawn, Greenhouse, Dairy, Poultry Yard, Hardware, etc., also call special attention to our Hardware Stock and Tin Shop. Everything in the line of Tin and Galvanized Iron Work is promptly done. We are better prepared than ever to meet the full requirements of our trade, and thank our many friends for past favors and generous patronage.

Etabliert 33 Jahre.

Wir übergeben dem geehrten Publikum hiermit unseren 30sten jährlichen Catalog für das Jahr 1901. Derselbe enthält eine vollkommene Liste ausserlesenen Sorten frischer Garten-, Feld- und Blumen-Samen, sowie von allen Artikeln, welche für den Landbau, Garten, Allee, Treibhaus, Hühnerhof u. s. w. nöthig sind. In Verbindung mit unserem Laden haben wir auch für die Bequemlichkeit unserer Kunden eine Blech- und Klempner-Werkstätte eingerichtet, auch besorgen wir galvanisirte Eisenarbeit. Dreiunddreißig Jahre war unser Geschäftsaus in ein und demselben Häusergeviert lokalisiert; gegründet wurde dasselbe im Jahre 1868. Dies ist das einzige wirkliche Samen-Geschäft in Central New York. Wir importiren die besten und seltensten Samenarten vom Auslande, eigens von Sachverständigen für unseren Laden ausserlesen. Wir halten auch Ackerbau-Geräthschaften, Eisenwaaren (Hardware), Handwerkszeug, Drainir-Ziegeln u. s. w. stets auf Lager. Alles Nähere besorgt dieser Catalog. Herr Ebeling, der Eigenthümer, macht es sich zur besonderen Aufgabe, alle seine werthen deutschen Kunden in ihrer Muttersprache zu bedienen und ist es sein stetes Bestreben, durch freundliche und zuvorkommende Bedienung ihre Kundschaft und ihr Wohlwollen zu erwerben und zu erhalten.

Achtungsvoll zeichnet,

F. H. Ebeling,

217 Warrenstraße, Syracuse, N. Y. (dem neuen Postamt gegenüber.)

CHOICE CAULIFLOWER SEED.

This we import annually from the same growers and for years have not had a failure. It will produce a greater number of perfect heads than any other strain of cauliflower we ever saw. Of all the varieties that have been tried in this market *our strain of Erfurt and Snowball have given the best satisfaction.* We have our usual stock of Erfurt, also Snowball and Half Early Paris. We assure you the quality is always the same and no cheap seed offered you in its place. There is no better cauliflower seed in the market, even if you pay fancy prices to others. Our price is \$3.00 per ounce.

John Cathers, one of the leading cauliflower growers in this section, has used our strain of Erfurt Cauliflower for years and says it is without equal. A sure header, a fine ylelder and a money maker.

*These prices are subject to change without notice.***EARLY SEED POTATOES.**

We make a specialty of choice early seed potatoes. These are carefully grown from good selected seed stock and by responsible growers.

We can also furnish choice muck grown stock if desired. These are much sought after by market gardeners who find it profitable to use the "Muck Potato." Prices will hold fairly reasonable this spring.

GREAT BARGAINS IN WHIPS.

NEW THINGS FOR 1901.

OPTIMUS TOMATO—Bright crimson scarlet. Medium size. Ripens early. Vines continue bear for a long time. Very smooth—solid—without any core. Fine flavor. Splendid for canning.

GOLDEN GLOBE RADISH—Round and smooth, with attractive light golden-brown skin. Flesh crisp, white and of the finest flavor. Lb. 90c, oz. 15c.

CALIFORNIA MAMMOTH WHITE CHINA, WINTER RADISH—First introduced into this country by the Chinese in California. It is pure white, about one foot long, and two or three inches through, tapering regularly to the tip. The flesh is tender and crisp, keeping well through the winter. Lb. 90c, oz. 10c.

SPALLER YELLOW GLOBE ONION—This magnificent type of Oval Globe has been secured by a careful and systematic selection, and for shape, size, color and market value is unequalled. We have a limited quantity. Price, per oz. 10c., lb. \$1.50.

EXCELSIOR WHITE DUTCH CABBAGE SEED—Large, late, round solid heads. Has stood the trial test in this country during three years, and is highly recommended by leading growers and seedsmen.

EVAN'S TRIUMPH CELERY—The stalks of this new variety do not grow as large with us as those of the Giant Pascal or Kalamazoo, but are larger than those of Boston Market or White Plume. It has a compact habit of growth and is a fine keeper. Crisp, brittle and tender. A good late keeping sort. Lb. \$3.00, oz. 30c.

EARLY EVERGREEN SWEET CORN—This choice new variety is one week to ten days earlier than Stowell's Evergreen. Contains eighteen to twenty irregular rows. The kernals are deeper and narrower and superior in sweetness and whiteness, and remains in condition longer than the Stowell's Evergreen. We can recommend this as a fine addition to the Corn family.

LIVINGSTON'S MAGNUS—This very distinct and most promising new variety, of the color of Beauty and Acme, is the latest addition by Livingston to the Tomato family. It is thicker, heavier and more solid than either of the above, making it easily the most handsome sort in cultivation is free from crack and rot. It is unsurpassed in quality and in production of fine, large fruits. While perfectly adapted to main crop planting, yet it matures so quickly that it will take first rank for early market. Pkt. 15c, oz., 30c.

THE NEW STONE—The Tomato for a main crop. We call this the king of the Livingston kinds, which are the best types of large, smooth, solid, "beefy" Tomatoes, if asked to select one main crop, *market sort*, we advise this. Color, fine scarlet, stem (calyx) set high, core small and shallow, so that but little is lost when it is taken out of the fruit before slicing. If in doubt, buy the New Stone for market or home. Price per lb. \$2.50, oz. 25c.

