The Modern Gladiolus Grower

A monthly publication devoted to the culture of the Gladiolus, will be sent free for one year to non subscribers of the above publication. With every order amounting to \$2.50 at the single bulb or dozen rate.

Culture :

Gladiolus do well on any kind of ground, except clay. Plant early in the spring and then every two weeks until the first of July, and you will have blooms until frost comes.

Plant in rows 30 inches apart if you wish to cultivate with a horse, or 15 inches apart if you work by hand. Plant large bulbs 5 inches deep and 3 inches apart in the row.

Dig in the fall when tops turn brown, cut stem off close to bulb and let the bulb dry a few weeks and you can remove the old bulb. Store in dry, cool cellar and don't let them freeze.

Panama A seedling of America, but a much deeper pink. Large flowers and long spike.
10cts. each. 75c. per doz. \$5.00 per 100
