SEASON 1915

Duncan
Grape Fruit.

NAOMI NURSERIES, Inc.

NAOMI, LA.

SALES OFFICES:

1001 HIBERNIA BANK BUILDING

NEW ORLEANS.

Terms of Business.

Orders, if for immediate shipment, or for trees that are to be held for some weeks after the shipping season opens, should be accompanied by full payment. On orders booked in advance of the shipping season 25 per cent. down, the balance due when the shipping season opens.

To secure safety and prompt acceptance, remittance should be made by Bank Draft, Express or Post Office Money Order, Registered Letter or Prepaid Express.

Shipping directions should be plainly written, and we urge our customers, in all cases, to use our order sheets. We shall be pleased to forward additional ones upon application. Kindly indicate whether shipment is to be made by Freight, Express or Mail. When method of shipment is left to us, or when no directions are given, we will ship according to our best judgment, by such means as we believe to be in the best interests of our customers.

All transportation charges are to be paid by the purchaser, and our responsibility ceases upon delivery, in good order, to forwarding companies; claims for losses or damages must be made upon the latter. We will, however, start a tracer for delayed shipments, if notified, and use every means at our command to secure prompt delivery, or recovery in case of damage or loss.

In ordering trees or plants for shipment by mail, add 15 per cent. to the list price on the smallest size given, to cover cost of packing and postage. We cannot guarantee trees to come up to size specified in list, as only very small specimens can be sent in this way.

Unless instructed otherwise, orders received during the shipping season will be forwarded as soon after their receipt as possible, and orders booked in advance will be shipped as soon as may be after the shipping season opens.

November to March is the best shipping season for all trees and plants. Citrus trees can, however, be shipped at any season of year, but summer shipments must be by express.

Selecting Varieties suited to locality is of the first importance, and can often be more advantageously done by ourselves than by purchasers. We are always glad to aid our customers in their selections, when so desired, and will, upon request, cheerfully furnish additional information in regard to the adaptability or desirability of particular varieties.

Substitution.—We desire to follow our customers' wishes in this respect, and have found that they generally wish us to substitute, to the best of our judgment, in case any varieties or sizes ordered are exhausted. We, therefore, substitute when necessary unless instructed to the contrary.

Printed labels attached with brass wire to everything sent out.

We guarantee all stock sent out to be well-rooted, well-grown, true to name, properly packed, and shipped according to instructions. Our liability under the foregoing guaranty is limited in amount to the original price received.

If, by any possibility, errors should occur, they will be promptly rectified, if claim is made ten days after the receipt of the goods.

All orders accepted subject to stock being unsold. Prices listed in catalogue subject to change without notice.

A Word of Introduction.

The South continues to develop along all lines, agriculturally and horticulturally leading all other sections of this great country of ours. Realizing this, and feeling that there is a field for a nursery conducted along the proper lines and growing trees cultivated and adapted for planting in this vicinity, the Naomi Nurseries, Incorporated, makes bid for your patronage.

Our Nurseries are located at Naomi, Plaquemines Parish, Louisiana, about twenty miles Southeast of the City of New Orleans, on the line of the New Orleans Southern & Grand Isle R. R., and fronting on the Mississippi River, giving the advantage of water as well as rail transportation.

It will be the aim of this Company to supply the very best fruit and ornamental trees, shrubs, palms, roses, etc., for planting in the Southern and Gulf Coast States.

Our business principles may be summed up as follows:

To give our best personal attention to all orders.

To ship goods promptly and insure their reaching our patrons in good condition.

To send out no tree or plant we would hesitate to plant ourselves.

To invite correspondence on any subject pertaining to our business.

To place our services at the disposal of our patrons, and furnish advice and information on anything pertaining to our line.

Citrus Fruits.

The varieties that we list are the ones that have been found best adapted for planting in Louisiana and the Gulf Coast country, which include a few of the standard varieties of Round Oranges, Grape Fruit, Mandarine, Tangerine, Satsuma and Kumquats. We offer trees grown on Trifoliata and Sour Orange stocks.