MAGNUS TOMATO

MUSHROOM SPAWN.

CAMPIGNON, French. Culture—Mushrooms may be grown in cellars, under benches of green-houses or in sheds, wherever the temperature of 50 degrees can be kept up throughout the winter. The beds should be made from November to February, according to the time the Mushrooms are wanted, and it requires about two months for them to begin bearing. Secure fresh horse dung, free from straw and litter, and mix it in an equal bulk of loam from an old pasture with it. Keep this under cover, taking care to turn it every day to prevent heating, until the pile is large enough to make a bed of the required size. Three or four feet wide, eight inches deep, and any length desired, are the proper proportions for a bed; but these may be varied. Prepare the mixture of loam and manure making the bed in layers and pounding down each with the back of a spade. Leave this to heat through for a few days and as soon as the heat subsides to 90 degrees, make holes in the bed about a foot apart each way, into which put pieces of the spawn two or three inches in diameter; fill up the holes with the compost, and at the expiration of a week or ten days the spawn will have thoroughly diffused itself through the

Campignon Brot, German.

MUSHROOM BED.

bed. Spread a layer of fresh soil over the heap to the depth of two inches, and cover with three or four inches of hay, straw or litter. Examine the bed often to see that it does not get dry. Take special care, however, when water is given, that it be at a temperature of about 100 degrees. Price, 25c per lb.

ABOUT GRADUS PEAS.

In the spring of 1900 a market gardener on Long Island went to Mr. Felton, a dealer in seeds, and ordered six bushels of **Gradus Peas**. When they came he found that they cost \$8.00 per bu.; he thought the price high and took only four bushels. These he sowed and the crop brought him \$380.00 in cash. The peas sold for \$2.50 per sack (1½ bushels in a sack) against \$1.25 to \$1.50 per sack for other peas.

DESCRIPTION.

Gradus or Prosperity. The earliest tall, large-podded, wrinkled Pea in cultivation. It grows about two and one-half feet high, is of robust and vigorous habit and produces an enormous crop of large pods, filled with tender, sweet and luscious Peas. Pods dark green; do not wilt or shrivel; holds its color well after picking. Size of pod equal to **Telephone**; follows the **Alaska** in earliness. Price 40c. per qt., \$3.00 per pk.

TESTIMONIALS.

WATERLOO, N. Y., Jan. 1, 1901.

Mr. F. H. Ebeling, Seedman, 217 Warren street, Syracuse, N. Y.:

SIR:—After twenty-one years of constant business transactions with you, and the old established house you represent, we consider it a good time thus, early in the new century, to wish you a happy New Year, and a larger patronage from your many customers than ever before. And to assure you that our business relations have been so congenial, and the quality of our purchases so satisfactory during all this long term of years, we consider it only wise on our part to very soon send you our twenty-second annual order for the many seeds which we have to buy to supply our vegetable business during another year.

We have, like many others, bought from many other reliable firms, but no where do we place our orders with more confidence than with you, nor get better results from our purchases. Respectfully asking you to send us your annual Catalogue when convenient, we remain

Your's respectfully,

DAY & BEARD, Produce Growers,
Waterloo, N. Y.

Mr. Nathan Rose, a market gardener on the Jamesville road, says: "Your seeds, as usual, gave splendid satisfaction."

(Mr. Rose has bought his seeds of us for thirty consecutive years.)

C. H. Dewitt of Kirkville, N. Y., has used our Yellow Globe Danvers Onion Seed and advises us that he is greatly pleased with the uniform size, excellent quality, and fine color, as well as earliness of crop.

Mr. G. A. Collier, of Rose, N. Y., reports that our "Spallars" Yellow Oval Globe Onion yielded at the rate of 1500 bu. to the acre.

See page 9 for a view of our field of "Spallars" Oval Globe Onions.

SHELL WALKS AND DRIVEWAYS.

I am prepared to build crushed shell walks and driveways at moderate cost. The shell makes a clean, white, dustless drive or walk. Mr. Charles L. Stone of James street has a fine driveway built of this material.

WHIPS.

Half Price.—Milkmen's Whips at 25c., regular price 50c. Regular straight Driving Whips 25c, former price 50c. Also other bargains from 15c. up—Fresh A-1 stock just received from the factory.

SUCCESSION CABBAGE.

I offer a very fine stock of Long Island grown seed. This is one of the best shipping varieties on the market and has proved to be a very popular sort with the growers and shippers.

I offer a limited stock at

\$3.00 Per Lb.

DWARF ESSEX RAPE

The true **Dwarf Essex Rape** is valuable as a fattening food for pasturing sheep in autumn. It is particularly adapted as a "catch crop," for it grows best late in autumn. In the Northern States it can be sown at any time from May until the end of August, but in the Southern States it should not be sown until September or October for winter pasture. Its fattening properties are said to be twice as good as clover. Sow ten or twelve pounds per acre in drills fifteen inches apart. When sheep are feeding on Rape they should at all times have access to salt. Per lb., 10c. Twenty-five lbs. for \$2.25. One hundred lbs. for \$7.50.

BEARDLESS BARLEY, SPRING RYE WHEAT AND SEED OATS.—We offer choice well cleaned, true to name, varieties of SEED at reasonable price.

BEARDLESS BARLEY.—A fine yielder. Strong growth of straw. A Barley without the objectionable beards, giving it a superior feeding value. These features combine to make it the best and most profitable Barley Known. Beardless Barley was introduced by us several years ago, and has proved to be very popular. Price, \$1.00.

SPRING RYE.—We offer a fine crop of Spring Rye at \$1.25 per bushel.

SPRING WHEAT.—We can supply the China Spring Wheat at market prices.

