TRADE LIST

FALL 1915

Wyomanock Nurseries

WM. H. HARRISON & SONS
Lebanon Springs, N. Y., U. S. A.

TO THE TRADE

SHIPPING SEASON. April 15th to June 1st and September 15th to November 1st. Stock fumigated if desired. Certificate of inspection placed on every case.

SHIPMENTS are made by express or freight at our judgment, unless otherwise instructed. We do not prepay. Stock travels at purchaser's risk. In loss of shipment our bills must be paid and claim made by purchaser against transportation company.

RESPONSIBILITY. Complaints, if any, must be made on receipt of stock. All stock is in good condition when shipped but we give no guarantee of growth, express or implied, and will not replace lost stock at these prices.

TERMS. All bills are due June 1st and December 1st. Sight drafts issued for all bills still owing July 1st and January 1st. Unknown parties cash with order or satisfactory reference.

PRICES. Prices given are net and subject to no discount. Five at 10, 50 at 100 and 500 at 1000 rates. Less than 5 of a kind at one fifts the 10 rate each. Packing charged at cost.

DECIDUOUS TREES AND SHRUBS

	Size, Feet	10	100	1,000

SOME SPECIALTIES

RHODODENDRON MAXIMUM

This is the finest of all the hardy, broad-leaved evergreens. The rich glossy foliage is almost hidden by the magnificent white and pink-tinted flower clusters in June and July, after other Rhododendrons have passed. It is perfectly hardy anywhere, in sun or shade, no winter protection being necessary. It does best when mulched with forest leaves or lawn clippings and even prefers partial shade and a northern exposure. For massing about buildings or along walks or drives or in woods or bare spots under trees nothing could be finer. No plant in horticulture is better adapted for use as a permanent screen, along bare walls and fences or among rocks and forest plantings.

RHODODENDRON CATAWBIENSE

This has all the good features and hardiness of the Maximum and is adapted to the same locations. The flowers are in shades of rich rose, lilac and purple and are born in great profusion, making a wonderful show of color, contrasting beautifully with the rich, glossy foliage. Grouped in beds and borders with the Maximum it will add a month to the Rhododendron season and give a wealth of color and charm.

AZALEA NUDIFLORA

One of the choicest natives of the mountain woods, making a beautiful show in May with its delicate pink flowers which completely cover the plant before the leaves appear. They give a fine effect in groups and masses, thriving under nearly all conditions but flowering best in partial or full sunlight. As showy as the choicest hybrid Rhododendron.

XANTHORRHIZA APIIFOLIA

This is regarded as the finest of the low-growing undershrubs for planting under trees and along roads and walks or in damp or shady places wherever a low mass of green is wanted. The leaves are finely cut and are very attractive throughout the season and in fall turn bright tints of golden yellow. The small purple flowers appear in April but it is the clean masses of charming foliage for which the plant is so highly esteemed by garden owners.

NOTICE

We wish to call attention of the trade to our supply of

Over 500,000 Vinca Minor

**We carry probably the Largest Stock of Cover-
ing Plants in America**

and solicit orders in quantity for these and for our large stock of
HARDY FERNS