CITRUS TRIFOLIATA. Is probably the hardiest known species of the Citrus family. It is deciduous in its habits, shedding its leaves and hardening its growth early in the fall, and remaining perfectly dormant until spring. Fruit produced on trees budded on Citrus Trifoliata usually ripens from two to three weeks earlier than on other roots.

SOUR ORANGE. Will be found, all things considered, the most satisfactory stock used. It is adapted to most of our different kinds of soil and does remarkably well in heavy moist soil. It develops an especially deep root system and is a vigorous grower.

Oranges.

SATSUMA.

This is unquestionably the hardiest known orange and this, in connection with its early ripening and fine quality, makes it an exceedingly valuable sort. It is medium size, color deep orange, flesh fine-grained, tender, juicy, sweet and delicious. Tree entirely thornless. Ripens in September, October and November.

Pineapple
Orange.

PINEAPPLE. During recent years this fruit has attained a great amount of prominence. It is of excellent variety. Fruit medium to large, peel thin but tough, very smooth and bright.

MANDARIN. Size medium, deep yellow, flattened, skin thin, flesh dark orange yellow. In Southern Louisiana the Mandarin is planted as one of the most profitable kinds.

PARSON BROWN. Size medium, round or slightly oblong, peel smooth, quality good, keeps and ships well.

WASHINGTON NAVEL. The fruit is large to very large, somewhat oval, flesh meaty, tender, sweet and highly flavored. While this variety does not bear heavily when budded on sour orange roots, it has proven a very prolific sort on Citrus roots.

DUGAT. It is highly esteemed as one of the hardiest varieties and of excellent quality.

BOONE. Size medium, quality good, early variety, strong vigorous growth. By some it is considered better than Parson Brown.

TANGERINE. Flat, small to medium, skin separates freely from the flesh, juicy, aromatic, rich, deep red. Belongs to the Mandarin group.

HOMOSASSA. Size medium, somewhat flattened, skin very smooth, thin, pulp fine sweet and juicy. Keeps and carries well. Vigorous and prolific.

LOUISIANA SWEET, or Creole Sweet. This is the orange "par excellence" for planting in Louisiana. Medium to large size, smooth skin, bright, round. Introduced from the Mediterranean countries many years ago; this variety has become native and is the orange that has made famous Citrus Fruit growing in Louisiana. We strongly recommend a liberal planting of this unequalled variety.

Prices on above listed varieties of Oranges on Citrus Trifoliata stock:

	Each	10	100	1,000
1 to 2 feet.....	\$.35	\$ 3.00	\$ 27.00	\$240.00

Varieties of Hardy Grape Fruit or Pomelo.

Duncan
Grape Fruit.

DUNCAN. A variety that has been more largely planted in Louisiana and along the Gulf Coast than any other. Has proven exceptionally resistant to frost damage, and wonderfully productive. Its fine quality, good appearance, hardiness and prolificness strongly recommend it as the leading variety.

MARSH SEEDLESS. The most generally popular Grapefruit grown. Trees when budded on *Citrus trifoliata* are extremely resistant to the cold,

standing nearly as much freezing weather as Satsuma Orange. Very productive and bears extremely young. The fruit is of most popular size, medium to large, nearly seedless and of exceptional quality and flavor.

TRIUMPH. A strong growing, early fruiting and very prolific variety. Very resistant to cold when grown on *Citrus Trifoliata* roots. Fruit small to medium, matures early, making it particularly valuable.

Prices on Grape Fruit or Pomelo trees on Sour Orange stock:

	Each	10	100	1,000
2 to 3 feet.....	\$.60	\$ 5.00	\$ 45.00	\$400.00

Lemons and Limes.

Lemons and Limes are worthy of the consideration of any one engaging in Citrus Fruit growing. They are popular fruits and are gaining in popularity every year, especially Limes. Trees vigorous, healthy and very productive.

