Introductory

My local nursery and home grounds consist of seven acres at the head of Main street, Watsonville. The gardens and greenhouses are always open and visitors are welcome at any time. We do no business on Sundays, except for emergency funeral work, but the grounds are open to visitors.

For years I have been studying the conditions in central California and have been experimenting with all varieties of flowers and plants. My aim has been to secure quality and not quantity. The varieties listed in this catalog represent those plants which grow best and produce the finest results for this section. It would not be difficult to double the number of varieties which I carry, but it would be very difficult to find another selection of plants which will give as satisfactory results.

Similarly I have always tried to raise the best. My plants are always well-rooted and healthy. I prefer to lose an order than to ship out poor stock. We exercise great care in packing our plants and any complaints of faulty stock will receive careful attention.

If you do not find what you want in this catalog write me. I am able to secure any varieties of plants which are grown and would be pleased to quote prices on application. With my equipment I am able to grow large quantities of stock under contract at surprisingly low rates, and I would be pleased to figure with you for anything you may desire.

Watsonville is just a ten minute ride from Watsonville Junction where some twenty trains pass daily. This gives fine railroad and express connections, ensuring prompt shipment and no loss from delays in transit.

RAMBLER ROSES

Of late years these roses have become very popular. Their hardiness, their rapid growth and the profusion of bloom, together with the beautiful shades and colors obtainable has led to their extensive use in hedges, against walls and unsightly buildings, over fences, on trellises and lattices, etc. I have tried out the new varieties as they have appeared from time to time, and have here what I believe to be the finest collection of its kind in California. The following fifteen climbing roses represent the cream of the finest eastern collections,

tested out under California conditions. I add to it from time to time, but it will be difficult to find any roses which will give better returns under ordinary California conditions than the following.

Evangeline. Large single flowers, white with tips of petals shaded pink; young foliage bronze green.

Flight. Large trusses, flowers semi-double, pink with white center.

Lady Gay. Deep rosy pink, foliage dark glossy green. One of the finest in the whole collection.

Hiawatha. Glowing ruby-crimson, single flowers, with petals shading to pure white at the base.

A. Barbier. Best hardy yellow climber, flowers full and double.

American Pillar. Very vigorous plant. Flowers produced in profusion, bright pink, followed by clusters of attractive red berries.

Crimson Rambler. Rich glowing cluster. Wants a warm sunny location.

Debutante. Soft pink, double flowers. A late bloomer.

La Fiamma. White center with crimson border, dark glossy green foliage.

Lily Ito. Characteristic Japanese Rambler. Small perfect white flowers, small bright green foliage.

Sweetheart. Bright pink shading to soft white when fully opened, dark glossy foliage.

Tausendschon (Thousand Beauties). Wonderful variation of color, ranging from delicate balsam or tender rose to carmine.

Trier. Pale pink changing to white.

Newport Fairy. Lovely single flowers in large clusters, deep pink, shading lighter in the center.

White Dorothy Perkins.

Blue Rose. A rampant climber bearing great trusses of flowers which open red in the bud but change to a brilliant steely blue.

SALVIA. Splendens. Brilliant scarlet plumes. 5c ea.
Uliginosa. New introduction; blue; shrub 5 to 6 feet. 10c.

SCABIOSA. Handsome border plant for a sunny location. Choice lavender. 10c each.

SHASTA DAISIES. 10c each. Extra large field clumps. 25c.

STATICE (Sea Lavender). Can be dried. White and lavender. 15c each.

Berries, Etc.

Pajaro Valley is one of the largest berry sections in California. I have had exceptional opportunities to study the berry situation, and the large number of plants I handle for acreage planting reaching 4,000,000 some years, enables me to offer the finest stock at a very low rate. Most of the stock is from Oregon, as plants grown in a colder climate do best in California. This list is for small growers and

gives the varieties carried. If you are contemplating any large planting write me for close estimates on your requirements.

Seed Potatoes

There is a large acreage of potatoes planted in the Pajaro Valley, enabling me to quote good prices on California grown seed potatoes. By importing Oregon grown potatoes in carload lots I can save you freight on your orders and give the best seed potatoes grown.

The Oregon varieties usually planted in California:

PRIDE OF MULTNOMAH. Fine keeper, fine grained, snowy white skin, smooth and white.

HUNDRED FOLD. Russet skin, very hardy small vines, tubers large and uniform.

AMERICAN WONDER. Early variety, strong grower and great producer. Tubers white, large and uniform with few eyes and of good quality.

SNOW. A Maine variety. Wonderful producer on poor or light soils. Large oval tubers, slightly flattened, shallow eyes and netted skin, fine grained, flaky and of excellent quality.

EARLY ROSE.

BURBANK. Both high and low top varieties.

FRUIT TREES

I can give references to many satisfied customers. Out of 7,300 apricot trees set in two tracts last year only three trees failed to grow well. This is only one of the many reports which I receive from those who have planted my trees.

My stock is grown by most experienced nursery-men, great care being used in the selection of buds

and sions from the strongest and most prolific trees in the best orchards in the state.

I make a specialty of growing trees one year in advance on order from buds you may select, at special rates.

GUARANTEE OF GENUINENESS

While I exercise the greatest care to have all my stocks true to label, and hold myself in readiness on

proper proof to replace all trees, etc., that may prove untrue to label free of charge, or refund the amount paid, it is mutually understood and agreed to between the purchaser and myself, that my guarantee of genuineness shall in no case make me liable for any sum greater than that originally received for said trees, etc., that may prove untrue.

This list is for the small planter and gives a list of varieties. Large planting and acreage estimates a specialty. Any variety not listed furnished on application.

CUT FLOWERS

At the nursery you will find one of the best equipped retail florist's stores in central California. Located so near to Watsonville Junction with frequent train service in easy access, orders can be sent out promptly. Funeral work in any design can be made up on short notice at moderate prices. We keep a supply of all varieties of cut flowers in season. Carnations can be shipped at any time with or without ferns.

We make a specialty of our 18 in. floral wreaths at \$3, and 18 and 24 in. pillows at \$3.50 and \$5.

For Memorial Day we have a special box of flowers for \$1. This is good value and contains a variety of hardy flowers which can be shipped anywhere.

Choice boxes of carnations, violets, etc., made up and shipped for anniversaries, weddings, graduations, etc.

Supplies and Equipment

I carry a full line of wire and terra-cotta hanging baskets, pots and saucers, moss, fertilizers, etc., as well as ribbons and baskets, etc., for the cut flower work. I can quote close prices on any of this stock.

LAWN SEED. Recleaned Kentucky bluegrass. 25c per pound.

White clover. 60c per pound.
