ANDORRA NURSERIES

WM. WARNER HARPER, Proprietor

CHESTNUT HILL, PHILA., PA.

“THE ANDORRA WAY”

When we consider that one of the biggest costs in the production of nursery stock is for the trained labor that goes into the various operations necessary in growing small plants to large salable sizes, for instance the careful training, hand-pruning and frequently transplanting,—then it must be clear that the intrinsic worth of nursery stock is dependent directly on the amount of labor which has been intelligently expended on it.

“THE ANDORRA WAY” of planting wide apart, frequently and carefully transplanting and training produces not only a fine top, but a vigorous compact system of fine fibrous roots which better enables a plant to withstand the shock of transplanting.

Therefore we are confident that discerning buyers in any comparison of our stock with others' will take into account what they are getting in the way of general thrift and fine root systems together with handsome well-developed tops. The common practice of listing nursery stock merely by height gives no real measure of whether the stock was grown closely together and never transplanted or whether it was grown

“THE ANDORRA WAY”

PLANTING FOR IMMEDIATE EFFECTS

It often happens that a problem presents itself where large Evergreens, Trees and Shrubs are required which can be satisfactorily transplanted and produce an effect of permanence at once whether as large specimens on lawn or avenue, for high screen and boundary planting, for formal garden or naturalesque plantations for the convenience of those who require

*EXTRA LARGE EVERGREENS
AND TREES*

For successful transplanting, we have marked with an asterisk those varieties which are above the sizes ordinarily offered. We especially invite the inquiries of those who may have in hand such plantings of large trees, as we may be able to offer suggestive lists from our stock if we know better the conditions defining your problem.

ANDORRA NURSERIES

Proprietor

Chestnut Hill

Philadelphia

ANDORRA NURSERIES

Chestnut Hill, Philadelphia, Pa.

OUR NURSERIES are extensive, covering a thousand acres of which over six hundred are planted with trees and shrubs. They are easy of access, as Chestnut Hill is the terminus of branches of the Pennsylvania and the Philadelphia & Reading railroads, and the Chestnut Hill (City Line) trolley runs from the stations to within three minutes' walk of the Nurseries.

QUALITY.—The trees and shrubs offered are grown in open, unsheltered ground, in a very exposed situation, which insures their hardiness, and on soil admirably adapted for forming robust plants having an abundance of roots. Special attention is called to the fact that our stock is grown a good distance apart in the rows, insuring heavier trees and shrubs than are generally offered.

SHIPPING SEASON opens about March 1 in the spring and August 15 in the fall.

INSPECTION AND FUMIGATION.—Our stock is regularly inspected and certificate will be sent with each shipment. Stock will be fumigated when requested or when the State laws require it.

TERMS AND CONDITIONS

ORDERS.—All orders are accepted subject to the following terms and conditions. Write plainly and give explicit directions as to address and mode of shipment.

STOCK SELECTED by customers at the Nurseries will be charged according to the value of the trees chosen.

QUANTITY.—Lots of 5 and 50 will be furnished at the 10 and 100 rates respectively.

PRICES given in this list are for the goods f. o. b. here, all packing charges included.

PACKING.—All goods are thoroughly packed, thus avoiding risk, if delayed in transit. All packing charges are included in our list prices.

FORWARDING.—Shipments will be forwarded exactly as directed; but when without instructions, we will use our best judgment and forward by shortest and safest route. We recommend all herbaceous plants be shipped by express.

RISK.—All goods are at purchaser's risk after they are delivered to the forwarding companies and we receive their receipt for the shipment in good condition.

CLAIMS for damage while in transit must be made to the delivering company. Have delivering agent note the damaged condition on the freight bill and present your claim through him promptly.

GUARANTEE AND CLAIMS.—All goods are guaranteed true to name, full count, up to grade, and in good condition when shipped. Any plant proving untrue to name will be replaced. Claims to receive consideration must be made within five days after receipt of goods. We give no guarantee of the life of stock.

TERMS, CASH WITH ORDER, except to persons who satisfy us as to their responsibility, when accounts will be due in 30 days.

EVERGREEN TREES

For many years we have made a specialty of growing Evergreen Trees. Our Nursery soils are particularly well adapted to the formation of the fine fibrous feeding roots, and, at the same time, the soil is of such a consistency that our frequently transplanted trees, with their masses of fiber, retain the soil in compact balls when the trees are lifted for transplanting, and they do this without the soil packing hard as is often the case when evergreens are lifted from heavy clay land.