KENEDY LEMON. A most remarkable Lemon, produces annually from 2,500 to 4,000 Lemons, ripening continuously throughout the year. It is a Lemon of good size, large pointed at ends, skin somewhat leathery, tough and comparatively smooth, pulp is full of juice, containing a surprisingly large quantity of fine, spicy, citric acid, keeping qualities excellent, the fruit having been kept in perfect condition for six months. Tree is of a strong, upright growth, coming into bearing at an early age. Every one of the Lower South planting citrus trees should have one of these.

PONDEROSA LEMON. Sometimes called American Wonder. It is exceptionally large, weighing from 1½ to 2½ pounds, very juicy, good quality, rind very thin for such a large fruit. Bears when quite young. It is very valuable as a home fruit.

VILLA FRANCA LEMON. Variety extensively grown in California com-

mercial Lemon Orchards. Medium size, rind smooth, thin and sweet, juicy, acid, very strong and fine quality. Tree vigorous, upright grower, very prolific.

FLORIDA KEYS LIMES. Commence bearing at from three to four years of age, and produce immense crops of limes, ripening during the summer, and often hanging on the trees well into the fall and winter. These limes are becoming a valuable commercial commodity, and as the demand far exceeds the supply, it warrants more extensive planting. Size medium measuring 1½ inches in diameter, usually slightly oblong. A grove of Florida Keys Limes given the same care and attention usually given an orange or grapefruit grove would rival it as a wealth producer.

PERSIAN SEEDLESS LIMES. Of foreign origin. Size large, seedless, skin smooth and thin, very juicy and of good quality. Quite tender.

Prices on Lemons and Limes:

	Each	10
2 to 3 feet.....	\$.45	\$4.00
3 to 4 feet.....	.55	5.00
4 to 5 feet.....	.75	6.50
5 to 7 feet.....	.85	7.50

Seedling Grape Fruit.

We offer Grapefruit trees grown from selected fruit. It was this character of trees that bore the first Grapefruit, and it was through the excellence of this fruit that Grapefruit became famous as a commercial fruit.

Prices:	Each	10	100	1,000
2 to 3 feet, light size.....	\$.30	\$2.50	\$20.00	\$175.00

4 to 5 feet, standard size.....	.45	4.00	35.00	250.00
5 to 7 feet, large size.....	.50	4.50	40.00	300.00

Prices on Sour Orange and Citrus Trifoliata Seedlings:

	Each	10	100	1,000
8 to 12 inches.....	\$.15	\$1.00	\$ 7.00	\$30.00
1 to 2 feet.....	.20	1.50	10.00	50.00
2 to 3 feet.....	.25	2.00	12.00	70.00

Nagami
Kumquat.

NAGAMI. Fruit oblong, golden yellow, pulp and juice sprightly, fine flavor, foliage light, glossy green, thornless.

MARUMI. Bright golden yellow, about one inch in diameter, rind sweet with a pleasant flavor, quality very fine. Fruit round. Ripens two or three weeks earlier than the oblong.

Price of Kumquats Budded on Citrus Trifoliata:

	Each	10	100
6 to 12 inches, extra small size.....	\$.45	\$ 4.00	\$35.00
12 to 18 inches, small size.....	.50	4.50	40.00
18 to 24 inches, light size.....	.65	6.00	50.00
2 to 3 feet, standard size.....	1.00	8.00	70.00
3 to 4 feet, large size.....	1.30	10.00	90.00

Pecans.

The pecan has become a very important nut and due to the fact that this particular nut thrives and produces so well in the Southern and Gulf Coast States, there has been a heavy demand for these trees. There can be no mistake in planting Pecan trees as they are a beautiful tree and every tree planted on your property means an enhancement in value. Large pecan groves are now producing handsome profits for their owners.

CURTIS. Size medium, thin shell, kernel full and plump, rich sweet nutty flavor and of the very best quality. Tree a good grower. A very desirable nut for home use or market.

