Send remittance by P. O. Money Order and state plainly address and how you wish to have them sent, express—if by parcel post add cost of postage.

Norristown, Pa., January 8th, 1916.

Now for a progressive, prosperous bigger and better year than ever. Which will it be? Just what you and I will make it. My resolutions for 1916 are to give you better, bigger and finer services than ever before, to be ready with a larger and greater number of varieties of trees, of Hardy Flowers, of Hardy Roses, of Evergreens, in fact of everything that can be used to make the Home Grounds more beautiful.

I thank you for the many orders given me the past year, I appreciate them, they helped me grow, and I trust you will continue to favor me with your orders in this year, and I will do my utmost to please and give you satisfaction.

Please place all orders as early as possible, especially for Spring as the weather regulates our work very materially and it is very trying when all orders come late and at one time.

When sending orders for small amounts please send cash with orders as we cannot open book accounts for 50c, 75c, or even 1 or 2 dollar items and especially when goods of such amounts go into other States. State plainly how you wish your goods shipped, by Freight, Express, or Parcel Post. If by Parcel Post, postage must be added to amount of bill.

Awaiting your early and plentiful orders, I beg to remain,

Yours Faithfully

Hardy Phlox

AMONG hardy perennial plants no class is of more importance than the Phloxes, succeeding in almost any soil and position, and flowering through a long season and while they continue in good condition and flower freely for many years without attention, yet they respond quickly to and are improved by liberal cultivation. Time of blooming June, to frost.

Twelve Beautiful Hardy Phloxes of Recent Introduction.

The following varieties, all recent introductions, embrace not only new shades of color, but also form plants of strong, sturdy yet compact habit of growth which place them among the most desirable sorts, particularly for massing in large numbers.

Antonin Mercie. Light ground color, one-half of each petal suffused bluish-lilac.

B. Comte. Brilliant rich French-purple, very choice and rare.

Braga. Mauve-rose, more or less suffused with salmon; large white eye; a distinct and pleasing color combination.

Coquelicot. A fine pure scarlet, with crimson eye.

Egan. One of the finest Phloxes yet introduced, and while the individual flowers, according to color chart, are of a delicate lilac, illuminated by a large bright solferino eye, the color effect as a whole is a pleasing shade of soft pink flowers, 9 inches high by 7 across, and the individual flowers are the largest known to us, frequently measuring 1 3-4 inches in diameter.

Gefflion. A new color in Phloxes, a tender peach-blossom pink with bright rose eye, flower and truss very large, on erect sturdy but compact stems.

Rosenberg. Bright reddish-violet, with blood red eye; individual flowers as large as a silver dollar.

Widar. Light reddish violet, with a very large white centre, which intensifies and illuminates the color, best grower.

Europa. A white variety, with a decided crimson-carmine eye. The individual flowers and trusses are very large, entirely distinct; of remarkable sturdy, erect habit.

Frau Anton Buchner. The finest white yet introduced, having the largest truss and individual flower; dwarf habit.

Tragedie. Deep brilliant carmine with blood-red eye.

Wanadis. Entirely distinct, a mottling of white and light violet.

Price of these Twelve Strong Field grown plants 50c each; per doz. \$5; \$35 per 100. One year old plants, 30c each; \$3 per doz.; \$25 per 100.

Paeonias.

Hardy flowers of many varieties we have on hand all the time and we are able to fill good size orders. In Phlox we make a specialty and raise them in large quantities, but like other herbaceous plants we do not try to list all the varieties, so please do not hesitate, but send us your list of wants and we will quote you prices.

Paeonias are becoming ever more popular. Their period of blooming has been greatly increased with varieties that bloom early in May and are followed up by others that keep coming into bloom till the middle of June giving a wealth of flowers and in the most desirable color. In size they are vieing with the great Chrysanthemum. and as they are of easy culture every garden whether large or small can afford to give room to one or more of these stately Paeonias. Come to the Nursery in Paeonia time and see them at their best when in bloom.