WHITE SEED OATS.—We offer choice well cleaned, true to name, varieties of Seed Oats at reasonable prices.

MORTGAGE LIFTER OATS.—Weight, 40 pounds. We sell them. None better. 60c per bu.

CALENDULA (MARIGOLD.)

Hardy free flowering Annuals with large double flowers in splendid variety of colors; grows well in dry situation; height, 1 foot. Sow outside in May.

Mixed, all Colors.....oz., 50 cts., Pkt., 5 cts.

CALLIOPSIS OR COREOPSIS ANNUAL VARIETIES.

Charming hardy Annuals, blooming early and lasting in flower till frost. Very useful for cutting.

Mixed Varieties in Rich and Brilliant Colors.....Pkt., 10 cts.

CANDYTUFT (IBERIS.)

Very showy, hardy Annuals, growing about 1 foot in height; grows well in any ordinary soil. Sow outside in May.

Mixed Colors in great variety.....oz., 30 cts. Pkt., 5 cts.

CARNATION MARGUERITE.

Half hardy perennials if sown inside in spring and transplanted to the open garden in May, will flower in July and continue till frost, when with a light covering of rough straw or leaves they can be carried over winter and be much better the following year; or they may be potted up in the fall and flowered in the house during winter. The flowers in size, fragrance, and variety of colors are equal to the best greenhouse varieties. Sow inside in March or April in shallow pans or boxes; transplant in open ground in May, or sow seed outside as soon as danger of frost is over.

Mixed Varieties, or separate colors (white, pink, red, rose yellow, striped.oz., \$2.00 Pkt., 10c.

CASTOR BEAN (RICINUS.)

Tender Annuals of rapid and gigantic growth, producing enormous dark green or bronze colored palmate leaves, excellent for massive foliage effect on lawns or backgrounds; can be started in April in the house and transplanted to the open garden about the first of June where they will attain a height of from 6 to 10 feet in a few weeks. 25c. oz., 5c. Pkt.

CHRYSANTHEMUMS' ANNUAL VARIETIES.

Hardy Annuals of easy cultivation and blooming early in the summer; grows about 2 feet high; splendid variety of colors.

Single, Mixed.....oz., 40 cts.	Pkt., 5 cts.
Double, ".....oz., 40 cts.	Pkt., 5 cts.

SUPPLEMENT TO FLOWER SEED LIST.

COSMOS EARLY FLOWERING.

One of the most beautiful flowers in cultivation; if sown in May in the open ground will bloom about the middle of July: the colors include pure white shades of lilac, rose and crimson,
Mixed Shades.....Pkt., 10 cts.

DAHLIA, SINGLE.

These popular flowers can be raised from seed and flowered the same season, and nothing gives more satisfaction than a good bed of Single Dahlias, being far superior to the double varieties for cutting purposes; sow seed inside in April; plant in the open ground about the first of June. A cool, rich soil suits Dahlias.
Mixed Varieties.....Qkt., 10 cts.

MIGNONETTE.

This delightfully fragrant plant should be grown by every one who has room for a window box. Its cultivation is the easiest possible. The seeds should be sown early outside, and the young plants thinned sufficiently to allow them to branch. Water freely in dry weather.
Flacbet, one of the best.....oz., 60 cts. Pkt., 10 cts.

NASTURTIUMS.

No collection of flowers should be without Nasturtiums, they grow so forcibly and afford such a variety of rich bright colors. As a cut flower there is nothing more effective, sweet scented and pleasing in every way.

Tall Varieties Mixed.....oz., 10 cts. Pkt., 5 cts. | **Dwarf Varieties Mixed**.....oz., 15 cts. Pkt., 5 cts

Our Mixture of Nasturtium is the Finest in the Country.

Nasturtium Dwarf , Aurora, very fine.....	Each 5c. per Pkg.

PETUNIA.

The Petunia, owing to its good growing qualities and its dazzling colors, is a favorite with all growers of flowers who appreciate brilliant effects; for window boxes and mass beds nothing is more effective. Annuals growing from 12 to 15 inches high.

Double Varieties Mixed.....Pkt., 50 cts. | **Single**.....Pkt., 10 cts.

SALVIA (FLOWERING SAGE.)

Splendens, one of our most useful and gorgeous bedding plants, with long spikes of brilliant scarlet flowers, blooming continuously from mid-summer till frost; about 3 feet high. Sow inside in April and transplant outside when danger of frost is over, or sow outside in May. \$3.00 oz. 10 cts. Pkt.

SWEET PEAS.

The improvement in this flower during the last few years is truly wonderful. The beauty and variety obtained through the work of the hybridizers is a revelation as to what can be done for the improvement of flowers by hybridizing. The delicate shades to be had in the new Sweet Peas cannot be surpassed by even the rose. To get the Sweet Pea in perfection it should be sown early in rich rather moist soil. Dig a trench about eight inches deep, fill in two inches of well rotted manure, then two inches of rich soil in which the sweet peas should be sown; cover with one inch of soil and as the plants grow keep filling till the trench is level. In dry weather cover the roots with litter of any kind to keep moist and cool and you will be well repaid.

LEADING VARIETIES.

Odoratus —"Sweet Peas"—Imported by us annually Adonis —Beautiful deep rose with wings almost carmine Apple Blossom —Resembles the flower of Apple Blossoms The Bride —The best earliest pure white in the market Boreston —Its flowers are a rich dark chestnut color Bronze Prince —Rich chestnut color bronze maroon Black —Deep maroon and dark blue Blanche Burpee —Pure white, very large Blanche Ferry —Bright pink and white Butterfly —White, edged with blue Cardinal —Bright crimson Countess of Radnor —Soft lavender Daybreak —Watered, red and white Delight —White Rose shaded Dorothy Tennant —Rosy mauve Duchess of Edinburgh —Light scarlet and white Duchess of York —Delicate white, striped pink Emily Eckford —Rosy mauve changing to blue Empress of India —Rose Standard, white wings Emily Henderson —Large clear white Firefly —Bright crimson scarlet Grand Blue —(Invincible blue)	5 CENTS PER PACKAGE. For additional Flower Seed list see pages 20, 21, 22.