Delmas.

DELMAS. A large nut of excellent quality; grayish color, shell medium thick, marked with dark specks and streaks; is one of the best commercial varieties. Tree healthy and strong and the earliest bearer of all Pecans.

Frotscher.

FROTSCHER. It is considered one of the largest Pecans; bright yellowish brown; shell very thin. Kernel large and easily removed, and of good quality. Tree a vigorous grower and bears heavy crop; can always be depended on for highly flavored nuts.

RUSSEL. Large or medium size, grayish brown with numerous small black markings. Shell thin, kernel plump and of good quality. A good grower, and bears large and regular crops.

SCHLEY. The finest Pecans grown, medium to large size, shell thin, separating easily from the kernel, bright yellowish brown, rich flavor. Tree a good grower.

Stuart.

STUART. One of the most popular varieties, nuts somewhat short, brownish shell and of medium thickness; good cracking quality. Kernel plump quality very good.

SUCCESS. Large size, color reddish brown, shell thin. It is one of the favorite varieties in Southern Mississippi and Alabama.

TECHE. Large to medium size, bearing at a very early age, producing heavy annual crops. Grayish brown color, shell medium thick, kernel full, base and apex rounded. Quality good.

VAN DEMAN. From $\frac{7}{8}$ to $2\frac{1}{2}$ inches long. Color reddish brown. Shell medium thick, kernel exceptionally good.

Prices on Budded Pecans:

	Each	10	100	1,000
2 to 3 feet.....	\$.80	\$ 7.50	\$ 70.00	\$650.00
3 to 4 feet.....	.90	8.50	80.00	700.00
4 to 5 feet.....	1.10	10.00	90.00	850.00
5 to 7 feet.....	1.50	12.50	120.00	

Japan Chestnuts.

The Chestnut does well in most portions of the South. The tree is very attractive, with handsome foliage, and is used for shade and ornamental purposes as well as for the nuts which it produces. The nuts are considered by some very good, especially when roasted. Bears when tree is three or four years.

Prices on Japan Chestnut from Seed:	Each	10
1 to 2 feet.....	\$.25	\$2.00
2 to 3 feet.....	.30	2.50
3 to 4 feet.....	.50	4.00

Walnuts.

JAPAN WALNUT. The Japan walnut is well worthy of a place in every planting, and no orchard or yard should be without a few of these trees. Trees are of rapid growth, and can be trained into almost any desired shape. The nuts are borne in large clusters, five and six-year-old trees often producing from one-half to one bushel of nuts.

BLACK WALNUT. One of the old native trees of the South. The tree grows to large size, well formed and attractive. The nuts, thick shelled, are rich and sweet.

Prices on Walnuts from Seed:	Each	10
1 to 2 feet.....	\$.25	\$2.00
2 to 3 feet.....	.30	2.50
3 to 4 feet.....	.50	4.00

Figs.

One of the most valuable trees for the Southern garden or yards. No home or garden should be without a couple of these trees. The fruit is pleasant for eating raw and is liked best of all fruit for preserving. The fig canning industry is coming to be one of the leading industries of the South. The tree comes into bearing when very young and will produce heavy crops each year.

BRUNSWICK. Very large fruit, pear-shaped, pulp thick, soft, quality good. Dark brown in color.

BROWN TURKEY. Medium to large, pear-shaped. Dark brown color, flesh white shading to light pink, solid and of excellent quality. A very desirable variety.

CELESTE. Small to medium, pear-shaped, violet-colored. Flesh shading

to light pink at center. Flesh solid, juicy and sweet. This variety is considered the standard variety of fig and is largely planted. This variety is commonly known as "The Sugar Fig" on account of its sweetness and good quality.

MAGNOLIA. Fruit of large size, light greenish color. Tree a vigorous grower and very prolific. One of the best varieties for canning.

