258 MARKET STREET, SAN FRANCISCO, CALIFORNIA

HARRY E. HALLAWELL, Manager

Telephone Douglas 3147

CULTURAL DIRECTIONS FOR PLANTING OUR BULBS

Spring Flowering Bulbs can be planted from September to December. They require a moderately rich soil which should be well drained. If the soil is in poor condition use a little bone meal or well-rotted manure. Fresh manure is injurious to bulbs. When the soil is heavy or stiff, place a small quantity of sand or coal ashes at the base of each bulb. A good rule to go by is to cover the bulbs with soil one and a half times their own depth.

GENERAL CULTURE DIRECTIONS

DEPTHS AT WHICH BULBS SHOULD BE PLANTED

The accompanying diagram explains the proper depth to plant bulbs. Outdoor planting should be done early in the fall to obtain best results.

Special Bulb Collection

10 Hyacinths, mixed	10 Daffodils, trumpets mixed
15 Tulips, long stem, mixed	15 Spanish Iris, mixed
15 Jonquils, Campenelle	15 Snowdrops, giants
15 Freesias, white	10 Daffodils, double mixed
15 Ranunculus, mixed	15 Anemones, mixed
15 Ixias, mixed	

150 Bulbs for \$2.00

or half collection of 75 Bulbs for \$1.15

WHEN AND HOW TO ORDER BULBS

The best time to order your Bulbs is just as soon as this catalogue reaches you. The Bulbs may not have arrived by then, but your order will be given immediate attention, and be filled just as soon as the stock arrives. At the first of the season there are no sorts sold out, and besides the Bulbs flower better when planted early.

Please be sure to write plainly your full name and address, when sending us your order and remittance. Send also the name of the nearest express office, if bulbs are to come that way, when it differs from the postoffice. We send bulbs by express, unless postage for the different sorts, as shown in the catalogue, accompanies the order.

Non-Warranty

Most of the failures with seeds, plants and bulbs are due to causes entirely beyond our control, such as unfavorable weather, too deep or too shallow planting, slugs, etc.; therefore Hallawell Seed Co. give no warranty, express or implied, as to description, purity, productiveness, or any other matter of any seeds, plants, bulbs, etc., they send out, and will be in no way responsible for the crop; if the purchaser does not accept the goods on these terms they are to be returned at once.

If you wish the bulbs to be sent by PARCEL POST, please add sufficient postage to cover the cost of mailing, excepting where marked postpaid. Under each heading we have marked the approximate weights of the various sorts so that you can figure out the postage due according to the zone. If too much postage is allowed we will adjust by sending extra bulbs.

Hallawell's "Quality" Tulips FOR CALIFORNIA

The Cottage and Darwin Tulips are more satisfactory for California than the early shorter stemmed varieties. The large flowers, which are of great substance, are borne on long stiff stems, 20 to 30 inches tall, and keep in perfect condition for a long time. They bloom in May, and make a splendid effect when planted in a bed or in groups in a hardy border; they are also fine for cutting.

Tulips may be planted from October till late in December. They require a moderately rich soil which should be well drained. If the soil is in poor condition use a little bone meal or well-rotted manure. Plant the bulbs 6 or more inches apart and set the tops 4 inches below the surface. If the soil is heavy, place a small quantity of sand at the base of each bulb. They require very little watering during the winter, but as soon as the buds develop, water freely until through blooming. In the following list you will find the leading varieties, which are certain to give satisfaction.

HALLAWELL'S SPLENDID MIXED

This mixture of Tulips contains many of the following long-stemmed sorts and other new varieties and is made up by ourselves.
30c per doz.; \$2.00 per 100.

Rubra Maxima: splendid dazzling scarlet.....	.35	2.25			

Hyacinths

Hyacinths are very fragrant and come in a great variety of colors. They make a magnificent display when grown outside in a bed. They are also very satisfactory when grown in pots or in glasses of water. We are listing the single type only, as they are far superior to the double, and more certain to bloom. For outdoor culture set the bulbs so that the tops will be 3 or 4 inches below the surface and 6 to 10 inches apart. For pot culture use a 4-inch pot for a bulb or a large pot for 2 or 3 bulbs, and leave the tops of the bulbs just above the surface. After potting give a good watering and set away in a cool place and cover with coal ashes or sand until thoroughly rooted, which takes from 8 to 10 weeks. During this time do not allow them to become dry. They may then be set in a cool light place until the flower spikes have developed, when they may be placed wherever they are wanted.