FLOWER SEEDS.

KEY TO CULTURE.

A. Sow for succession from April to June for summer and autumn blooming. Prepare the ground thoroughly by digging, adding a good supply of leaf mould or well rotted manure, making the surface fine and smooth.

B. Sow in gentle heat, in a well drained pot or pan of light soil. Sow thinly and cover lightly with a fine sandy soil. Shade from bright sunshine, and water when necessary through a fine rose watering pot. Transplant to open ground when all danger from frost is over. The seed may also be sown in a cold frame in April, or open border in the latter part of May, but will not flower so early. Transplant or thin out before the plant gets too large.

C. Sow from April to June, or in August, in a well prepared bed of light soil, covering the seed lightly. Keep clear of weed, and thin out the plants, if too thick, sufficiently early to allow them to develop their growth.

D. Sow in spring in a well drained pot or well prepared hotbed of light, peaty or sandy soil. Place in a moderately warm temperature. Shade from bright sunshine and keep moist, transplant when ground is in a proper condition, or in open ground after May 10th for late flowers.

E. Sow in open border in April or May. and thin out or transplant, giving each plant plenty of room.

F. Sow at any time in a pot prepared as follows: Let the pot be one-third full of drainage or broken charcoal; cover the rough siftings of mould, and the surface with very fine soil, half of which should be composed of fine, sharp sand; water with fine sprinkler; scatter the seeds thickly over the surface, cover very lightly; keep from direct rays of the sun. As soon as the plant show the third leaf, transplant into seed pans, three-fourths of an inch apart, giving a little air to strengthen them. When the plants begin to touch each other they should be transplanted singly into small pots and keep them in a cool, airy part of the green house near the glass. Re-pot them when necessary.

The following portion of our catalogue, devoted to Flower Seeds, we have arranged both alphabetically and in columns, to enable any one to easily refer to the price and description of any variety desired.

KEY TO COLUMNS.

The 1st column contains the name of the flower.

NAME.	Hardiness and Duration.	Height Feet.	Color of Flower.	Culture.	Per Pkt.	GENERAL OBSERVATIONS.
Aster, Truffaut's La Superbe.....	hA	2	pure wht.	D	10	Aster. No lover of these flowers can find anything so easily cultivated that would afford such genuine pleasure and satisfaction. The New Washington varieties are extremely beautiful, attaining a very large size averaging 4½ inches in diameter, and in delicacy of tints are unequalled. Aster seed should be sown early in the Spring in a hot-bed or window box and transplanted out-doors when the weather is warm, about 12 inches apart—the taller varieties a little farther apart and the dwarf varieties a little nearer together.
“ Dwarf Chrysanthemum.....	“	1	mixed.	“	15

"New Easy," Lawn and Border Mower.

The NEW EASY is one of the best, most reliable
all round Mower ever built. Can do more varied and
satisfactory work and is especially designed to cut the
grass on borders, narrow strips of sod, sometimes only a
few inches wide—between flower beds and walks, where
a side wheel Mower would have one wheel down in the
gutter, and in consequence, the Mower would cut into
the sod. In this Mower a large light cylinder extends
the full length of the Mower and prevents and keeps the
machine level with the surface and does perfect work.
It is very light running, and will give thorough satisfac-
tion.

THE NEW EASY.

LAWN ROLLERS, VARIOUS SIZES AND WEIGHTS, **\$8.00 AND UP**
LAWN MOWERS SHARPENED AND REPAIRED.

PURE GROUND BONE,

Per 100, \$2.00

These fertilizers are free from foul seeds and are natural grass producers.

SHEEP FERTILIZER, \$3.00 PER 100 lbs.

LAWN SEEDS.

We refer to the *best Lawns of Syracuse* to show what we are doing to promote this good work in our midst. For years we have studied the nature of grasses, their adaptation to soils, the time of maturing, height, color, &c., with this object in view. We use in our mixture only grasses that harmonize in color and size, using both early and late varieties, that our lawns may remain green and beautiful all through the season. We have reached the goal in this line and we are sure there is no better mixture for lawns than ours. In the first place we intend to have our *Lawn seed strictly pure*. We examine every variety under a glass before we mix them, that our lawn seed may be free from foul weeds. We use all fibrous rooted perennial grasses so that they will stand the drouth and close cutting with the lawn mower without killing. We select grasses that harmonize in size in order to produce a fine velvety appearance and form a thick covering on the ground.

Per lb. 25c; per 100 lbs. \$18.00.

WE SELL FERTILIZERS OF ALL KINDS.

No. 15. Iron Age Combined Single Wheel Hoe, Hill and Drill Seeder, Price \$9.00.

Combined in this tool is the best Hill and Drill Seeder and Single Wheel Hoe ever offered to the public. In combining these tools, not a single advantage of a separate Single Wheel Hoe or Seed Drill is lost. As each they are, in themselves, complete. Changed from one form to another almost instantly, completely filling every desire both as to method of handling seed and soil.

It places the seed in hills or drills, it plows, it rakes, it opens furrows, it covers, it hills, it hoes, it cultivates.

The Wheel is made of steel. 16 in. high; the frame of pipe, coupled to malleable castings; therefore light, (runs easy) strong and durable.

No. 12. Iron Age Wheel Plow and Cultivator, Price, \$3.00.