We want to especially emphasize the importance of the transplanted tree and the frequency with which our evergreens are transplanted in the Nursery. In no other way can the proper system of fibrous roots be obtained, and they are the all-important item when transplanting the trees you purchase, to secure a satisfactory growth.

5 to 6 ft.	4 00	37 50

IMPORTANT—We want to especially emphasize the importance of the transplanted tree and the frequency with which our evergreens are transplanted in the Nursery. In no other way can the proper system of fibrous roots be obtained, and this is the all-important item to secure a satisfactory growth when transplanting the trees you purchase.

SCREEN AND WOODLAND PLANTING

Almost every property has some need of a heavy planting. For a boundary screen, a windbreak, a woodland effect, or to refurnish where the trees are thinning out. For these purposes the **White Pines** and **Hemlocks**, together with Tulip Tree, Red and Sugar Maples, Red, Chestnut and Black Oaks, will give good planting combinations, supplying trees of lasting qualities, rapid growth and much beauty in form and foliage. Such plantings are particularly needed in the sections where the chestnut blight is taking out one of our most popular forest trees, and where the need for re-forestation is imperative.

Along the edges of all such plantings, and in the open spaces through the woodland, much beauty can be obtained by fringing the taller plantings with the dwarfier trees and strong-growing shrubs. For this purpose the following will be found desirable: The White and Pink-flowering Dogwoods, Sorrel Tree, Tataricum Maple, Japan Dogwood, Red Bud, *Cornus Mas* the native Viburnums, Huckleberry, Shining Sumac, Rhododendrons, Laurels, native Azaleas, and other shrubs of like character.

Rhododendrons at Andorra.

RHODODENDRONS

HYBRID VARIETIES—ANDORRA-GROWN

Our offering of Rhododendrons consists of many thousand plants, in fifty varieties, and in a range of sizes from one to five feet. These are acclimated—*Andorra-grown* stock—in the hardiest varieties. They are grown in open, unsheltered ground, with northern exposure, and the wind-swept hills of Andorra are not kind to anything of a tender nature, so that you may depend upon Andorra-grown Rhododendrons being of the hardiest, and supplied with excellent balls of fibrous roots.

CULTURAL DIRECTIONS FOR RHODODENDRONS

Rhododendrons, to secure the best effects, should be planted in combination with other things. If along the woodland or in heavy boundary plantings, the Hemlock, the White Pine, the Dogwood, native Viburnums and plants of like character tend to break up the monotony of heavy masses of Rhododendrons of the same form and texture; and, where the plantings are more confined, as about the base line of buildings, and in nooks and corners of the garden, the Dogwood, the *Cornus mascula*, Kalmia, ferns of different varieties, stronger-growing perennials, and last, but not least, the hardy little shrub, *Abelia rupestris* all can be used to secure most pleasing effects.

The great decorative value of Rhododendrons is now fully recognized, every year increasing their popularity, and among evergreen shrubs none are so largely planted or give such general satisfaction. The magnificent coloring of the huge clusters of flowers in almost every shade of color gives them first place among evergreen shrubs, and one must not lose sight of the great decorative value of the rich, dark green foliage, attractive not only in summer, but during the bleak months of winter.

In a Rhododendron planting the importance of securing American-grown stock of the hardiest type cannot be over-estimated. We carry over *thirty thousand* plants, in fifty varieties, most carefully selected, and our stock, grown on open, unsheltered hills, with northern exposure, insures absolute hardiness. Rhododendrons will thrive in any but a limestone or heavy clay soil; the ideal treatment being a light, sandy loam, well mixed with woods earth. VISIT ANDORRA during the latter part of May and the early days of June, when our great fields of Rhododendrons are in full bloom.

TRANSPLANTING

ITS IMPORTANCE

“Transplanting” is replanting or root-pruning for the purpose of preparing the trees for the purchaser who does the final planting. The Andorra Way does it so frequently and so skillfully that larger and better developed specimens can be satisfactorily used for immediate and mature results. (Ordinary nursery transplanting is not “The Andorra Way”).

The Andorra Way

is to grow, train and frequently transplant Trees and Shrubs so that unequalled specimens are produced which give quick, satisfactory effects.

Many desirable trees, seldom prospering under ordinary handling, succeed readily by The Andorra Way. Superb Tulip trees, robust Lindens, quick growing Pin Oaks, and sturdy Norway Maples, are here in transplanted large sizes, to make landscapes of beauty in months rather than in years.