NAMED VARIETIES OF
HYACINTHS

(If by parcel post add postage at zone rates; weight per doz., 3 lbs; per 100, 22 lbs.)

Roi des Belges: crimson scarlet.....	.75	6.00

SWEET SCENTED JONQUILS

The blossoms are produced in clusters and resemble Daffodils but are much smaller. They are pure golden yellow and very fragrant.

(If by parcel post add postage at zone rates)

	Per doz.	Per 100
Single: the favorite variety; the small blossoms are a rich golden yellow and very fragrant. (Weight per doz., postpaid, per 100, 1½ lbs.)	\$0.15	\$1.00
Campernelle: a larger form of the single sweet-scented. (Weight per doz., 10 oz.; per 100, 4½ lbs.)	.20	1.25
Double: small sweet-scented golden yellow flowers and very double. (Weight per doz., postpaid, per 100, 1½ lbs.)	.35	2.50
Rugulosus: the largest of the jonquils; rich golden yellow; broad perianth with wrinkled cup. (Weight per doz., 1 lb.; per 100, 7 lbs.)	.25	1.50

Daffodils

The following list contains the best varieties. Daffodils bloom in March and April. The blossoms are borne on tall strong stems and are fine for cutting. They bloom freely and are very effective when planted in a border or a bed.

For pot culture, plant 3 or 4 bulbs in a 5-inch pot and leave the tops of the bulbs just above the surface. After potting give a good watering and set away in a cool cellar until thoroughly rooted, when they can be brought into the house. For outdoor culture set the tops of the bulbs 4 inches below the surface and 12 inches apart.

LARGE TRUMPET DAFFODILS

(If by parcel post add postage at zone rates; weight per doz., 1¾ lbs.; per 100, 13 lbs., excepting Emperor, weight per doz., 3 lbs.; per 100, 22 lbs.)

- Powhattan:** fine large rosy purple.

SPANISH IRIS

(Postpaid per doz. and 100)

One of the most satisfactory varieties of Iris to grow, being perfectly hardy. The flowers are of great beauty, having many different blendings of color, and if cut when in the bud state will last a long time in water. For best effect they should be planted in clumps or masses of 25 to 100 or more bulbs set 6 inches apart and 2 to 3 inches deep. They grow 18 to 24 inches high and bloom from end of April on through June.

The following list contains only the long stemmed sorts:

- Belle Chinoise:** deep golden yellow.
- Blanche Superbe:** pure white, yellow blotch.
- British Queen:** large pure white.
- Cajanus:** beautiful deep golden yellow.
- Darling:** large bright blue, long stems.
- Formosa:** deep violet blue.
- King of the Blues:** rich dark blue shading lighter.
- L'Unique:** violet-blue standards, falls white with golden yellow blotch; quite distinct.
- Louise:** fine pale blue, slightly spotted.
- Reconnaissance:** bronze and orange.
- Snowball:** white, slightly tinted blue.
- Solfaterre:** deep purplish-blue and yellow.
- Sophie Jaffie:** finest primrose of all; strong grower.
- Sweet Lavender:** white and pale blue, large flower.
- Mixed White varieties.**
- Mixed Blue varieties.**
- Mixed Yellow varieties.**
- All the above varieties, 15c per doz.; \$1.00 per 100.
- Splendid mixture of all varieties,** 2 doz. for 25c; 100 for 75c; 500 for \$2.75; 1000 for \$5.00.

MOURNING IRIS (Susiana)

(Postpaid)

This is a very beautiful and quite distinct variety growing one foot tall and blooming in May. The large flowers are silvery gray veined with dark chocolate and covered with a network of fine lines. Set the bulbs 3 inches deep and 12 inches apart.

Each \$0.20
Per doz 2.00

Mourning Iris

Japanese Iris
JAPANESE IRIS
(November delivery)

(If by parcel post add postage at zone rates; weight per doz., 7 lbs.)

This variety of Iris produces the largest and finest flowers in a great variety of colors. They are hardy and do best in partial shade and require plenty of water. They bloom for six weeks during June and July. The flowers measure 8 to 10 inches in diameter and are borne on tall stems.

Separate or Mixed colors, in blue, white, purple, lavender, crimson, claret, etc. 25c each; \$3.00 per doz.

ENGLISH IRIS

(If by parcel post add postage at zone rates; weight per doz., 12 oz.; per 100, 6 lbs.)

This variety grows 3 feet tall and has larger flowers than the Spanish Iris and blooms later.