In the accompanying cut we show a tool of exceeding lightness but of great strength, which is designed to do a greater variety of work than any other tool of the same price. It will accomplish all the work necessary in a small garden,—plowing, furrowing, covering, hoeing, raking and cultivating. This tool is emphatically a friend of the laborer or mechanic who can afford only a small amount of money in a garden tool, and whose few moments in a garden must be devoted to "straight-ahead" work.

The New Model Steel Drill, Price \$6.50.

The New Model Steel Drill contains all the good points of every old drill in the market, with this point in addition: the slide, or hole through the slide where all the seeds have to pass, is adjustable, and the slide can be changed to a fraction by the operator, thus admitting exactly the quantity of seed required. The hole is diamond shaped, which is another advantage for rough or irregular shaped seed. CUT OFF—The flow of seed can be instantly stopped by a swinging cut-off, conveniently operated by a cord and ring on handle. This cut-off prevents all loss of seed at end of rows, and its swinging or gravity form will be found far preferable to one that slides under, as it cannot injure the falling seeds.

No. 22. "Iron Age" Combined Fertilizer Distributor, Hill and Drill Seeder, Price \$16.00.

In these days of strong competition in the growing of crops, it becomes necessary for the market gardener to make a study of the most economical use of fertilizers, and to obtain this economy requires such a tool as in accompanying cut, which applies the fertilizer in connection with the seed, just where it will do its greatest good; or, by the use of the same tool in its other form, as shown below by applying quick acting fertilizers to growing plants.

Although a tool designed to do so much, it is perfectly simple, light of draught, strong and perfection in the quality of the work done by it. These plows are adjustable in depth and width, which allows the adjustment of the depth at which the fertilizer is sown and allows its distribution in narrow streams at different distances. The Plows are immediately followed by the covers which draw the soil over the fertilizer just deposited.

The Fertilizer Distributor is thoroughly reliable in its distribution of fertilizer. It contains a force feed device which prevents stoppage by small lumps.

The Seed Sower Device is practically the same as used on Nos. 6 and 15 Combined Seed Drills. The seed may be sown in rows or dropped in hills at 4, 6, 8, 12 or 24 inches apart.

No. 23. "Iron Age" Fertilizer Distributor, (As a Side Dresser) Price, \$12.00.

Hill and Drill Seeder Attachment, \$4.00.

The side or top dressing of growing plants has become a practice of great importance. It is not merely a matter of the economical distribution of high-priced fertilizers, but what is of more consequence, the placing of it just where the rootlets will quickly seize and absorb its chemical constituents.

With the addition of the Hill and Drill Seeder attachment, this tool is identical with the No. 22 Combined Fertilizer Distributor Hill and Drill Seeder shown above.

This tool is operated by working astride the rows of growing plants, and the result accomplished will be most gratifying.

GEM SINGLE WHEEL HOE, \$4.00.

The popular GEM has been so largely used by the market gardeners that it needs no introduction. Being made mostly of steel and malleable iron it is strong yet light in weight. Sure to please.

THE IRON AGE.

FARM AND GARDEN IMPLEMENTS.

The "Iron Age" Catalogue for 1901
will be sent Free upon Application.

No. 6. Iron Age Combination Double Wheel Hoe, Hill and Drill Seeder, Price \$10.00.

This tool is without question the most practical and complete combined garden implement ever offered the public, the ease and simplicity of adjustment, the lightness combined with great strength, the accuracy by which it drills or hills the seed, and the small amount of power required to operate it, are the most important features.

The Wheel is made of steel, 16 in. high; the frame of pipe, coupled to malleable castings. In each form, whether a Seed Drill, a Double Wheel Hoe or a Single Wheel Hoe, it is equal to any tool or tools made especially for the one purpose.

It places the seed in hills or drills, it plows, it rakes, it opens furrows, it covers, it hills, it hoes, it cultivates.

No. 1. Iron Age Double Wheel Hoe, Price \$6.00.

(The Drill Form of the Tool Shown Above.)

At a glance one can see the great usefulness of this tool. The garden or farm is incomplete without at least one of them.

In cultivating onions, beets, turnips, radishes, etc., it is invaluable, saves hours of hard labor and does the work better than several men could do it in the same time. One great advantage which this Double Wheel Hoe possesses is that it can be made into a practical Single Wheel Hoe in a moment's time.

An axle is sent with every Double Wheel Hoe for this purpose. The wheels are 16 inches high, enabling the Wheel Hoe to run easy and without yielding to the inequalities of the soil, as a low wheel will do. The frame being made of tubing coupled to malleable castings gives great strength, together with lightness. All the tools shown in the cut go with the machine for the price, \$6.00.

Showing the Double Wheel Hoe
set up as a Single Wheel.

A Seed Drill attachment for sowing in rows only (No. 4) or for sowing both in rows and hills (No. 6), \$3.00 and \$4.00 respectively. When applied the tool is identical with that of the Iron Age No. 4 or No. 6 Combined tools, depending upon which seed attachment is applied.

The Weeder Attachment.
Price, per pair, \$1.00.

No. 60 "Iron Age" Pivot Wheel Riding Cultivator.

Price, \$30.00.

Add for Plows 65 cts. Fallow Tooth \$1.00.

Ball Bearings.—It has wonderful ease of guidance, the pivots being vertical near the wheels, and the ends resting upon hardened steel balls.

Spring Pressure Lock-Down.—To prevent the gangs from rising and slipping over hard places, we furnish this Cultivator with a spring pressure lock-down, strong enough to hold it to its work in stiff ground, but weak enough to allow the gangs to rise before damage could occur to them or the standards.