The best shrubs admirably supplement the best deciduous trees in the Andorra Way. To see them all at the nursery, any time in the year, is worth while. Write if you cannot come. Our experience and unmatched stock are at your command.

Specimen Norway Maples in Wide Rows.

DECIDUOUS TREES

Large trees have been in demand for many years as purchasers wish quick results. In a great measure the difficulty has been to secure a large tree that would grow as satisfactorily as those of smaller size, the difficulty having been that the Nurseries did not transplant their trees as they came to a larger size, and, therefore, failed to have them supplied with fibrous feeding roots when they were sent out.

Appreciating the demand for a perfect tree in a large size we have for years devoted great care and large sums of money transplanting trees in unusually large nursery grades, and our customers can depend absolutely upon receiving, with any of the large sizes offered in this list, a root system which makes it practical and desirable to secure the large sizes and get immediate results.

Measurements are given as follows: Height is taken before digging, from the surface of the ground to the top branches, where they round off to form the top; diameter of stem, or caliper, is taken 6 inches above the ground, above the collar. Measurements are expressed thus: 10 to 12 ft. (height), $2\frac{1}{2}$ to $2\frac{3}{4}$ in. (caliper).

The Red-flowered Dogwood offered here are a handsome lot, grown well apart, frequently transplanted, now perfect, symmetrical specimens, which will lift with their entire root system. The Red-flowering Dogwood is one of the most beautiful of ornamental trees, being a distinct contrast to the native white Dogwood in its spring bloom and retaining all the desirable characteristics of the parent plant; hardiness, rich fall-coloring foliage and fruit.

BECHTEL'S DOUBLE FLOWERING CRAB APPLE

One of the most ornamental of recent introductions and a flowering Apple deserving of a place in every garden. Planted as a specimen or in the border with other strong-growing shrubs, it makes an ideal tree. It is of good growth, with dark, rather glossy, foliage and beautiful double flowers of delicate blush, or shell-pink color and highly fragrant. See page 37.

European Linden.

Few trees are as deserving of their popularity as the small-leaved European Linden. While not the most rapid it is a good grower—very symmetrical—clean stems, and most attractive dark foliage.

TILIA Americana. American Linden or Bass-		Each	10	100

Planting for Immediate Effect

In these days when the planting problem is usually one of quick results, the question is not only one of large size of stock, but the vital question is high quality in stock, without which large size is worse than useless.

To this end we have developed our large stock through years of Nursery Training—by frequent transplantings to produce fibrous-feeding roots—by constant, intelligent cultivation and pruning to instill the utmost vigor.

Thus we have produced **Andorra Quality**—large sizes that thrive after transplanting. You have our interest in your problems at all times. Consult us freely.

DECIDUOUS SHRUBS

As the public are requiring larger specimen Shrubs from year to year, our stocks are grown in wide rows, the individual shrubs set well apart in the row, as by this method we secure a substantial bush in proportion to its height and one which carries its branches and foliage close to the ground.

AZALEAS, ANDORRA-GROWN

NATIVE SPECIES.

* 3 to 3½ ft.	50	3 00	20 00
ILEX <i>Sieboldi</i> . Red-fruited. 3 to 4 ft....♦..	2 50	22 50	
* 4 to 5 ft.♦..	3 50	32 50	
<i>Sieboldi</i> . White-fruited. 1½ to 2 ft.♦..	2 50	22 50	
* 2 to 2½ ft.♦..	3 50	32 50	
Special attention is called to the above varieties of <i>Ilex Sieboldi</i> , Red and White Fruited. Among our plants with brilliant Fall and Winter Fruits, these varieties stand out prominently. The Red-fruited type has a berry as brilliant as <i>Ilex verticillata</i> and carried in much greater mass. The White-fruited sort, while not quite so prolific in fruiting, has an ivory-white berry quite distinct from other Fall fruiting shrubs.			
<i>verticillata</i> . Winter Berry—			
2 to 2½ ft. Bushy	\$0 50	\$3 50	\$25 00
2½ to 3 ft. Bushy	75	5 00	30 00
ITEA <i>Virginica</i> . 2 to 3 ft.....	35	3 00	20 00
3 to 3½ ft.	50	3 50	30 00
JASMINUM <i>nudiflorum</i> . Yellow Jasmine—			
12 to 15 in.	25	2 00	15 00
KERRIA . See <i>Corchorus</i> .			
LESPEDEZA <i>bicolor</i> . 3 to 4 ft.....	35	2 50	
<i>Sieboldi</i> ; syn., <i>Desmodium Japonicum</i> —			
Heavy clumps	35	2 50	

A RE-PRINT FROM THE "NATIONAL ARCHITECT"

This is of special interest to owner, architect or landscape architect who may be interested in the planting of large Evergreens and Trees for immediate effect.