	Per doz.	Per 100

Per doz. Per 100
Andernei: large spikes of pure white flowers..\$0.35 \$2.00
Pink......35 2.50

Sweet Peas

Sow Sweet Pea seed in November and December for early spring flowers. They can also be sown any time during winter or spring for later flowering. The soil for Sweet Peas should be rich and deep. Prepare the ground by giving a liberal dressing of well-rotted manure and bone meal. Sow the seed thinly 1 inch deep; when they are above the ground thin from 6 to 12 inches apart, as the flowers will not be large if the vines are overcrowded. When the plants are well above the trench they should be supported on stout stakes at least 6 feet high on which wire netting has been fastened. During dry weather they should be watered frequently and given an application of liquid manure once a week.

SPENCER OR ORCHID FLOWERED SWEET PEAS

The finest type of Sweet Pea. The blossoms are large and very wavy with long stems, generally having four blossoms to the stem.

	Per pkt.	Per oz.

Flower Seeds For Fall Planting

For more complete cultural directions and descriptions see our General Catalogue

CULTURAL DIRECTIONS—It is better in most instances except hardy annuals to start the seed in shallow boxes about 4 inches deep, using very sandy soil with leaf mould so that it will not bake, and provide for drainage by boring some holes in the bottom of the box. Set the boxes in a warm sheltered place, but protect from direct sunlight, as the seed is liable to be scorched up. When the plants have made the fourth leaf they should be pricked out, reset in another box, or preferably in paper pots, and when well started they should be transplanted into the garden. If the seed is to be sown directly in the garden, it should be done after the soil is well worked and fertilized. A slight depression should be made with a stick, the seed sown, and then covered with sharp sand about twice the depth of the diameter of the seed. The sand will prevent the crusting over of the soil after watering. When the plants are up they should be thinned out. The following varieties of seed should be sown in the open: Alyssum, Calendula, Candytuft, Collinsia, Gilia, Eschscholtzia, Gypsophila, Lupin, Mignonette, Nemophila, Annual Poppies.

Sweet William

Hallawell's Quality Pansies

Pansies thrive best in a partially shaded location, and in a loose soil, well enriched with decayed manure, which should be well dug into the soil. Sow the seed in the fall for early spring blooming. The seed should be sown in boxes, covering them not more than four times their diameter and firming the soil well above them. Do not allow the seed to dry out. The plants must be transplanted twice in order to get the largest flowers; once from the seed box to a sheltered bed and again to the open ground. For best results you must start a good strain. The finest Pansies are, as a rule, shy seeders, which accounts for the difference in price of the various mixtures offered.

GIANT FLOWERED PANSIES

(In separate colors)

- Giant Adonis: soft lavender blue.
 - Giant Bridesmaid: rosy white with dark blotch in center.
 - Giant Crimson King: splendid crimson variety.
 - Giant Emperor William: ultramarine blue with purple eye.
 - Giant Fire King: golden yellow, upper petals crimson.
 - Giant Golden Queen: pure golden yellow.
 - Giant Hortensia Red: old rose color.
 - Giant King of the Blacks: pure black.
 - Giant Lord Beaconsfield: lavender, heliotrope and purple.
 - Giant Madame Perret: dark wine and red, beautifully margined with white.
 - Giant Mauve Queen: rosy lilac.
 - Giant Prince Bismarck: golden bronze.
 - Giant Prince Henry: fine clear purple.
 - Giant Snowflake: pure white.
 - Giant Yellow Spotted: yellow with black eye.
- 20c per packet. Collection of 5 of any of the above sorts, 85c.
Collection of one of each of the above 15 sorts, \$2.00.

PANSIES IN MIXTURES

- Hallawell's Prize Strain: this is a mixture of the giant-flowered varieties, all the plain colors, faced sorts, ruffled edged, and rare sorts; also the varieties exquisitely marbled, striped and blotched. Pkt. of 500 seeds, 50c.
- Bugnot Mixed: a ruffled and five-petaled type, with soft, blended colors and tints, veined on the margins and with a dark blotch at the base of each petal. \$0.25
- Cassier's Giant Mixed: a splendid mixture of various shades and markings. The blossoms are round and are blotched at the base of the petals. .25
- Imperial German Strains Mixed: a fine mixture of choice varieties. .25
- Giant Masterpiece: these pansies have a combination of rich velvety colors and attractive ruffled petals. .25
- Giant Trimardeau Mixed: the largest type of pansies; the top petals are larger than the three lower ones and are beautifully marked; very sweet scented. .15
- Per ¼-oz. .50
- Orchid or Cattleya Mixed: a new mixture in light shades of flesh, orange, rose and lilac, the fluted petals are marked with brown or golden yellow blotches. .25
- Large Flowering Mixed: a mixture of various colors. .10
- Per oz. 1.25
- Striped and Mottled Mixed. .10