The Lever Gauge Adjuster gives the operator immediate control of the width of his gangs. With this adjuster the gangs are always at equal distance from the center. One important feature of our Adjuster

is that the gangs, and necessarily the teeth, are always kept parallel with each other, each tooth presenting its face squarely to the front at all times, and therefore will not throw soil toward the row when expanded, and from the row narrowed up, as is the case when the gangs are pivoted at the front. Especially is this Adjuster valuable where the distance must be changed frequently.

The **Gangs** are of such design as to give great strength—very rigid, so as to instantly follow the directions given by the wheels. For cultivating potatoes and all close-grown crops the outside part of gang is removed, together with the standard and tooth.

The **Standards** are made of good steel and can be instantly adjusted in depth of angle of cut, or removed altogether by simply loosening on nut.

Points.—The steel points sent out on the Cultivator are $2\frac{1}{2}$ inches in width and 10 inches long, while we have, also, of the same length, points $1\frac{1}{4}$ and $3\frac{1}{2}$ inches in width, meeting a call for those extremes.

The **Wheels**, as shown in cut, have flanged tires to prevent slipping on hill sides. They are made of steel, and while they may appear light, yet they are very strong and durable.

No. 70 "IRON AGE" Combined Pivot and Wheel Riding Cultivator, Price \$32.00.

Although a combined tool when used in either form, a Pivot or Fixed Wheel Cultivator, it is a thorough success, containing advantages over many tools made expressly as a Fixed or Pivot Wheel tool.

The **Wheels** are made of steel, 30 inches high with a broad face tire. $2\frac{1}{2}$ inches wide. They are adjustable in width at any point between 42 inches as the widest and 32 inches as the narrowest. This adjustment allows for the entire cultivation of rows 54 inches apart, and as close as 28 inches or even narrower.

Pivoted Gang Bars.—The gang bars are hinged or pivoted, and the cultivating width can thus be quickly changed by the simple loosening and tightening of two bolts. They are of round bars of steel, with a groove that engages a rib on the tooth holder, thus preventing all danger of turning on the bar, while the eye-bolt firmly clamps the tooth holder to the bar, with no danger of sliding. This combination also gives the facility of changing the position of the teeth on the bar or of increasing or reducing the number.

We call attention to our method of connecting the gangs in front,—a connection of parallel links, giving an easy, swinging motion to the gangs, and at the same time keeping them square to the front, instead of constantly changing the face of the teeth as occurs by the use of the ordinary single coupling. A **Spring Tooth Attachment** may be quickly and easily applied.

Price per set of 8 (including points) \$6.00.

The Improved-Robbins Potato Planter.

PRICE.

With Fertilizer Distributor.....	\$65.00
Without " ".....	55 00
Pea and Corn Sower Attachment.....	5 00
Leveler Attachment.....	85

A machine that is completely and thoroughly successful, Has none of the faults of other planters, and does better work than planting by hand.

The opening plow is a double mold plow which throws out on each side a free furrow of loose soil with no packing or wedging to crowd

the future growth of the crop.

The fertilizer distributor sows the fertilizer in a broad stream 6 to 8 inches wide, in any quantity desired and same is mixed thoroughly with the soil by the shoe preceding the potato tube.

The seed is dropped at 12, 14, 15½, 17, 18½ or 20 inches apart. The change from one distance to another can easily be made by changing of sprocket wheels. The covering is accomplished by means of a pair of discs which cover the seed with a full free covering.

The seed is neither punctured nor injured in any manner while being deposited in the furrow below, so one may rest assured the seed, after it is planted, is in as good condition as when first placed in the machine.

We refer you to these gentlemen who are using them: C. C. Wilcox, Oswego Falls, N. Y.; D. R. Overacre, Salina; Frank Horley, East Onondaga; T. A. Mitchell, Weedsport, N. Y.; Nr. Pendergast, Phoenix, N. Y.

No. 1 "Iron Age" Combined Harrow and Cultivator.

PRICE, \$5.00.

An excellent tool for the cultivation of all small crops. Thoroughly pulverizes the soil without throwing but little dirt.

All believing in level culture should own of these harrows.

Is truly a 20th Century Tool.

Its great adjustability adapts it for numberless uses and conditions.

In each form it is simple, strong and effective.

**BUY YOUR HARDWARE AND WHIPS OF US.
WE SELL THE CELEBRATED BOWKER FERTILIZERS.**

MASTICA, FOR GLAZING

Greenhouses, Sashes, etc., new and old. It is elastic, adhesive and easily applied. It is not affected by dampness, heat or cold.

Every florist has experienced difficulty in obtaining putty (whether ordinary or white lead) for glazing, that is satisfactory for any length of time. The fact is putty is not adapted for greenhouse work. After much study the inventor of "Mastica" decided that the composition must be of different material, and the qualities must be elastic and tenacious to admit the expansion and contraction without cracking. "Mastica," when applied, in a few hours forms a skin or film on the entire mass, hermetically sealing the substance, and preventing the evaporation of the liquids, and remains in a soft, pliable and elastic condition for years. "Mastica" is of great value in going over old houses with a putty bulb or mashing on the outside of sash, as it makes it perfectly tight and saves the expense of re-laying the glass.

Prices of Mastica (soft for machine application)

1/2 gallon, 65c.; gallon, \$1.15.

We are Sole Agents for Central New York.

Mastica Glazing Machine

\$1.00 each.

Strawberry Plants.

We are pleased to announce that we can furnish choice, thrifty Strawberry Plants of all the leading varieties and recommend them to our customers.

Prices are reasonable. Leave orders early.

BERRY BASKETS.

Under the new law all Berry Baskets must be made up to the standard in size. We offer Berry Baskets of correct size and shape and well made. Prices right. Our Baskets fit the Crate perfectly. I can save you money on berry baskets

if you will place orders early. Call and see us before purchasing.