Prices on Figs:	Each	10	100	1,000
1 to 2 feet.....	\$.15	\$1.30	\$10.00	\$ 80.00
2 to 3 feet.....	.20	1.60	14.00	120.00
3 to 4 feet.....	.25	2.00	18.00	160.00
4 to 5 feet.....	.40	3.00	25.00	
Extra size, heavily branched.....	.90	8.00		

Plums.

Abundance Plum.

ABUNDANCE. Large to medium size, color greenish yellow, round with pointed apex. Sweet or slightly subacid, with a slight apricot flavor, rich and good. A popular and profitable early plum for planting in Northern sections and in many parts of the South.

BURBANK. Fruit large, rounded and blue-pointed; it is clear rich red, showing yellow dots, juicy sweet, firm, pit small, cling, quality one of the best. Very popular both North and South.

KELSEY. Very large, heart-shaped, color greenish-yellow, nearly covered with reddish-purple; flesh fine, rich and juicy. It is highly recommended.

RED JUNE. Large to medium size, color vermillion-red all over with delicate bloom; very showy, flesh light, yellow, sweet or slightly subacid, pit small, cling; flavor pleasant, quality very good.

EXCELSIOR PLUM. Fruit medium to large, 1½ inches in diameter, nearly round, no suture, color deep wine-red, with thick bluish bloom, and very numerous small dots, when fully ripe the fruit is nearly purplish red; stem short; skin thin; tough, not bitter or astringent; flesh firm, juicy, yellowish with reddish color near the pit; quality excellent; flavor subacid; pit small; cling. Very handsome and a fine shipper.

Prices on Plums Budded on Marianna Plum Stock:

	Each	10	100	1,000
2 to 3 feet.....	\$.18	\$1.50	\$12.00	\$100.00
3 to 4 feet.....	.25	2.00	15.00	120.00
4 to 6 feet.....	.30	2.50	20.00	180.00
6 to 7 feet.....	.40	3.00	25.00	
Extra large trees, heavily branched.....	.60	5.00		

Peaches.

Elberta Peach.

ELBERTA. Fruit is very large, color rich yellow with red cheeks, juicy and of fine quality. Good for shipping, canning or the home. Free stone.

ALEXANDER. Highly colored, flesh greenish-white, juicy and of fair quality.

ANGEL. Size large, slightly pointed, color yellow, flesh white, sweet, very desirable for canning, size large, nearly round. Bears when young and is very prolific.

CARMAN. Fruit large, oval in form. Skin creamy white or pale yellow, flesh tender, juicy and of fine flavor. Trees prolific, free stone.

CHINESE CLING. Round, very large, skin yellowish white washed with red. Juicy and of excellent flavor.

GIBBONS OCTOBER. Large to medium size peach, quality unexcelled, color white tinged with red, flesh white. It is very desirable for the Southern markets and is free stone.

GREENSBORO. Large size, quality good, skin highly colored bright red over yellow. Originated in North Carolina and is being extensively planted in the central South.

HONEY. Size medium, oval shape, skin whitish yellow washed and marbled with red in the sun; rich sweet flavor, quality excellent.

JEWEL. Large to medium size, oblong, flesh yellow red about the pit, juicy, melting sweet, excellent quality. A good shipper. This is the most valuable variety for all tropical and sub-tropical regions.

MAMIE ROSS. Fruit large, flesh white, juicy and of good quality. One of the best for Gulf Coast planting. A regular and prolific bearer. It is esteemed the finest early cling. About June 15.

ONDERDONK. Skin and flesh yellow, large, very juicy and sweet. Originated in Texas. A valuable combination of quality, appearance and productiveness. Free stone.

SNEED. Fruit medium size; somewhat oval in shape, color creamy-white with rich red blush on sunny side. Ripens evenly to pit; flesh white and juicy. Very early, averaging eight to ten days earlier than Alexander.

TRIUMPH. Size medium to large; blooms late, strong grower; skin yellow, nearly covered with red. Flesh bright yellow, free when fully ripe, and of excellent flavor.