The following are the names of the kinds we have growing in our Nursery, Festiva Maxima, Sea Breeze (anemone type) Multabilis. Dr. Britanneous, Delachii, Edulis Alba, Edulis Common La Tulip, Marie Lemoine, Asa Gray, Francois Ortegal, Felix Grousse, Model de Perfection, Mons Jules Elie, Officinalis Rubra and Rosea.

These plants we can offer from 25c each up to \$3.00 each. The greater the cost the bigger the plant. We can furnish plants that will positively bloom the first season. We have them in fine established clumps, 5 years old and when you buy one of these you can look for immediate results.

Lillies are the most important of the hardy Garden Flowers they are a most fascinating flower when in bloom and no other flower creates such an impression as do a cluster of pink and white Lillies. The varieties listed here are absolutely hardy.

Evergreens

For Forestry, Planting, the Norway Spruce, is more useful than any other kind of a tree. It is absolutely hardy, grows in most any soil and exposure and lends itself to all purposes either as a hedge, solitaire specimen or more especially in a forest grove, in lots of one acre, ten or twenty acres or more. It grows into a woods in a very few years with its rich dark foliage together with the native odor similar to that of the Balsam Fir. These trees become a source of immeasurable pleasure and gratification, as they add very early in their growth to the general appearance of the landscape about them. They can be planted close together and thinned out as they grow up or one can plant them in their permanent places right away or about 100 trees to the acre. At any rate if there is room for but ten or twenty trees these should be planted; you will thus create a thing of lasting beauty at a small cost. We will be glad to show 30,000 growing in our nursery where you can see how pretty they really look.

Prices of these trees are as follows:

Norway Spruce transplanted, bushy, well cared for, stock clean and healthy down to the roots.

"A Certificate" of Nursery Inspection has been granted by the Department of Agriculture of the State of Pennsylvania showing that our trees, shrubs and plants have been found free of all dangerous insects, scales and other pests attacking plant life, signed by Prof. Enos B. Engle, State Nursery Inspector. I heartily co-operate in this work of supervision and try to keep on the lookout for any such insects all the year round so as to positively keep clean and be able to give to my patrons stock that is conspicuous for its purity as well as sturdiness of growth.

The Home grounds should be carefully planned before planting. The manner and appearance of it spells to a large extent, the personality of the owner. Some of the home grounds are almost irritating to the refined taste and conceptions of intelligent people who appreciate the creations of the true landscaper whether on a large or small scale. There always must be a respect for dignity and harmony in grouping shrubs and trees and so place them that they harmonize with the style of architecture of the home.

If ready to undertake any planting, write and ask for advice. At a small cost I will make a planting plan, showing how to lay out your home grounds and what to plant. At a moderate cost, I will come by appointment and give you part of a day or a whole day on your premises, giving advice or superintend the laying out of your property. At any rate I shall be pleased to receive your communications in regards to the planning of your grounds whether garden, lawn, care of trees, or the planting of a successful rosebed.

Yours for good service,

ADOLF MÜLLER,

DeKALB NURSERIES,

Norristown, Pa.

Bell 'Phone 1597.

We have a great many large evergreen trees that are just right for immediate effect. And we will be glad to have you call and inspect them.

Scotch Pine, Austrian Pine, Yellow Pine, Corsican Pine, the various varieties of Retinispora and American Arbor Vitae from 5 feet to 10 feet high in perfectly grown extra heavy specimens.

A visit to our Nursery will be of great benefit and if you are contemplating the planting of any evergreens it will pay you to come and see our stock of a hundred varieties of evergreen trees, a field of Japanese Iris, one of German Iris, one of hardy Phlox and a collection of sixty varieties of Hybrid Tea Roses that are always interesting during the growing season. In hardy Azaleas and Rhododendrons we have growing here about fifty varieties.

We also have growing trained English Espalier fruit trees, suitable for wall garden or trellis. These are the genuine trees for dwarf formal effect.

When coming please write or phone beforehand so that I may be able to meet you and give you personal attention.

Respectfully,

ADOLF MÜLLER.