Truck Only, \$8.00;

With Barrel, \$9.50.

With Wheels 1 1/2 Inches Tread.

COBBLER'S OUTFIT.

40c. to \$1.50, according to outfit.

This is something that all farmers should have in their homes—will save you many a shilling in shoe and harness mending.

THE HIGH PRESSURE SPRAYER.

For Potato Bugs.

DIRECTIONS.—Fill one cylinder full of what is required. Close faucet and filler hole tight. Work the pump $\frac{1}{4}$ to $\frac{1}{2}$ minute, then turn the faucet and direct the spray where wanted.

This gives you 15 minutes continuous work with a very fine or coarse spray, narrow or wide spread, as you wish; all controlled by turning the faucet.

Each cylinder will hold two gallons.

This will be the fastest seller yet offered for spraying purposes.

Knapsack Sprayers. Price, \$2.50.

Rapid Work in a Potato Field.

Adapted to the Following Uses.

1. It is best for rapid work and labor saving.
2. For killing potato bugs and insects of every nature.
3. For spraying fruit trees.
4. For spraying field crops of all kinds.
5. For keeping flies from live stock during the summer by spraying with Cattle Fly Killer Oil.
6. For white-washing the walls of poultry houses and cow stables.
7. For spraying tobacco and hops in field.
8. For sprinkling floors evenly with oil or water.
9. As a fire extinguisher.
10. For disinfecting purposes.
11. For greenhouse and nursery work.

Price, \$5.00.

Directions for Applying Dry.

For potato and other vines which require a top application, apply dry with Perfection Shaker at the rate of 12½ pounds or more per acre to an application, according to size and condition of the vines.

For house and garden plants and small shrubs use rubber atomizer or any of the bellows that are on the market for that purpose. Dust the plant thoroughly. The best results are obtained by using when the vines are damp.

Directions for Using in Water] for One Acre.

Add to 12½ pounds of Bug Death 80 gallons water; mix thoroughly; spray on vines with any of the various sprayers that are on the market. We prefer a barrel or knapsack that is fitted with an agitator, otherwise solution must be frequently stirred so that Bug Death is held in suspension. Spray vines thoroughly.

Diamond Edge Tree Pruner.

PATENDED.

The above Pruner is the most powerful Tree Pruner on the market. The strength and power of this tool is wonderful, and the secret of it is that the nut remains where it is turned, for this reason the blades work inside the LINK NUT TIE, thus there is no friction on the head, or nut of the bolt, and the blade always cuts tight to the edge of curved blade and never becomes loose, as on other similar tools.

WHEELBARROW SEEDERS.

WITH RUBBER, WIRE OR TWINE DISTRIBUTORS.
WITH WOODEN OR IRON FRAME.

THEY CAN BE WORKED BY ANYONE WHO CAN RUN A WHEELBARROW.

PRICE, \$6.50 TO \$6.50 EACH.

THE LITTLE GIANT SEED SOWER.

This is the cheapest Crank Seeder on the market, and equal to the best for quality of work it does and durability. Don't pay \$5.00 for a seeder when you can get its equal for less money.

Will Sow Wheat, Rye, Oats, Rice, Flax, Millet, Turnip Seed, Clover Seed, Grass Seed, including Light Grasses; in fact any kind of Seed broadcast. Also Plaster, Fertilizer, Salt, Ashes, etc.

They save one-third seed and two-thirds labor.

CRANK SEEDERS, - - - - -	\$2.00
FIDDLE SEEDERS, - - - - -	1.50

THE EMPIRE COMBINED CORN DRILL, \$18.00.

IS the only corn drill manufactured that has a *positive force feed fertilizer attachment*.

The discharge of corn and fertilizer can be seen at all times by the operator.

The weight is adjusted so as to equalize it and place a large share on the front wheel, relieving the blades and making the weight on the blades nearly the same when box is full as when empty.

It has independent levers to throw both corn and fertilizer attachments in and out of gear, and will drill from 23 to 120 quarts of fertilizer per acre, and drop corn from 8 to 30 inches apart.

Furnished with or without fertilizer attachment, and with wheel or blade covers, as desired.

It has a brush cut-off which guarantees no breaking of grain.

Two plates are furnished with this corn drill, one for large and one for small corn.

WE SELL HARDWARE OF ALL KINDS.

**Every plant set with
water or liquid fer-
tilizer***

AGENTS WANTED—Apply Promptly.

MARCELLUS, N. Y., Aug. 15, 1900.

F. H. EBELING:

Dear Sir—The Plant Setter I used on 35,000 cabbage and tobacco plants and set the plants in the hottest, dryest weather in June, and every plant lived.

This is wonderful, considering the heat and drought, and compared with the work of the horse planter.

It is simply and absolutely perfect.

I would not be without it for \$50.00.

This Planter enables me to set the best plants from the beds, and not sacrifice the smaller, and the method of watering ensures perfect planting.

E. A. CORNWALL.

Send for special catalogues with abundant testimonials and references.

We are sole agents for Oswego, Madison and Onondaga Counties.

HASTINGS, N. Y., Jan. 5, 1900.

F. H. EBELING:

Dear Sir—We, the undersigned have used your Little Giant Setter on tobacco plants the past season, and found it to work perfectly in every respect. We would not do without them for many times the cost. We can fully and honestly recommend it to any wishing to transplant all small plants in all kinds of soil in the dryest weather. It waters and sets at the same time. We would recommend liquid manure when possible in setting.

BUY YOUR HARDWARE OF US.

WOOD, STEEL AND IRON BEAM WIARD PLOWS.

One of the best and latest.

WIARD'S NEW STEEL PLOW, No. 70.