WALDO. Fruit medium size, round oblong, highly colored, light yellow, dark red on exposed parts. Free stone. Juicy, melting, sweet, and of excellent quality.

Prices on Peaches:

	Each	10	100	1,000
2 to 3 feet.....	\$.15	\$1.20	\$ 9.00	\$ 80.00
3 to 4 feet.....	.18	1.50	11.00	100.00
4 to 5 feet.....	.25	2.00	15.00	130.00
6 to 7 feet.....	.30	2.50	20.00	
Large special grade.....	.50	4.00		

Pears.

Chinese Sand Pear.

CHINESE SAND. Fruit medium to large size. Yellow. This variety is practically free from blight. Very profitable for growing as a cooking and preserving pear. We recommend this variety.

KEIFFER. Fruit very large, juicy, but a little coarse.

LE CONTE. Fruit very large of oblong shape and of good quality when properly handled. A good eating variety.

Prices on Pears:

	Each	10	100
2 to 3 feet.....	\$.20	\$1.50	\$13.00
3 to 4 feet.....	.25	2.00	17.00
4 to 5 feet.....	.30	2.50	20.00
Larger sizes, heavily branched.....	.75	6.50	

Japan Persimmons.

Tana Nashi Persimmon.

The persimmon is one of the neglected fruits of the Southern States. The tree is well adapted to this section and we list the following varieties which produce abundantly as well as profitably.

TRIUMPH. Of medium size, yellowish-red color, smooth and bright. Tree a vigorous grower and a heavy producer.

TANA NASHI. The best known and most popular variety as the fruit is very large and of conical shape.

Skin light yellow, changing to dark red as fruit matures. A very desirable variety to plant for marketing.

YEMON. Large, flat tomato-shaped. Bright orange yellow, practically seedless.

Prices of Japan Persimmons:

	Each	10	100
2 to 3 feet.....	\$.20	\$1.50	\$13.00
3 to 4 feet.....	.25	2.00	17.00
4 to 5 feet.....	.30	2.50	20.00
Large sizes, well branched.....	.75	6.50	

Quinces.

We only list one variety of Quince (the Chinese), as this is the only variety adapted to the Southern section.

CHINESE. Fruit very large, oblong in shape. Makes fine jellies and preserves. Tree a vigorous grower, reaching large size.

Prices on Chinese Quince:

	Each	10
2 to 3 feet.....	\$.25	\$2.00
3 to 4 feet.....	.35	3.00

Mulberries.

The mulberry is of little value for commercial purposes, although the fruit is very well liked for eating by some people. The mulberry tree, however, is valuable for planting in hog and poultry yards, and will be found to be a very economic means of feeding hogs and poultry as well as a valuable shade.

HICKS. A large, rapid growing tree. Bears profusely, fruit sweet. Trees bear when very young.

WHITE. The largest growing variety, and about the most prolific bear-

er. We recommend this variety for general planting.

DOWNING. A berry of good quality. Tree a rapid grower. Foliage large.

Prices on Mulberries:	Each	10	100
2 to 3 feet.....	\$.15	\$1.20	\$10.00
3 to 4 feet.....	.25	2.00	16.00
4 to 5 feet.....	.30	2.50	20.00
Large specimen trees, heavily branched.....	1.00	9.00	

Pomegranates.

A hardy shrub which can be grown in all sections. Has a profusion of brilliant scarlet flowers. The fruit is very desirable. These trees are in great demand also for ornamental shrubbery and hedges.

PURPLE SEEDED. Vigorous grower, very prolific bearer, seeds wine color, and of good quality.

SWEET. Large, sweet fruit, of good quality. Vigorous grower.

Prices on Pomegranates:	Each	10	100
2 to 3 feet.....	\$.30	\$2.50	\$20.00
3 to 4 feet.....	.40	3.50	30.00

Bananas.