See page 82.

HARDY HERBACEOUS PLANTS

Size of Plants. We aim to send out only extra-strong plants of the different sorts—plants that will give a fair return of bloom the first season. These cost but little more than the small plants so widely offered, and our customers find it more satisfactory to use Andorra-grown stock, which gives results. It has been well said, "The lowest prices are not always the cheapest, as cheapness does not consist in what you pay, but in what you get for what you pay."

	Each	10	100

FERNS

- ADIANTUM pedatum** (Maidenhair Fern). 1 to 2 ft. Moist, shaded positions.
- ASPIDIUM acrostichoides** (Christmas Fern). 1 to 2 ft. Evergreen. Dry or moist soils in shady places.
- Felix-mas** (Male Fern). 2 ft. Semi-shaded positions, dry or moist soils.
- Goldianum**. 2 to 4 ft. Semi-shaded positions, dry or moist soils.
- marginale**. Evergreen. 1 to 2 ft. Shaded positions, dry or moist soils.
- ASPLENIUM Filix-fœmina** (Lady Fern). 2 to 3 ft. Open or shaded positions, in moist or dry soils.
- BOTRYCHIUM Virginianum** (Moonwort). 6 to 12 in. Shaded positions, moist or dry soils.
- DICKSONIA punctilobula** (Boulder Fern). 2 to 3 ft. For open positions; forms large plantations.
- ONOCLEA sensibilis** (Sensitive Fern). 1 to 2 ft. For open planting and wet soils.
- Struthiopteris** (Ostrich Fern). 2 to 4 ft. For open positions, dry or moist soils.
- OSMUNDA gracilis** (Flowering Fern). 2 to 4 ft. Open or shaded positions, and moist soils.
- Claytoniana**. 2 to 5 ft. For open plantings, dry or moist soils.
- cinnamomea** (Cinnamon Fern). 2 to 5 ft. For open or shaded positions, in wet soils.
- WOODSIA obtusa**. 6 to 12 in. Shady places, in moist soil.
- WOODWARDIA angustifolia** (Chain Fern). 1 ft. Open or shaded positions, in moist soils.
- The above varieties, 25 cts. each, \$2 per 10, \$15 per 100.
- The above, 15 varieties, \$3.50, or 100 in 5 varieties, our selection, \$13.50.

TREES AND SHRUBS FOR HEDGES

We shall be pleased to name special prices for plants in large quantity for hedging purposes. Prices per hundred are given on pages indicated.

EVERGREEN TREES

The following are only a few of the varieties that may be used for the purpose, but the list covers the most popular. We ask particular attention to the Hemlock, *Tsuga Canadensis*, which is one of the most popular and at the same time one of the most satisfactory evergreens for hedging purposes.

	PAGE		PAGE
<i>Picea excelsa</i>	9	<i>Thuya occidentalis</i>	15
<i>Retinospora plumosa</i>	13	<i>Thuya occidentalis Wareana</i> ...	16
<i>Retinospora plumosa aurea</i>	13	<i>Tsuga Canadensis</i>	16

DECIDUOUS TREES

A few of the most desirable trees adapted for close planting for hedges are as follows. We call particular attention to the Cockspur Thorn, *Cratægus Crus-galli*, which makes a magnificent defensive hedge. Strong growth, beautiful foliage and adaptability to trimming place it in the front rank of trees for hedges.

	PAGE		PAGE
<i>Carpinus Americana</i>	30	<i>Cratægus Cordata</i>	32
<i>Carpinus Betulus</i>	30	<i>Cratægus Oxyacantha</i>	32
<i>Cratægus Crus-galli</i>	32	<i>Fagus sylvatica</i>	32

EVERGREEN SHRUBS

There is no doubt that the Boxwood stands first among evergreen shrubs for hedge purposes. The plants we are offering are home-grown, therefore thoroughly acclimated, and will give excellent results. They should not be compared with the freshly imported Box upon which you have to take the risk until it is acclimated.