Price, \$13.50.

THE WIARD SWIVEL PLOW, WITH AUTOMATIC JOINTER OR COLTER. Price, \$13.50.

One of the best plows for hillside or flat land and for cutting roots, or use in rough or stony ground.

ONE HORSE SWIVEL PLOW. Price, \$9.00.

DITCHING PLOW. Price, \$9.00.

We have secured for our farmers in Central New York a very low priced Ditching Plow, one that has both handles and draw hook adjustable and can be changed, very rapidly, plowing to the depth of four feet. The ditches can be made with this plow at a cost of from 10 to 12 cents per rod. Hugh Oliver, of Marcellus, N. Y., now using one of these plows, says he would not be deprived of it for \$50.00. It is just the plow for ditching. Price of Plow complete, \$9.00.

MUNNSVILLE PLOWS.

WOOD, STEEL AND IRON BEAMS.

No. 95. This New Reversible Plow is one of the best on the market and will be sold on its merits.
Price, \$13.50 Call and See It.

STEEL BEAM PLOW, No. 10.

This Plow is long on the run with a high Mouldboard, of a shape that insures easy draft, good cleaning qualities, and pleasing general appearance. Although its imitators are many, for general purposes it has never been equaled. Price, \$13.50.

ONEIDA VALLEY CLIPPER, No. 1.

Unquestionably the best plow made. Price, \$13.00.

WE CARRY A FULL LINE OF MUNNSVILLE PLOWS AND EXTRAS.
SPECIAL CATALOGUE FREE. A 100-FOOT ROPE LADDER FOR SALE CHEAP.

ONEIDA VALLEY CLIPPER No. 2 1/2.

This is a light one-horse cast steel plow, adapted to plowing out corn, hops and nurseries. Can be gauged so as to plow to and from the rows. Price, \$9.00 plain. This cut also represents our new 2 1/2 Chilled Plow.

PRICE, \$7.50 PLAIN CHILLED. \$9.00 STEEL.

DUTTON IRON BEAM No. 2. PRICE, \$9.00.

Is a medium size two or three horse plow, and for general purposes has no equal on the market, and always gives perfect satisfaction.

CONTRACTORS AND ROAD PLOW.

For heavy excavating and all kinds of contractor's work. Of interest to all engaged in moving earth, builders and users of Road Machines; to farmers for deep ditching and leveling, and all cases where great strength and capacity for excavating are required.

This is a very substantial and heavy Plow of sufficient strength for the heaviest work.

The Point and Mouldboard are specially designed for digging and loosening the hardest clay, gravel and rocky ground.

The Handles are securely braced and strengthened with steel plates, having loops to protect them when tipped over.

The strong shoe with sloping front is far better and more durable than the wheel commonly used on his class of Plows.

PRICES:

Road Plow with Shoe and Cast Point.....\$14.00. Road Plow with Shoe and Acme Steel Point.....\$15.00.
Without Shoe \$1.00 less.

WIARD SULKY PLOWS.**PRICE, \$28.50.**

This sulky plow is made in the simplest and strongest manner possible, and by the use of levers the plow is guided precisely like a hand plow; and the greatest advantage derived from its use is in plowing lands so hard and stony as to make hand plowing very difficult.

Our method of lifting the plow carries the point backward as the plow is raised, freeing it from obstructions under which it may be caught. The patent flanged wheel gives it a perfectly uniform furrow, and enables the operator to "finish a land" with utmost precision.

The adjustable plate gives the exact width of furrow desired, and the sulky is perfectly balanced for either level or inclined fields.

HALLOCK'S POTATO DIGGER PRICE, \$15.00.

Referr to Edgar Bowen, Onondaga Valley, Asylum for Feeble-Minded Children, E. A. Coville, Split Rock, S. B. Rowe, Camillus, John Oley, Pompey, Geo. Adcock, Fayetteville, Ed. Benscoten, Onondaga Valley, and others who have used these diggers.

PLOWS AND PLOW CASTINGS.

Champion Ball-Bearing Corn Sheller, \$2.50.

THE CHAMPION BALL-BEARING SHELLER

Has no equal. It is the best Sheller on the market, and considering the amount of work it will do, it is the cheapest. Its work is easy, rapid and highly satisfactory. Its unique automatic adjustment, improved shelling disc and telescopic construction are all new inventions, embodying improvements found in no other corn sheller.

FEED CLOVER MEAL.

3 cents per lb. \$2 per 100 lbs.

Ground clover is far superior to cut clover from the fact there is no waste, and every particle rendered digestible, as there are no whole stems or heads as in the case with cut clover; and where poultrymen are obliged to buy green food, clover meal will be found to come nearest to the summer runs of any article on the market.

WE SELL FERTILIZERS OF ALL KINDS.

MANN'S CELEBRATED BONE CUTTERS.

DURABLE AND PRACTICAL.

We offer the best Bone Mill on the market. Fully warranted against breakage for two years. The only machine that will cut green bone fine enough for Bantams and little chickens.

Are absolutely the first bone cutters ever sold to the public, and they are by far the most successful hand or power machine on the market to day for cutting up ground bones.

Nine years of practical use among poultrymen has only served to increase their popularity and prove their necessity.

We Claim That

MANN'S BONE CUTTER is the first bone cutter ever made. Cuts fast, easy and fine. Is strong and durable. Can be operated by a boy or woman. Has the only correct kind of automatic feed. Has the finest steel corrugated knives. Has knives adjustable to cut fine or coarse. Has knives that any one can sharpen. Has the least possible friction. Will duplicate in every part. Will cut the hardest bone in the animal. Is the lowest in price, capacity considered. Will last a lifetime with ordinary care. Is a necessity to the poultryman.