The banana stalks are in great demand for decorative purposes but are also valuable for their fruit. It is particularly desirable on account of its rapid growth.

Prices of Banana Stalks:	Each	10
Small bulbs.....	\$.25	\$2.00
Large bulbs.....	.35	3.00

Guavas.

The Guava is one of our best tropical or sub-tropical fruits. The fruit makes one of the best preserves and jellies and is also excellent as a desert fruit.

Prices on Guavas:	Each	10
1 to 2 feet.....	\$.35	\$3.00
2 to 3 feet.....	.50	4.00

Loquat or Japan Medlar.

Commonly known as Japanese plum. The tree is very handsome, having large dark green foliage, evergreen. Produces large clusters of bright yellow fruit of fine quality.

Prices on Loquats:	Each	10	100
2 to 3 feet.....	\$.40	\$3.50	\$30.00
3 to 4 feet.....	.45	4.00	35.00
4 to 5 feet.....	.60	5.00	
Large trees, heavily branched.....	1.50		

Grapes

A native vine of the South, and well adapted to our soil and climate. Everyone knows the quality of this fruit. Every yard or fruit orchard should have a grape arbor. We list the Muscadine and Bunch type of grapes.

FLOWERS. Has bunches of fifteen to twenty large purplish berries. Ripens in August and September.

JAMES. One of the largest berries of the Muscadine type. Very prolific, of good quality and sweet. Ripens from August until late fall.

SCUPPERNONG. The most extensively planted variety of the Muscadine type. Produces bunches of bronze-colored berries of about ten berries to the bunch. Very prolific and of excellent quality. Ripens in August and September.

CHAMPION. Berries and bunches of medium size. Blue-black in color, a vigorous grower.

CONCORD. Large bunches of blue-black berries, flesh sweet and very tender. Of rapid growth and heavy bearing.

DELAWARE. A small berry, bunches small to medium. Skin red and thin. Quality good, juicy and sweet.

MOORE'S EARLY. An early variety and very much similar to Concord variety in character.

NIAGARA. Produces large bunches of greenish-yellow berries. Flesh sweet and quality good. A vigorous grower and very prolific.

THOMAS. A good variety. Color reddish. Pulp sweet and fine.

Prices of Grapes:

	Each	10	100
1-year-vines	\$.15	\$1.20	\$ 9.00
2-year-vines	.20	1.60	12.00

Hardy Everblooming Bush Roses

The following is a collection of roses that will thrive best in the Southern States, and varieties that are almost continually in bloom.

BESSIE BROWN. Creamy-white, flowers of immense size and great substance; will last longer on the bush in good condition than any other rose we know; free bloomer and sweetly scented.

KAISERIN AUGUSTA VICTORIA. Pure white with shadings of primrose-yellow deeper in the center; a distinct and very beautiful variety.

HELEN GOULD OR BALDUIN. This is a grand rose of very highest merit for the garden; bright watermelon red; very free grower and bloomer. A good all around red rose.

MADAME CAROLINE TESTOUT. This charming rose is in great demand, is always scarce and always will be very hard to get hold of as it is very slow in propagating. Clear, bright satiny-pink; flowers very large and extremely showy, quite distinct.

METEOR. Dark velvety-crimson shaded maroon; a grand garden rose.

WINNIE DAVIS. A glorious Hybrid Tea Rose of remarkably good qualities; it's a seedling from Mme. Abel Chatenay with the rich coloring of Sunrise a veritable sunburst of color.

BON SILENE. Good bloomer, fine buds. Color crimson-rose with sheen of silver.

BRIDESMAID. A grand pink rose for all purposes, not only a good garden rose but forces well. Splendid buds.

CATHERINE MERMET. Light rosy-flesh color; large, full and globular, a charming sort.

DEVONIENSIS. Creamy-white with blush center; semi-double; distinct and good; called the Magnolia Rose on account of the magnolia-like fragrance.

Duchess De Brabant.

Mrs. B. R. Cant.