	PAGE		PAGE
<i>Azalea amoena</i>	17	<i>Ilex crenata microphylla</i>	20
<i>Buxus sempervirens</i>	18	<i>Mahonia aquifolia</i>	20
<i>Buxus sempervirens suffruticosa</i>	19	<i>Mahonia Japonica</i>	20

DECIDUOUS SHRUBS

Of the following the *Berberis Thunbergii* will make the lowest and closest hedge. Next would be the *Ligustrum Regelianum*, but both of these sorts will carry their branches and foliage right down to the ground. Of the other varieties the *Ligustrums* lend themselves readily to shearing for formal hedges, while the *Hibiscus* should be planted where the freer growing hedge is desired and the other sorts should be used where free-growing, untrimmed hedges are wanted.

	PAGE		PAGE
<i>Acanthopanax spinosa</i>	43	<i>Ligustrum Ibotæ, Regelianum</i> .	50
<i>Berberis Thunbergii</i> and <i>vulgaris</i>	44	<i>Ligustrum ovalifolium, vulgare</i> .	50

OUR CATALOGUES

**The New Catalogue is referred to on
the last cover page**

DISTINCTIVE TREES AND PLANTS.

An attractive booklet beautifully illustrated and descriptive of a number of charming Evergreens, Trees and Shrubs that are worthy of your better acquaintance.

A CALENDAR OF HARDY PERENNIALS.

In planning a garden or hardy border, it is most essential to know exactly the period of bloom of each plant, the color and height. Our "Calendar" will give you this information together with special lists of Iris, Phlox, Peonies and Chrysanthemums.

A RE-PRINT FROM THE "NATIONAL ARCHITECT."

This is of special interest to owner, architect or landscape architect who may be interested in the planting of large Evergreens and Trees for immediate effect.

PLANTING INSTRUCTIONS.

The finest plant grown will fail unless properly planted and given good after care when it reaches your hands. To secure the best results these instructions will prove invaluable. A copy is sent with every order.

THE ANDORRA HANDBOOK.

A beautifully illustrated descriptive guide to Trees and Shrubs with articles on their culture, pruning and place in planting. Price, 50 cents; and we are pleased to credit the amount on the first purchase amounting to \$5.

SPRING AND FALL PRICE LISTS.

This Price List is revised semi-annually so as to conform to our actual stock records and is published for the convenience of large users of nursery stock. We are not jobbers but the largest nursery growing high-class stock for discriminating buyers.

SUPERIOR FERTILIZERS

For the Lawn, Garden or Farm

PRICES NET F. O. B. SHIPPING POINT

CANADA UNLEACHED HARD-WOOD ASHES

Are a complete fertilizer, replenishing worn-out soils, and, for the lawn or pasture, are economical and valuable. For the lawn, they are easy to handle, produce no offensive odors, are not unsightly, and, quickly leaching into the soil, the chemical properties are at once available for plant food.

Our ashes are selected only from the hard-wood districts of Canada, are carefully screened, and put in convenient packages. Apply at the rate of 1,000 to 1,500 lbs. per acre for top-dressing, or 2,000 to 2,500 lbs. for new lawns.

100-lb. bag	Ton (2,000 lbs.)	Cars, 15 to 20 tons in bulk
\$1 75	\$20 00	At special prices

PREPARED LIME

Where soils, from constant applications of manure, are sour and need a fertilizer to sweeten them, lime is a valuable agent. It quickly puts the soil in condition to assimilate plant-food. It frees the potash, phosphoric acid and nitrogen already in the soil, and turns the nitrogen into the rich nitrates valuable for plant use.

Our prepared lime is fresh from the kilns, clean, well burnt, thoroughly decarbonized and especially prepared, so that it will go three times as far as the lump lime generally used, and is fine enough to run through a drill. Use 500 lbs. per acre.

100-lb. bag	Ton	Cars, 12 to 25 tons
\$1 50	\$13 50	\$12 50 per ton

FIBROUS PEAT

We have on hand a stock of carefully selected peat, suitable for potting or planting Rhododendrons and shrubs that need such soil. Sack of about 100 lbs., \$1.50. In sacks, \$20 per ton.

PURE GROUND BONE

A brand of excellent quality. Analysis on request.

200-lb. bag	Ton	Cars, 15 to 30 tons
\$4 00	\$37 50	Special price.

"Suggestions for Effective Planting"

This Booklet embodies an original and distinctive idea. For the convenience of those interested in any of the many varied planting problems we have arranged our catalog of Evergreens, Trees, Shrubs and Plants, by grouping together those plants best adapted for particular uses, as for instance, evergreens for formal effects; trees for screens and windbreaks, flowering shrubs for mid-summer effects, and so on.

We believe it will prove a valuable aid to our patrons.