Early Scarlet Turnip Radish

LAWN GRASSES

All our Lawn Grass Seeds are re-cleaned and of the very best grade. They can be sown in California any time of the year providing there is plenty of water available. Prepare the ground by digging and fertilizing thoroughly with well-decayed manure and then rake the surface smoothly. Scatter the seed evenly and rake it in so that it will be covered lightly. After sowing, the ground should be rolled in order to press the seed firmly into the soil. Water daily until well started. One pound of seed is required for 250 square feet of lawn. If wanted by mail add sufficient postage to cover cost of same.

Kentucky Blue Grass: Fancy; extra clean; the most popular grass for lawns. It is dark green and of dense growing habit, making a beautiful turf in a heavy or black soil. Per lb., 25c; per 10 lbs., \$2.25; per 100 lbs., \$20.00.

Shady Nook Mixture: This mixture contains grasses for making good lawns in shady places and under trees. Per lb., 50c.

Hallawell's Evergreen Lawn Mixture: A mixture of several deep green grasses which makes a thick sturdy lawn, remaining green both summer and winter. It is especially adapted for heavy or black soils. Per lb., 35c; per 10 lbs., \$3.25; per 100 lbs., \$30.00.

Pacific Rye Grass: This grass is similar to the Australian Rye Grass, but has a finer leaf and is longer lived. Per lb., 25c; per 10 lbs., \$2.25; per 100 lbs., \$20.00.

White Clover: Of dwarf habit with creeping stems, rooting at the joints, on which account it makes an excellent turf that stands constant tramping. Planted for a lawn either alone or in mixture with grass seed. Price per lb., 60c.

Australian Rye Grass: A very vigorous, quick-growing lawn grass, but a little coarse. Very satisfactory for lawns in San Francisco. Per lb., 15c; per 10 lbs., \$1.25; per 100 lbs., \$10.00.

Golden Gate Lawn Mixture: This mixture of hardy grasses contains a little white clover and forms a thick strong turf that will stand hard usage. Per lb., 25c; per 10 lbs., \$2.00; per 100 lbs., \$18.00.

PAPER FLOWER POTS

Neponset. Just the thing to start your plants in. Will not break in sending. Ship nested together.

TRANSPLANTING TROWELS

Narrow blade; handy for planting out bulbs. 15c each.

(If ordered by mail add postage at zone rates; weight 5 oz.)

PREPARED HOLLAND FIBRE

For growing bulbs in vases and bowls without drainage.

DIRECTIONS—The bulbs are potted the same way as in ordinary soil, just showing their tops. It is not necessary or desirable to press the fibre tightly, otherwise the roots do not work freely, and bulbs have a tendency to push themselves upwards. Once potted, they require hardly any attention, only great care should be taken to keep the compost moist, but on no account must it be sodden or too wet. After potting set in a cool dark place for about eight weeks, after which time they may be brought to the light.

2 lbs. for 25c; 4 lbs. (one peck) for 45c (postage additional);

2 lbs. sufficient for about three 6-inch pots.

High Grade Fertilizers

The Pacific Guano & Fertilizer Co.'s Lawn Dressing: For lawns use 2 to 3 pounds to 100 square feet. Sprinkle the lawn lightly after applying fertilizer. Potted plants should be given not more than 1 to 3 teaspoonfuls per cubic foot of soil; shrubs from ½ to 1 lb., according to size of shrub. 10 lb. bag, 60c; 25 lb. bag, \$1.25; 50 lb. bag, \$2.00; 100 lb. bag, \$3.50.

Bone Meal: 5 lbs., 25c; 50 lbs., \$1.50; 100 lbs., \$2.50.

Pure Ground Blood and Bone Meal: Finely pulverized; excellent for rose-culture. It decomposes very rapidly, and is more quickly effective than the coarser grades. It is excellent for mixing with the soil for potting. 5 lbs., 25c; 50 lbs., \$1.75; 100 lbs., \$3.00.

Wizard Fertilizer: For lawns use 1½ lbs. to 100 square feet. For potted plants use a teaspoonful to every 2 quarts of soil. 2 lb. cartons, 25c; 25 lb. bags for \$1.50.

SUPERB COLLECTION