DUCHESS DE BRABANT. Light rose, shading to salmon; very free bloomer, a good grower.

ETOILE DE LYON. Bright sulphur-yellow; fine form; large size, a fine yellow rose.

MADAME LOMBARD. Bright deep rose, variable in color; large, fine form, good habit, free bloomer; most reliable.

MAMAN COCHET. This is the famous Pink Cochet. Light pink shaded with salmon-yellow, outer petals splashed with bright rose; extremely large and full; fine for cut flowers.

MARIE GUILLOT. Pure white with large buds and open flowers, are as perfect as a Camelia bloom. A rose that does not pink in the garden.

MARIE VAN HOUTTE. Canary yellow, deeper center, the border of the petals tipped with bright rose; a large, full, and fine form, a free and continuous bloomer.

MRS. B. R. CANT. Deep rose on outer petals, inner petals soft silvery-rose suffused with buff at the base. Gold Medal N. R. S.

PAPA GONTIER. Rosy-crimson; fine long bud, most attractive; forces.

Maman Cochet.

PERLE DES JARDINS. Deep straw-yellow, sometimes deep golden-yellow; large bud and full double flower; extra.

SAFRANO. Bright apricot color. Free blooming; hardy for a Tea.

THE BRIDE. Pure white, with a tinge of pink when planted in the garden; large, full and most perfect form; forces.

WHITE MAMAN COCHET. A sport from Maman Cochet with creamy-white flowers, feintly tinged with blush; long pointed buds, opening into large flowers; an exceedingly pretty and valuable variety that can be highly recommended.

PAUL NEYRON. Deep rose; flowers of immense size; indeed many claim this to be the largest rose grown.

Hardy Climbing Roses.

CLIMBING CLOTHILDE SOUPERT. Identical with Clothilde Soupert except that it is a vigorous climber.

CLIMBING DEVONIENSIS. Creamy-white, blush center, full, fine form; distinct and good; fragrant.

CLIMBING MARIE GUILLOT. This rose is also known as President Cleveland and Francis Willard. A white rose of great merit.

CLIMBING METEOR. A grand climber; color velvety-maroon; very free bloomer.

CLIMBING SOUVENIR DE LA MALMAISON. Clear flesh, edged with blush; large; very double; deliciously scented.

CLOTH OF GOLD OR CHROMATELLA. Sulphur-yellow, deeper center; large and double.

LAMARQUE. White shaded lemon, large; very sweet scented; an excellent variety.

MARECHAL NEIL. This is the old standby yellow rose in the South, where it is hardy; indeed it will bloom in any garden, but is not hardy in the

North. Immense deep golden-yellow flowers with the deepest richest tea fragrance of all roses.

REINE MARIE HENRIETTE. Deep cherry-red. This rose takes the lead as a climber from New Orleans to Philadelphia.

Prices on Strong Field Grown Roses:

	Each	10	100
1-year-plants, strong field grown plants.....	\$.25	\$2.00	\$17.00

35 feet apart each way.....	35	40
40 feet apart each way.....	27	31

SQUARE METHOD. Multiply the distance in feet between the rows by the distance the plants are apart in the rows, and the product will be the number of square feet for each plant or hill; which, divided into the number of feet in an acre (43,560) will give the number of plants or trees to an acre.

EQUILATERAL TRIANGLE METHOD. Divide the number required to the acre "square method" by the decimal .866. The result will be the number of plants required to the acre this method.

The Ornamental Homeyard

If you would have an ornamental homeyard you must garnish it with perennial shrubbery, with the velvet of green-sward, with the rare hues and sweetness of flowers; it must wear the air of the well-kept and reflect the owner's prideful taste.

Such a yard borders a home as the setting of wonderful jewels and returns the outlay an hundred fold. It gives joy to the passerby and is the inspiration and admiration of the entire neighborhood. The ornamental homeyard is the acme of well being and well doing. You have read no truer words than these nor none more worthy of following.
